SUPREME COURT OF THE UNITED STATES

OCTOBER TERM, 1941

No.

In the Matter

of

THE WESTERN PACIFIC RAILROAD COMPANY, a corporation,
Debtor.

IRVING TRUST COMPANY, as Substituted Trustee under the General and Refunding Mortgage of The Western Pacific Railroad Company,

Petitioner,

against

CROCKER FIRST NATIONAL BANK OF SAN FRANCISCO and SAMUEL ARMSTRONG, as Trustees under The Western Pacific Railroad Company First Mortgage dated June 26, 1916; FREDERICK H. ECKER, JOHN W. STEDMAN and REEVE SCHLEY, constituting the Institutional Bondholders Committee; WESTERN PACIFIC RAILROAD CORPORATION; THE WESTERN PACIFIC RAILROAD COMPANY; A. C. JAMES CO.; THE RAILROAD CREDIT CORPORATION; and RECONSTRUCTION FINANCE CORPORATION,

Respondents.

Petition for Writ of Certiorari to the United States Circuit Court of Appeals for the Ninth Circuit

To the Honorable the Chief Justice and the Associate Justices of the Supreme Court of the United States:

Your petitioner, Irving Trust Company, as Substituted Trustee under the General and Refunding Mortgage of The Western Pacific Railroad Company, dated as of Janu-

ary 1, 1932 (hereinafter respectively called the "Refunding Mortgage Trustee" and the "Refunding Mortgage"), respectfully prays for a writ of certiorari to review a decision of the United States Circuit Court of Appeals for the Ninth Circuit, rendered February 16, 1942 (R. 2681), on rehearing of an earlier decree of said Court dated November 28, 1941 (R. 2663, 2675), which reversed an order of the United States District Court for the Northern District of California, entered August 15, 1940 (R. 2569), approving a plan of reorganization for the Debtor under Section 77 of the Bankruptcy Act.

The review sought by this petition is limited to the questions concerning the relative liens of the Refunding Mortgage and the so-called First Mortgage of the Debtor. Petitions for writs of certiorari to review said decree of November 28, 1941 in other respects are already pending, having been filed respectively by Frederick H. Ecker, *et al.* (No. 819), and Crocker First National Bank of San Francisco, *et al.* (No. 820).

The record on this petition is the same as the record on No. 819 (which constitutes the record on No. 820 also). This petitioner begs leave to refer to the certified transcript filed in No. 819, and prays that such certified transcript be deemed to accompany this petition within the meaning of Rule 38 of this Court.

Opinions below.

The opinion of the District Court, dated August 15, 1940 (R. 1569), is reported in 34 F. Supp. 493.

The opinion of the Circuit Court of Appeals, dated November 28, 1941 (R. 2663), is reported in 124 F. (2d) 136.

No opinion was rendered by the Circuit Court of Appeals in deciding the petitions for rehearing. The order thereon dated February 16, 1942, amending a prior order dated February 12, 1942, is printed in the supplemental record (R. 2681).

Jurisdiction

The jurisdiction of this Court is invoked under Section 240-a of the Judicial Code, as amended by Act of Congress of February 13, 1925 (U. S. Code, Title 28, Section 347-a).

Petitioner's time to apply for certiorari runs from the date of the Circuit Court of Appeals' decision on rehearing, namely, three months from February 16, 1942. *Chicago Great Western R. Co.* v. *Basham*, 249 U. S. 164; *Robertson, Practice & Procedure in the Supreme Court of the United States* (Rev. Ed. 1929), p. 4.

Statement of the matters involved

Petitioner, Irving Trust Company, was substituted as Trustee under Debtor's Refunding Mortgage on November 13, 1936 (R. 1053) during the course of hearings before the Interstate Commerce Commission on various proposed plans of reorganization. Bonds outstanding under the Refunding Mortgage aggregate $18,999,500 principal amount (R. 1056), and all of them are pledged, in varying amounts, with three creditors, namely, A. C. James Company, Railroad Credit Corporation, and Reconstruction Finance Corporation.

The Refunding Mortgage is a lien on substantially all the property of the Debtor (R. 1231-46).* The lien of

* The granting clauses of the Refunding Mortgage are printed in the record at the pages indicated. The balance of the Mortgage (I.C.C. Ex. 6) is not printed, but constitutes part of the record, under a stipulation approved by the Circuit Court of Appeals (R. 2612-25).

the Refunding Mortgage is subject "in so far, but only in so far (in extent, degree of priority or otherwise), as in law the same respectively may attach" (R. 1247) to the First Mortgage of the Debtor dated June 26, 1916, under which there are outstanding approximately $50,000,000 principal amount of bonds (R. 1047).

Evidence respecting the relative lien of the two mortgages on various parcels of property was introduced before the Interstate Commerce Commission. The Commission, while stating that "final adjudication of this and similar questions must be made by the court" (R. 262), made a preliminary determination, overruled the Refunding Mortgage Trustee's contentions and stated that the First Mortgage bondholders should be "considered as having a first lien upon practically all the assets of the Debtor" (R. 267). In consequence, its original Report provided for the issuance of nothing but common stock to the creditors secured by Refunding Mortgage bonds (R. 278) in respect of the security afforded by such bonds.

Following a petition for modification filed by the Refunding Mortgage Trustee, the Commission, in a supplemental report, recognized that deposited cash and certain securities of Tidewater Southern Railway Company, which were admittedly subject to the Refunding Mortgage as a first lien, had substantial value, and directed that the holders of Refunding Mortgage bonds be awarded, in consideration thereof, new income mortgage bonds in the amount of $732,010, and new participating preferred stock of a par value of $1,147,955 (R. 315).

The Refunding Mortgage Trustee filed objections to the approval of the Plan, which were overruled by the District Court (R. 1597).

Thereafter, the Refunding Mortgage Trustee appealed to the Circuit Court of Appeals from the order approving the Plan. The appeal was limited (R. 1616, 1651) to questions relating to the lien of the Refunding Mortgage, in respect of which the pledgees of the Refunding Mortgage bonds have recognized that the Refunding Mortgage Trustee was the appropriate party to present such questions (R. 911, 961, 1631, 1644; I.C.C. Min. 477, 550-51). The present petition is filed at the express request of two of such bondholders.

Proceedings in the Circuit Court of Appeals

The opinion of the Circuit Court of Appeals did not deal with the legal questions of conflicting lien, and made no determination with respect thereto. In its original opinion, the Circuit Court of Appeals ruled that the Refunding Mortgage Trustee was not adversely affected by the Plan and was not entitled to appeal, and dismissed its appeal (R. 2668; 124 F. (2d) at 138).

Thereafter the Refunding Mortgage Trustee filed a timely petition for rehearing seeking to have the Circuit Court of Appeals' decision modified so as to determine that the Refunding Mortgage Trustee was a proper party appellant, and so as to include an immediate determination of the lien question.

The Circuit Court of Appeals, on such petition for rehearing, set aside that portion of the decree dismissing the appeal of the Refunding Mortgage Trustee, but denied the petition for other relief (R. 2681).

In other words, the Circuit Court of Appeals has recognized the standing of the Refunding Mortgage Trustee as a proper party appellant, but has declined to decide at this time the questions raised by its appeal with respect to the extent of the lien of the Refunding Mortgage.

One other portion of the Circuit Court of Appeals' original opinion is very pertinent to the claims of the Refunding Mortgage Trustee. The Court, in directing that the Plan be remanded to the Commission, stated that it was necessary for the Commission to make findings with respect to the *value* of

> "(1) the property subject to the refunding mortgage only and (2) the property subject both to the refunding mortgage and to the first mortgage." (R. 2670; 124 F. (2d) at 139.)

It will be difficult, to say the least, for the Commission to make such findings until there has been a final determination of the extent of the respective liens of the two mortgages.

The lien questions

Without attempting to argue the merits of the lien controversy in this petition, we set forth below a summary of the facts and legal contentions on each question, so that this Court may have before it both the nature of the items involved and the principal legal issues which are presented with respect to each item.

1. The first issue of lien relates to certain of the Debtor's rolling-stock, which was acquired under conditional sale or equipment-trust agreements, and in which the Debtor had an equity at the date of institution of the proceedings of over $6,000,000 (R. 1074). All the payments on account of this rolling-stock were made from the Debtor's free funds, or from proceeds of Refunding Mortgage bonds (R. 1073-74). None of it was owned by the Debtor at the time of the execution of the First Mortgage.

The exclusion from the lien of the First Mortgage of equipment-trust rolling stock bought with free funds is clearly set forth in the granting clause of the First Mortgage, which provides (R. 1229):

> "and the Company may, *unless First Mortgage Bonds shall have been authenticated and delivered or their proceeds or other cash deposited hereunder paid out against the same,* purchase and acquire equipment, *free from the lien hereof,* by lease, conditional sale agreement or under any form of equipment trust, or purchase such equipment and issue obligations therefor secured by mortgage or pledge of such equipment superior to the lien of this indenture." (Italics supplied by counsel.)

The Refunding Mortgage contains express provision pledging the equity in such rolling-stock (R. 1244-45).

The reason given by the Commission (R. 266) and adopted by the Court (R. 1597) for nevertheless holding such rolling-stock to be subject to the First Mortgage was an alleged inconsistency between the free funds clause and the subject clause of the First Mortgage, which latter provided (R. 1230):

> "SUBJECT, HOWEVER, as to all equipment now owned to the equipment trust or conditional sale agreements secured thereon, and as to equipment hereafter acquired, to the equipment trust or conditional sale agreements to which the same shall be subject *as permitted hereby* * * *." (Italics supplied by counsel.)

The fallacy of this argument lies in the failure to consider the first italicized provision of the free funds clause above which, we believe, clearly contemplates that rolling-stock may be acquired under equipment-trust either (1)

with First Mortgage funds—in which event the First Mortgage will be a lien thereon "subject * * * to the equipment trust or conditional sale agreements * * * permitted hereby", or (2) with free funds—in which event the equipment will be "free from the lien hereof".

2. The second lien question relates to the Debtor's Northern California Extension. This extension was completed in 1932, at a cost of over $10,000,000 (R. 1078), and has proved to be one of the most valuable parts of the Debtor's system (R. 1935, 1942-48, 1980). The Refunding Mortgage Trustee claims that the Extension is subject to the lien of the First Mortgage only to the extent of the First Mortgage bonds ($5,000,000 principal amount) used in the construction thereof and that otherwise it is subject, under the facts appearing in the record, to the *pari passu* lien of the Refunding Mortgage, inasmuch as the moneys for the completion of the Extension (over $5,000,000) were supplied by the Refunding Mortgage creditors (R. 1078; I.C.C. Ex. 52, p. 647), and less than half the cost of land on which it is built was paid from First Mortgage funds (R. 1082-84).

The extension is specifically described in the Refunding Mortgage (R. 1236).

No supplemental indenture was ever executed subjecting the Extension to the lien of the First Mortgage (R. 1077). It cannot be brought under the after-acquired property clauses as an appurtenance of the mortgaged property (*New Orleans Pacific R. Co.* v. *Parker*, 143 U. S. 42, 55; *Humphreys* v. *McKissock*, 140 U. S. 304, 313-14).

The holding that the First Mortgage was nevertheless a first lien on the entire Extension to the full extent of the $50,000,000 of First Mortgage bonds outstanding was

rested on that portion of the after-acquired property clause which gives a lien where First Mortgage bonds or their proceeds were used "on account of the purchase, acquisition or construction thereof or work thereon" (R. 122). This was construed as granting a lien for the entire $50,000,000 on the entire extension if it was financed "*in any part*" (even $1,000) "with first-mortgage bonds or cash deposited under that mortgage" (R. 264). This holding is inconsistent with the strict construction of after-acquired property clauses (*Smith* v. *McCullough*, 104 U. S. 25) and with the doctrine of *pari passu* lien, exemplified by the case of *Citizens Savings and Trust Co.* v. *Cincinnati and Dayton Traction Co.*, 106 Ohio St. 577.

3. The third lien question relates to non-carrier real estate (R. 1089-91), of a book value of approximately $1,850,000, which the Refunding Mortgage Trustee contends is free from both the First Mortgage and the Refunding Mortgage, and must be given consideration, as unmortgaged property, in the allocation of securities to the Refunding Mortgage creditors, as well as the First Mortgage creditors, in the event it is found that they are not fully secured.

The Refunding Mortgage Trustee's argument is based on the provisions of the 1915 plan of reorganization of the Debtor's predecessor, which restricted the lien of the First Mortgage to "existing railway properties" (R. 1141), and on the lack of any express reference in the First Mortgage to these very substantial pieces of real estate. We consider the interpretation of the First Mortgage as covering such property to be inconsistent with established rules of construction and also to violate the contract created by the 1915 reorganization agreement (Cf. *American Brake Shoe & Foundry Co.* v. *New York Railways Co.*, 277 Fed. 261, 271-72—S.D.N.Y.).

4. A fourth lien question was presented to the Circuit Court of Appeals, relating to the amount and type of securities that should be issued to the Refunding Mortgage creditors in recognition of thei undisputed first lien on pledged securities of Alameda Belt Line and Central California Traction Company (R. 1042-43), in respect of which no new securities are proposed, under the Plan, to be issued.

The supplemental report of the Commission stated that "the lien on the securities of these two companies has no material value" (R. 315), but it made no specific finding concerning the value of the securities, as required by *Consolidated Rock Products Co.* v. *DuBois*, 312 U. S. 510, and *In re Chicago, Milwaukee, St. P. & P. R. Co.*, 124 F. (2d) 754 (C.C.A. 7).

Moreover, the record shows that *some* value *must* be given to these securities, since they carry ownership of important feeder lines, which produce an aggregate of $500,000 per year of traffic for the Debtor (R. 110, 203, 1312); and the Debtor's Trustees have testified that the benefit derived by the Debtor from its ownership of these lines is greater than any loss it suffers from having to make advances to them (R. 1315; see also R. 1262-63, 1102).

By requiring that the Interstate Commerce Commission find the value of the property subject to the Refunding Mortgage (R. 2670), the Circuit Court of Appeals has paved the way for a proper solution of this question, and it need not be considered further in this Court.

The Circuit Court of Appeals' decision requires, as observed above, that the Commission value the property subject to each mortgage. But an attempt to fix the

values of separate parts of the Debtor's properties, and to make a correct allocation of securities on the basis of such values, will be difficult and wasteful, if not impossible, until there has been a final adjudication concerning the priority of liens on the Debtor's properties.

Therefore it is desirable and necessary that such questions of priority be determined at this time.

Questions presented

The first and fundamental questions presented by this petition are:

1. Should a proceeding be remanded to the Interstate Commerce Commission for determination of the value of the properties subject to the liens of various mortgages without a final adjudication by the Court of legal questions squarely and properly presented to it concerning the extent of the lien of such mortgages?

2. Is it proper for an appellate court, reviewing objections to a reorganization plan, to leave undetermined questions of law, squarely and properly presented to it, affecting the priority of lien on over $12,000,000 worth of the Debtor's property?

If this Court reviews the whole case on certiorari, the following further questions will be presented to it for determination:

3. Is equipment acquired by a mortgagor with free funds under equipment-trust agreements subject to the lien of the Company's First Mortgage when that Mortgage provides:

> "The Company may, unless First Mortgage bonds shall have been authenticated and delivered or their proceeds or other cash deposited here-

under paid out against the same, purchase and acquire equipment, free from the lien hereof, by lease, conditional sale agreement or under any form of equipment trust * * *." (R. 1229)

4. Where less than half the total cost of the Debtor's Northern California Extension was supplied from the proceeds of First Mortgage bonds, and less than half of the cost of the land on which it was built was paid from proceeds of First Mortgage bonds, and the balance (over $5,000,000) of such cost was furnished by creditors who are pledgees of Refunding Mortgage bonds, is such Northern California Extension subject, under the facts shown in the record, to the exclusive prior lien of the First Mortgage to the extent of the entire $50,000,000 of First Mortgage bonds outstanding, or is it subject to the First Mortgage only to the extent of the proceeds of First Mortgage bonds used in its construction, and otherwise subject to the *pari passu* lien of the Refunding Mortgage?

5. Is non-carrier real estate which is not described in the First Mortgage nevertheless subject to its lien, particularly when the reorganization plan under which such Mortgage was created restricted its lien to railway properties?

Reasons relied on for the allowance of the writ

1. The Circuit Court of Appeals has decided a federal question respecting the necessity of determining the lien status of property of a company in reorganization, in a way which is in conflict with the decision of this Court in *Consolidated Rock Products Co.* v. *DuBois,* 312 U. S. 510.

Determination of the property on which creditors hold liens is fundamental to the enforcement of the absolute or full priority doctrine of *Northern Pacific Ry. Co.* v. *Boyd*, 228 U. S. 482, and *Case* v. *Los Angeles Lumber Co.*, 308 U. S. 106, 122. This Court's opinion in *Consolidated Rock Products Co.* v. *DuBois*, 312 U. S. 510, 520, made that plain at the outset, the Court mentioning not only the necessity of "the requisite valuation data" (312 U. S. 520), but also stating (*ibid.*):

> "In the first place, there must be a determination of what assets are subject to the payment of the respective claims. This obvious requirement was not met."

The decision below fails to distinguish between the questions of fact respecting the value of the property subject to the liens of the respective mortgages, and the questions of law concerning what properties are affected by those liens. The former questions may properly be remitted to the Commission for determination in the first instance; the latter questions must be decided by the courts at the earliest opportunity, and the duty to make such decision may not be avoided or postponed.

2. The Circuit Court of Appeals, by failing to decide all the questions before it, has so far departed from the accepted and usual course of judicial proceedings as to call for an exercise of this Court's power of supervision.

The questions concerning the extent of lien were squarely presented to the Circuit Court of Appeals on this appeal. They are set forth in the Refunding Mortgage Trustee's statement of points on its appeal (R. 1652-53). They were fully briefed and argued before the

Circuit Court of Appeals, but its opinion contains not a word relating to such issues, except the statement (124 F. (2d) at 139) that the determination of the value of the property subject to the Refunding Mortgage and the First Mortgage "of course, necessitated a determination as to which of the Debtor's property is, and which is not, subject to each mortgage."

Nothing can be gained but delay by referring these legal questions to the Commission again. The Commission has already made its provisional determination (R. 267) of what property is subject to the Refunding Mortgage, although recognizing (R. 262) that its determination was only preliminary and that final adjudication of such matters must be made by the court. The District Court has already passed on the matter (R. 1597), albeit in a summary fashion.

In the normal and orderly course of procedure, the errors which the Refunding Mortgage Trustee complained of in the action of the Commission and the District Court should have been decided before the case was remanded.

As was stated in *The Bay of Naples* (48 Fed. 737—C.C.A. 2):

> "when the law gives a party a right to appeal, he has the right to demand the conscientious judgment of the appellate court on every question in the case."

This Court has held, in reviewing decisions of the old Circuit Courts, that it is reversible error to refuse to make a finding one way or another on a question of fact material to the determination of the cause (*The Francis Wright*, 105 U. S. 381, 387; *Merchants Insurance Co.* v. *Allen*, 121 U. S. 67, 71). The same principle should apply to the decision of questions of law.

The decision here is also inconsistent with the theory of the ruling of the Circuit Court of Appeals for the Seventh Circuit in *In re Chicago, Milwaukee, St. P. & P. R. Co.*, 124 F. (2d) 754-63, that

> "findings must be made on all vital issues, controverted or uncontroverted, and must include values of property separately considered, and also of Debtor's property as a whole."

Although the *Milwaukee* opinion refers to findings of fact concerning value, it is equally applicable to the necessity of determining what property is to be valued.

As the record now stands, the Commission and the District Court may rule, when the case is remanded, that their prior determinations respecting lien are the law of the case; if so, the first opportunity to correct them will arise when a new plan of reorganization has been adopted by the Commission, approved by the Court, and brought before the Circuit Court of Appeals on a second appeal many months hence.

All the facts necessary to decide the extent of the lien of the Refunding Mortgage are already in the record. Before being instructed to make findings concerning the value of the property subject to the Refunding Mortgage, the Commission was entitled to the answer of the Circuit Court of Appeals to the legal questions presented by the Refunding Mortgage Trustee's appeal concerning what property is, in point of law, subject to the Refunding Mortgage.

3. This Court has power, if it grants certiorari, to dispose of all questions arising on the record.

Story Parchment Co. v. *Paterson Parchment Paper Co.*, 282 U. S. 555, 567-68;

Donovan v. *Pennsylvania Company*, 199 U. S. 279, 292;

Delk v. *St. Louis & San Francisco R.R.*, 220 U. S. 580, 588-89.

Although the Court may remand the case to the Circuit Court of Appeals for the decision of questions which the Circuit Court of Appeals erroneously refused to consider (*Liberty Oil Co.* v. *Condon National Bank*, 260 U. S. 235, 245), such a remand here would inevitably mean a longer delay before the final approval of the Plan than if this Court itself shall decide the lien questions.

In order to carry out the policy of expediting railroad reorganizations (*Continental Illinois National Bank* v. *Chicago, Rock Island & Pacific Ry.*, 294 U. S. 648, 685), this Court should itself consider and decide the lien questions in conjunction with any other matters of which it shall grant review.

4. Since this petition relates not to error in any rulings by the Circuit Court of Appeals on the lien questions, but only to its refusal to decide them, we deem it unnecessary to present in any further detail the arguments supporting the Refunding Mortgage Trustee's position on questions 3, 4 and 5 above until after certiorari has been granted.

WHEREFORE, your petitioner respectfully prays that a writ of certiorari be issued out of this Court to review the judgment of the United States Circuit Court of Appeals for the Ninth Circuit, dated February 16, 1942, amending on rehearing its order entered November 28, 1941, in respect of the questions mentioned in the above petition concerning the lien of the Refunding Mortgage

on the properties of the Debtor; and that petitioner be granted such other and further relief as to this honorable Court may seem just and proper.

Dated: March 28, 1942.

HAROLD C. MCCOLLOM,
Attorney for Petitioner, Irving Trust Company, as Successor Trustee under the General and Refunding Mortgage of The Western Pacific Railroad Company.

ORRIN G. JUDD,
Of Counsel.

III. The District Court properly recognized the jurisdiction of the Commission under Section 77 and, in the exercise of an informed and independent judgment, fully performed the Court's functions under Section 77 113

1. Three Opposing Views 113

2. Section 20a of the Transportation Act and Reorganizations in Equity 115

3. The Reorganization Process Under Section 77 119

4. Extension of the Commission's Power Under Section 20a of the Transportation Act to Reorganizations Under Section 77 122

PAGE

5. The Ultimate Jurisdiction of the Court to Determine the Private Rights of the Various Securityholders 127

6. Conclusion 137

IV. Upon the entire record, this Court should reverse the decree of the Circuit Court of Appeals and affirm the order of the District Court approving the Commission plan 138

V. Securityholders who defend in the Circuit Courts of Appeals plans promulgated and approved by the Commission, and also approved by the District Courts, should not be assessed the costs of the appeals if the appeals are successful. Such costs should be assessed directly against the Debtor's estate 145

VI. Conclusion 146

Supreme Court of the United States

October Term, 1942

No. 7

IN THE MATTER
of
THE WESTERN PACIFIC RAILROAD COMPANY, a corporation,
Debtor,

FREDERICK H. ECKER, JOHN W. STEDMAN and REEVE SCHLEY, constituting the INSTITUTIONAL BONDHOLDERS COMMITTEE,
Petitioners,

vs.

WESTERN PACIFIC RAILROAD CORPORATION, a corporation; A. C. JAMES CO., a corporation; THE RAILROAD CREDIT CORPORATION, a corporation; THE WESTERN PACIFIC RAILROAD COMPANY, a corporation; IRVING TRUST COMPANY, a corporation, as substituted Trustee under the General and Refunding Mortgage of Western Pacific Railroad Company; RECONSTRUCTION FINANCE CORPORATION; and CROCKER FIRST NATIONAL BANK OF SAN FRANCISCO and SAMUEL ARMSTRONG, as Trustees under the First Mortgage of The Western Pacific Railroad Company, a corporation,
Respondents.

BRIEF FOR INSTITUTIONAL BONDHOLDERS COMMITTEE, PETITIONERS[1]

On Writ of Certiorari to the United States Circuit Court of Appeals for the Ninth Circuit

OPINIONS BELOW

This case involves a plan of reorganization formulated and approved by the Interstate Commerce Commission in a proceeding for the reorganization of The Western Pacific

---

[1]Messrs. Frederick H. Ecker, John W. Stedman and Reeve Schley, Petitioners, constitute a Committee representing a Group of Institutional Holders of the First Mortgage Bonds of The Western Pacific Railroad Company, the Debtor, organized pursuant to the provisions of Section 77(p) of the Bankruptcy Act [11 U. S. C. § 205(p)]. The Committee was permitted to inter-

Railroad Company under Section 77 of the Bankruptcy Act (11 U. S. C. § 205).[1] The Commission's various Reports and Orders are reported at 230 I. C. C. 61, 233 I. C. C. 409 and 236 I. C. C. 1.[2]

The opinion of the District Court for the Northern District of California, Southern Division, accompanying its Order entered August 15, 1940, approving the Commission Plan is reported at 34 F. Supp. 493.[3]

The opinion of the Circuit Court of Appeals, dated November 28, 1941, reversing the District Court, is reported at 124 F. (2d) 136.[4]

JURISDICTION

The jurisdiction of this Court is invoked under Section 240(a) of the Judicial Code, as amended by the Act of February 13, 1925 [28 U. S. C. § 347(a)], and Section 24(c) of the Bankruptcy Act [11 U. S. C. § 47(c)].

The Decree of the Circuit Court of Appeals for the Ninth Circuit was entered November 28, 1941.[5] By order

---

vene in the proceeding before the Interstate Commerce Commission by order entered July 9, 1936 (R. 2620) and in the proceeding before the District Court by order entered November 27, 1939 (R. 2620). The members of the Group are John Hancock Mutual Life Insurance Company; Metropolitan Life Insurance Company; Mutual Benefit Life Insurance Company; New York Life Insurance Company; Prudential Insurance Company of America; Travelers Insurance Company; and The Chase National Bank of the City of New York. Their aggregate holdings of First Mortgage Bonds are $16,641,400, principal amount, out of a total of $49,290,100, or 34%.

---

[1]The plan of reorganization is hereinafter called the Commission Plan, the Interstate Commerce Commission is hereinafter called the Commission and The Western Pacific Railroad Company is hereinafter called the Debtor. Pertinent portions of Section 77 are printed in Appendix A.

[2]R. 194, 300, 884. [3]R. 1569 and 1600, respectively.

[4]R. 2663. [5]R. 2675-6.

filed February 12, 1942, as amended by order of February 16, 1942, said Decree was amended in a manner not relevant to the present issues.[1] Petition for writ of certiorari was filed by the Committee on December 20, 1941, and was granted on April 27, 1942. This Court also granted writs of certiorari to the Trustees under the First Mortgage of the Debtor (No. 8), the Trustee under the General and Refunding Mortgage of the Debtor (No. 61), Reconstruction Finance Corporation (No. 33), and the Debtor (No. 20). No issue is raised on any of these writs which is not raised by the writ granted to the Committee.

QUESTIONS PRESENTED

Four broad questions are presented:

1. Are the findings of the Commission and the District Court that the existing stock and unsecured debt of the Debtor "have no value," sufficient to sustain the exclusion of such stock and unsecured debt from participation in the reorganization, without a specific dollars and cents valuation of the Debtor's entire properties?

2. Are the determinations by the Commission and the District Court of the "equitable equivalent of the Debtor's assets available for the satisfaction" of each class of participating claims, in terms of the various new securities, sufficient to sustain such allocations, without dollars and cents valuations of (i) the properties upon which the mortgages are, respectively, first liens, (ii) each of the several classes of old securities and (iii) each of the several classes of new securities?

3. Did the District Court properly recognize the jurisdiction of the Commission under Section 77 and, in

---

[1] R. 2681-3.

the exercise of an informed and independent judgment, fully perform the Court's functions under Section 77?

4. Should this Court, upon the entire record, reverse the Decree of the Circuit Court of Appeals and affirm the Order of the District Court approving the Commission Plan?

A further question is also before the Court:

5. Are securityholders who have defended in the Circuit Court of Appeals a plan promulgated and approved by the Commission, and also approved by the District Court, liable for the costs of the successful appeal, or should such costs be assessed directly against the Debtor's estate?

STATEMENT

The Debtor has paid no interest on its First Mortgage Bonds since September 1, 1933.[1] To provide time both to determine how severe was the Debtor's financial problem and to work out through voluntary negotiation a definitive reorganization plan, the two semi-annual installments maturing in 1934 were extended by voluntary arrangement, but they were not met at their extended maturity.

The Debtor filed its petition under Section 77, on August 2, 1935.[2] The proceedings before the Commission culminated September 28, 1939, in the certification of the Commission Plan to the District Court.[3]

1. Present Capitalization of the Debtor[4]

The existing claims against, and interests in, the Debtor dealt with by the Commission Plan, including interest accrued to the effective date of the Commission Plan, January 1, 1939, computed at the contract rates, are as follows:

---

[1]R. 58. [2]R. 4, 11. [3]R. 1571. [4]R. 1576

Claim or Interest	Principal of claim or interest	Accrued interest at contract rate to January 1, 1939	Total claim, including interest at contract rate to January 1, 1939
Trustees' Certificates (RFC)	$ 10,000,000.00	$ —	$ 10,000,000.00
Undisturbed existing equipment obligations	2,750,050.00	34,672.00	2,784,722.00
First Mortgage 5% Bonds	49,290,100.00	13,143,776.66	62,433,876.66
RFC[1] Notes[2]	2,963,000.00	899,869.98	3,862,869.98
RCC[1] Notes[2]	2,445,609.88	145,314.23	2,590,924.11
ACJ[1] Notes[2]	4,999,800.00	1,249,950.00	6,249,750.00
Total secured debt	$ 72,448,559.88	$15,473,582.87	$ 87,922,142.75
WP Corp.[1] and Western Realty Co.[3] advances on open account	5,818,791.00	1,992,096.00	7,810,887.00
Total debt	$ 78,267,350.88	$17,465,678.87	$ 95,733,029.75
WP Corp., owner of the entire outstanding 283,000 shares of Preferred Stock, par value $100 per share	28,300,000.00	—	28,300,000.00
WP Corp., owner of the entire outstanding 475,000 shares of Common Stock, par value $100 per share	47,500,000.00	—	47,500,000.00
Totals	$154,067,350.88	$17,465,678.87	$171,533,029.75

[1]Hereinafter the following abbreviations are used: RFC—Reconstruction Finance Corporation; RCC—Railroad Credit Corporation; ACJ—A. C. James Co.; WP Corp.—Western Pacific Railroad Corporation.

[2]The RFC Notes, the RCC Notes, and the ACJ Notes are collectively secured, in the specific amounts hereinafter stated, by all of the $18,999,500, principal amount, of the Debtor's Refunding Bonds. No Refunding Bonds have been issued except for such pledge. Except for certain securities specifically pledged with the Trustee of the Refunding Mortgage, the Commission and the District Court found the lien of the Refunding Mortgage to be junior to that of the First Mortgage.

The RFC Notes are secured by the pledge of $10,750,000 of said Refunding Bonds and by a second lien upon $2,000,000 of Refunding Bonds pledged under the RCC Notes.

The RCC Notes are secured by the pledge of $4,000,000 of Refunding Bonds, of which $2,000,000 were repledged with it by ACJ, and by a second lien on all the collateral pledged with RFC.

The ACJ Notes are secured by the pledge of $4,249,500 of Refunding Bonds and by a second lien upon $2,000,000 of Refunding Bonds originally pledged under the ACJ Notes but repledged by ACJ under the RCC Notes.

In addition, both the RFC Notes and the RCC Notes are secured by certain so-called "accommodation collateral," not owned by the Debtor, but pledged to secure said Notes by WP Corp. The RCC Notes are also secured by a first lien on the Debtor's distributive share in the fund established by the Marshalling and Distributing Plan, 1931. The right of RFC and RCC to resort to this collateral is not affected by the Commission Plan (R. 271, 394-5).

[3]Western Realty Co. is a wholly owned subsidiary of WP Corp., and a small part of the unsecured debt of the Debtor stands in its name.

2. Earnings Record of the Debtor's Properties[1]

The consolidated earnings available for interest of the Debtor and its subsidiaries for the years 1922 to 1941, both as reported and as adjusted, are set out in the following table. Adjustments have been made first, to add back to reported income all the charges against income account for the rehabilitation expenditures made during 1927-31 and 1934-8 and all charges for amortization of discount; second, to take into account deductions and credits made by the Commission in accordance with its accounting rules and regulations; and third, in the case of the 1940 and 1941 earnings, to take into account Federal income (*but not excess profits*) taxes which would be payable in respect of such earnings if the Commission Plan had been in effect during those years.

---

[1]R. 1592. The Debtor's mileage comprises 924 miles of main line track from Oakland, California to Salt Lake City, Utah, and approximately 112 miles of main line track connecting the Debtor's main line with the lines of the Great Northern in north central California. It also includes branch lines aggregating approximately 119 miles. The Debtor also owns (in addition to substantially valueless and unimportant securities) substantially all of the outstanding capital stock and indebtedness of Sacramento Northern Railway (an electric line of 276 miles operating in general between San Francisco and the Sacramento Valley) and Tidewater Southern Railway Company (an exclusively freight line of 61 miles operating in the San Joaquin Valley); and fractional interests in the securities of Central California Traction Company (an electric line of about 54 miles between Stockton and Sacramento, California) and the Alameda Belt Line (a 16 mile belt line at Alameda, California).

Year	Earnings Available for Interest[1] Reported	As Adjusted
1922	$2,306,124	$2,404,890
1923	3,313,976	3,412,234
1924	3,144,124	3,241,823
1925	4,454,352	4,567,798
1926	4,759,282	4,868,390
1927	2,674,494	3,470,861
1928	2,964,371	4,376,972
1929	2,529,846	3,718,436
1930	1,552,487	2,381,529
1931	186,708(D)	220,494(D)
1932[2]	252,706	283,912
1933	674,007	474,365
1934[3]	1,084,244	1,396,353
1935	805,589	1,377,026
1936	181,102	1,901,423
1937	903,113(D)	1,077,407
1938	1,243,916(D)	225,431
1939	1,384,515	1,519,916
1940	2,649,797	2,361,620[4]
1941	4,548,138	3,587,674[4]

(D) Deficit

[1]R. 1064-6, 2629, 2635. The adjusted figure of $4,412,234 for 1923 contained in the Stipulation before the District Court is an obvious typographical error. See R. ~~2626~~ 2036

[2]The Northern California Extension was put into operation November 10, 1931, so that the properties covered by this earnings record from 1932 on are the same properties as those to be acquired by the reorganized company. That Extension (112 miles) forms a connection in north central California between the main line of the Debtor, at a point 281 miles from San Francisco, with a branch of the Great Northern running southward through central Oregon into northern California. It created a new north-south route over the combined lines of the Great Northern and the Debtor, and further southward over the Santa Fe, competitive with the Southern Pacific System.

[3]The Dotsero Cut-off was put into operation in 1934. It is a 38 mile line, a part of the lines, not of the Debtor, but of the Denver & Rio Grande, one of the Debtor's connections, which resulted in shortening by 175 miles the joint route of the Debtor and the D & R G from Salt Lake City into Denver.

[4]These figures are after deducting Federal income taxes payable on 1940 and 1941 earnings under the capitalization contemplated by the Commission Plan. Adjusting reported earnings for such taxes upon the basis of the Debtor's present capitalization, but disregarding losses aggregating $2,799,265 incurred in prior years and claimed by the Debtor to be deductible for the purpose of computing 1941 taxes, the adjusted earnings for 1940 would be the same as reported earnings, and for 1941 $4,315,834. If such deductions for antecedent losses claimed by the Debtor are allowable, they will so reduce 1941 earnings as to result in no Federal income taxes for that year. Computations of these taxes are set forth in Appendix B. *No adjustment of 1941 earnings has been made for any possible Federal excess profits tax.* Whether such earnings may be subject to such a tax depends upon tax legislation not yet enacted.

The earnings for the years 1922 to 1938 were before the Commission and are as found by the Commission; those for 1939 were before the District Court; and those for 1940 were before the Circuit Court of Appeals. Those for 1941 are computed from the monthly statements of earnings which by stipulation filed July 23, 1942, the parties agreed may be considered by this Court.

In considering the overall picture presented by these earnings it must be borne in mind that the $9,268,373 of rehabilitation expenditures added back to the adjusted earnings for the years 1927-31 and 1934-8 represent deferred maintenance which had accrued prior to 1927.[1] The exact amount of the accruals of such deferred maintenance for the various years prior to 1927 cannot be computed with any accuracy, but as *no* adjustment has been made in the foregoing table to take into account such deferred maintenance for the prior years, the earnings of those years, even as adjusted, are necessarily overstated by a substantial amount.

3. New Capitalization under the Commission Plan

The Commission Plan provides the following capital structure for the reorganized company, effective as of January 1, 1939,[2] the Commission, as hereinafter pointed out, having found upon consideration of all the various factors affecting the value of the Debtor's property, that no

---

[1]R. 1052, 1063, 1065, 1214. [2]R. 1575.

larger capitalization was compatible with the public interest:[1]

Title of issue	Presently to be issued	Annual charges
Undisturbed existing equipment obligations	$ 2,750,050	$ 94,202
First Mortgage 4% Bonds, Series A, due January 1, 1974	10,000,000	400,000
Total annual fixed charges		$ 494,202
Mandatory Capital Fund		500,000
Income Mortgage 4½% Bonds, Series A, due January 1, 2014. Interest cumulative to 13½%, otherwise non-cumulative. Convertible at the option of the holder into new Common Stock at the price of $50 per share	21,219,075	954,858
Total funded debt	$33,969,125	
Total annual charges (fixed and contingent) and Capital Fund		$1,949,060
Income Mortgage Sinking Fund (½%)		106,095
Participating 5% Preferred Stock ($100 par value). Preferred on liquidation to extent of par value plus any accrued cumulative dividends. Dividends cumulative only to the extent earned in any calendar year but not paid; otherwise non-cumulative. Participating share for share with Common Stock in dividends declared in any year after dividends have been declared on Common Stock at rate of $3 per share	31,850,297	1,592,515
Total securities with par value	$65,819,422	
Total annual charges, Capital Fund, and Preferred dividend requirements		$3,647,670
Common Stock (without par value)	319,441 shs.	

[1] R. 889-90.

4. Distribution under the Commission Plan

The Trustees' Certificates were sold to RFC early in the reorganization proceeding to provide $10,000,000 for rehabilitation of the Debtor's properties and elimination of the substantial amount of deferred maintenance hereinbefore referred to.[1] Those Certificates are admittedly secured by a first lien upon all the assets of the Debtor and the Trustees.[2]

The claim of the First Mortgage to a first lien, subject to the Trustees' Certificates, upon substantially all the Debtor's assets, except the securities of certain subsidiary corporations specifically pledged with the Refunding Mortgage Trustee,[3] was disputed. Likewise disputed was the value of the collateral pledged under the Refunding Mortgage. In allocating the new securities, the Commission preliminarily decided the disputed lien questions in favor of the First Mortgage, subject to ultimate determination by the District Court.[4] The Commission also decided the disputed value questions.

---

[1]R. 1834-6. [2]R. 1836.

[3]In 1934, pursuant to an agreement extending the payment of 1934 interest on the Debtor's First Mortgage Bonds, RFC, ACJ, RCC and WP Corp. (the only other creditors affected by the Commission Plan) agreed to subordinate their claims against the Debtor until this 1934 interest (still unpaid) is paid in full. Accordingly the case presents no problem as to the relative rights of senior and junior creditors in unmortgaged assets. I. C. C. Exhibits 117-121 (not printed pursuant to stipulation at R. 2532-8, 2614, but before this Court pursuant to stipulation filed on July 23, 1942).

[4]R. 262. The District Court affirmed the Commission's determination of the lien questions but, although the propriety of the District Court's action was raised upon appeal (R. 1652-3), the Circuit Court of Appeals failed to decide any of these questions. Their final determination by this Court is sought not only under the writ granted the Committee, but also under the writs granted

The Commission then found that "the equity of the existing stock has no value," that "the claims of the unsecured creditors have no value," that the securities allocable to the RFC Notes, RCC Notes, and ACJ Notes are "inadequate in value to satisfy their claims," and that "the equity of" RCC in the collateral pledged under the RFC Notes "has no value."

After making the additional findings hereinafter stated, the Commission excluded from participation in the reorganization the unsecured claims and stock held by WP Corp. and Western Realty Co., and distributed the new capitalization as follows:[1]

Existing Securities of Debtor[2]	New First Mortgage 4% Bonds Series A	New Income Mortgage 4½% Bonds Series A	New 5% Preferred Stock Series A ($100 Par)	New Common Stock (No Par)
First Mortgage 5% Bonds ($62,433,876.66)		$19,716,040	$29,574,060	230,593 shs.
RFC (In exchange for Trustees' Certificates and RFC Notes) ($13,862,869.98)	$10,000,000	1,185,200	1,777,800	15,788 shs.
RCC Notes ($2,590,924.11)		154,111	241,681	35,425 shs.
ACJ Notes ($6,249,750)		163,724	256,756	37,635 shs.
Totals	$10,000,000	$21,219,075	$31,850,297	319,441 shs.

The existing First Mortgage 5% Bonds are allotted new Income Mortgage 4½% Bonds for 40% of the principal

---

the First Mortgage Trustees and the Refunding Mortgage Trustee. Separate briefs are being filed in respect of the lien questions, and this brief in its further discussion will assume the correctness of the decisions of the Commission and the District Court.

[1] R. 1578.

[2] The figures in this column include accrued interest to January 1, 1939.

amount of their claim, new 5% Preferred Stock for 60% of the principal amount of their claim and 4.67 shares of new Common Stock for the $266.67 of accrued interest per $1,000 bond.[1] The price at which the Common Stock was so allotted is therefore $57 per share.[2]

RFC, in consideration of its exchanging its $10,000,000 of Trustees' Certificates for $10,000,000 of new, less valuable, First Mortgage Bonds, is allotted treatment in respect of the RFC Notes *pari passu* with the treatment allotted the First Mortgage Bonds.[3]

RCC and ACJ are allotted new securities on the following basis:

Because of the first lien of the Refunding Mortgage on the securities specifically pledged with the Refunding Mortgage Trustee, the Commission found certain amounts of new Income Mortgage Bonds and Preferred Stock properly issuable in respect of the Refunding Mortgage Bonds held as collateral for the RFC, RCC and ACJ Notes.[4] The Commission allotted to the RCC Notes and the ACJ Notes amounts of these Income Mortgage Bonds and Preferred Stock in the proportions that the amounts of Refunding Bonds pledged with them, respectively, bore to the total amount of Refunding Bonds.[5]

All the new Common Stock not previously allocated necessarily represented (1) the value of the second lien of the Refunding Mortgage upon those assets of the Debtor upon which the First Mortgage is a first lien and (2) any hope for future value of the assets upon which the Refunding Mortgage is a first lien but which the Commission found

---

[1]R. 390. [2]R. 391. [3]R. 391. [4]R. 312-6. [5]R. 391-2.

to be of "no material value."[1] The Commission divided this remaining new Common Stock between RCC[2] and ACJ, again in proportion to the amounts of Refunding Bonds held by them, respectively, as collateral.[3]

5. Valuation Data before the Commission

The Commission Plan was formulated by the Commission itself after more than a dozen different plans had been proposed by the various parties and upon evidence occupying 743 pages of the record. This evidence included

physical descriptions of the properties of the Debtor and each of its subsidiaries,[4]

comprehensive data concerning valuation proceedings affecting those properties conducted by the Commission under Section 19(a) of the Interstate Commerce Act,[5]

analyses of the Debtor's investment accounts[6] and its financial history,[7]

detailed studies of revenues and expenses for the years since 1922, broken down as among the Debtor and its subsidiaries,[8]

detailed forecasts of revenues and earnings for the then future years 1936 to 1940, also broken down as among the Debtor and its subsidiaries,[9] and

testimony with reference to the probable effect upon revenues and net income of the $10,000,000 rehabilitation program,[1] of the Northern California Extension[2] and of the Dotsero Cut-off.[3]

6. Findings Made by the Commission

After hearings, the Commission's Bureau of Finance served upon all the parties a Tentative Report proposing findings and a reorganization plan.[4] Following exceptions to this Tentative Report and a hearing before the full Commission, the Commission entered its Report and Order dated October 10, 1938, making findings and approving a plan of reorganization.[5] Upon petitions for modifications of this Report and Order and another hearing before the full Commission, the Commission entered its Report and Order dated June 21, 1939,[6] modifying both the findings and the plan of reorganization embodied in its earlier Report and Order and approving the Commission Plan. After a petition by the Debtor for a "further rehearing and modification," the Commission entered its Report and Order dated September 19, 1939,[7] reaffirming its findings and conclusions of October 10, 1938, as modified June 21, 1939, and denying the Debtor's petition.

The Commission defined the requirements of "the public interest" with respect to the new capital structure as follows:

> "The public interest is not defined, but it would seem obvious that to be compatible with the public interest, the plan must provide a capital structure

[4]R. 116. [5]R. 194. [6]R. 300. [7]R. 884.

> for the reorganized company which will give it a reasonable opportunity to function efficiently and continuously as a going concern. This requires that the capitalization should not exceed a conservative appraisal of the assets to be taken over by the reorganized company, and that proposed charges, whether fixed or contingent, be within its probable earning power."[1]
>
> "If this reorganization is to be successful, the capital structure of the reorganized company must be realistically related to its actual earning power, and consideration given to the investment in its property only to the extent that such investment is justified by the probable earnings reasonably foreseeable for the future."[2]

After pointing out that the Debtor was the product of a previous equity reorganization of its properties in 1916, the Commission made the following fundamental finding as to the prudence of the Debtor's investment in its property:

> "The present reorganization of the debtor is the second since it began complete operations in 1911. A review of its financial history shows that due to an inherent lack of earning power its past operations have resulted in financial failure, and that the investment in its property has not been justified by its earnings. In Denver & Rio Grande Investigation, 113 I. C. C. 75, we pointed out that economically the original construction of the debtor was an ill-advised undertaking."[3]

The Commission then made the following findings which the Circuit Court of Appeals for the Ninth Circuit has now held to be inadequate:

---

[1]R. 243-4. [2]R. 244. [3]R. 244.

(a) *Findings as to capitalization*

1. "If these data [*i.e.* earnings] are not to be ignored, * * * the fixed interest charges of the reorganized company should not * * * exceed $500,000, if the reorganized company is to maintain its property properly and secure necessary new capital in the future."[1]

2. "On the basis of the facts heretofore recited with respect to traffic and earnings, we find that the total annual fixed and contingent interest charges of the reorganized company, plus requirements for the capital and sinking funds, should not exceed $2,000,000 per annum."[2]

3. "As hereinbefore stated, the debtor's estimate of income available for interest averaged $2,715,306 per year for the period 1936-40, inclusive, the maximum amount for any one year in the period (1940) being $3,769,836. That amount, with prior charges of $1,898,223, would permit the payment of dividends at the rate of 5 percent on only $37,432,000 of stock. It is obvious, therefore, that based on the most optimistic estimate of earnings of record, the capitalization of the reorganized company must be maintained within strict limits if any material return on its capital stock is to be expected and the shares of its stock are not to become mere tokens for stock market speculation. It is true that considered alone, the data pertaining to the rate-making value of the debtor's property, and its investment, would support capitalizations approximating those proposed in the three plans. We have hereinbefore stated, however, the reasons why, in our opinion, those factors can not be of controlling importance in a determi-

---

[1]R. 246. [2]R. 253.

nation of the capital structure for the reorganized company. Considering all relevant data of record, we find that the approved plan should provide for the immediate issue by the reorganized company of not to exceed" the amounts of Preferred and Common Stock provided by the Commission Plan.[1]

4. On the basis of the foregoing findings the Commission fixed the permissible new capitalization.[2] Twice it found that it could not approve any larger capitalization.[3]

(b) *Finding as to classes excluded from participation*

5. "We have hereinbefore found that considering the past, present, and probable future earnings of the debtor, its investment, the data of record pertaining to its rate-making value, and all other relevant data of record, we can not approve the issue of new securities in a greater amount than that hereinbefore approved. On the same basis and for the same reasons we find, therefore, that there is no equity over and above the securities hereinbefore approved; that *the equity of the existing stock has no value,*[4] and hence holders of such stock are not entitled to participate in the plan. Further, considering that the reorganized company's income available for interest and dividends must total $4,318,035,[5] plus any undistributed profits tax that will be payable, before dividends of $3 per share may be paid on the new common stock, it is clear that *even*

---

[1]R. 257. The amounts of Preferred and Common Stock originally found permissible were slightly increased in the final Commission Plan (R. 310-311).

[2]R. 259, 310. [3]R. 310, 889-90.

[4]All italics in quoted matter throughout this brief have been supplied, unless the contrary is indicated.

[5]Under the final Commission Plan this became $4,605,993.

though all the securities remaining available for distribution after satisfying the claims of the first-mortgage bondholders are allotted to the other secured creditors, such securities will be inadequate in value to satisfy their claims. For this reason, and for the reasons stated with respect to the finding that the equity of the existing stock has no value, we find that *the claims of the unsecured creditors,* of the Western Pacific Railroad Corporation, and of the Western Realty Company, *have no value,* and hence no securities or cash should be distributed under the plan in respect to those claims."[1]

(c) *Findings as to distribution of new securities*

6. The Commission found that all of the permissible new fixed charge securities would be absorbed by undisturbed equipment obligations and new First Mortgage Bonds required to pay or refund the admittedly preferred $10,000,000 Trustees' Certificates.[2]

7. The Commission found that the first lien of the First Mortgage (subject to the Trustees' Certificates) upon all of the assets of the Debtor, except cash and securities specifically held in pledge by the Refunding Trustee, required allocation to the First Mortgage of the new securities allocated by the Commission Plan as above stated.[3]

---

[1]R. 269-70. The Commission had no problem of dealing with the rights of unsecured creditors to participate in unmortgaged assets. See p. 10, n. 3, *supra.*

[2]R. 247, 311.

[3]R. 270, 317. The original allocation by the Report and Order dated October 10, 1938, was modified by the Report and Order dated June 21, 1939, by increasing the no par value Common Stock originally allocated to the First Mortgage as against accrued interest, and by allocating Income Bonds and Preferred Stock to the Refunding Bonds, as stated in paragraph 8, *infra.*

8. The securities pledged under the Refunding Mortgage were a note and stock of Tidewater Southern Railway Company, all of whose funded debt and 97.87% of whose stock are owned and so pledged by the Debtor,[1] bonds and stock of Central California Traction Company, of which the Debtor owns and has pledged 33⅓%,[2] and stock of Alameda Belt Line, of which the Debtor owns 50% and has pledged 49.4%,[3] plus some admittedly worthless notes of other subsidiaries.[4] The Commission analyzed the property accounts, earnings records and earnings prospects of these three companies. In the light of the contributions which the Debtor has been compelled to make to continue the operations of the last two mentioned companies[5] and their poor earnings record, the Commission found that "the lien on the securities of these two companies *has no material value.*"[6] As to Tidewater Southern, the Commission found its rate-making value as of December 31, 1935, to be $1,850,000 (1.3% of the comparable System valuation).[7] Reported earnings and the revenues from traffic interchanged between it and other lines of the Debtor's System were also analyzed.[8] Such reported earnings for the six-year period 1930-1935[9] were 7.2% of System earnings as adjusted,[10] before deducting the Debtor's contributions to the deficits of the other two Refunding Mortgage first lien properties.[11] But, said the Commission, "its earnings are, to a large extent, dependent upon the divisions of joint

---

[1]R. 313. [2]R. 314. [3]R. 315. [4]R. 1095.

[5]These unreimbursed contributions totalled more than $384,000 for the six years 1930-1935 (R. 2019, 2084, 2088).

[6]R. 314-5. [7]R. 314. [8]R. 314. [9]R. 2019, 2077. [10]R. 1592.

[11]R. 2019, 2084, 2088.

rates accorded it by the debtor."[1] After the foregoing findings and after reference to the cash held by the Refunding Mortgage Trustee,[2] the Commission found that the Refunding Mortgage should be allotted $732,010 new Income Mortgage Bonds and $1,147,995 new Preferred Stock[3] (being 3.5% of the total issues), and all the Common Stock remaining after provision for the First Mortgage.

9. The RFC Notes, the RCC Notes, and the ACJ Notes were secured by pledge, respectively, of 56.6%, 21.1%, and 22.3% of the outstanding Refunding Bonds. The Commission found that the securities "available for distribution are *inadequate in value to satisfy the aggregate claims of these parties,*"[4] that "the value of each of the claims is proportionate to the collateral securing it," and hence that the allotment of new securities representing the pledged Refunding Bonds "should be made on the basis of the collateral held rather than on the amount of the claims."[5]

10. "The allocation of reorganization securities" to the RFC Notes collateral "exhausts the value of the collateral,"[6] and * * * *"the equity of the Credit Corporation* [RCC] *in such collateral has no value."*[7]

---

[1]R. 315. It will be remembered that the Debtor owns all the funded debt and 97.87% of the outstanding stock of Tidewater Southern Railway Company, so that the fairness of these rate divisions was not a matter of importance except in reorganization.

[2]R. 313. [3]R. 315. [4]R. 271. [5]R. 271.

[6]The Commission here was referring only to the new securities allotted to RFC's pledged Refunding Bonds, *i.e.* it was not including the additional new securities allotted to RFC in consideration of its furnishing new money as explained in paragraph 12, *infra.*

[7]R. 316.

11. On the basis of the findings referred to in the foregoing paragraphs 8, 9 and 10, the Commission allotted to the RCC Notes and the ACJ Notes the Income Bonds and Preferred Stock found by the Commission to be allocable as against their respective pledged proportions of the Refunding Bonds. The no par value Common Stock remaining after filling out the existing First Mortgage Bonds with 230,593 shares against their accrued interest of $13,143,777, and allotting the RFC Notes treatment as stated in the next paragraph 12, was then also allocated to the RCC Notes and ACJ Notes proportionately to the Refunding Bonds held by them as collateral.

12. To insure refunding of the $10,000,000 Trustees' Certificates, RFC was allotted, for its entire "bundle of rights" (its $10,000,000 Trustees' Certificates and the RFC Notes), $10,000,000 of new First Mortgage Bonds (to be taken in exchange for the Trustees' Certificates or to be purchased at par and the proceeds thereof applied to payment of the Trustees' Certificates) and treatment of the RFC Notes *pari passu* with the existing First Mortgage Bonds. The Commission found "that in consideration of such purchase and the value of the collateral securing its claim, the Finance Corporation receive for the secured notes of the debtor held by it, treatment equal to that accorded the holders of the debtor's existing first-mortgage bonds."[1]

13. The ultimate finding of the Commission was: "These securities [*i.e.*, all the new securities available for distribution] represent the equitable equivalent of the debtor's assets available for the satisfaction of claims. * * * *Based upon our conclusion as to the relative priority, value,*

[1] R. 312.

and equity of the various claims and the value of the new securities available in exchange therefor, we find that the new securities should be allotted"[1] as provided in the Commission Plan.

The Commission did not specifically find any specific value in terms of dollars and cents for all or any part of the Debtor's property, for any of the existing claims against or interests in the Debtor, or for any of the new securities contemplated by the Commission Plan.

7. Proceedings before the District Court

Upon certification of the Commission Plan to the District Court, objections and claims for equitable treatment were filed by RCC, ACJ, WP Corp., Western Realty Company, the Debtor, and the Refunding Trustee, which attacked, as to both form and substance, substantially every provision of the Commission Plan.[2] Their objections went primarily to alleged undue discrimination in favor of the First Mortgage Bonds and the RFC Notes as against all the junior interests. Although the Committee and RFC also filed some objections and claims for equitable treatment, each of them stated that if the District Court approved the Commission Plan as an entirety they would waive their objections and both of them urged such approval.[3]

---

[1]R. 316-7.

[2]The details of these objections (R. 892-1017) are so voluminous, complicated and contradictory, and the extent to which many of them were pressed in the Circuit Court of Appeals is so ambiguous, that no useful purpose will be served by attempting to analyze them at this point of this brief. Such of them as seem to the Petitioners to merit consideration by this Court in determining its ultimate disposition of the entire case upon the entire record will be discussed at the relevant points of the argument.

[3]R. 1760-1, 1770.

Before the District Court, testimony was taken occupying 293 pages of the record embodying substantial additional valuation data.[1] On August 15, 1940, the District Court filed a 31 page opinion overruling all of the objections and, after dealing specifically with the Commission's findings of value, determining them to be adequate in form and correct in substance.[2] The District Judge's opinion further expressed his accord, on the merits, with all of the conclusions of the Commission on the numerous other points in dispute.

Pursuant to its opinion, the District Court, on August 15, 1940, entered an Order approving the Commission Plan, adopting the findings of fact made by the Commission, and making all the other findings in respect of the Commission Plan required at that stage of the proceedings by Section 77.[3]

8. Action of the Circuit Court of Appeals

From the Order last mentioned appeals were taken to the Circuit Court of Appeals for the Ninth Circuit by RCC, ACJ, the Refunding Mortgage Trustee, WP Corp., and the Debtor. Again the appellants attacked almost every aspect of the Commission Plan, although many of the objections argued before the District Court seem to have been abandoned. The emphasis of their briefs and arguments was upon alleged failure (1) of the Commission to make necessary findings of value of properties and securities, old and new, and (2) of the District Court to exercise an independent informed judgment. The Commit-

---

[1]R. 1283-1529, 1530-1567. [2]R. 1569-1600. [3]R. 1600-1607.

tee, the First Mortgage Trustees and RFC, designated as appellees, defended the Commission Plan as an entirety.

The Circuit Court of Appeals reversed the Order of the District Court.[1] Without referring to any of the extensive findings of the Commission above recited, or the careful discussion by the District Court of the problems of value, the Circuit Court of Appeals thus disposed of the case:

> "Subsection (e) of § 77 provides: 'If it shall be necessary to determine the value of any property for any purpose under this section, the [Interstate Commerce] Commission shall determine such value and certify the same to the court in its report on the plan.' In this case, as has been seen, it was necessary to determine the value of (1) the debtor's entire property, (2) each of the claims of Reconstruction Finance Corporation, (3) the claim of Railroad Credit Corporation, (4) the claim of A. C. James Company, (5) the claims of the holders of first mortgage bonds now outstanding, (6) the $10,000,000 of new first mortgage bonds, (7) the $21,219,075 of income bonds, (8) the 318,502.97 shares of new preferred stock, (9) the 319,441 shares of new common stock, (10) the property subject to the first mortgage now outstanding, (11) the $18,999,500 of refunding bonds pledged to secure the claims of Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James Company, (12) the other collateral pledged to secure each of said claims, (13) the property subject to the refunding mortgage only, (14) the property subject both to the refunding mortgage and to the first mortgage now outstanding, (15) the property which would be subject to the new first mortgage and (16) the property which would be subject

[1] R. 2663-74.

> to the income mortgage. It thus became the duty of the Commission to determine these values and certify them to the court. That duty was not performed."[1]

In addition to this holding, the opinion of the Circuit Court of Appeals announced this guiding rule for distribution among existing securityholders: "Fairness requires that their participation should be in proportion to the value of their respective claims."[2] The opinion does not further clarify its announced rule. Taken in connection with its holding above quoted, requiring specific dollars and cents valuations, the Circuit Court of Appeals thus seems to require distribution based upon a mathematical formula derived from dollars and cents valuations of properties, existing claims, and new securities, rather than distribution based upon a determination of the equitable equivalents of the participating existing claims in the system assets and earnings, expressed in terms of the new securities.

The opinion of the Circuit Court of Appeals also commented on the functions of the court and the Commission in effecting a railroad reorganization under Section 77.

The opinion of the District Court, in addition to expressing the District Judge's own independent analysis of the valuation problem and his own independent conclusions, had said:

> "It cannot be gainsaid that the Commission knows all about the Debtor, its property, its history, financial and otherwise, its traffic and revenue, and its financial structure. No official body in the country is better qualified, by reason of experience, ability

---

[1]R. 2670-1. [2]R. 2669.

> and specialized knowledge than is the Commission to find the ultimate facts as to the Debtor in relation to any of the matters mentioned."[1]

Quoting the foregoing statement of the District Court, the opinion of the Circuit Court of Appeals stated:

> "The statement indicates a possible misconception. * * *
>
> * * * * * * *
>
> "In determining whether a plan of reorganization satisfies the requirements of subsection (e), the court is not concluded by any determination made by the Commission, but may, and must, exercise its own independent judgment; and this is true whether such determination relates to value or to some other subject."[2]

The significance of this comment of the Circuit Court of Appeals, as evidencing its belief that the District Court was under a duty to redetermine *all* of the issues involved in the reorganization and assert its own "independent judgment" if in any respect its views differed from those of the Commission, is accentuated by the fact that the District Court, following the quotation commented on by the Circuit Court of Appeals, had said:[3]

> "The two issues of (1) amount and character of capitalization and (2) distribution of new securities are closely related. The determination of the amount and character of the capitalization (a legislative function affecting the public interest) is exclusively within the province of the Commission. The only qualification, if any, is that the court shall independently determine whether, in the exercise of

---

[1]R. 1588.
[2]R. 2672-4. [3]R. 1596-7.

its jurisdiction, the Commission has acted fairly, within the bounds of the Constitution, and not arbitrarily. The determination of the questions relating to the distribution of the new securities, including legal priorities and allocations, involves private rights and is a judicial function, within the province of the court."

ARGUMENT

I

THE FINDINGS OF THE COMMISSION AND THE DISTRICT COURT THAT THE DEBTOR'S STOCK AND UNSECURED DEBT "HAVE NO VALUE," AS SUPPORTED BY THE VALUATION DATA AND THE OTHER FINDINGS IN THE RECORD, ARE SUFFICIENT TO SUSTAIN THE EXCLUSION OF SUCH STOCK AND UNSECURED DEBT FROM PARTICIPATION IN THE REORGANIZATION.

1. The Los Angeles Lumber Case[1] and the Consolidated Rock Products Case[2]

The Court below rested its decision upon what is believed to be an erroneous interpretation of those two decisions of this Court.

Prior to those two decisions the legal periodicals for more than a decade had filled many pages with controversial discussion as to the validity of two alleged "rival" or "competing" theories of priority rights in reorganization, one called "the theory of absolute priority" and the other

---

[1]*Case* v. *Los Angeles Lumber Products Co., Ltd.*, 308 U. S. 106 (1939).

[2]*Consolidated Rock Products Co.* v. *Du Bois*, 312 U. S. 510 (1941).

"the theory of relative priority."[1] The two decisions have been hailed as marking the final establishment of the "absolute priority" theory and the "demise of the relative priority theory."[2]

But doubt continues as to what is meant, not only by "absolute priority," but by many other words and phrases of the two opinions.

On the simple facts involved the two decisions were clear. Neither of the plans involved could be justified except by the brutal "composition theory" that substantially any settlement for which stockholders could procure the statutory assents of creditors was "fair and equitable." However, two points as to which there had been substantial controversy were decided: (1) that the words "fair and equitable" in Section 77B and Chapter X, being words of art, import into reorganization under those sections the standards of the so-called rule of the *Boyd* case,[3] and hence that the principles applicable to ordinary bankruptcy compositions are inapplicable to such reorganizations; and (2) that interest on creditors' claims accruing but unpaid after the initiation of the reorganization proceeding is included in the amount of the claims whose priority must be fully observed.

The opinions also broadly discussed the principles applicable to the recognition of the priority rights of cred-

[1]Compare Bonbright and Bergerman, *Two Rival Theories of Priority Rights of Security Holders in a Corporate Reorganization* (1928) 28 Col. L. Rev. 127, and Rostow and Cutler, *Competing Systems of Corporate Reorganization: Chapters X and XI of the Bankruptcy Act* (1939) 48 Yale L. J. 1334.

[2]Comment (1941) 51 Yale L. J. 85, 86.

[3]*Northern Pacific Ry.* v. *Boyd*, 228 U. S. 482 (1913).

itors both as against stockholders and as between separate classes of creditors.

The following summary of the relevant portions of those opinions is given to bring into focus words and phrases as to whose meaning debate persists.

It is not enough, says the Court in the *Los Angeles Lumber* case, that "the *relative priorities*[1] * * * are maintained." The rule is one of *"full or absolute priority."*[2] But the opinion approves the dictum of the *Boyd* case

---

[1]Throughout these quotations italics have been added to indicate the words or phrases whose meaning is disputed.

[2]It is not desired to bestir a ghost. However, the story of "the relative priority theory" evidences the dangerous ambiguities inherent in such pat phrases and words as "relative priorities," "absolute priority," "full payment," "full compensation," "make whole," "findings" and, worst of all, "value."

As early as 1882 the United States District Court for the Northern District of Illinois, in *Hancock* v. *Toledo, P. & W. R. Co.*, 9 Fed. 738, at 742, approved a railroad reorganization on the ground that it seemed to "fairly contemplate the protection of all classes of creditors of the old company in the equitable order of their priority."

In 1927 a Lecture before the Bar Association of the City of New York sought to trace judicial treatment of the problem of securityholders' priorities through subsequent decisions leading up to the historic *Boyd* case and the larger number of decisions subsequent to the *Boyd* case. These later cases had largely involved railroad reorganizations, in all of which the stocks involved not only had antecedent records of substantial earning power but evidenced a recovery of earning power following the reorganization.

The Lecture (27 Col. L. Rev. 901, 907, and 8 Lectures on Legal Topics 133, 142) made the mistake of trying to reduce a complex problem to a concise rule without adequate definition of the words and phrases employed: "The rule as I see it, and as I believe it will ultimately be developed by the courts, is that the relative priorities of the old securities, senior to the most junior securities which continue to have any interest in the property, must not be inequitably disturbed."

A host of lances appeared from the halls of legal learning to

that this rule does not "require the impossible and make it necessary to pay an unsecured creditor in cash as a condi-

---

do to death any such "rule."

On the one hand, Frank (overlooking that the Lecture did not purport to derive the "rule" solely from the *Boyd* case) insisted that the *Boyd* case depended solely upon the rule with respect to fraudulent conveyances and therefore furnished no basis whatever for the Lecture's statement that it applied as between any securities other than creditors on the one hand and stockholders on the other (*Some Realistic Reflections on Some Aspects of Corporate Reorganization* (1933) 19 Va. L. Rev. 541, 551-3). In this he was seconded by Gerdes (II Gerdes on Corporate Reorganizations (1936) §1085, and *General Principles of Plans of Corporate Reorganization* (1940) 89 U. Pa. L. Rev. 39, 48 *et seq.*), and Glenn (Glenn on Liquidation (1935) §436). This criticism, however, went only to the accuracy of the Lecture's citations of judicial precedent. The reorganization amendments to the Bankruptcy Act, with the cooperation of several of these critics, adopted the Lecture's "rule" that a reorganization plan must be "fair and equitable" as between all classes of securities.

The more persistent and effective attack on the Lecture's "rule," however, was from an entirely different angle. Bonbright (Bonbright and Bergerman, *Two Rival Theories of Priority Rights of Security Holders in a Corporate Reorganization* (1928) 28 Col. L. Rev. 127) set up two antithetic theories, one of which he called "the relative priority theory" and the other "the absolute priority theory." To more easily destroy it, he defined the former, whose origin he ascribed to the Lecture above referred to, as contemplating the perpetuation of the entire old hierarchy of securities no matter how clearly it might be established that some of the more junior among them were entirely without value. (See also Gerdes, *General Principles of Plans of Corporate Reorganization, supra,* at p. 58.) In this he overlooked both the phrase of the Lecture "junior securities which continue to have any interest in the property" and also the fact that the Lecture had expressly stated that the relative priorities might be fully observed in a simplified capital structure. The rule of "absolute priority," as stated in antithesis, contemplated that each class of senior securities, starting at the top, must be given in reorganization new securities having a "value" (and the context indicates intent to mean market price) equal to its full

tion of stockholders retaining an interest in the reorganized company. His interest can be preserved by the issuance, on

---

principal and interest before anything can be given to the next junior class. The authors of the article, however, recognized that neither theory as thus stated had ever been applied by any court (and they might have added, advocated by any responsible lawyer), and so they concluded with advocacy of "a modified form of the doctrine of relative position."

With the evaporation of corporate earnings in the depression of the early 30's, and particularly with the enactment of Sections 77 and 77B as part of "An Act for the Relief of Debtors," the "relative priority theory" sank into extreme degeneracy. It lost all semblance to the "rule" above quoted from the Bar Association Lecture and even assumed a new name, the "composition theory" (Rostow and Cutler, *Competing Systems of Corporate Reorganization: Chapters X and XI of the Bankruptcy Act* (1939) 48 Yale L. J. 1334, 1356). The theory, as thus developed, urged that the principles of old-fashioned bankruptcy composition should govern reorganizations under the new sections. It sought to impose all the sacrifices of reorganization on senior interests for the benefit of junior interests. "Relative priorities" were regarded as "maintained" if some part of the creditors' claim preserved seniority over the allotment to stockholders and if the reduction of the creditor interests did not exceed, percentage-wise, the reduction of the stockholder interests. (Note (1938) 23 Wash. U. L. Q. 543, 544).

It must have been with this last-mentioned meaning content that the opinions of this Court in the *Los Angeles Lumber* and the *Consolidated Rock Products* cases both say: "True, the relative priorities * * * are maintained" (308 U. S. 106, 119; 312 U. S. 510, 527), for in the former case creditors received nothing for 75% of their claim, and in the latter nothing for their accrued interest. That this was a use of the expression "maintenance of relative priorities" in a sense entirely in conflict with that of the early use of the term has been pointed out by Dodd (*The Los Angeles Lumber Products Company Case and its Implications* (1940) 53 Harv. L. Rev. 713, 733, n. 48).

Any "rule" or "theory" capable of such prostitution obviously merited an even earlier "demise."

The moral to be drawn from this history is that the "absolute priority theory" must be bulwarked with accurate definitions of the words and phrases which give it expression if it is not also to experience distortion.

equitable terms, of income bonds or preferred stock." However, a class of securityholders may not "be perpetuated in the new company" if "the assets [are] insufficient to *pay*—in new bonds or stock—the amount owing senior creditors." "The value to the bondholders * * * of avoiding litigation with the old stockholders" does not justify "the inclusion of the latter in the plan," for, says the Court, "the strategic or nuisance value of such parties * * * is irrelevant * * *. In these proceedings there is no occasion for the court to yield to such pressures." This, however, does not prevent compromise of "conflicting claims to specific assets which may * * * be more wisely settled by compromise rather than by litigation."

In the *Consolidated Rock Products* case, where no serious effort had been made in the District Court to develop the valuation data necessary under this Court's earlier decisions,[1] this Court pointed out that *"absent the requisite valuation data,* the court was in no position to exercise the 'informed, independent judgment' * * * which appraisal of the fairness of a plan of reorganization entails. * * * *No adequate finding was made as to the value of the assets* * * *. * * * *a determination of that value must be made* so that criteria will be available *to determine an appropriate allocation* of new securities * * *."

As to "the method of valuation" the opinion stressed the necessity that the lower court "value the whole enterprise by *a capitalization of prospective earnings.*" It pointed out that "a sum of values based on physical factors and assigned to separate units of the property without regard to

---

[1] *National Surety Co.* v. *Coriell,* 289 U. S. 426 (1933); *First National Bank* v. *Flershem,* 290 U. S. 504 (1934).

the earning capacity of the whole enterprise is plainly inadequate." This fact was "emphasized by the poor earnings record of this enterprise in the past." "Unless meticulous regard for earning capacity be had, indefensible participation of junior securities" might result.

The rights of the creditors were not "satisfied even though the 'relative priorities' of creditors and stockholders were maintained."[1] The bondholders must be *"made whole."* Their loss of their former senior fixed charge position through allotment of "an inferior grade of securities" necessitates that *"full compensatory* provision * * * be made for the entire bundle of rights which the creditors surrender." But "the absolute priority rule does not mean that bondholders cannot be given inferior grades of securities, or even securities of the same grade as are received by junior interests." Feasibility, presumably public interest in the case of a railroad, permits "practical adjustments" and dispenses with the necessity of a "rigid formula," but for surrendering senior rights creditors must receive *"full compensatory treatment,"* and they "are entitled to have the *full value* of the property, whether 'present or prospective, for dividends or only for purposes of control,' first appropriated to *payment* of their claims. * * * So long as *the new securities offered are of a value equal to the creditors' claims,* the appropriateness of the formula employed rests in the informed discretion of the court. * * * So long as they receive *full compensatory treatment* and so long as each group shares in the securities of the whole enterprise on an equit-

[1]As pointed out above, "relative priorities" were "maintained" in the Consolidated Rock Products Plan only in a most loose and inaccurate sense.

able basis, the requirements of "fair and equitable" are satisfied."

If the opinions in these two cases are read in the light of their entire content, without detaching particular words and phrases and giving them meanings inconsistent with their context, the opinions would seem to constitute a clear chart for reorganization.

Unhappily, however, the controversy as to the proper method of dealing with the priorities of creditors seems not to have been settled.[1] On the one hand junior interests, relying upon the two opinions, have belied this Court's assurance that there is no occasion for senior securityholders to yield to "pressures" from junior interests by insisting (as here successfully before the Circuit Court of Appeals) upon specific dollars and cents findings of value of properties, old claims and new securities. On the other hand, it has been insisted that the two opinions establish that the most senior classes of creditors must first receive "*payment*" in new securities having a presently realizable *market value* or *worth* equal to the full amount of their claims before anything can remain for distribution to junior classes.[2]

---

[1]See Note (1940) 49 Yale L. J. 1099, 1102.

[2]That the *Consolidated Rock Products* case established such a rule was asserted by Professor Gerdes in an article in the New York Herald Tribune of March 9, 1941, Section II, p. 11, col. 3; Prentice-Hall Bankr. Serv., Report Letter No. 15, (March 26, 1941), in contradiction of his earlier view, expressed in *General Principles of Plans of Corporate Reorganization* (1940) 89 U. Pa. L. Rev. 39, 47. Fear that such a rule has been established was expressed by Dean, *A Review of the Law of Corporate Reorganizations* (1941) 26 Cornell L. J. 537, 559, n. 63. But see Gilchrist, *"Fair and Equitable" Plan of Reorganization: A Clearer Concept* (1941) 26 Cornell L. J. 592, 617.

2. The Meaning of "Value" as Used in Section 77

The 1935 amendments to Section 77 incorporated in subsection (e) the following definition:

> "The value of any property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present, and prospective, and all other relevant facts. In determining such value only such effect shall be given to the present cost of reproduction new and less depreciation and original cost of the property, and the actual investment therein, as may be required under the law of the land, in light of its earning power and all other relevant facts."

(a) Rate-making value; depreciated investment; depreciated reproduction cost

The chief author of the 1935 amendments, Mr. Leslie Craven, has said:[1]

> "The purpose of these provisions is * * * to incline the determination away from the doctrine of *Smyth* v. *Ames,* under which the value is fixed on the basis of a consideration of the original and reproduction cost of the property and the investment therein. The actual value of the property cannot be determined, nor is it ordinarily evidenced by the investment in the property or its present cost of construction. The railroads are competitive properties. The value of their operative property, for purposes of reorganization, must necessarily be what, for better terms, we may call the actual value or the economic worth of the property, as de-

[1] Craven and Fuller, *The 1935 Amendments of the Railroad Bankruptcy Law* (1936) 49 Harv. L. Rev. 1254, 1274.

termined primarily by its present and prospective earning capacity. The actual value of the property depends upon the demand for its service and its ability to meet the demand economically. The provisions of the amended statute, therefore, make clear that emphasis shall be put on a consideration of earning power, past, present, and prospective."

The statute thus expressly adopted, with perhaps an unnecessary cautious nod at *Smyth* v. *Ames*,[1] the rule of "valuation for reorganization purposes" which had uniformly been adopted in the old equity reorganizations of railroads,[2] and which was later declared by this Court to be applicable to reorganizations under Section 77B.[3]

Yet notwithstanding this express provision of Section 77, the Western Pacific junior interests urged before the Commission that in determining both permissible capitalization and the distribution of new securities in the reorganization, controlling weight must be given to the elements of physical value evidenced by depreciated reproduction cost and depreciated investment. Notwithstanding this Court's intervening decision in the *Los Angeles Lumber* case, they persisted in this contention before the District Court. Even after this Court had made its contrary position doubly clear in the *Consolidated Rock Products* case, they urged before the Circuit Court of Appeals that the judicial test taboos

the use of regulated earnings as proof of value" of a railroad[1] and argued that this was so because the Commission's control over the Debtor's rates results in a hopeless "downward spiral" wherein earning power determines value, value determines rates, and rates in turn determine earning power.[2]

This persisting error of the Western Pacific junior interests is due to a not uncommon failure to recognize the truism by Mr. Justice Brandeis, that "value is a word of many meanings."[3] Its meaning in connection with any specific problem must depend upon the character of the problem involved and the purpose for which "value" is being determined.[4]

The problem of determining the amount at which the property of a railroad company or other utility may fairly be taxed, *i.e.*, its taxable "value;" the problem of determining fair compensation for the property of a railroad or other utility taken over by a governmental authority, *i.e.*, its condemnation "value;" and, most clearly of all, the prob-

[2]WP Corp. brief in C. C. A., p. 65.

[3]*Southwestern Bell Telephone Co.* v. *Public Service Commission*, 262 U. S. 276, 310 (1923).

[4]Thorough and illuminating discussions of the necessity for a "purposive" determination of the meaning of the word "value" are to be found in Bonbright, *The Problem of Judicial Valuation* (1927) 27 Col. L. Rev. 493; Bonbright and Pickett, *Valuation to Determine Solvency Under the Bankruptcy Act* (1929) 29 Col. L. Rev. 582; Spaeth and Windle, *Valuation of Railroads Under Section 77 of the Bankruptcy Act* (1938) 32 Ill. L. Rev. 517. These articles contain exhaustive collections of the decisions of this Court, as well as of the lower Federal Courts, establishing the soundness of the statement of the text and the unsoundness of the perhaps contrary dictum of Mr. Justice Butler in *Great Northern Ry.* v. *Weeks*, 297 U. S. 135, 139 (1936).

lem of determining the rates which a railroad or other utility may fairly charge, *i.e.*, its rate-making "value," are not at all the problem of determining how a financially defunct railroad or other utility shall be recapitalized and its new securities fairly distributed among its old creditors and stockholders, *i.e.*, the reorganization "value" of the property, the old securities and the new securities. As the Securities and Exchange Commission aptly put it in a utility reorganization under Section 77B:[1] "Valuation for rate-making purposes is not the same. There the question is how much the utility will be allowed to earn—if it can. Here the question is how much can it earn—even if allowed."

In every railroad reorganization case which has come before it under Section 77, the Interstate Commerce Commission, while considering elements of physical value and including in the "valuation data" full studies of depreciated investment and depreciated cost of reproduction, has refused to treat those elements as controlling, and has determined both the capitalization of the reorganized company "compatible with the public interest" and the rights of existing securityholders to participation, primarily upon the basis of the future earning power of the venture reasonably to be foreseen.[2]

controlling effect of physical value, for that Court's opinion is silent as to the standards of "value" to be employed in the many "findings" of "value" which it requires.

Similarly, the Securities and Exchange Commission, in acting upon reorganizations of public utilities under Section 11(f) of the Public Utility Holding Company Act and under Chapter X of the Bankruptcy Act, has uniformly adhered to the view that "for purposes of reorganization as distinguished from 'value for rate-making purposes' earning power becomes in the final analysis a paramount criterion."[1]

Whether a reorganization be that of a railroad or other utility or that of an industrial company, a capitalization must be found which fairly represents the prospective earning power of the property involved. That capitalization must then be distributed in such manner as to give each of the old creditors and stockholders, to the extent that they have any interest represented by such earning power, the "equitable equivalent" of their contractual rights. The

opinion of this Court in the *Consolidated Rock Products* case took no distinction between industrials and utilities in its declaration:

> "Whether or not the earnings may reasonably be expected to meet the interest and dividend requirements of the new securities is a *sine qua non* to a determination of the integrity and practicability of the new capital structure. It is also essential for satisfaction of the absolute priority rule * * *." (p. 525.)

It is significant that the earlier authority quoted in the *Consolidated Rock Products* opinion, as evidencing that the rule there laid down was nothing new, was the statement of Mr. Justice Holmes with reference to a railroad property in *Galveston, Harrisburg & San Antonio Ry.* v. *Texas*, 210 U. S. 217, 226 (1908): "* * * the commercial value of property consists in the expectation of income from it."

(b) MARKET VALUES

As "value for rate-making purposes" cannot be the basis of a "value for reorganization purposes" *inflated* beyond the limits of a fair capitalization of prospective earning power, neither should the "market value," whether of the properties themselves, or of the old claims, or of the new securities issuable in the reorganization, *deflate* the "value for reorganization purposes" below that reasonably justified by a liberal estimate of future earning capacity.

It has been pointed out both by this Court and by the commentators that as a practical matter a railroad system

has no "market value."[1] Accordingly, those who believe that "valuation for reorganization purposes" is the same thing as "market value" would apply the "absolute priority rule" by attempting to determine the prospective "market values" of the new securities issuable in the reorganization and applying such market values toward payment of the full face amounts of old claims in order of seniority.[2] There is in fact no "market" for such new securities during the long period elapsing between the original proposal of plans in a railroad reorganization proceeding and the ultimate confirmation of a plan. Hence determination of the "market value" or, to use Gerdes' expression, the "worth" of the new securities is sheer guess work.

It would be of immediate advantage to the present First Mortgage Bonds of the Western Pacific were such a rule to be applied to the Western Pacific reorganization, for it would result in the allotment to them, as the most senior security, of most, if not all, of the Common Stock allotted by the Commission Plan to the RCC Notes and the ACJ Notes. The Committee, however, recognizes that wholly unjust confiscation of actual values for reorganization purposes would result from the application of any such rule.

If any such test were to be applied to determine whether or not a class of creditors or stockholders should be excluded from a Section 77 reorganization, the same test

---

[2] See p. 34, n. 2, *supra*.

would necessarily apply to the determination of "insolvency." By such a test hardly any railroad in the United States would be solvent today. As of July 1, 1942, the aggregate "market value" of the entire capital structure of the New York Central Railroad Company, including its $626,190,200 principal amount of debt, was $429,211,979; that of the Southern Pacific Company, with $375,232,117 principal amount of debt, was $288,561,456; that of the Northern Pacific Railway Company, with $324,283,000 principal amount of debt, was $212,073,750; and that of the Southern Railway Company, with $279,142,500 principal amount of debt, was $267,904,430. Upon the basis of market value of securities all those properties would have to be treated as insolvent. Yet in 1941 the New York Central earned $4.07 per share on its Capital Stock; the Southern Pacific System $9.16 per share; the Northern Pacific $3.13 per share; and the Southern Railway $12.61 per share upon its Common Stock after full provision for its Preferred Stock; and it is common knowledge that 1942 per share earnings of all those properties are at a substantially increased rate.[1]

Neither the Interstate Commerce Commission nor the Securities and Exchange Commission, nor any of the courts in passing upon plans approved by either of the two Commissions, has intimated that "market value" of either the old securities or the new securities was any test of the aggregate "value for reorganization purposes." In its report on the *Cotton Belt* case, decided since the *Western Pacific* decision below, the Commission has expressly re-

[1]The debt structures and per share earnings thus stated have been computed from Moody's Manual and the respective companies' annual reports; market prices have been taken from the Commercial & Financial Chronicle.

fused to accept "market values" as affording "a proper basis for the reorganization of railroads for the long future term."[1] The constant references to "earning capacity" in this Court's opinion in the *Consolidated Rock Products* case and its direction that the lower court should "value the whole enterprise by a capitalization of prospective earnings," seem to negative the "market value" test.

(c) Capitalization of Prospective Earning Power

In the Courts below the Western Pacific junior interests were concerned at the failure of the Commission to find a specific number of dollars and cents as the Debtor's prospective earnings and then to capitalize them at a specified rate.

In dealing with this problem of the rate at which earnings should be capitalized for reorganization purposes, the Securities and Exchange Commission has applied, to some definite estimate of earning power, rates ranging from 4½% to 12%, depending upon the facts of each case.[2]

The approach of the Interstate Commerce Commission to this problem seems more appropriate to the case of a

---

E. C. 853 (1941) (8.7%); *In the Matter of The Griess-Pfleger Tanning Co.*, 5 S. E. C. 72 (1939) (10%); *In the Matter of San Francisco Bay Toll-Bridge Co.*, 6 S. E. C. 863 (1940) (10%); *In the Matter of Porto Rican American Tobacco Co.*, 7 S. E. C. 301 (1940) (10%); *In the Matter of Minnesota and Ontario Paper Co.*, 7 S. E. C. 456 (1940) (10%); *In the Matter of Flour Mills of America, Inc.*, 7 S. E. C. 1 (1940) (12%); *In the Matter of Atlas Pipeline Corp.*, SEC Corp. Reorg. Release No.

large railroad property such as that of the Debtor. The Commission recognizes, as did this Court in its opinion in the *Consolidated Rock Products* case,[1] that the prognostication of future earnings cannot be precise but must be an approximation only. Furthermore, as any estimate of prospective earnings increases to amounts exceeding past earnings, it becomes increasingly more speculative. Hence, while in many cases the Commission has had before it expert testimony as to hypothetical "earnings for a future normal year," and while it has discussed such testimony in relation to its approved capitalization, the Commission has not predicated aggregate capitalization generally, or solely, on any fixed rate of capitalizing a fixed dollars and cents estimate of future annual earnings.[2] It has been its practice, broadly speaking, after full analysis of past and

42 (June 7, 1941) (12%); *In the Matter of Sayre & Fisher Brick Co.*, SEC Corp. Reorg. Release No. 47 (September 12, 1941) (12%). See also Note (1941) 55 Harv. L. Rev. 125, 133; and *In the Matter of Utilities Power & Light Corp.*, 5 S. E. C. 483 (1939) (4½% to 5%).

[1] 312 U. S. 510, at p. 526.

[2] In fourteen reorganization cases before the Commission in which definite estimates of future average annual earnings are referred to, the Commission has approved capitalizations which in effect capitalized such prospective average annual earnings in twelve cases at rates ranging from 2.90% in the *Milwaukee* case, 239 I. C. C. 485, 515, 539 (1940), to 4.14% in the *Fonda, Johnstown and Gloversville* case, 249 I. C. C. 455, 469-70, 473 (1941). In the thirteenth case, *Akron, Canton & Youngstown Ry.*, 228 I. C. C. 645 (1938), the approved capitalization is equivalent to the capitalization at 5% of the rough average between the prospective average annual earnings as testified to by the debtor and by the bankruptcy trustee. In the fourteenth case, *Chicago & Eastern Illinois Ry.*, 230 I. C. C. 199, 230-1 (1938), the Commission capitalized at 5% prospective average annual earnings estimated at an amount unusually high with reference to average past earnings as well as actual 1941 earnings and the 1942 estimate.

present earnings and factors which may make prospective earnings either larger or smaller than those of the past,[1] to make a liberal aggregate estimate of "prospective earnings" divided roughly into four classifications:

1. Those reasonably certain to continue without serious interruption, with a sufficient excess to provide for new fixed charge obligations the "adequate coverage" required by Section 77 for fixed charges.[2] Against these earnings the Commission has permitted the issue of new fixed charge obligations, usually with an interest rate of 4%.

2. Those of which there is substantial probability but whose regular annual continuance cannot be counted upon in a period of general business depression. Against these additional earnings the Commission has permitted the issue of contingent interest bearing obligations, usually with an interest rate of 4½%.

3. Those of which there is reasonable probability, but which, on the basis of the past earnings record, may frequently be interrupted. Against these additional earnings the Commission has permitted the issue of Preferred Stock, usually with a 5% dividend rate.

---

[1]Such as the opening of the Northern California Extension and the Dotsero Cut-Off in the case of the Western Pacific. See R. 210, 215, and remarks of Commissioner Eastman, Transcript of hearings before Judiciary Committee on S. 1869 (76th Cong. 2nd Sess. 1939) 551-3.

[2]"A plan of reorganization * * * shall provide for fixed charges * * * in such an amount that, after due consideration of the probable prospective earnings of the property in light of its earnings experience and all other relevant facts, there shall be adequate coverage of such fixed charges by the probable earnings available for the payment thereof * * *."—Subsection (b) of Section 77.

4. Those of which there is no probability of uninterrupted realization but which will probably be realized from time to time and, if optimistic hopes are fulfilled, may ultimately be maintained. Against these additional earnings, together with the potential increment to the ultimate equity arising from the operation of any Capital Fund or Sinking Fund, the Commission has permitted the issue of Common Stock, which it has usually allotted at a price requiring a 6% dividend to make whole the most senior existing securities to which it is allotted.

This practical approach, if fairly applied in the light of all the "valuation data" offered by the affected securityholders, will produce, it is submitted, a capital structure for a reorganized railroad, and an aggregate "value for reorganization purposes," not only meeting the requirements of the public interest, but also adapted to recognizing fully the priorities, "relative" and "absolute," of the various classes of securities.

3. Suggested Standard for Determining, as to any Class of Securityholders, the Necessity for its Admission to, or its Exclusion from, Participation in a Section 77 Reorganization

Out of his abundance of experience Commissioner Eastman has observed:

> "Any estimate of the future earnings of a railroad can at best be no more than an 'educated guess' * * *. Anything remotely approaching accuracy is impossible."[1]

---

[1]Transcript of hearings before Judiciary Committee on S. 1869 (76th Cong. 2nd Sess. 1939) 551.

To attempt to fix a precise number of dollars and cents as representing future earning power of a railroad and in turn to capitalize that earning power at a fixed rate into a precise number of dollars and cents reorganization value would be sheer unrealistic pretense. There can be no absolute and fixed dollars and cents figure marking a point of earning power or of reorganization value on one side of which, were the earnings or reorganization value a penny more, a class of creditors or stockholders must be admitted to participation in reorganization if its own rights are not to be violated, and on the other side of which, were the earnings or reorganization value a penny less, the same class must be excluded if the rights of senior classes are not to be violated.

Under the old equity practice, prior to Section 77, the securityholders' representatives, as "reorganizers," determined by "bargaining" what marginal classes of creditors or stockholders might be admitted to participation in reorganization, and the terms of such admission, subject to court approval of the result as "fair and equitable" and to Commission approval of the proposed new capitalization as "compatible with the public interest." The opinion has currently been often expressed that senior creditors were too merciful to junior classes or too yielding to their "pressures."

Section 77, as administered by the Commission, has substituted the Commission as the "reorganizer" and its expert judgment for the old "bargaining" among the securityholders. That substitution cannot, however, make certainty out of educated guess work. In the implications of such certainty in some of their words and phrases lie the possible ambiguities of the opinions in the *Los Angeles Lumber* and *Consolidated Rock Products* cases.

With recognition of the dangers inherent in any formula, the following is submitted as a standard for determining, as to any class of creditors or stockholders, the *necessity* for its admission to, or its exclusion from, participation in reorganization:

If, upon all the relevant valuation data, it is affirmatively established that earning power will, on the average over reasonable periods, probably be sufficient, not only to insure full coverage of the existing contractual income rights of senior classes and ultimate cash recovery of the full amount of the claims of such senior classes, but also to provide some surplus of earnings available to service the junior class, then such demonstrated *presence* of earning power (*i.e.*, value for reorganization purposes) for the junior class compels its admission to participation if its own rights are not to be violated.

If, on the other hand, upon all the relevant valuation data, it is affirmatively established that there is no reasonable probability of earning power to provide such income coverage and ultimate full cash recovery for senior classes, then such demonstrated *absence* of earning power (*i.e.* value for reorganization purposes) for the junior class compels its exclusion from participation if the rights of the senior classes are not to be violated.

Between the lines of demonstrated *presence* and demonstrated *absence* of such earning power will inevitably lie a substantial zone within which a class may be admitted without violation of the rights of senior classes, or may be excluded without violation of its own rights.[1] Unless the determination of admission or exclusion by the Commission, as the expert reorganizer under Section 77, is

[1] *Cf.* Gerdes, *General Principles of Plans of Corporate Reorganization* (1940) 89 Pa. L. Rev. 39, 54.

founded upon insufficient valuation data or is clearly arbitrary, it should not be rejected by the court.

Application of the suggested standard in the Western Pacific reorganization, as will be shown in the next succeeding pages, presents no problem of a nice judgment within the possible zone. There is affirmative demonstration of *absence* of earning power for the classes excluded by the Commission Plan.

4. The Commission's Determination of the "Reorganization Value" of the Western Pacific

(a) THE NEGOTIATIONS AMONG THE SECURITYHOLDERS

The A. C. James Co. and its affiliates own, in addition to the ACJ Notes, more than $8,000,000 of First Mortgage Bonds of the Debtor[1] and 8.76% of the outstanding Preferred Stock and 61.2% of the outstanding Common Stock, or 40.36% of all the outstanding capital stock of WP Corp.[2] WP Corp., with its 100% owned subsidiary, Western Realty Company, in turn owns all the unsecured debt and 100% of the Preferred and Common Stock of the Debtor.[3] All of the outstanding Refunding Bonds of the Debtor are pledged under the RFC, RCC and ACJ Notes. The only securityholders of the Debtor who have not appeared in the reorganization proceeding are thus the First Mortgage Bondholders other than those represented by the Committee and ACJ.[4]

---

[1]Transcript of oral argument of counsel for A. C. James Co. before the Interstate Commerce Commission, November 17, 1937, p. 788 (not printed in the Record by stipulation, R. 2616, but before this Court pursuant to stipulation filed on July 23, 1942).

[2]R. 1051. [3]R. 1026-7, 1030, 1051.

[4]No other First Mortgage Bondholders than those represented by the Committee and by the James interests have appeared in the reorganization proceeding either before the Com-

Following the default of the Debtor in the payment of its First Mortgage Bond interest in March, 1934, the Committee entered into negotiations with the James interests, RFC and RCC. These negotiations continued after the institution of this reorganization proceeding in August, 1935, and until the final decision of the Commission in June, 1939.[1] Their object was to work out, if possible, a reorganization plan which would be acceptable to the four interests involved, the First Mortgage Bonds, RFC, RCC and the James interests; and at the same time be approved by the Commission.

Both in these negotiations and formally before the Commission, the Committee made its own proposals and supported proposals of other parties, providing for allotments of warrants or of Common Stock for the Debtor's unsecured debt and stock held by WP Corp. Particularly did the Committee support the proposal of RCC[2] (following the Commission's first Report and Order in 1938) that the capitalization be increased beyond that contemplated by the Commission Plan, by adding $18,413,928 of 4% Preferred Stock (largely for allocation against accrued First Mortgage interest), and 30,000 shares of no par value Common Stock in order to permit some participation for WP Corp.

This action of the Committee was not dictated by any belief that the prospective earning power of the Debtor was sufficient to *entitle* the junior interests to any larger participation than that given them by the Commission Plan. Indeed, the Committee recognized that prospective earning power for those junior interests was so extremly remote as

---

mission or in the Courts. These scattered small holders are, however, represented by the First Mortgage Trustees to the extent provided in subsection (c)(7) of Section 77.

[1]R. 690. [2]R. 693.

to raise a serious question as to whether the admission of the WP Corp. to any participation, or of the RCC and ACJ Notes to any greater participation than that provided by the Commission Plan, would not violate the rights of First Mortgage Bondholders not represented by the Committee. The Committee recognized, however, that the large and diversified James holdings created serious risk of those "pressures" of which this Court spoke in the *Consolidated Rock Products* case. The Committee therefore felt that a prompt reorganization without continued litigation was of much greater value to the First Mortgage Bondholders than the small amount of Common Stock proposed to be given up.

Despite the urging by all the parties that representatives of the Commission sit informally with them to endeavor to reach a compromise which the Commission might approve, the Commission refused in any way to participate in the negotiations. So, too, the Commission expressly refused to approve any of the proposals of the various parties to give participation to the junior interests beyond that provided by the Commission Plan.

(b) THE COMMISSION'S CONCLUSIONS

Four times, once by its Bureau of Finance and three times by action of the full Commission, the Commission found that "the equity of the existing stock has no value."[1] Three times the full Commission also found that "even though all the securities remaining available for distribution after satisfying the claims of the first mortgage bondholders are allotted to the other secured creditors, such securities will be inadequate in value to satisfy their claims."[2] Hence, the full Commission three times found

[1]R. 269. See also R. 185, 393, 889. [2]R. 269. See also R. 392, 889.

that "the claims of the unsecured creditors * * * have no value."[1]

Upon all the "valuation data" before it (which has been described generally, *supra*, pp. 13-14, and will later be discussed in detail, *infra*, pp. 56-61), the Commission reached the following conclusions as to prospective earning power and the proper new capitalization:

1. The prospective earnings sufficiently certain to meet the statutory standard of "adequate coverage" for fixed charges did not exceed $500,000. Accordingly, it limited fixed charges to the $2,750,050 of undisturbed existing Equipment Obligations and $10,000,000 new First Mortgage 4% Bonds having an aggregate annual fixed charge of $494,202.

2. The prospective earnings found to have sufficient probability to justify contingent debt charges, including sinking funds, and a Capital Fund, did not exceed $2,000,000. Against the approximately $1,000,000 thus left over after fixed charges and a Capital Fund of $500,000, which the Commission found required by the public interest, it permitted the issuance of $21,219,075 Income Mortgage Bonds with 4½% interest, representing an annual contingent charge of $954,858, and with an annual ½% Sinking Fund, representing an annual contingent charge of $106,095, or a total annual contingent debt charge of $1,060,953.

3. The "most optimistic estimate of earnings of record" indicated support for "dividends at the rate of 5% on only $37,432,000 of stock."[2] However, the Commission treated substantially all of that "most optimistic estimate" as being of sufficient probability to justify the

[1] R. 269-70. See also R. 392, 889.
[2] R. 257.

issuance of approximately $31,850,297 par value of Preferred Stock with a 5% dividend, or a total annual dividend charge of $1,592,515.

Thus the Commission created a capital structure with approximately $66,000,000 of par value securities and approximately $3,650,000 annual charges through Preferred dividends.

4. The small amount of earning power remaining, evidenced by "the most optimistic estimate of earnings of record" for any one year ($120,000 on the Commission's figures[1] and $400,000 on the Debtor's figures[2]), together with the capital accretions arising from the Capital Fund and the Income Bond Sinking Fund, the Commission found to be the basis for authorizing the 319,441 shares of no par value Common Stock. It indicated hope that earnings might some day even attain the still higher annual level of $4,600,000, permitting dividends at the rate of $3 per share on the Common Stock,[3] and it allocated the new Common Stock to the senior First Mortgage Bonds at a price of $57 per share.[4]

While the Commission did not state a specific over-all dollars and cents figure thought by the Circuit Court of Appeals to be "necessary to determine the value of the debtor's entire property," the foregoing determinations do include all the figures necessary for a mathematical com-

---

[1]As indicated on page 16, *supra*, the Commission adopted a figure of approximately $3,770,000.

[2]The Debtor's highest estimate for any one year was approximately $4,050,000. R. 142, 2019, 2027.

[3]R. 269.

[4]R. 317. One share was allotted for each $57 of accrued interest.

putation of the *maximum amount* of such a "value" for reorganization purposes.

The Commission's allotment of the no par value Common Stock to the First Mortgage Bondholders at $57 per share (particularly in the light of the finding, referred to in Point II of this brief, that the equity of the RCC Notes in the collateral securing the RFC Notes "has no value") was necessarily in substance a finding that the "value for reorganization purposes" of the Debtor's properties *did not exceed* $84,027,559. That is the amount produced by taking all the par value securities, undisturbed and new, at their par values (at which they were allotted against First Mortgage Bond principal and RFC Note principal) and the entire 319,441 shares of no par value Common Stock at $57 per share (the price required to "make whole" the First Mortgage Bondholders and the RFC Notes).[1]

(c) VALUATION DATA

Examination of the "valuation data" upon which the Commission made the determinations set forth above demonstrates that they violate no right of any of the complaining junior interests.

Every conceivable type of valuation data suggested as being relevant by either the Commission or any of the parties was made part of the record before the Commission.[2]

---

[1]It should be noted that, even if a $3 annual dividend will cause the Common Stock to be salable at $57 per share and all the new securities senior thereto to be salable at their par value, thus making the old First Mortgage Bondholders whole as to the *principal* amount of their claims, the *annual return* which they will then receive on their entire present claim ($1,266.67 per $1,000 Bond) will be only 4.896% as contrasted with the 5% to which they are now contractually entitled on that amount.

[2]While in their petitions for modification of the Commission's Report and Order of October 10, 1938, both the Debtor and ACJ

Before the District Court all the additional valuation data offered by any of the parties was received by the Court.

This, therefore, is not a case like *Jamieson* v. *Watters*, 91 F. (2d) 61 (C. C. A. 4th, 1937), (relied on below by the objecting junior interests), in which valuation data proffered by the appellants had been excluded. Nor is it like that case or like the *Consolidated Rock Products* case in any sense that there was "absent the requisite valuation data."

(i) *Physical Value.*

Included in the "valuation data" were full records of the valuation of the Debtor's properties under Section 19a of the Interstate Commerce Act in 1929 and as to the original cost of, or investment in, those properties. Full studies of depreciation were also included. They evidenced that the net "value for rate-making purposes" of the Debtor's System as of December 31, 1935, was $139,600,455,[1] that a similar value as of December 31, 1938 was $150,907,623[2] and that its investment in road and equipment (book value), less equipment depreciation, as of December 31, 1938, was $144,978,559.[3]

While the Commission refused to give controlling effect to these elements of value, or even on that basis to approve

---

asserted that the record lacked evidence to support the Commission's conclusions, neither they nor any other of the objecting junior interests offered any additional valuation data. On challenge by one of the Commissioners as to what additional evidence could be taken to "arrive at some idea regarding values," the Debtor's counsel stated that he did not believe it "necessary or expedient to reopen the record" (Transcript referred to on p. 50, n. 1, *supra*, p. 893), and ACJ's counsel answered, "The only question in my mind as to the record * * * is whether you have in your full figures for accrued depreciation" (*id.*, p. 968).

[1]R. 224. [2]R. 1061-62. [3]R. 1063.

the capitalization urged by Commissioner Miller of $120,000,000 in order to "give the present stockholders a chance to participate in the future profits of the reorganized company" by giving them some "no-par-value common stock" which "may have little or no market value,"[1] the Commission did, in fact, give substantial consideration and weight to these elements of physical value.

That it gave substantial consideration to such elements is shown by the many references to them in the Tentative Report of the Bureau of Finance and the three Reports of the Commission.[2]

That it also gave substantial weight to the elements of physical value becomes evident upon the consideration of "the earning power of the property, past, present, and prospective" and its inadequacy, taken alone, to support the capitalization contemplated by the Commission Plan.

(ii) *Earning Power.*

As already noted (p. 54, *supra*), the capitalization provided by the Commission Plan requires annual earnings of approximately $3,650,000 for coverage of charges through dividends on Preferred Stock, and a total of approximately $4,600,000 to achieve earnings of $3 per share on the new Common Stock after all prior charges.

Sustained earnings to create a continuous record of actual payment of dividends of at least $3 per share on the Common Stock must be realized if the value of that stock is ever to approach the sum of $57 per share. That is the figure at which it was allotted to the First Mortgage Bondholders under the Commission Plan and represents the value which it must attain if the value of the securities allotted to the First Mortgage Bondholders is ever to make

[1] R. 283-4. [2] R. 123-4, 144, 203, 224, 313-4.

them whole by equalling the amount of their claims as of January 1, 1939.

$4,600,000 in annual earnings is thus the minimum annual earnings level which the Debtor's properties must attain and continuously maintain before the new securities allotted to the senior First Mortgage Bonds under the Commission Plan can give to the First Mortgage Bondholders, in any sense of those terms, full recognition of their absolute priorities and full compensation for their surrendered rights.

The Debtor's earnings record, set forth above at page 7, gives little basis for hope of the maintenance of any such level.

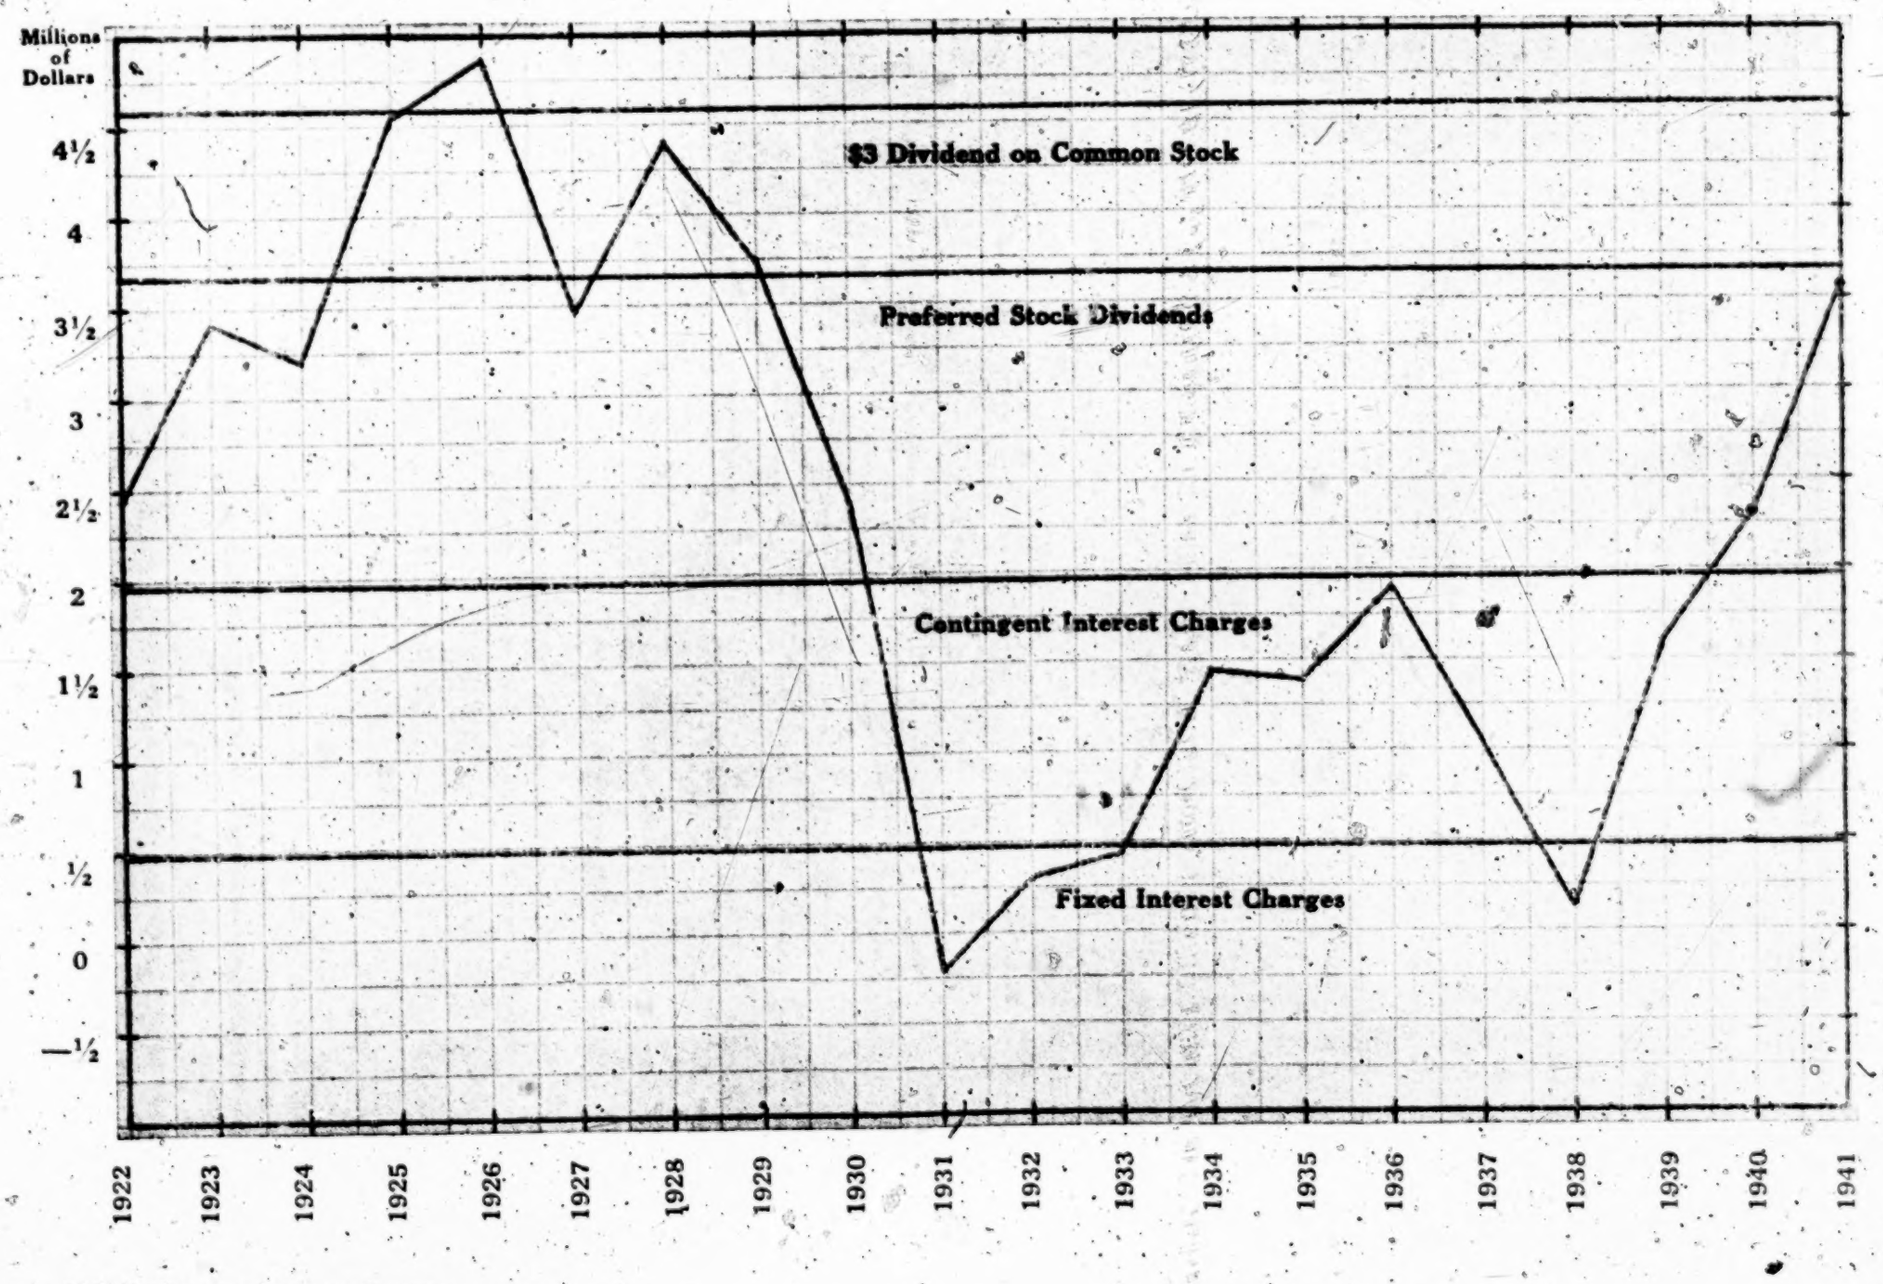
The relationship of this earnings record to the capital structure contemplated by the Commission Plan is strikingly shown by the graph inserted opposite this page. The earnings of the Debtor's properties available for interest, adjusted as stated above at page 6, have only once in the last twenty years (1926) reached the amount continuously necessary to "make whole" the First Mortgage Bondholders; and only in two additional years (1925 and 1928) have they even approximated that amount. And this, the record indicates, was at the expense of substantial undermaintenance,[1] for which no deduction has been made in the adjusted earnings as stated on page 7 and in the graph.

It will further be noted that in only two additional years (1929 and 1941) were the Preferred dividends substantially fully covered and in only six additional years (1922, 1923, 1924, 1927, 1930 and 1940), have there been any earnings available for *any part* of the dividends on the new Preferred Stock.

---

[1] R. 1052.

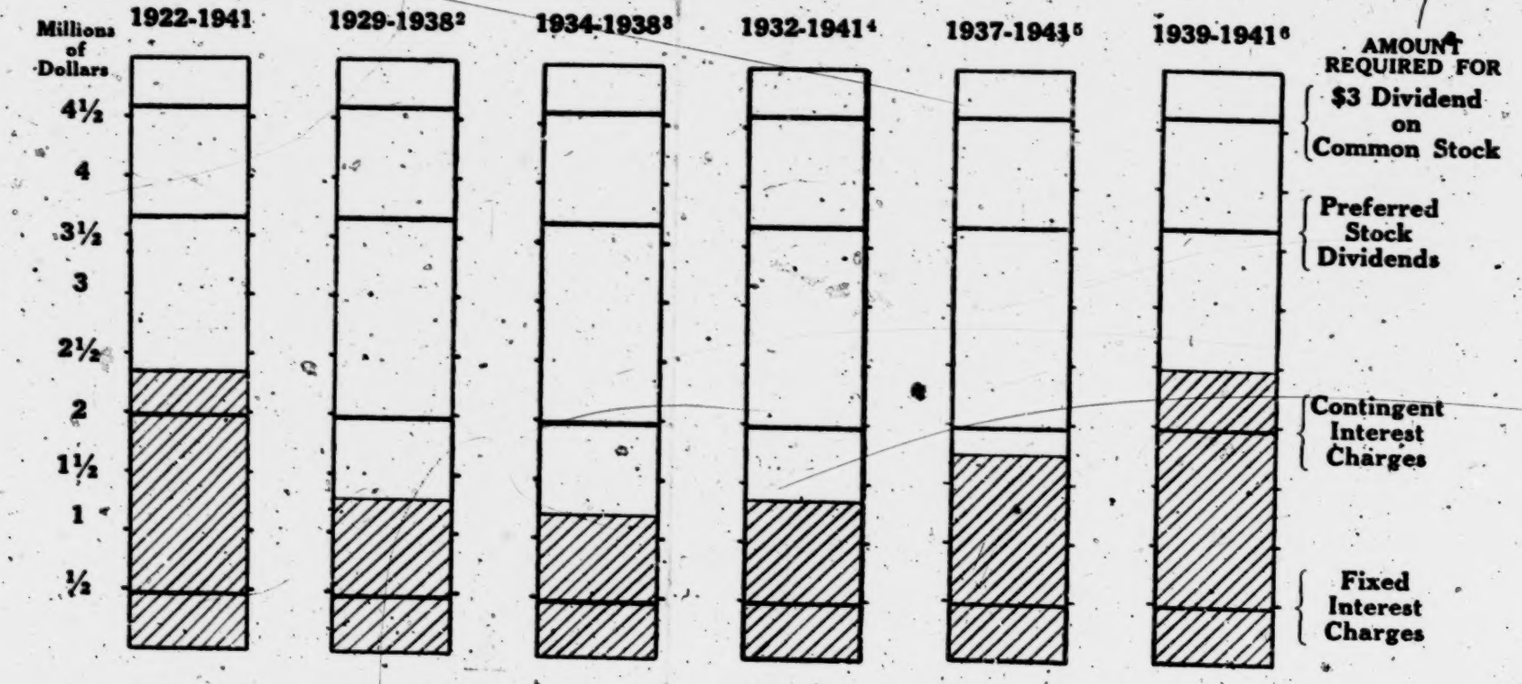
APPLICATION OF DEBTOR'S EARNINGS[1] TO CAPITALIZATION UNDER COMMISSION PLAN



[1] Adjusted as stated on page 6, *supra*.

AVERAGE ANNUAL EARNINGS[1] AS APPLIED TO CAPITALIZATION UNDER COMMISSION PLAN

[The diagonally hatched portions of the blocks represent earnings; the blank portions represent deficits.]



[1]Adjusted as stated on page 6, *supra*.
[2]10 years preceding Commission action.
[3]5 years preceding Commission action.
[4]The most recent 10 years.
[5]The most recent 5 years.
[6]The 3 years since the effective date of the Commission Plan.

In four of the twenty years (1931, 1932, 1933 and 1938) the earnings were inadequate to cover even fixed charges under the Commission Plan, and in five additional years (1934, 1935, 1936, 1937 and 1939) they were inadequate to cover contingent debt charges.

The inadequacy of the Debtor's earnings to support any larger capital structure than that contemplated by the Commission Plan is further evidenced by the graphs inserted opposite this page showing the application of average adjusted earnings for the various indicated periods to the amounts required to service the capitalization under the Commission Plan.[1]

The averages for none of those periods, except for the entire twenty years and for the three years since January 1, 1939, have been adequate to cover even full contingent debt charges under the Commission Plan. Were the earnings for the full twenty years to be further adjusted to deduct the large amount of under-maintenance which accrued prior to 1927, it is doubtful that the average for the twenty year period would cover the full contingent debt charges.

In none of the periods have the average earnings been sufficient fully to cover the requirements for Preferred Stock dividends, let alone anything toward Common Stock dividends.

The liberality to the junior interests of the capitalization proposed by the Commission Plan, as well as the optimism with which the future must be regarded, in the light of past

---

[1]Average earnings for the various indicated periods on the graph are as follows:

1922-1941	$2,320,878	1932-1941	$1,420,513
1929-1938	$1,261,539	1937-1941	$1,754,410
1934-1938	$1,195,528	1939-1941	$2,489,737

earnings, to justify the maximum value for reorganization purposes found by the Commission, is evidenced by the following illustrative tabulations. That maximum value, it will be remembered, is $84,027,559.[1]

To produce that amount average earnings must be capitalized:

for 1922 to 1941 at the rate of 2.76%
for 1929 to 1938 at the rate of 1.50%
for 1934 to 1938 at the rate of 1.42%
for 1932 to 1941 at the rate of 1.69%
for 1937 to 1941 at the rate of 2.09%
for 1939 to 1941 at the rate of 2.96%

Especially striking is the fact that the earnings for the years 1939 to 1941, to which the Commission Plan will actually be applied if it is consummated, must be capitalized at the rate of 2.96% to produce the Commission-found maximum "value for reorganization purposes" of $84,027,559.

Before the unsecured debt and stock of the Debtor held by WP Corp. can have any "value for reorganization purposes" an aggregate of such value for the Debtor's properties must be found, not of $84,027,559, but in excess of $87,922,143.

The foregoing computations put beyond any possibility of reasonable dispute the soundness of the Commission's

---

[1]The aggregate amount of the par value securities plus the price of $57 per share for the Common Stock, required to "make whole" the First Mortgage Bondholders and the RFC Notes.

finding that the unsecured debt and the stock of the Debtor "have no value."

5. The effect of War Boom Earnings

As the European war began to affect the national economy after the Commission had certified its Plan to the District Court, the Debtor's earnings began a marked upward trend. 1940 earnings were substantially twice those for 1939. 1941 earnings showed a further large increase. In the first six months of 1942 the Debtor's total consolidated system operating revenues were $16,235,602, as compared with $10,111,000 for the corresponding six months of 1941 and, for the same periods, its income available for income and excess profits taxes and interest was $4,108,290 in 1942 as compared with $1,081,727 in 1941. We believe that there is no question but that those increases were the result of a combination of accelerating "defense" and war activities, the shortage of shipping tonnage and the practical cessation of transportation between the East Coast and the West Coast through the Panama Canal. Those increases in earnings have kept close pace with the change-over to the war time economy.

The junior interests urged, before both the District Court and the Circuit Court of Appeals, that increasing earnings of the Debtor made the Commission Plan obsolete and required a new "valuation" which, they argued, would evidence a "value" for the Debtor's unsecured debt and its stock. As the increasing trend of the Debtor's earnings has accelerated rather than diminished since the argument before the Circuit Court of Appeals, the same issue will be presented to this Court.

That issue, the Committee believes, should be faced squarely by this Court.[1] If war boom earnings of the nature experienced by the Debtor (and in varying degrees by most other railroads) are to require a reconsideration of "prospective earning power" of properties in Section 77 proceedings, in the face of such records of "past earnings" as that of the Debtor, the parties to all Section 77 proceedings, as well as the Commission, should know it at the earliest possible moment.

Before consideration of the legal effect of war inflated earnings, it should be noted that the reported amounts may be disputed on two counts.

Those earnings, as reported, are not mathematically comparable with the prior record of the Debtor's earnings. No account is taken in the available 1942 figures, as set forth above, of the increasingly heavy Federal income and excess profits taxes necessarily resulting from the very facts which give rise to the increased revenues. No accurate determination can be made at this time of the Federal taxes properly to be deducted from 1942 earnings on the basis of the Commission's capitalization, in part because the relevant tax legislation has not yet been enacted. An example of the material nature of such tax liability is the fact that, on the basis of the income available for such taxes and interest for the first six months of 1942 ($4,108,290), after deducting six months interest charges under the Commission Plan and applying the tax rates contained in the proposed Revenue

---

[1] Judicial notice may be taken of such increasing earnings. See *McCart* v. *Indianapolis Water Co.*, 302 U. S. 419 (1938); *In re Chicago & North Western Ry.*, 126 F. (2d) 351, 364 (C. C. A. 7th, 1942).

Act of 1942 as passed by the House of Representatives and as approved by the Senate Committee at the date of this brief, the Federal income tax payable with respect to those earnings would be approximately $1,500,000.[1] Thus an apparent war boom figure of $4,108,290 is reduced, with respect to income available for both interest and dividends, to about $2,600,000. Even this figure is before deducting for any excess profits tax which may be imposed upon the reorganized Western Pacific at the current earnings level, depending upon tax legislation as finally enacted.

Also, no account has been taken of the fact that the Debtor's properties are all being put to extraordinary wear and tear in the production of these increased earnings, and that shortages and priorities of both labor and materials are preventing expenditures for maintenance of way, structure and equipment commensurate with the increased use.[2]

The question here is whether the Debtor's war time boom earnings, clearly temporary (and also subject to the indeterminate tax and deferred maintenance deductions

---

[1]Non-recurring losses or other deductions might well reduce the income tax in one year, but they are not material in the search for indicia of "prospective earnings" over a period. The above figure of $1,500,000 is computed without allowing any credit for any excess profits taxes payable. While the imposition of an excess profits tax would decrease the income tax payable, it would increase the over-all income and excess profits tax liability of the Debtor.

[2]R. V. Fletcher, Vice President of the Association of American Railroads, recently pointed out that due to shortages of labor and materials, the railroads "are going to come out of this war * * * with their tracks more or less run down and with their equipment in a shaky condition." Hearings before the Senate Committee on Finance on H. R. 7378 (77th Cong., 2nd Sess.) at p. 766.

indicated), are sufficiently reliable evidence of the Debtor's "prospective earning power" to justify the abandonment of the findings of the Commission and the District Court that the Debtor's unsecured debt and stock "have no value"—findings based on the record of the past twenty years of the Debtor's operations and earnings and all other relevant factors with respect to the Debtor's "prospective earnings."

The Committee does not believe that a railroad reorganization having as its objective the creation of a sound financial structure which can continue unscathed through the probable depressions of the post-war period and the inevitable ups and downs of railroad earnings can be predicated on the hypothesis of indefinite continuance of a war economy, carrying with it the cessation of water, truck and air competition. As Commissioner Eastman in an address before the National Association of Mutual Savings Banks at Philadelphia on May 7, 1941, said:

> "Let me suggest, however, that those who regard these present earnings as evidence of the unsoundness of our reorganization plans may well give heed to the source from which these earnings spring and to the future conditions which are likely to flow from this same source. * * * All this in the end means burden and sacrifice for all concerned. * * *"

Since the beginning of 1941 the Commission has approved plans for the reorganization of nine railroads.[1] In

---

[1] *Fort Dodge, Des Moines & Southern R. R.*, 244 I. C. C. 625 (1941); *New York, New Haven & Hartford R. R.*, 244 I. C. C. 239 (1941); *Alabama, Tennessee & Northern R. R.*, 247 I. C. C. 453 (1941); *Chicago, Rock Island & Pacific Ry.*, 247 I. C. C. 533 (1941), 249 I. C. C. 297 (1941); *St. Louis Southwestern*

none of those plans has the Commission regarded war boom earnings as furnishing any controlling or reliable indicia of the railroad's prospective earning power. In one of its latest decisions the Commission summarized its position in this respect:

> "In the report of April 6, 1942, Division 4 recognized the fact that 1941 earnings were influenced by the extraordinary conditions existing as the result of the war and in the report stated fully all considerations leading to its conclusions as to justifiable amounts of capitalization and of new general mortgage bonds. Under present conditions, the fact that the year 1942 gives promise of producing even larger earnings than 1941 affords too uncertain and precarious a basis to justify the increases sought."[1]

Two months ago the Circuit Court of Appeals for the Sixth Circuit likewise squarely rejected the argument that 1940 and 1941 earnings of a railroad, representing abnormal increases attributable to the prosecution of the war effort, were any support for a Debtor's objection that the Commission's valuation of the railroad was too low.[2]

Ry., 249 I. C. C. 5 (1941), 252 I. C. C. 325 (1942); *Fonda, Johnstown & Gloversville R. R.*, 249 I. C. C. 455 (1941); *Minneapolis, St. Paul & Sault Ste. Marie Ry.*, (Finance Docket No. 11897, March 17 and June 17, 1942, not yet reported); *Denver & Rio Grande Western R. R.* (Finance Docket No. 11002, July 13, 1942, not yet reported); *Florida East Coast Ry.* (Finance Docket No. 13170, April 6 and August 10, 1942, not yet reported).

---

[1] *Florida East Coast Ry.* (Finance Docket No. 13170, August 10, 1942, not yet reported).

[2] *Akron, Canton & Youngstown Ry. Co.* v. *Hagenbuch*, 128 F. (2d) 932 (C. C. A. 6th, 1942).

With reference to such war boom earnings the Court stated:

> "It is conceded that these abnormal increases [earnings from January 1, 1940, to October 31, 1941] are solely attributable to the prosecution of the war effort of the Government. These abnormalities are not proper tests by which to measure the Commission's determination of the somewhat imponderable prospective earnings in 1937. Subsequent earnings due to unforseeable circumstances may not be used to check the correctness of prospective earnings as determined by the Commission under the Act. Naturally such earnings could not have entered into any purchaser's estimate of value." (at p. 939)

A similar attempt to increase the total capitalization approved by the Securities and Exchange Commission in the reorganization of a utility was rejected by a District Court which pointed out that such booms are generally followed by periods of depression.[1]

Apparently the investing public does not regard the present abnormally high level of railroad earnings as any criterion of the long-range value of railroad securities. That opinion is shown by the substantial discounts at which the securities constituting the entire capital structures of such solvent roads as the New York Central, Northern Pacific, Southern Pacific and Southern Railway are selling (see page 43, *supra*) and, again, by the prices at which the senior obligations of recently reorganized

---

[1] *In re Utilities Power & Light Corp.*, 29 F. Supp. 763, 770 (N. D. Ill., 1939).

railroads are selling. Examples of the latter include the market price of 64 for the First Mortgage Bonds of the new Chicago Great Western, of 90¼ for those of the new Erie and of 78 for those of the new Wabash.[1] The extreme to which the investing public is discounting war boom earnings is further demonstrated by the fact that stocks of many solvent railroads are selling at less per share than their estimated 1942 earnings per share after taxes.[2]

Finally, it is relevant to compare even the war earnings of Western Pacific with the capitalization provided by the Commission Plan. Under that Plan the new Western Pacific will need to have *continuously* available for interest and dividends, after proper deductions for Federal income and excess profits taxes and adequate maintenance, earnings of at least $4,600,000 per annum. That level of earnings, as we have shown above, is the necessary minimum available for dividend payments to give the new company's no par value common stock the value of $57 a share which would in any sense approximately "make whole" the present First Mortgage Bondholders. Nothing has been shown to date to suggest any likelihood of that figure being continuously maintained, much less surpassed

---

[1] The prices given are the July 31, 1942, prices, at a time when the great increases in war time earnings were evident. The September 1, 1942 prices for the same issues, following a recent increase in market prices of railroad securities, were Chicago Great Western 66, Erie 91, and Wabash 80¼.

[2] For example, Standard Statistics estimated on August 4, 1942, that the 1942 earnings after taxes of Southern Railway will be $17.40 on its Common Stock, which was then selling at 15. Similarly, estimated earnings of Southern Pacific are $14.35 per share as compared with a market value of 13⅝, and earnings of $6.05 are predicted for Kansas City Southern stock selling at 4.

The only effect that Western war boom earnings can have on the Commission Plan is to give its optimistic capital structure some degree of substance. This case involves no change of facts justifying a reconsideration of the previous determinations by the Commission and the District Court that the unsecured debt and stock of the Debtor "have no value."

6. The Absence of a Formal Finding of a Dollars and Cents Value of the Debtor's Properties as an Entirety

It will be the purpose to discuss here only the "findings" necessary to sustain exclusions of classes of creditors and stockholders. The problem of the "findings" necessary for allocations of securities among participating classes will be discussed under Point II.

Pursuant to Section 77, the Commission has formulated plans of reorganization for sixteen Class I railroads.[1]

---

[1] *Akron, Canton & Youngstown Ry.*, 228 I. C. C. 645 (1938); *Chicago & Eastern Illinois Ry.*, 230 I. C. C. 199 (1938), 230 I. C. C. 571 (1939); *Chicago Great Western R. R.*, 228 I. C. C. 585 (1938), 233 I. C. C. 63 (1939); *Spokane International Ry.*, 228 I. C. C. 387 (1938), 233 I. C. C. 157 (1939); *Western Pacific R. R.*, 230 I. C. C. 61 (1938), 233 I. C. C. 409 (1939), 236 I. C. C. 1 (1939); *Chicago & North Western Ry.*, 236 I. C. C. 575 (1939), 239 I. C. C. 613 (1940); *Missouri Pacific R. R.*, 239 I. C. C. 7 (1940), 240 I. C. C. 15 (1940); *Chicago, Milwaukee, St. Paul & Pacific R. R.*, 239 I. C. C. 485 (1940), 240 I. C. C. 257 (1940); *Erie R. R.*, 239 I. C. C. 653 (1940), 240 I. C. C. 469 (1940); *St. Louis-San Francisco Ry.*, 240 I. C. C. 383 (1940), 242 I. C. C. 523 (1940); *New York, New*

Of these plans four have been consummated,[1] the remainder being at various stages of the procedure prescribed by Section 77. In thirteen of these plans[2] classes of stockholders have been excluded from participation, and in five, classes of creditors have also been excluded.[3] In all these plans the findings of the Commission upon which the exclusion of stockholders and creditors (as well as the allocations of new securities) were based were substantially identical in form with those in the *Western Pacific* case and were supported by substantially similar "valuation data."

Attacks by the excluded junior classes upon the sufficiency of such findings have been overruled by every Dis-

trict Court before which those plans have come, and the exclusions sustained.[1]

The Securities and Exchange Commission, in dealing with bankruptcy reorganizations of public utility holding companies under Section 11 (f) of the Public Utility Holding Company Act [15 U. S. C. §79k (f)], performing functions similar to those performed by the Interstate Commerce Commission under Section 77,[2] has predicated exclusions of classes upon similar findings and valuation data.[3]

The effectiveness of findings of "no value," when supported by valuation data similar to that in the present record, had thus become, in practice, established law prior to the decision of the Circuit Court of Appeals for the Ninth Circuit here under review. That decision came as a shock to the "reorganization bar"[4] greater even than that experienced upon the decisions in the *Monon* case[5] and the *Boyd* case.[6] Notwithstanding that the Circuit Court of Appeals for the Seventh Circuit somewhat equivocally con-

---

curred with that for Ninth Circuit as to the necessity of more specific valuation findings for purposes of distribution, the Seventh Circuit refused to go along with the Ninth Circuit on the point here under discussion; it twice sustained the effectiveness of findings of "no value" for the purpose of exclusion from participation.[1]

It is submitted that nothing in Section 77 or in this Court's opinion in the *Consolidated Rock Products* case, which the Court below thought compelled its decision, lends any support to that decision.

Section 77 (d) requires that "the Commission shall render a report and order in which it shall approve a plan * * * that will in its opinion meet with the requirements of subsections (b) and (e) * * * and will be compatible with the public interest; * * * In such report the Commission shall *state fully the reasons for its conclusions.*"

Certainly this provision affords no possible basis for a requirement of formal findings of fact, and certainly no one can contend that in the voluminous reports and orders of the Commission in this case the Commission has failed to "state fully the reasons for its conclusions."

The only references in Section 77 to a "finding" by the Commission or by the District Court include, as a basis of exclusion, findings in exactly the words of the findings in the present case. Subsection (e) provides that the

---

[1] *In re Chicago, Milwaukee, St. Paul & Pacific R. R.*, 124 F. (2d) 754 (C. C. A. 7th, 1941); *In re Chicago & North Western Ry.*, 126 F. (2d) 351 (C. C. A. 7th, 1942). In its supplemental opinion in the former case (unreported, see Record before this Court, p. 2335, in Docket Nos. 11-19), the Circuit Court held

> "* * * that the finding of the I. C. C. as to absence of value of old common and preferred stock, is specific, definite and certain, and fully meets the rule which requires finding on values of assets."

> "submission [of a plan] to any class of stockholders shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding * * * that at the time of the finding the equity of such class of stockholders has no value,"

and that

> "submission to any class of creditors shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding * * * that at the time of the finding the interests of such class of creditors have no value * * *."

That provision of subsection (e) upon which the Court below relied does not require the Commission to determine and certify "value" in detail of exact dollars and cents in every case. It provides for a determination and certification of value only "if it shall be necessary * * * for any purpose under this section * * *."

Nor is there anything in the Interstate Commerce Act which requires the Commission to make such formal findings of detailed values as the Court below would require. Section 14 of that statute provides:

> "(1) Whenever an investigation shall be made by said commission, it shall be its duty to make a report in writing in respect thereto, which shall state the conclusions of the commission, together with its decision, order, or requirement in the premises; and in case damages are awarded such report shall include the findings of fact on which the award is made."

[1]This was pointed out in the opinions of Barnes, J., in *In re Chicago & North Western Ry.*, 35 F. Supp. 230, 244 (N. D. Ill. 1940); and of Igoe, J., in *In re Chicago, Milwaukee, St. Paul & Pacific R. R.*, 36 F. Supp. 193, 203 (N. D. Ill. 1940).

In the light of Section 14 this Court has held that "There are no formal requirements for the findings to be made by the Commission in this type of case * * *" [a removal of rate discrimination].[1] This being the only provision of the Interstate Commerce Act providing for express "findings of fact," it is clear that the only situation in which the Commission's report must contain such findings is a case where damages are awarded.

Nor is there any requirement of such findings under the Constitution. The objecting junior interests relied below upon this Court's opinions that the Commission must find the facts necessary to exist before the Commission has jurisdiction to issue the order in question.[2] Obviously there is no "jurisdictional" distinction between a finding, supported by adequate valuation data, that the interest of a class of creditors or stockholders "has no value" and a finding giving the mathematical demonstration of that conclusion by finding a dollars and cents value for the property of a debtor in an amount less than the amount of the claims senior to those found to "have no value."

Least of all does the opinion of this Court in the *Consolidated Rock Products* case support the conclusions of the Court below. To be sure, that opinion contains the phrase which became the theme song of the objectors below and was echoed in the opinion of the Circuit Court of Appeals—

---

[1] *United States* v. *Louisiana*, 290 U. S. 70, 80 (1933). See *Manufacturers Ry.* v. *United States*, 246 U. S. 457, 489-90 (1918).

[2] *Florida* v. *United States*, 282 U. S. 194 (1931); *United States* v. *Baltimore & Ohio R. R.*, 293 U. S. 454 (1935); *United States* v. *Chicago, Milwaukee, St. Paul & Pacific Ry.*, 294 U. S. 499 (1935).

"absent the requisite valuation data"[1] and also the statement almost equally stressed in the arguments below— "* * * no adequate finding was made as to the value of the assets * * *. * * * a determination of that value must be made * * *."[2] The factual situation in which those expressions were used in the *Consolidated Rock Products* case, however, was one in which there was substantially no "valuation data" and no attempt to determine, upon any basis, relative values as between different properties securing two different bond issues. It requires extreme distortion[3] of the quoted words of the opinion to convert them into a rejection of the sufficiency of the "valuation data" and the "findings" actually made in the *Western Pacific* case.

The whole context of the opinion in the *Consolidated Rock Products* case, as well as its factual background, evidences that the writer of the opinion had no intention of over-riding the practice followed by the Securities and Exchange Commission at a time when he was a member of that Commission. In *In the Matter of West Ohio Gas Co.*, 3 S. E. C. 1014, at 1026-27 (1938), the SEC said:

> "In passing upon the fairness of this plan it is not necessary for us to determine the exact value of the property or the amount at which its value shall be recorded on the books of the reorganized company. The evidence which has been submitted to us points to the conclusion that the property has very little, if any, value in excess of the aggregate amount ($1,755,977) of the claims of the bondholders."

The basic fact which determines whether or not any class of existing securityholders *must* be excluded from par-

---

[1] 312 U. S. 510, 520 (1941). [2] *Id.*, at 524.

[3] Similar to that experienced by the term "relative priorities." See p. 29, *supra*, n. 2.

ticipation in a reorganization is not the precise dollars and cents value of the property but the ultimate fact that the interest or equity of that class "has no value." Not only is this evidenced by the express language of Section 77 (e), which contemplates findings of "no value," but it is equally established by the decisions of this Court.[1] If *absence* of value is certified by the Commission to the court, as it was here, and is established by adequate valuation data, as it was here, it is wholly unimportant to know by how great a margin the interest or equity having no value falls short of having value.

The recognized impossibility of determining an exact dollars and cents value for a great railroad system, as of any given date, argues strongly against the existence of any such requirement under Section 77 and is compelling proof that the Congress did not intend to prescribe any such futile procedure. As this Court has stated:

> "The very notion of a 'full cash value' for a railroad is in many respects artificial. * * * Whatever may be the pretenses of exactitude in determining such a 'value,' to claim for it 'scientific' validity, is to employ the term in its loosest sense."[2]

But even if some type of dollars and cents value were required to be found, it is submitted that the findings made by the Commission in this case, amplified and affirmed by the opinion of the District Judge, would fully satisfy any such requirement.

---

[1] *In re* 620 *Church Street Building Corp.*, 299 U. S. 24, 27 (1936).

[2] *Nashville, Chattanooga & St. Louis Ry.* v. *Browning*, 310 U. S. 362, 370 (1940). See also *Rowley* v. *Chicago & North Western Ry.*, 293 U. S. 102, 109 (1934).

As has been pointed out above,[1] the Commission not only found that the unsecured debt and stock of the Debtor "have no value," but, having found the aggregate amount and character of the capitalization permissible under the provisions of Section 77, *i.e.*, the maximum aggregate "reorganization value," it also found that the entire permitted capitalization was "inadequate in value to satisfy" the secured claims.[2]

It requires but a simple mathematical process of adding together five classes of claims, the amounts of which are stated in dollars and cents in the Commission's Report and Order dated June 21, 1939,[3] to develop the fact that the claims senior to the unsecured debt and stock of the Debtor aggregate $87,922,142.75. The Commission therefore found, in substance, that the reorganization value of the Debtor's properties (and of all the new capitalization) was *less than* $87,922,142.

Similarly, it requires only the mathematical process of adding the par value securities provided for by the Commission Plan, and which it distributed at their par value, to the sum obtained by multiplying 319,441 by $57, the price at which those shares of Common Stock was allotted to the First Mortgage Bondholders to "make whole" their claims, to establish the *maximum* "reorganization value" attributed by the Commission to the Debtor's properties as represented by the entire new capitalization. That amount is $84,027,559.

The Commission therefore *did* find in the *Western Pacific* case, in every substantive sense, the only kind of "value" which was relevant to the exclusion of the Debtor's

---

[1]See pp. 17-18, *supra*. [2]R. 269. [3]R. 316-7, 390-2.

unsecured debt and stock. It did find, in substance, that the "reorganization value" of the Debtor's properties fell short by at least $3,894,583.75 of providing any participation for that unsecured debt and stock.

The complete lack of realism in the decision of the Court below upon this point is evidenced by what the Commission has tried to do to bring its more recent reports and orders into colorable compliance with that decision. In those cases the Commission, after making exactly the same type of findings with respect to earning power and permitted capitalization that were made in the *Western Pacific* case, has added a final finding of which that in the *Denver & Rio Grande Western* case[1] is typical:

> "Considering the entire record, and taking into account the elements of value of the properties involved, their past and present earnings and prospects for future earnings, as well as other pertinent factors, we conclude and find *that the value of the properties for the purposes of this proceeding* is $154,521,612, and that the total capitalization upon consummation of the plan should not exceed approximately that amount."

It is submitted that the addition of the italicized words, which are not to be found *in haec verbes* in the Commission's *Western Pacific* Report, would add absolutely nothing of substance for the information either of the court or of the securityholders beyond what the Commission provided in the findings summarized at pages 14 to 18, *supra*, and the voluminous "valuation data" discussed by the Commission in "stating fully the reasons for its conclusions."

---

[1]Finance Docket No. 11002 (July 13, 1942), not yet reported.

7. Conclusion

The valuation data contained in this record strongly supports the conclusion that there is no reasonable probability that the earning power of the Debtor's properties will be sufficient to provide, over any reasonable period, full service of the present contractual income rights of the secured creditors or to provide ultimate cash recovery of the full claims of those creditors. That valuation data wholly fails to indicate the *presence* of earning power for the Debtor's unsecured debt and stock. Hence the exclusion of that debt and stock from participation in the reorganization does not violate any rights of their holder, WP Corp.

Indeed, the demonstrated *absence* of such reasonable probability of earning power compels exclusion of the unsecured debt and stock of the Debtor if the rights of the secured creditors are not to be violated.

The findings of the Commission that "the equity of the existing stock has no value" and that "the claims of the unsecured creditors have no value" are sufficient to support that exclusion.

No factual change has occurred which requires reconsideration of those findings and conclusions.

II

THE DETERMINATIONS BY THE COMMISSION AND THE DISTRICT COURT OF THE EQUITABLE EQUIVALENT OF THE DEBTOR'S ASSETS AVAILABLE FOR THE SATISFACTION OF EACH CLASS OF PARTICIPATING CLAIMS, IN TERMS OF THE VARIOUS NEW SECURITIES, AS SUPPORTED BY THE VALUATION DATA AND THE OTHER FINDINGS IN THE RECORD, ARE SUFFICIENT TO SUSTAIN THE ALLOCATIONS CONTAINED IN THE COMMISSION PLAN.

1. The Purpose of Reorganization

The purpose of a reorganization under Section 77 is not liquidation by the payment either of cash or of cash equivalents in new securities. Its purpose is rather to insure to each class of old securities admitted to participation (*i.e.*, those which have any interest of "value" in the property) its "equitable equivalent of the debtor's assets available for the satisfaction" of its claim on a going concern basis. That "equitable equivalent" must be found, not in terms of dollars and cents, but in terms of the new securities to be issued in the reorganization, *i.e.*, new securities which will return to each existing class its "equitable equivalent," whatever may be the level to which the earnings of the reorganized venture may fall or rise.

To that end the relative priorities[1] of the existing classes in the earning power and assets of the venture must be fully recognized.

So far as feasibility and the public interest permit, such recognition should be given "qualitatively," *i.e.*, by

---

[1]These words are used in this Point II, not in the sense in which they are used in the opinion in the *Consolidated Rock Products* case, but to denote the relative positions of different classes in respect of their *full* amounts. See p. 29, *supra*, n. 2.

allocation to the participating old securities new securities of relative rank in their claims to income and assets comparable to the relative rank of the old securities. Equitable compensation for rights which the exigencies of reorganization compel the senior securities to surrender should also, so far as permitted by feasibility and the public interest, be incorporated in the new securities. Examples of such compensating provisions are conversion rights and participation rights which will tend to make up in periods of high earnings for income lost in periods of low earnings.

In so far as feasibility and the public interest prevent such relative priorities being "made whole" "qualitatively," they must be made whole, and equitable compensation for surrendered rights must be made, "quantitatively," *i.e.*, by giving to the old senior securities new securities of the same classes as those given existing junior securityholders but upon terms sufficiently more favorable than those given the junior securityholders.

The solution of these problems of allocation in a complicated railroad reorganization does not require, or even admit of, a "rigid formula." It necessitates "practical adjustments" based upon experienced judgment.

2. The Practice of the Commission

By hypothesis the problem of distributing a reorganized capital structure among old securityholders admitted to participation is not reached until the over-all "reorganization value" of the properties and the permissible aggregate capitalization, and the classification thereof, have been determined. By hypothesis, therefore, the interests of the creditors or stockholders excluded are without such value to the extent of their exclusion. By the same hypothesis the

participating securities are covered by "reorganization value," supported by "prospective earning power," to the full amount of the "reorganization value" thus determined.

But as there are different degrees of probability of prospective earning power, the Commission has classified aggregate capitalization into classes of new securities representing claims in a heirarchy of rank within the earning power, as well as against the assets, of the reorganized venture. Generally it has adopted the four broad classifications of fixed charge obligations, contingent charge obligations, preferred stock, and common stock.

It has also sought to "tailor" the new securities to the requirements of a "fair and equitable" distribution, so designing the new securities as to facilitate giving to each participating old class its "equitable equivalent of the debtor's assets available for the satisfaction" of its claim.

In almost every complicated railroad reorganization the Commission has had the problem of allocation before it in two aspects: (a) allocation as between two classes of creditors having successive liens upon the same property, and (b) allocation as between two classes of creditors having liens of the same rank upon different properties. In the *Western Pacific* case (as we shall see in our subsequent discussion of the allocations made in the Commission Plan[1]) the Commission had to determine allocations between the First Mortgage Bonds and the Refunding Bonds which involved a combination of both these aspects.

While this Court has held that mere observance of the relative priorities[2] was not sufficient to validate a reor-

---

[1]Page 96, *infra*.

[2]See p. 29, *supra*, n. 2, for a statement of the very limited sense in which that phrase was appropriate upon the facts of the *Los Angeles Lumber* and *Consolidated Rock Products* cases.

ganization plan in which stockholders whose equity had no value had been admitted to participation, this Court has never indicated that a plan would be valid which did not fully recognize the relative priorities of the existing classes in the earning power of the venture in such manner as might be practicable under all the circumstances. Indeed, the whole trend of the Court's decisions is to the contrary.[1]

Accordingly, as between creditors having liens of successive rank upon the same assets (whether the more junior claim was admitted to full participation or, as in the case of the Western Pacific Refunding Bonds, only to partial participation), the Commission has consistently followed the practice above urged. It has sought, so far as possible from the standpoint of feasibility and public interest, to preserve the seniority, as against both earnings and assets, of the new securities given to the old senior securityholders. It has endeavored to include in such new senior securities elements compensatory, to the extent practicable, for the surrender of such rights as early maturity, fixed interest, or debt position. In other words, so far as feasibility and public interest permitted, the seniority of the old securities has been given "qualitative" recognition in the new securities.

Where such qualitative recognition has been impossible, the Commission has sought to give reasonably compensating "quantitative" recognition. That is to say, it has awarded to the old securities, to the extent necessary, new junior securities of the same class allotted to old securityholders having a lien upon the same assets but of junior

---

[1] *Northern Pacific Ry.* v *Boyd, supra; Kansas City Terminal Ry.* v. *Central Union Trust Co.*, 271 U. S. 445 (1926); *Consolidated Rock Products Co.* v. *Du Bois, supra.*

rank, but such allotments to the old senior securities have been upon more favorable terms, *i.e.*, at a lower price, than the allotments to the old junior securities.

In determining allocations among old securities secured by liens upon different assets, the Commission has recognized that the relative priorities of the different claims against over-all venture earning power necessarily depend upon the varying levels of the venture earnings at which the different assets securing the different claims show earning power. A main line of railroad will frequently show substantial earning power even when the system as a whole will be operating at a deficit. The relative priorities against over-all venture earning power also necessarily depend on the respective rates of acceleration of the earning power of the respective security assets as the venture earnings move up or down. The earnings experience of the various parts of a railroad property may demonstrate that, while at a given level of system earnings the earnings of two lines are substantially the same, the earnings of one line will accelerate much more rapidly than those of the other as system earnings increase above that level. It has therefore been the object of the Commission to fit old participating claims into the new capital structure at the levels of the respective contributions of their security to the venture earnings so that, as nearly as may be at every level of earnings, the new securities will produce for the claimant the "equitable equivalent" of what would have been produced by his old securities.

To assist it in reaching a judgment based not only upon its experience as an expert in the earning power of all the American railroads, but also upon "scientific" analyses by engineers and accountants, the Commission has in many

cases received voluminous "segregation studies,"[1] "severance studies,"[2] and "contributed traffic studies."[3] In any complicated case such studies obviously involve numerous assumptions, none of which can have any demonstrated certainty, and particularly do they involve informed and expert judgment. Even in those cases in which the experts have taken an entirely professional and judicial approach, as contrasted with one of advocacy, there has been no unanimity of opinion, and the results have been compromise approximations. While these studies have been helpful, and perhaps necessary, in determining allocations in complicated reorganizations involving many different securities having separate liens of equal rank upon many separate properties, the Commission has never sought to deduce from them any specific dollars and cents values for the separate properties so studied.

Nor has the Commission ever attempted any consideration of "market values" of properties or old securities or new securities. In the recent *Cotton Belt* case,[4] decided by

---

[1]Studies in which earnings are allocated between different parts of the property on accounting and engineering bases believed by their proponents to have scientific foundation. Such studies are expressly provided for in Subsection (c) of Section 77.

[2]Studies in which it is sought to develop on the one hand the earning power of a particular line if its operation were severed from the remainder of the property, and on the other hand, the loss of earnings which the remaining property would suffer from the severance of the particular property, again all upon accounting and engineering bases believed by their proponents to have scientific foundation.

[3]Studies similarly purporting to establish on a scientific basis the amounts contributed by a particular line (usually one otherwise showing very low earning power) to the earning power attributed to the other lines in the "segregation studies."

[4]*St. Louis Southwestern Ry.*, 252 I. C. C. 325, 356 (1942).

the Commission since the *Western Pacific* decision of the Court below, the Commission recognized that the principle of allocation here urged

> "has been the customary method of the most successful railroad reorganizations of the past, and is generally well understood and acceptable in principle to the investors in securities of the highest grade. A reorganization based on expected value of the new securities on the immediate market would necessarily be much more drastic, and result in great, and in our view unnecessary, hardship to the junior creditors. Distress selling of defaulted bonds to bond speculators, and such markets as exist while such selling is taking place, do not, in our view, afford a proper basis for the reorganization of railroads for the long future term."

There have been but two exceptions to the Commission's refusal to give any weight to "market values":

(1) In those situations in which an old security was secured by property having a liquidation value readily realizable in cash in excess of the full amount of its claim, the Commission has sought to allocate to the claim so secured either cash or new securities having a presently estimated realizable cash value equal to the amount of the claim.[1] As we shall later see, the Trustees' Certificates constitute such a claim in the *Western Pacific* case.

---

[1]For example, the holders of Birmingham bonds were allocated first mortgage fixed interest bonds for the full face amount of their claims in *St. Louis-San Francisco Ry.*, 240 I. C. C. 383, 417-8 (1940), and in *Chicago & North Western Ry.*, 236 I. C. C. 575, 633, 647-9 (1939); the plan provided that the Sioux City & Pacific first 3½s and the Des Plaines 4½s be exchanged for 4% divisional mortgage bonds.

(2) When, as also in the *Western Pacific* case, new money is required to be provided, the "market value" of the new securities to be issued for that purpose becomes relevant.

The practice of the Commission as thus outlined, it is submitted, is the only rational approach to a "fair and equitable" distribution of new securities designed to give to each existing class of securities its "equitable equivalent of the debtor's assets available for the satisfaction" of its claim. It insures to each participating class, as nearly as may be, the same position it formerly had in respect to the venture earnings at any given level, high or low, and in respect of the venture assets. Its validity has been sustained by every District Court before which any railroad reorganization plan of the Commission has been submitted for approval.[1] This has been true even in the three cases in which, although approving the Commission's method of approach, the District Court disagreed with the result.[2]

---

[1] *In re Akron, Canton & Youngstown Ry.* (N. D. Ohio 1939, not reported); *In re Chicago Great Western R. R.*, 29 F. Supp. 149 (N. D. Ill. 1939); *In re Chicago, Milwaukee, St. Paul & Pacific R. [2] *In re Denver & Rio Grande Western R. R.*, 38 F. Supp. 106 (D. Colo. 1940); *In re New York, N. H. & H. R. R.* (D. Conn., Dec. 8, 1941, not yet reported); *In re St. Louis-San Francisco Ry.* (E. D. Mo., 1942, not yet reported).

While the utilities and other business ventures with the reorganizations of which the Securities and Exchange Commission has had to deal have seldom involved the complexities of different liens existing in most of the railroad systems dealt with by the Interstate Commerce Commission, the SEC has followed essentially the same principles as those adopted by the Interstate Commerce Commission in dealing with liens of the same rank upon different assets.[1]

This Court's decision in the *Consolidated Rock Products* case, relied upon by the Court below as requiring a different rule, does not prevent—it indeed requires—the method of allocation consistently followed by the Commission.

There can be no doubt of the soundness of the foregoing assertion when those words of the *Consolidated Rock Products* opinion,

> "a determination of that value [*i.e.*, of assets] must be made so that criteria will be available to determine an appropriate allocation of new securities * * *" (p. 524)

are read in the light of that opinion's insistence upon capitalization of prospective earnings, its recognition of the necessity for "practical adjustments," and its negation of any requirement for a "rigid formula."

On the other hand, it must be conceded that those who stress the importance of "market values" or present "worth" in allocating new securities, particularly as between old securities having liens of different rank on the same assets, can find some arguable support in certain phrases of the *Consolidated Rock Products* opinion. For example, for sur-

---

[1] *In the Matter of West Ohio Gas Co.*, 3 S. E. C. 1014, 1026 (1938).

rendering senior rights creditors must be *"made whole. * * * Full compensatory provision* must be made for the entire bundle of rights which the creditors surrender;" they must receive *"full compensatory treatment"* and they "are entitled to have the *full value* of the property * * * first appropriated to *payment* of their claims. * * * So long as the new securities offered are of a *value equal to the creditors' claims*, the appropriateness of the formula employed rests in the informed discretion of the court."[1] But it is submitted that by those words the Court did not mean to hold either (1) that each class of senior securities, in the order of the old hierarchy, must receive new securities having a present *market* value equal to the full amount of the old claim before anything can be distributed to the next junior claim, or (2) that old securities having liens of equal rank on different assets should divide up the same classes of new securities on a market value basis in complete disregard of the differing relationships of earning power at different levels of venture earnings.

To attribute that meaning to the language of the opinion would be to disregard its stress of capitalization of earnings and reduce "reorganization value" to nothing but liquidation value based on the estimated "market value" of the new securities. Mathematically it would permit participation of claims only to a dollars and cents amount equal to the dollars and cents amounts of the estimated market value of the new securities, a result more harsh and drastic than has ever been imposed in the most drastic railroad reorganization plans either under the old equity practice or under Section 77. Such a construction would even more disregard the opinion's statement that "so long as

[1] 312 U. S. 510, at 528-30.

each group shares in the securities of the whole enterprise on an equitable basis, the requirements of 'fair and equitable' are satisfied." Such a construction would also render meaningless the famous dictum of the *Boyd* case, quoted with approval in the *Los Angeles Lumber* opinion, that its rule does not "require the impossible and make it necessary to pay an unsecured creditor in cash as a condition of stockholders retaining an interest in the reorganized company."

3. The Rule Imposed by the Decision Below

Rejecting the Commission's practical application in the *Western Pacific* case of the procedure outlined in the foregoing subsection 2, the Circuit Court below held that allocations of new securities between those entitled to participate in the reorganization must be "in proportion to the value of their respective claims." While it did not define what it meant by "value," its listing of sixteen separate items which it held must be valued indicates that it meant some kind of precise dollars and cents valuations.[1] The items so to be valued are not only the Debtor's properties in the aggregate, but the properties under each of its existing mortgages taken separately, and (apparently in disregard of the fact that the new First Mortgage and the new Income Mortgage are both to cover all the property of the reorganized company, being also all the property of the Debtor) separately, the property subject to each of the two new mortgages. In addition, it requires dollars and cents valuations of each of the existing claims against the Debtor (as to the RFC Notes, the RCC Notes and the ACJ Notes, stated not only severally, but also for the Refunding Bonds

[1] R. 2670-71; see p. 24, *supra*.

pledged to secure those Notes) and similar valuations of each class of the proposed new securities.[1]

The lack of any definition of what was meant by "value" as to each of the sixteen separate items makes it difficult to attempt application. However, if any single meaning be given to the term "value" as applied to all the sixteen items, the rule thus laid down becomes wholly unrealistic, exceedingly dangerous, and violative of the long line of decisions of this Court culminating in the decision in the *Consolidated Rock Products* case.

If by "value" the Court below meant "market value" as to all sixteen items, then, since it contemplates distribution "in proportion to the value of existing claims," and makes no distinction between old securities and new securities, it envisages that senior securities shall not receive "full compensation" for the full face amount, principal and interest, of their claims, but only new securities having a present "market value" equal to the present "market value" of the existing claims. This would mean, in the *Western Pacific* case, that the First

[1] While the Circuit Court of Appeals for the Seventh Circuit in the *Chicago, Milwaukee, St. Paul & Pacific* and *Chicago & North Western* cases (p. 71, *supra*, n. 1) followed the Ninth Circuit in holding inadequate, as to form, for allocation purposes, findings similar to those in the *Western Pacific* case, it not only failed to define what it meant by "value" but, probably because there would literally have been scores of detailed items on the Ninth Circuit theory, failed even to indicate what the express valuations should cover. The uncertainty of the Seventh Circuit as to the soundness of any such valuation requirements was accentuated by its decision in the *North Western* case that such valuations were merely procedural and were waived either as the result of the express assents of securityholders or as the result of assents which the Court assumed to "accept the responsibility" to give for the non-voting securityholders.

Mortgage Bondholders could have been satisfied at any time since 1933 by any sort of new securities having a "market value" of not more than 50—today approximately 35—, while junior securities (none of which have any market in their specific form) would have received some participation based on the estimated "market value" of the existing securities and the estimated "market value" of the new securities. After these "market values" had been estimated, a mathematical proportion between such "values" would be determined and the new securities distributed upon that basis in disregard of the relative positions of the existing claims against the venture earning power and the venture assets. Any such rule would obviously preserve junior securities having purely speculative market values at the expense of senior securities, whose market values would be depressed by the very fear of such a rule.

The rule is almost equally fantastic if it be assumed that the Court below really did mean by "value," as applied to all sixteen items, what the decisions of this Court establish to be the true test of "reorganization value," viz., capitalization of prospective earnings.

By hypothesis there is "full value" in all the securities embraced within those constituting the aggregate capitalization representing such "reorganization value." Such of them as have a par value must thus be treated as having a "reorganization value" substantially equal to their par value, whatever their rank, and such of them as have no par value must be treated as having a "reorganization value" equal to the amount at which they are allocated to "make whole" the most senior class of old securities. Otherwise, if the lower classes of the new securities are

reduced in their "reorganization value," the upper classes immediately attain a "reorganization value" materially in excess of their par value, or the aggregate "reorganization value" will not be maintained. The rule of the Court below becomes wholly meaningless under such an interpretation of its use of the word "value." Claims having successive liens upon the same assets, but each of them entitled to full participation in the reorganization upon the basis of capitalized prospective earnings, would be equal in "value" to each other and hence entitled to get exactly the same new securities irrespective of their old relative positions.

The futility of the added words incorporated by the Commission in its recent reports and orders in an attempt to conform them to the requirements of the decision below for the purpose of excluding classes of creditors and stockholders whose interests "have no value" has been noted above.[1] Attempted conformation to the rule for distribution stated in the decision below is reduced to an absurdity in the language used by the Commission in such an attempt in the *Cotton Belt* case.[2]

There, after a finding of an aggregate value of $75,000,000, being the permissible maximum capitalization or "reorganization value," the Commission continued by finding that "the sum of the undisturbed and new securities, representing as they do the sum of the interests of all those who will have an interest in the properties of the reorganized company, are of the same $75,000,000 value" and that "the new securities may be equitably exchanged for the existing claims on the basis of $1 par value of any of the new securities for $1 of value of existing claims."

---

[1] Page 77, *supra*.

[2] *St. Louis Southwestern Ry.*, 252 I. C. C. 325 (1942).

Taken literally, this means that it would have been "fair and equitable" to have allotted the most senior old bonds $1 par value of new common stock for $1 of such senior claim, while at the same time allotting $1 of the most senior new bonds to $1 of the most junior old claim admitted to participation.[1] Of course the Commission meant no such thing.

This mumbo-jumbo "valuation" of the new securities, however, left but half done (or perhaps only one-third done) the task of making the valuations required by the Court below for distribution by mathematical proportions. There still remained the necessity of finding separate dollars and cents valuation for the various lien properties and for each of the old securities.

That additional step the Commission found both impossible and futile. It stated:

> "The properties comprise one operating unit; a complete separation of values would necessarily have to be based on extensive assumptions of unprovable validity; and any attempt at such a separation would in the end serve no purpose except to present an apparent certainty in the formulation of the plan which does not exist in fact. The Act calls for valuations only where necessary, and in our view further valuations are not necessary here."[2]

In the *D. & R. G.* case[3] (the Commission's most recent dealing with the problem), after analysis of the segregation, severance and contributed traffic studies before it, and full

---

[1]The absurdity of this result demonstrates the necessity that relative priorities be maintained.

[2]*St. Louis Southwestern Ry., supra*, p. 92, at p. 361.

[3]Finance Docket No. 11002 (July 13, 1942).

statement of "the reasons for its conclusions," the Commission followed in principle the same method of allocation adopted by it in the *Western Pacific* case and above outlined in subsection 2. No reference was made to the decision of the Court below in the *Western Pacific* case nor was any effort made to give even colorable observance to the rule there laid down.

If the objective of a reorganization is to give to each existing class of securities its "equitable equivalent of the debtor's assets available for the satisfaction" of its claim, is it not clear that that objective can best be attained by valuing existing claims in terms of the new securities? Is not the problem one of comparing an old "bundle of rights" with a new package of different rights evidenced by new securities, which may be of one or more classes? What contribution will be made to the attainment of that objective —or to insuring that holders of old securities will be fitted into the new capital structure at the levels of their respective priorities in the venture earnings, and, at any given level of earnings, receive on their new securities the substantial equitable equivalent in income and assets of what their old securities would have produced—by attempting to reduce all of the old securities and all of the new securities to a fictitious common denominator expressed in terms of dollars and cents?

The impossibility of valuing a railroad property, even as an entirety, in terms of dollars and cents, has often been recognized by this Court.[1] Even more impossible is it to ascribe absolute dollars and cents values to parts of a system. Reference has already been made to the practical difficulties of the Commission in applying the rational rule

[1] See pp. 41-42, *supra*.

which it does apply in its present practice. What possible realism could there be to an effort to d duce, from segregation, severance and contributed traffic studies, precise dollars and cents values for pieces of a main line and various branches having separate underlying first liens and overlapping second and third liens?

Reorganization is primarily a business or administrative problem, once the technical legal rights of the parties under their contracts are determined. This is particularly true of a determination of the "reorganization value" of those legal rights, and of the "full satisfaction" or "payment" or "making whole" of those rights in terms of new securities. Section 77 as administered by the Commission has eliminated "bargaining" among securityholders, based upon their self interest and their experience in security values, as the method of solving the problem of allocation. It is submitted, however, that Section 77 did not substitute any fictitious mathematical formula as the *sine qua non* of the "fair and equitable" plan. It left the problem of such allocation to the expert judgment of a body already long experienced in the problems of security values before Section 77 was enacted. It may be that the Commission, as the substituted "reorganizer," might well have secured greater expedition of this and other reorganizations, without loss of a judicial approach to the "fair and equitable" problem, by the informal mediation conferences urged upon it by all the parties in the *Western Pacific* case.[1] However, be that as it may, the Commission has dealt with the problem of allocation scientifically, sensibly, fairly and in a practical manner. This Court should place the stamp of approval upon the Commission's methods of valuation and

[1] *Cf.* Bourne, *Findings of "Value" in Railroad Reorganizations* (1942) 51 Yale L. J. 1057, 1090.

allocation and should, by reversing the decision below in the *Western Pacific* case, refuse to hamstring the reorganization process by tying it up with impossible mathematical red tape which can only produce years of litigation and result in nothing but wasteful expense to all concerned.

4. The Allocations Under the Commission Plan

(a) Allocations as Between the First Mortgage and the Refunding Mortgage.

The correctness of the decisions of the Commission and the District Court that the First Mortgage is a first lien, subject only to the Trustees' Certificates, upon all the assets of the Debtor and the Trustees except for certain securities specifically pledged with the Refunding Mortgage Trustee, is assumed in this discussion. Affirmance by this Court of those decisions will be urged in separate briefs.

The First Mortgage Bonds as of January 1, 1939, had for each $1,000 of principal claim an equally secured claim for accrued interest of $266.67. Upon that aggregate claim of $1,266.67 each is entitled by contract to receive 5% interest annually.

The Commission Plan requires the following surrenders of rights and seniority by the First Mortgage Bondholders:

> 1. Upon no part of their claim are they hereafter to receive fixed interest. The likelihood of their ever receiving the income to which they are presently entitled is, if the record of past earnings analyzed above is any criterion, somewhat remote.[1]

---

[1] Pages 57-68, *supra*.

2. In respect of 40% of the principal amount of their Bonds they are to receive new Income Mortgage Bonds with an annual interest rate of 4½%, or 10% less than the 5% to which they are presently entitled.[1] This new 4½% rate is to be contingent upon income, and to the extent that deficiencies of income exceed three years' interest at the reduced rate, the bondholders are wholly deprived even of the reduced rate of return.

3. In respect of 60% of the principal amount of their Bonds they are to receive new Preferred Stock. As to that 60%, they are to be transferred from a creditor position to the position of a stockholder. While their annual rate of return remains unchanged at 5%, such return is to be dependent wholly upon annual income, and to the extent of any income deficiency, is lost forever. The income on which they must hereafter depend is that *after* income and excess profits taxes; whereas as creditors they came ahead of such taxes. Moreover, dividends on the Preferred Stock (though cumulative to the extent earned) need not be paid unless the Board of Directors of the new company deems payment advisable.

4. In respect of that part of the claim representing the accrued and unpaid interest on their Bonds to January 1, 1939, they are not only to be transferred

---

[1]The Committee urged before the Commission that the Income Mortgage Bond interest rate should be 5%, believing that no consideration of public interest required the sacrifice imposed upon the First Mortgage by reducing the existing rate. Complaining junior interests, however, urged that the rate should be but 4% and that the contingent interest should be wholly non-cumulative.

from a position of creditor to the position of stockholder, but the relative priority of that portion of their claim against the assets of the Debtor is to be taken away by the simultaneous allotment of Common Stock to the pledgees of the junior Refunding Bonds as against the second lien of those Bonds. The allotment to junior creditors is upon terms not substantially less favorable than the terms upon which the Common Stock is allotted to the First Mortgage Bondholders. The price to the First Mortgage Bondholders is $57 per share; to the RCC Notes $62 per share.

In partial compensation for the drastic sacrifices, both of principal position and income rights, imposed upon the existing First Mortgage Bondholders as above outlined, the Commission found that the public interest permitted incorporation in the new securities proposed under the Commission Plan of the following features, all of which were objected to in the Courts below by the junior interests:

1. A Sinking Fund, amounting to ½% of the principal amount of outstanding Income Mortgage Bonds annually, but dependent upon the existence of available net income, is created for the redemption or purchase of Income Mortgage Bonds;

2. The new Income Mortgage Bonds are convertible into new Common Stock at the rate of 20 shares for each $1,000 Bond; and

3. The new Preferred Stock is made participating with the Common Stock, share for share, in dividends paid in any year after the payment in such year of dividends of $3 per share on the Common Stock.

As between the First Mortgage and the Refunding Mortgage considered as liens of successive rank on substantially all the Debtor's assets (and it will be seen in our later discussion that the first lien of the Refunding Mortgage represents a relatively small portion of the assets), there may be some question whether this treatment of the First Mortgage Bondholders affords them the full compensation for their surrendered rights contemplated by the *Consolidated Rock Products* case. Certainly the three features above enumerated, and objected to by the junior interests, afford slight compensation to the First Mortgage Bondholders for the drastic sacrifices imposed upon them. That these three compensating features do not violate any rights of the objecting junior interests would seem to be beyond reasonable doubt.

The objections that the Sinking Fund of ½% of the principal amount of the outstanding Income Mortgage Bonds, payable only out of available net income after Income Mortgage Bond interest, would interfere with future financing through stock and would depreciate the stock allotted to junior interests by applying to retirement of the Income Mortgage debt cash which otherwise might be applicable to dividends on that stock, seem to demonstrate their lack of merit by their very statement.[1]

The conversion privilege attaching to the Income Mortgage Bonds, to which the junior creditors have objected, furnishes, on the basis of the Debtor's earnings record,

---

[1]Similar objections have been overruled in *In re Chicago Great Western R. R.*, 29 F. Supp. 149 (N. D. Ill. 1939); *In re Chicago & North Western R. R.*, 35 F. Supp. 230 (N. D. Ill. 1940); and *In re Chicago, Milwaukee, St. Paul and Pacific R. R.*, 36 F. Supp. 193 (N. D. Ill. 1940).

rather illusory compensation for the "lost rights" of the First Mortgage Bondholders. Before the conversion privilege can ever be of value the reorganized company will have to establish a *seasoned* record of payment of dividends in excess of $2.25 per share. This would require *sustained* annual earnings in excess of $4,260,000, an amount earned by the Debtor in only three of the last twenty years.

Similarly, the objection of the junior interests that the participating right of the new Preferred Stock in dividends after annual Common Stock dividends of $3 per share depreciates the allotment to the junior interests would seem to be baseless. The average earnings illustrated by the graphs opposite pages 58 and 59, *supra,* indicate that, in all of the average periods of the past there considered, the Preferred Stock dividends, and in most of those periods also the Income Mortgage Bond interest, would have failed of realization by substantial amounts. The limited accumulation of unearned Income Bond interest and the absence of accumulation of unearned Preferred Stock dividends means that the First Mortgage Bondholders will lose forever a substantial part of the income required as the "equitable equivalent" of their present income rights. Before the participating right will be effective the reorganized company will have to earn in excess of $4,600,000 annually, an earnings record, as already pointed out, not in reasonable contemplation for the estimable future. Certainly this participating feature also affords but illusory compensation for lost income rights of the First Mortgage Bondholders.

In dealing with the relative allocations of securities between the First Mortgage and the Refunding Mortgage in respect of the assets as to which they are, respectively, first

liens, the Commission Plan is liberal to the Refunding Bonds.

There are physically pledged with the Trustee under the Refunding Mortgage securities constituting all the funded debt and 97.87% of the stock of Tidewater Southern, 33⅓% of the bonds and stock of Central California Traction, and 49.4% of the stock of Alameda Belt Line.[1]

In its Original Report and Order the Commission allotted only new Common Stock in respect of this collateral.[2] On reconsideration upon the Petition of the Refunding Mortgage Trustee, the Commission, in its final Report and Order, found that the Tidewater Southern properties were of value, but that the lien of the Refunding Mortgage upon the securities of Central California Traction Company and Alameda Belt Line "has no material value."[3]

The simplicity, in the *Western Pacific* case, of this problem of allocation between the two liens of equal rank upon different assets (*i.e.*, determining the value of the Refunding Mortgage first lien assets in relation to the great part of the system upon which the First Mortgage is a first lien) obviated the necessity for the elaborate segregation, severance and contributed traffic studies which the Commission has used in the more complicated reorganization cases. Nevertheless, from the very fact that the three Refunding Mortgage properties are separately operated and maintain separate accounts, the Commission did have before it what was in effect a segregation study. A study

---

[1]In addition there are so pledged some admittedly worthless notes of other subsidiaries (R. 1095).

[2]R. 270-1. [3]R. 315.

of the traffic contributed by each of the three properties to the System was also made.[1]

This valuation data evidenced that the average operating loss of the Central California Traction Company during the 12 years 1928 to 1939, inclusive, was in excess of $14,000 per year,[2] while that of the Alameda Belt Line was about $28,000 per year,[3] and that the Debtor had made cash contributions to the deficit burden of carrying the properties for the Central California Traction property during the period 1928 to 1938, an average of $31,919 per year, and, for the Belt Line, $22,095 per year.[4]

While the record showed that the traffic carried by other lines of the Debtor which originated or terminated on the Central California Traction and Alameda Belt properties was substantial,[5] there was no evidence that that traffic would not have come to the Debtor even if it had not had its fractional investments in those separate companies. Nor did the record show how much of the gross revenues upon the traffic so obtained by the Debtor had been carried through to net. It would seem doubtful upon the record whether the Debtor realized, upon the traffic so contributed and which it carried upon interchange, an amount any more than sufficient to offset its contributions toward the deficits of the two properties.

The "valuation data" in respect of these two properties therefore affirmatively established the correctness of the Commission's findings that they "do not appear to be of much value, except as the debtor through such holdings

---

[1]R. 1950, 1954, 2019, 2037, 1105-6.
[2]R. 2019, 2084-5, 1100, 1309.
[3]R. 2019, 2088-9, 1103, 1111.
[4]R. 1101, 1104-5.
[5]R. 2019, 2037, 1105-6.

may be able to secure traffic for its lines which it might not otherwise be able to secure. * * * Thus the lien on the securities of these two companies has no material value."[1] Nevertheless, as is indicated below, some recognition of a possible value of that lien is included in the Common Stock allocated to the RCC and ACJ Notes.

The Commission found the rate-making value of Tidewater Southern in an amount representing 1.3% of the comparable System valuation, and the reported earnings for the six year period 1930-1935, in an amount representing 7.2% of adjusted System earnings, before deducting therefrom the Debtor's contributions to the deficits of the Central California Traction and the Alameda Belt Line. While the Commission recognized that on the basis of this valuation data "the Tidewater Southern is a paying railroad and also a valuable feeder," the Commission also recognized that as the owner of all the funded debt and 97.87% of the outstanding stock of Tidewater Southern the Debtor's determination of its rate divisions with that property was not a matter of arms-length negotiation nor of any importance except in reorganization. "Its earnings," said the Commission, "are, to a large extent, dependent upon the divisions of joint rates accorded it by the debtor."[2]

The Commission, upon its analysis of all the "valuation data" before it, allotted to the Refunding Mortgage first lien property 3.5% of the total Income Bonds and Preferred Stock to be issued in the reorganization, and it gave further recognition to the value of that property by the allocation of Common Stock, as next explained.

Both the second lien of the Refunding Mortgage upon the assets upon which the First Mortgage is a first lien,

[1]R. 314-5. [2]R. 315.

and the Refunding Mortgage first lien assets were given further recognition by allocating to the RCC Notes and the ACJ Notes all the Common Stock remaining out of the aggregate "reorganization value" after making the allocations to the First Mortgage Bondholders hereinbefore explained and the compromise allocations to the RFC Notes discussed below.[1] Because this last-mentioned compromise, as will be later seen, allotted to the RFC Notes, 29,360 shares less of Common Stock than the amount to which its proportion of pledged Refunding Bonds would entitle it out of the amount allotted to the Refunding Mortgage, the effect of the compromise was to increase the amount of Common Stock distributed to the RCC Notes and the ACJ Notes.

The ultimate result of these allocations is that RCC Notes are allocated Common Stock at $62 per share. There may be doubt whether the difference between this price and the $57 per share at which the new Common Stock is allocated to the First Mortgage Bond interest sufficiently recognizes the priority of the First Mortgage Bonds. Whatever error there may be thus favors the objecting junior interests.

(b) Allocations as Between Pledgees of Refunding Bonds

The RFC Notes, the RCC Notes, and the ACJ Notes are secured by the pledge, respectively, of 56.6%, 21.1%, and 22.3% of the outstanding Refunding Bonds.

The Commission found that the securities available for distribution against the Refunding Bonds are "inadequate in value to satisfy the aggregate claims of" the pledgees,

[1] Page 107, *infra*

that the "allocation of reorganization securities" to RFC "exhausts the value of the collateral pledged" under the RFC Notes and that hence the equity of RCC in such collateral "has no value."[1]

As has been fully pointed out in the discussion of the valuation data supporting the Commission's finding that the unsecured debt and stock of the Debtor "have no value," these additional findings by the Commission constituted, by simple mathematical computation, a finding that the aggregate "reorganization value" of the Debtor's properties, and of the new securities available for distribution, did not exceed $84,027,559. The conclusive force of the valuation data in support of these findings has already been indicated.

Where two or more primary claims against a debtor (*e.g.*, collateral notes, such as the RFC, RCC and ACJ Notes) are secured by the pledge of unequal amounts of mortgage bonds of a debtor equally secured under the same mortgage, the pledgees, as between themselves, share in the net proceeds of the assets of the estate according to the face value of the pledged bonds held by them (*i.e.*, are entitled to dividends on the pledged bonds in the enforcement thereof at the same rate per pledged bond) until, in the case of each pledgee, its primary claim (*i.e.*, the claim for which the bonds were pledged) is paid in full as to both principal and interest.[2]

---

[1] R. 271, 316.

[2] *Richardson's Executor* v. *Green*, 133 U. S. 30 (1890); *Merrill* v. *National Bank*, 173 U. S. 131 (1899); *Equitable Trust Co.* v. *Great Shoshone & T. F. W. P. Co.*, 228 Fed. 516 (D. Idaho 1915); *Central Trust Co.* v. *Cincinnati, H. & D. Ry.*, 169 Fed. 466 (C. C. S. D. Ohio 1908); *Sauve* v. *Fleschutz*, 219 Fed. 542 (C. C. A. 8th, 1915).

The Commission's findings as to the reorganization value of the Refunding Mortgage interest in the Debtor's properties compelled the application of the principle of law above stated. Hence they compelled the findings of the Commission that "the value of each of the claims" (*i.e.*, RFC, RCC and ACJ Notes) "is proportionate to the collateral securing it," and that the allotment of new securities respecting the pledged Refunding Bonds "should be made on the basis of the collateral held rather than on the amount of the claims."[1] The Commission, therefore, properly, as a matter of law, allocated to the RCC Notes and the ACJ Notes out of the new Income Mortgage Bonds and Preferred Stock allocated to the Refunding Mortgage, amounts of those new securities in the proportions which the pledged Refunding Bonds held by them respectively bore to the aggregate amount of pledged Refunding Bonds.

All the permissible Common Stock remaining after the allocation to the First Mortgage above discussed and to the RFC Notes under the compromise next discussed, was divided between the RCC Notes and the ACJ Notes, in the proportions which their pledged Refunding Bonds bore to each other. As already noted, the compromise with the RFC Notes resulted in such allocation of an amount of Common Stock substantially larger than would have been available had there not been such a compromise.

This allocation among the pledgees of the Refunding Mortgage Bonds was the one feature of the Commission Plan which permitted—indeed required as a matter of law—application of a mathematical formula. No other type of allocation would have lawfully recognized the relative priorities of the respective pledgees.

---

[1] R. 271.

(c) THE COMPROMISE OF RFC'S ENTIRE "BUNDLE OF RIGHTS"

As of January 1, 1939, RFC was the holder of $10,000,000 Trustees' Certificates and a claim for $3,862,869.98 on the RFC Notes. This latter claim was secured by a first lien pledge of $10,750,000 principal amount of Refunding Bonds or 56.6% thereof. This pledge was at the rate of $3,628 of Refunding Bonds for each $1,000 principal amount of Notes as compared with a pledge at the rate of $1,635 of Refunding Bonds for each $1,000 principal amount of the RCC Notes.

That the Trustees' Certificates which originally matured in 1935 and 1936,[1] and have since been extended from year to year, could enforce, and readily realize, payment in full in cash upon any maturity has always been conceded by all the parties. The refunding of these Trustees' Certificates has been a foremost problem of the reorganization from the beginning of the negotiation of a reorganization plan following the Debtor's default in First Mortgage interest in 1934.

This was true even in advance of the issue of the Trustees' Certificates, for it was then known that the $10,000,000 would have to be raised to rehabilitate the property and make good deferred maintenance, and it was equally known that the only then available source of such funds was the purchase of Trustees' Certificates by RFC.

It has also been recognized throughout the reorganization proceeding that, in the state of railroad credit which has existed, and still exists, ultimate refunding of the Trustees' Certificates into long-term securities would probably

[1] R. 1054-6.

require resort to RFC and that the consideration to be furnished to RFC for supplying long-term funds on a basis more favorable than current market prices would probably have to take the form of granting to the RFC Notes treatment more favorable than RFC might deserve on the basis solely of the pledged Refunding Bonds. Accordingly, save for but one proposal,[1] every one of the more than a dozen different plans proposed by the various parties before the Commission contemplated that RFC would permanently fund the $10,000,000 for a consideration.

The Commission Plan dealt with the problem by allotting to RFC in exchange for its entire "bundle of rights" $10,000,000 new First Mortgage Bonds having an admittedly prospective realizable market value less than the value of the Trustees' Certificates, and participation in respect of the RFC Notes on the same basis as an equal amount of old First Mortgage Bonds.

Before the Commission there was no attempt at testimony as to the prospective market values of the new First Mortgage Bonds. The Commission, however, by reason of its experience in the regulation of railroad security issues and its consequent continuous familiarity with market values, was an expert as to what would constitute a fair consideration for the RFC's permanently funding the $10,000,000 Trustees' Certificates into such Bonds.

There was evidence before the District Court as to the probable market value of the new First Mortgage Bonds, both in connection with the District Court's hearing upon

---

[1]R. 104. This one exception was an early proposal by ACL that the money be provided by WP Corp. However, WP Corp. was not a party to the proceeding before the Commission and no one ever gave the slightest assurance that it could or would provide the $10,000,000.

the Commission Plan[1] and again upon an abortive attempt made by ACJ to render the Commission Plan incapable of consummation by denuding the Trustees of cash in order to pay off the Trustees' Certificates.[2] That evidence indicated a probable market value of the new First Mortgage Bonds of between 85 and 90, so that the new First Mortgage Bonds to be taken by RFC are probably worth from $1,000,000 to $1,500,000 less than the amount readily realizable in cash on the Trustees' Certificates.[3]

Were RFC to receive for the RFC Notes amounts of new securities proportionate to its pledged Refunding Bonds it would receive

$414,175 new Income Bonds
$649,518 Preferred Stock
45,148 shares of new no par value Common Stock.

Under the allotment of the Commission Plan, *pari passu* with the existing First Mortgage Bonds, it receives

$1,185,200 new Income Bonds
$1,777,800 new Preferred Stock
15,788 shares of new no par value Common Stock.

Thus, in order to facilitate a reorganization of the Western Pacific, a legitimate objective for this Government corporation, RFC will accept for its "entire bundle of rights"

---

[1]R. 1530, 1532, 1536, 1554.

[2]*In re Western Pacific R.R.*, 38 F. Supp. 877, 879 (N.D. Calif. 1941).

[3]First Mortgage Bonds of recently reorganized railroads were selling, as of July 31, 1942, at the following prices: Chicago & Great Western, 64; Erie, 90¼; Gulf, Mobile & Ohio, 67¾; Wabash, 78 (Commercial & Financial Chronicle, vol. 156, pp. 409-12).

$771,025 principal amount more Income Bonds, $1,128,282 par value more new Preferred Stock, but 29,360 less shares of new no par value Common Stock than it might have obtained against that "entire bundle of rights" by standing on those rights and requiring cash payment of its Trustees' Certificates. While the aggregate additional face amounts of Income Bonds and Preferred Stock thus allocated to RFC is slightly greater than the probable discount upon the $10,000,000 of new First Mortgage Bonds, obviously those new securities do not have a presently realizable value even approximating their face amounts. The consideration furnished by the increased amounts of these new senior securities allocated to RFC is further offset by the 29,360 shares reduction in the amount of Common Stock allocated to it.

The argument of the objecting junior interests that the two claims of RFC cannot be treated as a single "bundle of rights" but must be dealt with entirely separately is, it is submitted, without merit. The contention seems to violate the express language of this Court's opinion in the *Consolidated Rock Products* case.

If the fair compromise of the RFC's entire "bundle of rights" provided for by the Commission Plan is not adopted, not only the First Mortgage Bondholders, but to an even greater degree the RCC Notes and the ACJ Notes, will be seriously injured.

The rapidly mounting gross income of the Debtor's properties, before Federal taxes, is resulting in a rapid accumulation of cash by the reorganization trustees. As of September 1, 1942, the cash on hand and on deposit with RFC aggregated $10,493,000, of which a substantial amount, however, must be reserved for taxes and

deferred maintenance, as well as for the additions and betterments necessary to meet additional traffic demands. If any of the remaining cash is used to pay down, or possibly pay off, the Trustees' Certificates, so that the RFC Notes will be left to be dealt with solely upon the basis of their pledged Refunding Bonds, the reorganized company will be denuded of the cash necessary to service the new securities from January 1, 1939, the effective date of the Commission Plan. Not only will the First Mortgage Bondholders' realization of any cash income out of the earnings of their properties thus be substantially delayed to their own injury, but if the Commission Plan is thus rendered abortive, at least $10,000,000 more of interest will have accrued upon the First Mortgage since January 1, 1939. This will have to be provided for in any new plan with due recognition of its priority over the pledged Refunding Bonds.

5. Conclusion

The allocation of new securities under a Section 77 railroad reorganization plan between mortgage bonds having liens of different rank on the same assets and also liens on different assets must be on the basis of giving to each mortgage its "equitable equivalent of the debtor's assets available for the satisfaction" of its claim in terms of the various classes of new securities, having regard for the relative order of priority of the respective existing claims upon system earnings at the various levels represented by the proposed new securities and all other relevant factors, all as appraised by the Commission's expert judgment and subject to the court's approval of the result as fair and equitable within the limits stated in Point III of this brief.

Such allocation cannot be made "in proportion to the value of the respective claims" determined by dollars and cents valuations of properties, old claims and new securities, and no such valuations are necessary to determine fair and equitable allocations, except in those cases where it is necessary to determine whether the readily realizable market value of the assets securing an old claim exceeds the full amount of that claim.

The valuation data contained in the record supports the Commission's findings of the relative values, in terms of new securities, of the liens of the First Mortgage and the Refunding Mortgage, respectively, as well as the Commission's findings that the securities available for distribution to the RFC Notes, the RCC Notes and the ACJ Notes against the Refunding Bonds held by them as collateral are "inadequate in value to satisfy the aggregate claims" and that "the equity of" RCC in the collateral pledged under the RFC Notes "has no value." Hence, as a matter of law, the basic allocation of new securities as between the First Mortgage and the Refunding Mortgage made by the Commission violates no right of RCC or ACJ as pledgees of Refunding Bonds, and as between RCC and ACJ the new securities representing the pledged Refunding Bonds must be divided on the basis of the amounts of such pledged Bonds rather than on the basis of the amounts of the claims on the RCC Notes and the ACJ Notes.

The preferred claim of RFC on its $10,000,000 Trustees' Certificates and its junior claim on the RFC Notes may properly be dealt with as an "entire bundle of rights." The compromise of the aggregate RFC claims provided for by the Commission Plan is practicable and fair and in the interest of all of the securityholders of the Debtor.

Neither any apparent increase in the annual earnings of the Debtor's property (analyzed under subsection 5 of Point I above) nor the accumulation of cash by the reorganization trustees requires reconsideration of any of the Commission's findings or conclusions with respect to allocations.

III

THE DISTRICT COURT PROPERLY RECOGNIZED THE JURISDICTION OF THE COMMISSION UNDER SECTION 77 AND, IN THE EXERCISE OF AN INFORMED AND INDEPENDENT JUDGMENT, FULLY PERFORMED THE COURT'S FUNCTIONS UNDER SECTION 77.

1. Three Opposing Views

Three opposing constructions have been taken of Section 77 as to the relative jurisdictions of the Commission and the courts over the approval of a plan of reorganization.[1]

(1) The construction taken by the Circuit Court of Appeals in this case:

> None of the findings or conclusions of the Commission, whether as to questions affecting the "public interest" or as to questions affecting "the rights of each class of creditors and stockholders," are in any way binding on the court. The court must independently determine each such question as an original matter. Only if all its determinations coincide with all the determinations of the Commission may

[1] See Comment (1941) 51 Yale L. J. 967, at 972, *et seq.*

the court approve the plan approved by the Commission.

(2) The extreme opposite construction:

All the findings and conclusions of the Commission upon both types of questions are binding and conclusive upon the court except for errors of law. The court must therefore approve the plan approved by the Commission, in the absence of errors of law, if there is any evidence to support the Commission's findings of fact, notwithstanding that the court may be strongly of the opinion that the Commission's determinations of facts upon which depend the rights of classes of creditors and stockholders are contrary to the weight of the aggregate evidence, including both that in the record certified by the Commission and that taken by the court.

(3) The construction taken by the District Court in this case:

The findings and conclusions of the Commission upon questions affecting the public interest, *e.g.*, the amount and classification of the new capitalization, are binding and conclusive upon the court, in the absence of errors of law or lack of supporting evidence. The findings and conclusions of the Commission as to the rights of each class of creditors and stockholders are preliminary only. It is the duty of the court to exercise its independent judgment as to such questions, giving, however, great weight to the Commission's judgments upon such of the questions affecting such rights as to which the Commission is an experienced expert, *e.g.*, rela-

> tive earning power and values of properties and securities. If, notwithstanding absence of any errors of law, the court's judgment upon questions of fact affecting the rights of any class of creditors or stockholders (based both upon the evidence taken by the Commission and that taken by the court) differs from the preliminary findings of the Commission, it is the court's duty to return the case to the Commission for modification of the plan or other further action in accordance with Section 77.

This third construction the Committee believes to be both practical and required by the express language and the legislative history of Section 77.

2. Section 20a of the Transportation Act and Reorganizations in Equity

In *Prentis* v. *Atlantic Coast Line Company* Mr. Justice Holmes said:

> "A judicial inquiry investigates, declares and enforces liabilities as they stand on present or past facts and under laws supposed already to exist. That is its purpose and end. Legislation on the other hand looks to the future and changes existing conditions by making a new rule to be applied thereafter to all or some part of those subject to its power."[1]

The determination of a capital structure for a railroad is essentially a legislative and not a judicial function.[2] When, therefore, in 1920, Congress vested the Commission

[1] 211 U. S. 210, 226 (1908).

[2] *Akron, Canton & Youngstown Ry. Co.* v. *Hagenbuch*, 128 F. (2d) 932, 940 (C. C. A. 6th, 1942).

with exclusive and plenary power to determine whether the issue of securities by a common carrier was in the public interest, Congress was delegating to the Commission a part of the Congressional legislative power.[1]

The Commission's action in exercising the power so granted has been uniformly upheld by the courts in every case of which we are aware,[2] with one exception.[3]

After the enactment of Section 20a, a railroad corporation organized to carry out a reorganization plan approved by a Federal court in an equity proceeding was obliged to obtain the authorization of the Commission before it could issue new securities under the plan in exchange for the old securities. As a result, the Commission was in a position to block a reorganization approved by a Federal

[3]*United States* v. *Chicago, M. St. P. & P. Ry.*, 282 U. S. 311 (1931). In that case the Commission sought to regulate reorganization expenses payable out of assessments for which new securities were not, at least in form, being issued. The majority of this Court held that such regulation could not be imposed as a condition of the Commission's approval of the proposed new securities under Section 20a.

court of equity by refusing approval to the issue of the new securities if it deemed such securities incompatible with the public interest. It was the practice, however, in the old equity reorganizations to bring the plan substantially to consummation, not merely through the determination of the nature and extent of the securityholders' rights, but through the steps of securityholder consents, final Federal district court approval and organization of the proposed reorganized corporation, before the Commission was asked to pass upon the proposed new capitalization from the standpoint of the public interest under Section 20a.

This practice left the Commission in a dilemma. To refuse approval of the proposed new securities would undo much work already done at great expense of both money and time, and, in the cases which arose, a majority of the Commission believed that the paramount public interest required that the receivership be ended and the properties returned to their owners rather than that otherwise desirable standards of public interest be enforced with respect to the proposed new capitalization. Of this dilemma the Commission began to complain as early as 1922[1] and its complaints accelerated in forcefulness[2] until the Commission, in strongest terms, declared that the then practice was "fundamentally unsatisfactory and requires reform."[3] It should be noted, however, that those complaints in no wise related to the courts' determinations of the contractual

rights of the securityholders and involved no suggestion that the courts should be deprived of their ultimate jurisdiction over such determinations.

The Commission's dissatisfaction was shared by Congress. The flood of railroad bankruptcies which began in 1932 resulted in a demand for resort to the Federal bankruptcy powers for a new railroad reorganization procedure which would obviate the fictions of the old equity receiverships, the possible disruptions through ancillary receiverships, and the necessity for providing cash to meet the claims of small minorities of securityholders not assenting to approved reorganization plans.[1] But even more insistent was the demand that any new reorganization procedure should require submission of the plan to the Commission at an early stage of the proceeding in order primarily to enable it to pass on those questions affecting the public interest, *i.e.*, those relating to capitalization and classification of capitalization. Consequently, Section 77 reversed the previous practice of first submitting railroad reorganization plans to the courts for determination of the private rights of the securityholders *inter se*, and thereafter submitting them to the Commission for determination of questions of public interest.

Indeed the new legislation, as has already been stated, created a procedure under which the Commission has in effect become substituted for the securityholders as the "reorganizer" and its expert judgments substituted for the "bargaining process" among securityholders for the determination in the first instance, not only of the over-all ques-

---

tions of public interest, such as the total amount and character of capitalization to be issued in the reorganization, but also of the financial and other factual problems affecting the distribution of that capitalization in accordance with the legal rights of the old securityholders.

3. The Reorganization Process under Section 77

Under subsection (d) of Section 77, proposals of railroad reorganization plans are made by filing them with the Commission. Thereafter the Commission holds public hearings. Following such hearings,

> "* * * the Commission shall render a report and order in which it shall approve a plan, *which may be different from any which has been proposed*, that will in its opinion meet with the requirements of subsections (b) and (e) of this section, and will be compatible with the public interest; * * * In such report the Commission *shall state fully the reasons for its conclusions.*"

It will be noted that in approving a plan the Commission must:

(1) *Determine* that it will be compatible with the public interest;

(2) Be of the *opinion* that it will meet the requirements of subsection (b)[1]; and

(3) Be of the *opinion* that it will meet the requirements of subsection (e).[2]

---

[1]Subsection (b) deals largely with the mechanics of the plan, as to which no question was involved on the appeals below.

[2]The material portions of subsection (e) are quoted on pp. 120-21, *infra*.

Subsection (d) further provides that the Commission may, upon petition and further hearing, "in a supplemental report and order modify any plan which it has approved, stating the reasons for such modification."

The power of the Commission to control formulation of the plan, subject only to such judicial determination as may be required by Section 77 itself or by general constitutional principles, is emphasized by the further provision of subsection (d) that

> "No plan shall be aproved or confirmed by the judge in any proceeding under this section unless the plan shall first have been approved by the Commission * * *."

Upon the approval of a plan by the Commission, the Commission shall "certify the plan to the court together with a transcript of the proceedings before it and a copy of the report and order approving the plan."

Subsection (c)(7) of Section 77 vests in the judge the duty to "determine * * * for the purposes of the plan * * * the division of creditors and stockholders into classes according to the nature of their respective claims and interests."

Subsection (e) requires that the judge shall hold a hearing upon such "objections" to the plan and "claims for equitable treatment" as may be filed by the parties with the court. At such hearing the judge may receive evidence. After such hearing the judge *shall* approve the plan if *satisfied*[1] that it

---

[1]The Committee agrees with the contention of the junior interests below that "satisfied" means satisfied with the ultimate proof itself, rather than the ordinary test in judicial review of administrative action—whether the administrative agency acted lawfully and on substantial evidence.

(1) "complies with the provisions of subsection (b) * * *;" and

(2) "is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders;" and

(3) complies with certain other requirements respecting expenses and fees incident to the reorganization and administrative costs (as to which no question has been raised in the present case).

Subsection (e) further provides

"If the judge shall approve the plan, he shall file an opinion, stating his conclusions and the reasons therefor, and enter an order to that effect * * *."

If the judge shall not approve the plan, subsection (e) provides that he shall either dismiss the proceeding or refer it back to the Commission with his opinion, "stating his conclusions and the reason therefor" and "a copy of *any evidence received.*"

It will be noted that Section 77 does not vest in the court either

(1) jurisdiction to determine whether the plan is "compatible with the public interest" as required by subsection (d); nor

(2) jurisdiction to make original and independent proposals of a plan, if the plan approved by the Commission meets the requirements of subsections (b) and (e), even though the court may be of opinion that some better plan might be devised.

Of course in every complicated situation there may be several plans which might be "compatible with the public in-

terest," but it is that particular plan which the Commission approves as "compatible with the public interest" which "*shall*" be approved by the court if the court is *satisfied* that that plan meets the requirements of subsections (b) and (e) with respect to the private rights of the various classes of creditors and stockholders. No other plan *can* be approved by the court.

4. Extension of the Commission's Power Under Section 20a of the Transportation Act to Reorganizations Under Section 77

The words "compatible with the public interest", like the words "fair and equitable", had become words of art prior to their incorporation in Section 77. Not only Section 20a of the Transportation Act, but subsections 3 and 7 of Section 5, as well as other sections of the Interstate Commerce Act (49 U. S. C. § 1 *et seq.*), required determinations under the test of compatibility with the public interest. The standards applied in all those determinations related to financial and physical capacity for public service and performance of such service, as contrasted with the standards applicable to the determination of litigation between securityholders as to their respective contractual rights in specific property.

More than a decade prior to the enactment of Section 20a the Commission began to urge that for the protection of the public some reasonable regulation should be imposed upon the issuance of securities by railways. In its report on *Consolidations and Combinations of Carriers*, 12 I. C. C. 277, 305, 306 (1907), the Commission said:

> "It is a serious menace to the financial condition of the country to have large railway systems fail to

meet their obligations or go into the hands of receivers, and the object of legislation and administration should be to lessen the risks of railway investments.

* * * * * * * *

"It is of the utmost importance, also, that railway securities should be safe and conservative investments for the public, and should yield good and ample return for the money invested. Reasonable regulation will tend to make them safer and more secure investments, and thereby benefit not only the railway companies but the public."

Following the enactment of Section 20a, the Commission repeatedly held that the public interest did not permit the issue of securities on which probable earnings would be insufficient to pay charges. In *Denver & Rio Grande Western Reorganization*, 90 I. C. C. 141, 148 (1924), the Commission said:

"The public interests require that, before an issue of securities by a carrier is authorized, the probability of earnings sufficient to pay costs of operation and of fixed charges be reasonably established, with some surplus for dividends and other purposes."

The Commission has often forbidden the issuance of securities where it found that the prospective earnings were not sufficient to justify such issue.[1]

---

[1] *Bond Application of Texas Short Line Ry.*, 67 I. C. C. 400 (1921); *Securities Application of Asherton & Gulf Ry.*, 71 I. C. C. 281 (1922); *Securities of L. Ry & Nav. Co. of Texas*, 99 I. C. C. 357 (1925); *Securities of Yankton N. & S. R. R.*, 154 I. C. C. 669 (1929); *cf. N. Y. L. & W. Stock and Bonds*, 131 I. C. C. 34 (1927); *St. Paul & K. C. S. L. R. R. Bonds*, 189 I. C. C. 715, 716 (1933).

The essential jurisdiction of the Commission under Section 20a is carried into Section 77 not only by the requirement that the Commission shall formulate a plan "compatible with the public interest". By the fifth sentence of subsection (f), jurisdiction under Section 20a itself is specifically preserved to the Commission. That subsection provides:

> "* * * Upon confirmation of a plan the Commission shall, without further proceedings, grant authority for the issue of any securities, assumption of obligations, transfer of any property, sale, consolidation or merger of the debtor's property, or pooling of traffic, to the extent contemplated by the plan and not inconsistent with the provisions and purposes of the Interstate Commerce Act as now or hereafter amended."

Any doubts respecting the carrying over into Section 77 of the powers of the Commission under Section 20a are completely removed when the legislative history of Section 77 is examined. The report dated January 23, 1933, of the Committee on Judiciary of the House, of which Representative Sumners of Texas was Chairman, stated in part:

> "Subdivision (f) provides for the final approval of the plan by the Interstate Commerce Commission and, after such approval, for the certification of the plan to the court for its approval. After the acceptance is filed with the commission * * * the commission exercises its powers under section 20a of the interstate commerce act on the approval of issuance of securities necessary in the reorganization. This * * * retains an absolute and complete control

of the reorganization in the Interstate Commerce Commission of the plan recommended and approved by it."[1]

To the same effect are the remarks of Representative LaGuardia of New York, a member of the Committee on Judiciary of the House, who took an active part in guiding the bill through the House.[2]

Congress, therefore, in the enactment of Section 77 clearly contemplated that the Commission would, as it did in the Commission Plan, require that a railroad reorganization plan shall "provide a capital structure for the reorganized company which will give it a reasonable opportunity to function efficiently and continuously as a going concern", "that the capitalization should not exceed a conservative appraisal of the assets to be taken over by the reorganized company", "that proposed charges, whether fixed or contingent, be within * * * probable earning power" and that the capitalization should "be maintained within strict limits" to insure that "the shares of its stock should not become mere tokens for stock market speculation". Jurisdiction to insure the attainment of these ends in the public interest was vested in the Commission, not in the courts.

This exclusive and plenary power of the Commission over capitalization in a reorganization under Section 77 is in no wise lessened by the fact that the Commission's determination of the capital structure is subject to judicial

---

[1]72nd Cong., 2nd Sess., Report No. 1897 to accompany H. R. 14359.

[2]76 Cong. Rec. 2927.

scrutiny.[1] If in the determination of the capitalization which the public interest permits to be issued by a corporation reorganized under Section 77, the Commission misinterprets or misapplies the law under which it is acting (for example in such manner as to result in confiscation of property rights), or exceeds the power constitutionally granted it by Congress, or acts without supporting evidence, then its determination may be set aside, or, in the language of Section 77, be "disapproved," just as can its determination of a rate to be charged in the future.[2] However, barring such an exercise of its power as to constitute a violation of subsection (e), the Commission's determination both of total capitalization, and of the details of that capitalization, like its determination of a rate,[3] must be accepted by the

---

[1] In *In re Erie*, 37 F. Supp. 237, 244 (N. D. Ohio 1940) the report of the Special Master, confirmed by the District Court, said

> "it is my opinion that the Commission's determination of the value of the properties * * * for reorganization purposes—*i.e.* the total capitalization—is conclusive unless it clearly appears (1) that the Commission applied improper standards of valuation, or (2) that its finding is wholly unsupported by the evidence. * * * This conclusion is not inconsistent with the view that the court is required to exercise an independent judgment in determining that the Plan complies with the requirements of Section 77."

[2] See *Mississippi Valley Barge Line* v. *United States*, 292 U. S. 282, 286 (1934).

[3] *Cf. United States* v. *Morgan*, 313 U. S. 409 (1941), in which the Court said (p. 417):

> "We are in the legislative realm of fixing rates. This is a task of striking a balance and reaching a judgment on factors beset with doubts and difficulties, uncertainty and speculation. On ultimate analysis the real question is whether the Secretary or a court should make an appraisal of elements having delusive certainty. Congress has put the responsibility on the Secretary and the Constitution does not deny the assignment."

Similarly, Congress has put the responsibility of determining capitalization on the Commission.

court as the basis for its judicial determination of the *remaining* questions of private rights involved in the reorganization.[1]

5. The Ultimate Jurisdiction of the Court to Determine the Private Rights of the Various Securityholders.

Conversely, (1) the determination of whether the Commission's conclusions on the questions thus within the Commission's exclusive jurisdiction contain such errors of law, or are so lacking in evidentiary support, as to violate the private rights of any of the existing securityholders, as well as (2) the ultimate determination of the nature and extent of the contractual rights of each class of existing creditors and stockholders and of whether a plan approved by the Commission affords due recognition of those rights, are essentially judicial functions, within the province of the court.

---

[1] In *Akron, Canton & Youngstown Ry. Co.* v. *Hagenbuch*, 128 F. (2d) 932, 940 (C. C. A. 6th, 1942), the Court said:

> "Historically, the power to value railroad properties for rate making and capitalization purposes has always been lodged in the Interstate Commerce Commission.
>
> "There is nothing in the present Act [Section 77] which would indicate that the Congress intended to deprive the Commission of any of the powers it had so long exercised in valuing railroad properties for capitalization purposes.
>
> "The determination of the *value* of the properties, and the *amount* and *character* of *capitalization*, are legislative functions affecting the public interest and are *exclusively* within the province of the Commission under the Act. The only qualification is that the court shall independently determine whether, in the exercise of its jurisdiction, the Commission has acted fairly within the bounds of the Constitution and not arbitrarily."

As to many questions essentially within the ultimate jurisdiction of the court, the latter should give great weight to the reasoning and conclusions of the Commission, as an experienced expert. For example, the Commission has particular ability to judge the earning power of the various parts of railroad systems securing different securities and, hence, to determine whether the new securities allocated to the different old securities are such as to insure to each class of creditors the equitable equivalent of the assets of the debtor available for the satisfaction of its claim, as those claims are legally determined by the court.

Respect for the Commission's expert judgments on such questions, even to the point of regarding them as "well nigh conclusive" and "almost as verities,"[1] does not, however, require construction of Section 77 at the extreme opposite pole from that taken by the Circuit Court of Appeals below. Yet revulsion at the unworkability of Section 77 as construed by that Court has led to the argument that Section 77 cannot be made workable unless all the findings and conclusions of the Commission are, except only for errors of law, binding and conclusive upon the court.

In support of this extreme position it is argued (1) that problems affecting the public interest and problems affecting the rights of securityholders are so hopelessly intertwined that their separation is impracticable; (2) that no such distinction of jurisdiction between the two types of problems is made by Section 77 itself; and (3) that unless Congress had intended to divest the courts of, and to vest the Commission with, substantially final jurisdiction, except

---

[1] *In re Chicago & North Western Ry.*, 121 F. (2d) 791, 796 (C. C. A. 7th, 1941).

for errors of law, over all questions involved in a reorganization, it would not have enacted Section 77 at all, because Section 20a of the Transportation Act would have sufficed.

These arguments, it is submitted, (1) are factually unsound; (2) disregard the clear, although perhaps not perfect, draftsmanship of Section 77; and (3) are in conflict with the entire legislative history of that Section.

The view that problems of public interest and problems of private rights of securityholders are so hopelessly intertwined as to prevent segregation may in part be due to failure adequately to analyze the problem of formulating a railroad reorganization plan. There are three distinct steps.

From the standpoint of the venture as an entirety a reorganized capitalization must first be found which will represent, both in its aggregate amount and its classification, the probable future earning power of the property at the various levels of changing business cycles. That capitalization must be determined in the light of its being "compatible with the public interest" within the meaning of those words of art which had been established before the enactment of Section 77. To be sure the molding of the capitalization will be affected by the necessities of the two remaining problems, but the controlling factor as to both aggregate amount and classification is the public interest.

Next, the nature and extent of the contractual rights of each existing class of creditors and stockholders must be determined as a basis for determining the nature and extent of the participation by each class. Such a determination will involve not merely questions of law but a multitude of questions of fact, most of which are not even

remotely connected with the public interest. For example, as in the *Western Pacific* case, the relative liens of two mortgages may depend upon disputed factual circumstances in connection with their creation; or upon disputed facts as to whether equipment has been purchased for use upon one property or upon another; or upon disputed facts as to whether the proceeds of bonds under one mortgage have been expended upon property claimed by a specific lien of a later mortgage, as against the after-acquired clause of the earlier mortgage; or upon disputed facts claimed by one security to create an estoppel against the holders of another security, etc. Perhaps the rights of a class will depend upon disputed facts claimed to establish fraud. The Commission had acquired no expertness, indeed it had had no experience, in the determination of such questions prior to the enactment of Section 77. It has acquired little such experience in the administration of that Section. In few cases have disputes between classes of securities as to their respective contractual rights been pressed to a conclusion either before the Commission or before the court prior to Commission action upon a plan. Where they have been so pressed before the Commission, it has itself recognized, as in the *Western Pacific* case, that its determinations are tentative only and that final decision is for the court.[1]

The third step in the reorganization process is the distribution of the capitalization among the several classes of creditors and stockholders in such manner as to give each, in terms of the new securities, its equitable equivalent of the assets of the debtor available for the satisfaction of its claim, as those claims have legally been determined. This

[1] R. 262.

is a problem upon which admittedly the experience of the Commission in determining earning power and security values will be expert and helpful. It is, however, essentially a problem of the relative nature and extent of the private rights of securityholders *inter se* and not a problem comprehended in the words of art, "the public interest." Furthermore, it is not a problem as to which the courts are without experience. The multitude of cases which have arisen under Section 77B and later Chapter X have far exceeded the number of railroad reorganization cases under Section 77. The courts have an experience even on this type of question entirely comparable to that of the Commission.

Had Congress intended to take away from the courts their traditional jurisdiction to determine the purely factual questions embodied in the second category of reorganization problems as above analyzed, indeed, if it had intended such a divestment in respect of the questions involved in the third category, it would have used entirely different language and an entirely different technique of drafting than was used in Section 77.

By subsection (d) the Commission is vested with jurisdiction to *determine* a plan that will be compatible with the public interest. Because the plan must be complete and therefore must allocate new securities with due recognition of the private rights of the securityholders, the Commission is required preliminarily to have an *"opinion"* that its plan will meet the requirements of subsection (e).

As has already been pointed out, the court is not given jurisdiction even to express any "opinion" as to the questions of "public interest". But the grant of jurisdiction to determine the questions of "due recognition of the rights of

each class of creditors and stockholders,"[1] and of "the nature of their respective rights and interests,"[2] is in terms to the court.

Objectors to a plan approved by the Commission are required by subsection (e) to file with the court "detailed and specific objections in writing to the plan and their claims for equitable treatment." Are these words which the expert lawyers who drew Section 77 would have used to limit an objector to raising solely questions of law before the court?

The court is then required to hold a hearing respecting these "claims for equitable treatment," at which the court may receive evidence. It has been the practice of the district courts in most reorganization cases, as was done in the *Western Pacific* case, to receive additional evidence offered by objectors to strengthen their position and in turn evidence offered to rebut the objectors' evidence. After such a hearing, and such receipt of evidence, the court is not merely required to express an "opinion" as to "the due recognition of the rights of each class of creditors and stockholders" raised by such "claims for equitable treatment"; it must be "*satisfied.*" If it is not satisfied and returns the case to the Commission, it certifies to the Commission "a copy of any evidence received." Is this a description of a hearing solely to discover errors of law? If the court is limited to determining whether or not, in a finding respecting a claim, the Commission committed an error of law upon the facts found by it, why should the court take evidence?

By the organization scheme of Section 77, as a matter of draftsmanship, Congress thus took a clear distinction

---

[1]Subsection (e). [2]Subsection (c)(7).

between questions affecting the public interest and questions affecting the contractual rights of creditors and stockholders and their due recognition. Even if there were any practical difficulty (which factually there is not) in distinguishing between the two types of questions, the express language and the organization of Section 77 would compel respect for the distinction.

Apart from the traditional jurisdiction of the courts in suits by different creditors involving questions of fact as to their respective rights, Congress had another excellent reason for not vesting in the Commission jurisdiction to determine such questions in a railroad reorganization, free from judicial review except for mistakes of law. Many of the Section 77 reorganizations, as in the *Western Pacific* case, have involved RFC claims. The Commission is an active participant in the creation of RFC loans to railroads and the determination of their security. It would be of doubtful propriety to vest in the Commission jurisdiction finally to determine disputed questions of fact in connection with such loans, perhaps involving even action of the Commission itself. The courts have already found it necessary to set aside two reorganization plans as unduly preferential to RFC, one wholly on factual grounds and the other on grounds involving mixed questions of law and fact.[1] In another case the court found it necessary to set aside a plan approved by the Commission as involving undue preference of certain classes and inadequate treatment of other classes.[2] The court's determination in this third case was upon grounds wholly factual.

---

[1] *In re Denver & Rio Grande Western R.R.*, 38 F. Supp. 106 (D. Colo. 1940); *In re St. Louis-San Francisco Ry.* (E. D. Mo., May 25, 1942, not yet reported).

[2] *In re New York, N. H. & H. R. R.* (D. Conn., Dec. 8, 1941, not yet reported).

It is submitted that in all three of these cases the courts exercised a jurisdiction intended to be vested in them by Section 77.

The argument that Section 77 was superfluous unless it vested in the Commission exclusive and final jurisdiction over all questions of fact in railroad reorganizations quite disregards the many reasons, apart from the wish to give the Commission initial control of railroad reorganization plans, for the enactment of Section 77. The first of the several bills out of which that section developed[1] was directed entirely to the elimination of the fictions of the equity receivership and sale, the elimination of the dangers of ancillary receiverships, and the binding of dissenting minorities without provision for cash payment. That original bill contemplated that the Commission would be called upon to act on questions of public interest only after the court had made preliminary decisions on questions of the private rights of the securityholders *inter se*. As has already been pointed out, Section 77 as finally enacted reversed the order of the two types of determinations and contemplated, first, determination of the problems of public interest with a preliminary "opinion" as to the private rights questions, followed, second, by the ultimate determination in the courts of the latter questions. It merely reversed the old order of determination. It no more transferred to the Commission from the courts jurisdiction over the purely judicial types of questions, than did the original bill contemplate transfer to the courts from the Commission of the latter's jurisdiction over the purely legislative types of questions affecting the public interest.

---

[1]S., 4921, 72nd Congress, 1st Session (1932).

The job of railroad reorganization is necessarily one in which the Commission and the courts each have an appropriate independent function, each in a field in which jurisdiction follows experience and expertness. It is thus that "the judicial process * * * is, at it were, brigaded with the administrative process of the Commission,"[1] that the authority of the court is "intertwined" with that of the Commission, and that the judicial and administrative functions "work co-operatively in reorganizations."[2] The two bodies are in every respect "to be deemed collaborative instrumentalities of justice and the appropriate independence of each should be recognized by the other."[3]

This broad demarcation of the functions of the Commission and the courts under Section 77 has been recognized not only by the District Court in the instant case but by other district courts in other reorganization cases.[4]

Two Circuit Courts of Appeals, other than the Ninth Circuit in the instant case, have had to deal with the problem, the Sixth Circuit in the *Akron, Canton & Youngstown*

---

[1] *Palmer* v. *Massachusetts*, 308 U. S. 79 (1939).

[2] *Warren* v. *Palmer*, 310 U. S. 132 (1940).

[3] *United States* v. *Morgan*, 313 U. S. 409, 422 (1941).

[4] *In re Akron, Canton & Youngstown Ry.* (N. D. Ohio, 1939, not reported); *In re Erie R. R.*, 37 F. Supp. 237, 243-5 (N. D. Ohio 1940); *In re St. Louis-San Francisco Ry.* (E. D. Mo. 1942, not yet reported). In other cases the district courts have said that it was unnecessary for them precisely to determine the respective jurisdictions of the Commission and the Courts in view of the facts that in any event they attached great weight to the Commission's views and, in the particular case, entirely agreed with the conclusions of the Commission on the merits. *In re Chicago & North Western Ry.*, 35 F. Supp. 230, 253 (N. D. Ill. 1940); *In re Chicago, Milwaukee, St. Paul & Pacific R. R.*, 36 F. Supp. 193, 202-3 (N. D. Ill. 1940); *In re Missouri Pacific R. R.*, 39 F. Supp. 436, 442 (E. D. Mo. 1941). The opinion of the District Judge in the instant case indicates that he might have avoided the Circuit Court of Appeals' criticism of his opinion by resting his decision solely upon the same ground (R. 1597).

case and the Seventh Circuit in the *North Western* and *Milwaukee* cases.[1] Both these Courts recognized that the jurisdictions of the Commission and the courts are separate and distinct, and each recognized that the jurisdiction of the courts to review the Commission's determinations of capitalization questions is a limited jurisdiction.[2]

---

[1] *Akron, Canton & Youngstown Ry. Co.* v. *Hagenbuch*, 128 F. (2d) 932, 940 (1942); *In re Chicago & North Western Ry.*, 121 F. (2d) 791 (1941); and *In re Chicago, Milwaukee, St. Paul & Pacific R.R.*, 124 F. (2d) 754 (1941).

[2] In *Akron, Canton & Youngstown* case, *supra*, the Sixth Circuit Court said (at p. 940):

> "The duties imposed on the courts and the powers conferred on the Interstate Commerce Commission under this Section of the Act, when construed in relation to other Sections, are separate and distinct. As to some matters under the Act, such as the determination of value, a broad discretion is lodged in the Interstate Commerce Commission and the court does not sit as a board of revision to substitute its judgment for that of the Commission. In such matters, the judicial inquiry into the facts goes no further than to ascertain whether there is substantial evidence to support the findings of the Commission and the question of the weight of the evidence in determining such matters lies with the Commission when acting within its statutory authority."

The Seventh Circuit in a decision on an interim order in the *North Western* case, 121 Fed. (2d) 791, 796 (1941), stated:

> "In the field wherein it exercises the powers expressly given it, the findings of the I. C. C. are well-nigh conclusive. True, it may not be said that the orders of the I. C. C. are unassailable if wholly lacking in evidentiary support. But where, in matters relating to plans of reorganization, earning power of debtor, its operations, having in view the greatest service to the public and the greatest net earnings for its security holders, the findings of the I. C. C. should be, as they are, accepted almost as verities by the courts."

The final decisions of the Seventh Circuit on the *Milwaukee* and *North Western* plans, however, leave that Court's views of the Commission's jurisdiction somewhat uncertain.

6. Conclusion

In the *Western Pacific* proceeding the Commission and the District Court have each recognized the appropriate jurisdiction and independence of the other.

The Commission's determination of the various questions as to the lien of the two mortgages, affecting solely the private rights of the bondholders, was expressly tentative and subject to the final determination of the District Court.[1]

A superficial perusal of the opinion of the District Judge demonstrates that he recognized and carefully performed his duty to decide whether the Commission, in its determination of the questions of public interest, had "acted fairly, within the bounds of the Constitution, and not arbitrarily" and whether, in its tentative determination of the legal rights of the old securities and its allocations of new securities in recognition of those rights, it had fully complied with subsection (e).[2] To the extent of such judicial review he did regard himself, in the language of the Circuit Court of Appeals,[3] "not concluded by any determination made by the Commission." Within the proper demarcation of his jurisdiction as to the questions of "public interest," and to the full within his jurisdiction to determine the private rights of the existing securityholders and whether allocations conformed to those private rights, he did exercise his "independent judgment."

In his 31-page opinion the District Judge declared that he had "read the record", "carefully considered all the objections" and "read the briefs of the respective counsel in support of the objections".[4] He might have added that

[1]R. 262. [2]R. 1596-7. [3]R. 2674.
[4]R. 1597.

he had heard four days of oral argument. As a result he had reached the independent informed judgment that he was "wholly in accord" with all the conclusions reached by the Commission. He therefore held all the objections to the Commission Plan to be without merit and overruled.

The "possible misconception" as to the respective jurisdictions of the Commission and the courts was on the part of the Circuit Court of Appeals, not the District Court. That "misconception" should be corrected by this Court, but this Court should at the same time negative any "misconception" at an opposite pole.

IV

UPON THE ENTIRE RECORD, THIS COURT SHOULD REVERSE THE DECREE OF THE CIRCUIT COURT OF APPEALS AND AFFIRM THE ORDER OF THE DISTRICT COURT APPROVING THE COMMISSION PLAN.

It apparently is not, and it cannot be, disputed that, notwithstanding the failure of the Circuit Court of Appeals to deal with many of the exceptions of the appellants below, this Court has jurisdiction to examine the entire record and, upon consideration of the objections before the District Court and the exceptions before the Circuit Court of Appeals, direct that all of them be overruled and the appropriate order of the District Court approving the Plan be affirmed.[1]

---

[1] *Story Parchment Co.* v. *Paterson Parchment Paper Co.*, 282 U. S. 555, 567 (1931); *Cole* v. *Ralph*, 252 U. S. 286, 290 (1920); *Delk* v. *St. Louis & San Francisco R. R.*, 220 U. S. 580, 588 (1911); *Lutcher & Moore Lumber Co.* v. *Knight*, 217 U. S. 257, 267 (1910); *Donovan* v. *Pennsylvania Co.*, 199 U. S. 279, 292 (1905).

The objecting junior interests filed in the District Court an untold number of objections to the Commission Plan,[1] and in the Circuit Court of Appeals a total of 76 exceptions.[2] Nevertheless, it is believed that the substance of all the objections of all the junior interests have already been discussed in this brief, except for three.

1. Both the Debtor and RCC object to January 1, 1939, as the effective date of the Plan. The Debtor argues that the effective date should be approximately August 2, 1935, the date of the filing of the Debtor's Section 77 petition. RCC, asserting that creditors are entitled to their contract rights to the date of the actual consummation of reorganization, argues that the effective date should be substantially the actual date the Plan is put into effect.

The Debtor's contention is foreclosed by the specific holding of this Court in the *Consolidated Rock Products* case that unpaid interest accruing on senior claims during the reorganization proceeding is part of the claim whose absolute priority must be recognized in reorganization.[3]

The reasoning which defeats the Debtor's contention tends to sustain that of RCC. However, the injury in the present case, arising from computing claims for reorganization purposes as of January 1, 1939, when in fact reorganization cannot now be consummated substantially before 1944, falls upon

---

[1]R. 892-1017. [2]R. 1627-54.

[3]See also *Ticonic Bank* v. *Sprague*, 303 U. S. 406, 413 (1938).

the First Mortgage Bondholders, not upon the objecting RCC. If the Commission Plan were to be disapproved and a new plan given an effective date of January 1, 1943, four additional years' interest, aggregating nearly $10,000,000, will have accrued upon the First Mortgage Bonds and require provision senior to any provision for the RCC Notes. If January 1, 1944, is the effective date, the amount of such additional interest will be nearly $12,500,000.

2. The junior interests objected below to the fact, amount, and mandatory character of the Capital Fund provided for by the Commission Plan. This Capital Fund is derived through setting aside, out of available net income after fixed charges and before contingent charges, an amount for capital expenditures not exceeding $500,000 annually, or at any time an aggregate unexpended amount of $1,000,000.[1]

That it is in the interest of both the public and all the creditors that necessary additions and betterments be financed out of earnings rather than by selling First Mortgage Bonds at the prohibitive discounts at which they would now have to be sold, must be patent. The evidence before the Commission as to the Debtor's past requirements for capital purposes supports the $500,000 figure.[2] In the light of today's conditions, it is, if anything, inadequate. While the Committee would have preferred that the creation of the Fund be left to the discretion of

[1]R. 381. [2]R. 309, 1870.

the reorganized company's board of directors, the Committee recognizes that as to this feature, as well as to the fact and amount of such a Fund, the matter is one clearly affecting the public interest and within the exclusive determination of the Commission in the absence of arbitrary action. None of the objectors have suggested that the Commission's decision in respect of this Fund has been arbitrary.

3. The RCC and ACJ Notes are secured, in addition to the collateral pledged by the Debtor and dealt with in the Commission Plan, by so-called accommodation collateral pledged by WP Corp. WP Corp. urges that failure of the Commission Plan affirmatively to provide for the surrender of the accommodation collateral to the pledgors constitutes confiscation; while RCC objects that the failure of the Commission Plan affirmatively to provide that the same collateral may be retained by the pledgees is a violation of RCC's rights.[1]

The problem of this accommodation collateral is not one which can properly be dealt with in a plan of reorganization for the Debtor. Whether the pledgees, after realizing upon the collateral pledged by the Debtor and receiving new securities therefor under the Commission Plan, have a deficit as against the accommodation pledgor is a question not affecting the Debtor but one affecting the relationships between the accommodation pledgor and the pledgees.

---

[1]R. 271, 345.

Though this Court may agree that none of the objections of the junior interests would seem to have merit, it may have doubt whether the Commission Plan fully meets the tests laid down by this Court for the "fair and equitable" recognition of the "absolute priorities" of the existing First Mortgage Bonds.

The 4½% rate upon the Income Mortgage Bonds, contrasting with the 5% rate upon the present First Mortgage Bonds, may seem unnecessarily to impose a sacrifice upon the present First Mortgage Bondholders. The matter of the new interest rate, however, the Committee believes to be one affected with a "public interest" and within the exclusive determination of the Commission. The effect of the Commission's imposing the lower rate is to increase the amount of the lost rights of the present First Mortgage Bondholders, for which "full compensation" must be made. The conversion right of the new Income Bonds, the participating right of the new Preferred Stock, and the Income Mortgage Sinking Fund, even taken together, may seem somewhat inadequate compensation for the rights of the existing First Mortgage Bondholders required to be surrendered by the Commission Plan. The differential between $57 and $62 per share, the price at which the new Common Stock is allotted to the senior First Mortgage Bonds and the price at which it is allotted to the RCC Notes, may seem of questionable adequacy to satisfy the "quantitative" test of priority recognition.

But the present First Mortgage Bondholders have now received no interest since September 1, 1933, notwithstanding the recently increasing earnings and rapidly accumulating cash in the reorganization trustees' hands. Were the Commission Plan to be set aside and new allocations made in an attempt fully to compensate for the lost rights of the

existing First Mortgage Bondholders, all the additional value that those Bondholders could receive, within the capitalization representing the "reorganization value" found by the Commission, would be a small amount of Common Stock. The First Mortgage Bondholders, together with the RFC, receive, under the Commission Plan, 77% of the total Common Stock. Commissioner Miller, in urging an increase of the Common Stock in order to allot the junior interests a larger percentage, correctly characterized it as of "little or no market value."

The few shares of additional Common Stock which might thus be added to the allocations to the First Mortgage Bondholders by a theoretically better plan than the Commission Plan are of insignificant value to the existing First Mortgage Bondholders as compared with the importance of getting this property reorganized, securing the cash return upon the existing First Mortgage investment which the earnings reasonably permit, and, not without importance, securing some effective voice in the operating and financial problems of the property.

The Committee therefore urges this Court to take a practical view of the situation and not to push the widely current belief that securityholders are incompetent to take care of themselves[1] to the point of requiring for the First Mortgage Bondholders a degree of compensation for surrendered rights whose attainment would impose upon the

---

[1]The first expression of this thought that we have found is that in *In re English, Scottish and Australian Chartered Bank*, 3 Ch. 385, 396 (1893). It has been more picturesquely put by Frank in *Some Realistic Reflections on Some Aspects of Corporate Reorganization* (1933) 19 Va. L. Rev. 541, 569: "Courts of equity have a tradition of aiding the helpless, such as infants, idiots and drunkards. The average security holder in a corporate reorganization is of like kind."

First Mortgage Bondholders far greater injury than any possible value of such compensation.

This reorganization proceeding has now dragged along through the Commission and the Courts for more than seven years over every obstacle which the junior interests could manage to interpose. The multiplicity of corporate entities through which the principal junior interests have acted has created an appearance of confusion of issues and procedural problems, materially adding to the delay. The Committee urges that the public interest in the final disposition of the Western Pacific reorganization and the many questions which it, in common with most other railroad reorganizations, involves, as well as the interests of the First Mortgage Bondholders themselves, require that this Court so act upon the present Commission Plan as to give substance to its earlier assurance that "there is no occasion" for the courts, the Commission or the senior securityholders "to yield to such pressures."[1]

The Committee believes that upon consideration of the entire record this Court can reach no other conclusion than that the decision of the Circuit Court of Appeals for the Ninth Circuit should be reversed, and the Order of the District Court dated August 15, 1940, affirmed. If, however, this Court shall (as the Committee does not believe will be the case) find any error in the action of the Commission or the District Court, the Committee urges that this Court, in addition to correcting such error, also affirm such of the determinations of the District Court as may be found to be without error. Only by such action can repetition of possible errors already made be avoided without

---

[1] *Case* v. *Los Angeles Lumber Products Co., Ltd., supra*, at p. 129.

ultimate correction in this Court at some indefinite future time, and only thus may the reorganization of the Debtor be consummated with some degree of expedition.

V

SECURITYHOLDERS WHO DEFEND IN THE CIRCUIT COURTS OF APPEALS PLANS PROMULGATED AND APPROVED BY THE COMMISSION, AND ALSO APPROVED BY THE DISTRICT COURTS, SHOULD NOT BE ASSESSED THE COSTS OF THE APPEALS IF THE APPEALS ARE SUCCESSFUL. SUCH COSTS SHOULD BE ASSESSED DIRECTLY AGAINST THE DEBTOR'S ESTATE.

Such costs are not nominal. In the instant case they aggregate $4,239.29, and in the more complicated cases already pending in various circuit courts of appeals they will greatly exceed that amount.

Section 77 contemplates that the Commission may, as it did in the instant case, formulate its own plan of reorganization independently of any proposals of any of the parties, whereas under Chapter X of the Bankruptcy Act the Securities and Exchange Commission acts only in an advisory capacity in the formulation of reorganization plans.[1] Notwithstanding this fact, Section 77, unlike Chapter X,[2] provides no specific machinery whereby the Commission may appear in the proceeding in the district court with reference to the plan. In practice the Commission has not sought to defend its plans before the courts. Those railroad securityholders who assume the responsibility and expense of defending Commission proposals in the district courts are therefore supplying to the district courts assist-

[1] § 172, 11 U. S. C. § 572.
[2] § 208, 11 U. S. C. § 608.

ance which they might not otherwise have in performing their functions under Section 77.

To penalize such securityholders for continuing to defend the Commission's plans in the circuit courts of appeals, after the district courts have approved such plans, is not only wholly unfair and inequitable but necessarily will discourage securityholders and mortgage trustees from performing a useful, if not necessary, function in assisting the circuit courts of appeals to arrive at proper decisions.[1]

Irrespective of the balance of the case, this Court should reverse that part of the Decree below imposing costs of the appeal from the District Court upon the creditors who defended the Commission Plan before the District Court and the Circuit Court of Appeals.

VI

CONCLUSION

The Decree of the Circuit Court of Appeals for the Ninth Circuit, entered November 28, 1941, as modified by the Orders of February 12 and February 16, 1942, should be reversed, and the Order of the District Court, entered August 15, 1940, should be affirmed.

Dated September 14, 1942.

Respectfully submitted,

ROBERT T. SWAINE,
Attorney for Frederick H. Ecker, John W. Stedman and Reeve Schley, constituting the Institutional Bondholders Committee, Petitioners.

HERBERT W. CLARK,
BENJAMIN R. SHUTE,
Of Counsel.

---

[1]See *In re Chicago & North Western Ry.*, 121 F. (2d) 791, 798 (C. C. A. 7th, 1941).

APPENDIX A

Bankruptcy Act, § 77 (11 U. S. C. § 205).

* * * * * * * *

"(c) * * *

"(7) The judge shall promptly determine and fix a reasonable time within which the claims of creditors may be filed or evidenced and after which no claim not so filed or evidenced may participate except on order for cause shown, the manner in which such claims may be filed or evidenced and allowed, and for the purposes of the plan and its acceptance, after notice and hearing, the division of creditors and stockholders into classes according to the nature of their respective claims and interests. Such division shall not provide for separate classification unless there be substantial differences in priorities, claims, or interests.

* * * * * * * *

"(d) The debtor, after a petition is filed as provided in subsection (a) of this section, shall file a plan of reorganization within six months of the entry of the order by the judge approving the petition as properly filed, or if heretofore approved, then within six months of August 27, 1935, and not thereafter unless such time is extended by the judge from time to time for cause shown, no single extension at any one time to be for more than six months. Such plan shall also be filed with the Commission at the same time. Such plans may likewise be filed at any time before, or with the consent of the Commission during, the hearings hereinafter provided for, by the trustee or trustees, or by or on behalf of the creditors being not less than 10 per centum in amount of any class of creditors, or by or on behalf of any class of stockholders being not less than 10 per centum in amount of any such class, or with the consent of the Commission by any party in interest. After the filing of such a plan, the Commission, unless such plan shall be considered by it to be prima facie impracticable, shall,

after due notice to all stockholders and creditors given in such manner as it shall determine, hold public hearings, at which opportunity shall be given to any interested party to be heard, and following which the Commission shall render a report and order in which it shall approve a plan, which may be different from any which has been proposed, that will in its opinion meet with the requirements of subsections (b) and (e) of this section, and will be compatible with the public interest; or it shall render a report and order in which it shall refuse to approve any plan. In such report the Commission shall state fully the reasons for its conclusions.

"The Commission may thereafter, upon petition for good cause shown filed within sixty days of the date of its order, and upon further hearings if the Commission shall deem necessary, in a supplemental report and order modify any plan which it has approved, stating the reasons for such modification. The Commission, if it approves a plan, shall thereupon certify the plan to the court together with a transcript of the proceedings before it and a copy of the report and order approving the plan. No plan shall be approved or confirmed by the judge in any proceeding under this section unless the plan shall first have been approved by the Commission and certified to the court.

"(e) Upon the certification of a plan by the Commission to the court, the court shall give due notice to all parties in interest of the time within which such parties may file with the court their objections to such plan, and such parties shall file, within such time as may be fixed in said notice, detailed and specific objections in writing to the plan and their claims for equitable treatment. The judge shall, after notice in such manner as he may determine to the debtor, its trustee or trustees, stockholders, creditors, and the Commission, hear all parties in interest in support of, and in opposition to, such objections to the plan and such claims for equitable treatment. After such hearing,

and without any hearing if no objections are filed, the judge shall approve the plan if satisfied that: (1) It complies with the provisions of subsection (b) of this section, is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders; (2) the approximate amounts to be paid by the debtor, or by any corporation or corporations acquiring the debtor's assets, for expenses and fees incident to the reorganization, have been fully disclosed so far as they can be ascertained at the date of such hearing, are reasonable, are within such maximum limits as are fixed by the Commission, and are within such maximum limits to be subject to the approval of the judge; (3) the plan provides for the payment of all costs of administration and all other allowances made or to be made by the judge, except that allowances provided for in subsection (c), paragraph (12) of this section, may be paid in securities provided for in the plan if those entitled thereto will accept such payment, and the judge is hereby given power to approve the same.

"If the judge shall not approve the plan, he shall file an opinion, stating his conclusions and the reason therefor, and he shall enter an order in which he may either dismiss the proceedings, or in his discretion and on motion of any party in interest refer the proceedings back to the Commission for further action, in which event he shall transmit to the Commission a copy of any evidence received. If the proceedings are referred back to the Commission, it shall proceed to a reconsideration of the proceedings under the provisions of subsection (d) of this section. If the judge shall approve the plan, he shall file an opinion, stating his conclusions and the reasons therefor, and enter an order to that effect, and shall send a certified copy of such opinion and order to the Commission. The plan shall then be sub-

mitted by the Commission to the creditors of each class whose claims have been filed and allowed in accordance with the requirements of subsection (c) of this section, and to the stockholders of each class, and/or to the committees or other representatives thereof, for acceptance or rejection, within such time as the Commission shall specify, together with the report or reports of the Commission thereon or such a summarization thereof as the Commission may approve, and the opinion and order of the judge: *Provided*, That submission to any class of stockholders shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding, (a) that at the time of the finding the corporation is insolvent, or that at the time of the finding the equity of such class of stockholders has no value, or that the plan provides for the payment in cash to such class of stockholders of an amount not less than the value of their equity, if any, or (b) that the interests of such class of stockholders will not be adversely and materially affected by the plan, or (c) that the debtor has pursuant to authorized corporate action accepted the plan and its stockholders are bound by such acceptance: *Provided further*, That submission to any class of creditors shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding, that the interests of such class of creditors will not be adversely and materially affected by the plan, or that at the time of the finding the interests of such class of creditors have no value, or that the plan provides for the payment in cash to such class of creditors of an amount not less than the value of their interests. For the purpose of this section the acceptance or rejection by any creditor or stockholder shall be in writing, executed by him or by his duly authorized attorney, committee, or representative. If the United States of America, or any agency thereof, or any corporation (other than the Reconstruction Finance Corporation) the majority of the stock of which is owned by the United States of America, is a creditor or stockholder, the interests

or claims thereof shall be deemed to be affected by the plan, and the President of the United States, or any officer or agency he may designate, is hereby authorized to act in respect of the interests or claims of the United States or of such agency or other corporation. The expense of such submission shall be certified by the Commission and shall be borne by the debtor's estate. The Commission shall certify to the judge the results of such submission.

Upon receipt of such certification, the judge shall confirm the plan if satisfied that it has been accepted by or on behalf of creditors of each class to which submission is required under this subsection holding more than two-thirds in amount of the total of the allowed claims of such class which have been reported in said submission as voting on said plan, and by or on behalf of stockholders of each class to which submission is required under this subsection holding more than two-thirds of the stock of such class which has been reported in said submission as voting on said plan; and that such acceptances have not been made or procured by any means forbidden by law: *Provided*, That, if the plan has not been so accepted by the creditors and stockholders, the judge may nevertheless confirm the plan if he is satisfied and finds, after hearing, that it makes adequate provision for fair and equitable treatment for the interests or claims of those rejecting it; that such rejection is not reasonably justified in the light of the respective rights and interests of those rejecting it and all the relevant facts; and that the plan conforms to the requirements of clauses (1) to (3), inclusive, of the first paragraph of this subsection (e): *Provided further*, That if, in any reorganization proceeding under this section, the United States is a creditor on claims for taxes or customs duties (whether or not the United States has any other interest in, or claim against, the debtor, as creditor or stockholder), no plan which does not provide for the payment thereof shall be confirmed by the judge except upon the acceptance, certified to the court, of a lesser amount by the President of the United States

or the officer or agency designated by him pursuant to the provisions of the preceding paragraph hereof:. *Provided further,* That if the President of the United States or such officer or agency shall fail to accept or reject such lesser amount for more than ninety days after receipt of written notice so to do from the court, accompanied by a certified copy of the plan, the consent of the United States insofar as its claims for taxes or customs duties are concerned shall be conclusively presumed. If the judge shall confirm the plan, he shall enter an order and file an opinion with a statement of his conclusions and his reasons therefor. If the judge shall not confirm the plan, he shall file an opinion, with a statement of his conclusions and his reasons therefor, and enter an order in which he shall either dismiss the proceedings, or, in his discretion and on the motion of any party in interest, refer the case back to the Commission for further proceedings, including the consideration of modifications of the plan or the proposal of new plans. In the event of such a reference back to the Commission, the proceedings with respect to any modified or new plan shall be governed by the provisions of this section in like manner as in an original proceeding hereunder.

"If it shall be necessary to determine the value of any property for any purpose under this section, the Commission shall determine such value and certify the same to the court in its report on the plan. The value of any property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present, and prospective, and all other relevant facts. In determining such value only such effect shall be given to the present cost of reproduction new and less depreciation and original cost of the property, and the actual investment therein, as may be required under the law of the land, in light of its earning power and all other relevant facts."

APPENDIX B

FEDERAL INCOME TAX LIABILITY FOR 1940 AND 1941

1. Computed on the basis of the existing capitalization of the Debtor

1940

There would be no Federal income tax liability for the year 1940.

1941

Although the net income for the year 1941 was $750,177, there would be no Federal income tax liability for that year if the Debtor's claim of a deduction for a net operating loss carryover of $2,799,265 from the two preceding years is allowed.

If such deduction for a net operating loss carryover is not allowed, the Federal income tax liability for 1941 would be $232,304, computed as follows:

Earnings Available for Fixed Charges	$4,551,738[1]	
Less: Fixed Charges	3,801,561[1]	
Normal Tax Net Income	$ 750,177	
Normal Tax (24%)		$180,042
Surtax		
6% on first $25,000	1,500	
7% on remainder ($725,177)	50,762	52,262
Total Normal Tax and Surtax		$232,304

[1]To reported ~~1940~~ 1941 earnings (see p. 7, *supra*) has been added rent for leased facilities of $3,600, which amount is included in Fixed Charges as shown above.

2. Computed on the basis of the capitalization of the reorganized company

In the following computations, the funded debt of the Reorganized Company is taken at $33,969,125, the amount of debt for which the Commission Plan provides.

1940

On the basis of the above assumption, the total Federal income tax liability of the Reorganized Company for the year 1940 would be ~~$289,041~~ 288,177, computed as follows:

Earnings Available for Interest	$2,649,797	
Less: Interest Charges	1,449,060	
Normal Tax Net Income	$1,200,737	
Normal Tax (24%)		$288,177

1941

On the basis of the above assumption, the total Federal income tax liability of the Reorganized Company for the year 1941 would be $960,464, made up of the following items:

Normal Income Tax	$743,779	
Surtax	216,685	
		$960,464

These figures are computed as follows:

Earnings Available for Interest		$4,548,138
Less: Interest Charges		1,449,060
Normal Tax Net Income		$3,099,078
Normal Tax (24%)		$ 743,779
Surtax		
6% on first $25,000	$ 1,500	
7% on remainder ($3,074,078)	215,185	
		$ 216,685

REPLY BRIEF FOR INSTITUTIONAL BONDHOLDERS COMMITTEE, PETITIONERS

On Writ of Certiorari to the United States Circuit Court of Appeals for the Ninth Circuit

Many of the arguments of the James Interests[1] and of RCC[2] were anticipated in the Committee's main brief. The answering briefs of those respondents, however, have raised certain new questions or given new implications to old arguments. The Committee therefore feels it necessary to file this reply brief.

---

[1]The James Interests, as shown in the Committee's main brief, p. 50, include A. C. James Co. (ACJ), Western Pacific Railroad Corporation (WP Corp.), and the Debtor.

[2]The Railroad Credit Corporation.

I

The argument that the Commission lacked power to approve the Commission Plan, on the ground that it differs in material respects from any proposal of any of the parties

For the first time in the seven years of this proceeding the James Interests attack the power of the Commission to promulgate and approve the Commission Plan.[1]

They assert "there is no language in Section 77 which * * * gives to the Commission the power and the responsibility of framing plans of reorganization for railroads," and argue that the express power granted to the Commission to "approve a plan, which may be different from any which has been proposed" was intended by Congress to limit the Commission to making "minor changes in the plan, consistent with the general intent and agreement of the parties."[2] Their protest that the Commission has no power "to originate plans by administrative fiat"[3] is sought to be bolstered by the implication that the Commission has not "allowed" the parties "to renegotiate and adjust their contractual relationships * * * relieved from the unreasonable limitations of the unsound economic theories" of the Commission. These arguments are baseless both in fact and in law.

It was no fault of the Commission that "The parties to this proceeding did not agree upon a plan of reorganization."[4] All except the James Interests did agree upon the

[2] ACJ main brief, pp. 77 and 80, respectively.
[3] ACJ main brief, p. 81.
[4] ACJ main brief, p. 99.

RCC Plan.[1] ACJ adhered to its view, still asserted here, that the "public interest" permitted retention of all outstanding debt as new debt and that the "absolute priorities" of the First Mortgage Bondholders could adequately be recognized by turning each $1,000 5% First Mortgage Bond, with its large accumulation of interest, into a $1,000 4% *wholly non-cumulative* Income Bond.[2]

The Committee urged the Commission to mediate. However unwise the Committee may believe the Commission to have been in declining that role, the Committee recognizes the clear discretion of the Commission so to refuse.

The Commission had no alternative but to decide all the disputed issues upon their strict merits. Recognizing this situation, the Committee and RFC (while still expressing willingness to compromise on the RCC Plan) joined in submitting to the Commission a proposed plan, based on their views of the merits, which was the fundamental basis of the Commission Plan.[3] The only substantial change made

---

[1]R. 693. That Plan increased the Preferred Stock under the Commission Plan by $18,413,928 and the number of shares of no par value Common Stock by 30,000 primarily in order to allot some of the Common Stock to WP Corp. The RCC Plan was largely the result of a negotiation for compromise in which the then Chairman of the Reconstruction Finance Corporation (RFC), Mr. Jesse Jones, was most helpful.

[2]R. 105. While the ACJ proposal also gave the First Mortgage Bondholders a "bonus" of five shares of new Common Stock, that Common Stock was so far away from earnings as to be wholly worthless. The ACJ proposal also gave the existing junior debt new 4% Income Debentures of equal principal amount (each $1,000 Debenture convertible into $1,500 6% Preferred Stock) and a similar "bonus" of five shares of new Common Stock. The present First Mortgage Bonds mature 1946. The ACJ proposal was that the new Income Bonds mature 1987 and the new Income Debentures 1957 (R. 106, 111).

[3]R. 775, 756, 695-701.

by the Commission was to increase the allotment of new securities to the RCC and ACJ Notes beyond those which the Committee thought justified.

But even were the James Interests correct in their factual assertion, they are wrong as a matter of law in contending that Section 77 gave the Commission no power to make anything but "minor changes" in proposals of the parties. Congress had no intention of creating reorganization machinery under which, to use the language of WP Corp., "It may be that no plan can be devised which will meet both these tests," *i.e.*, be both "compatible with the public interest" and "fair and equitable." "The result is simply that no reorganization can be accomplished."[1]

The James Interests rely upon the fact that in the expression "the Commission * * * shall approve a plan, *which may be different from any which has been proposed*,"[2] the italicized words may, as a matter of composition, be parenthetical. Their argument gives to the form of composition a wholly unnatural and unnecessary effect in construing it as defeating the legislative intent indicated by Congress.

The report of the House Committee on Judiciary, of which Representative Sumners of Texas was Chairman, stated:

> "The section [77 (d)] specifically provides that the plan recommended by the commission may be one of several plans presented, a modification of any, *or an entirely new plan of the commission.*" (72nd Cong.,

[2]All italics in quoted matter throughout this brief have been supplied, unless the contrary is indicated.

2nd Sess., Report No. 1897 to accompany H. R. 14359).[1]

II

The argument that in determining whether a plan is "compatible with the public interest" the Commission may limit only the new fixed charge obligations and is powerless to require that any part of the existing debt shall be converted into stock

The James Interests argue that because Section 77(b)(4) expressly provides that a plan shall provide for fixed charges for which "there shall be adequate coverage * * * by the probable earnings available for the payment thereof," the Commission is without power, in the "public interest," to relate contingent charges to "probable earnings reasonably foreseeable for the future"[2] or to concern itself that the new shares of common stock (allotted to senior creditors for part of their claims) shall not "become mere tokens for stock market speculation."[3] The Commission's belief that the "public interest" (let alone the private

[1]Representative La Guardia, also a member of the House Committee on Judiciary, who took an active part in guiding Section 77 through the House, stated:

"Lest there be the slightest doubt as to the wide power and control the new section 76 [77] intends to grant to the Interstate Commerce Commission over railroad reorganization, I will say that it is the intent of the drafters of this section—which was taken from my bills H. R. 13958 and H. R. 14110—and I know the intent of the majority of the Committee on the Judiciary and the House to give the Interstate Commerce Commission *broad and complete powers in the initiation, formulation, and approval of any plan* for the reorganization of a railroad engaged in interstate commerce * * *." (76 Cong. Rec. 4130)

[2]WP Corp. main brief, p. 23. This argument seems to be echoed in the RCC main brief, p. 32.

[3]ACJ main brief, pp. 50, 51, 53-54.

rights of the parties) requires consideration of such problems is dismissed as "an attempt to read into the statute economic and political theories which were not within the contemplation of Congress"[1] and characterized as a seizure by the Commission upon a "catch phrase as an escape from the duties imposed upon it by * * * Section 77."[2]

In the light of the comment of another of the James Interests entities[3] that the intent of Section 77 was to attain "economical reorganizations entirely purged of the evils of the past as exemplified by the 1928 equity reorganization of The Chicago, Milwaukee and St. Paul Railway Company," this argument of the James Interests evidences blindness to the developing attitudes over the last two decades toward corporate reorganization problems, not only in Congress and other public regulatory bodies, but among securityholders themselves. The Debtor's reference to the 1928 *Milwaukee* reorganization doubtless had in mind the controversies as to the Commission's regulation of expenses which arose *after* the consummation of the reorganization.[4] The alleged "evils" in that reorganization against which the Commission protested had to do primarily with an alleged excess of income mortgage debt and an alleged unduly favorable treatment of old stockholders.[5]

Can there be any doubt that both the "public interest" and the "private rights" of the securityholders require that

a new railroad corporation emerging from a Section 77 reorganization shall not start out as a financial cripple burdened with a debt structure, whether bearing interest fixed or contingent, wholly destructive of its credit and dooming it to early recurrence of bankruptcy?

As early as 1907 the Commission, in *Consolidations and Combinations of Carriers,* 12 I. C. C. 277, 306, said:

> "It is of the utmost importance, also, that railway securities should be safe and conservative investments for the public, and should yield good and ample return for the money invested. Reasonable regulation will tend to make them safer and more secure investments, and thereby benefit not only the railway companies but the public."

Section 20a of the Interstate Commerce Act was the expression of that philosophy.

Long before Section 77 was enacted the Commission, in a 1924 reorganization case, said:

> "The public interests require that, before an issue of securities by a carrier is authorized, the probability of earnings sufficient to pay costs of operation and of fixed charges be reasonably established with some surplus for dividends and other purposes."[1]

As indicated by the cited cases in footnote 1 at page 123 of the Committee's main brief, the Commission has frequently forbidden the issue of railroad securities when prospective earnings were not sufficient to justify their issue.

The necessary conclusion from the argument of the James Interests on this point is that the intent of Section 77 must have been, not to strengthen the Commission's

[1] *Denver & Rio Grande Western Reorganization,* 90 I. C. C. 141, 148.

power to prevent the creation of financial cripples in reorganization, but to weaken that power.[1]

Their argument as to the intent of Congress gains nothing from the fact that subsection (b) (4) of Section 77 expressly requires "in the light of * * * earnings experience * * * adequate coverage of fixed charges by the probable earnings available for the payment thereof," while no standard is set for contingent debt or stock, other than compatibility with the public interest. Out of an abundance of caution, Congress precisely defined the "public interest" standard to be imposed with respect to fixed charges. As to those, it requires not only some reasonable hope that they might be earned at some time in the future, but a requirement that they have "adequate coverage" and that such coverage should be determined "in the light of earnings experience." This, of course, means that Congress requires, as to fixed charges, a *past* earnings experience which demonstrates a margin of earnings reasonably sufficient to insure continuous payment of fixed charges and maintenance of the credit of the reorganized company.

The Commission has suggested no such strict standards in determining the permissible amount of contingent interest-bearing debt and stock. It has, however, sought to relate them at least to the "most optimistic estimates" of future earnings.

The James Interests, however, urge that the "public interest" in the credit of a reorganized railroad will be satisfied if only the interest upon debt, however astronomical in relation to probable earning power, is contingent, and

[1]The Commission's contrary interpretation of Section 77 on this and other questions of statutory construction of its administrative powers, as worked out in practice, is itself entitled to great weight. An illuminating analysis of this point is contained in the September, 1942, Harvard Law Review. Note, 56 Harv. L. Rev. 100, 115.

the debt maturity is postponed to the indefinite future. Quite apart from the destructive effect upon the immediate credit of any railroad so capitalized, such a capital structure would compel financing of all future capital expenditures by new fixed interest debt, for the new stock would be wholly worthless and the new contingent interest obligations wholly unsalable at any reasonable price. The seeds of future insolvency would thus be sown in the reorganization itself.

Also, quite apart from questions of "public interest," observance of the "absolute priorities" of senior creditors prevents the use of debt-overburdened capital structures in reorganization. The lack of comprehension by the James Interests on this score is evidenced by their proposal, above referred to, that the present First Mortgage Bondholders' absolute priorities should be met by the allotment for each $1,000 5% First Mortgage Bond, with accumulated interest, of a $1,000 new 4% *wholly non-cumulative* Income Mortgage Bond of 41 years later maturity. Not only would maximum annual income on the First Mortgage Bondholders' claim thus be reduced 20%, but on the earnings record of the Debtor's properties to date that diminished return would have been received in very few years and, to the extent not received in any year, would lapse. On the other hand, from the hoped for substantial earnings of 1942, and any other prosperous years, all the surplus over the diminished return to the First Mortgage Bondholders would go to junior interests.

This Court's opinions in the *Los Angeles Lumber*[1] and *Consolidated Rock Products*[2] cases negative any such treatment of the Western Pacific First Mortgage Bonds.

---

[1] *Case* v. *Los Angeles Lumber Products Co., Ltd.*, 308 U. S. 106 (1939).

[2] *Consolidated Rock Products Co.* v. *Du Bois*, 312 U. S. 510 (1941).

III

The argument that Section 77 distinguishes "earning power" from "probable prospective earnings"

In determining reorganization value, subsection (e) of Section 77 requires "due consideration to the *earning power* of the property, past, present, and prospective." Subsection (b) requires that "after due consideration of the *probable prospective earnings* of the property in the light of its earnings experience * * *, there shall be adequate coverage of such fixed charges by the *probable earnings* available for the payment thereof." Upon this slight variation of language, the James Interests base an argument that by "earning power" Congress meant something entirely different from "probable prospective earnings," or "probable earnings, reasonably foreseeable."[1]

While the James Interests are ambiguous as to just what they think is the measure of "earning power," their insistence upon the constitutional inviolability of physical value as found under Section 19a of the Interstate Commerce Act gives some slight clue. Apparently they think that the "earning power," or as they put it, "capacity to earn," which determines reorganization value, is dependent solely upon the *maximum* physical capacity of the plant to transport freight and passenger traffic, at current rates and current operating expenses.[2] They would disregard

---

[1]This attempted distinction runs throughout their briefs. WP Corp. main brief, pp. 7, 42, 51-53; ACJ main brief, pp. 21, 26, 46, 50, 88, 89.

[2]The argument of Mr. John L. Hall, in his brief as *amicus curiae*, filed in *In the Matter of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company*, Nos. 11-19, 32, on behalf of Five Railroad Debtors in Section 77 Proceedings, expands the argu-

the absence of traffic requiring that maximum capacity, as well as its effect upon both rates and operating expenses in the hypothetical millenium when such maximum traffic shall have been attained.

It is submitted that the slight differences of wording in subsection (e) and subsection (b) support neither the distinction taken by the James Interests nor the meaning of "earning power" for which they contend.

In their stress of "earning power" or "earning capacity" as something distinguishable from "probable prospective earnings" they cite the language of this Court's opinion in the *Consolidated Rock Products* case:[2]

---

ment here made by the James Interests. Mr. Hall asserts that "earning power" means "not what the Commission may expect that the road *will* earn but what the Commission thinks it *can* earn." The context indicates that the word "can" is used, not in any relation to the realities, but as a synonym of "may," indicating the constitutional minimum below which earning power may not be regulated by reduction of rates. Indeed, in this expanded argument even current rates are irrelevant: "It does not depend upon the rates currently in effect. * * * The temporary existence or absence of competitive forms of transportation does not necessarily affect earning power, though it may affect earnings for the time being" (pp. 39-40). Thus put, the argument that "earning power" is not the same as "probable prospective earnings" as a test of reorganization value is nothing but a more involved way of stating the old contention that physical value as determined under Section 19a is reorganization value.

---

[1]ACJ main brief, p. 38.

[2]*Consolidated Rock Products Co.* v. *DuBois*, 312 U. S. 510, 525 (1941).

> "Findings as to the *earning capacity* of an enterprise are essential to a determination of the feasibility as well as the fairness of the plan of reorganization."

Did this Court intend to express some different standard when, in the sentence immediately succeeding that quoted by the James Interests, it said:

> "Whether or not *the earnings may reasonably be expected* to meet the interest and dividend requirements of the new securities is a *sine qua non* to a determination of the integrity and practicability of the new capital structure. It is also essential for the satisfaction of the absolute priority rule * * *."

IV

The argument that the physical value of the Debtor's properties as determined under Section 19a of the Interstate Commerce Act is constitutionally protected against foreclosure in a Section 77 reorganization

This argument runs through all the briefs, not only of the three James Interests,[1] but also of RCC.[2]

The respondents apparently do not recognize any such thing as "reorganization value," as contrasted with "physical value on the basis of reproduction cost less depreciation." As pointed out in the Committee's main brief,[3] their insistence upon the controlling effect of such physical value in determining both the problems of public interest and the rights of the present securityholders in a reorganization is due to their misconception that the term "value" has the same meaning for all purposes.

---

[1]Debtor's main brief, pp. 23-29; ACJ main brief, pp. 9, 69, 88, 101; WP Corp. main brief, pp. 48-50.

[2]RCC main brief, pp. 30, 36.

[3]Pages 35-41.

The defect in the respondents' reasoning is patent from its very expression as found in the RCC main brief,

> "* * * the valuation of a railroad * * * pursuant to the provisions of Section 19a is the value upon which the owners of the railroad property are entitled to earn, *if they can*, a fair return, and * * * this value cannot be taken away from them excepting by judicial decree."[1]

All the respondents quite overlook that significant condition, *"if they can."* In the last twenty years the Western Pacific properties have had sufficient earnings to pay the contractual interest upon the aggregate claims of its secured creditors as of January 1, 1943,[2] in but one year (1926), and then only at the expense of substantial under-maintenance. In the cold light of that fact, it is no solace to the Western Pacific First Mortgage Bondholders that the Western Pacific has a fine plant, capable of handling a volume of traffic even in excess of that being handled in 1942.

Nor does the Committee believe that it is consistent with the recognition of the "absolute priorities" of the First Mortgage Bondholders, that they should be required substantially continuously to forego interest upon their investment in order to prevent foreclosure or cancellation of the equity of stockholders who provided a plant of such maximum capacity that only sporadically, if ever, could that capacity be actually employed. That, however, is the conception which the James Interests express of the relative

---

[1]RCC main brief, p. 30.

[2]As of that date, the aggregate secured claims, including accumulated unpaid interest, will exceed $100,000,000.

rights of the Western Pacific First Mortgage Bondholders and the junior interests.[1]

The unsecured debt and stock claim of WP Corp., as well as a substantial part of the claim represented by the ACJ Notes, "have no value," not because of any "administrative *fiat*" of the Commission, but because the Western Pacific properties have failed to evidence any "power" or "capacity," "past, present, or prospective," actually to earn the moneys necessary to service the senior First Mortgage Bonds. After more than nine years of default upon that senior debt, there is no longer any "equity" to delay the "foreclosure and cancellation" of the valueless junior interests.

The accomplishment of that "foreclosure" does not, as RCC insists,[2] require a sale by foreclosure pursuant to a judicial decree *in an equity proceeding;* nor is this, as stated by RCC, "a reorganization of a company not found to be insolvent." This is a proceeding for dealing with a property found by the Commission, in every substantive sense and upon conclusive evidence, to be insolvent by more than $11,000,000.[3] It is also a judicial proceeding which contemplates ultimate foreclosure of valueless interests "by judicial decree." As will later be pointed out in this reply brief (Point XIV), the Commission Plan expressly pro-

---

[1]ACJ main brief, pp. 47-48, 52, 69-71; Debtor's main brief, pp. 23, 31; WP Corp. main brief, pp. 7, 24-25, 51-53.

[2]RCC main brief, p. 30.

[3]The difference between the total secured and unsecured debt of the Debtor at January 1, 1939, in the amount of $95,733,029.75 (see the Committee's main brief, p. 5) and the Commission's reorganization value of the Debtor at not more than $84,027,559 (see the Committee's main brief, pp. 55 and 76).

vides for this foreclosure by a conventional sale allowing the foreclosed dissenting interests to realize, if they can, cash proceeds for their interests.

This Court's decision in the *Radford* case[1] not only affords no defense to such a foreclosure,—it establishes the First Mortgage Bondholders' right to such a foreclosure. There this Court was dealing with an attempt "to abridge, *solely in the interests of the mortgagor,* a substantive right of the *mortgagee* in specific property held as security," and this Court denied the effectiveness of the attempt. Here, too, a mortgagor (the James Interests) and a junior creditor (RCC) are again seeking to abridge, solely in their own interests, rights of the senior First Mortgage Bondholders.

V

The argument that the Commission failed to give consideration to the Debtor's system "as it exists today"

The James Interests insist that the Commission dealt only with "the earnings of the property of the debtor as that system existed prior to the changes made from 1927 to 1938."[2] This is perhaps another form of the argument which still continues in the James Interests briefs that the Commission Plan gives weight only to depression earnings.[3]

The Committee wholly agrees that depression earnings are not controlling, and that the Commission Plan must be

---

[1] *Louisville Joint Stock Land Bank* v. *Radford*, 295 U. S. 555 (1935), cited in ACJ main brief, p. 39, and in WP Corp. main brief, p. 16.

[2] ACJ main brief, p. 21.

[3] WP Corp. main brief, pp. 43, 53; Debtor's main brief, p. 31.

tested by the facts of today, not merely by those of 1939, when it was approved by the Commission.

That the capitalization under the Commission Plan cannot be sustained on the basis of depression earnings and that it can be supported only by a most optimistic view of probable prospective earnings, is conclusively established by the charts appearing opposite pages 58 and 59 of the Committee's main brief and by the rates at which the Commission Plan capitalized average earnings for various past periods, including the period from 1939 to 1941, as shown on page 60 of the Committee's main brief.

The James Interests argument, however, now takes the form that the Commission failed to take into consideration, or at least to give any weight to, increased earning power due to the Northern California Extension (completed in 1931), the Dotsero Cut-off (a part of the lines of the Denver & Rio Grande, completed in 1934), or the rehabilitation program (completed in 1938).

Substantial evidence as to all three of the factors mentioned by the James Interests was incorporated in the record.[1] The evidence, as well as the possible effect of all three factors upon the "probable prospective earnings reasonably foreseeable," was fully discussed in the Commission's Report expressing the "reasons for its conclusions."[2]

So impressed was Commissioner Eastman with the weight which the Commission had given to the Northern California Extension in the development of the Commis-

---

[1]R. 1942-48, 2094-98, 1939, 2099-2100, 1985-86, 2145-52, 2172-85, 2225-33.

[2]R. 203, 207-8, 212, 214-15.

sion Plan that, testifying as Chairman of the Commission in 1939 before a House subcommittee,[1] he said:

> "I will give as an illustration the case of the Western Pacific. There was evidence in the *Western Pacific* case that the recent opening of the new line to the north in connection with the Great Northern Railway [the Northern California Extension] had increased traffic and revenues, and that this increase was likely to continue for the future. In other words, there was evidence of the introduction at the end or toward the end of the period of 12 years of a new factor consisting of the opening of a new line with an actual demonstration of its traffic possibilities. That would, I think, be evidence tending to rebut the presumption with respect to the average earnings for the 12 years."

The Commission of course gave to the Northern California Extension no such weight as the James Interests seek to deduce from the figures appearing on page 28 of the ACJ main brief. Their conclusion from those figures is that the Northern California Extension has made a 26% additional contribution to the gross revenues of the system and that "if one were to project back to the pre-depression years a 26% contribution to gross from a part of the debtor's system which did not then exist, a quite different historical earnings' picture would be presented."

It will be noted that the figures used to support this claim attribute to the gross revenues of the Northern California Extension *all* gross revenues received by the Debtor

---

[1]Transcript of hearings before Judiciary Committee on S. 1869 (76th Cong., 2nd Sess., 1939) 552-3.

from hauling over *any part* of the Debtor's system any freight which originated on or terminated on or passed over the Northern California Extension. In other words, if a ton of freight moved on the Northern California Extension from a point five miles distant from its connection with the Debtor's main line at Keddie, California, and then moved either 647 miles eastward to Salt Lake City or 281 miles westward to San Francisco over the Debtor's main line, *all* gross revenues received by the Debtor from the haul are attributed in the ACJ computation to the Northern California Extension. Undoubtedly a substantial part of such traffic does result from the Extension. On the other hand, undoubtedly a substantial part would be available to the Debtor even if it had not built the Extension.

Admittedly, the Northern California Extension is a valuable addition to the Debtor's properties, as those properties existed prior to *1932*. There is, however, no evidence whatsoever that it has increased, or will ever in the future increase, by 26%, the gross earnings of the Debtor's properties. Whatever may be the probable beneficial effect of the Extension, it was expressly appraised by the Commission, as an expert in such matters, and adequate effect given in the optimistic capitalization provided by the Commission Plan.

VI

The argument that in the twelve months ending July 31, 1942, the Debtor's properties earned "available for interest, a sum sufficient to cover its old fixed charges more than twice"

The ocular demonstration of the optimism of the Commission Plan capitalization, furnished by the charts inserted

opposite pages 58 and 59 of the Committee's main brief, is sought to be answered by the argument:

> "no amount of skillful argument or chart-making can cloud or conceal the fact that during the twelve month period from August 1, 1941 to July 31, 1942, as shown by the earnings statements filed by the Trustees in this proceeding pursuant to the order of the District Court and before this Court by stipulation, the debtor's railroad system earned $7,987,512 *available for interest, a sum sufficient to cover its old fixed charges more than twice.*"[1]

This Court must have been struck with the disparity between the earnings "available for interest" for 1940 and 1941, as stated on page 7 of the Committee's main brief and in the charts already referred to, and the earnings for the same years as stated in the ACJ main brief at page 24, the WP Corp. main brief at page 58 and the Debtor's main brief at page 32.

As explained in the Committee's main brief, the earnings stated by it for the years 1940 and 1941 take into account deductions for Federal income taxes (but not possible excess profits taxes) which would have been imposed had the Commission Plan been effective according to its terms. The footnote on page 7 of the Committee's main brief states the earnings after deduction of Federal income taxes, even on the basis of the Debtor's existing capitalization.

The figures stated in all the James Interests briefs do not make necessary adjustments, even for Federal income taxes under the laws applicable to those years upon a capital structure equal to that of the Debtor's present capital struc-

---

[1]ACJ main brief, p. 25.

ture. The earnings, therefore, which the James Interests briefs describe as "available for interest" are in fact earnings available for *Federal income taxes and excess profits taxes* and for fixed charges.

Furthermore, in stating that the $7,987,512 of earnings for the twelve months ending July 31, 1942, constitutes "a sum sufficient to cover its old fixed charges more than twice," the James Interests compute "old fixed charges" in disregard of more than nine years of unpaid interest accumulated upon *all* the Debtor's existing obligations. The principal amount of obligations upon which "fixed charges" are contractually payable by the Debtor today exceeds by nearly 50% the amount upon which the James Interests base their computation.

If, therefore, the figures used by the James Interests are restated so as not to "cloud or conceal the facts" of (1) omission to take into account Federal income and excess profits taxes (of the probability of which this Court will surely take judicial notice), and (2) omission of accrued unpaid interest upon which the Debtor is contractually liable for fixed interest, the "wide margin" by which the James Interests assert that the Debtor's system earned "its interest requirements under its existing capitalization" will vanish.[1]

---

[1]Within the last month two additional courts have realistically declined to be swayed by a debtor railroad's "war boom" revenues. *Guaranty Trust Co.* v. *The Minneapolis & St. Louis R.R.* (D. C. Minn., September 10, 1942, not yet reported); *In re Alabama, Tenn. & Mo.* (S. D. Ala., September 15, 1942). For discussion of this subject, see Committee's main brief, pp. 61-68.

VII

The argument that the Commission made no specific finding, in terms of dollars, of the earning power or of the value of the Debtor's properties either as an entirety or in respect of separate mortgaged segments

Admittedly, the Commission made no such precise valuations in formal findings. Nor did the Commission make any formal finding that the Debtor is insolvent. However, as pointed out in the Committee's main brief,[1] the Commission, in every substantive sense, did find that the properties of the Debtor as an aggregate had a reorganization value of less than $84,027,559 and therefore that the Debtor's financial condition was approximately $4,000,000 below the aggregate of its secured debt and more than $11,000,000 below the level of solvency. On the latter question, the Commission also specifically found not only that the Debtor's stock "has no value," but that its unsecured debt "has no value."

In the light of these findings and the Commission's elaborate statement of "its reasons for its conclusions," it is idle pretense for the James Interests to protest that their objections to the Commission's Reports and Orders in connection with the Commission Plan do not go to the form of the Commission's findings.[2]

They argue that "capitalization" is not necessarily synonymous with "valuation."[3] Of course. But the method by which the Commission built up the capitalization contemplated by the Commission Plan and then distributed it among the participating creditors in observance of their

---

[1]Pages 55 and 76.

[2]WP Corp. main brief, p. 28.

[3]WP Corp. main brief, pp. 32-34; ACJ main brief, pp. 55-58.

"absolute priorities" did, in every substantive sense, fix a value for reorganization purposes for the Debtor's properties.

In this connection the James Interests[1] purport to find a fatal inconsistency in the fact that the Commission Plan allots to the senior First Mortgage Bonds new no par value Common Stock at $57 a share, whereas, in order to fill out the RCC claim in full, no par value Common Stock allotted to RCC would have to be taken at $62 per share. The inconsistency which the James Interests purport to find does not exist. The RCC claim, being junior to that of the First Mortgage Bonds, must, to the extent which it is allotted the same class of new securities as are allotted for the senior First Mortgage Bonds, take those securities upon terms less favorable than those given the senior First Mortgage Bonds.[2]

To give emphasis to their insistence upon precise dollars and cents valuations, the James Interests assert:

> "That the language of those who have negotiated reorganizations has always been, of necessity, one of dollars and cents, just as is the language of business generally, is brushed aside by counsel for the petitioners."[3]

In no railroad reorganization with which the Committee counsel has had any contact, or of which he has been informed during more than thirty years' experience in the problems of railroad reorganization, has either aggregate capitalization or distribution been based upon con-

[3]ACJ supplemental answering brief, dated October 9, 1942, erroneously labeled "Reply Brief," p. 15.

sideration of dollars and cents values of properties, old securities, or new securities. In all such cases, and in every railroad reorganization case before the Commission or the courts which the Committee counsel has been able to find, the factors considered have been those of aggregate earning power, and relative earning power of the various mortgage divisions. Reorganizers, whether in the old equity days or under Section 77, have never deluded themselves by attempting the impossibility of reducing old securities and new securities to a deceptive common denominator, expressed in dollars and cents.[1] The only two exceptions to this practice have been, as indicated in the Committee's main brief,[2] (1) in the case of old securities having security capable of ready liquidation for cash, particularly if in an amount exceeding the amount of the claim, and (2) in the case of a sale of new securities in the reorganization to provide new money.

VIII

The argument that the Commission Plan is "the most drastic plan ever proposed for a major property"

The Debtor's main brief characterizes the Commission Plan for the Western Pacific as with "one exception," the "most drastic plan ever proposed for a major property."[3]

The Commission has formulated plans of reorganization for eleven other major Class I carriers; three of these plans have been consummated, the remainder being in various stages of the procedure prescribed by Section 77.

Applying reported earnings of those carriers for the years 1923 to 1939, inclusive, to the new capitalizations

Plan has been rejected by the Circuit Court of Appeals for the Seventh Circuit on the ground of inadequate findings by the Commission. See Committee's main brief, p. 69, note 1, and p. 90, note 1.

[2]Set aside by the District Court on the ground of undue preference to certain classes and inadequate treatment of other classes of securityholders. See Committee's main brief, p. 133, notes 1 and 2.

[3]In this computation averages have been obtained by adding all the earnings, and subtracting all the deficits, for the years 1923 to 1939, inclusive, and dividing the result by 17.

(D) denotes deficit.

proposed in those plans (with one exception for which figures are not available) and to that proposed by the Commission Plan for Western Pacific, the earnings per share on the new common stock of the reorganized companies would be approximately as appears on the opposite page.[1]

It will thus be seen, not only that the Western Pacific Plan is *not* the most drastic of the various railroad reorganization plans formulated by the Commission, but that on the contrary, save for the C. & E. I. Plan, it is the most liberal of such plans. That the Western Pacific Plan errs, if anything, on the side of undue optimism and is out of line in that respect with other plans promulgated by the Commission, has been pointed out in an analysis of the Commission's plans in the Harvard Law Review.[2]

The figures[3] upon which the Debtor relies for its contrary assertion have to do with the relationship of prescribed annual charges through Preferred Stock dividends to the entire authorized capitalization, taking no par value Common Stock at $100 per share. This relationship is wholly irrelevant to the question of liberality or lack of liberality of the aggregate capitalization. The absurdity of the Debtor's argument becomes the more apparent when it is realized that if, as the Debtor urges, the aggregate capitalization were increased by the addition of substantially more no par value Common Stock, the percentage relationship stated by the Debtor would become even lower, and hence, by the Debtor's reasoning, the aggregate capitalization even "more drastic" in comparison with the capitalization under other plans promulgated by the Commission.

[1]In this computation, earnings applicable to sinking funds and capital funds are treated as redounding to the benefit of the Common Stock; which of course they ultimately do, and the Common Stock (if allocated on a basis other than $100 per share) is adjusted to a $100 per share basis.

[3]Debtor's main brief, p. 22, note 27.

IX

The argument that the treatment of the Trustees' Certificates and the RFC Notes violates the Reconstruction Finance Corporation Act

All of the arguments on the merits made by the various respondents against the Commission Plan's treatment of the Trustees' Certificates and the RFC Notes have, it is believed, been anticipated by the Committee's main brief[1] and by the RFC main brief.

The James Interests assert two alleged defects in the power of RFC to acquire the new securities provided for it under the Commission Plan, first, because the Commission will be unable to find as a matter of law that funds are not available to the Trustees or the Reorganized Company on reasonable terms through private channels, and, second, because RFC will be receiving an illegal fee or commission by consummating the exchange.[2]

The paragraph of Section 5 of the RFC Act which applies to railroads is reprinted as Appendix A hereto. A reading of that paragraph in its entirety makes it apparent that the requirement that funds be not available on reasonable terms through private channels applies only to *loans* made by RFC and not to the refunding by the RFC, as part of a reorganization plan, of outstanding *obligations* held by it.

Even in the case of a loan, the statute and the decisions of the Commission make it clear that the determination of whether funds are available on reasonable terms through private channels lies exclusively with RFC. The statutory

---

[1] Pages 107-13.

[2] ACJ main brief, pp. 117-18.

requirement is that RFC may make loans to railroads "* * * when, *in the opinion of the Corporation,* funds are not available on reasonable terms through private channels * * *." On numerous occasions, the Commission has said:

> "* * * It is our view that the question of the ability of the applicant to obtain funds upon reasonable terms through banking channels or from the general public is committed by Section 5 of the Reconstruction Finance Corporation Act primarily to the corporation."[1]

Even if the Commission were required to go into the question as to whether, in the present case, funds are available on reasonable terms through private channels, it would have to take into account, as one of the factors affecting the problem, all the necessities of the reorganization. That $10,000,000 could not be provided on a long-term basis through private channels on terms as favorable as the provisions of the Commission Plan was conclusively established at the hearing before the District Court on January 22, 1940,[2] and again at the hearing before the District Court on the ACJ motion (see *infra,* pp. 29-30).

Equally untenable is ACJ's second contention that the Commission Plan is illegal in its treatment of RFC because the grant of preferential treatment to the RFC Notes in consideration of the exchange of the Trustees' Certificates for the less valuable new First Mortgage Bonds constitutes an illegal fee or commission. This contention

[2] R. 1530-1567.

is inspired by the following provision of Section 5 of the RFC Act:

> "* * * Provided, That no fee or commission shall be paid by any applicant for a loan under the provisions hereof in connection with any such application or any loan made or to be made hereunder, and the agreement to pay or payment of any such fee or commission shall be unlawful. * * *"

That proviso is not only by its terms inapplicable here, but the express intent of Congress further demonstrates how far afield the ACJ argument has gone.[1]

---

[1]Representative Rayburn, who offered the amendment containing the proviso, explained his amendment on the floor of the House as follows:

> "* * * this amendment means simply this and nothing else, * * *
>
> * * * * * * * * * *
>
> "* * * We have a great many ex-Congressmen, a great many ex-Senators, a great many ex-members of boards and commissions who have opened up law offices in Washington. We have many ex-attorneys for these boards and these commissions with offices in Washington. What they do is to go out and, by a campaign, convince these people, who are going to get money from these departments, or these bureaus, or these commissions, that the only way they can get it is to pay them 10 per cent. of the amount or more. * * *
>
> "The Interstate Commerce Commission is called upon in this bill to recommend and approve an application by a railroad for a loan under its provisions. Before the Interstate Commerce Commission, which is supposed to know all about these matters and is supposed to go into them minutely, approves a loan of $1,000,000 or $2,000,000, or any amount, they want to believe that when they approve it and when the money is paid over, the railroad that is in such distress will get all of it and not that some attorney or some ex-commissioner, or some ex-attorney for a board, or something like that will get 10 per cent. or 20 per cent. of the original amount." (75 Cong. Rec. 2101-2)

No elaboration on this explanation seems necessary to demonstrate the complete inapplicability of this provision to the facts of the present case.

A factual misstatement in the RCC main brief with respect to the treatment of the RFC claim should be called to the Court's attention. On page 14 that brief sets forth all the new securities allocated to RFC, RCC and ACJ, including, in the case of those allocated to RFC, the new Income Mortgage Bonds and Preferred Stock *expressly allocated as consideration for the RFC's exchange of Trustees' Certificates* for First Mortgage Bonds. In other words, the RCC table is not confined to the new securities allocated to the Refunding Mortgage Bonds pledged for the RFC, RCC and ACJ Notes.

In the table set forth on its page 13, the RCC main brief allots all these new securities among the RFC, RCC and ACJ Notes (again including those specifically allocable against the discount on the new First Mortgage Bonds accepted for the Trustees' Certificates) as if all these new securities had been allocated by the Commission Plan against the pledged Refunding Mortgage Bonds.

Neither RCC nor ACJ has ever offered to provide any part of the $10,000,000 in substance provided by RFC to refund the Trustees' Certificates. What possible basis, therefore, is there for them to share in the consideration paid to RFC for furnishing the $10,000,000 new money?

Three times the James Interests, sometimes seconded by RCC, have endeavored to render the Commission Plan nugatory by forcing the application of cash in the hands of the Reorganization Trustees to the payment of the Trustees' Certificates. Such use of cash resulting from earnings since the effective date of the Commission Plan might not only destroy the basis for the treatment of the RFC Notes under the Commission Plan, through retirement of the Trustees' Certificates, but it would also denude the estate of the cash necessary to service the new securities since January 1,

1939, the effective date of the Commission Plan. The District Court denied the first two attempts.[1] The latest effort of the James Interests to this end is pending in the District Court and is now set for hearing on November 2, 1942.[2]

The Reorganization Trustees' petition, upon which that hearing is to be had, is before this Court as Appendix A to the RCC main brief. It is quoted by RCC (at p. 19) as stating "that they have $6,000,000 of cash deposited with the RFC and expect to have six million more on hand on December first, at which time they can, *without impairing in anywise the reorganization*, pay off a substantial portion of the Trustees' Certificates."

The Trustees said no such thing. What they said was that they were of opinion "that they would be able, *without impairment of necessary working capital and without prejudice to the conduct of the railroad business of the Debtor*,"[3] to retire a substantial portion of the Trustees' Certificates. In other words, the Trustees said only that if they entirely disregarded all the requirements of the reorganization, they could pay a substantial part of the Trustees' Certificates.

---

[1]Orders dated May 13, 1941, and November 26, 1941. See also *In re Western Pacific R. R.*, 38 F. Supp. 877 (N. D. Calif. 1941).

[2]The James Interests have objected to the Reorganization Trustees' acceptance of an offer of RFC to carry the Trustees' Certificates after their maturity December 1, 1942, under an arrangement that default may be declared only upon four months' notice and that the Trustees may continue to reduce the net interest payable in respect of the Trustees' Certificates by increasing their time deposits with RFC (now $6,000,000), on which RFC will allow the same rate of interest as that borne by the Trustees' Certificates (4%). This, of course, means that if the Trustees so deposited an amount equal to the face amount of the outstanding Trustees' Certificates, the latter would entail no interest charge.

X

The argument that the relationship between the accommodation pledgors and the accommodation pledgees should be dealt with in the Commission Plan

The Debtor makes a new argument[1] for the benefit of the two other James Interests entities who furnished the Debtor, as an accommodation, some of the collateral pledged to secure the RFC and RCC Notes. Its argument is that, because the loan of the accommodation collateral by ACJ and WP Corp. made the accommodation pledgors creditors of the Debtor in respect of the accommodation pledge, the Commission Plan should deal with the entire problem of the accommodation collateral.

This argument, perhaps plausible at first blush, confuses the various relationships created by the accommodation pledges.

Included in the accommodation collateral were $2,000,000 Refunding Mortgage Bonds, pledged by ACJ to secure the RCC Notes. The accommodation pledge of those Bonds created these relationships:

> (1) RCC's right against the Debtor's property as pledgee of the pledged Bonds. This relationship is dealt with by the Commission Plan, which allocates to the RCC Notes the new securities allocated to the pledged Bonds.
>
> (2) ACJ's right against the Debtor for exoneration and indemnification in respect of the accommodation pledge. This relationship created a contingent

---

[1]Debtor's main brief, pp. 14-17.

unsecured claim by ACJ against the Debtor, and the relationship is dealt with by the Commission Plan in its finding that the unsecured debt "has no value" and is not entitled to participation under the Commission Plan.

(3) ACJ's right to compel RCC to marshall by going first against the non-accommodation collateral and then against the accommodation collateral to the extent of any remaining deficiency. This is a relationship entirely between ACJ and RCC and cannot be dealt with in the Commission Plan, on the merits.

The latter proposition is not changed by the fact, adverted to by the Debtor,[1] that the Committee, as part of the compromise proposals and in order to secure some reorganization plan acceptable to the James Interests (the accommodation pledgors), suggested that the accommodation pledgees agree to return the accommodation collateral to the accommodation pledgors.

Most of the accommodation collateral, however, consists of securities, the property of WP Corp., which are not claims against the Debtor or its estate. The accommodation pledge of this collateral did not create relationships of the character described in the foregoing subparagraph (1). As a result of the accommodation pledges, WP Corp. has its unsecured claim for exoneration and indemnification against the Debtor, found valueless by the Commission Plan. The existence of that relationship cannot make the relationships between the accommodation pledgees, RFC

[1]Debtor's main brief, pp. 15-16.

and RCC, on the one hand, and the accommodation pledgor, WP Corp., on the other hand, a proper subject matter for the Commission Plan, in the *absence* of a compromise agreement by all the parties concerned.

XI

The argument that the new evidence before the District Court respecting Central California Traction and Alameda Belt properties required a change in the allocation of new securities against those properties

The Refunding Mortgage Trustee is correct in stating that new evidence with respect to the allocations against the Central California Traction and Alameda Belt properties was introduced before the District Court.[1] That evidence had to do largely with additional studies of the traffic contributed by those two properties to the Debtor's directly owned lines.[2]

However, like the James Interests analysis of the contributions of the Northern California Extension,[3] those studies attributed to the two properties all the gross revenues realized by the Debtor from all the haulage on Debtor properties of every ton of freight which originated on or terminated on or was carried over either of the two properties. The result was that the gross revenues from a ton of freight originating on one of the properties and terminating on the other were taken into the so-called contributed traffic studies twice. Of course on any such basis various

---

[1]Refunding Mortgage Trustee's answering brief, p. 6.

[2]R. 1098-1106, 1309-17.

[3]ACJ main brief, p. 28. See p. 17, *supra*.

terminal and branch lines would soon pile up gross revenues materially exceeding those of the whole system.

The Refunding Mortgage Trustee's brief concedes that the Debtor has continually been compelled to contribute cash to these properties, both for operating deficits and for capital purposes.[1]

While the Commission found that they had "no material value," the Commission did give them recognition by allotting to the Refunding Mortgage Bonds all the Common Stock remaining after providing for the absolute priorities of the First Mortgage Bondholders.

Only by attributing the Common Stock allotted to the Refunding Mortgage Bonds against such residual values in the Refunding Mortgage property can the allotment of Common Stock to those Bonds under the Commission Plan be sustained.

XII

The argument that the Reorganization Committee contemplated by the Commission Plan should be eliminated and the reorganization carried out solely by the Debtor

We cannot believe that this Court would regard as proper administration any procedure which left the determination of all the problems involved in consummating the reorganization to *this* Debtor. Its interest in its properties the Commission has found to be of "no value," it is controlled by those whose interests conflict with those of the senior creditors, and it has demonstrated throughout this proceeding a consistent hostility to the First Mortgage Bondholders.

---

[1]Refunding Mortgage Trustee's answering brief, pp. 9-10.

In any event, this problem is clearly a matter of administration within the discretion of the Commission. Notwithstanding that the Committee expressed, before the Commission, its entire willingness that the representative of the First Mortgage Bonds on the Reorganization Committee be elected by First Mortgage Bondholders, the Commission provided that one of the three Reorganization Managers should be designated by the Committee. The experience of the First Mortgage Bondholders which the Committee represents, it is submitted, justifies the Commission's confidence in it.

The Committee is, as urged by the Debtor, merely a group organized under subsection (p) of Section 77, and does not purport to act for any of the First Mortgage Bondholders who are not members of the group. It therefore does not purport to represent any of the $32,348,700 of First Mortgage Bonds which the Debtor asserts are "wholly unrepresented * * * except as they may be represented either by the mortgage trustees * * * or by the Debtor."[1] Certainly the Committee does not represent any of the $8,000,000 of First Mortgage Bonds held by the James Interests.[2] The Committee, however, has no conflicting interests, and it believes that its views regarding the rights of the First Mortgage Bondholders, with which the First Mortgage Trustees have been in entire accord, more probably represent the views of the holders of the $22,000,000 of First Mortgage Bonds who have not appeared in the proceeding than do the views of the Debtor.

---

[1]Debtor's main brief, p. 5.

[2]Committee counsel has been advised by ACJ counsel that these James Interests First Mortgage Bonds, which the Committee clearly does not represent, have, since the taking of the record testimony, been increased to more than $10,000,000.

XIII

The argument that the District Court failed to exercise an informed, independent judgment

The James Interests urge that "as to questions of capitalization the District Court refused to pass judgment," that "because of the District Court's misconception of its functions no adequate review of the Commission's determinations was possible," and that "the opinion of the District Court shows complete surrender to * * * the Commission, and a complete acceptance of its preliminary determination of questions relating to the distribution of the new securities."[1]

Even a superficial reading of the District Court's 31-page opinion disproves this criticism by the James Interests.

Quoting the decision of this Court in *St. Joseph Stock Yards Co.* v. *United States,*[2] the James Interests assert[3] that "the Court must make an independent determination of challenged questions of law which are involved in administrative determinations and, if necessary, must examine the entire record, including the evidence."

This the District Court did. He not only "read the record;" he heard new evidence. He not only "carefully considered all the objections" and "read the briefs of the respective counsel in support of the objections," but he wrote a careful well-reasoned opinion on the main questions raised by the objections to the Commission Plan (alleged insufficiency of capitalization) and gave reasons for his conclusions, which added materially, both by quotations of

---

[2]298 U. S. 38 (1936).

[3]ACJ main brief, p. 111.

legal authority and by factual analysis, to the reasons given by the Commission.

Does the fact that after this examination of all the record, including participation in the making of a part of it, and this examination and exposition of law, the District Court was "wholly in accord" with all the conclusions reached by the Commission, evidence a lack of either independence or information in the reaching of that judgment?

To be sure the District Court did in a *dictum* discuss the relative functions of the Commission and the Court in language criticized by the Circuit Court of Appeals. That the proper determination of these relationships by this Court is sought by all the parties before this Court cannot change the fact, pointed out in the RFC main brief,[1] that the discussion was only a *dictum*. The District Court did independently determine all the disputed questions.

The following language used in this Court's opinion in the *St. Joseph Stock Yards* case[2] is therefore pertinent:

> "As the District Court, despite its observation as to the scope of review, apparently did pass upon the evidence, making findings of its own and adopting findings of the Secretary, we do not think it necessary to remand the cause for further consideration * * *."

XIV

The argument that the Commission Plan will be rendered nugatory by its rejection by the James Interests and RCC

The Committee agrees with the James Interests that when the Commission Plan comes before the District Court

---

[1] Pages 86-88.
[2] 298 U. S. 38, 54 (1936).

for confirmation the James Interests and RCC will be entitled, as will also be the supporters of the Commission Plan, to make a further record. In the light of that record the District Court will again have to be "satisfied" and find that the Plan "makes adequate provision for fair and equitable treatment for the interests or claims of those rejecting it." Undoubtedly the James Interests will endeavor at that hearing to establish their present contention that the present high earnings of the Western Pacific are largely due to factors not related to the war effort,[1] but apparently to the perpetual elimination of such adverse competition as that of the Panama Canal and, presumably, trucks, busses and airplanes. Perhaps, too, if they are overruled they will carry out their threat to vote to reject the Commission Plan.[2]

But, to paraphrase what this Court said in another connection, "there is no necessity for this Court to yield to such pressures" in the proceeding immediately before it. The question now is whether, upon the record before the Court and all additional facts of which the Court may properly take judicial notice, the Court should affirm the District Court's approval of the Commission Plan in order to permit the taking of the next step in the reorganization procedure.

The Court cannot now determine all the issues which the ingenuity of the James Interests counsel will undoubtedly develop when the District Court shall enter its confirmation order. The Court can, however, by its present opinion, eliminate, not only for the *Western Pacific* case but for the other pending railroad reorganizations, a multitude

---

[1]ACJ main brief, p. 26; Debtor's main brief, pp. 33-36; WP Corp. main brief, pp. 58-59.

[2]ACJ main brief, p. 6.

of arguments raised by objectors to the Commission plans which, it is believed, the Committee briefs in this proceeding demonstrate are wholly inconsistent with this Court's past decisions.

The Commission Plan itself contains adequate provision for dealing with those classes of creditors who may ultimately reject it, notwithstanding a finding of the District Court that it is fair and equitable.

That the James Interests would never cease their efforts to defeat the Commission Plan was foreseen both by the Committee and by the Commission. The Commission Plan therefore contains a provision which obviates any question as to whether the so-called "cram down" provision of Section 77, permitting the District Court to require dissenting classes to accept new securities found to be fair and equitable, constitutes due process, without a sale to insure a cash alternative. The Commission Plan provides that it may be consummated through the device of a sale at an upset price fixed by the District Court.[1] This provision, as already pointed out,[2] adequately takes care of the contentions of the James Interests and RCC that their rights cannot be foreclosed "without judicial decree" or the conventional foreclosure sale.

Of course such a sale is not a substitute for findings that the plan is "fair and equitable." But the presence of such a provision, under the circumstances of the *Western Pacific* case, should go far toward resolving any lingering doubt as to the fairness and equity of the Commission Plan toward the James Interests and RCC.

It affords in a substantial measure an ultimate pragmatic test of the soundness of the Commission's determina-

---

[1] R. 350-52.

[2] *Supra*, pp. 14-15.

tion as to the value of the Debtor's properties for reorganization purposes. It also furnishes a practical test as to the sincerity of the James Interests and RCC in their constant assertions that the Debtor's properties are worth more than the amount of the senior secured claims—indeed, worth more than the full amount of all the secured claims. If the James Interests honestly believe the Debtor's properties to be worth more than the approximately $88,000,000 of secured claims,[1] the provision of the Commission Plan for an offer of the properties at an upset price will give the James Interests, as well as RCC, opportunity to render the Commission Plan nugatory by buying in the properties at such sale and capitalizing them in whatever manner they may determine, with the approval of the Commission.

In the literature dealing with reorganization problems, judicial sales of railroad properties have sometimes been characterized as meaningless fictions on the ground that junior creditors and stockholders are usually large numbers of small investors with small resources, wholly unorganized.

In the *Western Pacific* case the tenacity of the James Interests, and the battery of eminent counsel appearing for the several corporate entities included in the James Interests, evidence both the capacity for organization and the presence of adequate resources among the junior interests. This, therefore, is not the ordinary situation, but is one in which all of the dissenters are large corporations and, except for RCC, under common control. A judicial sale will be no meaningless gesture but, on the contrary, as above pointed out, will afford a practical test of the dissenters' contentions not only as to the value of the Debtor's properties

---

[1] As of January 1, 1943, the amount, including accumulated unpaid interest, will exceed $100,000,000.

as an aggregate but as to the value of the properties upon which the Refunding Mortgage is a first lien.

From the legal standpoint such a sale will also clearly constitute "due process" in the elimination of the interests of WP Corp., should it fail to purchase the properties at such sale. As to the ACJ and RCC Notes, the Commission Plan preserves to them, notwithstanding any failure on their part to bid in the Debtor's properties at such a sale, an option to take the new securities allotted to them in the Plan in lieu of their aliquot portion of the proceeds of the sale.

Respectfully submitted,

ROBERT T. SWAINE,
Attorney for Frederick H. Ecker, John W. Stedman and Reeve Schley, constituting the Institutional Bondholders Committee, Petitioners.

HERBERT W. CLARK,
BENJAMIN R. SHUTE,
Of Counsel.

Dated October 12, 1942.

APPENDIX A

Reconstruction Finance Corporation Act, Section 5 (15 U. S. C. § 605), as amended September 18, 1940[1]

* * * * * * * * * *

Each such loan may be made for a period not exceeding three years, and the corporation may from time to time extend the time of payment of any such loan, through renewal, substitution of new obligations, or otherwise, but the time for such payment shall not be extended beyond five years from the date upon which such loan was made originally. The corporation may make loans under this section at any time prior to the expiration of one year from January 22, 1932; and the President may from time to time postpone such date of expiration for such additional period or periods as he may deem necessary, not to exceed two years from January 22, 1932. Within the foregoing limitations of this section, the Corporation, notwithstanding any limitation of law as to maturity, *with the approval of the Interstate Commerce Commission, including approval of the price to be paid, may, to aid in* the financing, *reorganization,* consolidation, maintenance, or construction thereof, *purchase* for itself, or for account of a railroad obligated thereon, the *obligations* of railroads engaged in interstate commerce, or of receivers or trustees thereof, including equipment trust certificates, or guarantee the payment of the principal of, and/or interest on, such obligations, including equipment trust certificates, or, *when, in the opinion of the Corporation, funds are not available on reasonable terms through private channels, make loans,* upon full and adequate security, to such railroads or to receivers or trustees thereof for the purposes aforesaid: Provided, That in the case of loans to or the purchase or guarantee of obligations, including equipment trust certificates, of railroads not in receivership or trusteeship, the

[1]Italics in the text of the statute are supplied.

Interstate Commerce Commission shall, in connection with its approval thereof, also certify that such railroad, on the basis of present and prospective earnings, may reasonably be expected to meet its fixed charges, without a reduction thereof through judicial reorganization, except that such certificate shall not be required in case of such loans, purchases, or guaranties made for the maintenance of, or purchase of equipment for, such railroads: Provided further, That for the purpose of determining the general funds of the Corporation available for further loans or commitments, such guaranties shall, to the extent of the principal amount of the obligations guaranteed, be interpreted as loans or commitments for loans: And provided further, That the total amount of loans and commitments to railroads, receivers, and trustees, and purchases and guaranties of obligations of railroads, under this paragraph, as amended, shall not exceed at any one time $500,000,000, in addition to loans and commitments made prior to January 31, 1935, and renewals of loans and commitments so made: *Provided, That no fee or commission shall be paid by any applicant for a loan under the provisions hereof in connection with any such application or any loan made or to be made hereunder, and the agreement to pay or payment of any such fee or commission shall be unlawful.* Any such railroad may obligate itself in such form as shall be prescribed and otherwise comply with the requirements of the Interstate Commerce Commission and the corporation with respect to the deposit or assignment of security hereunder; without the authorization or approval of any authority, State or Federal, and without compliance with any requirement, State or Federal, as to notification, other than such as may be imposed by the Interstate Commerce Commission and the corporation under the provisions of this section. The title of any owner, whether as trustee or otherwise, to any property leased or conditionally sold to a railroad, or a receiver or trustee thereof, which the Corporation has financed, or in the financing of which the Corporation has aided, any right of such owner to take possession of such property in

compliance with the provisions of any such lease or conditional sales contract, and the title of any owner of a collateral note evidencing a loan from the Corporation to a railroad not now in receivership or involved in proceedings under section 205 of Title 11, or a receiver or trustee thereof, and the right of any such owner to acquire title to the collateral securing such note, free and clear of any equity of redemption, in compliance with the contract of pledge, and thereafter to deal with the same as the absolute owner thereof, shall not be affected, restricted, or restrained by or pursuant to the provisions of Title 11, as amended, or by or pursuant to any other provision of law applicable to any proceedings thereunder.

TEXT

American Bar Association Journal, January, 1942 6

The Railroad Credit Corporation, a Respondent in the above entitled action, opposes the granting of either of the above entitled petitions for review on writ of certiorari and urges that the judicial discretion of this Court be exercised to deny such petitions because there is no special or important reason therefor; also, because none of the reasons set forth in paragraph 5 of Rule 38 exists for granting such petitions.

The decision and opinion of the Circuit Court of Appeals are in substance expressed in these statements:

A. It was necessary to determine the values of the debtor's property in order to determine the value of each of the claims against such property or any part of it.

The following is quoted from the opinion of the Circuit Court of Appeals: (unreported)

> "The holding company objected to the plan on the ground that it is not fair and equitable, but is unfair and inequitable, in that it excludes the holding company from participation in the reorganization. The objection states that the debtor is not insolvent, but has property of a value greatly in excess of its liabilities.' Obviously, if the statement is true, the holding company is entitled to participate in the reorganization, and its exclusion therefrom is unfair and inequitable. Thus, to determine the question raised by the holding company's objection, it was necessary to determine the value of the debtor's property as of the effective date of the plan — January 1, 1939. Consolidated Rock Products Co. v. DuBois, 312 U. S. 510, 517–525."

* * * * *

> "To determine the value of the above mentioned claims, it was necessary to determine the value of (1)

the debtor's entire property, (2) the property subject to the first mortgage now outstanding, (3) the $18,999,500 of refunding bonds pledged to secure the claims of A. C. James Company, Railroad Credit Corporation and Reconstruction Finance Corporation and (4) the other collateral pledged to secure each of said claims. To determine the value of the refunding bonds, it was necessary to determine the value of (1) the property subject to the refunding mortgage only and (2) the property subject both to the refunding mortgage and to the first mortgage now outstanding. This, of course, necessitated a determination as to which of the debtor's property is, and which is not, subject to each mortgage. Consolidated Rock Products Co. v. DuBois, *supra*."

B. These values should have been, but were not, determined by the Interstate Commerce Commission and certified by it to the District Court.

The following is quoted from the opinion of the Circuit Court of Appeals:

> "Subsection (e) of § 77 provides: 'If it shall be necessary to determine the value of any property for any purpose under this section, the [Interstate Commerce] Commission shall determine such value and certify the same to the court in its report on the plan.' In this case, as has been seen, it was necessary to determine the value of (1) the debtor's entire property, (2) each of the claims of Reconstruction Finance Corporation, (3) the claim of Railroad Credit Corporation, (4) the claim of A. C. James Company, (5) the claims of the holders of first mortgage bonds now outstanding, (6) the $10,000,000 of new first mortgage bonds, (7) the $21,219,075 of income bonds, (8) the 318,502.97 shares of new preferred stock, (9) the 319,441 shares of new common stock, (10) the property subject to the first mortgage now outstanding, (11) the $18,999,500

of refunding bonds pledged to secure the claims of Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James Company, (12) the other collateral pledged to secure each of said claims, (13) the property subject to the refunding mortgage only, (14) the property subject both to the refunding mortgage and to the first mortgage now outstanding, (15) the property which would be subject to the new first mortgage, and (16) the property which would be subject to the income mortgage. It thus became the duty of the Commission to determine these values and certify them to the court. That duty was not performed."

C. Values so determined and certified by the Interstate Commerce Commission in a plan of reorganization may be employed by the District Court in the determination of the fairness of the plan, but such determination should be the result of the exercise by the District Court of its own independent judgment. Lacking the requisite valuation data this independent judgment could not be and was not exercised.

The following is quoted from the opinion of the Circuit Court of Appeals:

"Lacking the requisite valuation data, the court was in no position to exercise the 'informed, independent judgment' which appraisal of the fairness of a plan of reorganization entails. Consolidated Rock Products Co. v. DuBois, supra. See, also, National Surety Co. v. Coriell, 289 U. S. 426, 436; First National Bank v. Flershem, 290 U. S. 504, 525; Case v. Los Angeles Lumber Products Co., 308 U. S. 106, 115. Therefore, instead of approving the plan, the court should have entered an order dismissing the proceeding or, in its discretion and on motion of any party in interest, referring the proceeding back to the Commission for further action."

All of the foregoing statements, (A), (B) and (C) were considered and affirmed by this Court in its decision and opinion in *Consolidated Rock Products Co. v. DuBois*, 312 U. S. 510, 517-535, which was a review and affirmation of the decision of this Circuit Court of Appeals. These questions of federal law so answered with finality are the only ones of substance involved in this case.

Lest there be any question as to the pertinency of this Court's opinion in the *Rock Products Case*, the following paragraphs are quoted from that opinion:

(p. 520)

> "We agree with the Circuit Court of Appeals that it was error to confirm this plan of reorganization.
>
> "1. On this record no determination of the fairness of any plan of reorganization could be made. Absent the requisite valuation data, the court was in no position to exercise the 'informed, independent judgment' (National Surety Co. v. Coriell, 289 U. S. 426, 436) which appraisal of the fairness of a plan of reorganization entails. Case v. Los Angeles Lumber Products Co., 308 U. S. 106. And see First Nat. Bank v. Flershem, 290 U. S. 504, 525." * * *

(p. 524)

> "We have already noted that no adequate finding was made as to the value of the assets of Consolidated. In view of what we have said, it is apparent that a determination of that value must be made so that criteria will be available to determine an appropriate allocation of new securities between bondholders and stockholders in case there is an equity remaining after the bondholders have been made whole."

D. The District Court should have entered an order dismissing the proceeding, or, in its discretion and on motion of any party in interest, have referred

the proceeding back to the Commission for further action.

This last statement (D) is in substance the mandate of a part of Sub-section (e) of Section 77 of the Bankruptcy Act. The Circuit Court of Appeals followed the decision of the *Consolidated Rock Products Co. v. DuBois, supra,* and enforced the mandate of the statute in the case at bar.

From the foregoing this respondent claims that there is no special or important reason for granting the petition for certiorari or for a further review of issues already decided.

No special and important reasons which might be considered applicable to the allegations contained in said petitions are among those outlined in paragraph (5) sub-paragraph (b) of said Rule 38 as the following demonstrates.

Respondent claims: that no Circuit Court of Appeals has rendered a decision in conflict with another Circuit Court of Appeals on the matters embraced in either of said petitions; no decision of an important question of local law is involved; no decision of an important question of federal law has been rendered which has not been, but should be, settled by the Supreme Court of the United States; no decision of a federal question has been rendered which is probably in conflict with applicable decisions of the Supreme Court of the United States; there has been no departure from the accepted and usual course of judicial proceedings by the Circuit Court of Appeals for the Ninth Circuit nor any such sanction of such departure by a lower court as to call for an exercise of the supervision of the Supreme Court of the United States.

1.

PUBLIC INTEREST

Included in the reasons relied on by the petitioners for the allowance of the writ is the question of "public interest." This phrase, so frequently and freely cited by petitioners, is not among the "special and important reasons" scheduled in the rules of this Court as a basis for granting a petition for review. In the absence of those set forth in Rule 38(5), it may be assumed that the Circuit Court of Appeals is competent to be a court of last resort where public interest is involved and where there are no conflicting decisions of other Circuit Courts of Appeal and where the question has already been settled by this Court.

The petitioners are evidently of that class referred to and looked upon with disfavor by this Court in *Magnum Import. Co. v. Coty*, 262 U. S. 159, 163, where it was said that the certiorari jurisdiction "was not conferred upon this Court merely to give the defeated party in the circuit court of appeals another hearing. Our experience shows that 80 percent of those who petition for certiorari do not appreciate these necessary limitations upon our issue of the writ." Inasmuch as none of the reasons advanced and relied on by petitioners for the granting of the writ comes within the rules of this Court, we feel that these petitioners fall clearly within the 80 percent referred to by this Court in the case just cited. It is interesting to note what the present Solicitor General of the United States said with reference to this matter in the January, 1942, issue of the American Bar Association Journal (p. 22), that "to apply for review unless there is very good reason to do so at least unnecessarily burdens the Supreme Court and seeks to make of it a sort of additional and final Circuit Court of Appeals, to the detriment of the proper sphere of influence of both the Circuit Court and the Supreme Court."

2.

CASES RELIED ON BY PETITIONERS FOR GRANTING OF THE WRIT

In support of their grounds for granting of the petitions, petitioners cite many cases decided by this Court, Circuit Courts of Appeal and Federal District Courts, some of which concern proceedings under Section 77B of the Bankruptcy Act, 11 U. S. C. § 207, the remainder involving questions of general law in proceedings other than under the Bankruptcy Act. A careful study of these cases has failed to disclose that the opinion of the Court in any one of them is in conflict with the decision rendered by the United States Circuit Court of Appeals for the Ninth Circuit in the case at bar. Consequently, the grounds may be termed the usual conventional objections.

One of the cases relied on is that of *Chicago, Milwaukee, St. Paul and Pacific Railroad Co.*, decided by the United States Circuit Court of Appeals for the Seventh Circuit on December 4, 1941, and not yet reported. Petitioners allege that the decision of the Circuit Court of Appeals for the Ninth Circuit is in some respects in conflict with the opinion of that Court. Where the conflict, if any, exists respondent is unable to see. To the contrary, it is squarely in conformity with the findings of the Circuit Court of Appeals for the Ninth Circuit. Proceedings in each of these cases were under Section 77 of the Bankruptcy Act, as amended. Both involved the validity of reorganization plans certified by the Interstate Commerce Commission and approved, in both instances, by orders of the District Courts, each opinion finding an absence in valuation by the Commission of the Debtor's entire property which it is required to determine under Section 77(e) of the statute, the necessity of which this Court held in *Consolidated Rock Products Co., supra*, and *Los Angeles Lumber Co., supra*, was fundamental, without which "the court was in no position to

exercise the 'informed, independent judgment' * * * which appraisal of the fairness of a plan of reorganization entails." The orders of the District Courts were reversed and the proceedings remanded to the Interstate Commerce Commission for further action. It is significant that the opinions of both Courts were predicated upon a lack of finding of values in the plans of all properties involved in the reorganization, the duty of determining which under Section 77(e) rests on the Commission and not on the Court. To assert that the two opinions are inconsistent one with the other, and, therefore, in conflict, is to assume an argument not consonant with the principles upon which those decisions were founded and, consequently, comes within the realm of speculation and conjecture.

3.

INTERSTATE COMMERCE COMMISSION IS UNDER SPECIFIC STATUTORY MANDATE TO DETERMINE VALUE OF DEBTOR'S PROPERTY

Under Section 77B (11 U. S. C. § 207) the duty of determining value of the debtor's estate is left with the District Courts. This determination is a condition precedent to the approval of a plan, without which the Court would be unable "to exercise the 'informed, independent judgment' which appraisal of the fairness of a plan of reorganization entails." Likewise, in Section 77, a similar duty is imposed upon the Interstate Commerce Commission "so that criteria will be available to determine an appropriate allocation of new securities between bondholders and stockholders in case there is an equity

remaining after the bondholders have been made whole." *Consolidated Rock Products Co. v. DuBois, supra.* By statute (Subsection (e) of Section 77) the Commission is under a specific duty "to determine the value of any property for any purpose under this section." Absent such a determination it is difficult to comprehend how a fair and equitable plan could otherwise be evolved so that the rights and interests of creditors and stockholders would be protected.

4.

NO CONFLICT IN DECISIONS

Petitioners have flooded their petitions with many cases offered for the purpose of establishing a conflict with the decision of the Circuit Court of Appeals for the Ninth Circuit. Suffice it to repeat, not a single opinion in the cases cited as reasons for the granting of the writ of certiorari is in anywise inconsistent with the grounds upon which the case at issue was decided. These very cases upon which petitioners rely to show a conflict respondent relies, in the main, to show there is no conflict. Emphasis is laid upon the decisions of this Court in *Consolidated Rock Products Co. v. DuBois, supra,* and *Case v. Los Angeles Lumber Products Co., supra,* as authorities for supporting some possible grounds for warranting this Court in granting their petitions for the writ. We are satisfied from what has been stated above that the decision of the Circuit Court of Appeals for the Ninth Circuit is in no respects in conflict with these opinions. It is well settled that the decisions of this Court in *Northern Pacific Ry. v. Boyd,* 228 U. S. 482 (1913) and *Kansas City Terminal R. Co. v. Central Union*

Trust Co., 271 U. S. 445 (1926), and cited by the petitioners, established the doctrine and reasoning enunciated by this Court in *Louisville Trust Co. v. Louisville, N. A. & C. R. Co.*, 174 U. S. 683, 684, that "any arrangement of the parties by which the subordinate rights and interests of the stockholders are attempted to be secured at the expense of the prior rights of either class of creditors comes within judicial denunciation." Thus it will be readily apparent to this Court that these cases, rather than conflict with the decision of the Circuit Court of Appeals for the Ninth Circuit, are on all fours with it.

No attempt will be made to burden this Court by a needless reference to the decisions of the several Federal District Courts and the reports of the Interstate Commerce Commission in the many citations offered by the petitioners. Besides being satisfied that there is no conflict of decisions affecting the issues in the case at bar, we respectfully submit that these questions of federal law were considered and affirmed by this Court in its decision and opinion in *Consolidated Rock Products Co. v. DuBois, supra,* which was a review and affirmation of the decision of this Circuit Court of Appeals. These questions of federal law so answered with finality are the only ones of substance involved in this case.

5.

CONCLUSION

It is respectfully submitted that no grounds for certiorari are presented in the petitions; that the decision of the Court below reversing the Order of the District Court approving the Plan of Reorganization of The Western Pacific Railroad Company, Debtor, was in accordance with the requirements of

Section 77 of the Bankruptcy Act (11 U. S. C. § 205); that there is no special or important reason for granting the petitions for certiorari and that they should be denied.

Respectfully submitted,

EDWARD G. BUCKLAND,
WILLIAM J. KANE,
Attorneys for the Railroad Credit Corporation, Respondent.

Dated: January 16, 1942.

Petitioners,

vs.

A. C. JAMES CO., and others,

Respondents.

BRIEF OF A. C. JAMES CO., RESPONDENT, IN OPPOSITION TO PETITIONS FOR WRIT OF CERTIORARI.

To the Honorable the Chief Justice and the Associate Justices of the Supreme Court of the United States:

These are separate applications by the Institutional Bondholders Committee and by the Trustees of the First Mortgage of the Debtor for a writ of certiorari to review

a decree of the United States Circuit Court of Appeals for the Ninth Circuit entered November 28, 1941, reversing an order of the United States District Court for the Northern District of California, Southern Division (Tr. 1600).

The District Court in a proceeding under Section 77 of the Bankruptcy Act for the reorganization of The Western Pacific Railroad Company, the Debtor, had approved a plan of reorganization certified to it by the Interstate Commerce Commission. Respondent, A. C. James Co., together with other parties in interest, appealed from the decision of the District Court. Upon such appeal the Circuit Court of Appeals for the Ninth Circuit entered the decree here sought to be reviewed, reversing the action of the District Court and remanding the proceeding to the District Court with directions to dismiss it or, in the Court's discretion, and on motion of any party in interest, to refer it back to the Commission for further action.

Petitions for rehearing as to the decree, here sought to be reviewed by this Court, were filed with the Circuit Court of Appeals for the Ninth Circuit on December 19, 1941, by Irving Trust Company, as Trustee under the General and Refunding Mortgage of the Debtor, and by counsel for the Debtor on December 23, 1941. These petitions for rehearing are, as we are presently advised, still pending before that Court.

Opinions Below

The opinion of the Circuit Court of Appeals, dated November 28, 1941 (Tr. 2663), reversing the District Court, has not yet been officially reported. For the convenience of the Court this opinion is printed in the appendix to this brief. The opinion of the District Court

is reported at 34 F. Supp. 493 and printed at pages 1569 to 1600 of the Transcript.

Status of Respondent, A. C. James Co.

This respondent, A. C. James Co., is a secured creditor of the Debtor in the principal amount of $4,999,800. With accrued and unpaid interest to January 1, 1939, its claim amounted to $6,249,750. The debentures which originally represented the claim were acquired by the respondent at public offerings in 1931 and 1932 and payment was made for such securities in cash at 100 cents on the dollar for the principal amount of the loan. The collateral notes which now represent the claim were received in exchange for the debentures in 1932 and are secured by General and Refunding Mortgage Bonds of the Debtor (Tr. 1084-5). Both the secured notes and the General and Refunding Mortgage Bonds were approved by the Interstate Commerce Commission under Section 20(a) of the Interstate Commerce Act at the time they were acquired by respondent. The funds advanced by this respondent were used by the Debtor for the construction of its Northern California Extension, a line connecting the lines of the Debtor with those of the Great Northern Railway Company. The operation of this Northern California Extension has largely and progressively increased the earning power of the Debtor (Tr. 1077-1078).

Under the plan of reorganization for the Debtor, which was certified by the Commission to the District Court, the secured claim of this respondent was recognized only in part. Taking the value of common stock without par value at $57.00 per share, the basis on which it was allocated to First Mortgage bondholders under the proposed plan,

approximately 58% of the claim of respondent was cancelled and not funded under the proposed plan of reorganization. Even at a value of $100 per share for the common stock without par value (a basis sometimes referred to by the Commission in its Reports) approximately 33% of the claim of respondent was cancelled and not funded.

The Commission found that the securities given the respondent were inadequate to satisfy its claim (Tr. 269) but it did not find the extent of the deficiency and it made no definite finding as to the value of the proposed common stock without par value or of the value of the equity represented by such common stock without par value. The Commission made no finding of value of the Debtor's property as a whole nor of the part of it subject to the lien of the General and Refunding Mortgage. The Commission and the District Court also failed to make findings as to other important matters, without which findings the fairness of the plan cannot be determined.

Limited Scope of Decision Below

The proposed plan of reorganization before the District Court was not a plan agreed upon by the parties in interest. It was formulated by the Bureau of Finance of the Interstate Commerce Commission, and promulgated by the Commission. It has not yet been submitted to the creditors for a vote of acceptance or rejection as required by Section 77 of the Bankruptcy Act.

Moreover, the decree of the Circuit Court of Appeals is, in a basic sense, interlocutory and preliminary only. The appeals from the decision of the District Court, which were filed by this respondent and other parties at interest,

raised a number of substantive and important questions with relation to the proposed plan, including questions as to the respective coverage of the liens of the First Mortgage and of the General and Refunding Mortgage of the Debtor, questions as to discrimination as between classes of secured creditors, and questions as to the preferential treatment of the Reconstruction Finance Corporation under the proposed plan. None of these questions were considered or passed upon by the Circuit Court of Appeals for the Ninth Circuit.

The reports and orders of the Interstate Commerce Commission, and the order of the District Court, approving the proposed plan, had been rendered prior to the issuance by this Court of its opinion in *Consolidated Rock Products Co.* v. *Du Bois*, 312 U. S. 510, enunciating certain general principles applicable to corporate reorganizations, including the requirement that appraisal of the fairness of a plan of reorganization be based upon adequate valuation data and clear and definite findings.

The Circuit Court of Appeals for the Ninth Circuit, in the decree here sought to be reviewed, held that the Commission had failed to make the necessary valuation findings and factual determinations which would enable the Court to properly consider and pass upon the question whether the plan was fair and equitable as against the objections urged before it.

The crux of the decision here sought to be reviewed is set forth in the following language (Appendix, p. xiv):

> "Lacking the requisite valuation data, the court was in no position to exercise the 'informed, independent judgment' which appraisal of the fairness of a plan of reorganization entails. Consolidated Rock Products Co. v. Du Bois, supra. See, also,

National Surety Co. v. Coreill, 289 U. S. 426, 436; First National Bank v. Flershem, 290 U. S. 504, 525; Case v. Los Angeles Lumber Products Co., 308 U. S. 106, 115. Therefore, instead of approving the plan, the court should have entered an order dismissing the proceeding or, in its discretion and on motion of any party in interest, referring the proceeding back to the Commission for further action."

In language and in substance, the decision of the Circuit Court of Appeals, here sought to be reviewed, follows the clear and complete statement of principles laid down by this Court in *Consolidated Rock Products Co.* v. *Du Bois*, 312 U. S. 510, 520. The decision entered by this Court on December 22, 1941 in *National Labor Relations Board*, v. *West Virginia Electric & Power Co.*, 62 Sup. Ct. 344, remanding a proceeding to an administrative agency for clear and adequate findings as to essential factual elements, is closely analogous.

Summary of Argument.

In this brief we seek to confine ourselves to a statement of the reasons why this Court should deny certiorari. Substantial portions of the petitions for certiorari and briefs, especially that on behalf of the Institutional Bondholders Committee, seem to us irrelevant upon the question whether a writ of certiorari should issue, and we refrain from discussion of such matters.

We do not, for instance, enter into any discussion of the merits or demerits of the proposed plan of reorganization which was certified to the District Court by the Commission. Suffice it to say that, if the Commission had supported the proposed plan by definite determinations, consistent with the proposed plan, of the prospective earn

ing power of the Debtor's property and of its value based on such earning power (which it clearly failed to do), such determinations would already have been proved inaccurate by the demonstrated earning power of the property, and this not solely because of war conditions but, for the most part, because the construction of the Northern California Extension, referred to above, the building of the Dotsero Cut-off, and certain other definite factors, have completely changed the economic status of the property and greatly increased its real earning power.

We shall here discuss primarily the following propositions:

1. The decision below is not in conflict with any decision of another Circuit Court of Appeals, or with decisions of this Court.

2. The decision below does not raise for the first time any important questions of Federal law or public importance, but, on the contrary, is well within the principles clearly enunciated by this Court, in affirming the Ninth Circuit in the *Consolidated Rock Products Co.* case, which are, in respects herein involved, as applicable to a proceeding under Section 77 of the Bankruptcy Act as to a proceeding under Chapter X of the Bankruptcy Act.

3. A consideration by this Court of the decree below is definitely premature since (a) the proposed plan under consideration by the Commission and the District Court has not yet been submitted to the creditors for a vote of acceptance or rejection under Section 77, and may never become effective, and (b) a consideration of all aspects of the plan would require this Court to review a record of 2,677 pages and many questions, including questions of local law, which have not yet been passed upon by the courts below.

4. The assessing of costs of appeal by the Circuit Court of Appeals against the appellees below, stressed by both petitioners herein as a ground for review, is not a matter of public interest, is in harmony with normal appellate procedure and the recoupment of such costs by the petitioners is adequately provided for under Section 77 of the Bankruptcy Act.

POINT I.

The decision below is not in conflict with any decision of another Circuit Court of Appeals, or with decisions of this Court.

At the outset it should be noted that the Commission reports of October 10, 1938 and of June 21, 1939 approving a proposed plan of reorganization for the Debtor were formulated and released before the decision of this Court in *Consolidated Rock Products Co.* v. *Du Bois, supra,* and before the decision of this Court in *Case v. Los Angeles Lumber Products Co., Ltd.*, 308 U. S. 106. Also it should be noted that the order of the District Court approving the proposed plan in this proceeding was made before the decision of this Court in the *Consolidated Rock Products Co.* case.

We have not examined the records in the numerous proceedings under Section 77 of the Bankruptcy Act, referred to in the petition and brief on behalf of the Institutional Bondholders Committee as having been approved by District Courts. We find it difficult, however, to accept the rather dramatic language used in the brief of the First Mortgage Trustees (p. 14) that the decision of the Circuit Court of Appeals in the instant case "fell like a bombshell." It had, we think, been entirely clear to all persons

concerned with railroad reorganizations under Section 77 that those plans which had been certified by the Interstate Commerce Commission prior to the decisions of this Court in *Case* v. *Los Angeles Lumber Products Co., Ltd. supra,* and *Consolidated Rock Products Co.* v. *Du Bois, supra,* failed to meet the standards as to recognition of absolute priorities and definite findings of value required by the above-mentioned decisions of this Court. The decision of the Circuit Court of Appeals in the instant case was not only necessary but was inevitable.

We are advised that the issue of inadequate findings has been passed upon by a Circuit Court of Appeals in connection with only one other proposed plan for the reorganization of a railroad under Section 77 of the Bankruptcy Act. *In the Matter of Chicago, Milwaukee, St. Paul & Pacific Railroad Co., Debtor,* not yet reported.

The Circuit Court of Appeals for the Seventh Circuit in its opinion of December 4, 1941, in that case arrived at the identical result reached by the Ninth Circuit in the instant case. The plan of reorganization there under consideration was remanded to the District Court and to the Commission for necessary findings.

After pointing out that the Commission did not, at the time of its report, have available for its guidance the decision of the Supreme Court in *Consolidated Rock Products Co.* v. *Du Bois, supra,* the Circuit Court of Appeals for the Seventh Circuit said, at pages 19 to 20 of its opinion:

> "As to the necessity and character of the findings, the Court in the Consolidated Rock Products case spoke and the rule it announced applies to the I. C. C. in railroad reorganization as fully as it applies to the District Court in other reorganization cases. Save as

modified by Sec. 77 (e) the Commission should follow the opinion in that case.

"In the report of the Commission there is a discussion of the various factors which were deemed pertinent in its inquiry into values. Absent, however, were clear cut findings or values which are so essential to the intelligent approval of the plan. Our criticism is not directed to the fact that the findings were embodied in the Commission's report (a large part of which is devoted to a discussion and statement of the evidence) rather than stated specifically as findings. But the fault lies in the fact that we are left uncertain, or in the dark, as to the finding of the Commission. The evidence might support a finding of a larger or a smaller amount. Which should we accept? The fact finding body is the I. C. C. It must find. We cannot.

"Somewhat similar was the situation in the case of *Smith* v. *Illinois Bell Telephone Company*, 282 U. S. 162, a case which arose from a three judge district court in this circuit. In the absence of specific findings the Supreme Court set aside the decree and remanded the cause to make the necessary and appropriate findings. It refused to accept the conclusions of the District Court as inferential expressions of its fact conclusions. See also, *Public Service Commission* v. *Wisconsin Telephone Co.*, 289 U. S. 67; *United States* v. *Magnolia Petroleum Co.*, 276 U. S. 160, and *Universal Battery Co.* v. *U. S.*, 281 U. S. 580.

"The explicit holding of the Consolidated Rock Products case is so mandatory that further discussion is unnecessary. We can not accept the Commission's discussion of the evidence as a finding. Nor may we make findings, save where there is no dispute, or dispute is not serious, in order to sustain the plan."

While the petitioners have sought in their briefs to spell out a conflict between the decision here sought to be re-

viewed and the decision of the Seventh Circuit in the *Chicago, Milwaukee, St. Paul & Pacific Railroad Company* case, as well as with the *Consolidated Rock Products Company* case, itself, they are forced in this effort to superimpose some ingenious and extraordinary glosses on the language of the opinion of the Circuit Court of Appeals for the Ninth Circuit in the instant case. As a matter of fact, the language used in the Ninth Circuit opinion, here sought to be reviewed, follows almost verbatim the language used as to findings and determinations of value in the opinion rendered by this Court in *Consolidated Rock Products Co.* v. *Du Bois, supra.*

As an example of the extent to which the petitioners strained to create an appearance of conflict, note petitioners' attempt (Pet. No. 819 at pp. 30, 33; Pet. No. 820 at pp. 2, 8) to read into the decision of the Ninth Circuit a repudiation of the doctrine of absolute priority, in claimed conflict with the doctrines of *Northern Pacific Railway Company* v. *Boyd*, 228 U. S. 482, as amplified and applied in *Case* v. *Los Angeles Lumber Products Co., supra*, and *Consolidated Rock Products Co.* v. *Du Bois, supra.* As a matter of fact, the doctrine of absolute priority as laid down by this Court was accepted in its full scope by every party before the Circuit Court in the instant proceeding, and nothing in the opinion questions the rule.

The petitioners seek to characterize the Ninth Circuit requirement of adequate findings of value, both for the purpose of capitalization of the Debtor and for the allocation of new securities, as requiring "a precise mathematical formula based upon exact dollar values" (Pet. No. 820, p. 7) and would hold it inconsistent with the identical requirement of adequate findings in the *Consolidated Rock Products Co.* case. The conflict is illusory. The peti-

tioners establish only that the Commission's doctrine of "equitable equivalent" (Tr. 316; Pet. No. 819, p. 32; Pet. No. 820, p. 5) is wholly inconsistent with the requirement of adequate findings and determinations announced by this Court.

How the Commission can make the valuations which it is expressly empowered to make under Section 77 without expressing such values in dollars, and how, even though earning power be given primary weight, this dispenses with the dollar yardstick, is not clear. Even estimates of earning power must necessarily be expressed in dollars and cents. The fact is, that in financial reorganizations one is necessarily dependent on the dollar yardstick, and no amount of esoteric phrasing will establish that the simple requirement of necessary determinations of value by the Commission involves a disregard of the priorities rule.

An examination of the opinion of the Ninth Circuit, here sought to be reviewed, in comparison with the opinion of the Seventh Circuit in the *Milwaukee* case, discloses only one possible difference of view between the two forums. That difference, if it exists, is not important or material for present purposes, and could not serve as a proper basis for reversing either decree. The Ninth Circuit, in the instant case, states as a reason for requiring a valuation by the Commission of the properties, as a whole, of the Debtor, the need for determining whether the equity may fairly and equitably participate in the reorganization. The Circuit Court of Appeals in the Seventh Circuit, in the *Chicago, Milwaukee, St. Paul & Pacific Railroad Company* case, apparently accepts as adequate for its consideration of the plan before it, so far as the equity is concerned, findings by the Commission that such stock

is without value and seeks findings as to valuation of property only for the purpose of determining the interests of the various classes of creditors.

There is no necessary or inherent conflict of view between the two courts, even though the Circuit Court for the Ninth Circuit has asked for findings covering all essential elements of valuation prior to its consideration of any phase of the plan. In the case before the Ninth Circuit, it is obvious that the Commission must value the properties of the Debtor as a whole before the cancellation and rejection of a part of the claim of this respondent, a secured creditor, can be sustained by the courts as fair and equitable under the principles laid down in *Consolidated Rock Products Co.* v. *Du Bois, supra.* This phase of the problem the petitioners studiously ignore. In no event could this Court reverse the Circuit Court of Appeals for the Ninth Circuit as to the necessity for findings of value with reference to the treatment of this secured creditor, without reversing in part the doctrines which it has heretofore laid down clearly and explicitly in the *Consolidated Rock Products Co.* case.

Since each of the Circuit Courts of Appeals have decided that the analogous cases before them must go back to the Commission for lack of essential determinations of the value of the properties of the respective debtors, it matters little what minor differences of view they may have indicated as to the extent of inadequacy of the findings of the Commission shown by the respective records before them. This is not the sort of conflict which would properly invoke discretionary review by this Court.

A further alleged ground of conflict with the decisions of other Circuit Courts of Appeals and with decisions of

this Court is sought to be spelled out from the language used in the opinion of the Circuit Court of Appeals for the Ninth Circuit, as follows (Appendix, p. xvi):

> "In determining whether a plan of reorganization satisfies the requirements of subsection (e), the court is not concluded by any determination made by the Commission, but may, and must, exercise its own independent judgment; and this is true whether such determination relates to value or to some other subject. Initially, however, the duty of determining the value of any property for any purpose under §77 rests on the Commission, not on the court."*

The doctrine there laid down by the Circuit Court of Appeals for the Ninth Circuit differs only in phrasing from the doctrine laid down by the Circuit Court of Appeals for the Seventh Circuit in its opinion in the *Chicago, Milwaukee, St. Paul & Pacific Railroad Company* case, as follows (at p. 19):

> "It would be begging the question to assume that findings were necessarily made by the I. C. C. when the allocation was made. We would be delegating to the I. C. C. an obligation which is ours. The Commission must formulate its plan. It must make fact findings supported by the evidence upon which its plan is based. We must independently determine whether the plan is fair and equitable. In reaching our conclusion we must ascertain (a) whether there is evidence sufficient to support the findings and (b) we must be able to say that the findings support the plan, and (c) the plan is fair and equitable."

Under the long-established practice of this Court, such general expressions in an opinion are to be read in con-

---

* Each of the petitioners quotes this paragraph in part and omits the last sentence (Pet. No. 819, p. 23; Pet. No. 820, p. 9).

nection with the facts of the case and, except in such connection, are not controlling. *Cohens* v. *Virginia*, 6 Wheat. 264, 299; *Rathbun* v. *United States*, 295 U. S. 602, 627. When read in the light of the facts, the purport of the two statements is clear. Both are directed primarily to the basic requirement that the court, in determining whether a plan is fair and equitable, shall exercise an independent judgment. *Case* v. *Los Angeles Lumber Products Co., supra*; Bankruptcy Act, Sec. 77(e).

Even if the two statements may be taken as representing a difference of emphasis in the two circuits, one can scarcely invoke with propriety a review by this Court of extended records in complicated reorganization proceedings on the theory that two circuits may, at a later stage of each proceeding, when the Commission has made actual determinations as to the value of the properties of the Debtor, differ as to the weight to be given to the administrative findings. The problem is governed by the express provisions of Section 77 and this Court has heretofore expressed itself in numerous cases with complete definiteness and clarity as to the weight to be attributed to a finding of an administrative board as to a factual matter expressly referred to it by Congress. This Court may fairly assume that doctrines it has laid down will be followed by all Circuit Courts of Appeals dealing with proceedings under Section 77 of the Bankruptcy Act.

POINT II.

The decision below does not raise for the first time any important questions of Federal Law or public importance, but, on the contrary, is well within the principles clearly enunciated by this Court in affirming the Ninth Circuit in *Consolidated Rock Products Co.* v. *Du Bois*, which are, in the respects herein involved, as applicable to a proceeding under Section 77 of the Bankruptcy Act as to a proceeding under Chapter X of the Bankruptcy Act.

While it may be conceded that Section 77 of the Bankruptcy Act has not yet been fully construed by this Court in all its aspects, the question specifically decided by the Circuit Court of Appeals for the Ninth Circuit in the decision sought to be reviewed is not a question peculiar to Section 77 of the Bankruptcy Act, nor a question as to which if may fairly be said that there are not clear and definite rules of law laid down in prior decisions of this Court. Incidental to the growth of administrative tribunals during the past few decades, this Court has necessarily laid down at length the procedural requirements which must be met by administrative agencies in exercising fact-finding functions where private rights are fundamentally affected. *United States* v. *Chicago, Milwaukee, St. Paul & Pacific Railway Co.*, 294 U. S. 499; *Florida* v. *United States*, 282 U. S. 194; *Beaumont, Sour Lake & Western Railway Company* v. *United States*, 282 U. S. 74; *Interstate Commerce Commission* v. *Louisville and Nashville Railroad Company*, 227 U. S. 88.

Nothing can be clearer than that this Court has repeatedly and emphatically imposed upon administrative agencies, dealing with questions of the type dealt with

by the Interstate Commerce Commission in the instant proceeding, the rule that no amount of discussion or generalization can take the place of definite findings. Neither general conclusions in the language of the statute nor a choice between conflicting inferences will suffice. *United States* v. *Chicago, Milwaukee, St. Paul & Pacific Railway Co., supra*; *Florida* v. *United States, supra*; *Universal Battery Company* v. *United States*, 281 U. S. 580; *Smith* v. *Illinois Bell Telephone Company*, 282 U. S. 133.

District Courts are also required to act upon the basis of explicit findings as to essential facts. *Mayo* v. *Lakeland Highlands Canning Co.*, 309 U. S. 310; *Interstate Circuit, Inc.* v. *United States*, 304 U. S. 55; *Borden's Co.* v. *Baldwin*, 293 U. S. 194; *Public Service Commission of Wisconsin* v. *Wisconsin Telephone Company*, 289 U. S. 67; *Consolidated Rock Products Co.* v. *Du Bois, supra*; Rule 52, Rules of Civil Procedure.

A party to a proceeding, like the respondent here (a secured creditor), who finds a part of his claim confiscated, is entitled to know precisely and definitely the basis upon which this is done.

This Court should not exercise its discretionary right of review to bring before it the question whether a Circuit Court of Appeals may properly send back a proceeding to an administrative body with a request for definite findings upon questions essential to the sound determination of the legal issues presented.

POINT III.

A consideration by this Court of the decree below is definitely premature since (a) the proposed plan under consideration by the Commission and District Court has not yet been submitted to the creditors for a vote of acceptance or rejection under Section 77, and may never become effective, and (b) a consideration of all aspects of the plan would require this Court to review a record of 2,677 pages and many questions, including questions of local law, which have not yet been passed upon by the courts below.

Petitioners urge strongly that a speedy reorganization of the Debtor will be facilitated if this Court now reviews the reorganization proceeding upon the whole record (Pet. No. 819, pp. 40-43). Their contention is buttressed by a claim that the parties whom they characterize as "junior interests" have set up obstacles to a rapid reorganization. It seems unnecessary to make detailed answer to this suggestion of unnecessary delay since the recital of the proceedings contained in the brief of the Institutional Bondholders Committee shows that that Committee participated with other creditors in filing objections to the Commission's plan at each stage before the Commission and in the District Court, and only supported the plan in its entirety when it reached the Circuit Court of Appeals for the Ninth Circuit, where the basic objections of the so-called "junior interests" have been sustained.

Actually the reorganization of the Debtor can be expedited only by an immediate return of the proceeding to the Commission for the findings which are required by the general principles applicable to all reorganizations as laid down by this Court in *Consolidated Rock Products Co.* v.

Du Bois, supra. It is quite true that the Circuit Court of Appeals has failed to consider or pass upon numerous questions involved in the proceeding, including questions of local law. The position of the Circuit Court of Appeals is that, until the Commission has performed the task, expressly imposed upon it by Section 77, of making the requisite determinations as to the valuation of the property in its entirety and in its separate segments, the Court cannot go forward upon the task imposed upon it by Section 77.

As pointed out above, this conclusion of the Circuit Court of Appeals, as set forth in its decision, is entirely in accord with the well established principles enunciated by this Court in *Consolidated Rock Products Co.* v. *Du Bois, supra,* and *National Labor Relations Board* v. *West Virginia Electric & Power Company, supra.*

Many of the questions involved in a final determination of the fairness and equity of a plan require complicated factual determinations and some are questions of purely local law. There are, for instance, real and substantial questions involved in the proceeding as to the coverage of the First Mortgage and the General and Refunding Mortgage, respectively. These questions will, in normal course, be considered and passed upon by the District Court, after determinations and findings of value have been made by the Commission as to the properties in question. Only after the plan of reorganization has had full consideration by the Commission, by the District Court, and by the Circuit Court of Appeals, should a party to the proceeding be given leave to call upon this Court for a determination as to whether or not the Commission and the District Court, to whom primary jurisdiction is given by the statute, have failed in their statutory duties.

There is a further reason why review of this proceeding by this Court is necessarily premature. The plan under consideration in the reorganization proceeding has never been submitted to the creditors for a vote of acceptance or rejection as is specifically required by the express terms of Section 77(e) of the Bankruptcy Act. Under the statutory provisions a plan is necessarily inchoate prior to acceptance by the necessary percentage of creditors.

For this Court to remove from the normal course of orderly procedure and assume the burden of detailed consideration of an extended record as to a reorganization proceeding solely because a Circuit Court of Appeals has required further findings from an administrative agency, would be for this Court to assume, without compelling reason, the functions normally delegated to the inferior courts. *American Construction Company v. Jacksonville, Tampa and Key West Railway Company*, 148 U. S. 372, 384; *Hanover Star Milling Company* v. *Metcalf*, 240 U. S. 403, 408, 409.

POINT IV.

The assessing of costs of appeal by the Circuit Court of Appeals against the appellees below, stressed by both petitioners herein as a ground for review, is not a matter of public interest, is in harmony with normal appellate procedure and the recoupment of such costs by the petitioners is adequately provided for under Section 77 of the Bankruptcy Act.

Each of the petitioners for certiorari in this proceeding stresses the assessment of costs by the Circuit Court of Appeals against the unsuccessful parties in that Court as a ground for review of the proceeding (Brief for In-

stitutional Bondholders, pp. 43-44; Petition of the First Mortgage Trustees, p. 10). It is somewhat difficult to believe that this ground for review is urged with complete seriousness. While the costs and expenses of reorganization proceedings, even prior to the enactment of Section 77, have been matters of concern to the courts (*United States* v. *Chicago, Milwaukee, St. Paul and Pacific Railroad Company*, 282 U. S. 311; *Dickinson Industrial Site, Inc.* v. *Cowan*, 309 U. S. 382, 388), and while the very enactment of Section 77 may well have been motivated in part by problems arising in that field, it is difficult to see how the normal judicial procedure as to the assessment of costs (*Kansas City Southern Railway Company* v. *Guardian Trust Company*, 281 U. S., 1, 9) can be a ground for granting certiorari in this proceeding at this stage.

The Institutional Bondholders Committee is not a committee representing an entire class of security holders. It represents a group of insurance companies and one bank, which hold, in the aggregate, 34% of the Debtor's First Mortgage Bonds. These institutions are seeking to promote, quite properly, their proprietary interests, as holders of First Mortgage Bonds of the Debtor, in opposition to the interests of the secured creditors, who hold General and Refunding Mortgage Bonds as collateral, and other parties at interest. Such a group of litigants, acting in their own special interests, should be assessed normal costs like any other litigant.

Moreover, in view of the stress which the brief for the Institutional Bondholders Committee places upon its public service in "defending Commission proposals" (Pet. No. 819, p. 43), it is of interest to note that the District Court has already allowed to the Institutional Bondholders Committee the sum of $64,190.91 for their expenses up to

November 1, 1939, in connection with these proceedings and with the proposed plan of reorganization, including $50,000 for counsel fees. (*In re. Western Pacific Railroad Company*, 34 F. Supp. 493, at page 508.)

As to the First Mortgage Trustees, they are in a real sense volunteers in the proceeding. They have, throughout this proceeding, cooperated with the Institutional Bondholders Committee and urged the contentions of that Committee. This course has been at all times without any mandate, express or implied, from the remaining 66% of the First Mortgage bondholders, not members of the Institutional Bondholders Committee.

Here again it should be noted, however, that the District Court has already allowed these First Mortgage Trustees the sum of $32,554.11 up to November 1, 1939, to reimburse them for their services and expenses in these proceedings and in connection with the proposed plan of reorganization. (*In re. Western Pacific Railroad Company*, 34 F. Supp. 493, at page 508.)

It cannot be assumed that the Commission and the Court will be less liberal in the future, than in the past, with these petitioners as to the expenses involved in their participation. Certainly it cannot be said that the jurisdiction of this Court may properly be invoked at this stage of the proceeding to protect these petitioners from a present payment of costs in the Circuit Court of Appeals.

IN CONCLUSION.

For the several reasons above stated, it seems clear: (a) That there is no conflict between the decision of the Circuit Court of Appeals for the Ninth Circuit and the decisions of other Circuit Courts of Appeals or decisions of this Court as to any of the issues involved in the

decision here sought to be reviewed; (b) that the decision of the Circuit Court of Appeals is clearly in conformity with established principles of reorganization law, laid down by this Court in *Consolidated Rock Products Co.* v. *Du Bois, supra*; and (c) that any consideration by this Court of the entire proceeding would be premature, unduly burdensome, and would postpone rather than accelerate a final reorganization of the Debtor.

We further submit that the Circuit Court of Appeals for the Ninth Circuit has acted with complete propriety in remanding the proceedings to the District Court and to the Commission for consideration under the principles laid down by this Court in *Consolidated Rock Products Co.* v. *Du Bois, supra,* in view of the fact that consideration by the Commission and the District Court of the instant case antedated that decision by this Court and that essential determinations of value were not made by the Commission.

We respectfully urge that the petitions for certiorari should be denied.

Dated, New York, N. Y., January 17, 1942.

Respectfully submitted,

ROBERT E. COULSON,
Attorney for A. C. James Co.,
Respondent.

HORACE E. WHITESIDE,
of Counsel.

APPENDIX

Bankruptcy Act, § 77 (11 U. S. C. § 205).

* * * * * * * * * *

"(d) The debtor, after a petition is filed as provided in subsection (a), shall file a plan of reorganization within six months of the entry of the order by the judge approving the petition as properly filed, or if heretofore approved, then within six months of August 27, 1935, and not thereafter unless such time is extended by the judge from time to time for cause shown, no single extension at any one time to be for more than six months. Such plan shall also be filed with the Commission at the same time. Such plans may likewise be filed at any time before, or with the consent of the Commission during, the hearings hereinafter provided for, by the trustee or trustees, or by or on behalf of the creditors being not less than 10 per centum in amount of any class of creditors, or by or on behalf of any class of stockholders being not less than 10 per centum in amount of any such class, or with the consent of the Commission by any party in interest. After the filing of such a plan, the Commission, unless such plan shall be considered by it to be prima facie impracticable shall, after due notice to all stockholders and creditors given in such manner as it shall determine, hold public hearings, at which opportunity shall be given to any interested party to be heard, and following which the Commission shall render a report and order in which it shall approve a plan, which may be different from any which has been proposed, that will in its opinion meet with the requirements of subsections (b) and (e) of this section, and will be compatible with the public interest; or it shall render a report and order in which it shall refuse to approve any plan. In such report the Commission shall state fully the reasons for its conclusions.

"The Commission may thereafter, upon petition for good cause shown filed within sixty days of the date of its order, and upon further hearings if the Commission shall deem necessary, in a supplemental report and order modify any plan which it has approved, stating the reasons for such modification. The Commission, if it approves a plan, shall thereupon certify the plan to the court together with a transcript of the proceedings before it and a copy of the report and order approving the plan. No plan shall be approved or confirmed by the judge in any proceeding under this section unless the plan shall first have been approved by the Commission and certified to the court.

"(e) Upon the certification of a plan by the Commission to the court, the court shall give due notice to all parties in interest of the time within which such parties may file with the court their objections to such plan, and such parties shall file, within such time as may be fixed in said notice, detailed and specific objections in writing to the plan and their claims for equitable treatment. The judge shall, after notice in such manner as he may determine to the debtor, its trustee or trustees, stockholders, creditors, and the Commission, hear all parties in interest in support of, and in opposition to, such objections to the plan and such claims for equitable treatment. After such hearing and without any hearing if no objections are filed, the judge shall approve the plan if satisfied that: (1) It complies with the provisions of subsection (b) of this section, is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders; (2) the approximate amounts to be paid by the debtor, or by any corporation or corporations

acquiring the debtor's assets, for expenses and fees incident to the reorganization, have been fully disclosed so far as they can be ascertained at the date of such hearing, are reasonable, are within such maximum limits as are fixed by the Commission, and are within such maximum limits to be subject to the approval of the judge; (3) the plan provides for the payment of all costs of administration and all other allowances made or to be made by the judge, except that allowances provided for in subsection (c), paragraph (12) of this section, may be paid in securities provided for in the plan if those entitled thereto will accept such payment, and the judge is hereby given power to approve the same.

"If the judge shall not approve the plan, he shall file an opinion, stating his conclusions and the reason therefor, and he shall enter an order in which he may either dismiss the proceedings, or in his discretion and on motion of any party in interest refer the proceedings back to the Commission for further action, in which event he shall transmit to the Commission a copy of any evidence received. If the proceedings are referred back to the Commission, it shall proceed to a reconsideration of the proceeding under the provisions of subsection (d) of this section. If the judge shall approve the plan, he shall file an opinion, stating his conclusions and the reasons therefor, and enter an order to that effect, and shall send a certified copy of such opinion and order to the Commission. The plan shall then be submitted by the Commission to the creditors of each class whose claims have been filed and allowed in accordance with the requirements of subsection (c) of this section, and to the stockholders of each class, and/or to the committees or other representatives thereof, for acceptance or rejection, within such time as the Commission shall specify, together with the report or reports of the Commission there-

on or such a summarization thereof as the Commission may approve, and the opinion and order of the judge; Provided, That submission to any class of stockholders shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding, (a) that at the time of the finding the corporation is insolvent, or that at the time of the finding the equity of such class of stockholders has no value, or that the plan provides for the payment in cash to such class of stockholders of an amount not less than the value of their equity, if any, or (b) that the interests of such class of stockholders will not be adversely and materially affected by the plan, or (c) that the debtor has pursuant to authorized corporate action accepted the plan and its stockholders are bound by such acceptance: Provided further, That submission to any class of creditors shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding, that the interests of such class of creditors will not be adversely and materially affected by the plan, or that at the time of the finding the interests of such class of creditors have no value, or that the plan provides for the payment in cash to such class of creditors of an amount not less than the value of their interests. For the purpose of this section the acceptance or rejection by any creditor or stockholder shall be in writing, executed by him or by his duly authorized attorney, committee, or representative. If the United States of America, or any agency thereof, or any corporation (other than the Reconstruction Finance Corporation) the majority of the stock of which is owned by the United States of America, is a creditor or stockholder, the interests or claims thereof shall be deemed to be affected by the plan, and the President of the United States or any officer or agency he may designate, is hereby authorized to act in respect of the interests or claims of the United States or of such agency

or other corporation. The expense of such submission shall be certified by the Commission and shall be borne by the debtor's estate. The Commission shall certify to the judge the results of such submission.

"Upon receipt of such certification, the judge shall confirm the plan if satisfied that it has been accepted by or on behalf of creditors of each class to which submission is required under this subsection holding more than two-thirds in amount of the total of the allowed claims of such class which have been reported in said submission as voting on said plan, and by or on behalf of stockholders of each class to which submission is required under this subsection holding more than two-thirds of the stock of such class which has been reported in said submission as voting on said plan; and that such acceptances have not been made or procured by any means forbidden by law: 'Provided, That, if the plan has not been so accepted by the creditors and stockholders, the judge may nevertheless confirm the plan if he is satisfied and finds, after hearing, that it makes adequate provision for fair and equitable treatment for the interests or claims of those rejecting it; that such rejection is not reasonably justified in the light of the respective rights and interests of those rejecting it and all the relevant facts; and that the plan conforms to the requirements of clauses (1) to (3), inclusive, of the first paragraph of this subsection (e): Provided further, That if, in any reorganization proceeding under this section, the United States is a creditor on claims for taxes or customs duties (whether or not the United States has any other interest in, or claim against, the debtor, as creditor or stockholder), no plan which does not provide for the payment thereof shall be confirmed by the judge except upon the acceptance, certified to the court, of a lesser amount by the President of the United States or the

officer or agency designated by him pursuant to the provisions of the preceding paragraph hereof: Provided further, That if the President of the United States or such officer or agency shall fail to accept or reject such lesser amount for more than ninety days after receipt of written notice so to do from the court, accompanied by a certified copy of the plan, the consent of the United States insofar as its claims for taxes or customs duties are concerned shall be conclusively presumed. If the judge shall confirm the plan, he shall enter an order and file an opinion with a statement of his conclusions and his reasons therefor. If the judge shall not confirm the plan, he shall file an opinion, with a statement of his conclusions and his reasons therefor, and enter an order in which he shall either dismiss the proceedings, or, in his discretion and on the motion of any party in interest, refer the case back to the Commission for further proceedings, including the consideration of modifications of the plan or the proposal of new plans. In the event of such a reference back to the Commission, the proceedings with respect to any modified or new plan shall be governed by the provisions of this section in like manner as in an original proceeding hereunder.

"If it shall be necessary to determine the value of any property for any purpose under this section, the Commission shall determine such value and certify the same to the court in its report on the plan. The value of any property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present, and prospective, and all other relevant facts. In determining such value only such effect shall be given to the present cost of reproduction new and less depreciation and original cost of the property, and the actual investment therein, as may be required under the law of the land, in light of its earning power and all other relevant facts."

Appellees.

APPEALS FROM THE DISTRICT COURT OF THE UNITED STATES FOR THE NORTHERN DISTRICT OF CALIFORNIA, SOUTHERN DIVISION.

Before DENMAN, MATHEWS and STEPHENS, Circuit Judges.

MATHEWS, Circuit Judge:

These appeals are from an order of the District Court[1] which, in a proceeding by The Western Pacific Railroad Company, a railroad corporation (hereafter called the debtor), under § 77 of the Bankruptcy Act, 11 U.S.C.A. § 205, approved a plan of reorganization which had been approved and certified to the court by the Interstate Commerce Commission.[2] The debtor has outstanding:

1. Trustees' certificates issued pursuant to paragraph (3) of subsection (c) of § 77 in the principal sum of $10,000,000. These certificates are owned and held by Reconstruction Finance Corporation.[3]

2. First mortgage 5% bonds dated June 26, 1916, due March 1, 1946, in the principal sum of $49,290,100, with accrued and unpaid interest thereon of $13,143,776—a total of $62,433,876—secured by a mortgage (hereafter called the first mortgage) of which Samuel Armstrong and Crocker First National Bank of San Francisco are trustees.

3. General and refunding mortgage 5% bonds (hereafter called refunding bonds) dated January 1, 1932, due January 1, 1957, in the principal sum of $18,999,500, secured by a mortgage (hereafter called the refunding mortgage) of which Irving Trust Company is trustee.[5] These bonds are pledged to secure payment of the notes hereafter mentioned. They have not been issued for any other purpose.

---

[2] 233 I.C.C. 409, 441-455.

[3] 122 F. 2d 807.

[4] As of January 1, 1939, the effective date of the plan.

[5] Irving Trust Company succeeded The Chase National Bank as trustee on November 13, 1936.

4. Notes in the principal sum of $2,963,000, with accrued and unpaid interest thereon of $899,870 — a total of $3,862,870—secured by the pledge of refunding bonds in the principal sum of $10,750,000 and other collateral. These notes are owned and held by Reconstruction Finance Corporation.

5. Notes in the principal sum of $2,445,610, with accrued and unpaid interest thereon of $146,503[6] — a total of $2,592,113—secured by the pledge of refunding bonds in the principal sum of $4,000,000 and other collateral. These notes are owned and held by Railroad Credit Corporation.

6. Notes in the principal sum of $4,999,800, with accrued and unpaid interest thereon of $1,249,950—a total of $6,249,750—secured by the pledge of refunding bonds in the principal sum of $4,249,500 and other collateral. These notes are owned and held by A. C. James Company.

7. Unsecured indebtedness to The Western Realty Company in the principal sum of $50,000, with accrued and unpaid interest thereon of $11,667—a total of $61,667.

8. Unsecured indebtedness to The Western Pacific Railroad Corporation (hereafter called the holding company) in the principal sum of $5,768,791, with accrued and unpaid interest thereon of $1,980,429—a total of $7,749,220.

9. Six per cent preferred stock of the par value of $28,300,000 (283,000 shares of the par value of $100 each) owned and held by the holding company.

10. Common stock of the par value of $47,500,000 (475,000 shares of the par value of $100 each) owned and held by the holding company.

---

[6] These are the Commission's figures (233 I.C.C. 452). They differ slightly from those mentioned in the court's opinion (34 F. Supp. 497).

The plan provides, in effect, that the above mentioned securities and obligations shall be canceled and that, in lieu thereof, the reorganized company[7] shall issue new first mortgage 4% bonds dated January 1, 1939, due January 1, 1974, in the principal sum of $10,000,000, secured by a new first mortgage; income mortgage 4½% bonds (hereafter called income bonds) dated January 1, 1939, due January 1, 2014, in the principal sum of $21,219,075, secured by a so-called income mortgage; new 5% preferred stock of the par value of $31,850,297 (318,502.97 shares of the par value of $100 each); and 319,441 shares of new common stock without par value. These securities are to be distributed as follows:

To Reconstruction Finance Corporation, $10,000,000 of the new first mortgage bonds,[8] $1,185,200 of income bonds, $1,777,800 of new preferred stock and 15,788 shares of new common stock;[9] to the holders of first mortgage bonds now outstanding, $19,716,040 of income bonds, $29,574,060 of new preferred stock and 230,593 shares of new common stock;[10] to Railroad Credit Corporation, $154,111 of in-

---

[7]The reorganized company may be the debtor or a new corporation to which all assets of the debtor shall be transferred.

[8]Thus the $10,000,000 of receivers' certificates now held by Reconstruction Finance Corporation would be exchanged for new first mortgage bonds, dollar for dollar.

[9]Thus, for each $1,000 of indebtedness evidenced by notes now held by it, Reconstruction Finance Corporation would receive $306.82 of income bonds, $460.12 of new preferred stock and 4.087 shares of new common stock.

[10]Thus, for each $1,000 of indebtedness evidenced by first mortgage bonds now outstanding, holders thereof would receive $315.79 of income bonds, $473.69 of new preferred stock and 3.693 shares of new common stock.

come bonds, $241,681 of new preferred stock and 35,425 shares of new common stock;[11] to A. C. James Company, $163,724 of income bonds, $256,756 of new preferred stock and 37,635 shares of new common stock.[12] The Western Realty Company and the holding company are excluded from participation in the reorganization.

Objections to the plan were filed by the debtor, the refunding mortgage trustee, the holding company, Railroad Credit Corporation, A. C. James Company, The Western Realty Company and a bondholders' committee[13] representing holders of some of the first mortgage bonds now outstanding. The objections were overruled and the plan was approved. The debtor, the refunding mortgage trustee, the holding company, Railroad Credit Corporation and A. C. James Company have appealed.

Neither the debtor nor the refunding mortgage trustee was adversely affected by the plan or by the order approving it. Hence neither of them was entitled to appeal. King v. Buttolph, 9 Cir., 30 F. 2d 769; Loomis v. Gila County, 9 Cir., 101 F. 2d 827; In re Western Pacific R. R. Co., 9 Cir., 122 F. 2d 807. Their appeals are therefore dismissed.

The holding company objected to the plan on the ground that it is not fair and equitable,[14] but is unfair and in-

---

[11]Thus, for each $1,000 of indebtedness evidenced by notes now held by it, Railroad Credit Corporation would receive $59.45 of income bonds, $93.24 of new preferred stock and 13.666 shares of new common stock.

[12]Thus, for each $1,000 of indebtedness evidenced by notes now held by it, A. C. James Company would receive $26.20 of income bonds, $41.08 of new preferred stock and 6.021 shares of new common stock.

[13]The committee consists of Frederick H. Ecker, John W. Stedman and Reeve Schley.

[14]Bankruptcy Act, § 77(e)(1), 11 U.S.C.A. § 205(e)(1).

equitable, in that it excludes the holding company from participation in the reorganization. The objection states that the debtor is not insolvent, but has property of a value greatly in excess of its liabilities. Obviously, if the statement is true, the holding company is entitled to participate in the reorganization, and its exclusion therefrom is unfair and inequitable. Thus, to determine the question raised by the holding company's objection, it was necessary to determine the value of the debtor's property as of the effective date of the plan—January 1, 1939. Consolidated Rock Products Co. v. Du Bois, 312 U. S. 510, 517-525.

Railroad Credit Corporation objected to the plan on the ground that it is unfair and inequitable, in that it discriminates unfairly in favor of Reconstruction Finance Corporation and the holders of first mortgage bonds now outstanding [15] A. C. James Company objected to the plan on the ground that it is unfair and inequitable, in that it discriminates unfairly in favor of Reconstruction Finance Corporation, Railroad Credit Corporation and the holders of first mortgage bonds now outstanding.[16]

That Reconstruction Finance Corporation, Railroad Credit Corporation, A. C. James Company and the holders of first mortgage bonds now outstanding should participate in the reorganization is conceded. Fairness requires that their participation should be in proportion to the value of their respective claims. The question raised by the objections of Railroad Credit Corporation and A. C. James Company was whether the plan complies with that requirement. To determine this question, it was necessary to determine, as of the effective date of the plan,

[15] See footnotes 8-11.
[16] See footnotes 8-12.

the value of (1) each of the claims of Reconstruction Finance Corporation,* (2) the claim of Railroad Credit Corporation, (3) the claim of A. C. James Company, (4) the claims of the holders of first mortgage bonds now outstanding, (5) the $10,000,000 of new first mortgage bonds, (6) the $21,219,075 of income bonds, (7) the 318,502.97 shares of new preferred stock and (8) the 319,441 shares of new common stock which the plan provides shall be distributed to said claimants.

To determine the value of the above mentioned claims, it was necessary to determine the value of (1) the debtor's entire property, (2) the property subject to the first mortgage now outstanding, (3) the $18,999,500 of refunding bonds pledged to secure the claims of A. C. James Company, Railroad Credit Corporation and Reconstruction Finance Corporation and (4) the other collateral pledged to secure each of said claims. To determine the value of the refunding bonds, it was necessary to determine the value of (1) the property subject to the refunding mortgage only and (2) the property subject both to the refunding mortgage and to the first mortgage now outstanding. This, of course, necessitated a determination as to which of the debtor's property is, and which is not, subject to each mortgage. Consolidated Rock Products Co. v. Du Bois, supra.

To determine the value of the new first mortgage bonds, income bonds, new preferred stock and new common stock mentioned above, it was necessary to determine the value of (1) the debtor's entire property, (2) the property which would be subject to the new first mortgage and (3) the property which would be subject to the income mortgage.

---

*Reconstruction Finance Corporation has two claims—one as holder of trustees' certificates, one as holder of the debtor's notes.

Subsection (e) of § 77 provides: "If it shall be necessary to determine the value of any property for any purpose under this section, the [Interstate Commerce] Commission shall determine such value and certify the same to the court in its report on the plan." In this case, as has been seen, it was necessary to determine the value of (1) the debtor's entire property, (2) each of the claims of Reconstruction Finance Corporation, (3) the claim of Railroad Credit Corporation, (4) the claim of A. C. James Company, (5) the claims of the holders of first mortgage bonds now outstanding, (6) the $10,000,000 of new first mortgage bonds, (7) the $21,219,075 of income bonds, (8) the 318,502.97 shares of new preferred stock, (9) the 319,441 shares of new common stock, (10) the property subject to the first mortgage now outstanding, (11) the $18,999,500 of refunding bonds pledged to secure the claims of Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James Company, (12) the other collateral pledged to secure each of said claims, (13) the property subject to the refunding mortgage only, (14) the property subject both to the refunding mortgage and to the first mortgage now outstanding, (15) the property which would be subject to the new first mortgage and (16) the property which would be subject to the income mortgage. It thus became the duty of the Commission to determine these values and certify them to the court. That duty was not performed.

Lacking the requisite valuation data, the court was in no position to exercise the "informed, independent judgment" which appraisal of the fairness of a plan of reorganization entails. Consolidated Rock Products Co. v. Du Bois, supra. See, also, National Surety Co. v. Coriell, 289 U. S. 426, 436; First National Bank v. Flershem, 290 U. S. 504, 525; Case v. Los Angeles Lumber

Products Co., 308 U. S. 106, 115. Therefore, instead of approving the plan, the court should have entered an order dismissing the proceeding or, in its discretion and on motion of any party in interest, referring the proceeding back to the Commission for further action.[18]

The District Court's opinion states (34 F. Supp. 501): "It cannot be gainsaid that the Commission knows all about the debtor, its property, its history, financial and otherwise, its traffic and revenue, and its financial structure. No official body in the country is better qualified by reason of experience, ability and specialized knowledge than is the Commission to find the ultimate facts as to the debtor in relation to any of the matters mentioned." The statement indicates a possible misconception. Subsection (e) of § 77 provides:

> "Upon the certification of a plan by the Commission to the court, the court shall give due notice to all parties in interest of the time within which such parties may file with the court their objections to such plan, and such parties shall file, within such time as may be fixed in said notice, detailed and specific objections in writing to the plan and their claims for equitable treatment. The judge shall, after notice in such manner as he may determine to the debtor, its trustee or trustees, stockholders, creditors, and the Commission, hear all parties in interest in support of, and in opposition to, such objections to the plan and such claims for equitable treatment. After such hearing, and without any hearing if no

[18] Subsection (e) of § 77 provides: "If the judge shall not approve the plan, he shall file an opinion, stating his conclusions and the reason therefor, and he shall enter an order in which he may either dismiss the proceedings, or in his discretion and on motion of any party in interest refer the proceedings back to the Commission for further action . . ."

objections are filed, the judge shall approve the plan if satisfied that: (1) It complies with the provisions of subsection (b) of this section, is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders; (2) the approximate amounts to be paid by the debtor, or by any corporation or corporations acquiring the debtor's assets, for expenses and fees incident to the reorganization, have been fully disclosed so far as they can be ascertained at the date of such hearing, are reasonable, are within such maximum limits as are fixed by the Commission, and are within such maximum limits to be subject to the approval of the judge; (3) the plan provides for the payment of all costs of administration and all other allowances made or to be made by the judge . . ."

In determining whether a plan of reorganization satisfies the requirements of subsection (e), the court is not concluded by any determination made by the Commission, but may, and must, exercise its own independent judgment; and this is true whether such determination relates to value or to some other subject. Initially, however, the duty of determining the value of any property for any purpose under § 77 rests on the Commission, not on the court.

Order reversed and proceeding remanded with directions to dismiss it or, in the court's discretion and on motion of any party in interest, refer it back to the Commission for further action.

(Endorsed:) Opinion. Filed Nov. 28, 1941. Paul P. O'Brien, Clerk.

No. 819 No. 820

In the Matter of
THE WESTERN PACIFIC RAILROAD COMPANY
(a corporation), Debtor.

FREDERICK H. ECKER, JOHN W. STEDMAN and REEVE SCHLEY, constituting the INSTITUTIONAL BONDHOLDERS COMMITTEE,
Petitioners,

vs.

WESTERN PACIFIC RAILROAD CORPORATION
(a corporation), et al., *Respondents.*

CROCKER FIRST NATIONAL BANK OF SAN FRANCISCO and SAMUEL ARMSTRONG, as Trustees under the First Mortgage of The Western Pacific Railroad Company (a corporation), dated June 26, 1916, *Petitioners,*

vs.

WESTERN PACIFIC RAILROAD CORPORATION
(a corporation), et al., *Respondents.*

BRIEF OF THE WESTERN PACIFIC RAILROAD CORPORATION IN OPPOSITION TO PETITIONS OF FREDERICK H. ECKER ET AL. CONSTITUTING THE INSTITUTIONAL BONDHOLDERS' COMMITTEE, AND OF CROCKER FIRST NATIONAL BANK ET AL., AS TRUSTEES, FOR WRITS OF CERTIORARI.

Two petitions for certiorari have been filed, one by the Institutional Bondholders' Committee and the other by the Trustees under The Western Pacific Railroad Company's First Mortgage. The two petitions raise substantially the same points, and the second, in large part, refers to, and relies upon, the first. In this brief, therefore, we shall seek to oppose both petitions.

The Western Pacific Railroad Corporation, which presents this brief, is the owner of substantially all the unsecured claims against the debtor, and is the holder of all the stock, preferred and common, of the debtor. By the Plan of Reorganization it is excluded, in each of these capacities, from participation in the reorganized company.

GROUNDS OF THE PETITIONS FOR CERTIORARI.

Both petitions for certiorari claim, as their principal grounds, that the decision (a) is "in conflict with applicable decisions of this court"; or (b) "has decided an important question of federal law which has not been, but should be, settled by this court"; or (c) is "in conflict with the decision of another Circuit Court of Appeals".[1]

We direct our attention, first, to the contentions of the petitioners just outlined.[2]

---

1. These grounds are among those listed in the Rules of the Supreme Court as indicating, though not controlling this Court's discretion, reasons which will be considered upon petition for certiorari. Rule 38, 5(b).

2. Other and, we submit, subsidiary reasons advanced for granting the writ will be discussed later.

I.

IN EVERY MATERIAL RESPECT, THE DECISION OF THE CIRCUIT COURT OF APPEALS FOLLOWS, AND IS SUPPORTED BY, DECISIONS OF THIS COURT. IT HAS NOT DECIDED ANY IMPORTANT QUESTION NOT SETTLED BY THIS COURT. IT IS NOT IN CONFLICT WITH THE DECISION OF ANOTHER CIRCUIT COURT OF APPEALS.

What Did the Circuit Court of Appeals Decide?

Considering the complexity of the facts involved in a proceeding for the reorganization of a railroad, the opinion of the Circuit Court of Appeals[3] is brief and simple. In substance it lays down these propositions:

1. If (as was and is claimed by The Western Pacific Railroad Corporation[4] in its objections to the Plan) the debtor was not insolvent, but had property of a value in excess of its liabilities, the exclusion of that corporation from participation is unfair and inequitable.[5]

2. To determine the question raised by the foregoing objection of WP Corp. it was necessary to determine the value of the debtor's property. In support of this declaration the opinion cites *Consolidated Rock Products Co. v. DuBois*, 312 U. S. 510, 517-525.

3. RFC, RCC, ACJ and the holders of outstanding first mortgage bonds were holders of secured claims. The opinion of the Circuit Court of Appeals, after pointing out that their right to participate in the reorganization is conceded, declares that "fairness requires that their

---

3. R. pages 2663-2674.

4. We shall refer to this respondent as "WP Corp." and to other parties by the abbreviations indicated on page 5, note 2, of the petition for certiorari of Ecker et al.

5. This proposition is, we submit, axiomatic. It is not questioned in either petition for certiorari.

participation should be in proportion to the value of their respective claims". To determine whether the Plan met this requirement, it was necessary to determine the value of the debtor's entire property, of each of the claims of each of these creditors, of the new securities to be issued on reorganization, of the property subject to each of the existing mortgages, and of the refunding bonds pledged to secure the claims of ACJ, RCC and RFC. To determine the value of the refunding bonds, it was necessary to determine the value of (1) the property subject to the refunding mortgage only; and (2) the property subject to both mortgages. This necessitated a determination as to which of the debtor's property is, and which is not, subject to each mortgage. To this declaration (i. e., of the necessity of determining values) the *Consolidated Rock Products* case is again cited as authority.

4. Subsection (e) of Section 77 provides that "if it shall be necessary to determine the value of any property for any purpose under this section, the Commission[6] shall determine such value and certify the same to the Court in its report on the plan". It being, as already held, necessary to determine the value of various items, it became the duty of the Commission to determine these values and certify them to the Court. That duty was not performed.

5. Lacking the requisite valuation data, the Court was in no position to exercise the "informed, independent judgment" which appraisal of the fairness of a plan of reorganization entails (citing the *Consolidated Rock Products* case, supra, and other cases).

---

6. i. e., the Interstate Commerce Commission.

6. Instead of approving the plan the District Court should have entered an order dismissing the proceeding, or, in its discretion and on motion of any party in interest, referred the proceeding back to the Commission for further action.[7]

7. In determining whether a plan satisfies the requirements of subsection (e) of Section 77, the Court is not concluded by any determination made by the Commission, but may, and must, exercise its own independent judgment, whether the determination relates to value or to some other subject, although the duty of determining value rests initially on the Commission.

The foregoing summary includes substantially everything decided by the Circuit Court of Appeals in its opinion. It is submitted that there is nothing so decided which is not either in clear accord with the provisions of Section 77, or with the applicable decisions of this Court.

Before Approving a Plan of Reorganization, the Court Must Exercise an "Informed, Independent Judgment" on the Question Whether the Plan Is Fair and Equitable.

The rule stated in the foregoing heading is settled by repeated decisions of this Court. It has been applied in equity receiverships, as well as in reorganization proceedings under Section 77B of the Bankruptcy Act.

National Surety Co. v. Coriell, 289 U. S. 426, 436;
First National Bank v. Flershem, 290 U. S. 504, 525;

7. The order suggested as proper was embodied in the remand of the proceeding. It is in accord with subsection (e) of Section 77.

Case v. L. A. Lumber Products Co., 308 U. S. 106, 115;

Consolidated Rock Products Co. v. DuBois, supra.

See, also,

Tennessee Publishing Co. v. American National Bank, 299 U. S. 18, 22.

The provision of Section 77 is at least as strong and direct in this respect as was the provision of Section 77B.[8] Both petitions argue[9] that under subsection (d) of Section 77 the Commission has primary jurisdiction to determine whether a plan "will be compatible with the public interest", and that this includes jurisdiction "to determine total capitalization, the classification thereof, and the financial details of each class of proposed capitalization".[10] If the question were material, we would challenge, as we did in the Court below, the broad scope thus given to the "public interest" provision, as unsupported by any authority. The question does not, however, arise here. There is no reference to it in the opinion of the Circuit Court of Appeals.

---

8. Section 77B(f) provided that "the Judge shall confirm the plan if satisfied (1) it is fair and equitable and does not discriminate unfairly in favor of any class of creditors or stockholders, and is feasible * * *." Section 77, subsection (e), provides that "the Judge shall approve the plan if satisfied that (1) it * * * is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders * * *."

9. Petition of Ecker et al. (pp. 25, 38-39); petition of Crocker Bank et al., as trustees (p. 5).

10. Petition of Ecker et al., page 25.

At any rate, whatever may be the extent of the Commission's authority over questions of "public interest", it is certainly clear that the Court must exercise its "informed, independent judgment" on every factor bearing on the fairness and equity of the plan. The proposed capitalization, and the details thereof, may be entirely compatible with the "public interest", but the Court must still determine, independently, whether, under such capitalization, the reorganization would be unfair or inequitable, or would discriminate unfairly in favor of any class of creditors or stockholders.

What has just been said indicates, as well, the answer to the criticism directed by the petition of Crocker Bank et al.,[11] and (inferentially perhaps) by the petition of Ecker et al.,[12] against the declaration in the opinion of the Court below[13] that the duty of determining value, where such determination is necessary, rests initially on the Commission, but that the Court must exercise its independent judgment on this, as on any other subject involved in deciding whether the plan satisfies the requirements of subsection (e). (These requirements include fairness and equity, want of unfair discrimination and conformity to the law of the land.) The question seems somewhat remote or abstract in the present case, where the Commission failed to make any determinations of value. But, regardless of this, how can the Court reach an informed, independent judgment that a plan is fair

11. Page 9.
12. Pages 38-39.
13. 7 in foregoing summary under head "What did the Circuit Court of Appeals decide?"

and equitable if it must accept as final the Commission's determinations of value—determinations which lie at the very base of an inquiry into the fairness and equity of the plan. We do not question that great weight and respect should be accorded to the views of an expert administrative body like the Interstate Commerce Commission, but the Court must still be "satisfied" with the findings of value before it can be "satisfied" that the plan is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class, and will conform to the law of the land.[14]

Findings of Value Essential to Enable Court to Exercise "Informed, Independent Judgment".

The findings which the Circuit Court of Appeals held to be necessary (and to be lacking) are set forth under 2 and 3[15] of the foregoing summary entitled "What did the Circuit Court of Appeals decide?".

The necessity for such findings is clearly and definitely decided by this Court in *Consolidated Rock Products* case supra.

We make no point on any verbal or formal definition of the word "finding". All that we claim is that before the District Court can approve a plan as fair and equitable, it must have before it an "ascertainment" or "appraisal"

14. Regardless of the general rules with respect to the force of administrative findings, the Court must weigh the facts independently where there is a claim of confiscation or other invasion of constitutional right. (*St. Joseph Stockyards Co. v. U. S.*, 298 U. S. 38; *Baltimore & O. R. Co. v. U. S.*, 298 U. S. 347.)

15. Ante, pages 3, 4.

or "determination" of the values which underlie the plan. The Circuit Court of Appeals uses the word "determination". This Court, in the *Consolidated Rock Products* case, speaks of "findings".

The petitions for certiorari[16] stress the following language of the opinion of the Circuit Court of Appeals: "Lacking the requisite valuation data, the Court was in no position to exercise the 'informed, independent judgment' which appraisal of the fairness of a plan of reorganization entails". Except for the substitution of the word "Lacking" for the word "Absent", the sentence is an exact quotation from the opinion of this Court in the *Consolidated Rock Products* case.[17] From this language the petitioners, it would seem, seek to draw the inference that determinations or findings of value are not necessary if the record contains the basic data upon which such a finding or determination might have been made. There are two conclusive answers to this proposition:

(1) Unquestionably the record before the Commission contained a mass of data comprising an evidentiary basis upon which the Commission might have determined the value of the property. On this basis any one of a great variety of figures might have been fixed as representing the value. To appraise the value from this mass of data—investment, valuations under Section 19(a), past earnings, financial history, physical condition, and other elements—required the exercise of judgment and

16. Petition of Ecker et al., pages 34-35; petition of Crocker Bank et al., page 2.

17. 312 U. S. at 520.

discretion resulting in a final determination of value[18] Such determination not having been made, either by the Commission or the Court, it is of no consequence that the record contained material upon which it could have been made.

(2) The isolated expression "Absent the requisite valuation data" from the opinion in the *Consolidated Rock Products* case, supra, falls far short of presenting the true holdings of that decision. In further passages the necessity of "findings" of value is repeated and emphasized. At page 520 the Court says: "In the first place there must be a determination of what assets are subject to the payment of the respective claims". Again, at page 524: "We have already noted that no adequate finding was made as to the value of the assets of Consolidated. In view of what we have said it is apparent that a determination of that value must be made so that criteria will be available to determine an appropriate allocation of new securities between bondholders and stockholders in case there is an equity remaining after the bondholders have been made whole". And, again, at page 525: "Findings as to the earning capacity of an enterprise are essential to a determination of the feasibility as well as the fairness of a plan of reorganization".

---

18. "The ascertainment of the value of a railway system is not a matter of arithmetical calculation and is not governed by any fixed and definite rate. Facts of great variety and number, estimates that are exact and those that are approximations, forecasts based on probabilities and contingencies have bearing and properly may be taken into account to guide judgment in determining what is the money equivalent—the actual value—of the property." (*Rowley v. C. & N. W. R. Co.*, 293 U. S. 102, 109.)

On the necessity for findings on the elements of value discussed above, the decision of the Circuit Court of Appeals for the Seventh Circuit in re *Chicago, Milwaukee, St. Paul and Pacific R. R. Co.*[19] is in harmony, and not in conflict, with the decision of the Court below.

The opinion of the Court below in its holding that findings or determination of value and of elements of value are essential, relied upon and followed the decision of this Court in *Consolidated Rock Products* case. The opinion in the *Chicago, Milwaukee etc.* case takes the same course. The following quotations illustrate the closeness with which the Circuit Court of Appeals of the Seventh Circuit, like the Court below, guided its action by the opinion of this Court in the *Consolidated Rock Products* case.

> "The court in Consolidated Rock Products Co. v. Du Bois, infra, has pointed the way and laid down the applicable rules for our guidance. * * *
>
> "That it must be our text for determining the disposition of this appeal is quite clear.
>
> "The Consolidated Rock Products Company case, the Boyd case, and the Los Angeles Lumber Co. case[20] infra, read together, lay down the rules governing simple, as well as the fact-complicated reorganizations.
>
> "The Consolidated Rock Products case contains a complete statement of the applicable reorganization rules."

19. Decided December 4, 1941—not yet reported.
20. *Northern Pac. R. Co. v. Boyd*, 228 U. S. 482; *Case v. L. A. Lumber Products Co.*, 308 U. S. 106.

The opinion in the *Chicago, Milwaukee etc.* case then goes on to summarize the holdings of the *Consolidated Rock Products* case. One of these is stated as follows:

> "(j) Findings must be made on all vital issues, controverted and uncontroverted, and must include values of properties separately considered *and also of Debtor's property as a whole.* Findings must cover values of liens to be surrendered and values of securities given in exchange. They should specifically cover the ultimate (not evidentiary facts) facts upon which the values are based. They must show that fixed interest charges are included and show that values are based on income-producing factors." (Italics ours.)

The Record Contains No "Findings" or "Determinations" of Value.

The lack of necessary findings of value is admitted in the petitions for certiorari, in the one case directly, and in the other inferentially.[21] The petition of Ecker et al.[22] states "The Commission did not specifically find any certain and absolute value in terms of dollars and cents for all or any part of the Debtor's property, for any of the existing claims against or interests in the Debtor, or for any of the new securities contemplated by the Commission plan".

Both petitions refer repeatedly to "dollars and cents valuations" or "exact dollar valuations", or like expressions,[23] in the effort to show that no such valuations are required.

---

21. Petition of Crocker Bank et al., pages 2, 4, 6, 7.
22. Page 19.
23. Petition of Ecker et al., pages 22, 24, 25, 28, 29, 30, 31, 33, 34, 37; petition of Crocker Bank et al., pages 4, 6, 7.

We know of no way in which the "value" of property (whether it be "market value" or "fair value" or "cash value" or value for purposes of taxation, or rate-making or reorganization) is to be measured or expressed otherwise than in terms of money, and that means (in the United States) in terms of dollars. We have already quoted[24] a passage from the opinion of this Court in *Rowley v. C. & N. W. R. Co.*, 293 U. S. 109, where the opinion treats the "actual value" of railroad property as synonymous with its "money equivalent".

What, in the judgment of the Commission, was the value (in dollars) of the debtor's entire property, of the property subject to the first mortgage, of the property, if any, subject to the refunding mortgage, or of the new securities to be issued? What did the Commission find or estimate to be the earning capacity of the railroad?[25] The record furnishes no answer to any of these questions.

The Requirement of a Finding or Determination of the Value of the Entire Property Is Not Satisfied by the Commission's Findings that "the Equity in the Existing Stock Has No Value" and that "the Claims of the Unsecured Creditors Have No Value".[26]

These findings are not specifically mentioned or discussed in the opinion of the Court below. That Court contented itself with declaring, in accord with the ruling of this Court in *Consolidated Rock Products* case, that in the face of a claim by unsecured creditors and stockholders that the value of the property was more than suf-

24. Ante, page 10.
25. See *Consolidated Rock Products Co. v. DuBois*, 312 U. S. at 525.
26. R. 269-270.

ficient to fully provide for all prior claims, the plan could not be approved as fair and equitable in the absence of a determination of the value of the debtor's property. We submit that in this the Court was clearly right.

As we have pointed out, both this Court in the *Consolidated Rock Products* case and the Circuit Court of Appeals for the Seventh Circuit in the *Chicago, Milwaukee, etc.* case held that a determination of the value of the entire property was essential. That requirement is not met by the mere declaration of the legal conclusion that the stock equity or the claims of unsecured creditors are without value. There is no way in which the District Court can measure or test the propriety or soundness of this conclusion in the absence of some basis of knowledge of the value of the property.

In their effort to maintain the adequacy, as support for the exclusion of unsecured claims and stock equity, of the findings that such claims and equity "have no value"[27] the petitions rely on *In re 620 Church Street Building Corp.*, 299 U. S. 24, and on Section 77(e).

(a) In the *Church Street* case (a proceeding under Section 77B) the Court was not confronted with a bare ultimate conclusion of "no value" in the junior mortgages or the stock equity. The findings of the trial Court are set forth in the opinion of this Court. They declare that debtor's property had a fair market value of $245,025 and that the amount of the first mortgage bonds was $445,500. These specific determinations obviously justi-

27. Petition of Ecker et al., pages 23-24, 29; Petition of Crocker et al., pages 6, 15, 16.

fied—indeed, required—the conclusions that the claims of junior mortgages had no value, and that there was no equity above the first mortgage. In the instant case, there was no finding or determination of the value of the debtor's property, and no basis, therefore, upon which the Court could exercise an "informed, independent judgment" on the presence or absence of value in the unsecured claims or the stock.

(b) The provision of subsection (e) relating to findings that the equity of stockholders or the interests of a class of creditors have no value, applies solely to the submission of the plan, after it shall have been approved, to classes of creditors or stockholders for acceptance or rejection. Findings of no value are significant only as justifying the exclusion of classes from the right to vote. They have no relation to the necessary determinations of value which are a prerequisite to the Court's approval of a plan—an approval which precedes the submission for acceptance or rejection.

It is contended by petitioners that in the *Chicago, Milwaukee, etc.* case, supra, the Circuit Court of Appeals for the Seventh Circuit regarded a finding that the equity of the stock had no value as sufficient to authorize the exclusion of the stock interest.[27a] If this be a correct interpretation of the opinion, it is still to be borne in mind that that Court insisted on the necessity for a finding of the value of debtor's property as a whole. Furthermore, in

27a. Press reports show that on January 13, 1942, after this brief had gone to the printer, the Circuit Court of Appeals (7th) filed a "supplementary opinion" in the *Chicago, Milwaukee, etc.* case decided by it on December 8, 1941. The full text is not available to us. Comment on the press report of the supplementary opinion is contained in an appendix to this brief.

the *Milwaukee* case, the "finding" of no value in the stock equity was supported (as it is not here) by findings which the Court regarded as adequate, independent findings of value. The opinion refers to the "substitute finding of capitalization figure which was arrived at by using as a basis the average annual sum available for fixed charges". If (which we do not concede) the total of the authorized capital of the reorganized company may be taken as a finding that the value of the debtor's entire assets is such total amount, the record in this case fails to show any specific amount of total capitalization authorized. The proposed new capital structure includes 319,441 shares of capital stock without par value[28]. In the plan itself, no value was assigned to these shares.[29] They were allocated to first mortgage bondholders and to RFC at $57, to RCC at $62, and to ACJ at no specific rate. The result is there is no way of measuring the amount of total capitalization. The petition of Ecker et al. argues[30] that the designation and allocation of the new capitalization was, in effect, a finding that the property and new securities had a value not in excess of $84,027,599—i.e., the aggregate of the new securities having a principal amount or par value, plus the 319,441 shares of common stock taken at $57 per share. But why $57, rather than $62, or some other amount?

28. Petition of Ecker et al., page 6.

29. There are, however, various passages in the Commission's reports indicating that these shares were "treated • • • at $100 per share" (R. pp. 244-45, 256, 259, 359). If so treated the total capitalization would amount to $97,763,522, or some $10,000,000 more than the aggregate of the secured claims and undisturbed obligations recognized under the plan.

30. Pages 35-36.

On the other hand, the plan in the *Milwaukee* case[31] set forth a total authorized capitalization in the specific sum of $548,533,321, which included no par common stock "shown at $100 per share".

The Decision of the Court Below Is Not in Conflict With the Requirements of the Absolute Priority Rule or With the Necessity For Maintaining the Relative Priorities.

At no time during the progress of this litigation has the WP Corp. questioned or disputed the propositions that creditors holding prior secured claims are entitled to satisfaction out of the assets in preference to holders of junior secured claims, or that the latter are entitled to satisfaction before any recognition can be given to unsecured creditors, or that the latter must receive due recognition before anything can be allotted to stockholders. Nor is the decision of the Court below inconsistent with established rules of priority.

The petitions for certiorari base their claim of conflict entirely upon the statement in the opinion of the Court below that "fairness requires that their (the secured creditors') participation should be in proportion to the value of their respective claims".[32] We confess our inability to understand why this statement in any way conflicts with the rights of secured creditors to either absolute or relative priority. We see no basis for the contention of petitioners that the quoted sentence "if taken literally"[33] means or that it "apparently requires"[34] that

31 See opinion of District Court, 36 Fed. Supp. 193, at 217.
32. Petition of Ecker et al., pages 30-32; Petition of Crocker et al., pages 4-5, 7-8, 16-18.
33. Petition of Ecker et al., page 33.
34. Petition of Crocker Bank et al., page 7.

the new securities are to be allocated to secured creditors in the exact mathematical proportions of the values, in dollars, of their respective claims. Those values are dependent, largely, upon earning power,[35] and the valuation of secured claims, as well as of the new securities to be allocated, must necessarily take into account the "varying levels of venture earnings" at which the assets securing the different claims, as well as the different new securities, "begin to show earning power".[36] To say, as the Court below said, that the participation of secured creditors should be "in proportion to the value of their respective claims" does not mean, therefore, that the allocation of new securities must be based on an exact mathematical formula which regards only the determined dollar values. A distribution which recognizes the earning levels at which existing securities, as well as new securities, "begin to show earning power" would be in proportion to the values of the secured claims.

We submit that the supposed conflict of the decision of the Court below with the *Consolidated Rock Products* case, with *Case v. L. A. Lumber Products Co.*, supra, or with decisions of Circuit Courts of Appeals does not exist, and that the argument that there is such conflict rests upon an attempt to expand and distort the language of the Court below by reading into it something which was neither stated nor intended by the Court.

---

35. Under the last paragraph of subsection (e), earning power is not the sole, though perhaps the dominant, element, in determining value of property for any purpose under Section 77.

36. The words quoted are found in the Petition of Ecker et al., page 31.

II.

FURTHER REASONS ASSIGNED BY PETITIONERS FOR THE GRANTING OF CERTIORARI.

Costs.

Complaint is made[37] that costs of appeal were assessed against the appellees.

There is no reference to costs in the opinion of the Court below. The allowance of costs to the appellants followed automatically from Rule 27 of the Rules of the Ninth Circuit which provides: "In cases of reversal of any judgment or decree in this court costs shall be allowed to the appellant, including the cost of the transcript from the court below, unless otherwise ordered by the court." The rules of every other Circuit contain identical or similar provisions, as do the rules of this Court. The most, then, that can be said is that the Court below would have had discretion to relieve the appellees from costs, notwithstanding the reversal. It does not appear that the Court was asked to do so.

Was the failure to make an order varying the consequence which would normally flow from Rule 27 an abuse of discretion? Clearly, we submit, it was not. No good reason is suggested why claimants who attempt, without success, to sustain a plan of reorganization (which, presumably, they deem beneficial to them) should be preferred, in the matter of costs, to claimants who have succeeded in maintaining their objections to the plan.

But beyond this, the determination by the Court below, in its discretion, that costs should or should not be allowed to the prevailing party does not appear to present an

---

37. Petition of Ecker et al., pages 26, 43, 44; Petition of Crocker Bank et al., page 10.

"important question of federal law" which would justify the granting of a writ of certiorari.

Other Railroad Reorganization Plans Formulated by the Commission.

The petition of Ecker et al.[38] points out that the Commission has formulated plans of reorganization for fifteen Class I railroads (including the Western Pacific) and claims that in all of these the findings of the Commission were "substantially identical in character" with those found by the Court below to be inadequate.

Some of these plans have been approved by District Courts. If time and space permitted we could show that the plans which have been approved in the District Court cases cited by this petitioner were supported by findings substantially different from those of the present case.[39] But an analysis of the records in other cases would be useless. The only case (other than this one) which has reached a Circuit Court of Appeals is *In re Chicago, Milwaukee, etc. R. R. Co.* already referred to, and in that case, as in this one, the order approving the plan was reversed for want of adequate "findings" or "determinations" of value. The reversal in each case was based upon the holdings of this Court in the *Consolidated Rock Products* case, which was decided on March 3, 1941, long after the Commission had certified its fifteen plans of reorganization to which the petition of Ecker et al. refers, and after the District Courts (including the Court which made the order of approval here involved) had acted in approving various plans of reorganization certified to them.

---

38. Pages 26-27.

39. That is not to say that even in those cases the findings could be held adequate under the law laid down in the *Consolidated Rock Products* case.

It is unfortunate that time and labor may have been lost, and that further time and effort may be required to enable the Commission to certify plans which can properly be approved by District Courts, but if this is the necessary result of the law as laid down by this Court, that condition cannot be altered or ameliorated by this Court's ordering up the instant case in order to again decide what it has already decided.

General Considerations.

The petitions for certiorari urge two grounds which appear to us to have little, if any, relation to the considerations which actuate this Court in ordering up cases for its own review.

In the first place, attention is called to the purpose, underlying the enactment of Section 77, of expediting proceedings for the reorganization of railroads.[40] No one can question the desirability of a prompt and speedy disposition of reorganization proceedings. If, however, as we believe, the decision of the Court below is sound and is in accordance with the holdings of this Court in prior cases, the case must in any event be remanded to the District Court for such further proceedings as it may take under the statute. That Court would presumably, on motion of any party in interest, refer the proceedings back to the Commission for further action. We fail to see how an expeditious disposition of the proceeding would be furthered by delaying such reference to the Commission until these appeals may be heard, considered and decided by this Court.

40. *Continental etc. B. & T. Co. v. Chicago, etc. Ry.*, 294 U. S. 648.

Secondly, it is urged that certiorari should be granted because of the importance of a determination of all questions that have been raised or may ultimately be raised in this case, and so that many questions involved in the construction and application of Section 77 may be decided for the guidance of lower Courts, of the Commission, and of parties in other proceedings for reorganization.

It has long been the practice of appellate (and other) Courts to limit their decisions to questions necessarily involved in disposing of the particular matters brought before them. Without going into the cogent reasons for this settled rule, it may be pointed out that Section 77 is a long and involved statute, and that there is a real danger of confusion, and, perhaps, of error, in undertaking to go beyond the necessities of a particular case in the effort to clear up doubts which may arise at a later stage in the same case or in other cases. No one, we think, can foresee all the problems that may be presented in proceedings under Section 77, and it would, we believe, be vain to hope that a decision in any one case can so clarify the situation as to avoid future doubts and future appeals.

Dated, San Francisco, California,
January 16, 1942.

Respectfully submitted,

M. C. Sloss,
Sloss & Turner,
Attorneys for Respondent,
The Western Pacific Railroad Corporation.

(Appendix Follows.)

Appendix

RE SUPPLEMENTARY OPINION TO DECISION OF CIRCUIT COURT OF APPEALS (7th) IN CHICAGO, MILWAUKEE, ETC. R. R. CO. REORGANIZATION.

The full text of the supplementary opinion referred to in Note 27a at p. 15 (ante) will not be available to us within the time allowed for the completion of this brief. Our only information is a press dispatch appearing, under the date line of January 13, 1942, in the Wall Street Journal (Pacific Coast edition) of January 14, 1942. So far as can be determined from this dispatch, the effect of the supplementary opinion is that, with respect to the elimination of the stock equity, the Commission, in its further investigation, is not required to make findings beyond the finding that the equity has no value—*"unless it is convinced that changed conditions in railroad earnings warrant it"*. (Italics ours.) The clear implication is that as further hearing and investigation must be had in any event because of the lack of findings necessary to support other provisions of the plan, changed conditions appearing at the time of such further hearing may be considered. These changed conditions relate to increased earnings since the making of the Commission's report.

In its opinion of December 8, 1941, the court which decided the Milwaukee case made two declarations which sharply differentiate that case from the present one:

(1) It was said that evidence of an increase in earnings of the railroad, relied on by the stockholders, was not in the record. On the contrary, in the instant case, by express order of the District Court, made on the stipulation of all parties, the monthly and yearly statements

showing combined results of the operation of the properties of the debtor and its subsidiaries for the period subsequent to that covered by the evidence before the Commission, were filed and were made a part of the record on appeal (R. 2627-2632). Such statements, down to the end of September, 1941, are included in Volumes VII and VIII of the record (R. 2633-2838; 2641, 2644, 2646, 2649, 2652, 2654, 2656).

(2) That even if this evidence were considered, it would not, with the other evidence in the case, support a finding of value in the stock.

In the present case, the earnings record for the period following the original and the modified report of the Commission shows a striking and continuous increase in the earnings of the debtor's properties—an increase vastly greater, relatively, than that relied on by the stockholders in the Milwaukee case. Briefly stated, the adjusted earnings of the system available for interest in 1939 showed an increase of 563.04% over 1938; for 1940 there was a further increase over 1939 of earnings (unadjusted) of 81.41%; for the nine months of 1941 included in the record the earnings (unadjusted) available for fixed charges (R. 2656) increased from $933,533.00 in the comparable period of 1940 to $2,958,189.00, or an increase of 216.87%.

It is impossible to believe that the Commission, in the further investigation which it must make in any event, would, or properly could, close its eyes to this radical change of conditions affecting earnings, and stand upon the findings made by it several years ago that the unsecured claims and the stock equity are without value.

ANSWER OF IRVING TRUST COMPANY, AS REFUNDING MORTGAGE TRUSTEE, TO PETITIONS FOR WRIT OF CERTIORARI

By order of this Court dated February 2, 1942, the time of Irving Trust Company to file a brief in answer to the above-entitled petitions for certiorari was extended until twenty days following the action of the Circuit Court of Appeals for the Ninth Circuit on the petitions for rehearing there pending.

As pointed out in Irving Trust Company's motion in this Court dated January 16, 1942, the Circuit Court of Appeals had dismissed the appeal taken by Irving Trust Company, as Trustee of the Debtor's Refunding Mortgage (R. 2668), and had made no determination of the issues raised by that appeal (R. 1651) respecting the relative liens of the Refunding Mortgage and the Debtor's First Mortgage.

By amended order handed down February 16, 1942, the Circuit Court of Appeals set aside that portion of its former decree which dismissed the appeal of Irving Trust Company as Trustee (R. 2681); but it still made no determination of the questions of conflicting lien presented by such appeal.

In this status of the case the Refunding Mortgage Trustee, after consultation with its bondholders, has determined to take no position on the above-entitled petitions for certiorari. Both petitions relate mainly to the issues respecting capitalization and findings of value, which do not concern the Refunding Mortgage Trustee except to a limited extent; and neither of them can affect

the question of what properties are subject to the lien of the Refunding Mortgage.

Dated: March 5, 1942.

Respectfully submitted,

ORRIN G. JUDD,
Attorney for Irving Trust Company, as Trustee under the General and Refunding Mortgage of The Western Pacific Railroad Company.

Jurisdiction of This Court	2
Statement of the Case	2
Argument	4
Summary of the argument	4
Scope of this brief	8
I. The functions of the District Court and of the Interstate Commerce Commission under Section 77	9
All parties entitled to "informed independent" judgment of the court on fairness and equity of plan	9
The "public interest"	13
The meaning of "fair and equitable"	23
II. The court below correctly held that the District Court could not and did not exercise an "informed, independent judgment" on the fairness and equity of the plan for the reason that it did not have before it the necessary findings or appraisals or determinations of value which are essential to passing upon the equity and fairness of a proposed plan	26
Findings of value of debtor's property and of its earning capacity are essential	26
"Dollars and cents valuations"	32
The authorized capitalization is not a determination of the value of debtor's property	32
III. Insufficiency of so-called "findings" of Commission that stock equity and unsecured claims have no value	35
IV. Discussion of earnings as measure of value (without regard to specific provisions of Section 77)	40
Past earnings alone are not a sufficient basis for appraising earning capacity	41
V. Other elements to be considered in valuation under Section 77	44
(a) Elements other than earning capacity	44
(b) Under Section 77 valuation of railroad property is to be based—in addition to "other relevant facts"—on "earning power", not on "prospective" or "probable future" earnings	51
VI. Earnings since Commission's report was certified	54
Conclusion	61

Respondents.

BRIEF FOR RESPONDENT,
THE WESTERN PACIFIC RAILROAD CORPORATION.

REFERENCE TO OPINIONS BELOW.

Opinion of Circuit Court of Appeals:

124 Fed. (2d) 136 (R. 2663).

Opinion of District Court:

34 Fed. Supp. 493 (R. 1569).

Original Report and Order of Interstate Commerce Commission on October 10, 1938:

230 I. C. C. 61 (R. 194).

Commission's Modifying Report and Order, June 21, 1939:

233 I. C. C. 409 (R. 300).

JURISDICTION OF THIS COURT.

As we raise no question of the jurisdiction of this Court, we accept the statements in the briefs of petitioners of the grounds upon which they invoke such jurisdiction.

STATEMENT OF THE CASE.

The briefs of the petitioners set forth correctly the present capitalization of the Debtor, and the new capitalization under the Commission Plan, and we beg leave to refer, in this brief, to these portions of the petitioners' statements, without repeating them.

In addition we add the following:

Many of the relevant facts are set forth in a "Stipulation of Facts Not in Dispute" (hereinafter cited as "Stip.") signed by all the parties to the hearing in the District Court and filed in that Court (R. 1017-1272).

This respondent, The Western Pacific Railroad Corporation, is an unsecured creditor of the Debtor in the sum of $5,786,791, together with interest to January 1, 1939 (the effective date of the Commission Plan) amounting to $1,980,429.11 (Stip. Par. 8, R. 1026-27). The only other unsecured claim is that of the Western Realty Company for $50,000 principal and $11,666.67 interest (Stip. Par. 8, R. 1027). The Western Realty Company is a subsidiary of this respondent, so that this respondent is the holder of all the unsecured claims against Debtor. These claims represent advances made upon open account to the Debtor (Stip. Par. 8, R. 1026-7).

The Western Pacific Railroad Corporation is likewise the holder of all the preferred and common stock of the Debtor (Stip. Par. 8, R. 1027; Stip. Par. 3, R. 1044). Substantially all the stock of the Debtor held by this respondent represents actual cash contributed to the construction of the Debtor's railroad enterprise. Most of the stock was issued to this respondent in a former reorganization, in exchange for the First Mortgage Bonds of the Debtor's predecessor in the aggregate principal amount of $50,000,000, the proceeds of these bonds having been used in constructing and equipping the railroad. The remaining $800,000 par value of the Debtor's stock was issued and sold to this respondent in 1929 at par for cash (Stip. Par. 37, R. 1044).

The unsecured claim and stock equity of The Western Pacific Corporation are not, therefore, "watered" securities, but represent a large cash investment in the actual construction of the enterprise.

The beneficial ownership of the rights of this respondent as stockholder and as creditor of the Debtor is in the

stockholders of this respondent, several thousands in number, the great majority of whom hold not more than fifty shares each (Stip. Par. 49, R. 1942). By the Plan of Reorganization approved by the District Judge (whose order of approval was reversed by the Circuit Court of Appeals) this respondent was totally excluded from participation in the reorganization, its unsecured claim and its stock equity being completely wiped out.

One additional fact may be mentioned in this preliminary statement. The petition of the Debtor, by which the reorganization proceeding was initiated (R. 4), did not allege that the Debtor was "insolvent". It set forth the other ground for seeking reorganization under Section 77 of the Bankruptcy Act as amended, i.e., that the petitioning railroad corporation was "unable to meet its debts as they mature". Neither the Commission nor the Court found, as a matter of fact, that the Debtor was insolvent.

ARGUMENT.

SUMMARY OF THE ARGUMENT.

In a railroad reorganization proceeding under Section 77 of the Bankruptcy Act, as amended (11 U.S.C., Sec. 205), it is the duty of the District Court,[1] before approving a Plan of Reorganization certified to it by the Interstate Commerce Commission, to form an informed, independent judgment on the fairness of the Plan and its compliance with other requirements of Section 77 and with the law of

---

[1]Throughout this brief, we use the terms "District Court", "Court" and "Judge", interchangeably with respect to proceedings under Section 77. Section 77 itself speaks at times of the Court, and at other times of the judge.

the land. In this connection the amount and character of the capitalization of the reorganized company are not matters relating solely to the public interest, and thus committed to the discretion of the Commission, subject only to constitutional limitations, want of evidence or the like, but are inseparably bound up with the rights of the individual creditors and stockholders which it is the independent duty of the Court to protect. This protection, to which this respondent is entitled, both as the sole unsecured creditor and as the sole stockholder of the Debtor, and which is guaranteed both by the Constitution and by Section 77 itself, the District Court failed to give.

The Interstate Commerce Commission failed to make the "findings" or "determinations" or "appraisals" of value or of earning power which, under the decision of this Court in

Consolidated Rock Products Co. v. DuBois, 312 U. S. 510,

are essential to enable the District Court to reach an informed, independent judgment on the fairness and equity of the proposed Plan.

The Plan which the District Court approved deprives this respondent of any participation whatever and wipes out its investment in the properties of the Debtor. Throughout the proceedings in the Courts below this respondent (and indeed every other opponent of the Commission's Plan) has fully recognized the priority principle, as laid down in

Northern Pacific Railroad Co. v. Boyd, 228 U. S. 482;

Case v. L. A. Products Co., 308 U. S. 106,

and similar cases. The Western Pacific Railroad Corporation has never questioned that the holders of secured claims must be given recognition to the extent of their claims before anything may be allowed to this respondent as unsecured creditor or as stockholder. If the value of the assets of the Debtor had been proved and found to be sufficient only for the payment of such prior claims, this respondent's investment would in fact be worthless, and its destruction in the reorganization would be justified. But the record in this case shows that the value of the Debtor's assets exceeds the amount of the secured claims entitled to priority; that in fact it exceeds the total of all debts, secured and unsecured. This respondent is accordingly entitled to participate in the reorganized company, both as unsecured creditor and as stockholder.

In any event, the record before the Interstate Commerce Commission and before the District Court is totally lacking in the findings essential to support the conclusion that this respondent, in either of its capacities, may be excluded from participation in the reorganized company. There was no finding by Commission or Court of the value of the Debtor's assets. There was no finding of the earning capacity of those assets.

The decision of the Commission and of the District Court denying participation to this respondent appears to be based on the theory that capitalization of past earnings may be used as the sole basis of determining the value of a railroad company's property. Both the terms of Section 77 and the constitutional requirement of due process preclude the adoption of this as the sole basis of valuation. Under Section 77(e), a major (though not

exclusive) factor in valuation is "earning power", not past or prospective earnings. Even if it were conceded that a forecast of probable future earnings is the equivalent of "earning power", the facts of this case show that past earnings are not a reliable guide to the future earnings that may reasonably be expected. Not only were the earnings of the years preceding the Commission's determination unduly depressed by physical factors and economic conditions which no longer exist, but the actual earning record of the Debtor during the period following the Commission's report shows that the Commission's view of the future possibilities of the enterprise was unduly pessimistic. An estimate of future performance (assuming, contrary to the fact, that such an estimate was made in this case), related to conditions not yet known and therefore necessarily unreliable, is not, we submit, a sufficient foundation for the confiscation of a large investment in a productive enterprise.

All that this respondent seeks is the right to retain whatever value may inhere in its unsecured claims and its stock equity. It recognizes that, in any reorganization, those claims and that equity must be properly subordinated to the prior rights of all secured claimants. It demands neither income nor the return of principal until after the full satisfaction of the income and principal demands, respectively, of prior classes of creditors.

We maintain that the unsecured claims and the stock equity have a present value which is entitled to the protection of the Courts. Even if there were no value immediately measurable, the prospective value of these interests should not be irrevocably destroyed, as they would be if

the Plan now before this Court should be carried into effect. As Commissioner Miller said in dissenting, in part, from the Report of the Commission (R. 283-84), the Plan should provide for a larger issue of no par value common stock to "give the present stockholders a chance to participate in the future profits of the reorganized company".

SCOPE OF THIS BRIEF.

The appeal to the Circuit Court of Appeals was from an order approving the Plan of Reorganization. The Circuit Court of Appeals reversed that order. Viewed in its narrowest aspect, the single question to be decided by this Court is whether the order approving the Plan should be affirmed or reversed.

In applying for certiorari, however, the petitioners not only attacked the grounds upon which the Circuit Court of Appeals had reversed the order approving the Plan, but also emphasized the desirability—as a guide to the Commission and to the lower Courts in other railroad reorganization proceedings—of an exposition by this Court of the interpretation, operation and effect of Section 77. The Interstate Commerce Commission, on whose behalf a supporting memorandum was filed, also urged that this Court go into the broader field so suggested.

Assuming that the second consideration had some part, at least, in moving this Court to issue the writs, we do not limit this brief to supporting the decree of the Circuit Court of Appeals on the record in the case, but shall go, in addition, into a discussion, on more general lines, of Section 77.

I.

THE FUNCTIONS OF THE DISTRICT COURT AND OF THE INTERSTATE COMMERCE COMMISSION UNDER SECTION 77.

All Parties Entitled to "Informed Independent" Judgment of the Court on Fairness and Equity of Plan.

The District Court, in considering whether a plan proposed by the Commission is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, fails to discriminate unfairly, and conforms to the requirements of the law of the land (Section 77(e)), exercises an independent jurisdiction. The Court does not sit merely to review the findings and conclusions of an administrative body, whose determinations are ordinarily free from attack in the Courts except for want of jurisdiction, excess of statutory authority, departure from fundamental legal and procedural rules, lack of evidence, or conflict with constitutional rights. This is apparent both from the general scheme of Section 77 and from its specific provisions.

Section 77 is a part of the Bankruptcy Act. It was enacted as an exercise of the power of Congress "to establish * * * uniform laws on the subject of bankruptcies throughout the United States" (*Const. U. S.*, Art. I, Sec. 8; *Continental Ill. N. B. & T. Co. v. Chicago, R. I. etc. R. R. Co.*, 294 U. S. 648; see also *In re New York N. H. etc. Co.*, 16 Fed. Supp. 504; *Central Hanover B. & T. Co. v. Williams*, 95 Fed. (2d) 210). In general, proceedings under the Bankruptcy Act are committed to the jurisdiction of the District Courts of the United States. The entire structure of Section 77 providing for the reorganization of railroads, like that of 77B (now recast as Chapter X of the Bankruptcy Act of 1938) dealing with reorganizations of

other corporations, clearly contemplates a judicial proceeding. It is true that under Section 77 provision is made for action by both the Interstate Commerce Commission and the Court. No plan can finally become effective until it has the approval of the Court as well as the Commission. The functions of the Commission and of the Court are, however, separate and distinct. Their jurisdiction is not concurrent or co-ordinate. It is perhaps better described as a combined jurisdiction, the action of both being necessary to accomplish a reorganization. Mr. Justice Frankfurter has spoken of the authority of the two bodies as being "intertwined",[2] and Mr. Justice Reed emphasizes the "co-operative" nature of the jurisdictions.[3]

As indicating that the final, and, in a certain sense, superior, jurisdiction lies with the Court, it is to be noted that the proceeding is initiated by a petition filed with the Court, that upon the Judge's approval of the petition, the Court has exclusive jurisdiction of the Debtor and its property, that the Judge appoints (subject to ratification by the Commission) a trustee or trustees, fixes the amount of the bond for every trustee, controls the actions of the trustees, fixes the time for filing claims, and determines classification of creditors and stockholders. A plan certified by the Commission does not become binding unless and until it is confirmed by the Court. In addition, in proceedings under Section 77 the powers of the Court and the rights and liabilities of creditors and others with respect to the Debtor and its property are the same as if an adjudication of bankruptcy had been made on voluntary petition on the day the Debtor's petition was filed.

---

[2] *Palmer v. Massachusetts*, 308 U. S. 79, 87.
[3] *Warren v. Palmer*, 310 U. S. 132, 138.

It appears, then, that not only is the proceeding instituted in, and jurisdiction of the Debtor and its property conferred on, the Court, but the final act which makes a plan binding upon the Debtor and all other parties is the confirmation of the plan by the Judge.

But, entirely apart from the foregoing general observations regarding the nature and scope of the statutory proceeding, it is clear beyond question that on a hearing like the one which took place before the District Court, i.e., one which calls for a determination whether the Judge will or will not approve a plan certified by the Commission, the express terms of Section 77 require the Judge to exercise an independent judgment upon the essential questions of law and fact involved in his approval or rejection of the plan. Subdivision (e) declares that "the judge shall approve the plan if satisfied that: (1) It complies with the provisions of subsection (b) of this Section, is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders * * *". The word "satisfied" has often been interpreted. It means: convinced; of the conviction; reasonably certain; relieved of all doubt or uncertainty (56 *C. J.* 131 and cases cited). The Judge is to be *satisfied* that the plan meets the requirements of compliance with the provisions of subsection (b); that it is fair and equitable; that it affords due recognition to the rights of each class; that it does not discriminate unfairly and that it will conform to the requirements of the law of the land regarding the participation of the various classes.

It is not enough, as in most cases of attacks upon actions of administrative bodies, that the Judge or Court conclude that the administrative body had jurisdiction to proceed and that it exercised its jurisdiction regularly and reached its findings upon sufficient evidence. The judicial mind must be satisfied of the truth of the ultimate facts and the soundness of the conclusions. In this respect the provision of Section 77 is substantially identical with that of Section 77B which provided that "the Judge shall confirm the plan if satisfied that (1) it is fair and equitable and does not discriminate unfairly in favor of any class of creditors or stockholders and is feasible * * * (3) it has been accepted as required by the provisions of subdivision (e), clause (1), of this section * * *".

Considering Section 77B, the Supreme Court of the United States in its decision in

Case v. Los Angeles Lumber Products Co., 308 U. S. 106,

held (p. 114) that:

> "It is clear from a reading of section 77B(f) that the Congress has required both that the required percentages of each class of security holders approve the plan and that the plan be found to be 'fair and equitable'. The former is not a substitute for the latter. The court is not merely a ministerial register of the vote of the several classes of security holders. All those interested in the estate are entitled to the court's protection."

and, at a later point (p. 115), the Court continues:

> "The contrary conclusion in such cases would make the judicial determination on the issue of fairness a mere formality and would effectively destroy the

function and the duty imposed by the Congress on the District Courts under Section 77B. That function and duty are no less here than they are in equity receivership reorganizations, where this court said: 'Every important determination by the court in receivership proceedings calls for an informed, independent judgment.' (National Surety Co. v. Coriell, 289 U. S. 426, 436.)"

See, also,

Tennessee Pub. Co. v. American Nat. Bank, 299 U. S. 18, 22.

In its most recent pronouncement on corporate reorganizations the Supreme Court has again emphasized the necessity for the Court

"to exercise the 'informed, independent judgment' * * * which appraisal of the fairness of a plan of reorganization entails".

Consolidated Rock Products Co. v. duBois, 312 U. S. 510.

In that case, the decision of the Circuit Court of Appeals reversing an order of the District Court confirming a plan of reorganization was affirmed principally upon the ground that such an order, if made without the exercise of the required independent judgment upon the basis of adequate data and findings, cannot be sustained.

The "Public Interest".

In an attempt to define the scope of the respective functions of the Commission and the Judge under Section 77, consideration must be given to subdivision (d) of Section 77, which provides that the "Commission shall render a report and order in which it shall approve a plan, which

may be different from any which has been proposed, and will in its opinion meet with the requirements of subsections (b) and (e) of this section, and *will be compatible with the public interest;* or it shall render a report and order in which it shall refuse to approve any plan". (Italics ours) It becomes necessary, therefore, to inquire what is embraced within the scope of the "public interest", thus initially placed within the authority of the Commission.

The contention of the petitioners has been and is that the exclusive, or at least primary, jurisdiction of the Commission covers the total capitalization of the reorganized company and the classification and details of that capitalization, leaving to the independent judgment of the Court only the question of distribution of the authorized securities among the several claimants. The total capitalization and its details are deemed by the petitioners to be embraced within the field of "public interest", the distribution of the securities to be matters of private right on which alone the parties are entitled to the independent judgment of the Court. This view, which had been advanced below by the proponents of the plan, was accepted by the learned District Judge, who said in his opinion:

> "The two issues of (1) amount and character of capitalization and (2) distribution of new securities are closely related. The determination of the amount and character of the capitalization (a legislative function affecting the public interest) is exclusively within the province of the Commission. The only qualification, if any, is that the court shall independently determine whether, in the exercise of its jurisdiction, the Commission has acted fairly, within the bounds of the Constitution, and not arbitrarily. The determination of the

> questions relating to the distribution of the new securities, including legal priorities and allocations, involves private rights and is a judicial function, within the province of the court." (34 Fed. Supp. 504; R. 1596-7)

We submit that the distinction so attempted to be made between matters of public interest and matters of private right is not maintainable. It is conceded, on all hands, that the District Judge must, in the exercise of an informed, independent judgment, determine whether the plan is fair and equitable, whether it affords due recognition to the rights of each class of creditors and stockholders, whether it discriminates unfairly in favor of any class, and whether it will conform to the requirements of the law of the land regarding the participation of the various classes (Section 77, subsection (e)). It is impossible to separate the consideration of the amount and character of the authorized capitalization from the question of the fairness and equity of the distribution of the authorized securities and the conformity of the plan to the requirements of the law of the land. The capitalization is so interwoven with the determination of the issues which the Court must determine independently that the Court's function cannot be performed if it is foreclosed by the Commission's fixing of the capitalization to be permitted.

At the risk of undue repetition, we emphasize again that under subsection (e) (as well as under the law settled before Section 77 was enacted) every party is entitled to the informed, independent judgment of the Court on the questions whether the plan is fair and equitable, whether it descriminates unfairly and whether it is in accord with the law of the land. The phrase "the law of

the land" is the equivalent of "due process of law" in the Fifth and Fourteenth Amendments to the Federal Constitution.[4]

Even if Section 77 contained no reference to the "law of the land", it would, of course, still be open to any party in interest to contend that the plan as promulgated by the Commission would result in a confiscation of the party's property or a taking of it without due process of law. Here, however, we find that Section 77 specifically incorporates the protection of the "law of the land". If, as we contend, the effect of the Commission Plan would be to confiscate the property of the stockholders and unsecured creditors and transfer it to secured creditors, no consideration of public interest could justify such an invasion of constitutional rights. As this Court stated in

Louisville Joint Stock Land Bank v. Radford, 295 U. S. 555, 602,

in holding that the farm mortgage provisions of the Frazier-Lemke Act of June 28, 1934, were an unconstitutional invasion of the rights of holders of farm mortgages:

> "For the Fifth Amendment commands that, however great the nation's need, private property shall not be thus taken even for a wholly public use without just compensation. If the public interest requires, and permits, the taking of property of individual mortgagees in order to relieve the necessities of individual mortgagors, resort must be made to proceedings by eminent domain; so that, through taxation, the burden of the relief afforded in the public interest may be borne by the public."

---

[4] *Den v. Hoboken L. I. Co.*, 18 How. 279; *Davidson v. New Orleans*, 96 U. S. 97; *Twining v. New Jersey*, 211 U. S. 78.

The argument in favor of the controlling power of the Commission over the amount and details of the authorized capitalization is not furthered by the effort to describe the exercise of this power, in the language of the District Judge, as "a legislative function affecting the public interest".[5]

It was argued below that reorganization is a legislative function and that the legislature has delegated to the Commission the legislative power of fixing the limits and character of the capitalization of the reorganized company (which the legislature might have exercised itself), just as it has delegated to the Commission the legislative power of fixing rates for carriers. It is quite true that the power of limiting or fixing rates for public services was originally exercised directly by legislative bodies. But even when so exercised the rates fixed were always subject to judicial inquiry to determine whether constitutional rights had been invaded. In such an inquiry into the validity of a rate structure, whether established directly by the legislature or by an administrative body, the Courts have the power to determine whether the rate is confiscatory.[6] In that connection, in so far as the value of the property used in the public service is an element in passing upon the propriety of the rate structure, the parties affected are entitled to the independent determination of a court.

Granting, for the purpose of argument, that the establishment of the authorized capital of a company to be

---

[5]See quotation from opinion of trial judge, supra, pp. 14-15.

[6]*Ohio Valley Water Co. v. Ben Avon Borough*, 253 U. S. 287, 291;
Bluefield W. Wks. Co. v. Public Serv. Com., 262 U. S. 679, 689;
St. Joseph Stockyards Co. v. U. S., 289 U. S. 38.

reorganized is a legislative function, let us suppose that the Congress, instead of enacting Section 77, had passed an Act providing that the Western Pacific Railroad Company shall be reorganized on the basis of capitalization proposed in the plan under consideration, leaving no securities available for the unsecured creditors or stockholders of the present company, and providing further that the unsecured claims and the preferred stock and the common stock of the company should be cancelled. Could it be asserted that the doors of the courts would not be open to the holder of the claims and stock equity so excluded for a hearing upon his complaint that his rights had been destroyed and confiscated, or that he would not be entitled to the fullest inquiry into the basis upon which that confiscation had been attempted and whether it did deprive him of his constitutional rights?

The position of the petitioners, accepted by the trial Judge, assumes that the problems involved in a reorganization plan are divisible into two mutually exclusive classes: (1) the class of "public interest", which includes not only total capitalization, but the character and classification thereof (committed to the Commission); and (2) questions of private right (on which the Court must exercise an independent judgment) and which cover simply the distribution among classes of creditors and stockholders of the securities authorized by the Commission's capitalization. This conception, we respectfully submit, finds no support in the statute (Section 77) or in authority. The statute does not undertake to divide the questions involved in a reorganization into two separate water-tight compartments, one labelled "public interest" and the other

"private right"—one involving purely administrative decisions, the other requiring the exercise of judicial power. Indeed such a differentiation, if it had been attempted, would not be practicable or workable. Under Section 77 the requirement that the plan be "fair and equitable" binds both the Commission and the Court, and the latter must be "satisfied" in the exercise of an "informed, independent judgment" that the requirement has been met. The plan must, in the opinion of the Commission, be "compatible with the public interest". Neither requirement presupposes only one possible plan. Various plans may be "fair and equitable". Various plans may be "compatible with the public interest". Both requirements must be met, if a plan of reorganization is to become effective.

A plan may be "fair and equitable" but not "compatible with the public interest". Such a plan would not be approved or certified by the Commission. On the other hand, a plan might be "compatible with the public interest", but not (in the judicial view) "fair and equitable". (For the sake of brevity, we are here combining the statutory requirements of a plan into the single phrase "fair and equitable". The further standards imposed by subsection (e) prohibit—even if that of fairness and equity does not—the approval of a plan which is confiscatory as to any claim or interest.) If the Commission should certify a plan, deeming that it is compatible with the public interest, and that it is fair and equitable, the Court must still exercise its "informed, independent judgment" on the question of fairness and equity, and this judgment cannot be limited by the Commission's determination of the amount and character of the permissible capitalization. Unless the

Court is satisfied that the plan meets the test of fairness, the Court cannot approve it. In other words, a plan of reorganization to be approved must be (a) compatible with the public interest, in the opinion of the Commission, and (b) fair and equitable in the opinion of the Commission and in the informed, independent judgment of the Court. It may be that no plan can be devised which will meet both these tests. If any plan that is in the opinion of the Commission compatible with the public interest is nevertheless unfair and inequitable, or if any fair or equitable plan is not deemed by the Commission to be compatible with the public interest, the result is simply that no reorganization can be accomplished. In such event the Commission may render a report and order "in which it shall refuse to approve any plan" (Section 77(d)). Or if a plan shall be certified by the Commission to the Court and the Judge does not approve the plan, and does not see fit to refer the proceedings back to the Commission, he may dismiss the proceedings (Section 77(e)).

The statute affords no basis for the contention that the Commission (as guardian of the "public interest") has plenary control over both total capitalization and of the details of that capitalization. Section 77, subsection (d), provides merely that the Commission shall approve a plan that will (in its opinion) be "compatible with the public interest". There is nothing in the section referring to capitalization or details of capitalization (except the provision in subsection (b) that fixed charges shall be adequately covered by probable earnings); nothing about public interest as contrasted with or overriding private rights; nothing to limit the Court's power and duty, before it ap-

proves a plan, to be "satisfied", that it is fair and equitable. The Bankruptcy Act contains many other references to "public interest" or "public policy".[7] Obviously many of these can have no relation to details of capitalization or to capitalization at all. The phrase "public interest" in and of itself is not defined in the statute and certainly is not given a statutory meaning as broad as that attributed to it. As this Court said with reference to the Transportation Act, 1920 (U. S. C. Tit. 49), the criterion of the "public interest" is not "a mere general reference to public welfare without any standard to guide determinations * * *". It "has direct relation to adequacy of transportation service, to its essential conditions of economy and efficiency, and to appropriate provision and best use of transportation facilities * * *" (*New York C. S. Corp. v. U. S.*, 287 U. S. 12, 24, 25). So, with respect to Section 77, the "public interest" to be considered by the Commission must be related to the purpose of the statute, i.e., to provide for the reorganization of railroads.

To avoid misunderstanding it may be said at this point that we are not contending that the capital structure of a reorganized company has no relation to the public interest. Our position is that such structure involves considerations, not only of the public interest, but of the fairness and equity of the plan, and that the duty of the trial Court requires an independent judgment on the capitalization, as well as all other features of the plan, in so far as fairness and equity may be involved.

---

[7]Sections 14(d), 77(c)(13), 77(o), 77(p), 178, 212, 216(11), 221(5) and 456.

The Commission itself in its original report and order said (R. 243-4, quoted in opinion of District Judge, R. 1583, 34 Fed. Supp.):

> "It will be observed that so far as the capitalization of a reorganized company is concerned, section 77 contains no limitations other than that the fixed charges of the company shall be adequately covered by the probable earnings available therefor, and that the plan as a whole shall be compatible with the public interest. The public interest is not defined, but it would seem obvious that to be compatible with the public interest the plan must provide a capital structure for the reorganized company which will give it a reasonable opportunity to function efficiently and continuously as a going concern. This requires that the capitalization shall not exceed a conservative appraisal of the assets to be taken over by the reorganized company, and that proposed charges, whether fixed or contingent shall be within its probable earning power."

We have no criticism of the declaration that, to be compatible with the public interest, the plan must provide a capital structure for the reorganized company which will give it a reasonable opportunity to function efficiently and continuously as a going concern. We do, however, question the statements in the last sentence of the passage just quoted from the Commission's report. In this sentence the Commission indicates that in framing the plan it was guided by two considerations or bases, neither of which finds any justification or support in Section 77 or in other parts of the Bankruptcy Act. In so far as the value of the assets of the Debtor is to be considered in setting up a new capital structure, the Commission takes the position

that the appraisal of the assets should be a "conservative" one. The statute does not warrant any such limitation. Section 77 does not contemplate a reorganization based upon forced sale or liquidation values. It contemplates the reorganization of a debtor as a going concern.[8]

In determining whether a debtor is insolvent in the bankruptcy sense, the Bankruptcy Act itself provides (Section 1(19)) that the test is whether the aggregate of his property "shall not at a fair valuation be sufficient in amount to pay his debts". The statute, then, in so far as valuation may enter into the capital structure, has reference to a "fair" valuation, not a speculative, a liberal or a "conservative" one (*Duncan v. Landis*, 106 Fed. 839, 859).[9]

The assumed requirement that "proposed charges, whether fixed or contingent, shall be within its probable earning power" also introduces a limitation which is not in accord with the statute. The language of subdivision (d) of Section 77 is that the probable earnings shall be adequate to cover the "fixed charges"; not, as the Commission puts it, charges "whether fixed or contingent".

The Meaning of "Fair and Equitable".

The recent decision of this Court in

Case v. Los Angeles Lumber Products Co., 308 U. S. 106,

---

[8]See

In re Nathanson Bros. Co., 64 Fed. 912;
In re Klein, 197 Fed. 241.

[9]In this case we contend, and the Circuit Court of Appeals held, that no appraisal or valuation of the assets of the debtor was made by the Commission. The statement in the report is, however, indicative of an approach which had a bearing on the drastic limitation of capitalization adopted by the Commission.

makes it unnecessary to discuss at any length the requirement that a plan of reorganization shall be "fair and equitable". As stated in the opinion in the *Los Angeles Lumber Products* case (308 U. S. 115), the words "fair and equitable", as applied to reorganization proceedings, are words of art which, prior to the enactment of Section 77B, "had acquired a fixed meaning through judicial interpretations in the field of equity receivership reorganizations". Prior decisions, including the well known case of

Northern Pacific Railroad Co. v. Boyd, 228 U. S. 482,

are cited. The effect of the decisions culminating in the pronouncement in the *Los Angeles Lumber Products* case is that no plan is fair and equitable which does not recognize and protect the rights of creditors according to their respective priorities in the assets of the corporation. In this recent decision, the Court refers to

Louisville Trust Co. v. Louisville N. A. & C. R. Co., 174 U. S. 674,

as one in which the Supreme Court reaffirmed the "former rule" that "the stockholders' interest in the property is subordinate to the rights of creditors; first of secured and then of unsecured creditors".

In the *Los Angeles Lumber Products* case the corporation was insolvent, both in the equity and the bankruptcy sense. Under these circumstances the Court held that a plan which permitted stockholders to participate in the reorganization was not "fair and equitable" to the bondholders who obviously could not be paid more than a fraction of their claims. But in a case where (and we contend this is such a case) the corporation is not found to be insolvent in the bankruptcy sense, there is no justification,

in fairness and equity, for excluding the unsecured claims from participation. Furthermore, where the value of the assets exceeds the amount of all claims, secured and unsecured,—as the respondents claim to be the fact here—there is no justification for denying participation to the holders of the stock. It is conceded by us that the creditors have the first right to resort to the assets of the corporation in the order of their priorities to the extent of those assets, but they are not entitled to take all the assets if their value exceeds the amount of the claims. If it is "fair and equitable" that the prior right of creditors to resort to the assets shall be recognized, it is equally "fair and equitable" that when full recognition has been given to the claims of creditors, any surplus of value shall be made available for the stockholders. This is a necessary corollary of the rule laid down in the *Boyd* case and the other decisions referred to in the *Los Angeles Lumber Products* case.[10] The principle that junior claimants are entitled to participation after full recognition has been given to prior claims is declared in

Kansas City T. & R. Co. v. Central U. T. Co., 271 U. S. 445, 455

(an equity foreclosure case) where the Court said:

> "Unsecured creditors of insolvent corporations are entitled to the benefit of the values which remain after lienholders are satisfied, whether this is present or prospective, for dividends or only for purposes of control."

II.

THE COURT BELOW CORRECTLY HELD THAT THE DISTRICT COURT COULD NOT AND DID NOT EXERCISE AN "INFORMED, INDEPENDENT JUDGMENT" ON THE FAIRNESS AND EQUITY OF THE PLAN FOR THE REASON THAT IT DID NOT HAVE BEFORE IT THE NECESSARY FINDINGS OR APPRAISALS OR DETERMINATIONS OF VALUE WHICH ARE ESSENTIAL TO PASSING UPON THE EQUITY AND FAIRNESS OF A PROPOSED PLAN.

Findings of Value of Debtor's Property and of Its Earning Capacity Are Essential.

The decision here under review was rendered by the Circuit Court of Appeals for the Ninth Circuit on November 28, 1941. Two weeks later the Circuit Court of Appeals for the Seventh Circuit rendered its decision in a similar proceeding for the reorganization of another railroad company (*In re Chicago, Milwaukee, St. Paul and Pacific Railroad Company*, 124 Fed. (2d) 754). In each of these cases the order of the District Court approving a plan of reorganization certified to it by the Commission was reversed. The respective Courts of Appeals based their decisions primarily, if not exclusively, upon the law declared by this Court in the *Consolidated Rock Products* case, supra, decided March 3, 1941, after the respective District Courts had passed on the plans of reorganization for the Western Pacific and the Chicago, Milwaukee.

Deeming the holdings in the *Consolidated Rock Products* case to be controlling here, and to require the reversal of the District Court's order approving the plan, we ask leave to recall to this Court a few of its own expressions bearing on the point of the necessity of findings of value:

> "On this record no determination of the fairness of any plan of reorganization could be made. Absent

the requisite valuation data, the court was in no position to exercise the 'informed, independent judgment' (National Surety Co. v. Coriell, 289 U. S. 426, 436) which appraisal of the fairness of a plan of reorganization entails. Case v. Los Angeles Lumber Products Co. 308 U. S. 106. And see First Nat. Bank v. Flershem, 290 U. S. 504, 525." (p. 520)

* * * * * * *

"We have already noted that no adequate finding was made as to the value of the assets of Consolidated. In view of what we have said, it is apparent that a determination of that value must be made so that criteria will be available to determine an appropriate allocation of new securities between bondholders and stockholders in case there is an equity remaining after the bondholders have been made whole." (p. 524)

* * * * * * *

"In the second place, there is the question of the method of valuation. From this record it is apparent that little, if any, effort was made to value the whole enterprise by a capitalization of prospective earnings. The necessity for such an inquiry is emphasized by the poor earnings record of this enterprise in the past. Findings as to the earning capacity of an enterprise are essential to a determination of the feasibility as well as the fairness of a plan of reorganization." (p. 525)

The *Consolidated Rock Products* case involved a proceeding under Section 77B. The "findings" or "determinations" which this Court declared to be necessary were findings or determinations of the District Court or Judge. Under Section 77B no administrative body was interposed between the formulation of a plan of reorganization and the Court's action on that plan. But in a railroad reorgani-

zation under Section 77, any finding or determination of value that is necessary is to be made by the Commission and certified to the Court.[11] We must, then, look to the report of the Commission to ascertain whether the requisite findings were made. The District Judge was not called upon to make independent findings of value and did not in fact undertake to do so.[12]

When we contend that the record shows no findings by the Commission of the elements essential to enable the Court to reach a judgment on the fairness of the plan, we are not speaking of "findings" expressed in any technical or formal arrangement of words. Our position is, simply, that to comply with the statute, the Commission must, in its report, disclose that it has made a "determination" or "appraisal" or "finding" of the value of the debtor's assets. We are not, for the present purpose, concerned with the form of words in which the determination of value must be expressed, although it will be noted that this Court, in the *Consolidated Rock Products* case, uses the word "finding". Whatever the mode of expression, there must be something in the report to show what, in the judgment of the Commission, the value of the property was. Lacking this, the District Court did not have the foundation upon which it could exercise an "informed, independent judgment" on the fairness and equity of the plan. Nothing short of this was a compliance with the requirement of subsection (d) of Section 77 that in its report

---

[11]Last paragraph of subsection (e): "If it shall be necessary to determine the value of any property for any purpose under this section, the Commission shall determine such value and certify the same to the court in its report on the plan."

[12]34 Fed. Supp. 493.

"the Commission shall state fully the reasons for its conclusions".

Even though there be no express statutory requirement of findings, it is essential to the validity of orders of administrative officers or bodies that they be supported by adequate findings of basic facts.[13] It cannot be open to question, since the decision of the *Consolidated Rock Products* case, that the determination of the value of the Debtor's property is "basic" on a review of a plan of reorganization which extinguishes junior interests against the claim of their owners that the assets are sufficient in value to allow participation by such owners.

It is true, as urged by the petitioners, that the Commission had before it a mass of data—investments, valuations under Section 19(a) of the Interstate Commerce Act, past earnings, financial history, physical condition, and other elements—upon which a finding or determination might have been made. But to appraise the value from these factors is a process requiring the exercise of judgment and discretion resulting in a final figure of value.[14] The record fails to show that the Commission made any one of the varying determinations of value which might have

---

[13] *Panama Ref. Co. v. Ryan*, 293 U. S. 388; *U. S. v. Chicago, Milwaukee etc. R. Co.*, 294 U. S. 499; *Florida v. U. S.*, 282 U. S. 194.

[14] "The ascertainment of the value of a railway system is not a matter of arithmetical calculation and is not governed by any fixed and definite rate. Facts of great variety and number, estimates that are exact and those that are approximations, forecasts based on probabilities and contingencies have bearing and properly may be taken into account to guide judgment in determining what is the money equivalent—the actual value—of the property." (*Rowley v. C. & N. W. R. Co.*, 293 U. S. 102, 109.)

been fairly and reasonably made on the basis of these data.

The Court below (124 Fed. Supp. (2d) 139) listed sixteen items, the values of which (as that Court held) the Commission should have, but did not, determine and certify to the Court. The first of these is the value of "the Debtor's entire property".[15]

This respondent is primarily interested in this item, since only if the total value of the Debtor's assets is less than the sum of the prior and secured claims, can the exclusion of the unsecured creditor and the sole stockholder from participation in the reorganization be sustained as "fair and equitable". By virtue of such exclusion, the other fifteen items affect, more directly, the allocation of new securities among the different classes of secured creditors. Two of these (A. C. James Co. and Railroad Credit Corporation) are also respondents opposing the Plan, and we leave to them the argument of the question whether findings on the items listed (other than the first) are requisite.[15a]

---

[15]The want of a finding of "earning capacity" is treated separately, infra, page 41.

[15a]The position of the petitioners on this question is, however, significant in its bearing on the underlying problem of the District Court's power and duty to reach an informed, independent judgment. That position (Inst. Bondholders' Br. pp. 21-22, 111, Br. of Crocker etc. Bank, et al., Trustees, pp. 23-24), is, in effect, that for the purpose of determining the allocations of securities among the classes which are allowed to participate, specific determinations of value of the existing claims of these classes, or of the securities allotted to them, are not necessary, but that it is sufficient if the Commission finds, as it did here, that the securities allotted "represent the equitable equivalent of the debtor's assets available for the satisfaction of claims" (R. 316) and, that "Based upon our conclusion as to relative priority, value and equity of the various claims and the value of the new securities available in ex-

The petitioners virtually concede that the Commission made no finding or determination of the value of the Debtor's property. Their position is (a) that a finding of value, expressed in dollars, is not necessary; and (b) that the authorized capitalization under the Plan imports a determination of value, or at least maximum value.

(The argument based on "findings" that the unsecured claims and the stock equity had no value is treated infra, under head III of this brief.)

---

change therefor, we find that the new securities should be allotted as follows: • • •" (R. 317).

What the conclusion of the Commission was as to the "value" of the various claims or the "value" of the new securities available in exchange therefor, does not appear in the report, other than by general discussion of the character and amounts of different securities which the Commission deems warranted.

Whether or not, under the plan, any creditor receives the "equitable equivalent" of the value of his claim is, we submit, a matter on which that creditor is entitled to the "informed, independent judgment" of the Court. How can the Court form such a judgment in the absence of a disclosure by the Commission of the basis upon which it reached the conclusion that the securities allotted did constitute such "equitable equivalent"? What the Commission did was to first fix the amount and classification of allowable capitalization, and then, on finding relative priorities, and finding that there were not enough new securities available to fully compensate claimants secured by refunding bonds (R. 271) to distribute the new securities among the secured claimants. If it were, as petitioners claim, a compliance with Section 77 to allot new securities to each class of claimants, on the basis, not of the value of their claims and the value of the new securities, but of the "equitable equivalent of the debtor's assets • • • in terms of the new securities to be issued" (Br. of Inst. Bondholders, p. 79), it is still true that, in order to furnish to the Court a full statement of "the reasons for its conclusions" (Sec. 77, subsec. (d)) the report must contain enough to enable the Court to ascertain how and why the Commission reached the conclusion that the securities allotted did in fact represent such "equitable equivalent" and whether that conclusion was sound.

In effect, the argument of petitioners subordinates the Court's judicial function of determining independently the "fairness and equity" of the plan to the asserted superior administrative power of the Commission, in the "public interest", to so limit total capitalization as to necessarily cut down or prevent the participation of some classes.

"Dollars and Cents Valuations"

The petitioners for certiorari in No. 7 and No. 8 admit the lack of a finding of value, in the one case directly, in the other inferentially.[16] Both petitions (as well as the briefs of these parties) refer repeatedly to "dollars and cents valuations" or "exact dollar valuations" or like expressions[17] in the effort to show that no such valuations are required.

We know of no way in which the "value" of property (whether it be "market value", or "fair value", or "cash value", or value for purposes of taxation, or rate-making or reorganization) can be measured or expressed otherwise than in terms of money, and that means in terms of dollars. We have already quoted[18] a passage from the opinion of this Court in *Rowley v. C. & N. W. R. Co.*, 293 U. S. 109, in which the opinion treats the "actual value" of railroad property as synonymous with its "money equivalent".

The Authorized Capitalization Is Not a Determination of the Value of Debtor's Property.

The petitioners in their briefs in the lower Court relied upon four District Court cases[19] in support of the proposition that the Commission's findings of permissible capital-

ization, and findings that various claims and stock interests were without value, were sufficient, and that they were equivalent to a finding that the total capital authorized was equal to (or in excess of) the value of the Debtor's property for purposes of reorganization. All these cases were decided before this Court had rendered its decision in the *Consolidated Rock Products* case. Following that decision the lower Court in the case at bar and the Circuit Court of Appeals for the Seventh Circuit[20] took the contrary view to that which had been declared by the District Courts. It is submitted that the conclusions reached by the two Circuit Courts of Appeals embodied the necessary result of the holding of this Court. Not only did the opinion in the *Consolidated Rock Products* case declare specifically that a finding of the value of the Debtor's property was essential, but that decision, by necessary implication, rejected the idea that the fixing of the authorized total capitalization constitutes a finding of value. The plan before the Court in the *Consolidated Rock Products* case set forth the amount, the character and the details of the capitalization of the reorganized company. If such capitalization had, in itself, been regarded as equivalent to, or comprising, a determination of the value of the Debtor's property, the order of the District Court approving the plan would not have been reversed for want of a finding of such value.

Furthermore, we may point out that the capitalization in this case, unlike any of the others cited, does not fix a total capitalization in any specific or ascertainable

[20] *In re Chicago Milwaukee, St. Paul & Pacific R. R. Co.*, 124 Fed. (2d) 754, reversing the District Court's decision in 36 Fed. Supp. 193.

amount. In each of the cases cited, as well as in the case at bar, the capitalization authorized by the Commission provided for various forms of debt obligations and for preferred stock with a par value, together with no-par common stock. In each of the cases other than the Western Pacific, the report of the Commission treated the no-par common stock at a value of $100 a share, which, when added to the other forms of securities, made up a total capitalization in a specific number of dollars. In the case at bar, the various forms of indebtedness securities and preferred stock of the par value of $100 per share aggregate $65,819,422. No specific value was assigned to the 319,441 shares of no-par common stock.[21] The Plan provides for the distribution of common stock to the first mortgage bondholders and the Reconstruction Finance Corporation at $57 per share, to the Railroad Credit Corporation of like shares of common stock at $62 per share; to the A. C. James Co. of like shares at no specific price (R. 390-92). It is clear that in order to find or fix the amount of total capitalization authorized, it was necessary for the Commission to assign some dollar value to each of the shares of common stock. Since the common stock was assigned to two creditors at $57 a share, to another at $62 and to another at an unstated value, what basis is there for saying that the entire issue of common stock, which embraces the stock assigned to all these creditors, shall be valued at $57 rather than $62 or some other figure?

[21] Unless, as indicated in various passages of the Commission's report (R. 244, 245, 256, 259, 269, 321, 359) the Commission treated the no par stock at $100 per share, in which event the total capitalization would be several million dollars greater than the total of the secured claims recognized under the Plan, together with the unsecured claims.

III.

INSUFFICIENCY OF SO-CALLED "FINDINGS" OF COMMISSION THAT STOCK EQUITY AND UNSECURED CLAIMS HAVE NO VALUE.

As pointed out above, this Court has clearly held in the *Consolidated Rock Products* case that in a reorganization proceeding under Section 77B (and the holding is equally applicable with respect to Section 77) it is impossible to reach an "informed, independent judgment" respecting the fairness and equity of a plan of reorganization in the absence of findings or determinations of the value of property of the Debtor and of the elements of that property entering into the reorganization plan.

This rule was the principal basis upon which the Circuit Court of Appeals for the Ninth Circuit reversed the Order approving the Plan in the Western Pacific case, and upon which the Circuit Court of Appeals for the Seventh Circuit reversed the order of approval in the *Chicago, Milwaukee* case. In each instance the Commission had made a finding that the stock equity was without value. In the Western Pacific case it also made a finding that the unsecured claims were without value.[22] Do these so-called findings (R. 269-270) meet the requirements laid down in the *Consolidated Rock Products* case? It is submitted that they do not, and for several reasons:[23]

---

[22]No unsecured claims were involved in the *Chicago, Milwaukee* case.

[23]The findings in question were made under the provisions of subsection (e) of Section 77 which provide that if the Judge shall approve the plan, the plan will then be submitted to the creditors of each class and to the stockholders of each class for acceptance or rejection "provided that submission to any class of stockholders shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding (a) that at the time

(a) The finding of the Commission that the stock equity or the unsecured claim has no value is, under the statute, made for a limited purpose only. Its effect is to exclude stockholders or creditors of the respective classes from the right to vote on a submission of a plan for acceptance or rejection. It has no relation to the exercise by the Judge of an "informed, independent judgment" on the fairness of the plan. These findings should not be perverted from their true purpose to that of support for the separate and distinct function of upholding the plan as fair and equitable.

(b) The so-called "findings" express merely conclusions, and not facts. In the absence of determinations of the value of the assets of the Debtor, the District Court is without any basis upon which to form an informed, independent judgment on the question whether there are values sufficient after properly recognizing the priorities of secured claims, to make some provision for unsecured claims, and thereafter for the stock equity, and is hence without a basis for determining independently whether the plan is fair and equitable.

In re 620 Church Street Building Corp., 299 U. S. 24, relied on by petitioners, does not uphold the

---

of the finding the corporation is insolvent, or that at the time of the finding the equity of such class of stockholders has no value • • • provided further, that submission to any class of creditors shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding • • • that at the time of the finding the interests of such class of creditors have no value". After such submission the results of the vote are to be certified to the Judge who thereupon, if the plan has not been accepted by the requisite majority of each class entitled to vote, may either confirm or refuse to confirm the plan.

sufficiency, of itself alone, of a bare ultimate conclusion of "no value" in junior claims. The findings of the trial Court are set forth in the opinion of this Court. They declare that debtor's property had a fair market value of $245,125 and that the amount of the first mortgage bonds was $445,500. These specific determinations fully justified—indeed required—the conclusions that the claims of junior mortgagees had no value and that there was no equity above the first mortgage. In the instant case there was no finding or determination of the value of the Debtor's property, and no basis therefore upon which the Court could exercise an informed, independent judgment on the presence or absence of value in the unsecured claims or the stock equity.

(c) Subsection (e) authorizes the exclusion from the right to vote if the Commission finds that "at the time of the finding" the stock equity or the interests of a class of creditors has no value. The "finding" therefore relates solely to the time when it is made by the Commission. If, as we endeavor to show later in this brief (p. 54 et seq.), subsequent changes of fact and condition are to be regarded in determining the "fairness and equity" of the plan and the propriety of the Judge's order of approval, such inquiry cannot be foreclosed by the Commission's declaration at an earlier date that the excluded claims and interests had no value.

In the opinion of the Circuit Court of Appeals in the Western Pacific case there was no reference to the question now under discussion. In the Chicago, Milwaukee

case,[24] while the Court, following the decision of this Court in the *Consolidated Rock Products* case, declared with emphasis that "findings must be made on all vital issues, controverted and uncontroverted, and must include values of properties separately considered and also of debtor's property as a whole. Findings must cover values of liens to be surrendered and values of securities given in exchange," its conclusion with reference to the finding that the stock equity was without value was not, we submit, entirely clear. In response to a petition for rehearing the Court, on January 12, 1942, filed a supplemental opinion,[25] in which it declared in effect that the finding that the stock equity had no value was sufficient. It went on to say, however, that the Commission "need not further investigate or make further finding on this issue *unless it is convinced that changed conditions in railroad earnings warrant it.* In other words, the Interstate Commerce Commission has jurisdiction of the matter and may, although it is not required to do so, reexamine the evidence or receive additional evidence. if, in its judgment, justice to the parties requires it." (Italics ours.) Even under this holding, which we venture to question, the so-called findings of no value are not treated as final and conclusive, at least in a case in which, for want of other necessary findings, the order of approval must be reversed. That this is such a case is, we submit, beyond question. Where certain classes of secured creditors do not receive recognition in full, the necessity for findings of value of the property as a whole and of that subject to their liens is clearly essential. As-

[24] 124 Fed. (2d) 754.

[25] Not reported—copy printed as appendix to reply brief of petitioners Frederick H. Ecker et al. for certiorari.

suming, therefore, that the Order of the District Court approving the Plan is to be reversed, and that that Court will then be called on (unless it dismisses the proceeding) to refer the matter back to the Commission, we urge that every practical consideration argues against a ruling that the findings of the Commission that the unsecured claims and the stock equity were without value should be deemed final and conclusive in subsequent proceedings. If, as we believe, the proceeding will again be in the hands of the Commission for further action and consideration, the Commission will undoubtedly reconsider the situation in the light of facts as they may then appear. It will be necessary, in order to frame a new plan and to make proper allocation of new securities as between first mortgage bondholders and creditors secured by pledge of refunding bonds, to determine the value of the property subject to the liens of the respective mortgages. If the sum of the values so found should exceed the total of the secured claims—a result that is more than probable—findings that unsecured claims and stock equity are without value would be in conflict with the specific findings of value of the component parts of the Debtor's property. If the proceedings go back to the Commission for reconsideration there would be no advantage in avoiding a definite finding of the value of the entire assets of the Debtor. Such finding could easily be made and, when made, would afford a proper basis for the final conclusion that the unsecured claims or the stock equity, or both, have, or do not have, value.

Whatever may be the view of this Court on the supposed divergence between the views of the Courts of Appeals for the Seventh and Ninth Circuits, it is submitted

that if a reversal and recommitment be required for want of necessary findings of value in any respect, the Commission should be required to reconsider the entire matter as of the date of its new report and to make findings of value to support, not only its determinations with respect to the secured claims, but also with respect to the unsecured claims and the stock equity. Nothing substantial would be gained by sending the proceeding back to the Commission to make findings of the value of the component parts of the property for the purpose of dealing properly with secured claims, and at the same time requiring the Commission to close its eyes to the effect of such findings on unsecured claims and stock equity. There would be no reason for such action other than that the Commission had once concluded, without the knowledge now available, that at an earlier date the unsecured claims and the stock equity were without value.

IV.

DISCUSSION OF EARNINGS AS MEASURE OF VALUE (WITHOUT REGARD TO SPECIFIC PROVISIONS OF SECTION 77).

In the *Consolidated Rock Products* case, this Court emphasized the controlling importance of the earning capacity of a productive property as the criterion, in reorganization plans, of the value of that property (*312 U. S.* at 312). In the same connection the Court pointed out that "valuations for other purposes are not relevant to, or helpful in, a determination of that issue, except as they may indirectly bear on earning capacity." Assuming, for the moment, that these declarations are as applicable to

a proceeding under Section 77 as to one under 77B, it is, we submit, clear that the Judge's approval of the plan of reorganization in this case cannot stand because of the failure of the Commission to make any finding or determination of the earning capacity of the properties of the Debtor. The report of the Commission contains considerable discussion of past earnings and of the necessity of a realistic relation of the capital structure of the reorganized company to its actual earning power, but nowhere can be found a finding, or determination, or estimate, of what, in terms of money, the prospective earnings are likely to be, or what in the judgment of the Commission the earning capacity of the railroad is. This, as pointed out in the opinion in the *Consolidated Rock Products* case,[26] is essential to a determination of the fairness of a plan of reorganization.

Past Earnings Alone Are Not a Sufficient Basis for Appraising Earning Capacity.

The Commission[27] looked primarily to the past earnings record of the Debtor. The District Judge followed the same line of approach. In his opinion[28] he stated, after tabulating the Debtor's earnings for the years 1922-1939 that "the capitalization permitted by these earnings is a

---

[26] "In the second place, there is the question of the method of valuation. From this record it is apparent that little, if any, effort was made to value the whole enterprise by a capitalization of prospective earnings. The necessity for such an inquiry is emphasized by the poor earnings record of this enterprise in the past. Findings as to the earning capacity of an enterprise are essential to a determination of the feasibility as well as the fairness of a plan of reorganization." (p. 525.)

[27] R. 244-57.

[28] R. 1592; 34 Fed. Supp. at p. 503.

mere matter of computation". In the accompanying footnote the Court, in endeavoring to show the results of such computation, took averages over a five-year, a ten-year and a seventeen-year period and capitalized them at 5%. These computations are not to be found in the Commission's Report, but, as stated in the footnote, were taken from the brief of the Institutional Bondholders (petitioners here). It is obvious that the results would be different if different periods were taken or if a different rate were used for capitalization. (It must be remembered, however, that the report of the Commission does not disclose that it attempted to capitalize earnings at all, much less at the assumed rate of 5%). In any event, where the inquiry is into the value of property as indicated or determined by its earning *capacity*, the real question is not what the property earned in the past, but what it may fairly be deemed able to earn in the future. The record of past earnings serves no purpose other than to afford a basis upon which one may forecast or estimate what the earnings may be in the future.

> "Value, under any plausible theory of capitalized earning power, is necessarily forward looking • • • The past earnings are therefore beside the point, save as a possible index of future earnings."[29]

More than this, the extent to which past earnings may be indicative of future possibilities depends upon the circumstances and conditions under which the property was operated in the past, which may be very different from those which will govern its performance in the future. In

[29]Bonbright on Valuation, 250.

the *Consolidated Rock Products Company* case[30] the Court says, in speaking of the test of earning capacity:

> "Since its application requires a prediction as to what will occur in the future, an estimate, as distinguished from mathematical certitude, is all that can be made. But that estimate must be based on an informed judgment which embraces all facts relevant to future earning capacity and hence to present worth, including, of course, the nature and condition of the properties, the past earnings record, and all circumstances which indicate whether or not that record is a reliable criterion of future performance."

In the case at bar the record shows that during the period preceding the Commission's Report the conditions under which the Debtor operated were such that its earnings could not be taken as a satisfactory guide to what it was likely to do thereafter.

It is hardly necessary to point out that the year 1929 inaugurated a period of severe economic and financial depression which reduced the traffic and earnings of railroads as well as the business of other enterprises. Past earnings during a depression period can obviously furnish only a very uncertain guide to even the immediate, to say nothing of the remote, future. Furthermore, the properties of the Debtor had not, in the years preceding 1929, been maintained in proper operating condition. In 1927 an extensive program of rehabilitation was undertaken, upon which approximately $8,000,000 was spent before 1931 (Stip. Par. 50, R. 1052). A similar program was resumed, by the trustees, in the years 1936-1938, and approximately

[30] 312 U. S. at p. 526.

$10,0000,000 additional was so expended during those years (See Exh. "C" to Stip. R. 1214; Stip. Par. 132, R. 1092). As a result of the 1926-1938 rehabilitation program, there is no deferred maintenance in the Debtor's properties and its facilities and equipment are sufficient to handle traffic expeditiously and efficiently (Stip. Par. 73, R. 1063). In giving consideration to past earnings, it is necessary, not only to adjust the figures with reference to the amounts spent for rehabilitation but charged to operations under the Commission's accounting rules (as has been done in the figures presented to the Commission and quoted by the District Court in its opinion), but also to bear in mind the effect on future earnings of the improved condition of the properties and the present ability of the Debtor to handle traffic efficiently.

Another important factor is the construction by the Debtor of its Northern California Extension, connecting the Western Pacific System with that of the Great Northern Railway Company (Stip. Par. 51, R. 1052-53). The additional earning power created by this addition became fully operative only during the latter part of the period preceding the report of the Commission.

V.

OTHER ELEMENTS TO BE CONSIDERED IN VALUATION UNDER SECTION 77.

(a) Elements other than earning capacity.

Up to this point we have assumed that the expressions of this Court, in the *Consolidated Rock Products* case (a 77B case), regarding earning capacity as a criterion of value, are equally applicable to a proceeding under Sec-

tion 77. We venture to suggest, however, that the views so advanced should be qualified when the inquiry arises in a railroad reorganization. One of the amendments of 1935 to Section 77 adds, to subsection (e), a definition of the basis upon which value of property of a railroad corporation shall be determined. The provision reads:

> "The value of any property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present and prospective, and all other relevant facts. In determining such value only such effect shall be given to the present cost of reproduction new and less depreciation and original cost of the property, and the actual investment therein, as may be required under the law of the land, in light of its earning power and all other relevant facts."

Notwithstanding the vagueness of the language—a vagueness which was perhaps intentional[31]—the enactment clearly requires that consideration be given to factors other than earning power. No doubt, "earning power of the property, past, present and prospective" is declared to be an important, and perhaps the most important, element in the inquiry, but it cannot, consistently with the language of the statute, be regarded as the sole or exclusive element.

Clearly, we submit, when the Congress provided that consideration should be given to earning power "and all other relevant facts" it did not regard earning power as the sole relevant fact. When it provided that only such

---

[31]See statement of Mr. Leslie Craven, draftsman of the provision, quoted in opinion of District Judge (34 Fed. Supp. 500 (R. 1584)).

effect should be given to cost of reproduction, cost and investment, as required under the law of the land in light of its earning power and all other relevant facts, it again made manifest its purpose that some weight ought or should be given to the enumerated factors other than earning power.

In the present case, neither the Commission nor the District Court made any specific determination or finding of the value of the property. It had, however, made valuations of the property and the investment of the Debtor on a number of earlier occasions, and made one or two quite recently. Some of these prior valuations are referred to in the Commission's Report. These valuations are set forth in the Stip. The subject is fully covered in Paragraphs 57-71, inclusive, of the Stip. (R. 1058-63). We tabulate here the different valuations found or referred to by the Commission for various purposes, arranging them in order of amount for convenient comparison with the total of the secured claims—$87,888,660—and the total of all claims, secured and unsecured—$95,699,502.

Value Found	Nature of Finding	Paragraph of Stip.
$139,600,455	Final valuation of Debtor's properties, plus final valuations of properties of subsidiaries, pursuant to Sec. 19(a) of Interstate Commerce Act, plus net costs of additions and retirements between valuation dates and 12/31/35, as stated in Commission's report of 10/10/38 herein	57, 58 & 59

	vestment made by Debtor between valuation date and 12/31/35	70
$144,619,851	Final valuation of Debtor's properties, plus final valuations of properties of subsidiaries, pursuant to Sec. 19(a) of Interstate Commerce Act, plus capital expenditures between valuation dates and 12/31/35, as stated in Proposed Report of Commission's Bureau of Finance herein, dated 8/2/37	60, 61
$144,978,559	Investment in road and equipment less accrued equipment depreciation as of 12/31/38	71
$147,056,283	Total capital assets as of 12/31/31, as found by Commission in its report dated 2/27/32 authorizing issuance of $15,000,000 of general and refunding mortgage bonds	64
$148,796,047	Total capital assets as of 5/31/32, as found by Commission in its report dated 12/9/32 authorizing issuance of $4,000,000 of general and refunding mortgage bonds	65
$150,907,623	Valuations found by Commission under Sec. 19(a) of Interstate Commerce Act, with additions, betterments, etc., since valuation dates as shown on books of trustees as of 12/31/38	68
$166,960,037	Total investment of Debtor as shown on its balance sheet pre-	

Value Found	Nature of Finding	Paragraph of Stip.
	pared in accordance with Commission's accounting rules as of 12/31/35	69
$171,096,992	Book value as of 11/30/36, as stated in Proposed Report of Commission's Bureau of Finance herein, dated 8/2/37	62
$173,650,980	Assets per balance sheet of Debtor's trustees as of 6/30/38, as stated in Commission's report of 10/10/38 herein	63
$174,936,239	Assets per balance sheet of Debtor and trustees as of 8/31/38, as stated in Commission's report dated 11/10/38 authorizing borrowing of $10,000,000 by trustees	66
$175,263,531	Assets per balance sheet of Debtor as of 8/31/39, as stated in Commission's supplemental report dated 11/21/39 authorizing extension of trustees' certificates	67

All of these figures were before the Commission before it made its modifying report and order of June 21, 1939 in this proceeding, except those in connection with the report of the Commission dated November 21, 1939, authorizing an extension of maturity of the trustees' certificates theretofore issued (Stip. Par. 67, R. 1061).

The final valuations of the properties of the Debtor and of its subsidiaries under 19(a), with the addition of the net costs of additions and retirements necessary to bring

them down to the later dates under consideration (Stip. Pars. 57-59, R. 1058-9), and the showing of total assets on the books of the Debtor's trustees (Stip. Par. 63, R. 1060) are referred to without disapproval, question or criticism in the report of October 10, 1938 (R. 224).

The report of October 10, 1938 (R. 224) refers to the Commission's valuation under Section 19(a) of the Interstate Commerce Act, as a report of "the value for rate-making purposes." There is no warrant in the law for any attempt to so limit the purposes for which such a valuation is to be used. The Interstate Commerce Act, of which Section 19(a) is a part, gives the Commission various powers other than that of rate-making, and the value fixed under Section 19(a) is applicable to the exercise of some of these. "It is apparent, therefore, that the establishment of a base for the fixing of rates is merely one of a number of objectives to be attained through this valuation. Nowhere in the Act is there anything that either expressly or by inference can be distorted into the limitation of this valuation for rate-making purposes. The statute, on the contrary, provides that it shall be a valuation of all the property of the railway company." (*New York N. H. etc. R. Co. v. I. C. C.*, 55 Fed. (2d) 1028, 1035). One of the Commission's powers is to control the issuance of securities by railroads. (Section 20(a)). With this in mind, the Court said in

Delaware & Hudson Co. v. U. S., 295 Fed. 558, 560:

> "The evident object of the statute (Sec. 19(a)) is to ascertain for purposes of rate-making and money borrowing the reasonable and probable going value of that property which is devoted to serving the public as a common carrier."

Some of the findings of value of the property of the Debtor, as set forth in the Stip., were made by the Commission in proceedings for the authorization of securities, as when the Commission, in authorizing the issuance of refunding bonds, found the capital assets of the Debtor, as of December 31, 1931, and as of May 31, 1932, respectively, to be something over $147,000,000 and something over $148,000,000 (Stip. Pars. 64 and 65, R. 1060-61).

The same is true of the reports of November 10, 1938 and November 21, 1939, authorizing the issuing and the extension of Trustees' certificates (Stip. Pars. 66, 67, R. 1061). The first of these reports states assets in excess of $174,000,000 and the second in excess of $175,000,000.

Comparing all of these different figures we see that the lowest valuation of the properties of the Debtor is the one referred to in its report of October 10, 1938, which shows a total valuation, as of December 31, 1935, of $139,600,455. The book value of the assets of the Debtor is $171,096,992.80 as of November 30, 1936 (Stip. Par. 62, R. 1060).

Disregarding all but the least of these figures, i. e., $139,600,455, there is a difference between the value of the properties of the Debtor and the total secured claims (i. e., $87,888,660, which alone are given recognition in the Commission Plan) of over $50,000,000. On the same basis there is an excess of asset value of more than $40,000,000 over the total amount of claims secured and unsecured.

(b) Under Section 77 valuation of railroad property is to be based—in addition to "other relevant facts"—on "earning power", not on "prospective" or "probable future" earnings.

In the event that this Court shall deem it proper (even though, perhaps, not necessary to the decision of the appeals before it) to interpret the valuation provision of subsection (e), we submit the following suggestions, based on the language of the legislative enactment.

The ultimate point of inquiry (apart from "other relevant facts") is the *earning power*, i. e., what, as an enterprise dedicated to a public service, and subject to regulation in the public interest, it is capable of earning. As a guide or help in estimating that capacity, regard may be had to past earnings and to earnings which may reasonably be anticipated in the future, but neither of these factors expresses the final test, or measure, or basis of value. Each is merely an indication, which, with others, furnishes an aid to an appraisal or estimate of what the property is capable of earning. That past or present earnings, by themselves, do not afford a sufficient foundation for estimating what the property might, or could, earn in the future, is clearly set forth in the passage already quoted (ante, p. 43) from the opinion in the *Consolidated Rock Products* case.

Nor are the "prospective" or "probable" earnings the equivalent of "earning power". The words "past, present and prospective", in subsection (e), do not refer to actual earnings or an estimate of future earnings. They are used as a qualification of the term "earning power of the property". An estimate of prospective or probable earnings relates to a future period, of greater or shorter dura-

tion, and is necessarily based upon conditions existing at the time of the inquiry or reasonably foreseeable. What a property can earn—what it is capable of earning—is not the same as what, at any given time, it is likely to earn over a future period.

Section 77 itself differentiates between "probable earnings" and "earning power" and applies the terms to different purposes. Under subsection (b)(4) the plan is to provide for fixed charges in such an amount that "there shall be adequate coverage of such fixed charges by the probable earnings available for the payment thereof". When we come to the valuation provision of subsection (e) the statute departs from the measure of "probable earnings" and makes the basis "earning power" (with other relevant facts). This change of expression would, presumably, not have been adopted if the legislative body regarded the two phrases as synonymous. The Commission seems, however, to have viewed "probable earnings" not only as a limitation on fixed charges, as prescribed in subsection (b)(4), but also as a measure of valuation of the property, or of total capitalization. In its report of October 21, 1938 (R. 244), the Commission states that in fixing the capital structure of the reorganized company "consideration (must be) given to the investment in its property only to the extent that such investment is justified by the probable earnings reasonably foreseeable for the future".

It may be difficult to estimate the earning capacity of a railroad property. But the history of the Western Pacific property, before and after the formulation of the Commission Plan, shows that that capacity is much greater

than was envisaged by the Commission when it made its report. In some predepression years the Debtor's properties earned more than enough to meet all fixed charges under the old capitalization. In the past two and one-half years, it has again demonstrated its capacity to earn substantial amounts beyond the service of its pre-existing fixed charges, and the earnings are advancing steadily and at a rapid rate. The difficulty of estimating earning capacity affords no reason why the Commission should not be required to perform the task to the best of its ability. As this Court said in *Consolidated Rock Products* case (312 U. S. at p. 516): "an estimate as distinguished from mathematical certitude is all that can be made". So much, however, is, we submit, required by the language of subsection (e).

The distinction between "earning power" and "prospective or probable earnings" is not without a sound basis of reason. We are dealing with a statutory scheme for enforcing a reorganization which may result (as, in this case, it will if it becomes effective) in the extinction of interests which were of great value when acquired, and which, as their owners claim, still have substantial value presently, and greater prospective value. It is only fair and just that these interests should not be irrevocably destroyed, unless it appears that the property has not the capacity to earn enough—after full provision for all senior claims—to show a value which will permit a proper provision for the junior claimants.

VI.

EARNINGS SINCE COMMISSION'S REPORT WAS CERTIFIED.

The original Report and Order of the Commission approving a Plan of Reorganization was dated October 21, 1938 (R. 194-299). The modifying Report, under which the Plan here in question was certified to the District Court, was dated July 29, 1939 (R. 300-400). In its modifying and final Report the Commission did not review or reconsider any earnings later in ti... than those before the Commission when it made its original Report of October, 1938.

The monthly income statements showing the combined results of the operation of the properties of the Debtor and its subsidiaries from December, 1938, (shortly after the date of the original Report) up to the argument of the appeals in the Circuit Court of Appeals, were, pursuant to an Order of the District Court, dated April 7, 1942,[32] filed with the Clerks of the District Court and of the Circuit Court of Appeals, and made a part of the record on said appeals. Similar statements for months subsequent to September, 1941, have, by stipulation of the parties, dated July 18, 1942, and filed in this Court, been made a part of the record here. At the time of the preparation of this brief, the statements so filed and transmitted to this Court run to and include the month of June, 1942.

---

[32] (R. 2627)—The order recites that it is made pursuant to a stipulation of the parties.

For statements covering period from December, 1938 to May, 1941, see R. 2633-36; from June, 1941 to September, 1941, see R. 2649-57.

In the *Chicago, Milwaukee* case, later earnings were not incorporated in the record on appeal (124 Fed. (2d) 754, 763).

In view of the stipulations referred to, we assume that no party to these appeals will question our right to refer to the earnings record of the Debtor during the period that has elapsed since the Commission's Report. Regardless of the want of any such objection the Court may, however, have some doubt of the propriety of taking into account facts which have developed since the Commission acted, and indeed since the District Court made the order of approval which is the subject of the present appeals.

The holdings of this Court in analogous cases establish, we submit, the propriety, if not the necessity, of a consideration of the state of facts existing when the Court of final appeal renders its decision, even though the actions of the trial Court and of the Commission might be held to have been sustainable on the facts appearing when those earlier actions were taken.

In

Atchison etc. R. Co. v. U. S., 284 U. S. 248,

this Court held, in a suit by carriers to restrain the enforcement of an order of the Interstate Commerce Commission prescribing maximum rates for the transportation of grain, that the petitioner's constitutional rights had been invaded by the action of the Commission in refusing a rehearing sought on the ground that in the three or four years elapsing after the closing of the record before the Commission there had been material and important changes in the operating, traffic and transportation conditions which affected adversely the revenues of the carrier, and that "regardless of the question of the validity and propriety of the order when made, it would no longer be valid and proper in the light of the existing

circumstances."[33] In that case the changes were those incident to the depression beginning after the Commission had concluded its investigation of the facts. The Court took judicial notice of such changes.

Similarly in

Central Ky. N. G. Co. v. Railroad Commission, 290 U. S. 264,

a case involving the validity of a rate prescribed by a State Commission for the sale of natural gas, this Court held that it would take judicial notice of economic changes taking place while the case was pending before the Commission and the Court, and would frame its decree accordingly.[34]

In the instant case, as in the *Atchison* and *Central Kentucky* cases just referred to, the action assailed would, if sustained, operate in the future. In those cases the public utility affected would have been held to a rate which would be confiscatory under conditions existing at the time of the review by the Appellate Court, although not necessarily so at the time of the order of the Commission. Likewise here, the confirmation of the Plan of Reorganization would operate for all time in the future, and, in the case of this respondent, would absolutely destroy its investment and claim without any possibility of recovery or recoupment, no matter how much conditions had changed since the Commission made its report or might change hereafter.[35] Probably the Court would be warranted in

---

[33]284 U. S. 256.

[34]See also *Southern Pacific Company v. Bogert*, 250 U. S. 483.

[35]A similar principle has been applied by this Court in its holdings that an injunction properly granted under the law then in force should be set aside on appeal where there has been an intervening change in the law (*American Steel Foundries v. Tri-*

taking judicial notice of the sharp increase in railroad earnings that has taken place during the past two or three years. But it is not necessary here to rely on judicial notice alone, as the actual figures of this Debtor's recent increase of earnings are, under Stipulation and Order, before the Court.

The earnings record of the Debtor for the period since 1938 throws a strong light on the fairness of the Plan, formulated, as it was, when the results of the Debtor's operations for years after 1938 could not be known.[36]

The following is a table showing:

ADJUSTED[37] CONSOLIDATED EARNINGS AVAILABLE FOR INTEREST

For the years 1922 to 1938, inclusive (R. 1065-1066 and Supplemental Record)

1922	$2,204,890
1923	4,412,234
1924	3,241,823
1925	4,557,798
1926	4,868,390
1927	3,470,861
1928	4,376,972

City Central Trades Council, 257 U. S. 184, 201; *Texas Company v. Brown*, 258 U. S. 466; see, also, *Duplex Printing Press Co. v. Deering*, 254 U. S. 443, 464; *Tulare Irr. Dist. v. Lindsay-Strathmore Irr. Dist.*, 3 Cal. (2d) 489, 526-8).

[36] In the figures which follow we deal with the earnings as if the results for the entire year 1938 had been before the Commission, although the original Report was dated October 10, 1938.

[37] In this table the reported earnings are adjusted to take into account (a) rehabilitation expenditures 1927-1931 and 1934-1938; (b) amortization of discount on first mortgage bonds of Debtor; and (c) deductions and credits 1931-34 made by Commission to accord with its accounting rules (Stip., par. 76, R. 1065).

1929	3,718,436	
1930	2,381,529	
1931	220,494	(Deficit)
1932	283,912	
1933	474,365	
1934	1,396,353	
1935	1,377,026	
1936	1,901,423	
1937	1,077,407	
1938	225,431	

The later income statements showing results of the operations of the Debtor's properties for the full years 1939, 1940, 1941 and for the first six months of 1942 disclose the following earnings available for interest:

Year	As Reported	Adjusted
1939	$1,384,515	$1,519,916
1940	2,513,091	2,648,492
1941	4,551,738	4,687,140
1942 (1st 6 months)	4,080,090	4,147,791

The statements for the three and one-half years following 1938 show an enormous increase in the Debtor's earnings since the adoption of the Plan. This increase is no doubt due to a variety of causes. Since the adoption of the Plan business and industry have largely emerged from a period of depression to one of recovery, and, in the case of this Debtor, the efficient condition of its property, and the availability of the Northern California Extension have unquestionably contributed to its increased earnings. The stimulus to production and transportation incident to the war effort since December, 1941 and the lesser impulse created by preparations for defense during earlier months

have certainly played a large part in increasing the traffic and the earnings of railroad companies generally, among them the Western Pacific. We do not undertake to apportion the improved position of the Debtor among these various causes, nor do we pretend to be able to estimate the length of time during which the pressures of war, or of the post-war period to follow, will continue to exert a beneficial effect upon the earnings and earning prospects of the Debtor. At the least, it may be said with assurance that the Commission formulated its Plan at a time when the Debtor's properties had gone through a prolonged period of economic depression, and at a time when its earnings were almost at their lowest point. We believe there can be no doubt that if the Commission were today called upon to formulate a plan, in the light of the history of the three and one-half years that have elapsed since January 1, 1939, the ensuing plan would be very different from the one which was certified to the District Court.

In other words, the "other relevant facts" now appearing go far to demonstrate that the Debtor's property has an earning capacity greatly in excess of any estimate of such earning capacity which the Commission would have had to make (though in fact no estimate was made by it) in order to justify the capitalization provided by the Plan.

Summarizing the earnings figures tabulated above, we find out that in the year 1939 the adjusted earnings of the system available for interest increased from $229,097.45 (the figure for 1938) to $1,519,915.81, an increase of 563.04%; that in the year 1940 there was a further increase, bringing the adjusted earnings from $1,519,916 to $2,648,492, an increase of 74.25% over the 1939 figure.

The adjusted earnings for 1941 were $4,687,140, an increase of 76.97% over 1940.

(The figures of earnings available for interest for the first six months of 1942 do not lend themselves to an entirely trustworthy comparison, for the reason that probable federal income tax liability for the year 1942 cannot be determined with accuracy at this time. It may, however, be pointed out, as indicating the continuing upward curve of earnings of the Western Pacific system, that for this six months' period total railway operating revenues amounted to $16,235,602 as against $10,111,000.28 in the corresponding period of 1941,—an increase of 60.57%.)

To further illustrate the conditions which we have described we insert a chart showing graphically the earnings of the Western Pacific system from the year 1922 to the year 1941. The solid line on the curve indicates reported consolidated earnings available for interest as filed with the Interstate Commerce Commission. The broken line represents adjusted earnings available for interest.

The graph also indicates the points on the curve at which the Commission's original Report of October 10, 1938 and its final modifying report of June 21, 1939 were made. A glance at the chart is sufficient to show that the Commission Plan was formulated and announced at a time when the earning picture of the Debtor was extraordinarily unfavorable. The unadjusted earnings had reached the lowest point ever attained during the entire period depicted; while the adjusted earnings were at or near a point of decline exceeded only in the depths of the depression and then briefly. The subsequent upswing, which has already brought the earnings virtually up to the

highest point in the prosperous predepression level, had not yet manifested itself.

It is submitted that both the Commission and the Court failed to take into account the "other relevant facts" mentioned in subsection (e) of Section 77, or the "circumstances which indicate whether or not the (earnings) record is a reliable criterion of future performance", spoken of in the *Consolidated Rock Products* case. Because of their failure to do so the Commission and the District Court concluded (without supporting the conclusion by explicit findings) that the probable future earnings (or, in the words of subsection (e), the "earning power" of the property) would not warrant the inclusion of this respondent.

CONCLUSION.

It is respectfully urged that the decree of the Circuit Court of Appeals, reversing the order of the District Court approving the Commission Plan, should be affirmed, and that this Court give such instructions as it may deem proper for the guidance of the District Court and the Commission in the further steps to be taken in the proceeding.

Dated, San Francisco, California,
October 1, 1942.

BRIEF OF THE RAILROAD CREDIT CORPORATION, *Respondent*

To the Honorable the Chief Justice and the Associate Justices of the Supreme Court of the United States:

Five petitions for writs of certiorari to revie the decree of the United States Circuit Court of Appeals for the Ninth Circuit entered November 28, 1941, were filed with and allowed by this Court on April 27, 1942. In addition, a Memorandum was also filed by the Interstate Commerce Commission, through the Solicitor General, as *amicus curiae*, urging this Court to grant the petitions for writs of certiorari in these cases in order that the Commission's duties under Section 77 and the procedure to be followed and the findings to be made by it in preparing and certifying future plans of reorganization may be established by a definite decision of this Court.

OPINIONS BELOW

The opinion of the United States Circuit Court of Appeals for the Ninth Circuit, from which these several petitions for review on writs of certiorari were filed, was rendered on November 28, 1941, and is officially reported in 124 F. (2d) 136, (R. 2663). This opinion reversed the decree of the District Court which approved *in toto* the plan of reorganization certified to it by the Interstate Commerce Commission pursuant to Section 77(d) of the Bankruptcy Act (11 U. S. C. A. § 205) and is officially reported in 34 F. Supp. 493 (R. 1569 to 1600).

JURISDICTION

The jurisdiction of this Court is invoked under Section 240-a of the Judicial Code, as amended by Act of Con-

gress of February 13, 1935 (U. S. Code, Title 28, Section 347-a) and §24(c) of the Bankruptcy Act (11 U. S. C. § 47(c)).

SUMMARY OF ARGUMENT

Pursuant to the provisions of Rule 27(d) and subdivision 4 thereof of the Rules of this Court, respondent leaves to counsel for petitioners to include in their briefs a concise statement of the case. For purposes of clarity, however, and to facilitate an immediate understanding of the reasons upon which this respondent based its objections to the treatment recommended for its claim in the Commission's plan and approved by the District Court, a brief statement of the claims of the collaterally secured noteholders, *i.e.*, The Railroad Credit Corporation, the Reconstruction Finance Corporation and the A. C. James Company, is recited.

Before proceeding to a discussion of this matter and a summary of the argument, it is appropriate at the outset to advise the Court that this brief will be confined and limited to a discussion of only two of the Statement of Points upon which it relied on its appeal to the Circuit Court of Appeals. Said two points, Nos. 6 and 7, (R. 1644) are is follows:

> "6. The District Court has erred in approving a plan of reorganization which treats the claim of the Reconstruction Finance Corporation upon a different basis with respect to the collateral securing that claim than similar claims of The Railroad Credit Corporation and the A. C. James Company to the extent that they are secured by the same or similar collateral.
>
> "7. The limitation on capitalization fixed in the Plan approved by the District Court does not constitute a valuation or appraisal of the Debtor's property, including the actual investment therein, such as is required by Section 77 of the Bankruptcy Act, as Amended, and the law of the land."

This limitation of argument is to avoid repetition and because pertinent objections raised by this respondent in the Court below are substantially similar to those of other respondents whose arguments will be adequately presented in their briefs. Therefore, The Railroad Credit Corporation (hereinafter referred to as R. C. C. or Credit Corporation) hereby concurs in and adopts as its own the briefs and arguments presented by the other respondents in support of the other objections to the plan raised in the District Court and argued in the Court below.

ARGUMENT

POINT ONE

The District Court has erred in approving a plan of reorganization which treats the claim of the Reconstruction Finance Corporation upon a different basis with respect to the collateral securing that claim than similar claims of The Railroad Credit Corporation and the A. C. James Company to the extent that they are secured by the same or similar collateral.

It is urged in the brief filed on behalf of A. C. James Co., respondent, that the secured claims of The Railroad Credit Corporation, Reconstruction Finance Corporation and A. C. James Co. should be recognized and refunded in full, and upon the same basis, both because the property of the debtor is sufficient in value to cover fully these three claims and because the property on which the General and Refunding Mortgage of the debtor constitutes a prior lien is sufficient in value to require that the claims of the creditors secured thereby should be refunded in full. The Railroad Credit Corporation expressly adopts and reaffirms this argument. While the Credit Corporation objects herein to the preference accorded to Reconstruction Finance Corporation and

insists that the allocation of securities between the Credit Corporation, Reconstruction Finance Corporation and A. C. James Company, as proposed in the Commission Plan, cannot be justified in law, even upon the assumption that the Commission's capitalization can be sustained, this petitioner again urges that the value of the debtor's property is sufficient to justify capitalization of at least $120,000,000, and it is sufficient in amount to require the refunding in full of all secured claims.

Claims of the Collaterally Secured Noteholders.

1. The Railroad Credit Corporation:

This respondent is a claimant in these reorganization proceedings by reason of two collaterally secured loans made to The Western Pacific Railroad Company—now the Debtor. Said loans were made on June 29, 1932, in the sum of $1,303,000 and on March 25, 1933, in the amount of $1,293,439, being due and payable on February 28, 1934, and March 24, 1935, respectively. Although the two promissory notes evidencing these loans have fixed maturity dates, nevertheless, they are in terms callable on demand, in the absence of which they are due and payable on their respective maturity dates. These notes carry the interest rate of the Federal Reserve Bank in New York City, which is presently 1% and has been such since October 1, 1937. The following items of collateral are pledged as security for both obligations: (R. 1577(b)).

(a) $4,000,000 Debtor's General and Refunding Bonds, Series A and B. ($2,000,000 of these bonds, Series A, were actually pledged with and delivered to the Credit Corporation by the A. C. James Co.).

(b) All right, title and interest of The Western Pacific Railroad Corporation in and to certain open account advances made by it as follows:

(i) $5,494,722.00 to the Debtor.
(ii) 856,260.00 to Sacramento Northern Railway Company.
(iii) 120,000.00 to Standard Realty and Development Company.

(c) Debtor's equity in collateral theretofore and thereafter deposited by it with Reconstruction Finance Corporation.

(d) [1]Debtor's right to distributive shares in the fund administered by The Railroad Credit Corporation under the Marshalling and Distributing Plan, 1931.

(e) [1]Assignment of distributive shares of Deep Creek Railroad Company, Sacramento Northern Railway.

The principal amount of each of R. C. C.'s loans has been reduced from time to time by income from collateral, including application of distributive shares, by way of credits, so that as of the effective date of the Plan, to wit, January 1, 1939, the unpaid balance of principal was $2,445,609.88. Added to this amount the accrued and unpaid interest to the effective date of the Plan of $145,314.25, makes a total claim of $2,590,924.11 (R. 1576).

2. The Reconstruction Finance Corporation:

The claim of the Reconstruction Finance Corporation (hereinafter referred to as Finance Corporation or R. F. C.) is evidenced by five notes representing loans to the Debtor Company in the principal sum of $2,963,000, plus accrued

[1] The net contributions originally made to the Marshalling and Distributing Fund by the Debtor, the Deep Creek and Sacramento Northern Railway Companies, and subsequently pledged or authorized to be applied against the loan obligations of the Debtor, amounted to $200,705.30. As of January 1, 1939, the effective date recommended for the Plan, there had been distributed 77½% of this sum, leaving a net contributed balance of $45,158.66, plus allocated income from the aforementioned Fund amounting to $9,897.70, which, added together, left an undistributed book balance of $55,056.36.

interest to the effective date of the Plan in the amount of $899,869.98, or a total note claim of $3,862,869.98 (R. 1576). These notes are secured by the following collateral: (R. 1577)

$8,750,000 of Debtor's General and Refunding Mortgage bonds, Series A, and

2,000,000 of the same refunding mortgage bonds, Series B,

Voting trust certificates for 150,000 shares of common stock of Denver & Rio Grande Western Railroad Company,

A second lien on $2,000,000 of refunding mortgage bonds, Series A, pledged with the R. C. C.

3. The A. C. James Company:

Debtor's loan obligation to the A. C. James Company (hereinafter referred to as the James Company) is evidenced by notes representing loans in the principal sum of $4,999,800, with accrued interest of $1,249,950 to effective date of the plan, or an aggregate total claim of $6,249,750. The following collateral secures the notes of this creditor: (R. 1577-78)

$6,249,500 principal amount of Debtor's General and Refunding Mortgage Bonds, Series A, of which $2,000,000 were repledged by the James Company with the R. C. C. and on which the R. C. C. has a prior lien.

The above represents all of the collaterally secured note claims filed in this proceeding and as security for which the total issue of Debtor's First and General Mortgage Bonds in the aggregate amount of $18,999,500 has been pledged. Each of these loans was, of course, made to the Debtor *prior* to the bankruptcy proceedings, and in the case of the R. F. C. and the A. C. James Company with the approval of the Commission.

Quite distinct from these three loans made to the debtor before the bankruptcy petition is the loan made by the R. F. C. to the Trustees *after the bankruptcy petition*. This latter loan (R. 696), evidenced by $10,000,000 of Trustees Certificates authorized by the Court, is a first lien on the estate prior to all other liens except taxes and is *pari passu* with other expenses of administration.

Turning now to the plan of reorganization approved by the District Court, the treatment with respect to the allocation of new securities for each of these claims as recommended therein is as follows:

> "O. The $10,000,000 of new first mortgage bonds, series A, to be authenticated and issued in the reorganization shall be sold at par and accrued interest to the Reconstruction Finance Corporation * * *. In consideration of such purchase by the Reconstruction Finance Corporation of the new first-mortgage bonds, series A, and considering the value of the collateral securing its claim, such claim amounting as of January 1, 1939, to $3,862,870 ($2,963,000 principal and $899,870 interest) and represented by notes secured by general and refunding bonds of the debtor and other collateral, shall be provided for under the plan in like securities and in like proportions as those given holders of the debtor's first mortgage bonds." (R. 389-90).
>
> "3. The Reconstruction Finance Corporation shall receive in respect of the $10,000,000 of new money provided for in subdivision O (or the surrender of trustees'-certificates at their principal amount and accrued interest, to a like amount) and its existing claim in the principal amount of $2,963,000, together with $899,870 of interest accrued and unpaid thereon to January 1, 1939, approximately $10,000,000 of new first-mortgage 4-percent bonds, series A (being 100 percent of said new money); $1,185,200 of income-mortgage 4½-percent bonds, series A (being 40 percent of the

principal of said claim); $1,777,800 of 5-percent preferred stock, series A (being 60 percent of the principal of said claim); and 15,788 shares of common stock (being common stock taken at the price of $57 a share for 100 percent of said accrued and unpaid interest). (R. 391).

"4. The Railroad Credit Corporation shall receive in respect of its claim in the principal amount of $2,455,610, together with $146,503 of interest accrued and unpaid thereon to January 1, 1939 (subject to the reduction of said amounts by the application, prior to the date of issue of new securities under the plan, of any proceeds from the distributive shares of the company or its subsidiaries under the marshaling and distributing plan, 1931), approximately $154,111 of income mortgage 4½-percent bonds, series A; $241,681 of 5-percent preferred stock, series A; and 35,425 shares of common stock (being common stock taken at the price of $62 per share). The Railroad Credit Corporation's equity in the collateral securing the claim of the Reconstruction Finance Corporation is found to be without value. (R. 391-92).

"5. The A. C. James Company shall receive in respect of its claim in the principal amount of $4,999,800, together with $1,249,950 of interest accrued and unpaid thereon to January 1, 1939, $163,724 of income mortgage 4½-percent bonds, series A; $256,756 of 5-percent preferred stock, series A; and 37,635 shares of common stock (being an amount of common stock which bears to the amount of common stock allotted to the claim of the Railroad Credit Corporation the same proportion that the principal amount of general and refunding mortgage bonds of the debtor held by the A. C. James Company as collateral for said claim, bears to the principal amount of such bonds held by the Railroad Credit Corporation as collateral for its claim). (R. 392)."

After commenting generally upon the value of the assets pledged under the General and Refunding Mortgage, the approved Plan of the Commission concludes that—

> "xxx the creditors secured by the general and refunding mortgage bonds should be awarded new income mortgage bonds in the amount of $732,010, and new participating preferred stock of a par value of $1,147,955. Applying to these amounts the proportionate amounts of general and refunding mortgage bonds securing the notes of the Finance Corporation, The Credit Corporation, and the James Company, the Finance Corporation would receive $414,175 of income mortgage bonds and $649,518 of new preferred stock, the Credit Corporation $154,111 of income-mortgage bonds and $241,681 of new preferred stock, and the James Company $163,724 of income bonds and $256,756 of new preferred stock for part of their claims. *However, this allocation will apply only to the Credit Corporation and the James Company, for, as appears herein, we approve the allocation of new securities to the Finance Corporation on a different basis, i.e., on the basis upon which securities are allotted to the holders of existing first-mortgage bonds.* In this connection we also find that such allocation of reorganization securities to the Finance Corporation exhausts the value of the collateral pledged by the debtor under the notes held by the Finance Corporation, and that the equity of the Credit Corporation in such collateral has no value." (R. 315–16). [Italics supplied]

The Commission therefore modified its prior report and order of October 10, 1938 (R. 194-299), which allocated as payment of the claims of the R. F. C., R. C. C. and James Company common stock of no-par-value for principal and interest, plus the right to subscribe within a fixed period of time for new first-mortgage bonds to be issued to provide new money (R. 294), and in its modification provided that the

Finance Corporation purchase the bonds at par and accrued interest and that in consideration of such purchase and the value of the collateral securing its claim, the Finance Corporation receive for the secured notes of the debtor held by it, treatment equal to that accorded the holders of the debtor's existing first-mortgage bonds. (R. 312).

It is quite apparent from the above extracts of the plan that the treatment in favor of R. F. C.'s note claim against the Debtor discriminates against the R. C. C. and the James Company, whose claims are similarly secured in part by general and refunding mortgage bonds. Since all three creditors are secured by these bonds (although in different amounts), they would be entitled to receive new securities in proportion to the respective amounts held, if it be assumed that the debtor's property and assets are insufficient in value to cover fully the claims of such creditors. But instead, the plan merges or consolidates R. F. C.'s distinct claim against the Debtor's Trustees for the loan of approximately $10,000,000 and secured by the Trustees' Certificates, with its separate note claim for $3,862,869.98 (R. 1576) against the Debtor Company, and then proceeds to treat both obligations as a single claim in order to accord to the R. F. C. treatment equal to that provided for the holders of Debtor's existing first mortgage bonds. By such action the plan thereby discriminates in favor of the R. F. C. and against the R. C. C. and the James Company. The Commission attempts to justify this preferred and discriminatory treatment on the ground that the raising of new money is necessary in order to secure funds to retire the $10,000,000 of Debtor's Trustees' Certificates held by the R. F. C., and states that the secured notes held by Reconstruction Finance Corporation are advanced to a preferred position and are entitled to receive treatment equal to that

given to First Mortgage bonds, in consideration of the purchase by that Corporation of the new $10,000,000 of first mortgage bonds at par and accrued interest (or the exchange of said certificates for the bonds) and in consideration of the value of the collateral securing the notes held by Reconstruction Finance Corporation. Thus, Reconstruction Finance Corporation would receive in respect of its secured note claim payment or refunding in new securities upon a basis equal to that accorded to First Mortgage bondholders.

Therefore, it is difficult to understand upon what hypothesis the plan attributes great value to the additional collateral pledged for the note claim of the R. F. C. Aside from the general and refunding mortgage bonds (including its second lien on $2,000,000 of the $4,000,000 of said bonds pledged with the R. C. C.) securing its claim against the Debtor, the only additional collateral which R. F. C. holds is 150,000 shares of common stock of the Denver & Rio Grande Western Railroad Company. This Court will take judicial notice of the fact that the Denver Company is presently reorganizing under Section 77 and that in its recent Supplemental Report and Order on a plan of reorganization the Commission found the stock to be of no value. (Finance Docket 11,002, July 13, 1942). In the face of this situation it is not easy to understand how the Commission can justify the following conclusion and treatment of R. F. C.'s note claim against the Debtor:

> "We will modify our prior report and order accordingly, and will also provide that the Finance Corporation purchase the bonds at par and accrued interest and that in consideration of such purchase *and the value of the collateral securing its claim*, the Finance Corporation receive for the secured notes of the debtor held by it, treatment equal to that accorded the holders of the

debtor's existing first-mortgage bonds." (R. 312). [Italics supplied]

Here are two separate and distinct loan obligations, one owed by the Debtor, the other by the Trustees of the Debtor. It is not denied, but willingly conceded, that Trustees' Certificates do enjoy a priority of payment ahead of first mortgage bondholders and secured noteholders because they rank as expenses of administration and therefore, constitute, equally with other expenses of administration, a direct charge and lien on all property of the Debtor held by the Trustees. The Credit Corporation does not dispute the soundness of this principle. On the contrary, it agrees that the Finance Corporation is entitled to cash for the Trustees' certificates or, failing in this, to the best security available to assure it of payment in full of its claim. The R. C. C. does object, however, to the consolidation or merger of the two claims and their treatment as a single unit of obligation in order that one of the claims may be advanced and receive preferred treatment in new securities which it otherwise would not get. General and refunding bonds are of no different value in the hands of the R. F. C. than they are in the hands of R. C. C. or of the A. C. James Company. The R. C. C. is pledgee of the equity in the collateral pledged with the R. F. C. including the $10,750,000 of Debtors General and Refunding Mortgage Bonds. The A. C. James Company holds a first lien on the equity in $2,000,000 of said bonds which it loaned to the Debtor to be pledged with the R. C. C. Were the plan to allocate new securities to these three claimants in an amount proportional to the amount of refunding bonds held by each as against the total of refunding mortgage bonds outstanding (not considering for this purpose the additional collateral securities) the fair and equitable distribution of new securities would be as follows:

The total General and Refunding Mortgage Bonds pledged is the entire issue of $18,999,500. Of these $10,750,000 have been pledged with the R. F. C., $4,000,000 with the R. C. C. and $4,249,500 with the A. C. James Company. Obviously then the proper distribution under the Commission's assumption would be represented in each case by a fraction whose denominator is $18,999,500 and whose numerator is the amount pledged to secure each claim.

The allotted securities for these claims total the following, $1,503,035, 4½% Income Mortgage Bonds, $2,276,237 5% Preferred Stock, 88,848 shares of Common Stock. This distribution applied to allotted securities results in the amounts shown below:

Creditors	4½% *Income Mtg. Bonds*	5% *Preferred Stock*	*Common Stock*
R. F. C. (.5638044)	$850,423.82	$1,287,904.91	50,270.59 shares
R. C. C. (.2105318)	316,436.66	479,220.27	18,705.33 shares
A. C. J. (.2236638)	336,174.52	509,111.82	19,872.08 shares
	$1,503,035.00	$2,276,237.00	88,848 shares

The above distribution assumes, though respondents deny, that the new securities represent the value of the general and refunding mortgage bonds which would be surrendered. Upon this assumption the allocation would be consistent with the principles enunciated by this Court in the [1]*Los Angeles Lumber Products Company* and the [2]*Rock Products Company* cases and should be substituted for the following distributions proposed by the Commission and approved by the District Court:

[1] Case v. Los Angeles Lumber Products Co., 308 U. S. 106.
[2] Consolidated Rock Products Co. v. DuBois, 312 U. S. 510.

Creditors	4½% Income Mtg. Bonds	5% Preferred Stock	Common Stock
R. F. C.	$1,185,200.00	$1,777,800.00	15,788 shares
R. C. C.	154,111.00	241,681.00	35,425 shares
A. C. J.	163,724.00	256,756.00	37,635 shares
	$1,503,035.00	$2,276,237.00	88,848 shares

Additional securities for the remainder of the rights which the R. C. C. now holds would, of course, also be necessary in order to retain its relative secured position in the reorganized company. It cannot be compelled to subordinate its rights in favor of a similarly secured noteholder simply because that claimant will purchase first mortgage bonds under the reorganization plan. The securities to be issued to the R. F. C. for any money to be furnished by it should be in recognition of the priority inherent in that transaction and not in any wise be connected with the treatment covering the loan by it to the Debtor as distinguished from the loan made by it to the Trustees.

In their briefs filed in this Court the R. F. C. and the Institutional Bondholders Committee have sought to justify the favored treatment for the R. F. C.'s claim on the ground among others, that the new first mortgage bonds, upon reorganization of the property, would sell for considerably less than par. This, now, is obviously absurd in view of the Trustees' petition to pay off a substantial portion from its cash on hand and on deposit with the R. F. C. (See Appendix A). Any way, this consideration is not only irrelevant to the grievance of the R. C. C., but offers no justification or support for treatment of another claim entirely foreign and distinct and which by no stretch of the imagination can be considered a part of the R. F. C.'s claim against the Trustees. There are no special equities applicable to the note claim of the R. F. C. which are not at least equally applicable to the claim of the R. C. C. The fact that the R. F. C. makes loans from

public moneys does not entitle it to special consideration. That the R. F. C., like other corporations, is subject to the general laws was so declared by this Court in the [1]*Rock Island* case, wherein this Court said:

> "The Reconstruction Finance Corporation Act creates a corporation and vests it with designated powers. Its entire stock is subscribed by the government, but it is none the less a corporation, limited by its charter and by the general law. The act does not give it greater rights as to the enforcement of its outstanding credits than are enjoyed by other persons or corporations in the event of proceedings under the Bankruptcy Act. The provisions and principles of enforcement of the Bankruptcy Act, including Section 77, are binding upon the Reconstruction Finance Corporation, in the absence of some pertinent statutory exception, as they are upon other corporations."

Unlike the ordinary proceeding in bankruptcy where the assets of the bankrupt are converted into cash for distribution among his creditors, Section 77 "is a special proceeding which seeks only to bring about a reorganization, if a satisfactory plan to that end can be devised." [1]*Rock Island* case, *supra*. A plan which singles out a claim secured by the same character of bonds as those of other creditors and applies to it treatment *pari passu* with the claims of mortgage bondholders simply because of its willingness to exchange a separate claim against the Debtor Trustees is obviously unfair and *in*equitable. This is the more apparent because the claim against the Trustees based on their certificates is a first lien against the estate, ranking *pari passu* with expenses of administration.

The record shows that on orders of the District Court the Trustees' certificates have been refunded from time to time

[1] Continental Illinois National Bank & Trust Co. v. Chicago, Rock Island & Pacific Railway Co., 294 U. S. 648, 684.

by an extension of their respective maturity dates and by the issue of new certificates of indebtedness of equal principal amount. Petitioners refer (R.F.C.'s brief, page 41) to the opinion of the District Court denying this motion to use $3,000,000 of the Trustees' cash to retire an equal amount of Trustees Certificates, and in the Institutional Bondholders brief, (pages 110 and 111), this language occurs

> "The rapidly mounting gross income of the Debtor's properties, before Federal taxes, is resulting in a rapid accumulation of cash by the reorganization trustees. As of September 1, 1942, the cash on hand and on deposit with R. F. C. aggregated $10,493,000, of which a substantial amount, however, must be reserved for taxes and deferred maintenance, as well as for the additions and betterments necessary to meet additional traffic demands. If any of the remaining cash is used to pay down, or possibly pay off, the Trustees' Certificates, so that the R. F. C. Notes will be left to be dealt with solely upon the basis of their pledged Refunding Bonds, the reorganized company will be denuded of the cash necessary to service the new securities from January 1, 1939, the effective date of the Commission Plan. Not only will the First Mortgage Bondholders' realization of any cash income out of the earnings of their properties thus be substantially delayed to their own injury, but if the Commission Plan is thus rendered abortive, at least $10,000,000 more of interest will have accrued upon the First Mortgage since January 1, 1939. This will have to be provided for in any new plan with due recognition of its priority over the pledged Refunding Bonds."

Both the R. F. C. and the Institutional Bondholders Counsel overlooked or failed to comprehend the language of the latest petition duly served on the parties hereto and filed with the District Court under date of September 4, 1942, a petition brought by the Trustees on their own motion and verified by Charles Elsey, the President of the Western Pacific Railroad

Company, and since the appointment of the Trustees of the properties of said company, the agent of said trustees in immediate charge of the railroad and other property of said Company. Said petition is annexed to this brief as Appendix A. The following significant extracts appear in the petition:

"Your petitioners also put up with the Reconstruction Finance Corporation, incidentally to said further extension of said loan to December 1, 1942, and as collateral security therefor, the sum of $5,000,000 from cash in the hands of your petitioners, pursuant to said order. On April 24, 1942, your petitioners put up with Reconstruction Finance Corporation, as further collateral security for said loan and subject to the same terms and conditions, the additional sum of $1,000,000 from cash in the hands of your petitioners. Pursuant to said order of November 26, 1941, and said agreement by your petitioners with the Reconstruction Finance Corporation, your petitioners have curtailed the principal of said loan by the amount of $25,000 on the 15th day of the months of December, 1941, to August, 1942, both inclusive, thereby reducing the said principal of said loan to the total amount of $9,625,000, and the said Certificates of Indebtedness in said reduced principal amount are now outstanding and held by Reconstruction Finance Corporation and mature and are payable on December 1, 1942. Your petitioners have paid to Reconstruction Finance Corporation the interest upon the said outstanding Certificates of Indebtedness to and including the 1st day of September, 1942. Your petitioners will further curtail the principal of said loan by the amount of $25,000 on the 15th day of each of the months of September, October and November, 1942, thereby reducing the said principal of said loan to the total amount of $9,550,000.

* * * *

"Your petitioners had cash on hand as of September 1, 1942, in the total amount of $4,493,000 and they expect to have cash on hand as of December 1, 1942, after meeting all expenses to be incurred in the opera-

tion and maintenance of the properties of the Debtor, in the total amount of not less than $6,000,000. In addition thereto, as hereinbefore set forth, your petitioners have put up with the Reconstruction Finance Corporation the total amount of $6,000,000 incidentally to and as collateral security for said further extension of said loan. Petitioners are of the opinoin that they would be able, without impairment of necessary working capital and without prejudice to the conduct of the railroad business of the Debtor, to retire by redemption out of cash on hand and said cash put up with the Reconstruction Finance Corporation a substantial portion of the principal amount of the indebtedness represented by said outstanding certificates of indebtedness. By reason of said increase in the amount of cash available to your petitioners, including said sums put up with and now held by the Reconstruction Finance Corporation, and said order of this Court made on May 13, 1941, your petitioners desire to receive instructions from this Court with respect to the partial retirement of said indebtedness and, if such partial retirement should be ordered by the Court, the amount thereof."

Pursuant to Order of the Court issued under date of September 4, 1942, hearing on said petition was ordered for September 28, 1942.

The argument presented in these briefs of petitioners seems to carry its own refutation. The money borrowed from the R. F. C. by the Trustees (not the Debtor) under the order of the court constitutes a debt which should be discharged before reorganization if the cash is available with which to discharge it. It is prior to all other claims excepting taxes. It is of equal rank with administration expenses. To say that payment should be deferred because the First Mortgage Bondholders might be delayed in receiving payment on their bonds is to give to those First Mortgage Bondholders the priority and preference which belongs to the Trustees' Certificates. The

statement of the Trustees that they can pay a substantial portion of the debt; that they have $6,000,000 of cash deposited with the R. F. C. and expect to have six million more on hand on December first, at which time they can, without impairing in anywise the reorganization, pay off a substantial portion of the Trustees' Certificates, would seem to be more persuasive than the opinion of counsel for First Mortgage Bondholders that because of such payment the reorganized company will be denuded of the cash necessary for deferred maintenance [of which there is none in evidence] as well as for additions and betterments necessary to meet additional traffic demands and to service the new securities issued to the First Mortgage Bondholders. The responsibility for the future operation of this property is upon these Trustees and upon Mr. Elsey, the President, who has sworn to the statements contained in the petition. These should have a greater probative value than the argument of petitioners counsel in their briefs.

If these certificates are paid off before or at the time of the consummation of a plan which accords to the R. F. C. treatment similar to that now recommended in the Commission's plan, the unfairness of this arrangement becomes increasingly apparent. The remaining note claim of the R. F. C. in this event would then enjoy a larger amount of new securities which it obtained in consideration of its acceptance of $10,000,000 of new first mortgage bonds for the surrender of the said certificates of indebtedness instead of insisting upon cash. In other words, it now seems probable that these certificates will be paid in full before consummation of any plan. In this event the consideration which prompted preferential treatment of R. F. C.'s note claim will disappear. Assume, on the other hand, that the certificates are not paid in cash before consummation of a plan which accords similar treatment to R. F. C., then this claim against the Trustees

will have been paid by the allocation of $10,000,000 of new first mortgage bonds. It is a reasonable prediction, that the principal amount of the certificates will be appreciably less than the $10,000,000 of first mortgage bonds because of the current retirements and the allegations in the petition of the Trustees for authority to pay a "substantial portion of the principal amount of the indebtedness represented by said outstanding certificates of indebtedness."

It is the contention of the Credit Corporation that inasmuch as the three noteholders all hold similar collateral, *i.e.*, general and refunding mortgage bonds, their claim should be refunded, under the Commission's assumption, so far as this collateral is concerned, in new securities of the same grades in proportion to the respective amounts of collateral held by each such noteholder. "Rights of several parties similarly circumstanced should all stand on the same footing." *In re Mortgage Guarantee Co.*, C. C. H. 53,093 (not officially reported in Federal Supplement). Therefore, the claims of the Credit Corporation and the James Company, to the extent that they are secured by similar bonds, or equivalent value, are entitled to comparable treatment, but the Plan does not so provide. Participation in the reorganization by all claimants should be, as the Court below has found, "in proportion to the value of their respective claims." (R. 2669). The effect of the consideration imputed to R. F. C.'s note claim but not valued by the Commission or the District Court, is to place it in the category of an obligation adequately secured and ranking equally with first mortgage bonds upon a basis which discriminates unfairly against R. C. C. and A. C. James Company. In the absence of such a determination the plan fails to meet the purposes of Section 77, which "include the development of a 'fair and equitable' plan of reorganization." [1] *Warren, et al., Trustees vs. Palmer, et al., Trustees.*

[1] Warren, et al., Trustees v. Palmer, et al., Trustees, 310 U. S. 132, 140.

It is respectfully submitted that the securities to be issued to the R. F. C. for any money to be furnished by it, or as an exchange for any securities to be surrendered, should be in recognition of the priority inherent in that transaction and not in any wise connected with the treatment covering the loan by the Reconstruction Finance Corporation to the Debtor as distinguished from the loan made by R. F. C. to the Trustees.

POINT TWO

The limitation on capitalization fixed in the Plan approved by the District Court does not constitute a valuation or appraisal of the Debtor's property including the actual investment therein, such as is required by Section 77 of the Bankruptcy Act, as Amended and the law of the land.

Section 77(e) contains the following provision requiring a valuation of the debtor's properties if a valuation shall be necessary for any purpose:

> "If it shall be necessary to determine the value of any property for any purpose under this section, the Commission shall determine such value and certify the same to the court in its report on the plan. The value of any property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present and prospective, and all other relevant facts. In determining such value only such effect shall be given to the present cost of reproduction new and less depreciation and original cost of the property, and the actual investment therein, as may be required under the law of the land, in light of its earning power and all other relevant facts."

Section 77(b) also requires that the plan of reorganization

> "* * * (4) shall provide for fixed charges (including fixed interest on funded debt, interest on unfunded debt, amortization of discount on funded debt, and rent

for leased railroads) in such an amount that, after due consideration of the probable prospective earnings of the property in light of its earnings experience and all other relevant facts, there shall be adequate coverage of such fixed charges by the probable earnings available for the payment thereof; * * * ."

Are additional powers conferred, or additional duties imposed upon the Commission by the above quoted clauses of Section 77?

An accurate or even illuminating answer to this question involves an examination of the "law of the land" at the date of the enactment of Section 77 and a recital of legislative and judicial action up to that date.

Valuation and capitalization of railroads by the Interstate Commerce Commission were originally urged by the Commission in its report to Congress in 1908 in the following language:

> "A second consideration which leads the Commission to urge upon Congress provision for an authoritative valuation of railway property is the importance which the question of capitalization has assumed in recent years. No one at the present time can say whether railways are undercapitalized or overcapitalized; or, should objection be made to that way of putting the question, no one can say, with the information in hand, which of the roads are undercapitalized and which are overcapitalized. A valuation adequate to the problem in hand should not stop with the simple statement of an amount; on the contrary it should analyze the amount ascertained according to the sources from which the value accrues and show the economic character as well as the industrial significance of the several forms of value. In no other way is it possible to arrive at an intelligent understanding of that complex situation suggested by the phrase 'railway capitalization'."
>
> "A third argument in support of the plan of an authoritative valuation of railway property is found in the present unsatisfactory condition of railway balance

sheets. The balance sheet is, perhaps, the most important of the statements that may be drawn from the accounts of corporations, for, if correctly drawn, it contains not only a classified statement of corporate assets and corporate liabilities, but it provides in the balance, that is to say, the 'profit and loss' a quick and trustworthy measure of the success that has attended the operation and management of the property. Every balance sheet begins with 'cost of property' against which is set a figure which purports to stand for the investment. This is no place to enter upon an extended criticism of the practice of American railways in the matter of their property accounts, nor is such a criticism necessary for the purpose in hand. It is sufficient to refer to the well known fact that no court, or commission, or accountant, or financial writer would for a moment consider that the present balance sheet statement purporting to give the 'cost of property' suggests, even in a remote degree, a reliable measure either of money invested or of present value. Thus, at the first touch of critical analysis, the balance sheets published by American railways are found to be inadequate. They are incapable of rendering the service which may rightly be demanded of them. One cure seems possible for such a situation, and one only, and that is for the Government to make an authoritative valuation of railway property, and to provide that the amounts so determined should be entered upon the books of the carriers as the accepted measure of capital assets. Under no other condition can the Commission complete in a satisfactory manner the formulation of a standard system of accounts." Twenty-Second Annual Report of the Interstate Commerce Commission, 1908, pp. 84, 85.

It is significant that the above quotation was no temporary unconsidered conclusion of the Commission, for it used the same language in its annual reports to Congress in 1910 and 1911 and re-affirmed in each case its conclusions.

Twenty-Fourth Annual Report of the Interstate Commerce Commission, 1910, p. 37.

Twenty-Fifth Annual Report of the Interstate Commerce Commission, 1911, pp. 93, 94.

Valuation Act, 1913, Section 19a

On March 1, 1913, Congress enacted what is generally referred to as Section 19a of the Interstate Commerce Act (49 U. S. C. A., p. 64). In Section 19a Congress directed the Interstate Commerce Commission to make a physical valuation of the property of common carriers subject to the provisions of the Interstate Commerce Act. This valuation should begin with an inventory which shall "list the property of every common carrier subject to the provisions of this chapter in detail, and show the value thereof as hereinafter provided, and shall classify the physical property, as nearly as practicable, in conformity with the classification of expenditures for road and equipment, as prescribed by the Interstate Commerce Commission."

In determining the physical valuation of property, the Commission was required to "ascertain and report in detail as to each piece of property, other than land, owned or used by said common carrier for its purposes as a common carrier, the original cost to date, the cost of reproduction new, the cost of reproduction less depreciation, and an analysis of the methods by which these several costs are obtained, and the reason for their differences, if any." The Commission was required in like manner to "ascertain and report separately other values, and elements of value, if any, of the property of such common carrier, and an analysis of the methods of valuation employed, and of the reasons for any differences between any such value and each of the foregoing cost values."

"Second. Such investigation and report shall state in detail and separately from improvements the original cost of all lands, rights of way, and terminals owned or used for the purpose of a common carrier, and ascertained as of the time of dedication to public use, and the present value of the same."

"Third. Such investigation and report shall show separately the property held for purposes other than those of a common carrier, and the original cost and present value of the same, together with an analysis of the methods of valuation employed."

The Commission was further directed to investigate and report upon the history and organization of "the present and of any previous corporation operating such property". The Commission was also required to "ascertain and report the amount and value of any aid, gift, grant of right of way, or donation, made to any such common carrier." The Commission was required as a result of such investigation to show "the value of the property of every common carrier as a whole and separately the value of its property in each of the several States and Territories and the District of Columbia, classified and in detail as herein required."

The Act goes on to require the Commission upon the completion of the valuation to "keep itself informed of all extensions and improvements or other changes in the condition and value of the property of all common carriers, and shall ascertain the value thereof, and shall from time to time, revise and correct its valuations, showing such revision and correction classified and as a whole and separately in each of the several States and Territories and the District of Columbia, which valuations, both original and corrected, shall be tentative valuations and shall be reported to Congress at the beginning of each regular session. (g) To enable the Commission to make such changes and corrections in its valuations of each

class of property, every common carrier subject to the provisions of this chapter shall make such reports and furnish such information as the Commission may require. * * * "

"All final valuations by the Commission and the classification thereof shall be published and shall be prima facie evidence of the value of the property in all proceedings under this chapter as of the date of the fixing thereof, and in all judicial proceedings for the enforcement of this chapter, and in all judicial proceedings brought to enjoin, set aside, annul, or suspend, in whole or in part, any order of the Interstate Commerce Commission."

"(j) If upon the trial of any action involving a final value fixed by the Commission, evidence shall be introduced regarding such value which is found by the court to be different from that offered upon the hearing before the Commission or additional thereto and substantially affecting said value, the court, before proceeding to render judgment shall transmit a copy of such evidence to the Commission, and shall stay further proceedings in said action for such time as the court shall determine from the date of such transmission. Upon the receipt of such evidence the Commission shall consider the same and may fix a final value different from the one fixed in the first instance, and may alter, modify, amend or rescind any order which it has made involving said final value, and shall report its action thereon to said court within the time fixed by the court. If the commission shall alter, modify, or amend its order, such altered, modified, or amended order shall take the place of the original order complained of and judgment shall be rendered thereon as though made by the Commission in the first instance. If the original order shall not be rescinded or changed by the Commission, judgment shall be rendered upon such original order."

This last citation of paragraph (j) is to bring out the fact that under Section 19a the final valuation found by the

Commission was only prima facie evidence of value; that the actual determination of a final value was a judicial act involving the rendition of judgment upon the findings of the Commission and the evidence introduced at the trial of any action involving a final value fixed by the Commission.

Transportation Act, 1920, Section 15a

On February 28, 1920, Congress enacted the Transportation Act of that date. The following are pertinent quotations from Section 15a of that Act (49 U. S. C. A., p. 443):

"(2) *Rates to permit carriers to earn fair return.* In the exercise of its power to prescribe just and reasonable rates the commission shall initiate, modify, establish or adjust such rates so that carriers as a whole (or as a whole in each of such rate groups or territories as the Commission may from time to time designate) will, under honest, efficient and economical management and reasonable expenditures for maintenance of way, structures and equipment, earn an aggregate annual net railway operating income equal, as nearly as may be, to a fair return upon the aggregate value of the railway property of such carriers held for and used in the service of transportation: *Provided,* That the commission shall have reasonable latitude to modify or adjust any particular rate which it may find to be unjust or unreasonable; and to prescribe different rates for different portions of the country.

"(3) *Determination of percentage constituting fair return.* The commission shall from time to time determine and make public what percentage of such aggregate property value constitutes a fair return thereon, and such percentage shall be uniform for all rate groups or territories which may be designated by the commission. In making such determination it shall give due consideration, among other things, to the transportation needs of the country and the necessity (under honest, efficient and economical management of existing transportation facilities) of enlarging such facilities in order

to provide the people of the United States with adequate transportation.

"(4) *Determination of aggregate value of properties.* For the purposes of this section, such aggregate value of the property of the carriers shall be determined by the commission from time to time and as often as may be necessary. The commission may utilize the results of its investigation under Section 19a of this chapter, in so far as deemed by it available, and shall give due consideration to all the elements of value recognized by the law of the land for rate-making purposes, and shall give to the property investment account of the carriers only that consideration which under such law it is entitled to in establishing values for rate-making purposes. Whenever pursuant to Section 19a of this chapter the value of the railway property of any carrier held for and used in the service of transportation has been finally ascertained, the value so ascertained shall be deemed by the commission to be the value thereof for the purpose of determining such aggregate value."

This was the "law of the land" as such law had been enacted by Congress at the time of the passage of the enactment of Section 77. Added to that is the constitutional protection of the Fifth Amendment and the decisions of this court in the series of cases beginning with the [1]*Minnesota Rate Cases.*

That it was then the "law of the land" was clearly set forth by the Chief Justice in the unanimous opinion of this Court in the case of [2]*Dayton-Goose Creek Railway Company Case* (decided January 7, 1924) and specifically in the following language on page 478:

Referring to the Transportation Act of 1920, the opinion says:

"The new act seeks affirmatively to build up a system of railways prepared to handle promptly all the interstate traffic of the country. It aims to give the owners

[1] Minnesota Rate Cases, 230 U. S. 352.
[2] Dayton-Goose Creek Railway Company v. United States, 263 U. S. 456.

of the railways an opportunity to earn enough to maintain their properties and equipment in such a state of efficiency that they can carry well this burden. To achieve this great purpose, it puts the railroad systems of the country more completely than ever under the fostering guardianship and control of the Commission, which is to supervise their issue of securities, their car supply and distribution, their joint use of terminals, their construction of new lines, their abandonment of old lines, and by a proper division of joint rates, and by fixing adequate rates for interstate commerce, and, in case of discrimination, for intrastate commerce, to secure a fair return upon the properties of the carriers engaged."

* * *

"To regulate in the sense intended is to foster, protect, and control the commerce with appropriate regard to the welfare of those who are immediately concerned, as well as the public at large, and to promote its growth and insure its safety."

Previously this Court on February 19, 1923, had in a unanimous opinion, written by Mr. Justice Brandeis, expressed a similar view of the "law of the land" in the following language:

"Transportation Act, 1920, introduced into the Federal legislation a new railroad policy. *Railroad Commission v. Chicago, B. & Q. R. R. Co.*, 257 U. S. 563, 585, 66 L. ed. 371, 382, 22 A. L. R. 1086, 42 Sup. Ct. Rep. 232. Theretofore, the effort of Congress had been directed mainly to the prevention of abuses; particularly, those arising from excessive or discriminatory rates. The 1920 Act sought to insure, also, adequate transportation service. That such was its purpose, Congress did not leave to inference. The new purpose was expressed in unequivocal language. And to attain it, new rights, new obligations, new machinery, were created. The new provisions took in a wide range. Prominent among them are those specially designed to

secure a fair return on capital devoted to the transportation service. Upon the Commission new powers were conferred and new duties were imposed."

New England Divisions Cases, 261 U. S. 184, 189. See also *Railroad Commission v. Chicago B. & Q. R. R. Co.*, 257 U. S. 563.

These legislative enactments and the decisions of this Court warrant a presumption of a substantial and conclusive character that the valuation of a railroad ascertained and brought down to any given date pursuant to the provisions of Section 19a is the value upon which the owners of the railroad property are entitled to earn, if they can, a fair return, and that this value cannot be taken away from them excepting by judicial decree. The legislative department of this Government cannot, without judicial sanction, deprive such owners of the value so determined. It is true that in an equity proceeding a sale by foreclosure may eventually establish as the value the price which the property brings at such foreclosure sale, but this is not an equity receivership. This is a reorganization of a company not found to be insolvent under the provisions of the Bankruptcy Act. In the absence of such insolvency there is no warrant for saying that the value of such property upon reorganization, as is necessary or appropriate for the efficient and economical performance of transportation, shall be other than the valuation found under Section 19a and brought down to date by the Commission. If there be any part of the bankrupt estate which the Commission in approving the plan finds to be of not sufficient use to warrant its inclusion in the reorganized estate, it is the Commission's duty so to express itself and to exclude the same from the value placed upon the remaining property. In this case the Commission has made no such finding but has expressly found that the property is not now under-maintained. From this it follows that the entire

property has been found to be used or useful for performing the work of an economical and efficient transportation agency.

What then does Section 77(e) mean by the clause "if it shall be necessary to determine the value of any property for any purpose under this section, the Commission shall determine such value and certify the same to the court in its report on the plan. The value of any property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present and prospective, and all other relevant facts. In determining such value only such effect shall be given to the present cost of reproduction new, less depreciation, and original cost of the property and the actual investment therein as may be required under the law of the land in the light of its earning power and all other relevant facts."

The "probable prospective earnings" of the property should be the guide to the Commission in performing the duty imposed upon it not by (e), under which the standard is earning power, but by (b) of Section 77 which, as above quoted, requires that the plan of reorganization

> "* * * (4) shall provide for fixed charges (including fixed interest on funded debt, interest on unfunded debt, amortization of discount on funded debt, and rent for leased railroads) in such an amount that, after due consideration of the probable prospective earnings of the property in light of its earnings experience and all other relevant facts, there shall be adequate coverage of such fixed charges by the probable earnings available for the payment thereof; * * *."

This subsection places upon the Interstate Commerce Commission the responsibility in fixing the capitalization of the reorganized company to provide for the issue of obligations which the reorganization carrier may assume, carry and eventually pay, while continuing to function as a solvent and

prosperous carrier capable of providing for the maximum transportation needs of the territory which it serves. This providing should include funds necessary for maintaining the carrier's facilities, so that under honest, efficient and economical management it will in the future be able to furnish adequate transportation. This is substantially the language of paragraph (3) of Section 15a and sets forth a duty which is clearly within the legislative powers conferred upon the Interstate Commerce Commission. Indeed, it is the standard outlined or expressed by this court in the *New England Divisions Cases* and the *Dayton-Goose Creek Case*, above cited, and it is entirely consistent with the authority given to the Interstate Commerce Commission under Section 20a, (49 U. S. C. A., p. 290), wherein the Commission is authorized to make an order with respect to the issuance of securities and the assumption of obligations only if such issuance or assumption "is for some lawful object within its corporate purposes, and compatible with the public interest, which is necessary or appropriate for or consistent with the proper performance by the carrier of service to the public as a common carrier, and which will not impair its ability to perform that service, and (b) is reasonably necessary and appropriate for such purpose." From this may be deduced the conclusion that the duty of the Interstate Commerce Commission in fixing capitalization for a reorganized corporation is principally to determine what obligations the reorganized corporation should assume, the principal amount and character of those which involve fixed interest payments, and the total amount and character of contingent obligations, only to the extent in the latter case of prescribing principal amounts and maturities which the reorganized corporation will meet and will be able to discharge upon maturity. These obligations are the test of what the reorganized carrier must do in order to function efficiently and economically as a reor-

ganized corporation without danger of being forced again into another reorganization. When these amounts have been determined and have been assigned to claimants in the order of priority, the remaining value of the property should in accordance with the doctrine of [1]*Northern Pacific Railway v. Boyd*, [2]*Case v. Los Angeles Lumber Products Co., Ltd.*, [3]*Consolidated Rock Products Co. v. Du Bois*, be allotted to junior creditors whose claims have not been satisfied and whatever equity is left to the remaining stockholders.

It is this remaining value which is beyond the administrative power of the Commission to tamper with. True, it may as a sort of statutory special master, advise the District Court upon valuation or any other relevant fact and this advice when based upon adequate evidence or proof received at a hearing is entitled to weight. But the Commission cannot by its mere fiat condemn a solvent carrier to insolvency solely because under the provisions of Section 77 the carrier has sought the protection of the Court alleging its temporary inability to pay its debts as they mature. Before such condemnation there must be a hearing and a finding that the capital assets are not, at a fair valuation, sufficient in amount to pay the debts (Bankruptcy Act, Section 1, (19)). This is the valuation which the Commission definitely has failed to find in the current case. This is the valuation necessary to be found by the Commission in obedience to the mandate of Congress expressed in paragraph (e) of Section 77. For this failure the Commission should be dealt with by this Court as it was dealt with for a similar disobedience in [4]*St. Louis & O'Fallon Railway Co. v. United States*, at which latter page the following language is quoted from this opinion:

> "In the exercise of its proper function this Court has declared the law of the land concerning valuations for rate-making purposes. The Commission disregarded

---

[1] Northern Pacific Railway v. Boyd, 228 U. S. 482.
[2] Case v. Los Angeles Lumber Products Co., Ltd., 308 U. S. 106.
[3] Consolidated Rock Products Co. v. Du Bois, 312 U. S. 510.
[4] St. Louis & O'Fallon Railway Co. v. United States, 279 U. S. 461, 487.

the approved rule and has thereby failed to discharge the definite duty imposed by Congress. Unfortunately, proper heed was denied the timely admonition of the minority: 'The function of this commission is not to act as an arbiter in economics, but as an agency of Congress, to apply the law of the land to facts developed of record in matters committed by Congress to our jurisdiction'. * * * Whether the Commission acted as directed by Congress was the fundamental question presented. If it did not, the action taken, being beyond the authority granted, was invalid."

The proposed reorganization plan would, if carried out, inflict an unwarranted injustice upon the stockholders of the Debtor to whom it would deny any equity in a property to which on October 10, 1938, the Commission gave a valuation in the following words (R., p. 224):

> "If there be added to the above amounts the net costs of additions and retirements between valuation dates and December 31, 1935, the total would be $139,600,455."

The proposed reorganization plan would fix the capitalization at $97,763,522, treating the no-par-value common stock at $100 per share (R., p. 364). Even under this figure the secured claims against the Debtor in the total amount of $87,922,143 (which includes $10,000,000 of Trustees' Certificates) should be refunded in full, leaving a balance of approximately $10,000,000 for the unsecured debt and the stockholders' interests. In fact, however, the Commission has cut-off entirely the capital stock of the Debtor and the unsecured claims against the Debtor; and, in addition, the Commission has scaled down the secured claims. Aside from the unfair treatment of the stockholders and creditors, however, it should be noted that the capitalization recommended by the Commission would deny any equity to the difference between the above valuation of $139,-

600,455 and the capitalization permitted of $97,763,522 or $41,836,933; would bar unsecured creditors from any realization upon their claims and forever deprive the stockholders who have invested their money in this corporation from any voice in the reorganized corporation and from any chance to recoup their losses. It is submitted that the conclusion of the Commission is without warrant when it says (R., p. 257) "that based on the most optimistic estimate of earnings of record, the capitalization of the reorganized company must be maintained within strict limits if any material return on its capital stock is to be expected and the shares of its stock are not to become mere tokens for stock market speculation." Herein the Commission would seem to abdicate the control over the issuance of securities and obligations as given to it under Section 20a and assume a defeatist attitude which the value of the property and its current earnings do not warrant. If stockholders making honest and conservative investments were permanently disfranchised because of no dividends during years of depression, then most of the railroads of the United States during the twelve years from 1928 to 1940 would have been without stockholder management.

"The value of a railroad for capitalization purposes should therefore not be based on what it has earned in the past under regulatory restrictions, nor what it might be expected to earn in the future under regulatory restrictions. It should be based on some formula involving a physical valuation of assets used and useful in the public service. Pessimistic forecasts, or even optimistic forecasts, as to what these assets may be expected to earn in the indefinite future have no place in determining capitalizable value. A capitalization that represents prudent investment is based on firm ground. Such a capitalization accurately represents the property on which the railroad should be permitted to

earn a fair return if, under competitive conditions, it can do so. Forecasts as to the chances of its succeeding are not only largely guesswork, but are wholly unnecessary and should be eliminated from the problem, especially when these forecasts are definitely final and extend without limitation in time. Forecasts of a few years ahead, or even months, are often unreliable. Forecasts of the future earnings of a road as a whole with no limit of time, to be used as a base for a recapitalization which permanently wipes out investors are an absurdity." [F. R. Dick, *Railway Age*, September, 1942, p. 489].

Since 1920 the stockholders of the railroads of the United States have made their investments in the properties of those railroads, relying upon the assurance contained in the Transportation Act of 1920 that the Interstate Commerce Commission would so regulate the revenues that they would be entitled, if at all possible, to earn upon the property used or useful in transportation a fair return upon the value of such property. During that period the Interstate Commerce Commission has not only regulated such revenues and practically fixed them, but it has to a very considerable extent regulated the cost of producing such transportation. In these circumstances, good faith requires that the stockholders' share in the value of the property fixed by the Commission under Section 19a should be protected. Unless and until such property or any portion thereof is found to be neither used nor useful for the purpose for which the railroad was created, these stockholders are entitled to the fostering care of the Commission. Only to the extent that any portion of such property has ceased to be used or useful for transportation may its value be written off the balance sheet of the transportation agency. To say that value should now be related to the ability of the railroads to pay dividends during depression periods is an attempt to deprive these stockholders of their property without due process of law.

Conclusion

It is respectfully submitted that the decree of the Court below was proper, and that the plan of reorganization as approved by the District Court was unfair and inequitable and failed to meet the requirements contemplated by Section 77 as to the valuation of the Debtor's property and a proper allocation of new securities based upon the value of the several claims, and more especially the discriminatory treatment of the note claim of the Reconstruction Finance Corporation at the expense of the claims of The Railroad Credit Corporation and the A. C. James Company. Therefore, said decree of the Court below should be affirmed and the proceeding referred back to the Interstate Commerce Commission for further action and a determination of the value of Debtor's assets and properties in accordance with the "law of the land".

Respectfully submitted,

EDWARD G. BUCKLAND
WILLIAM J. KANE
Attorneys for The Railroad Credit Corporation,
Respondent.

Filed Sept. 4, 1942
WALTER B. MALING, *Clerk*

IN THE DISTRICT COURT OF THE UNITED STATES,

FOR THE

NORTHERN DISTRICT OF CALIFORNIA,
SOUTHERN DIVISION

In the Matter of
THE WESTERN PACIFIC RAILROAD COMPANY, *Debtor.* } No. 26591–S

PETITION OF TRUSTEES FOR INSTRUCTIONS RESPECTING RETIREMENT BY REDEMPTION OF A PORTION OF THE PRINCIPAL AMOUNT OF INDEBTEDNESS REPRESENTED BY THEIR OUTSTANDING CERTIFICATES OF INDEBTEDNESS AND FOR AN ORDER AUTHORIZING A FURTHER EXTENSION OF EITHER ALL OR A PORTION OF SAID CERTIFICATES

T. M. SCHUMACHER and SIDNEY M. EHRMAN, the duly appointed and qualified Trustees of the properties of the Debtor above named, hereby petition the Court and represent as follows:

I.

Pursuant to authority duly given them by this Court with the approval of the Interstate Commerce Commission, your

petitioners, as such Trustees, heretofore issued their certificates of indebtedness in the principal amount of $10,000,000, maturing and payable on December 1, 1939. The said certificates were later extended as hereinafter shown. The said certificates were issued to evidence and secure a loan in the sum of $10,000,000 from the Reconstruction Finance Corporation. The Trustees borrowed the said sum of $10,000,000 from the Reconstruction Finance Corporation for the purpose of paying at maturity their certificates of indebtedness then outstanding and maturing and payable on December 1, 1938. The proceeds of said loan were used for said purpose. The said certificates then outstanding and maturing and payable on December 1, 1938, represented an indebtedness all of which was authorized and incurred for the purpose of meeting the cost of doing certain work upon and acquiring certain equipment for the railroad of the Debtor which it was necessary should be done and acquired in order that said railroad might be operated with safety and reasonable efficiency, that its physical elements might be conserved and its existing business retained, and that it might furnish to the public service in the way of transportation of persons and property adequately responsive to the reasonable requirements and demands of the public upon said railroad for such service. The proceeds realized by the incurrence of the indebtedness represented by said certificates were expended in the doing of said work and the acquiring of said equipment.

II.

Pursuant to authority duly given them by this Court, with the approval of the Interstate Commerce Commission, your petitioners, as such Trustees, extended said certificates of indebtedness from December 1, 1939, to December 1, 1940, to evidence and secure an extension of said loan from and to the same dates, and further extended said certificates from

December 1, 1940, to December 1, 1941, to evidence and secure a further extension of said loan from and to the same dates. Your petitioners were authorized by the order of this Court made on November 27, 1940, to obtain said further extension of said loan to December 1, 1941, from the Reconstruction Finance Corporation, upon an agreement by your petitioners with the Reconstruction Finance Corporation to curtail the principal of said loan by the amount of $12,500 on December 15, 1940, and by a like amount on the 15th day of each month thereafter during the term of said loan, so long as the said certificates, or any of them, should be held by the Reconstruction Finance Corporation. Pursuant to said order of November 27, 1940, your petitioners obtained from the Reconstruction Finance Corporation said further extension of said outstanding loan to December 1, 1941, and made and entered into said agreement with Reconstruction Finance Corporation. Pursuant to said order of November 27, 1940, and said agreement with the Reconstruction Finance Corporation, your petitioners curtailed the principal of said loan by the amount of $12,500 on the 15th day of the months of December, 1940, to November, 1941, both inclusive, thereby reducing the said principal of said loan to the total amount of $9,850,000, and the said Certificates of Indebtedness in said reduced principal amount were outstanding and held by Reconstruction Finance Corporation on December 1, 1941.

III.

Pursuant to authority duly given them by this Court, with the approval of the Interstate Commerce Commission, your petitioners, as such Trustees, further extended said Certificates of Indebtedness in the total principal amount of $9,850,000 from December 1, 1941, to December 1, 1942, to evidence and secure a further extension of said loan from and to the same dates. Your petitioners were authorized by

the order of this Court made on November 26, 1941, to obtain said further extension of said loan to December 1, 1942, from the Reconstruction Finance Corporation, upon an agreement by your petitioners with the Reconstruction Finance Corporation to curtail the principal of said loan by the amount of $25,000 on December 15, 1941, and by a like amount on the 15th day of each month thereafter during the term of said loan, so long as said Certificates of Indebtedness, or any of them, are held by the Reconstruction Finance Corporation. The said order of November 26, 1941, further authorized your petitioners to extend further to December 1, 1942, their said Certificates of Indebtedness then outstanding in the total principal amount of $9,850,000 as evidence of and security for said further extension of said loan, the said Certificates as further extended to bear interest at the rate of four per cent (4%) per annum, payable monthly, the same rate of interest as was borne by said certificates as previously extended, to be subject to a right of said Trustees, so long as said Certificates are held by the Reconstruction Finance Corporation, to redeem upon thirty (30) days' notice on any interest payment date such other of said certificates as they may desire as are not retired by said curtailment of the principal of said loan, and to be subject to a right of said Trustees, if said Certificates are no longer held by the Reconstruction Finance Corporation, to redeem upon thirty (30) days' notice all but not less than all of said Certificates on any interest payment date, and the said further extension to be effectuated by said Trustees by stamping or writing upon each of said outstanding certificates a legend or endorsement reading substantially as follows:

> "The holder hereof by acceptance hereof bearing hereon this endorsement hereby agrees that the maturity of the within certificate is further extended to December 1, 1942, with interest at the rate of 4% per annum

payable monthly, with the privilege of redemption by the Trustees of the within certificate so long as the same is held by the Reconstruction Finance Corporation and the privilege of redemption by the Trustees, if the within certificate is no longer held by the Reconstruction Finance Corporation, of all but not less than all of the Trustees' Certificates of this issue, in any event on any interest payment date on thirty days' previous notice at the principal amount and accrued interest to the date fixed for redemption.

"The Trustees agree to curtail the principal of the loan evidenced by the within certificate by the amount of $2500 on December 15, 1941, and by a like amount on the 15th day of each month thereafter during the term of this extension, so long as this certificate, or any of the certificates evidencing the loan referred to therein, shall be held by the Reconstruction Finance Corporation."

The Trustees were further authorized by said order of November 26, 1941, (1) to put up with the Reconstruction Finance Corporation, incidentally to the further extension of said loan to December 1, 1942, and as collateral security therefor, the sum of $5,000,000 from cash in the hands of said Trustees, interest upon said loan to be computed upon the outstanding balance of said loan less the amount of said cash collateral, and the said cash collateral to be subject to a right and privilege on the part of said Trustees to withdraw all or any part of said cash collateral at any time (but not less than $250,000 at any one time) upon an order of the Court, made with or without notice or hearing, instructing them to make such withdrawal, provided, however, that the Trustees shall give Reconstruction Finance Corporation at least ten (10) days' written notice of their intention to apply for any such order and, following the making of any such order, at least five (5) days' notice of the date on which withdrawal is to be made, and (2) to

put up with the Reconstruction Finance Corporation from time to time thereafter, as further collateral security aforesaid further extension of said loan and subject to the same terms and conditions, such additional amounts of cash as said Trustees may find and determine to be available for said purpose, and as Reconstruction Finance Corporation may be willing to accept upon such terms and conditions. Pursuant to said order of November 26, 1941, your petitioners, with the prior approval of the Interstate Commerce Commission, obtained from the Reconstruction Finance Corporation a further extension of said outstanding loan to December 1, 1942, and made and entered into an agreement with Reconstruction Finance Corporation to curtail the principal of said loan by the amount of $25,000 on December 15, 1941, and by a like amount on the 15th day of each month thereafter during the term of said loan, so long as the said certificates, or any of them, are held by the Reconstruction Finance Corporation, and effectuated said further extension by stamping upon each of said outstanding certificates a legend or endorsement in the form hereinbefore set forth. Your petitioners also put up with the Reconstruction Finance Corporation, incidentally to said further extension of said loan to December 1, 1942, and as collateral security therefor, the sum of $5,000,000 from cash in the hands of your petitioners, pursuant to said order. On April 24, 1942, your petitioners put up with Reconstruction Finance Corporation, as further collateral security for said loan and subject to the same terms and conditions, the additional sum of $1,000,000 from cash in the hands of your petitioners. Pursuant to said order of November 26, 1941, and said agreement by your petitioners with the Reconstruction Finance Corporation, your petitioners have curtailed the principal of said loan by the amount of $25,000 on the 15th day of the months of December, 1941, to August,

1942, both inclusive, thereby reducing the said principal of said loan to the total amount of $9,625,000, and the said Certificates of Indebtedness in said reduced principal amount are now outstanding and held by Reconstruction Finance Corporation and mature and are payable on December 1, 1942. Your petitioners have paid to Reconstruction Finance Corporation the interest upon the said outstanding Certificates of Indebtedness to and including the 1st day of September, 1942. Your petitioners will further curtail the principal of said loan by the amount of $25,000 on the 15th day of each of the months of September, October and November, 1942, thereby reducing the said principal of said loan to the total amount of $9,550,000.

IV.

A plan of reorganization of the Debtor was approved by order of this Court made on August 15, 1940. On September 20, 1940, appeals from said order to the Circuit Court of Appeals for the Ninth Circuit were filed by certain interested parties. The said appeals were argued before said Circuit Court of Appeals on July 28 and July 29, 1941, and briefs in said appeals were filed prior to said argument. On November 28, 1941, said Circuit Court of Appeals reversed said order of this Court made on August 15, 1940, and remanded said proceeding with directions to dismiss it or, in the Court's discretion and on motion of any party in interest, refer it back to the Interstate Commerce Commission for further action. Thereafter petitions for a writ of certiorari to said Circuit Court of Appeals were filed by certain interested parties with the Supreme Court of the United States. The said petitions were granted on April 27, 1942, and it is expected that said proceedings will be orally argued before the Supreme Court early during the term commencing in October, 1942.

V.

On March 27, 1941, your petitioners filed with this Court their petition that they be instructed whether they should retire, out of funds on hand, a portion of the principal amount of the indebtedness represented by their outstanding Certificates of Indebtedness and, if the Court should determine that such partial retirement of said indebtedness should be made, that your petitioners be instructed with respect to the amount thereof. On April 3, 1941, A. C. James Co., an intervenor in the above entitled reorganization proceeding, filed with this Court a motion for an order directing your petitioners to pay off and discharge out of any available cash of the Debtor in their hands not less than $3,000,000 of the principal indebtedness represented by said certificates, and directing your petitioners to report fully to the Court, for the information of all parties in interest, as to any and all negotiations which they might have had with private bankers or others during the preceding twelve months looking toward a refunding of said certificates. On April 22, 1941, said petition for instructions and said motion were jointly and fully heard before the Court and oral and documentary evidence was introduced, including the testimony of one of your petitioners. On May 13, 1941, the Court rendered its opinion and order upon said petition and motion. By said order of May 13, 1941, the Court instructed your petitioners not to make any payment on account of said Trustees' Certificates and not to make any further effort to refund them by the issue of new Trustees' certificates to others than the Reconstruction Finance Corporation. By said order the said motion of A. C. James Co. was denied. An appeal by A. C. James Co. from said order to the Circuit Court of Appeals for the Ninth Circuit was filed, briefs in said appeal were filed, and on July 29, 1941, the said appeal was submitted to said

Court without oral argument. On September 30, 1941, said Court dismissed said appeal upon the ground that said A. C. James Co. was not entitled to appeal. The said order of this Court made on May 13, 1941, remains in force and effect.

VI.

The orders of this Court authorizing the issuance and the extensions of said certificates of indebtedness now outstanding and, as extended, maturing and payable on December 1, 1942, and the orders of the Interstate Commerce Commission approving the issuance of said certificates expressly provide that said certificates rank as expenses of the administration by the Court of the Debtor's property and as such are payable in due course of administration equally with other expenses of administration out of said property and constitute a charge and direct first lien upon said property prior in right to the debts and obligations of the Debtor and to any lien created by it, and said certificates were issued by your petitioners for value upon the representation that such was their character.

VII.

Your petitioners had cash on hand as of September 1, 1942, in the total amount of $4,493,000 and they expect to have cash on hand as of December 1, 1942, after meeting all expenses to be incurred in the operation and maintenance of the properties of the Debtor, in the total amount of not less than $6,000,000. In addition thereto, as hereinbefore set forth, your petitioners have put up with the Reconstruction Finance Corporation the total amount of $6,000,000 incidentally to and as collateral security for said further extension of said loan. Petitioners are of the opinion that they would be able, without impairment of necessary work-

ing capital and without prejudice to the conduct of the railroad business of the Debtor, to retire by redemption out of cash on hand and said cash put up with the Reconstruction Finance Corporation a substantial portion of the principal amount of the indebtedness represented by said outstanding certificates of indebtedness. By reason of said increase in the amount of cash available to your petitioners, including said sums put up with and now held by the Reconstruction Finance Corporation, and said order of this Court made on May 13, 1941, your petitioners desire to receive instructions from this Court with respect to the partial retirement of said indebtedness and, if such partial retirement should be ordered by the Court, the amount thereof.

VIII.

In the event that the Court should determine that such partial retirement of the principal amount of the indebtedness represented by their outstanding certificates of indebtedness should not be made, it will be necessary for your petitioners to obtain a further extension of said loan and that they again extend said certificates as evidence of and security for said loan, in order to insure against a default upon the said certificates, and if the Court should determine that such partial retirement of said indebtedness should be made, it will likewise be necessary for your petitioners to obtain a further extension of the remaining portion of said loan and that they again extend the remaining portion of said certificates. Your petitioners believe that they can obtain a further extension of said loan or such portion thereof to December 1, 1943, from the Reconstruction Finance Corporation, the said further extension of said loan or such portion thereof to be evidenced and secured by a further extension of the said certificates of indebtedness or such portion thereof by your petitioners to December 1,

1943, with interest at the rate of four per cent (4%) per annum payable monthly, which is the same rate of interest as is borne by said certificates as previously thrice extended, and subject to a right on the part of the Trustees, so long as said certificates are held by the Reconstruction Finance Corporation, to redeem upon thirty (30) days' notice on any interest payment date such of said certificates as they may desire, and to be subject to a right of said Trustees, if said certificates are no longer held by the Reconstruction Finance Corporation, to redeem upon thirty (30) days' notice all but not less than all of the outstanding certificates on any interest payment date, the said further extension of said certificates to be effectuated by stamping or writing upon each of said certificates a legend or endorsement reading substantially as follows:

> "The holder hereof by acceptance hereof bearing hereon this endorsement hereby agrees that the maturity of the within certificate is further extended to December 1, 1943, with interest at the rate of 4% per annum payable monthly, with the privilege of redemption by the Trustees of the within certificate so long as the same is held by the Reconstruction Finance Corporation and the privilege of redemption by the Trustees, if the within certificate is no longer held by the Reconstruction Finance Corporation, of all but not less than all of the outstanding Trustees' Certificates of this issue, in any event on any interest payment date on thirty days' previous notice at the principal amount and accrued interest to the date fixed for redemption."

If the Court should determine that such partial retirement of said indebtedness should be made, it will be in the interest of the trust estate of your petitioners that they be authorized to obtain a further extension of said loan and to extend again said certificates as evidence of and security for said loan in order to insure against a default upon the said certificates when the principal thereof falls due on

December 1, 1942. If the Court should determine that such partial retirement of said indebtedness should be made, it will likewise be in the interest of the trust estate of your petitioners that they be authorized to obtain a further extension of the remaining portion of said loan and to extend again the remaining portion of said certificates. To consummate and fully authorize the said further extension of said loan or such portion thereof it will be necessary for your petitioners to make formal application for said further extension to the Reconstruction Finance Corporation and to secure the approval thereof by the Interstate Commerce Commission.

IX.

Because of the possibility that your petitioners may not be able to arrange with the Reconstruction Finance Corporation for said further extension of said loan or such portion thereof it is advisable that the Court, in its order granting the authority herein asked for, reserve jurisdiction to authorize, by supplemental order, made with or without notice, the issuance and sale by your petitioners of new certificates of indebtedness in the total amount of $9,550,000 or a portion thereof, dated December 1, 1942, and bearing interest at the rate of four per cent (4%) per annum or a different rate of interest, for the purpose of providing themselves with funds for the payment of said outstanding certificates or such portion thereof at maturity.

X.

For the purpose of meeting the requirements of Section 4 of Public Act No. 35 of the Seventy-Third Congress of the United States, approved June 10, 1933, it will be necessary, if said further extension of said loan or such portion thereof is made, for your petitioners to enter into a fourth

supplemental agreement with the Reconstruction Finance Corporation substantially in the form attached hereto and marked Exhibit "A".

WHEREFORE, your petitioners pray:

(1) That upon the filing of this petition the Court set the same for hearing and prescribe the notice to be given thereof.

(2) That upon the hearing of said petition your petitioners be instructed whether they should retire by redemption, out of funds on hand and said cash put up with the Reconstruction Finance Corporation, a portion of the principal amount of the indebtedness represented by their outstanding Certificates of Indebtedness and, if the Court should determine that such partial retirement of said indebtedness should be made, that petitioners be instructed with respect to the amount thereof.

(3) That pursuant to and in accordance with said instructions the Court authorize your petitioners to apply forthwith to the Reconstruction Finance Corporation for a further extension of said loan or the remaining portion thereof to December 1, 1943, and to the Interstate Commerce Commission for its approval thereof, and to make such other application or supplemental applications to the Interstate Commerce Commission as may be required in respect to said further extension of said outstanding certificates of indebtedness or remaining portion thereof.

(4) That pursuant to and in accordance with said instructions the Court make its order whereby your petitioners will be authorized to extend further to December 1, 1943, their outstanding certificates of indebtedness in the total amount of $9,550,000, or the remaining portion thereof, as evidence of and security for the said further extension of said loan or the remaining portion thereof, the said certificates as again extended to bear interest at the rate of four

per cent (4%) per annum payable monthly, the same rate of interest as is borne by said certificates as previously extended, and to be subject to a right of the Trustees, so long as said certificates are held by the Reconstruction Finance Corporation, to redeem upon thirty (30) days' notice on any interest payment date such of said certificates as they may desire, and to be subject to a right of said Trustees, if said certificates are no longer held by said Reconstruction Finance Corporation, to redeem upon thirty (30) days' notice all but not less than all of said certificates on any interest payment date, and the said further extension to be effectuated by the Trustees by stamping or writing upon each of said certificates a legend or endorsement reading substantially as follows:

> "The holder hereof by acceptance hereof bearing hereon this endorsement hereby agrees that the maturity of the within certificate is further extended to December 1, 1943, with interest at the rate of 4% per annum payable monthly, with the privilege of redemption by the Trustees of the within certificate so long as the same is held by the Reconstruction Finance Corporation and the privilege of redemption by the Trustees, if the within certificate is no longer held by the Reconstruction Finance Corporation, of all but not less than all of the outstanding Trustees' Certificates of this issue, in any event on any interest payment date on thirty days' previous notice at the principal amount and accrued interest to the date fixed for redemption."

provided, however, that the Court reserve jurisdiction to provide by supplemental order, made with or without notice, that with the approval of the Interstate Commerce Commission first had and obtained the Trustees may issue and sell new certificates of indebtedness in the total amount of $9,550,000 or a portion thereof, dated December 1, 1942, and bearing interest at the rate of four per cent (4%) per

annum or a different rate of interest, for the purpose of meeting the principal of the outstanding certificates or the remaining portion thereof at maturity.

(5) That your petitioners be further authorized by such order to make a fourth supplemental agreement with the Reconstruction Finance Corporation substantially in the form attached hereto and marked Exhibit "A".

(6) That your petitioners be authorized (1) to put up with the Reconstruction Finance Corporation, incidentally to the further extension of said loan or the remaining portion thereof to December 1, 1943, and as collateral security therefor, such amount of cash, if any, as your petitioners may find and determine to be available for said purpose and as the Reconstruction Finance Corporation may be willing to accept, interest upon said loan or said portion thereof to be computed upon the outstanding balance of said loan or said portion thereof less the amount of said cash collateral, and the said cash collateral to be subject to a right and privilege on the part of said Trustees to withdraw all or any part of said cash collateral at any time (but not less than $250,000 at any one time) upon an order of the Court, made with or without notice or hearing, instructing them to make such withdrawal, provided, however, that the Trustees shall give Reconstruction Finance Corporation at least ten (10) days' written notice of their intention to apply for any such order and, following the making of any such order, at least five (5) days' notice of the date on which withdrawal is to be made; (2) to put up with the Reconstruction Finance Corporation from time to time thereafter, as further collateral security for said further extension of said loan or such portion thereof and subject to the same terms and conditions, such additional amounts of cash, if any, as said Trustees may find and determine to be available for said purpose, and as Reconstruction Finance

Corporation may be willing to accept upon such terms and conditions; and (3) to enter into an agreement with the Reconstruction Finance Corporation substantially in the form attached hereto and marked Exhibit "B", and to enter into similar agreements in the event that said additional amounts of cash shall be put up with the Reconstruction Finance Corporation.

ALLAN P. MATTHEW,
Counsel for Petitioners.

EXHIBIT "A"

December ....., 1942.

Reconstruction Finance Corporation,
Washington, D. C.

Fourth Supplemental Agreement

Dear Sirs:

The undersigned Trustees of The Western Pacific Railroad Company are indebted to your corporation on account of a certain loan represented by Trustees' Certificates in the principal amount of $....., which, as extended, mature on December 1, 1942.

In consideration of the granting by your corporation of a fourth extension of the maturity date of the above mentioned Trustees' Certificates, authorized by supplemental report and supplemental order of the Interstate Commerce Commission dated ...., 1942, in Finance Docket No....., the undersigned Trustees, as such and not individually, hereby agree with your corporation as follows:

1. The term "compensation" as used in this fourth supplemental agreement shall include all salaries, fees, bonuses, commissions or other payments, direct or indirect, in money or otherwise, for personal services.

2. So long as they are indebted to your corporation the undersigned Trustees will not increase the compensation of any of their officers, directors or employees to any amount not permitted by the terms of the agreement dated November 23, 1938, the supplemental agreement dated December 1, 1939, the second supplemental agreement dated December 2, 1940, and the third supplemental agreement dated December 1, 1941, between your corporation and the undersigned Trustees, and in any written consents given by your corporation pursuant to the provisions of said agreement and supplemental agreements.

3. The undersigned Trustees hereby ratify, confirm and reaffirm the said agreement of November 23, 1938, the said supplemental agreement of December 1, 1939, said second supplemental agreement of December 2, 1940, and said third supplemental agreement dated December 1, 1941, and

each and every covenant contained in said agreement and supplemental agreements.

Respectfully submitted,

.....

EXHIBIT "B"

AGREEMENT

THIS AGREEMENT, made and entered into this ..... day of ....., 1942, by and between T. M. SCHUMACHER and SIDNEY M. EHRMAN, as Trustees in Reorganization of The Western Pacific Railroad Company, and not individually, hereinafter referred to as the Trustees, and RECONSTRUCTION FINANCE CORPORATION,

WITNESSETH:

WHEREAS, the Trustees are indebted, as such Trustees, to Reconstruction Finance Corporation on account of a certain loan represented by Trustees' Certificates in the principal amount of $....., which, as extended, mature on December 1, 1942, and

WHEREAS, pursuant to approval by the Interstate Commerce Commission by its supplemental report and certificate dated ...., 1942, in Finance Docket No....., the Reconstruction Finance Corporation has granted an extension of said loan to December 1, 1943, and

WHEREAS, the Trustees desire to put up, and the Reconstruction Finance Corporation is willing to accept, as col-

lateral security for said loan, the sum of $.....,
subject to the terms and conditions hereinafter set forth;

NOW, THEREFORE, in consideration of the premises, IT IS HEREBY MUTUALLY AGREED AND UNDERSTOOD by and between the Trustees and Reconstruction Finance Corporation as follows:

1. Interest upon said loan shall be computed upon the outstanding balance of said loan less the amount of the said cash collateral.

2. The said cash collateral shall be subject to a right and privilege on the part of the Trustees to withdraw all or any part of said collateral at any time (but not less than $250,000 at any one time) upon an order of the District Court of the United States, for the Northern District of California, Southern Division made with or without notice or hearing, in the proceeding pending in said Court and entitled In the Matter of The Western Pacific Railroad Company, Debtor, No. 26591–S, and instructing the Trustees to make such withdrawal; provided, however, that the Trustees shall give Reconstruction Finance Corporation at least ten days' written notice of their intention to apply for any such order and, following the making of any such order, at least five days' notice of the date on which withdrawal is to be made.

3. The Trustees shall have the right to put up with Reconstruction Finance Corporation from time to time, as further collateral security for said loan and subject to the same terms and conditions, such additional sums as the Trustees may find and determine to be available for said purpose, and as Reconstruction Finance Corporation may be willing to accept upon such terms and conditions.

IN WITNESS WHEREOF, the parties have executed this agreement the day and year first above written.

ALLAN P. MATTHEW,
1500 Balfour Building,
San Francisco, California

Filed Sept. 4, 1942
WALTER B. MALING, *Clerk*

IN THE DISTRICT COURT OF THE UNITED STATES,
FOR THE
NORTHERN DISTRICT OF CALIFORNIA,
SOUTHERN DIVISION

In the Matter of
THE WESTERN PACIFIC RAILROAD COMPANY,
Debtor.
No. 26591-S

ORDER PROVIDING FOR HEARING UPON PETITION OF TRUSTEES FOR INSTRUCTIONS RESPECTING RETIREMENT BY REDEMPTION OF A PORTION OF THE PRINCIPAL AMOUNT OF INDEBTEDNESS REPRESENTED BY THEIR OUTSTANDING CERTIFICATES OF INDEBTEDNESS AND FOR AN ORDER AUTHORIZING A FURTHER EXTENSION OF EITHER ALL OR A PORTION OF SAID CERTIFICATES

Upon due consideration of the petition of T. M. SCHUMACHER and SIDNEY M. EHRMAN, Trustees of the properties of the Debtor above named, filed herein and praying for instructions with respect to the retirement by redemption of a portion of the principal amount of indebtedness represented by their outstanding certificates of indebtedness in the amount of $9,550,000 and for an order authorizing the further extension of either all or a portion of said

certificates of indebtedness, IT IS HEREBY ORDERED as follows:

1. That said petition shall be and it hereby is set for hearing before this Court on September 28, 1942, at 10:00 o'clock, A.M.

2. That said Trustees be and they hereby are directed to give notice of the said hearing. That said notice be given by (a) publication on or before September 10, 1942, of a notice substantially in the following form in The Wall Street Journal (Pacific Coast Edition) and The Recorder, two newspapers of general circulation published in the City and County of San Francisco, State of California:

LEGAL NOTICE

IN THE DISTRICT COURT OF THE UNITED STATES

FOR THE

NORTHERN DISTRICT OF CALIFORNIA,
SOUTHERN DIVISION

In the Matter of THE WESTERN PACIFIC RAILROAD COMPANY, *Debtor.*	No. 26591-S

Notice of Hearing upon Petition of Trustees for Instructions Respecting Retirement by Redemption of a Portion of the Principal Amount of Indebtedness represented by their Outstanding Certificates of Indebtedness and for an Order authorizing a further extension of either all or a portion of said Certificates

NOTICE IS HEREBY GIVEN, pursuant to the order of the above named court, that a hearing will be held before

the Honorable A. F. St. Sure, Judge of the above entitled court, at the court room of the said Judge, in the United States Post Office and Court House Building, Seventh and Mission Streets in the City and County of San Francisco, State of California, on September 28, 1942, at 10 o'clock, A.M., or as soon thereafter as the same may be heard, upon the petition of T. M. Schumacher and Sidney M. Ehrman, Trustees in Reorganization of The Western Pacific Railroad Company, praying:

(1) That they be instructed whether they should retire by redemption, out of funds on hand and cash put up with the Reconstruction Finance Corporation as collateral security for a loan to said Trustees, a portion of the principal amount of the indebtedness represented by their outstanding certificates of indebtedness and, if the Court should determine that such partial retirement of said indebtedness should be made, that petitioners be instructed with respect to the amount thereof.

(2) That pursuant to and in accordance with said instructions the Court authorize said Trustees to apply forthwith to the Reconstruction Finance Corporation for a further extension of said loan or the remaining portion thereof from December 1, 1942, to December 1, 1943, and to the Interstate Commerce Commission for its approval thereof, and to make such other application or supplemental applications to the Interstate Commerce Commission as may be required in respect to said further extension of said outstanding certificates of indebtedness or remaining portion thereof.

(3) That pursuant to and in accordance with said instructions the Court make its order whereby said Trustees will be authorized to extend further from December 1, 1942, to December 1, 1943, their outstanding certificates of indebtedness in the total amount of $9,550,000, or the remaining portion thereof, as evidence of and security for the said further extension of said loan or the remaining portion thereof, the said certificates as again extended to bear interest at the rate of four per cent (4%) per annum payable monthly, the same rate of interest as is borne by said certificates as previously extended, and to be subject to a right of the Trustees, so long as said certificates are held by the

Reconstruction Finance Corporation, to redeem upon thirty (30) days' notice on any interest payment date such of said certificates as they may desire, and to be subject to a right of said Trustees, if said certificates are no longer held by said Reconstruction Finance Corporation, to redeem upon thirty (30) days' notice all but not less than all of said certificates on any interest payment date, and the said further extension to be effectuated by the Trustees by stamping or writing upon each of said certificates a legend or endorsement reading substantially as follows:

> "The holder hereof by acceptance hereof bearing hereon this endorsement hereby agrees that the maturity of the within certificate is further extended to December 1, 1943, with interest at the rate of 4% per annum payable monthly, with the privilege of redemption by the Trustees of the within certificate so long as the same is held by the Reconstruction Finance Corporation and the privilege of redemption by the Trustees, if the within certificate is no longer held by the Reconstruction Finance Corporation, of all but not less than all of the outstanding Trustees' Certificates of this issue, in any event on any interest payment date on thirty days' previous notice at the principal amount and accrued interest to the date fixed for redemption."

provided, however, that the Court reserve jurisdiction to provide by supplemental order, made with or without notice, that with the approval of the Interstate Commerce Commission first had and obtained the Trustees may issue and sell new certificates of indebtedness in the total amount of $9,550,000 or a portion thereof, dated December 1, 1942, and bearing interest at the rate of four per cent (4%) per annum or a different rate of interest, for the purpose of meeting the principal of the outstanding certificates or the remaining portion thereof at maturity.

(4) That said Trustees be further authorized by such order to make a Fourth Supplemental Agreement with Reconstruction Finance Corporation substantially in the form attached to said petition and marked Exhibit "A".

(5) That said Trustees be authorized (1) to put up with the Reconstruction Finance Corporation, incidentally to the further extension of said loan or the remaining portion thereof to December 1, 1943 and as collateral security therefor, such amount of cash, if any, as said Trustees may find and determine to be available for said purpose and as the Reconstruction Finance Corporation may be willing to accept, interest upon said loan or said portion thereof to be computed upon the outstanding balance of said loan or said portion thereof less the amount of said cash collateral, and the said cash collateral to be subject to a right and privilege on the part of said Trustees to withdraw all or any part of said cash collateral at any time (but not less than $250,000 at any one time) upon an order of the court, made with or without notice or hearing, instructing them to make such withdrawal, provided, however, that the Trustees shall give Reconstruction Finance Corporation at least ten (10) days' written notice of their intention to apply for any such order and, following the making of any such order, at least five (5) days' notice of the date on which withdrawal is to be made; (2) to put up with the Reconstruction Finance Corporation from time to time thereafter, as further collateral security for said further extension of said loan or such portion thereof and subject to the same terms and conditions, such additional amounts of cash, if any, as said Trustees may find and determine to be available for said purpose, and as Reconstruction Finance Corporation may be willing to accept upon such terms and conditions; and (3) to enter into an agreement with the Reconstruction Finance Corporation substantially in the form attached to said petition and marked Exhibit "B" and to enter into similar agreements in the event that said additional amounts of cash shall be put up with the Reconstruction Finance Corporation.

T. M. SCHUMACHER
SIDNEY M. EHRMAN
Trustees in Reorganization of The Western Pacific Railroad Company.

and (b) by mailing prior to September 11, 1942, a copy of this order and of said petition to the following parties:

Revenue and earnings 21

(a) Railway Operating Revenues of the Debtor's System 23

(b) Adjusted Consolidated Earnings Available For Interest 24

Earning power of the property 24

Increase in earning power due to Northern California Extension 27

Significance of earnings history in relation to authorization and treatment of this respondent's secured claim 28

Further required adjustments in past earnings record 31

SUMMARY OF ARGUMENT 32

POINTS

I. THE FINDINGS AND DETERMINATIONS OF THE COMMISSION AND THE DISTRICT COURT AS TO ESSENTIAL FACTS ARE OBVIOUSLY INSUFFICIENT TO JUSTIFY OR SUPPORT THE TREATMENT OF RESPONDENT'S SECURED CLAIM, WHICH TREATMENT IS CLEARLY CONFISCATORY 35-44

II. THE COMMISSION'S CONSTRUCTION OF SECTION 77 OF THE BANKRUPTCY ACT, WHICH WAS ACCEPTED AND ADOPTED BY THE DISTRICT COURT, IS BASICALLY ERRONEOUS, AND CANNOT BE SUSTAINED EITHER UNDER THE LANGUAGE OR INTENT OF SECTION 77 OF THE BANKRUPTCY ACT OR UNDER ANY PRIOR DELEGATION OF AUTHORITY TO THE COMMISSION IN CONNECTION WITH THE ISSUE OF SECURITIES BY RAILROADS 45-71

Provisions of the statute 46

Commission's theory of capitalization in lieu of valuation 47

PAGE

The public's right to transportation facilities for maximum needs 47

Security holders' right to be protected in that investment 48

The Commission's theory and construction of Section 77 49

Basic objections to the substitution of capitalization theories for valuation under Section 77 55

(1) The du Bois decision is against the Commission's theory 55

(2) Commission's theory conflicts with established principles of corporate law and accounting 56

(3) Commission's own plan of capitalization in this case negatives use of capitalization in lieu of valuation 57

Reference to powers of the Commission under Section 20a of the Interstate Commerce Act does not sustain Commission's procedure 59

Three striking examples of the exercise by the Commission of the powers conferred by Section 20a appear upon the record in this proceeding 61

Meaning of "compatible with the public interest" in Section 20a 62

The Commission's interpretation of its powers under Section 20a 64

This is not a case involving accounting entries where properties are actually purchased at a price 67

Summary 69

PAGE

III. The Commission's assumption of a legislative mandate under Section 77 authorizing it to convert valid debt into stock finds no support in the language of Section 77 and carries with it practical consequences seriously prejudicial to the credit of the debtor 71-75

IV. Section 77 of the Bankruptcy Act does not delegate to the Commission authority to originate and impose upon the parties a plan of reorganization and to nullify completely the rights of the parties to propose and negotiate a fair and equitable plan 75-81

V. The groups of security holders represented in this proceeding should be permitted, under supervision by the Commission and the courts as contemplated by Section 77, to renegotiate their contractual relationships, and formulate and agree upon a plan of reorganization, which would (a) observe the rule of priorities of the *Boyd* and *du Bois* cases, (b) provide for fixed charges only to the extent that they shall be adequately covered by "probable earnings", and (c) provide for a total capitalization within the limit established by the value of the property of the debtor used in the public service, after due consideration of its earning power 81-101

Valuation provisions of Section 77 87

"Earning power" as "capacity to produce earnings" 88

The Commission's "realistic" construction of Section 77 97

Rejected by Congress 97

The sound construction of Section 77 98

Practical application of Section 77 to the situation presented in this proceeding 99

PAGE

VI. The District Court in this case failed to exercise an informed and independent judgment in approving the Commission Plan 102-115

The theory of the District Court 102

A reorganization proceeding under Section 77 is a judicial proceeding in bankruptcy 105

Section 77 does not curtail the judicial powers of the bankruptcy court 106

The Commission's determinations are not binding on the District Court 108

Both Court and Commission must perform their functions 112

Review of mere administrative orders distinguished 113

Summary 115

VII. Preferential treatment given the claim of the Reconstruction Finance Corporation under the Commission Plan is unsupported by necessary administrative or judicial findings and cannot be justified under the facts of this case 116-118

VIII. The General and Refunding Mortgage is a first lien upon assets of the debtor sufficient in value to cover fully the claims of the three secured creditors, including this respondent 119

In Conclusion 120-121

BRIEF ON BEHALF OF A. C. JAMES CO., RESPONDENT

Introductory

A. C. James Co. has a secured claim against the debtor railroad in the principal amount of $4,999.80, which claim is described more fully at page 10 of this brief. This

Note: All emphasis in quoted matter has been supplied throughout this brief unless otherwise indicated.

claim was classified as a separate class of creditor, under subsection (c)(7) of Section 77 of the Bankruptcy Act, by order of the District Court dated August 20, 1935 (R. 1023).

In the pending proceeding under Section 77 of the Bankruptcy Act the Interstate Commerce Commission rejected three plans of reorganization filed by parties to the proceeding, and several amended plans, in all of which provision was made for refunding in full the secured claim of this respondent. The Commission then formulated, and in this proceeding seeks to impose upon the creditors, under claimed authority of Section 77, its own plan of reorganization, which is here in issue. This Commission Plan has the effect of disregarding, cancelling, and refusing to refund more than half of the secured claim of A. C. James Co.

A. C. James Co. has contended below, and will urge in this Court, that nothing in the facts, or in Section 77 of the Bankruptcy Act, or in the law of the land, warrants or supports this confiscatory treatment of its secured claim.

This case brings before this Court something more than matters of procedural due process. It necessarily involves questions as to basic principles of administrative law, the relative functions of the courts and administrative agencies and the essential judicial function of construing the scope of powers delegated by Congressional act. The sound development of administrative law requires that an administrative agency shall function within the legislative mandate and seek to attain the legislative objectives. When an administrative agency—no matter how well-intentioned—goes outside the four corners of the statute, even as it may be clarified by any extrinsic indication of Congressional intent, and seeks to accomplish objectives not within the declared legislative purposes, those purposes are defeated. We maintain that the plainly indicated objects of the statute would be nullified by the Interstate Commerce Commission's interpretation of Section 77 of the Bankruptcy Act in this proceeding, and a

soundly conceived statute rendered in large part ineffective.

This is a case of novel impression in this Court. It involves the interpretation and application of Section 77 of the Bankruptcy Act (47 Stat. 1474, as amended; 11 U. S. C. A., § 205; all pertinent portions printed in full at pages i to xxvi of the appendix to this brief). Although Section 77 of the Bankruptcy Act was enacted in 1933 and substantially amended in 1935 to its present form (49 Stat. 1969), this is the first case in which the broad questions of the construction of Section 77 and its application to the reorganization of railroads has come before this Court.

In *Continental Illinois National Bank and Trust Company* v. *Chicago, Rock Island & Pacific Ry. Co.*, 294 U. S. 648, this Court sustained Section 77 of the Bankruptcy Act, in its general scope and aim, as within the power conferred on Congress by the bankruptcy clause of the Constitution. That case raised specifically the question of the jurisdiction of the bankruptcy court to enjoin creditors from selling their collateral during the pendency of a reorganization proceeding under Section 77, and this Court had no occasion to consider the questions of construction of the Section and its application which are raised in the present proceeding.

Opinions below

Opinion of Circuit Court of Appeals, 9th Circuit, 124 F. (2d) 136 (R. 2663);

Opinion of District Court, Northern District of California, Southern Division, 34 F. Supp. 493 (R. 1569);

Original Report and Order of Interstate Commerce Commission on October 10, 1938, 230 I. C. C. 61 (R. 194);

Commission's Modifying Report and Order, June 21, 1939, 233 I. C. C. 409 (R. 300).

Jurisdiction

The jurisdiction of this Court has been invoked under Section 240(a) of the Judicial Code, as amended by the Act of February 13, 1925 [28 U. S. C. A., § 347 (a)] and § 24(c) of the Bankruptcy Act [11 U. S. C. A., § 47(c)]. The decree of the Circuit Court of Appeals for the Ninth Circuit was entered November 28, 1941 (R. 2675-6).

Scope of Review

The decision of the Circuit Court of Appeals for the Ninth Circuit, here under review, reversed an order entered by the District Court for the Northern District of California, Southern Division, on August 15, 1940. The order of the District Court had approved a plan of reorganization for the debtor railroad which had been promulgated by the Commission and certified to the District Court. The decision of the Circuit Court of Appeals was based substantially upon two grounds: (a) that the Commission and the District Court had failed to make the necessary findings of fact upon which the fairness and equity of the plan of reorganization could be judicially determined; and (b) that the District Court had misconstrued and improperly limited its judicial functions and duties under Section 77 of the Bankruptcy Act.

In this brief, this respondent will present for this Court's consideration, not merely the defects of procedural due process which the Circuit Court of Appeals quite properly found in the proceedings before the Commission and in the District Court, but substantial questions at issue in this proceeding involving the basic construction of Section 77 of the Bankruptcy Act.

It has seemed to us that in giving consideration to the matters specifically decided by the Circuit Court of Ap-

peals for the Ninth Circuit, this Court will also have to review at this time basic questions as to the construction and application of Section 77 of the Bankruptcy Act. The procedural defects found by the Circuit Court of Appeals in the proceedings below are rooted deep in basic misconstructions of Section 77 which were adopted by the Commission and by the District Court.

It should be noted in this connection that this Court has granted in this proceeding four petitions for certiorari and a cross-petition, without express limitation, which on their face raise issues which go considerably beyond the somewhat narrow bases of decision set out in the opinion of the Circuit Court of Appeals.

Moreover, the Commission has filed in this proceeding a memorandum *amicus curiae* in which it states that:

> "* * * it is important to the efficient performance of the Commission's duties under Section 77 that the procedure to be followed and the findings to be made by the Commission should be established by a definitive decision of this Court."

The Commission has thus expressed formally its desire that this Court indicate in its decision in this proceeding any basic errors in the construction and application of Section 77 which may appear from the Court's review of the proceeding, in order that the Commission may perform effectively the duties imposed upon it by Section 77, in the light of conditions then existing, when this case is returned to it for further consideration. *Federal Communications Commission* v. *Pottsville Broadcasting Co.*, 309 U. S. 134.

It must be admitted that under the procedure provided by Section 77 of the Bankruptcy Act the parties will have a later opportunity to bring up for review substantial questions of the construction of Section 77 which affect their interests. The plan of reorganiza-

tion which the Commission seeks to impose upon the creditors in this proceeding has not yet been submitted to the creditors for the required vote of approval under subsection (e) of Section 77. The only creditors (excluding the First Mortgage Trustees,[1] who have definitely aligned themselves with the insurance company bondholders, although they represent a minority of the outstanding bonds) now supporting the Commission Plan are (a) a group of insurance companies and one bank, functioning under the exception proviso of subsection (p) of Section 77, holding a little more than one-third of the First Mortgage Bonds of the debtor, and (b) the Reconstruction Finance Corporation, which is given under the Commission Plan a substantial and unwarranted preference as against other secured creditors. It may fairly be assumed that any plan formulated by the Commission, under what we deem to be its erroneous construction of Section 77, would not receive an affirmative vote of acceptance by all classes of secured creditors.

Under the express provisions of subsection (e) of Section 77 such plan might be confirmed by the District Court after an adverse vote by one or more classes of creditors, "if he [the District Judge] is satisfied and finds, after hearing, that it [the plan] makes adequate provision for fair and equitable treatment for the interests or claims of those rejecting it; **that such rejection is not reasonably justified in the light of the respective rights and interests of those rejecting it and all the relevant facts;** and that the plan conforms to the requirements of clauses (1) to (3), inclusive, of the first paragraph of this subsection (e)." Any such confirmation by the District Judge (assuming that any judge would make the required findings in the face of the demonstrated present day earning power of the debtor's railroad system) would be the subject of

[1] Subsection (c)(7) of Section 77, which permits mortgage trustees to file claims, expressly provides:

> "* * * nothing herein shall constitute such trustee or trustees the representative or representatives of such holders (bondholders) for the purpose of accepting or rejecting any plan of reorganization."

judicial review under the express provisions of subsection (f) of Section 77.

However, despite the existence under the procedure provided by the statute of a later opportunity to bring up additional questions for review, the time elements are such that all parties to this proceeding have a vital interest in a final determination, at this time, of these basic problems of construction and interpretation of Section 77.

Unless this Court does consider broadly the questions as to the proper construction of Section 77 of the Bankruptcy Act raised in this proceeding and hand down a final and definitive interpretation of that statute, it may be years before the reorganization of the debtor railroad can be completed. This may be sufficiently indicated by reference to the condensed chronological summary of the prior proceedings herein set forth below.

Chronological Summary of Proceedings Heretofore Had

August 2, 1935	Debtor's petition for reorganization filed with District Court and Commission and approved by District Court (R. 4, 1019).
August 20, 1935	Claims of creditors and stockholders classified by order of District Court (R. 1022).
February 8, 1936	Plan of reorganization filed by debtor with Court and Commission (R. 19).
March 23, 1936	Hearings before examiners of Commission commenced.
September 28, 1936	Plan of reorganization filed with Commission by Institutional Bondholders Committee (R. 48).
October 26, 1936	Plan of reorganization filed with Commission by A. C. James Co. (R. 101).

August 1, 1937	Proposed report issued by Bureau of Finance of Commission, rejecting plans submitted by the parties and promulgating Commission Plan (R. 116).
November 17, 1937	Hearing before Commission on exceptions to proposed plan filed by all parties to proceeding.
October 10, 1938	Commission issued original report and order approving Bureau of Finance Plan with some modification (R. 194, 281).
January 20, 1939	Hearing held before Commission on petitions of all parties for rehearing and modification.
June 21, 1939	Commission issued its "report and order on further consideration" approving modified plan of reorganization, modifying its report of October 10, 1938, and revoking order of that date (R. 300, 382).
September 28, 1939	Proceedings before Commission certified to District Court.
December 8, 1939	Objections to Commission Plan filed by this respondent and others in District Court (R. 892, et seq.).
January 22-25, 1940	Hearings before District Court.
August 15, 1940	Order entered by District Court overruling objections and approving Commission Plan (R. 1600).
July 28-29, 1941	Hearing on appeals in Circuit Court of Appeals.
November 28, 1941	Decree of Circuit Court of Appeals entered.
April 27, 1942	Petitions for certiorari and cross-petition granted by this Court.

For the reasons indicated above and in the interest of substantial justice, it therefore appears that the basic questions of the construction and application of the statute to the facts of this case, as well as the particular points of administrative and judicial procedure, are properly to be considered for decision by the Court at this time.

This brief is therefore directed, in substantial part, to the basic questions as to the construction of Section 77 and its application to the facts here before the Court. This respondent will file, prior to the argument, pursuant to the stipulation of the parties of August 15, 1942, a reply brief dealing specifically with such contentions of the petitioners as do not fall within the scope of the affirmative presentation adopted in this brief.

Statement of the Case

This respondent has contended throughout this proceeding that the claim of a secured creditor cannot, under Section 77 of the Bankruptcy Act lawfully be refused refunding in whole or part, and thus foreclosed, on the basis of a bald limitation of capitalization, utterly unrelated to the value as previously found by the Commission, of the properties of the debtor upon which the secured creditor holds a lien. The Commission and the District Court rejected this contention; the Circuit Court of Appeals has sustained it.

This respondent has also contended throughout this proceeding that the value of the debtor's railroad system, as it exists today, provides ample margin for the full recognition and refunding of respondent's secured claim; and that the Commission's prior valuation (under Section 19a of the Interstate Commerce Act, 49 U. S. C. A. Section 19a), as previously determined and reported in this proceeding, should not be materially diminished or otherwise modified

under the valuation provisions of subsection (e) of Section 77, if soundly construed.

In order that the factual background against which the legal questions arise may be clear to the Court, and in order to correct some possible misapprehensions which might flow from the manner of presentation of this factual background in the briefs of the petitioners, it seems desirable to present at this point a brief summary of the facts as to the claim of this respondent and as to the debtor's status.

Secured claim of A. C. James Co., this respondent

A. C. James Co. is a secured creditor of the debtor in the principal amount of $4,999,800, with unpaid accrued interest thereon at 5% per annum, from January 1, 1934. The aggregate debt, principal and interest, owing to A. C. James Co. on January 1, 1939, the effective date of the Commission Plan, was $6,249,750 (R. 1023).

This indebtedness arose from the purchase in 1931 and 1932 by A. C. James Co., at public sale, for cash, at full face value, of debentures of the debtor, authorized by the Interstate Commerce Commission in proceedings under Section 20a of the Interstate Commerce Act, to enable the debtor to complete its Northern California Extension, a connection with the Great Northern Railway, which Extension is now a substantial and highly important part of the debtor's railway system. In the indenture under which these debentures were issued, the debtor agreed that no new mortgage or pledge of the properties of the debtor would be created without calling these debentures for payment (I. C. C. Exhibit No. 50, p. 32).[1]

The report of the Commission dated November 20, 1930, approving the issue of these debentures, is printed in full in the appendix to this brief at pages xxvii to xxix (R. 2324).

[1] Admitted at R. 2335. Not printed in the Record by stipulation (R. 2616); original exhibit before this Court pursuant to stipulation filed July 23, 1942.

Subsequently in March and May, 1932, the debentures held by this respondent were exchanged for promissory notes of the debtor secured by its General and Refunding Mortgage bonds (R. 1084-6). The reports of the Commission providing for this exchange are a part of the unprinted record before the Court under stipulation, and are printed at pages xxx to xli of the appendix to this brief (R. 2341).

It should be noted at this point that these reports of the Commission, which approved and authorized the securities originally held by this respondent and the securities received in exchange therefor, and now held, contain in each case an express finding that the issue by the debtor Company of the obligations in question "is for lawful objects within its corporate purposes, and compatible with the public interest" and "necessary and appropriate for * * * the proper performance by it of service to the public as a common carrier". There will be occasion to make further reference to this fact later in this brief. (See Point II.)

The Commission had on June 9, 1930, after hearing and investigation, issued a complete and detailed report upon the applications of The Great Northern Railway Company and The Western Pacific Railroad Company for authority to construct the proposed Northern California Extension and lines connecting with the Great Northern System, and had certified

> "* * * That the present and future public convenience and necessity require the construction and operation by the Western Pacific Railroad Company of the [proposed] line of railroad * * *." (*Great Northern Railway Company Construction*, 166 I. C. C. 3, 41.)

The three notes now held by A. C. James Co. are secured by $6,249,500 principal amount of the debtor's General and Refunding Mortgage bonds, issued under its Indenture dated as of January 1, 1932, which General and

Refunding Mortgage bonds were deposited with and are now held by A. C. James Co., except that $2,000,000 principal amount of such bonds were, at the request of the debtor, delivered to The Railroad Credit Corporation, to be held by that corporation as additional collateral against advances made by it. A. C. James Co. retains all its rights as lienor in and to such $2,000,000 worth of bonds, subject only to the prior rights accruing to The Railroad Credit Corporation as a result of the delivery of such bonds, as stated above (R. 1023).

Treatment of A. C. James Co.'s secured claim under Commission Plan

In the Commission Plan, this respondent is allotted for its secured claim (principal plus interest in the aggregate amount of $6,249,750) $163,724 principal amount of Income Mortgage 4½% bonds, Series A, $256,756 of 5% Preferred Stock, Series A, and 37,635 shares of common stock of the proposed reorganized company (R. 392). Such common stock is no par value stock and in the Commission Plan it is allotted to other secured creditors at prices varying from $57 to $62 per share (R. 391-2). Using the highest price assigned by the Commission to such common stock, in allotting it to other secured creditors, the total allotment of securities to this respondent amounts to $2,753,850, against an aggregate claim of $6,249,750, or approximately 44% of the face of said claim. Using the same valuation, no other secured creditor is allotted less than 100% of its claim.

The brief for the Institutional Bondholders (p. 55) in an ingenious effort to spell out a new valuation of the debtor's properties for reorganization purposes, by assigning to the Commission's proposed capital structure a dollar total, takes the no par value common stock, which is included in the capital structure, at $57 per share. On this basis, only about 40% of this respondent's secured claim would be recognized and refunded.

Even if the common stock were to be taken at a value of $100 per share (a value used by the Commission in its reports of October 10, 1938 and June 21, 1939, in discussing capitalization,—R. 244, 245, 321) the securities allotted would fall short of a refunding of this respondent's claim, to the extent of approximately one-third.

The Commission found (R. 269) that the securities allotted to A. C. James Co., as a secured creditor, would be inadequate to satisfy its claim but did not determine or discuss the amount of the inadequacy.

The railroad system of the debtor as it exists today

For a more complete statement as to the property of the debtor and its subsidiaries and the properties operated by the debtor, the Court is referred to the printed record at pages 1037-1043.

The original line of railroad operated by the debtor ran from Oakland, California, to Salt Lake City, a distance of 924 miles.

Between 1927 and 1938 substantial additions to the railroad system of the debtor were made which have basically changed its significance as a part of our national transportation system, and have greatly increased its earning power.

The most important of these changes and additions was the construction in 1931 and 1932 of an additional line of railroad called the Northern California Extension, extending from a point on the original main line at Keddie, California, northward to connect with the Great Northern Railway Company's lines at Bieber, California. This line of railroad covers a distance of only approximately 112 miles, but because of the difficulty of the terrain through which it was built, it cost more than $10,000,000 to construct. This northward extension of the Western Pacific has opened to the debtor's railroad system en-

tirely new traffic fields and, as will hereinafter be indicated, has added greatly to the earning power of the debtor's railroad system as a whole.

In addition to the construction of the Northern California Extension, the original main line of the debtor was substantially improved and increased in efficiency by the so-called Improvement and Rehabilitation Program which was initiated in 1927 and involved the expenditure of approximately $18,000,000 between 1927 and 1938 in basic improvements of the physical property to increase operating efficiency and earning power. Of the total of $18,000,000 expended on the improvement program $8,000,000 was expended by the debtor during the period from 1927 to 1931 (R. 1052). The program was necessarily suspended at that time because of the impact of the 1929 depression. After the property was taken over by the Trustees of the Court in this proceeding, work on the program was resumed and completed during the period from 1936 to 1938 (R. 203, 1214). It was for the purpose of carrying on and completing this program that the Trustees borrowed $10,000,000 on Trustees' Certificates, to which reference will hereinafter be made in connection with the discussion of the capitalization of the debtor.

At the present time the debtor owns or operates 1,207.51 miles of standard gauge railroad (R. 1037).

One other factor of major importance should be mentioned as having a substantial effect on the economic efficiency and earning power of the debtor's railroad system. This factor was the opening in June, 1934, of the Dotsero Cut-off as part of the Denver and Rio Grande Western Railroad System. Prior to 1934 the volume of traffic received by the debtor from its important eastern connections over the Denver and Rio Grande Western Railroad Company lines, was limited, as to traffic moving to and from Chicago, by the existence of the so-called Pueblo Loop,

which so delayed traffic as to make it impossible to maintain competitive freight schedules as to freight moving between Chicago and California points. The building of the Moffatt Tunnel and the construction of the Dotsero Cut-off shortened the through route so far as Denver and Rio Grande Western movement was concerned by approximately 175 miles. This has increased and is now increasing substantially the volume of traffic received by the debtor from its important connections, the Burlington and Rock Island railroads, by way of the Denver and Rio Grande Western and the volume of traffic delivered by it to its connections, the Burlington and Rock Island railroads, by way of the Denver and Rio Grande Western (R. 215, 2099, 2100).

Investment and value of the property of the debtor

In its report of October 10, 1938, the Commission stated that the balance sheet of the debtor's Trustees as of June 30, 1938, showed total assets of $173,650,980.19 (R. 203, 1060, par. 63).

Section 19a valuation

The Commission has determined, and has stated in its report in this proceeding, the value of the property of its debtor and its wholly owned subsidiaries, pursuant to Section 19a of the Interstate Commerce Act (R. 1058-63). In its report of October 10, 1938, the Commission summarized total former valuations and concluded (R. 224):

> "* * * If there be added to the above amounts [the Commission's valuations of the properties of The Western Pacific Railroad Company and its wholly owned subsidiaries] the net cost of additions and retirements between valuation dates and December 31, 1935, the total would be $139,600,455."

The valuation of the properties of the debtor and its subsidiaries (excluding Deep Creek Railroad Company which was abandoned in 1939), as found by the Interstate Commerce Commission under Section 19a of the Interstate Commerce Act, with additions and betterments, new lines and extensions, subsequent to the dates of valuations, plus non-operating properties, (all as shown by the books of the debtor's Trustees) was in the total amount of $150,907,623.49 as of December 31, 1938 (R. 1061-2, par. 68).

Commission's prior determinations of capital assets

On February 27, 1932, the Commission, in its report authorizing the issue of $15,000,000 principal amount of General and Refunding Mortgage Gold bonds, Series A, of the debtor, found that the total capital assets of the debtor in road, equipment and affiliated companies, as of December 31, 1931 was $147,056,283.31 (R. 1060, par. 64). Again, on December 9, 1932, the Commission, in its report authorizing the issue of $4,000,000 principal amount of General and Refunding Mortgage Gold bonds, Series B, of the debtor, found the "total capital assets [to be] $148,796,047.60," as of May 31, 1932 (R. 1060, par. 65). Part of each issue of bonds was authorized to secure the notes of the debtor which were issued to A. C. James Co. in 1932 in exchange for the debentures theretofore held by it.

The Commission's valuation under Section 19a and its prior determinations of capital assets in authorizing the issue of securities to A. C. James Co. in 1932 were referred to by the Commission in its reports. But when the Commission dealt with its proposed allowable capital structure, it blandly waved aside these data, as irrelevant, under the construction which it read into Section 77 (Point II).

Secured claims against debtor and their treatment under Commission Plan

There is printed below (a) a table which shows the secured claims against the debtor, with accrued interest to January 1, 1939, the effective date used in the Commission Plan; (b) a table showing the securities which it is proposed should be issued by the reorganized company under the Commission Plan; and (c) a table showing the distribution of such proposed securities among the secured creditors. A complete list of the claims against the debtor appears at pages 1022-28 of the printed record, while the securities proposed to be authorized under the Commission Plan appear at page 364 of the record and the proposed distribution, at pages 390-2.

(a) Summary of secured claims as of January 1, 1939

Claim or Interest	Principal of claim or interest	Accrued interest at contract rate to effective date of plan	Total claim including interest at contract rate to effective date of plan
Trustees' Certificates (held by Reconstruction Finance Corporation)	$10,000,000.00	$	$10,000,000.00
Equipment obligations	2,750,050.00	94,202.00	2,844,252.00
First Mortgage 5% Bonds	49,290,100.00	13,143,776.66	62,433,876.66
Reconstruction Finance Corporation Collateral Notes (secured by General and Refunding Mortgage bonds and other collateral)	2,963,000.00	899,869.98	3,862,869.98
The Railroad Credit Corporation Collateral Notes (secured by General and Refunding Mortgage bonds and other collateral)	2,445,609.88	145,314.23	2,590,924.11
A. C. James Co. Collateral Notes (secured by General and Refunding Mortgage bonds)	4,999,800.00	1,249,950.00	6,249,750.00
Total secured Debt	$72,448,559.88	$15,533,112.87	$87,981,672.75

(b) Proposed new securities

Undisturbed equipment obligations	$ 2,750,050
New First Mortgage 4% Bonds	10,000,000
Income Mortgage 4½% Bonds	21,219,075
Five Per Cent Preferred Stock, par value $100 per share	31,850,297
Total of dollar value securities	$65,819,422
No par common stock	319,441 shares

(c) Distribution of proposed securities

(Exclusive of undisturbed equipment trust obligations and First Mortgage 4% Bonds, to be issued for new money)

Secured Creditors		Income Mortgage 4½% Bonds	5% Preferred Stock, $100 par value	No par Common Stock
First Mortgage 5% Bonds				
Principal	$49,290,100.00			
Interest to Jan. 1, 1939	13,143,766.66			
Total	$62,433,876.66	$19,716,040	$29,574,060	230,593 shares
Reconstruction Finance Corporation Collateral Notes (secured by General and Refunding Mortgage Bonds and other collateral)				
Principal	$ 2,963,000.00			
Accrued interest to Jan. 1, 1939	899,869.98			
Total	$ 3,862,869.98	1,185,200	1,777,800	15,788 shares
The Railroad Credit Corporation Collateral Notes (secured by General and Refunding Mortgage Bonds and other collateral)				
Principal	$ 2,445,609.88			
Accrued interest to Jan. 1, 1939	145,314.23			
Total	$ 2,590,924.11	154,111	241,681	35,425 shares
A. C. James Co. Collateral Notes (secured by General and Refunding Mortgage Bonds)				
Principal	$ 4,999,800.00			
Accrued interest to Jan. 1, 1939	1,249,950.00			
Total	$ 6,249,750.00	163,724	256,756	37,635 shares

Comments

With reference to the above summary statement of the situation as to the debtor's secured obligations and the provision made for them, certain points should be noted for their bearing upon the subsequent discussion in this brief.

The Trustees' Certificates of Indebtedness do not represent the refunding of any obligation of the debtor existing on August 2, 1935, when the debtor's petition under Section 77 was filed. They were originally issued in the aggregate principal amount of $10,000,000 pursuant to orders of the District Court made October 5, 1938 and November 7, 1938 (R. 1028). They were authorized by the Commission and by the District Court upon petition of the Trustees in order to provide the Trustees with the necessary funds to complete a program of rehabilitation and improvement of the debtor's railroad system, which program had been initiated in 1927 and suspended in 1930, after approximately $8,000,000 had been expended. On January 1, 1939, the effective date of the proposed Commission Plan, these Trustees' Certificates of Indebtedness were outstanding in the principal amount of $10,000,000, bearing interest at the rate of 4% and were all held by Reconstruction Finance Corporation (R. 1028). The Certificates have been renewed from time to time since January 1, 1939, and the principal amount has been somewhat reduced by amortization payments subsequently required by the Commission in connection with renewal authorizations. From their nature they constitute a first lien upon all property in the hands of the Court, and at the present time are specifically secured by $6,000,000 in cash (see p. Liii of appendix), which has been deposited from time to time with the Reconstruction Finance Corporation by the Trustees pursuant to an order of the District Court, dated November 26, 1941.

The collateral notes held by Reconstruction Finance Corporation, as shown in the above tables, are an obligation of the debtor in the principal amount of $2,963,000, secured by $10,750,000 principal amount of the debtor's General and Refunding Mortgage bonds and also by additional collateral pledged by parties other than the debtor (R. 1023-4).

The secured notes held by The Railroad Credit Corporation in the principal amount of $2,445,609.88 are secured by $4,000,000 principal amount of the debtor's General and Refunding Mortgage bonds and by other collateral, including a subordinate lien upon all collateral pledged by the debtor with the Reconstruction Finance Corporation (R. 1024-5). The General and Refunding Mortgage bonds held by The Railroad Credit Corporation include $2,000,000 principal amount, which were originally deposited with and held by the A. C. James Co. A. C. James Co. retains all its rights as lienor in and to such $2,000,000 worth of bonds, subject only to the prior rights accruing to The Railroad Credit Corporation as a result of the delivery of such bonds, as stated above (R. 1023).

In addition to the secured claims shown by the above tables, the debtor owed to Western Pacific Railroad Corporation and The Western Realty Company $5,818,791 principal indebtedness upon open account which, with interest at the contract rate to the effective date of the plan, amounted to a total unsecured debt of $7,810,887 (R. 1026-7).

Further, the tables set out above do not show the stock of the debtor, all of which is held by Western Pacific Railroad Corporation, being $28,300,000 par value of preferred stock and $47,500,000 par value of common stock (R. 1027).

Revenue and earnings

In the report of the Commission of October 10, 1938, there appears a somewhat extended discussion of the past earnings history of the debtor's system and there is subsequent discussion of this earnings record in the Commission's later report of June 21, 1939 (R. 218, 308).

This discussion of earnings in the Commission's reports is of little value because of the almost complete failure to distinguish between the earnings of the property of the debtor as that system existed prior to the changes made from 1927 to 1938, and the earning power of the debtor's railroad system as it now exists after the substantial changes made between 1927 and 1938, including (a) the construction and operation of the Northern California Extension; (b) the completion in 1938 of the Improvement and Rehabilitation Program; and (c) the beneficial effects of the building of the Dotsero Cut-off on the amount of traffic received from and delivered to the Burlington and Rock Island railroads by way of the Denver and Rio Grande Western.

The entire discussion by the Commission in its reports of the earnings history of the debtor is further colored by its misconception of its task under Section 77 of the Bankruptcy Act. As will be pointed out later in this brief, the Commission has assumed under purported authority of Section 77 to deal with property rights of secured creditors and other parties in interest on the basis of the supposed necessity of limiting total capitalization solely in the public interest. It has, therefore, not concerned itself primarily with the basic question of "earning power" which it would necessarily have faced if it had felt constrained to revalue the existing properties of the debtor under subsection (e) of Section 77 of the Bankruptcy Act, where "earning power" as distinct from "earnings" and "probable earnings" is expressly made the primary determinative factor.

When the Commission Plan came before the District Court, the parties to the proceeding entered into a stipulation for the convenience of the Court, which included a statement of the railroad operating revenues of the debtor's system from 1922 (the end of Federal control) to the latest available date (R. 1064), and a statement of adjusted consolidated earnings available for interest (R. 1065-6) for the same period.

The earnings data shown in the stipulation of the parties, referred to above, has been supplemented as to the subsequent periods by monthly statements prepared by the Trustees in charge of the operation of the debtor's property and filed with the Clerk of the United States District Court for the Northern District of California, Southern Division, and duly certified to the Circuit Court of Appeals for the Ninth Circuit pursuant to order of the District Court (R. 2627). These statements appear for the period from December, 1939 to September 1941, in Volumes VII and VIII of the printed record. Subsequent statements covering the periods since September, 1941, have been submitted to this Court and are a part of the unprinted record available, under stipulation of the parties filed with this Court, for use in brief or in argument. For the convenience of the Court these statements for the months, December, 1940 (which includes operating results for the calendar year 1940), December, 1941 (which includes operating results for the calendar year 1941), June, 1942 (which includes operating results for the first six months of 1942) and July, 1942 are printed in the appendix of this brief at pages L to Liii.

The two tables set forth below show in summary form (a) railway operating revenues of the debtor's system and (b) adjusted consolidated earnings available for interest:

(a)

Railway Operating Revenues of the Debtor's System

Year	Freight	Passenger	Other	Total
1922	$ 9,667,960	$2,184,093	$ 884,511	$12,736,564
1923	10,751,276	2,455,420	1,208,116	14,414,812
1924	11,241,579	2,106,656	1,321,078	14,669,313
1925	12,634,074	2,000,817	1,263,657	15,898,548
1926	14,259,651	2,319,151	1,372,666	17,951,468
1927	14,764,690	2,090,480	1,451,505	18,306,675
1928	15,974,137	1,870,790	1,576,924	19,421,851
1929	16,358,041	2,187,700	1,550,816	20,096,557
1930	15,450,051	1,795,834	1,573,177	18,819,062
1931	12,342,041	1,315,283	1,195,614	14,852,938
1932	10,662,430	764,977	823,664	12,251,071
1933	10,950,948	595,268	656,273	12,202,489
1934	12,338,085	629,720	811,433	13,779,238
1935	13,254,572	730,957	421,929	14,407,458
1936	15,264,675	805,673	476,996	16,547,344
1937	16,588,843	814,632	515,010	17,918,485
1938	14,934,497	680,382	442,572	16,057,451
1939	16,819,157	1,014,887	473,477	18,307,521
1940	18,701,678	860,047	436,617	19,998,342
1941	24,119,568	873,174	553,741	25,546,483

1942: Total for first six months, $16,235,602 (representing an increase of $6,124,602 or 60.57% over the corresponding total for first six months of 1941).

(b)

Adjusted Consolidated Earnings Available For Interest

1922	$2,040,890
1923	4,412,234
1924	3,241,823
1925	4,557,798
1926	4,868,390
1927	3,470,861
1928	4,376,972
1929	3,718,436
1930	2,381,529
1931	220,494 (deficit)
1932	283,912
1933	474,365
1934	1,396,353
1935	1,377,026
1936	1,901,423
1937	1,077,407
1938	225,431
1939	1,519,916
1940	2,649,797
1941	4,548,138

1942: First six months, $4,080,090 (representing an increase of $2,996,563, or 276.56% over the corresponding period of 1941).

Earning Power of the Property

The discussion of earnings in the briefs of the petitioners is essentially misleading in several respects.

In the first place, they find it necessary to deduct from the actual earnings available for interest in recent years substantial sums of theoretical Federal taxes, not actually paid or payable, on the theory that *if* the Commission Plan had been in effect, it would have converted 60% of the First Mortgage debt into equity holdings and so would

result in moneys that would be deductible from income as interest, under the old capital structure, becoming subject to tax as equity earnings under the Commission Plan.

In the second place, the petitioners give only lip service (see note, p. 7 and p. 14, Institutional Bondholders' brief) to the substantial changes which occurred in the debtor's railroad system between 1927 and 1938, inclusive, and completely fail to give due weight to the fact that the railroad system of the debtor, as it has existed since 1938, is a substantially different property from the original railroad system as it existed during the prior years of the period which they discuss.

It may fairly be said, however, as to the property to be reorganized, that no amount of parading of historical earnings, no matter how skillful, can disguise the fact that in the calendar year 1941 the debtor's railroad system earned by a wide margin its interest requirements under its existing capitalization (prior to the drastic and unsupported changes proposed in the Commission Plan). In other words, during the calendar year 1941, after the debtor's railroad system had earned all interest requirements on its equipment obligations, the Trustees' Certificates, its outstanding First Mortgage bonds and its secured debts (including the claim of this respondent) there were left excess earnings of approximately $1,218,000.

Further, no amount of skillful argument or chart-making can cloud or conceal the fact that during the twelve month period from August 1, 1941 to July 31, 1942, as shown by the earnings statements filed by the Trustees in this proceeding pursuant to order of the District Court and before this Court, by stipulation, the debtor's railroad system earned $7,987,512 available for interest, a sum sufficient to cover its old fixed charges more than twice.

Obviously the current earnings of the debtor's railroad system, as it exists today, constitute a fair return on the

fully depreciated investment of the debtor in property used in the service of the public, as disclosed by the record in this proceeding (R. 1063, 283, 357).

If "earning power" is to be construed, as this respondent contends it should be, as "*capacity* to produce earnings," then it must be conceded that the Section 19a valuation of the properties of the debtor of approximately $150,000,000 as previously found by the Commission and reported in this proceeding, cannot fairly or soundly be whittled down or reduced on the basis of lack of "capacity to earn," under any reasonable construction of the valuation provisions of subsection (e) of Section 77. And it must equally be conceded that any reasonable valuation, giving full weight to demonstrated earning power, would exceed by a substantial margin the amount required to make provision for all of the debtor's secured debts, including the claim of this respondent.

Nor can it soundly be urged that these increased recent earnings are solely, or even in principal part, due to war conditions. It is, of course, admitted that the gross and net earnings of all railroad carriers, and especially of those vital carriers which are essential links in our transcontinental movement to the Pacific coast, have been increased by the pressure of war transportation.

In the case of the debtor's railroad system, however, other and vital factors exist which necessarily tend to raise the level of earnings substantially above the level which would have existed for the original property. These factors include, as pointed out above, (a) the construction and operation of the Northern California Extension; (b) the completion in 1938 of the Improvement and Rehabilitation Program; and (c) the substantial, though indirect, benefits of increase in traffic volume due to the functioning of the Dotsero Cut-off on the Denver & Rio Grande Western Railroad System. As to "b" and "c", it is diffi-

cult to establish, from the record before this Court, any measure of the extent of improvement in gross and net earnings which may be attributed to those factors. As to the Northern California Extension, however, there is available data in the record which permits some rough measurement of the substantial change in the earning power of the debtor's railroad system, which flowed from the construction and operation of this line of railroad.

Increase in Earning Power Due to Northern California Extension

The Northern California Extension was built in 1931 and 1932 and was opened to traffic in the latter year. There was, of course, a necessary lag in the full utilization of this line of track as an income producer during a seasoning period, which may fairly be deemed to have extended from 1932 to 1936. During that period traffic exchange arrangements were being worked out with other carriers, and other carriers and shippers were being educated to the use of the alternative routings of traffic made possible by the construction of this line. The fact that the Commission had authorized the construction of this line because the "public convenience and necessity" required it, did not mean that its full economic usefulness would be immediately evident to other carriers and to shippers. A period of education and seasoning was necessary.

In the stipulation submitted by the parties to the District Court the increase in gross traffic attributable to the Northern California Extension is set forth (R. 1078). Complete data are available only for the years 1932 to 1938, inclusive. The following table has been prepared to show the relation of revenues attributable to the Northern California Extension to other revenues of the property:

CONSOLIDATED GROSS REVENUES FROM FREIGHT

Year	Originated and terminated on and passing over Northern California Extension	Other	Total	Ratio of Northern California Extension revenue to other revenue
	(1)	(2)	(3)	(4)
1932	$1,098,016	$ 9,564,414	$10,662,430	11.48%
1933	1,491,466	9,459,482	10,950,948	15.77%
1934	2,119,427	10,218,658	12,338,085	20.74%
1935	2,289,858	10,964,714	13,254,572	20.88%
1936	3,151,734	12,112,941	15,264,675	26.02%
1937	3,425,601	13,163,242	16,588,843	26.02%
1938	3,093,674	11,840,823	14,934,497	26.13%
1939 (9 mos.)	2,463,489	9,221,006	11,684,495	26.72%

(1) Record, p. 1078.
(2) Derived; (3)—(1).
(3) Record, p. 1064.
(4) Derived; (1)÷(2).

It will be noted that beginning with 1936, after the Northern California Extension became seasoned as an artery of traffic, it increased, for the period covered, the gross revenue from the debtor's other lines by approximately 26%. While the record before the Court does not include the necessary data for completion of the table to date, the facts are known to all parties to the proceeding and shown by the records kept by the Trustees appointed by the District Court, who are operating the property, and it may be stated without fear of contradiction that this ratio of a 26% contribution of the Northern California Extension has been maintained with substantial consistency in the years subsequent to the period covered by the table above.

If one were to project back to the pre-depression years a 26% contribution to gross from a part of the debtor's system which did not then exist, a quite different historical earnings' picture would be presented. This is especially so when one takes into account that a much larger part of this additional gross would necessarily be carried to earnings available for interest, owing to the more economical use of motive power and the better balancing of the flow of traffic which has been made possible by the new sources of traffic coming from the Northern California Extension.

Obviously it is the debtor's railroad system, as it exists today, and not as it existed in the pre-depression years, which is to be reorganized. It is the "earning power" of the debtor's present railroad system and not the earning power of the system as it existed prior to 1938 that must be given consideration.

While it is not possible to measure as definitely the effects of the other factors mentioned (Improvement and Rehabilitation Program and the Dotsero Cut-off), as one can the effect of the Northern California Extension, this Court cannot properly close its eyes to the fact that the present railroad system of the debtor is quite a different railroad system from that whose earnings are largely discussed by the Commission and by the petitioners.

Significance of earnings history in relation to authorization and treatment of this respondent's secured claim

By way of further comment on the earnings statements set out above, attention should be called to the significance of these earnings statements with reference to the secured claim of this respondent and its proposed treatment in the Commission Plan.

The securities which the A. C. James Co. holds were authorized by the Commission in 1932 as "compatible with

the public interest" (pp. 11, 12, above). In 1938 and 1939 the Commission (ostensibly proceeding on the same theory as to public interest in capitalization as in 1932) by its Plan asserted the proposition that with reference to the earnings of debtor, the securities held by the A. C. James Co. could no longer continue to remain in existence, except as to 44% of the amount authorized in 1932 when this respondent purchased those securities for cash at their full face value. And yet, if the Court will look at the adjusted consolidated earnings available for interest, as set out above (p. 24), it will note that the average earnings of the debtor for the three-year period from 1930 to 1932 were $814,982. Comparing that period with the three-year period from 1937 to 1939, inclusive, the average earnings for the latter period were $941,752 and so in excess of the earnings for the three-year period prior to the authorization by the Commission "as compatible with the public interest" of the securities held by the A. C. James Co.

If the "earning power" of the debtor supported the creation, "in the public interest" of this respondent's secured claim in 1932, the "earning power" of the debtor supported the full recognition and refunding of that claim in 1939, and did not give a basis for the foreclosure and cancellation of more than half of the claim. Any such doctrine of foreclosure and cancellation as is here asserted by the Commission, if sustained under these circumstances, would be an overwhelming deterrent to any fufure participation by private investors in the transportation field.

Some reference will hereafter be made to this phase of the earnings history of the debtor in the discussion of the attempt of the petitioners to justify the theory upon which the Commission has proceeded in foreclosing the interest of creditors, by reference to an alleged continuity of functioning by the Commission under Section 20a of the Interstate Commerce Act (as it was functioning when it authorized the securities acquired by the A. C. James

Co. in 1931 and 1932) and its functioning under Section 77 of the Bankruptcy Act, under which it claims to exercise a legislative grant of power to foreclose the rights of the A. C. James Co. as a secured creditor.

Further required adjustments in past earnings record

While the table of earnings, which appears on page 24 above, is designated as a table of "adjusted consolidated earnings available for interest" it should also be remembered that the adjustments consisted in mere accounting corrections which took out of the operating expenses, expenditures in connection with the Improvement and Rehabilitation Program, which had, under Commission rules, been charged in part as operating expenses. There is, of course, no attempt to make any adjustment for the necessarily high level of operating expense which arose from the characteristics of the operating property and made it necessary that there be spent during the period from 1927 to 1938 $18,000,000 in the Improvement and Rehabilitation Program. The operating expenses of the period prior to 1938 were necessarily higher than they are currently, or will be in the future, now that the program has been completed.

It is also obvious that the continued necessity during the period from 1927 to 1938 to carry on construction work at various points on the property in connection with the Improvement and Rehabilitation Program and the construction of the Northern California Extension, involved delays and interference with normal traffic movements during the period, which resulted in substantially increased transportation costs.

Nor do the adjustments proposed take into account the known fact, of which the Court may properly take judicial notice, that the railroads, generally, during the depression years, made enormous progress in the efficiency

of operation, which permits them to retain a larger proportion of gross as net, despite increases in labor cost.

It is also of some interest to note that the original railroad system of the debtor, before the construction of the Northern California Extension, before the completion of the Improvement and Rehabilitation Program and before the opening of the Dotsero Cut-off on the Denver and Rio Grande Western, showed earnings for the eight-year pre-depression period, from 1922 to 1929, inclusive, considerably in excess of the earnings which the Commission apparently anticipated in its reports of October 10, 1938 and June 21, 1939, from the property as it is today with its greatly increased earning power. In the years 1922 to 1929 the old main line property showed earnings available for interest averaging $3,878,426 per year (R. 1065). If one were to give effect only to the increase of earnings which would be reasonably attributable to the increased gross from the Northern California Extension, one might fairly say that the average earnings available for interest for that period would have been increased by at least 26% and bring the earnings for the period to approximately $5,000,000 per annum.

This, however, is not the only necessary adjustment upwards of historical earnings because the other changes in earning power of the present property, as compared with the old property, to which reference has been made, cannot fairly be disregarded.

Summary of Argument

This respondent contends that no plan of reorganization under Section 77 of the Bankruptcy Act can be fair and equitable, which forecloses more than half of the claim of a secured creditor except on the basis of a clear showing and definite findings or determinations that the value of the property of the debtor is less than the amount of the secured claims with accrued interest.

The Commission has found specifically (R. 269) that under its Plan the claim of this respondent is not fully recognized or refunded. The Commission reports (R. 224) its Section 19a valuation of the debtor's railroad system as of December 31, 1935, as approximately $139,000,000. With additions and betterments to the effective date of the Commission Plan, this Section 19a valuation amounts to approximately $150,000,000 (R. 1061-2). This is an amount far in excess of that needed to permit full recognition and refunding of respondent's secured claim. The Commission has made no finding or determination that this previously found value of $150,000,000 should be reduced to some other and lesser amount based on lack of "earning power," nor has it even made a specific finding or determination as to the "earning power" of the debtor as a required element for consideration in determining the value of the properties of the debtor under subsection (e) of Section 77 of the Bankruptcy Act.

This respondent contends that the Commission erred in formulating and certifying its plan of reorganization and that the District Court clearly erred in approving such plan. It maintains that the Circuit Court of Appeals acted properly in reversing the judgment of the District Court and should be affirmed.

This respondent further contends that the errors into which the Commission and the District Court fell were due to basic errors in their construction of the legislative mandate imposed by Section 77 of the Bankruptcy Act, and urges this Court that it hand down, for the benefit of the Commission and of the inferior courts, a definitive and final interpretation of Section 77, as applicable to the facts herein involved, in order that the reorganization of the debtor railroad may be effectuated expeditiously and without substantial injustice to this respondent and other interested parties.

The argument of this respondent in support of its basic contentions is set forth in the following points:

Point I

The findings and determinations of the Commission and the District Court as to essential facts are obviously insufficient to justify or support the treatment of respondent's secured claim, which treatment is clearly confiscatory.

Point II

The Commission's construction of Section 77 of the Bankruptcy Act, which was accepted and adopted by the District Court, is basically erroneous and cannot be sustained either under the language or intent of Section 77 of the Bankruptcy Act or under any prior delegation of authority to the Commission in connection with the issue of securities by railroads.

Point III

The Commission's assumption of a legislative mandate under Section 77 authorizing it to convert valid debt into stock finds no support in the language of Section 77 and carries with it practical consequences seriously prejudicial to the credit of the debtor.

Point IV

Section 77 of the Bankruptcy Act does not delegate to the Commission authority to originate and impose upon the parties a plan of reorganization and to nullify completely the rights of the parties to propose and negotiate a fair and equitable plan.

Point V

The groups of security holders represented in this proceeding should be permitted, under supervision by the Commission and the courts as contemplated by Section 77, to renegotiate their contractual relationships, and formulate and agree upon a plan of reorganization, which would (a) observe the rule of

priorities of the *Boyd* and *du Bois* cases, (b) provide for fixed charges only to the extent that they shall be adequately covered by "probable earnings", and (c) provide for a total capitalization within the limit established by the value of the property of the debtor used in the public service, after due consideration of its earning power.

POINT VI

The District Court in this case failed to exercise an informed and independent judgment in approving the Commission Plan.

POINT VII

Preferential treatment given the claim of the Reconstruction Finance Corporation under the Commission Plan is unsupported by necessary administrative or judicial findings and cannot be justified under the facts of this case.

POINT VIII

The General and Refunding Mortgage is a first lien upon assets of the debtor sufficient in value to cover fully the claims of the three secured creditors, including this respondent.

POINT I

The findings and determinations of the Commission and the District Court as to essential facts are obviously insufficient to justify or support the treatment of respondent's secured claim, which treatment is clearly confiscatory.

The claim of this respondent was classified by the District Court as a separate class of claim by its order of August 20, 1935 (R. 1022-3). The Commission itself has expressly found that the securities proposed to be given to this respondent under the Commission Plan will be inadequate to satisfy its claim (R. 269, 317).

Nowhere in the report of the Commission of October 10, 1938, or in its report of June 21, 1939, can there be found any valuation of the property of the debtor, other than the Commission's valuation under Section 19a of the Interstate Commerce Act, which it expressly finds in its report of October 10, 1938, to have been $139,600,455 as of December 31, 1935 (R. 224) and which, with additions and betterments to the effective date of the Commission Plan, amounted to approximately $150,000,000 (R. 1061-2).

This Section 19a valuation, as determined and reported by the Commission was, of course, largely in excess of the total of secured claims, principal and interest, which as shown above (p. 17) amounted, as of January 1, 1939, to only $87,981,672.75.

It is of some significance also in this connection to refer to the fact that the original cost of the properties of the debtor, less full depreciation amounted to upwards of $120,000,000. This figure is net, after full accrued depreciation not only on equipment but also on ways and structures which latter, in accordance with Commission accounting rules, does not appear in the debtor's property accounts as an accrued item, as shown by the record and as stated by Commissioner Miller in his opinion in connection with the report of the Commission of October 10, 1938 (R. 283, 357, 1063).

The Commission rejected three plans submitted by the parties to this proceeding, each of which proposed a limit of capitalization well within the Commission's 19a valuation and well within the fully depreciated investment of the debtor in its railroad system, and each of which contemplated refunding the claim of this respondent in full. The Commission, in its Plan, confiscates and refuses to refund more than half of this respondent's secured claim, yet deliberately refrains from making any modified valuation of the debtor's property under subsection (e) of Section 77 of the Bankruptcy Act.

This Court has had occasion in the recent past to reiterate and emphasize the established doctrines of law which support the contention of this respondent, that the property interest of a secured creditor cannot lawfully be foreclosed and confiscated under the bankruptcy powers except on the basis of a valuation of the assets of the debtor which would support such treatment.

In dealing with a somewhat analogous statute (Section 77B, now Chapter X of the Bankruptcy Act), this Court held squarely in *Consolidated Rock Products Co.* v. *du Bois*, 312 U. S. 510, that a valuation of the assets of the debtor was a condition precedent to any determination by the Court as to the fairness of a plan of reorganization.

It should be noted that in the *du Bois* case there was an agreement of a large majority of each class of creditor and stockholder upon a plan of reorganization. That is a situation which does not exist in the instant case, where the Commission has rejected all plans submitted by the parties and seeks to impose upon the parties a plan of its own formulation which is supported in this Court by only two classes of creditors.

In the *du Bois* case, *supra*, the District Court had approved the proposed plan of recapitalization for the reorganized company without ascertaining either the value of the property as a whole or the value of the assets securing the respective claims. This Court held that the interests of a secured creditor, a small minority of his class, could not be foreclosed without determination of the value of the property of the debtor and the assets subject to secured claims and appropriate findings as to earning power. As to the need of adequate valuation data, the Court said, at page 520:

> "We agree with the Circuit Court of Appeals that it was error to confirm this plan of reorganization.

"I. On this record no determination of the fairness of any plan of reorganization could be made. Absent the requisite valuation data, the court was in no position to exercise the 'informed, independent judgment' (*National Surety Co.* v. *Coriell*, 289 U. S. 426, 436) which appraisal of the fairness of a plan of reorganization entails. *Case* v. *Los Angeles Lumber Products Co.*, 308 U. S. 106. And see *First National Bank* v. *Flershem*, 290 U. S. 504, 525. There are two aspects of that valuation problem.

"In the first place, there must be a determination of what assets are subject to the payment of the respective claims. This obvious requirement was not met. The status of the Union and Consumers bondholders emphasizes its necessity and importance. According to the District Court the mortgaged assets are insufficient to pay the mortgage debt. There is no finding, however, as to the extent of the deficiency or the amount of unmortgaged assets and their value. * * *"

Again, at page 525:

"* * * Findings as to the earning capacity of an enterprise are essential to a determination of the feasibility as well as the fairness of a plan of reorganization. * * *"

In dealing with the rights of secured creditors in the *du Bois* case, this Court merely enunciated well established and well defined principles as to fairness and equity in dealing with the rights of secured creditors. It did not have before it there, as it does here, a statute which contained express provision for the making of valuations by an administrative agency such as are contained in subsection (e) of Section 77 of the Bankruptcy Act. The principles which this Court has laid down in the *du Bois* case should, therefore, be applied with full and undiminished force to the situation presented by the confiscatory treatment of the secured claim of this respondent on the basis of a record which contains no findings of any valuation which would support such treatment.

There can be no advantage in referring to decisions of this Court, other than those cited in the *du Bois* case, which support by analogy the clear cut principle laid down in that decision. It is, however, of some importance to emphasize at this point the attitude which this Court has previously taken as to any attempt to foreclose substantial rights of a secured creditor in the operation of the Bankruptcy Act.

In *Louisville Joint Stock Land Bank* v. *Radford*, 295 U. S. 555, this Court held the first Frazier-Lemke Act unconstitutional. In rejecting the argument that the statute was valid by analogy to the validity of compositions under the Bankruptcy Act, the Court said (pp. 585-6):

> "* * * In no case of composition is a secured claim affected except when the holder is a member of a class; and then only when the composition is desired by the requisite majority and is approved by the court. Never, so far as appears, has any composition affected a secured claim held by a single creditor. * * *"

At pages 588-9:

> "It is true that the position of a secured creditor, who has rights in specific property, differs fundamentally from that of an unsecured creditor, who has none; and that the Frazier-Lemke Act is the first instance of an attempt, by a bankruptcy act, to abridge, solely in the interest of the mortgagor, a substantive right of the mortgagee in specific property held as security. * * *"

Nowhere in the reports of the Commission or in the opinion of the District Court, can be found a determination or finding as to the value of the properties of the debtor on which the treatment of this respondent's secured claim could properly be held to be not confiscatory. The Commission's valuation under Section 19a of the Interstate Commerce Act (R. 224) was far in excess of the total of all secured claims.

The Commission's discussion and general conclusions (R. 220, 245, 253) as to the debtor's revenues and earnings, its limitation upon total capitalization which includes no par common stock (R. 310, 341), its conclusion that "the securities remaining available for distribution * * * to the other secured creditors [including A. C. James Co.] * * *, will be inadequate in value to satisfy their claims" (R. 269, 271) are wholly inadequate as substitutes for the determinations of value required by this Court (*du Bois* case, *supra*).

The blanket adoption of the Commission's "findings" by the District Court and its approval of the plan in the language of the statute, cannot clarify or remedy the obscurity and inadequacy of the Commission's conclusions.

This Court should not be required "to spell out, to argue, to choose between conflicting inferences" from obscure phrases and suggestions in the Commission's report (*United States* v. *Chicago, Milwaukee, St. Paul & Pacific R. Co.*, 294 U. S. 499, 511; cf. *N. L. R. B.* v. *Virginia Electric and Power Co.*, 314 U. S. 469). The lack of essential findings cannot be supplied by general conclusions in the language of the statute (*Florida* v. *United States*, 282 U. S. 194, 213, 215).

Nor can the supposed doctrine of "equitable equivalent", advanced by the petitioners as an eleventh hour substitute for the determinations of value and earning power which are required by the decision of this Court in the *du Bois* case, *supra*, relieve the Commission and the District Court of the duty of making necessary findings. The phrase itself "equitable equivalent" is taken by the petitioners from the report of the Commission (R. 316) where the Commission said (speaking of the securities approved in its Plan):

> "* * * These securities represent the equitable equivalent of the debtor's assets available for the satisfaction of claims. * * *"

This language can mean only that the securities to be issued in the reorganization represent the assets of the debtor which are available for the satisfaction of all claims. It assumes an answer to the very question in issue,—the total value of the property represented by the securities to be issued in the reorganization. It does not and cannot tell us why more securities may not be authorized, or why less securities are not authorized,—questions which must be answered from a consideration of earning power and values. The all-concealing phrase "equitable equivalent" does not tell us why the claims of some creditors are not to be recognized at all or why A. C. James Co. is to receive only 44% of its secured claim, while the "equitable equivalent" for First Mortgage bondholders and Reconstruction Finance Corporation is full compensation for their respective "bundles of rights."

In the hands of the petitioners the Commission's casual phrase is expanded and translated into a doctrine that each creditor is entitled to receive only its "equitable equivalent of the debtor's assets available for the satisfaction" of its claim in new securities (Institutional Bondholders' brief, p. 79). From this premise, which apparently represents an attempt to alter by restatement the doctrine of the *Boyd*[1] and *du Bois* cases, petitioners would conclude that valuation data and determinations of all relevant facts as to liens are unnecessary and that each secured creditor has received its "equitable equivalent" under the Commission Plan. But after this juggling of phrases A. C. James Co. is told that more than half of its secured claim must be refused recognition and confiscated because (for undisclosed reasons) its claim is not entitled to receive an "equitable equivalent."

The requirement of Section 77(d) that "the Commission shall state fully the reasons for its conclusions" certainly is not satisfied by the use of a phrase which is designed

---

[1] *Northern Pacific Ry.* v. *Boyd*, 228 U. S. 482.

to conceal rather than to reveal reasons for conclusions. A secured creditor, we submit, is entitled to reasons in the form of facts and findings rather than evasion. The absence of findings or determinations as to the value of the debtor's property and as to the value of the assets securing respondent's claim constitutes, without more, a basic and fatal defect in procedural due process in view of the attempt under the Commission Plan, to wipe out more than half of respondent's claim.

While, as suggested above, a detailed reply to some of the ingenious arguments advanced by the petitioners in support of the action by the Commission and the District Court will be presented in a reply brief, which will be filed on behalf of this respondent prior to the date of the argument, there is one contention advanced in the Institutional Bondholders' brief (pp. 76-77) which should be discussed at this point.

This contention is that it requires only the mathematical process of adding the par value securities to the sum obtained by multiplying the no par value common stock authorized under the Commission Plan by $57 a share to arrive at what the brief terms a "*maximum* 'reorganization value'" in the amount of $84,027,559. Apparently, the argument is that the action of the Commission in fixing the capitalization should be regarded as what might fairly be termed the "equitable equivalent" of a finding of "reorganization value", or "a precise dollars and cents value", to be spelled out by mathematical process from the Commission's careful avoidance of specific findings.

On page 77 of the Institutional Bondholders' brief the argument continues with the following statement:

> "The complete lack of realism in the decision of the Court below upon this point is evidenced by what the Commission has tried to do to bring its more recent reports and orders into **colorable compliance** with that decision. In those cases the Commission,

after making exactly the same type of findings with respect to earning power and permitted capitalization that were made in the *Western Pacific* case, has added a final finding of which that in the *Denver & Rio Grande Western* case is typical:

> 'Considering the entire record, and taking into account the elements of value of the properties involved, their past and present earnings and prospects for future earnings, as well as other pertinent factors, we conclude and find *that the value of the properties for the purposes of this proceeding* is $154,521,612, and that the total capitalization upon consummation of the plan should not exceed approximately that amount.'

"It is submitted that the addition of the italicized words, which are not to be found in *haec verbes* in the Commission's *Western Pacific* Report, would add absolutely nothing of substance for the information either of the court or of the securityholders beyond what the Commission provided in the findings summarized at pages 14 to 18, *supra*, and the voluminous 'valuation data' discussed by the Commission in 'stating fully the reasons for its conclusions.'"

The argument that it would be a futile thing for this Court to affirm the requirement of the Circuit Court of Appeals that a finding of value should be made because the Commission could make a *pro forma* compliance without disturbing its plan loses considerable force in the light of the relative facts.

The Commission, in compliance with the requirement of the *du Bois* case and of the decision of the Circuit Court of Appeals for the Ninth Circuit in this proceeding, did find in Finance Docket No. 11002 a value of the assets of the Denver & Rio Grande Western, as debtor, in the amount of $154,521,612. In the same report (p. 9, mimeo.) the Commission stated that its prior Section 19a valuation of the properties of the Denver & Rio Grande Western System, fully depreciated to January 1, 1941, amounted to approximately $155,900,000. **In other words, there was**

a discrepancy between the Commission's prior valuation of physical properties found under Section 19a and its valuation for the purpose of reorganization of less than one per cent.

If, however, the Commission should attempt to bolster the plan which it has formulated and promulgated for the Western Pacific by any finding of value in the amount of $84,027,559, as suggested by the Institutional Bondholders' brief upon the basis of their mathematical computation of what the proposed capitalization may have meant, the Commission would need in common fairness to give some detailed and specific explanation of a discrepancy between its prior Section 19a valuation of approximately $150,000,000 (pp. 15-16, above) and a valuation for the purpose of reorganization of $84,027,559.

The difficulties of any such explanation would be accentuated by the fact that the Western Pacific Railroad System, as shown by the record before the Court in this proceeding, is a completely rehabilitated, modernized and effective transportation system, while the Court may well take judicial notice of the fact that the properties of the Denver & Rio Grande Western include a substantial mileage of narrow gauge railroad built originally to serve limited industrial areas and the well-known Pueblo Loop, the earning power of which has been largely reduced by the construction of the Dotsero Cut-off.

This further comment may fairly be made: this respondent earnestly and adversely criticizes in this brief the construction which the Commission, unaided by prior judicial construction, has given to Section 77; this respondent cannot, however, accept without protest any suggestion, such as is made in the Institutional Bondholders' brief, that the Commission has, or would, attempt a mere "colorable compliance" with a binding judicial interpretation of Section 77. The long and honorable record of the Commission as an administrative agency forbids any such implication of bad faith.

POINT II

The Commission's construction of Section 77 of the Bankruptcy Act, which was accepted and adopted by the District Court, is basically erroneous and cannot be sustained either under the language or intent of Section 77 of the Bankruptcy Act or under any prior delegation of authority to the Commission in connection with the issue of securities by railroads.

When Congress enacted Section 77 of the Bankruptcy Act, it was fully aware that the Commission, functioning under authority of Section 19a of the Interstate Commerce Act (49 U. S. C. A. §19a) had completed, at great expense to the public as well as to the carriers, valuations of the properties used by the various railroads in the service of the public. Congress further knew that these valuations were kept up to date by the Commission through its accounting supervision of additions and betterments. Congress knew that the Commission was in a position to approve or disapprove any capital structure submitted to it in a plan of reorganization under Section 77, with full and complete knowledge already available to it of the value of the capitalizable assets which would support the proposed capital structure.

By its 1935 amendment to Section 77 Congress went further. It provided that if it should be necessary to determine the value of any property for any purpose under the Section, that such valuation should give due consideration to "earning power." The legislative intention, which is discussed more fully later in this brief, seems entirely clear. Congress did not direct the Commission to disregard its extended and expensive labors in arriving at the true investment in and value of railroad properties. It merely gave the Commission power, for the purposes of Section 77, to modify such values in the light of any basic changes in earning power.

Provisions of the Statute

Section 77(e) contains the following provision requiring a valuation of the debtor's properties if a valuation shall be necessary for any purpose (appendix, p. xvii):

> "If it shall be necessary to determine the value of any property for any purpose under this section, the Commission shall determine such value and certify the same to the court in its report on the plan. The value of any property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present and prospective, and all other relevant facts. In determining such value only such effect shall be given to the present cost of reproduction new and less depreciation and original cost of the property, and the actual investment therein, as may be required under the law of the land, in light of its earning power and all other relevant facts."

Section 77(b) also requires that the plan of reorganization

> "* * * (4) shall provide for fixed charges (including fixed interest on funded debt, interest on unfunded debt, amortization of discount on funded debt, and rent for leased railroads) in such an amount that, after due consideration of the probable prospective earnings of the property in light of its earnings experience and all other relevant facts, there shall be adequate coverage of such fixed charges by the probable earnings available for the payment thereof; * * *."

It should be noted that this provision speaks of "probable prospective earnings" while the valuation paragraph of subsection (e) speaks of "earning power." The importance of this difference in phrasing will be more fully discussed in Point V of this brief, dealing with the construction of Section 77 of the Bankruptcy Act which this respondent urges upon this Court.

Commission's Theory of Capitalization in Lieu of Valuation

The Commission, however, has deliberately refused in this proceeding to make a modified valuation of the properties of the debtor based on actual "earning power".

Instead, the Commission has adopted a gloss on Section 77, which finds no support in the language of the Section, which it regards as justifying its confiscatory treatment of private rights without reference to the value of the assets of the debtor.

The entire theory and approach of the Commission, as applied in this reorganization proceeding, is not only without support under the language of the statute, but is also without practical justification. The Commission seeks to cure the depression ills of the railroad industry by disregarding and confiscating the property interests of investors, used and useful in the public interest. Reducing capitalization below the actual depreciated investment on the basis of depression earnings is the twin brother of the write-up of investment, in terms of capitalization, which occurred in the public utility field in the golden era of 1920 to 1929, on the basis of expanded earnings of that period. That practice now receives universal condemnation. The theory of the Commission, as set out in its reports in this case, is equally unsound and should equally be condemned.

The Commission's theory and construction of Section 77 disregard a basic feature characterizing private investment in the transportation field. The public is entitled to have available a transportation plant which will meet not merely its needs during subnormal periods, nor even its needs during normal periods, but a transportation plant capable of handling the peak traffic of periods of industrial expansion. The Court has given expression to this

basic characteristic of property devoted to a public use in analogous situations. Reference is here made to the decision of the Court in *New York & Queens Gas Co.* v. *McCall*, 245 U. S. 345, where, at page 351, the Court said:

> "Corporations which devote their property to a public use may not pick and choose, serving only the portions of the territory covered by their franchises which it is presently profitable for them to serve and restricting the development of the remaining portions by leaving their inhabitants in discomfort without the service which they alone can render. To correct this disposition to serve where it is profitable and to neglect where it is not, is one of the important purposes for which these administrative commissions, with large powers, were called into existence, * * *."

There is a necessary corollary of the proposition that the public is entitled to a transportation plant which will meet maximum demands, that is, that the investor who places property in public use, as part of the railroad transportation system, while necessarily assuming the risk that in subnormal years he may not receive dividends, or even interest, and even under some circumstances not receive dividends during normal years, is entitled to protection against the confiscation and foreclosure for all time of his interest in property used and useful for the public on the basis of depression earnings.

When in 1939 the theory that the rights of investors in the railroads of the country should be cancelled and foreclosed for all time on the basis of past earnings was framed as an amendment of Section 77 in the so-called Wheeler Bill (S. 1869) and passed by the Senate, it was, after extended hearings before the Committee on the Judiciary of the House of Representatives, squarely rejected and the bill did not pass.

The Commission's Theory and Construction of Section 77

The Commission spells out its theory and construction of Section 77 in some detail in its reports in this proceeding. In its report of October 10, 1938, the Commission stated (R. 243):

> "It will be observed that **insofar as the capitalization of a reorganized company is concerned, section 77 contains no limitations other than that the fixed charges of the company shall be adequately covered by the probable earnings available therefor, and the plan as a whole shall be compatible with the public interest.** The public interest is not defined, but it would seem obvious that to be compatible with the public interest, the plan must provide a capital structure for the reorganized company which will give it a reasonable opportunity to function efficiently and continuously as a going concern. **This requires that the capitalization should not exceed a conservative appraisal of the assets to be taken over by the reorganized company,** and that proposed charges, whether fixed or contingent, be within its probable earning power."

The above statement is interesting in several respects. It gives frank recognition to the fact that the only express mandate of Congress as to capitalization is that fixed charges "shall be adequately covered by the probable earnings available therefor." It concedes that the Act does not further define, in express terms, its requirement that the plan as a whole "shall be compatible with the public interest." The Commission interprets the legislative requirement as to public interest to mean that a plan of reorganization must provide a capital structure for the reorganized company which will give it a reasonable opportunity to function efficiently as a going concern. From this the Commission spells out the two requirements that the capitalization shall not exceed a conservative appraisal of the assets to be taken over and that proposed charges,

whether fixed or contingent, be within its probable earning power. The Commission does not set forth the basis for its conclusion that contingent charges should be fully earned if the reorganized company is to function efficiently.

This statement by the Commission recognizes that a valuation of the property is essential. But in this case, the Commission made no revaluation; it proceeded to determine and limit the capitalization of the reorganized company without any reference to investment or to its Section 19a valuation of the property or any finding as to the earning power of the property.

After referring to the previous reorganization of the debtor, the Commission states (R. 244):

> "* * * If this reorganization is to be successful, the capital structure of the reorganized company must be realistically related to its actual earning power, and consideration given to the investment in its property only to the extent that such investment is justified by the probable earnings reasonably foreseeable for the future."

With the first part of this statement there would be little quarrel if the Commission were using "earning power" in the sense of the true legislative intent, as hereafter discussed in Point V of this brief. Unfortunately, the later part of this statement seems to indicate that the Commission means something far different from a willingness to consider investment where such investment is justified by earning power, in the sense of "capacity to earn." And throughout its reports the Commission discloses that it means something quite different in its use of "actual earning power" and "probable earnings reasonably foreseeable" from the meaning that may fairly be assigned to the phrase "earning power" as it appears in Section 77.

As will appear more fully from the pages which follow, the Commission completely abandoned the principles first

stated by it, that capitalization should be based upon a "conservative appraisal of the assets to be taken over by the reorganized company" and "related to its actual earning power," and proceeded to frame a plan of reorganization for the debtor on the revolutionary theory that the capital structure must be determined solely from a consideration of "probable earnings reasonably foreseeable for the future" and that total capitalization must be strictly limited in order to assure a material return upon the capital stock of the reorganized company from such probable earnings.

In its report of October 10, 1938, the Commission argues that the capitalization proposed by the parties is unsound, on the ground that the reorganized company could not earn enough to pay a dividend of five dollars annually upon its common stock (R. 256, 257; a dividend of three dollars annually is suggested at R. 269); and at a later point in its report the Commission states (R. 257):

> "* * * It is obvious, therefore, that based on the most optimistic estimate of earnings of record, the capitalization of the reorganized company must be maintained within strict limits if any material return on its capital stock is to be expected **and the shares of its stock are not to become mere tokens for stock market speculation.** It is true that considered alone, the data pertaining to the rate-making value of the debtor's property and its investment, would support capitalizations approximating those proposed in the three plans. We have hereinbefore stated, however, the reasons why, in our opinion, those factors can not be of controlling importance in a determination of the capital structure for the reorganized company. * * *"

The emphasized phrase "mere tokens for stock market speculation" which appears in the above statement of the Commission's position has an interesting history. It first emerged in the Wheeler-Lowenthal investigation of railroad holding companies. It later appeared in reports of the Interstate Commerce Committee of the Senate dealing

with the proposed amendment to Section 77 of the Bankruptcy Act which was passed by the Senate in 1939 and was rejected, after extended hearings, by the Committee on the Judiciary of the House. This proposed and rejected legislation, it should be noted, sought to amend Section 77 by substituting a determination of capital structure on the basis of earnings experience, for the valuation on the basis of "earning power" as it still appears in the Act. The phrase "mere tokens for stock market speculation" is a catch phrase, and, as used in the railroad holding company investigation reports, has some significance. The error here is that the Commission seized upon this catch phrase as an escape from the duties imposed upon it by a sound interpretation of Section 77 of the Bankruptcy Act. It has failed to regard the warning that this Court has given on several occasions in the past. In *Henneford* v. *Silas Mason Co.*, 300 U. S. 577, at page 586, this Court said:

> "* * * Catch words and labels * * * are subject to the dangers that lurk in metaphors and symbols and must be watched with circumspection lest they put us off our guard. * * *"

The Commission has never tried to explain further why its theory that a material return should be assured or expected on the capital stock of the reorganized company should, "in the public interest," take the place of "a conservative appraisal of the assets to be taken over by the reorganized company," to which the Commission refers in its report of October 10, 1938 (R. 243).

Any justification based on the argument that, if common stock of the reorganized company pays immediate dividends, it may prove a channel for future financing is completely negatived by the fact that the operation of the Commission theory at the present time is to foreclose the substantial rights of secured creditors, general creditors and stockholders in the property and, in effect, to confiscate

these rights on the basis of a mere theory of capitalization. No one thing could more clearly and certainly destroy common stock (or indeed, any railroad security) as a vehicle for future financing of railroad properties than this proposed action of the Commission.

At a hearing before the Special Subcommittee on Bankruptcy and Reorganization of the Committee on the Judiciary of the House of Representatives, on June 21, 1939, Chairman Eastman of the Interstate Commerce Commission stated (Report of Hearing, p. 553):

> "* * * To deprive thousands of investors who in the past have put their savings into railroad securities of all hope of recoupment is a very serious step, for if our capitalistic society is to succeed, it demands as scrupulously fair treatment of investors as of labor."

As a matter of fact, Congress in the enactment of Section 77 of the Bankruptcy Act was not dealing with problems relating to stock speculation. It was seeking to set up a legislative framework within which the existing investors in a railroad property, which had found itself unable to meet its fixed charges, could readjust its capital structure under supervision of the Commission and the courts. Congress, as will hereinafter be more fully stated, dealt with the public interest in relation to capitalization by expressly providing that the fixed charges under any plan of reorganization should be held within such limits that there would be adequate coverage for such fixed charges by the "*probable prospective earnings*" available for their payment. It did not charge the Commission with any mandate to so limit the capitalization proposed in the plan of reorganization that dividends on the stock of the reorganized company could be paid from probable earnings.

If Congress had remained silent as to the public interest in capitalization, the error of the Commission in its construction of the Act might seem to be a less clear

violation of the legislative mandate. But the mandate of Congress, that fixed charges only should be limited in the public interest by probable prospective earnings, appears clearly from the express language of the statute. Lured by a catch phrase, the Commission has sought to limit total capitalization arbitrarily and to deal with private interests in a confiscatory manner, and on a basis which finds no support in the language of Section 77 of the Bankruptcy Act.

In its supplemental report of June 21, 1939, in this proceeding the Commission expressly reaffirmed the position taken by it upon the question of capitalization in its prior report (R. 310):

> "In our prior report we stated that the entire capital structure of the reorganized company must be realistically related to its actual earning power, and in determining such capital structure consideration should be given to the investment in the property only to the extent that such investment is justified by the probable earnings reasonably foreseeable for the future if the reorganization was to be successful. With these considerations in mind, and for the reasons there set forth, and upon consideration of the investment of the debtor in its property, the probable rate-making value thereof, and its traffic and earnings, we conclude that we cannot approve the total capital structure under the Credit Corporation's proposed modification. * * *".

Thus, it appears that the Commission has abandoned completely the standard first stated above, that capitalization must be related to a "conservative appraisal of the assets to be taken over by the reorganized company," and has taken the position that the investment in the property is to be considered, in determining a proposed capital structure, only to the extent that it is "justified by the probable earnings reasonably foreseeable for the future." This is apparently intended as a reaffirmation of the Commission's basic theory, expressed in their October 10, 1938

report, that the capitalization must be kept within strict bounds in order to assure a material return upon the capital stock of the reorganized company.

In this connection, and especially as to the Commission's expressed desire to make "probable earnings reasonably foreseeable" the sole basis of the determination of a capital structure which will assure a material return on the stock, it is pertinent to quote further from the testimony of Mr. Eastman before the Committee on the Judiciary of the House on June 21, 1939, when he stated (Report of Hearing, p. 551):

> "Any estimate of the future earnings of a railroad can at best be no more than an 'educated guess,' but there has never been a time in the history of the country when it has been more difficult to make such a guess than now. Anything remotely approaching accuracy is impossible. * * *"

Basic objections to the substitution of capitalization theories for valuation under Section 77

At the outset the theory of the Commission that private property interests can be cancelled and foreclosed solely on the basis of an administrative finding of a desirable capital structure and without any finding or determination as to the value of the property interests or as to the value of the property of the debtor meets three obvious objections:

(1) The *du Bois* decision is against the Commission's theory:

This Court has unquestionably considered and rejected a contention that an approved capital structure may be substituted for findings or determinations of value in dealing with the rights of secured creditors. While *Consolidated Rock Products Co.* v. *du Bois*, 312 U. S. 510, arose

under Section 77B (now Chapter X of the Bankruptcy Act) and not under Section 77, it may fairly be urged as a square authority on the point here under consideration. In that case this Court had before it a plan of reorganization, which set up a definite capital structure, and which had been approved by the District Court as fair and equitable. This Court, after full consideration, clearly and definitely rejected the contention that an approved capitalization was an adequate substitute for findings as to the value of the property of the debtor when confiscatory treatment of private property interests was involved. It would be an anomalous situation if this Court should hold in this proceeding that the mere finding by the Commission that a certain capital structure was in the public interest justified the Commission in disregarding the clearly established value of the properties of the debtor, when the confiscatory treatment of a secured claim is at issue.

(2) Commission's theory conflicts with established principles of corporate law and accounting.

Any theory that the approval of a capital structure may be made a substitute for valuation of assets in dealing with private rights of security holders may also be said to fly in the face of the history and practice of corporate accounting. Surpluses and deficits are a commonplace of corporate accounting. Nowhere will one find a basis in established corporate and accounting practice for an assumption that capitalization may properly be taken as a measure of the value of the assets represented by the securities issued by a corporation. While the Circuit Court of Appeals for the Sixth Circuit has recently held in a case arising under Section 77 of the Bankruptcy Act (*Akron, Canton & Youngstown Ry. Co.* v. *Hagenbuch, et al.*, 128 F. (2d) 932, petition for certiorari filed August 31, 1942), that a finding by the Commission of capitalization may be accepted as the equivalent of a finding of value of

the debtor's properties, the opinion in the case does not attempt to support that conclusion by any reference to authority, logic or common sense.

This basis principle, that capitalization is a matter quite distinct from the value of the assets of a corporation, has been clearly recognized by this Court in other connections. In *Ray Consolidated Copper Company* v. *United States*, 268 U. S. 373, at page 377 this Court said:

> "The capital stock of a corporation, its net assets, and its shares of stock are entirely different things. Compare *Farrington* v. *Tennessee*, 95 U. S. 679, 686; *Tennessee* v. *Whitworth*, 117 U. S. 129, 136-137; *Wright* v. *Georgia R.R. & Banking Co.*, 216 U. S. 420, 425; *Des Moines National Bank* v. *Fairweather*, 263 U. S. 103, 111. The value of one bears no fixed or necessary relation to the value of the other. * * *"

(3) Commission's own plan of capitalization in this case negatives use of capitalization in lieu of valuation.

It is of considerable significance, and a basic objection to any use of capitalization as a substitute for valuation in dealing with private property rights in these proceedings, that the Commission has itself, apparently by deliberate intent, made it difficult or impossible to determine the dollars and cents limits of the capital structure for the debtor which it proposes in this proceeding. The Commission recommends that common stock without par value be used. The essence of stock without par value is that each share shall represent an aliquot interest in the assets of the debtor, subject to the claims of securities with priority. The Commission has, with apparent deliberation, refrained from putting upon this common stock without par value, any fixed value as of the time of issue. It has assigned a value of $57 a share to such stock in allocating shares to the First Mortgage bondholders and the Reconstruction Finance Corporation, one

of the secured creditors (R. 317). It has assigned a value of $62 a share to this stock in allocating shares to The Railroad Credit Corporation, also a secured creditor (R. 317). It has assigned no value to the common stock without par value which it has allocated to this respondent and the only guide as to the value of such stock is the express finding of the Commission that the stock so allocated is inadequate to satisfy in full the claim of this respondent (R. 269).

In addition, the Commission has at several points (R. 244, 245, 256, 259, 269, 321) in its somewhat discursive discussion in its reports of October 10, 1938 and June 21, 1939, referred to the common stock without par value as if it were to be assumed to have a value of $100 a share. Obviously, however, the Commission did not intend to have this regarded as an express finding of value for the common stock without par value. If it had made such a specific finding, then the aggregate value of the securities authorized would have exceeded by approximately $10,000,000 the total of the secured claims against the debtor (see tables on pp. 17 and 18). There could then have been no claim of justification for the failure of the Commission to refund the claim of this respondent in full.

The obvious difficulty in substituting a capital structure (including no par value stock) for a valuation in dealing with private rights is illustrated by the failure of the petitioners to agree on what the total capitalization does mean (Institutional Bondholders' brief, p. 55; Reconstruction Finance Corporation brief, p. 41).

There is no doubt that the Commission has interpreted Section 77 of the Bankruptcy Act as authorizing it to set up a scheme of capitalization solely with reference to "probable prospective earnings" and without any reference to a valuation of the property of the debtor on the basis of earning power, or to the investment in property dedicated to the public service, or to other relevant factors.

Reference to Powers of the Commission Under Section 20a of the Interstate Commerce Act Does Not Sustain Commission's Procedure

The petitioners have sought by an ingenious theory to justify and support the theory of the Commission that its determination fixing the total amount and character of the capitalization should take the place of findings of value for the properties of the debtor in dealing with private rights. By reference to the powers exercised by the Commission since 1920 under Section 20a of the Interstate Commerce Act, the petitioners contend that the Commission was vested with exclusive and plenary jurisdiction over the issues of securities of common carriers under Section 20a of the Interstate Commerce Act (49 U. S. C. A. § 20a) and that this jurisdiction has, by the provisions of Section 77 of the Bankruptcy Act, been extended so as to give the Commission exclusive and plenary jurisdiction to determine total capitalization and the classification thereof.

In substance, the contention of the petitioners is that the Commission is vested by Section 20a of the Interstate Commerce Act and Section 77 of the Bankruptcy Act with the same sort of exclusive jurisdiction to authorize security issues and determine total capitalization and classification thereof, and by inference, that its procedure here, under Section 77, is consistent with the long course of administrative procedure under Section 20a.

The contention of the petitioners amounts to a skillful translation of the power given to the Commission under Section 77, subsection (d) to approve a plan of reorganization which will, in its opinion, meet the express requirements of Section 77 (b) and (e) "and will be compatible with the public interest", into the assumed power to determine "total capitalization and the classification thereof" in the "public interest". In their contention they characterize the power of the Commission to regulate and con-

trol the issue of railroad securities as "exclusive and plenary"; and it was on this basis that the District Court in this proceeding refrained from any substantial exercise of its constitutional jurisdiction to protect private rights (Point VI below).

What are the facts as to the Commission's exercise of its powers over railroad securities and capitalization under Section 20a of the Interstate Commerce Act?

Section 20a (2) makes it unlawful for any railroad carrier subject to the jurisdiction of the Commission to issue securities or assume any obligation as lessor, guarantor, etc., unless the Commission authorizes such issue or assumption, and:

> "* * * The commission shall make such order only if it finds that such issue or assumption: (a) is for some lawful object within its corporate purposes, and compatible with the public interest, which is necessary or appropriate for or consistent with the proper performance by the carrier of service to the public as a common carrier, and which will not impair its ability to perform that service, and (b) is reasonably necessary and appropriate for such purpose."

Subsection (7) of Section 20a provides:

> "(7) Jurisdiction of commission as exclusive and plenary. The jurisdiction conferred upon the commission by this section shall be exclusive and plenary, and a carrier may issue securities and assume obligations or liabilities in accordance with the provisions of this section without securing approval other than as specified herein."

Thus, by Section 20a(2) Congress granted to the Commission power to supervise and control the issue of securities by an interstate carrier, so that such issues would be for lawful objects which are within the corporate purposes of the carrier and "compatible with the public interest"; and by the terms of subsection (7) the jurisdic-

tion of the Commission is "exclusive and plenary" in so far as it comes in conflict with state regulations or legislation.

Three striking examples of the exercise by the Commission of the powers conferred by Section 20a appear upon the record in this proceeding:

(a) On November 20, 1930, upon application by The Western Pacific Railroad Company, the Commission granted to the Company authority to issue $5,000,000 of 5% Gold Debentures to be sold to the highest bidder at par, for the purpose of providing funds with which to complete construction of the Northern California Extension. The opinion of the Commission is set forth in the appendix in this brief at page xxvii. The Commission found (in the language of the statute):

> "We find that the proposed issue * * * (a) is for a lawful object within its [the Company's] corporate purposes, and compatible with the public interest, which is necessary and appropriate for and consistent with the proper performance by it of service to the public as a common carrier, and which will not impair its ability to perform that service, and (b) is reasonably necessary and appropriate for such purpose."

At public sale, these debentures were sold to A. C. James Co. for cash at par and represent the original indebtedness upon which the secured claim of A. C. James Co. is based.

(b) On February 27, 1932, the Commission, again acting under the provisions of Section 20a, found that the value of the capital assets of The Western Pacific Railroad Company was $147,056,283, and that the excess of capital assets over liabilities was sufficient to justify, as compatible with the public interest, the proposed issue of $15,000,000 of General and Refunding Mortgage bonds and notes in the aggregate amount of $5,000,000 (R. 1060; appendix to brief, pp. xxxv-xxxvii).

(c) On December 9, 1932, the Commission granted authority to The Western Pacific Railroad Company to issue $4,000,000 additional General and Refunding Mortgage bonds, upon the basis of similar findings as to the capital assets of the company (R. 1060; appendix to brief, p. xlii).

These three examples of the Commission's exercise of its powers under Section 20a are typical of the Commission's action in exercising, or purporting to exercise, the powers granted to it under Section 20a of the Interstate Commerce Act.

Meaning of "compatible with the public interest" in Section 20a

The jurisdiction and powers of the Commission over security issues are clearly defined both in the reports of the Commission and in the decisions of the courts. The phrase "compatible with the public interest" acquired, long before the enactment of Section 77, a definite meaning.

This Court has held that this phrase, as used in Section 20a (2) of the Interstate Commerce Act, is related to the adequacy and quality of the public service, the economy and efficiency of the transportation service and facilities, and the protection of private property interests in relation to the issue of securities by public carriers.

In *New York Central Securities Co. v. United States*, 287 U. S. 12, the Court had before it an order of the Commission under Section 20a permitting the New York Central to assume obligations and liability in respect of the securities of certain leased companies. The opinion of the Court, by Mr. Chief Justice HUGHES, states that the term "public interest" used in Section 20a (2) (p. 25):

> "* * * is not a concept without ascertainable criteria, but has direct relation to adequacy of transportation service, to its essential conditions of econ-

omy and efficiency, and to appropriate provision and best use of transportation facilities, questions to which the Interstate Commerce Commission has constantly addressed itself in the exercise of the authority conferred. So far as constitutional delegation of authority is concerned, the question is not essentially different from that which is raised by provisions with respect to reasonableness of rates, to discrimination, and to the issue of certificates of public convenience and necessity. * * *"

The holding of this Court in the *New York Central Securities Co.* case, that the jurisdiction of the Commission was "exclusive and plenary," was made only in connection with a contention that the lease authorized by the Commission was beyond the corporate powers of the railroads under the laws of the state in which they were incorporated. The Court rejected this contention and held that the power delegated to the Commission by Congress excluded the exercise by the several states of control in this field of interstate commerce (287 U. S. at 27, 28).

There is no relation or connection between "compatible with the public interest" and "exclusive and plenary" other than the fact that the first phrase appears in subdivision (2) of Section 20a, and the latter, in subdivision (7). While Section 20a (7) excludes the exercise by the several states of control over security issues of interstate carriers, Section 77 does not exclude the exercise of their proper functions by state agencies (*Palmer* v. *Massachusetts*, 308 U. S. 79) and expressly preserves to the District Court its bankruptcy powers.

In *United States* v. *Lowden*, 308 U. S. 225, the Court again points out that the "public interest" in the consolidation or lease of carrier properties (under Section 5(4)(b) of the Interstate Commerce Act) "does not refer generally to matters of public concern apart from the public interest in the maintenance of an adequate rail transportation system" but is "to secure a more adequate and efficient transportation system."

And yet by some strained logic, the petitioners appear to find in the *New York Central Securities* case and in *United States* v. *Lowden, supra,* support for the contention that the well defined and well understood requirement of the "public interest" in the Interstate Commerce Act justified and supports their assumed standard of a capitalization in reorganization based in some undisclosed manner upon an unreported guess as to probable future earnings without basic findings of value, earning power, or other relevant facts, and without reference to the Court's constitutional power and duty to protect private rights.

There is no mystery as to the requirement of Section 77, subsection (d), that the Commission shall approve a plan which is "compatible with the public interest." This means that the plan as a whole must not be inconsistent with "the public interest in the maintenance of an adequate rail transportation system" (*New York Central Securities Co.* v. *United States*, 287 U. S. 12) or with "conditions of economy and efficiency" or with "appropriate provision and best use of transportation facilities" (*Texas* v. *United States*, 292 U. S. 522, 531; *United States* v. *Lowden*, 308 U. S. 225, 230).

It is obvious that the adequacy, efficiency or economy of a rail transportation system, or the best use of its facilities, will not be impaired by insistence upon determinations of earning power and value as a basis for the capital structure of a railroad in reorganization, or by giving full effect to the requirement of Section 77, that the District Court shall in passing upon the plan of reorganization exercise an informed, independent judgment.

The Commission's interpretation of its powers under Section 20a

In the practical interpretation of its powers under Section 20a the Commission has consistently adhered to the general standard stated in *New York Central Securities*

Co. v. *United States, supra.* In authorizing or withholding authorization for the issue of securities by railroad companies, the Commission has concerned itself primarily with preventing over-capitalization in relation to the actual investment in and value of the property of the carrier seeking authority to issue securities.

The basic principles under which the Commission, exercising its powers under Section 20a, has functioned in capitalization cases were announced in *Securities of Louisville & Nashville R. R.*, 76 I. C. C. 718 (1923). After stating that it would not permit full capitalization of all the assets of the carrier but would insist upon a reasonable cushion of uncapitalized assets, the Commission proceeded to indicate the assets which would be capitalized.

At page 720 it stated:

> "* * * We should authorize the capitalization of those assets of the carrier only which have been provided and which are intended for continuing productive use in the service of transportation. Such assets will be hereinafter referred to as 'capitalizable assets.'"

The Commission then discussed the capitalizable assets of the railroad, including working capital, materials and supplies, stocks of subsidiaries and other items and concluded (76 I. C. C. 726, 727):

> "The evidence establishes (1) that the applicant has a large uncapitalized surplus; (2) that its present capitalization is much less than its actual investment in property held for and used in the service of transportation, or any fair value of such property for rate-making purposes which we may hereafter fix under section 19a of the interstate commerce act; (3) that the increase in capitalization, which would result from the exercise of the authority to be granted herein, would still leave its capitalization below its actual investment in, and the probable fair value of, such property; (4) that its remaining uncapitalized surplus would be sufficient to serve the purposes for which a

surplus should be accumulated; and (5) that a larger stock base is necessary to enable it to issue sufficient bonds under its first and refunding mortgage to meet its future needs and at the same time comply with the requirements of the various State statutes referred to in our original report in this proceeding governing investments by savings banks and other investors."

Thus, it appears that the Commission squarely rests its determination of capitalizable assets, and the limitation on security issues in the public interest, on actual investment in property used in the public service and the fair value of such property as determined by the Commission's valuation proceedings under Section 19a of the Interstate Commere Act. The Commission requires, *first*, that the proposed issue of securities be adequately covered by the actual investment in the property of the carrier and, *secondly*, that it shall not be prejudicial to the adequacy, efficiency and general economy of the carrier's transportation services.

In subsequent cases the Commission has consistently adhered to this basis of capitalization and has permitted the issue of securities against the investment in carrier property, equipment, working capital, material and supplies, excepting certain types of assets which it has held not capitalizable.

Delaware, L. & W. R. Co. Stock, 67 I. C. C. 426 (1921);
SHARFMAN, *The Interstate Commerce Commission*, III A, pages 506-514.

The meaning of "compatible with the public interest" as incorporated in Section 77, when enacted in 1933, must be construed to be the same as its meaning in 1932 when the *New York Central Securities* case was decided under Section 20a. There is clearly no language in Section 77 which would tend to expand the administrative construction given to the phrase under Section 20a in 1931 and 1932, when the issuance of securities to A. C. James Co. was approved by the Commission (p. 61, above).

This is not a case involving accounting entries where properties are actually purchased at a price

In cases where railroad properties have been actually purchased at a price, the Commission has limited the capitalization to the actual investment or price paid. It may be stated, therefore, that the authorized capitalization may not exceed either (a) the actual investment in the property, or (b) the value of the property as determined by an actual commercial transaction.

Atlanta, Birmingham & Coast R. Co. v. *United States*, 296 U. S. 33;
Securities of Louisiana Ry. & Nav. Co. of Texas, 99 I. C. C. 357 (1925).

These cases, and other similar cases cited by the petitioners, lend no support to the broad proposition that the

Commission's power over capitalization is "exclusive and plenary" in the "public interest".

In *Atlanta, Birmingham & Coast R. Co.* v. *United States, supra,* it appeared that the Atlantic Coast Line had acquired through a subsidiary (Atlanta, Birmingham & Coast Railroad) the assets of a small railroad in Georgia. The Atlantic Coast Line guaranteed the dividends on the preferred stock of the new company and agreed to pay approximately $4,248,000 in discharge of prior liens on the property, in consideration of the transfer to it of all the common stock. The Interstate Commerce Commission ruled that the common stock should be set up on the books of account of the new company at $4,248,000, which represented the "actual money cost" to the "accounting carrier". This ruling was pursuant to the accounting rules of the Commission. The railroad contended that it was entitled to use the 19a valuation by the Commission of the assets of the predecessor company in setting up such assets upon its books. The Commission then made an actual valuation of the properties and found the value equal to the par value of the preferred stock and $4,248,000 for the common stock, which in the aggregate was the "actual money cost", and required the new company to state its accounts accordingly.

This action was sustained by the Supreme Court, opinion by Mr. Justice Brandeis, on the grounds that (a) the accounting order was an administrative matter as to which the Court had no power to weigh the evidence; (b) that the report of the Commission showed ample evidence to support its valuation; and (c) that the actual money cost to the company provided an immediate and proper measure of value of the no par common stock.

It has been urged in this proceeding that the Supreme Court in that case upheld the Commission's rule that the value at which the property of the carrier should be entered on its books was the "market or fair cash value"

or the value for the purposes of sale and exchange. It is not stated by the petitioners that the properties of the carriers had been actually sold to the plaintiff on the dollars and cents basis required to be set up on its books of account, and that the Commission had actually found the value of the properties transferred to be equal to the par value of the preferred stock and the common stock authorized to be issued. In case of an actual sale as appeared in this case, it is not unreasonable that the property actually purchased should be capitalized at the purchase price, that securities should be issued only to the extent of the purchase price and that the property should be set up on the books of the purchasing company at the purchase price. This is the holding of the Court in the *Atlanta, Birmingham & Coast R. Co.* case.

The second point which the petitioners failed to state is that neither the determination of the Commission, nor the application of its accounting rules, nor the decision of the Court affected private rights or resulted in the destruction or confiscation of even one dollar of credit or claims or equity interest.

Summary

There would seem to be no escape from the conclusion that there has been a basic misconstruction of Section 77 by the Commission. It has sought to deal with private rights in a confiscatory manner, without reference to its prior determinations of the investment in the debtor's railroad system and its Section 19a valuation of such property, and without basing its decision on a proper exercise of its delegated function of redetermining the value of the debtor's properties on the basis of earning power and other relevant factors. It has been led astray from the clear path of sound statutory construction by a political catch phrase to the effect that stock, on which dividends cannot be paid, may become "mere tokens for

stock market speculation." On this basis it has sought to substitute a finding as to the amount and character of capitalization of the debtor for a finding as to the value of the properties of the debtor represented by that capitalization. On this basis the supporters of the Commission Plan have even urged that the Courts have no power to protect the property rights of this respondent and others, on the theory that the power of the Commission as to capitalization must be deemed to be "plenary and exclusive" and "in the public interest."

It may indeed be doubted that Congress itself could constitutionally enact a statute which purported to cut off a substantial part of the secured claim of this creditor by prescribing, in an alleged public interest, an amount and character of capitalization for the debtor.

The determination of the amount and character of capitalization has inescapable judicial aspects, affecting directly the property rights of this respondent with the result that the jurisdiction of the bankruptcy court cannot be completely ousted, either by the Congress itself or by any agency or authority of the legislature (*Ex parte Bakelite Corporation*, 279 U. S. 438; *In re N. Y., N. H. & H. R. Co.*, 16 F. Supp. 504; KATZ AND FRANKFURTER, *Federal Legislative Courts*, 43 Harvard Law Review 894).

One thing is clear, however: Congress did not give to the Commission a mandate under Section 77 to so proceed. Section 77 of the Bankruptcy Act was not enacted for the purposes of regulating security issues and insuring the payment of dividends on common stock, but for quite different purposes. It is the duty of the Commission to interpret and apply the statute according to the clearly disclosed legislative intent.

In its construction of Section 77 of the Bankruptcy Act it may fairly be said that the Commission has drifted away from the salutary principle set out by Judge Cooley in the third annual report of the Interstate Com-

merce Commission to Congress more than fifty years ago (p. 104):

> "* * * Undoubtedly the first duty of an administrative officer is to give effect to the law under which he acts. Much depends, however, on the manner in which this is done, and misdirected energy may render a law nugatory. * * *"

POINT III

The Commission's assumption of a legislative mandate under Section 77 authorizing it to convert valid debt into stock finds no support in the language of Section 77 and carries with it practical consequences seriously prejudicial to the credit of the debtor.

As is pointed out under Point II above, the Commission, in its report of October 10, 1938, in discussing the legislative mandate embodied in Section 77 of the Bankruptcy Act, clearly recognized that the only express provision as to capitalization was the clear-cut requirement of the Act that fixed charges should be limited so that they would be adequately covered by the "probable earnings available therefor." The Commission proceeded, however, to conclude, from the requirement that the plan as a whole must be compatible with the public interest, that this required "that proposed charges, whether fixed or contingent, be within its probable earning power."

It would seem obvious that the mere fact that Section 77 expressly provides, as a standard of public policy, that "fixed charges (including fixed interest on funded debt, interest on unfunded debt, amortization of discount on funded debt, and rent for leased railroads)" must be related to "probable prospective earnings" and adequately covered by the "probable earnings available for the payment thereof", shows beyond question that Congress did not intend that the same standard of public policy should be applied to contingent charges.

It would have been simple for the draftsmen to expand the phrase "fixed charges" to the phrase "fixed and contingent charges." The reason that Congress did not set up in Section 77 any such standard is obvious. The failure to earn fixed charges may lead to financial difficulties for a carrier and hence to a possible interruption of service to the public. A failure to earn contingent charges carries with it no such prejudice to the public.

In the Commission Plan, which is before the Court in this proceeding, the Commission, under the exercise of clear statutory power and authority, drastically limited fixed charges. It provided that the new company should issue no fixed interest obligations except a contemplated $10,000,000 of First Mortgage bonds to be issued to provide such new money as might be necessary in connection with the reorganization. No class of the existing secured creditors of the debtor, either First Mortgage bondholders or creditors holding obligations secured by General and Refunding Mortgage bonds, are to receive fixed interest obligations. It is interesting to note that no secured creditor in this proceeding has protested this drastic limitation upon the issue of fixed interest obligations. There was a clear public interest and a clear legislative mandate and it met with complete and unprotesting acceptance by all the parties to the proceeding.

The Commission, however, proceeding under its extension of the mandate of Section 77, to which reference is made above, drastically limited the issue of contingent or income bonds by the reorganized company. The existing First Mortgage bondholders, for instance, who now hold fixed interest obligations, are to receive under the Commission Plan only 40% of the face of their obligations in income bonds and the balance in preferred stock.

In a memorandum filed by this respondent with the Commission under date of January 11, 1937, it was pointed out to the Commission that its valuation of the physical

properties of the debtor's railroad system, made under Section 19a of the Interstate Commerce Act, with additions at cost to that time, amounted to approximately $145,000,000 and that the total funded debt of the debtor (exclusive of affiliated company open account advances and accrued interest) amounted to approximately $63,000,000, or less than 44% of the property valuation. It was urged upon the Commission that the relation of assets to total liabilities in the case of the debtor here concerned furnished no necessary basis for a change of any substantial part of the debt to equity. The memorandum referred to went on to state:

> "* * * Provided that the creditors are willing to surrender their demand for fixed interest on funded debt, as is essential in compliance with Subdivision (b)(4) of Section 77 of the Bankruptcy Law, there is no reason why their debt should not retain the character of debt upon the reorganization of the property.
>
> "The average investor who buys a bond wants to be a creditor and not the owner of an equity. Sometimes the preference is one of necessity because of the limitations of a trust instrument, or the limitations of law as to the character of the investments which certain institutions and individual fiduciaries may make. Sometimes it is mere personal preference. Whatever the basis, however, it seems clear that the investor should not be asked to change the character of his interest, unless the necessities of a sound financial reorganization make this essential.
>
> "It is respectfully submitted that there is nothing in the record here before the Commission which justifies the change in the character of the securities, held either by First Mortgage bondholders, or by secured creditors, from debt to equity."

The soundness of the contention in opposition to unnecessary changes of debt to equity, as urged upon the Commission, has been dramatically supported by recent developments in the field of taxation. The Commission, proceeding under an express desire to improve the credit of

a debtor railroad by a mandate that a secured creditor must accept for his interest bearing obligations, as here in the case of the First Mortgage bondholders, 40% of principal amount in debt and 60% in equity certificates, has created a situation where a large part of the money which the reorganized company will receive and which should be used in fairness and equity to pay interest on its obligations is siphoned off under the obligation of our Federal tax laws and becomes unavailable for the payment of interest justly owed.

Take the situation as to the debtor here. Neither in the calendar year 1940 nor in the calendar year 1941 did the debtor actually pay any Federal income taxes. Yet the brief for the Institutional Bondholders, at page viii of its appendix sets out a computation showing that, if in 1940 and 1941 the revised plan of capitalization proposed under the Commission Plan had been in effect, the debtor, on the same earnings basis, would have paid to the Federal Government taxes on a theoretical income after interest, exclusive of excess profits taxes, amounting to $1,248,641. This sum of almost a million and a quarter dollars should in fairness and equity be available to the debtor to discharge its obligations to its secured creditors for unpaid interest of prior years. But the Commission has said that sixty per cent of the debtor's bonds should be changed to stock "in the public interest", and this mere change in the form of security which they are to hold automatically prevents the debtor, to a substantial extent, from carrying out its obligation to pay its creditors interest lawfully payable.

If excess profits taxes are taken into account, the unjust effect of the Commission's theoretical extension of the public interest becomes more marked, and is a matter of general knowledge and concern among investors. Strangely enough, the petitioners purport to find in the increased taxes that would result from the Commission's capital

structure, to the injury of creditors, an argument in support of the Commission Plan.

There is probably no one influence which has been more potent in bringing railroad securities into general public disrepute and more effective in destroying the credit of railroads generally than the realization that the Commission is asserting a right under Section 77 of the Bankruptcy Act to prevent a debtor from having available the funds to pay the interest which it has contracted to pay to its security holders, by renaming a bond a stock in an alleged public interest.

POINT IV

Section 77 of the Bankruptcy Act does not delegate to the Commission authority to originate and impose upon the parties a plan of reorganization and to nullify completely the rights of the parties to propose and negotiate a fair and equitable plan.

When an administrative agency, with the accumulated prestige possessed by the Commission, writes an unsupported gloss upon a statute, its construction receives a surprising amount of non-critical acceptance. The briefs of the petitioners furnish examples of this.

At page 27 of the Reconstruction Finance Corporation brief the following statement occurs:

> "Under Section 77 Congress has delegated the primary responsibility for the development of the reorganization plan to the Commission, * * *."

Needless to say, the brief does not attempt to refer to what language in Section 77 supports this bald statement.

On page 48 of the brief for the Institutional Bondholders the following statement appears:

> "Section 77, as administered by the Commission, has substituted the Commission as the 'reorganizer' and its expert judgment for the old 'bargaining' among the securityholders. * * *"

The phrasing of this statement is illuminating. It does not assert that the language of Section 77 makes the Commission a "reorganizer". It does say that under Section 77, **"as administered by the Commission"**, the Commission has been substituted as "reorganizer". Surely, one may fairly ask, in view of the drastic change in reorganization procedure involved, and the tremendous burdens thus imposed on the Commission, that there be pointed out express language in Section 77 which makes the Commission a "reorganizer" and substitutes its fiat for any renegotiation of contractual relationships between the groups of security holders.

Again, at pages 118-119 of the Institutional Bondholders' brief, this expansive statement appears:

> "Indeed the new legislation, as has already been stated, created a procedure under which the Commission has **in effect** become substituted for the securityholders as the 'reorganizer' and its expert judgments substituted for the 'bargaining process' among securityholders for the determination in the first instance, not only of the over-all questions of public interest, such as the total amount and character of capitalization to be issued in the reorganization, but also of the financial and other factual problems affecting the distribution of that capitalization in accordance with the legal rights of the old securityholders."

The brief does not attempt to support this statement by reference to the language of the statute, but refers only to the former statement in the brief itself.

Developing the thesis that the Commission is required to "formulate" a plan of reorganization, the Institutional Bondholders' brief states, at page 124:

"The essential jurisdiction of the Commission under Section 20a is carried into Section 77 not only by the requirement that the Commission shall **formulate** a plan 'compatible with the public interest.' * * *"

And at page 131:

"By subsection (d) the Commission is vested with jurisdiction to *determine* a plan that will be compatible with the public interest. * * *" (Italics in the brief.)

Neither of these statements is supported by any reference to the language of Section 77 which would authorize the Commission to "formulate" a plan. Actually subsection (d) of Section 77 does not at all authorize the Commission to "determine" a plan; on the contrary the language is that the Commission shall *approve* or *disapprove* a plan.

Any construction of Section 77 which takes from the creditors and the equity owners the right to initiate by agreement among themselves a plan of reorganization, provided that such plan does not disregard the priorities of secured creditors and does not conflict with basic and well defined considerations of public interest, cannot be sustained under the language or demonstrable intent of Section 77.

The relations between various classes of security holders in a railroad property are contractual relationships. When uncontemplated factors (such as the impact of the 1929 depression) render it impossible that these contracts be performed according to their terms, the parties have an inherent right to renegotiate their contractual relationships.

There is no language in Section 77 which purports to take away from the parties this right of renegotiation. Even more clearly, there is no language in Section 77, which, on its face, gives to the Commission the power and the responsibility of framing plans of reorganization for railroads; and yet this is the practical effect of the construc-

tion of Section 77 of the Bankruptcy Act adopted by the Commission and applied in this proceeding.

A reading of Section 77 of the Bankruptcy Act as a whole indicates, of course, that it was the intention of Congress to extend the function of the Commission as to railroad reorganizations. The Commission itself had from time to time pointed out the difficulties which arose under the previously existing practice in equity reorganizations. It was said that plans of reorganization came before the Commission only after they were formulated and agreed upon by the parties and solely, under Section 20a of the Interstate Commerce Act, for action upon the authorization of the issue of new securities. Section 77 clearly accomplishes a contemporaneous supervision by the Commission and by the Court of the steps in reorganization with a view primarily to accelerating the reorganization of railroads as against the alleged delays of the old equity practice.

It is also clear that it was the Congressional intent in enacting Section 77 to limit, so far as it legally might, the opportunity of minorities to frustrate the formulation and putting into effect of a plan of reorganization.

The entire plan and scheme of Section 77, however, clearly indicates that the parties should propose a plan of reorganization and by negotiation and adjustment agree upon its essential features, within the framework of Section 77. Under the terms of Section 77, the debtor is made the moving party in submitting a fair and equitable plan to the court and to the Commission, but any creditor is entitled to submit a plan and there is express and detailed provision in the Act for agreement among the various parties in interest by formal vote.

Nowhere in the Act is there imposed upon the Commission an express power and duty to formulate a plan of reorganization. The Commission, however, has seized upon an almost parenthetical phrase, hereinafter quoted,

which appears in the first paragraph of subsection (d) of Section 77 of the Bankruptcy Act, as justifying an expansion of its powers. This phrase states merely that the plan approved by the Commission "may be different from any which has been proposed." The phrase in question actually appeared in parentheses in the original act, prior to the 1935 amendment. On the basis of this phrase, which should reasonably be interpreted to give a far narrower scope of authority to the Commission, the Commission has asserted a right in this proceeding to originate and impose upon the parties its own plan of reorganization.

When the Bureau of Finance of the Commission first formulated and released its proposed plan of reorganization, which rejected and disregarded all plans filed by the parties, every party to the proceeding filed objections to the proposed plan. When the Commission on October 10, 1938, issued this Bureau of Finance plan, with some modifications, as its plan of reorganization, every party to the proceeding filed objections and petitions for rehearing (R. 675 to 818).

The only parties in interest who are supporting this plan in this Court are First Mortgage bondholder interests (and as to the First Mortgage bonds, only those held by institutions whose interests may well be different in some respects from the interests of the average First Mortgage bondholder) and the Reconstruction Finance Corporation. The reason for such support is obvious. The Institutional Bondholders may well feel that they benefit, because of the complete priority granted to them by the Commission, from the cancellation or foreclosure of the interests of secured creditors, general creditors and equity owners.

The Reconstruction Finance Corporation is, under the Commission Plan, granted clearly preferential treatment in relation to other secured creditors and treated on a

parity with the First Mortgage bondholders. The fact that the Commission Plan has been supported in the courts by these two favored interests does not negative the fact that the plan here before the Court is a Commission Plan originated and promulgated by the Commission and resting not at all upon any proposal or agreement of the parties to the proceeding.

The language upon which the Commission bases its right to initiate and promulgate a plan is the clause which is emphasized in the following sentence taken from subsection (d) of Section 77 of the Bankruptcy Act:

> "* * * After the filing of such a plan, the Commission, unless such plan shall be considered by it to be prima facie impracticable, shall, after due notice to all stockholders and creditors given in such manner as it shall determine, hold public hearings, at which opportunity shall be given to any interested party to be heard, and following which the Commission shall render a report and order in which it shall approve a plan, *which may be different from any which has been proposed,* that will in its opinion meet with the requirements of subsections (b) and (e) of this section, and will be compatible with the public interest; or it shall render a report and order in which it shall refuse to approve any plan. * * *"

It is far more reasonable to assume that Congress intended by the language from subsection (d) of Section 77, italicized above, to make possible minor changes in the plan, consistent with the general intent and agreement of the parties, in order that reorganization might be expedited, rather than a broad grant of power to the Commission to originate and promulgate plans of reorganization. The language is reasonably calculated to meet any argument that the Commission must approve or disapprove a plan precisely as submitted to it and cannot condition its approval upon the making of definite modifications, which the Commission may find to be in the public interest and required by the express limitations set out in

Section 77. This is a far different thing from a broad grant to originate plans by administrative fiat.

If Congress had meant to give the Commission broad power to formulate plans of reorganization, it could (subject to obvious doubts as to whether such a delegation of right to interfere with the contractual freedom of the parties would be constitutional) have said so in clear and express language. Certainly it might well have omitted from the provisions of Section 77 the express and time-consuming provisions for the filing of plans with the Commission.

We shall have occasion in Point V, which follows, to indicate what seems to us to be the reasonable interpretation of Section 77 as to the relative functions of the security holders and the Commission in the formulation of a plan of reorganization.

POINT V

The groups of security holders represented in this proceeding should be permitted, under supervision by the Commission and the courts as contemplated by Section 77, to renegotiate their contractual relationships, and formulate and agree upon a plan of reorganization, which would (a) observe the rule of priorities of the *Boyd* and *du Bois* cases, (b) provide for fixed charges only to the extent that they shall be adequately covered by "probable earnings", and (c) provide for a total capitalization within the limit established by the value of the property of the debtor used in the public service, after due consideration of its earning power.

We have pointed out in Points II, III and IV, above, that the theory and construction of Section 77 by the Commission is not supported by the language of the statute, nor within the intent of Congress, and that it produced an

unfair and inequitable result when applied to the facts before it in this proceeding. We believe, and think it proper to so state at this point, that many of the difficulties and delays which have occurred generally in the attempt to reorganize railroads under Section 77, are to be attributed to the Commission's erroneous and impracticable construction of its functions and duties under Section 77.

Section 77 of the Bankruptcy Act was enacted in 1933 and substantially amended in 1935. It has not accomplished the purposes which prompted its enactment; that is, the improvement of the reorganization procedure as against the old equity practice. Since the enactment of the Act, three major railroad reorganizations have been effectuated under the procedure provided by Section 77. The three properties are:

The Erie Railroad System, 2,392 miles operated (see 239 I. C. C. 653 (1940), 240 I. C. C. 469 (1940), *In re Erie R. Co.*, 37 F. Supp. 237 (N. Dist. Ohio 1940));

Chicago & Eastern Illinois Railway, 925 miles operated (see 230 I. C. C. 199 (1938), *ibid* 571 (1939), opinion and order N. Dist. Ill. 1940, unreported);

Chicago Great Western Railroad, 1,502 miles operated (see 228 I. C. C. 585 (1938), 233 I. C. C. 63 (1939), 29 F. Supp. 149 (N. Dist. Ill. 1940)).

It is interesting to note that in the case of the three properties so reorganized, the Commission did not seek to foreclose or cancel the interests of creditors, secured or unsecured, and instead gave substantial recognition to the equity.

A number of small railroad properties have been reorganized under the Commission's interpretation of Section 77. Their aggregate mileage is relatively unimportant. These include such properties as:

Chicago, South Shore and South Bend Railroad, 90 miles operated (see 212 I. C. C. 547 (1936), 217 I. C. C. 423 (1936) opinion and orders, N. Dist. Ind. 1936, 1937, unreported);

Copper Range Railroad, 107 miles operated (see 212 I. C. C. 479 (1936) opinion and orders W. Dist. Mich. 1936, 1937, unreported);

Louisiana & North West Railroad, 99 miles operated (see 224 I. C. C. 58 (1937), 36 F. Supp. 636 (S. Dist. N. Y. 1938), *ibid* 639;

Reader Railroad, 22 miles operated (see 221 I. C. C. 190 (1937) opinion and order, W. Dist. Ark. 1937, unreported);

Savannah & Atlanta Railway, 147 miles operated (see 224 I. C. C. 197 (1937) opinion and order, S. Dist. Ga. 1938, C. C. H. Bankr. par. 51,448);

Spokane International Railway, 152 miles operated (see 228 I. C. C. 387 (1938), 233 I. C. C. 157 (1939), opinion and order, E. Dist. Wash. 1940, C. C. H. Bankr., par. 52,567).

It is a fair statement, however, that the major railroad properties, except the three mentioned above, which came into financial difficulties as a result of the impact of the 1929 depression, and as to which the reorganization procedure was invoked, are still dragging a laborious course through the Commission and the courts, mainly because of the Commission's unsound and unsupported interpretation of Section 77. These major properties, still in process of reorganization, include:

Chicago & North Western Railway, 8,319 miles operated (236 I. C. C. 575 (1939), 239 I. C. C. 613 (1940), 35 F. Supp. 230 (N. Dist. Ill. 1940), 126 F. (2d) 351 (C. C. A. 7th, 1942));

Chicago, Milwaukee, St. Paul & Pacific Railroad, 10,854 miles operated (239 I. C. C. 485 (1940), 240 I. C. C. 257 (1940), 36 F. Supp. 193 (N. Dist. Ill. 1940), 124 F. (2d) 754 (C. C. A. 7th, 1941));

Chicago, Rock Island & Pacific Railway System, 7,900 miles operated (242 I. C. C. 298 (1940), 247 I. C. C. 533 (1941));

Denver & Rio Grande Western Railroad System, 2,566 miles operated (233 I. C. C. 515 (1939), 239 I. C. C. 583 (1940), Finance Docket No. 11002, July 13, 1942, unreported, 38 F. Supp. 106 (Dist. Colo. 1940));

Florida East Coast Railway, 685 miles operated (Finance Docket No. 13170, April 6 and Aug. 10, 1940, unreported);

Minneapolis, St. Paul & Sault Ste. Marie Railway, 4,269 miles operated (Finance Docket No. 11897, March 17 and June 17, 1942, unreported);

Missouri Pacific Railroad System, 10,254 miles operated (239 I. C. C. 7 (1940), 240 I. C. C. 15 (1940), 39 F. Supp. 436 (E. Dist. Mo. 1940));

New York, New Haven & Hartford Railroad, 1,853 miles operated (239 I. C. C. 337 (1940), 244 I. C. C. 239 (1941), 16 F. Supp. 504, opinion and order Dist. Conn. 1941, unreported));

St. Louis-San Francisco Railway, 4,769 miles operated (240 I. C. C. 383 (1940), 242 I. C. C. 523 (1940));

St. Louis Southwestern Railway System, 1,650 miles operated (249 I. C. C. 5 (1941), 252 I. C. C. 325 (1942));

Central of Georgia Railway, 1,864 miles operated (Fifty-fourth Annual Report of the I. C. C., p. 58).

This respondent contends that while Section 77 of the Bankruptcy Act, as erroneously construed and applied by the Commission, has not worked well, the statute itself is wisely conceived and statesmanlike legislation. If given a reasonable interpretation, according to the true legislative intent, it would function fairly and efficiently and with much greater expedition than the old equity practice.

Only because of the unsound and unsupported construction which has been given the Section by the Commission, have defects arisen in its administration.

At the outset it should be noted that Congress itself has expressed clearly and without ambiguity in subsection (b) of Section 77 what it deems to be the basic public interest in capitalization. It has expressly provided that a plan of reorganization

> "* * * shall provide for fixed charges (including fixed interest on funded debt, interest on unfunded debt, amortization of discount on funded debt, and rent for leased railroads) in such an amount that, after due consideration of the probable prospective earnings of the property in light of its earnings experience and all other relevant facts, there shall be adequate coverage of such fixed charges by the probable earnings available for the payment thereof; * * *"

Congress meant just what it said in that provision; that it was the duty of the Commission and of the Court not to approve a plan unless its probable prospective earnings would clearly cover its fixed charges. It is the failure to earn fixed charges which carries with it the objectionable sequence of default on fixed interest payments and possible foreclosure of liens, with the resultant disastrous effect on credit and continuity of management. A failure to earn contingent interest, or dividends, creates no similar situation affecting vitally the public interest.

As to the elements of capitalization, other than those involving fixed charges, there is no evidence of any intent or purpose on the part of Congress to limit or restrain by the language of Section 77 of the Bankruptcy Act the freedom of negotiation and adjustment traditionally possessed by parties who have existing contractual relations and are called upon by economic circumstances to modify such contractual arrangements. On the contrary, there is every indication in Section 77 that Congress contemplated that

fair and equitable plans of reorganization would emerge mainly from agreement of the parties.

There is, of course, a necessary restriction inherent in Section 20a of the Interstate Commerce Act and expressly confirmed by Section 77 of the Bankruptcy Act, that the capital structure upon which the parties may agree shall be fully warranted by the capitalizable assets of the debtor and so entitled to approval of the Commission under its consistent and well established administrative practice under Section 20a of the Interstate Commerce Act. Subsection (f) of Section 77 contains an express provision to that end as follows:

> "* * * Upon confirmation of a plan the Commission shall, without further proceedings, grant authority for the issue of any securities, assumption of obligations, transfer of any property, sale, consolidation or merger of the debtor's property, or pooling of traffic, to the extent contemplated by the plan and not inconsistent with the provisions and purposes of the Interstate Commerce Act as now or hereafter amended. * * *"

Congress must be deemed in the enactment of the above quoted provision to have had in contemplation the established administrative practice of the Commission under Section 20a of the Interstate Commerce Act to which reference is made above in this brief at pages 59 to 69. That established administrative practice of the Commission was clearly that no securities should be issued which were not soundly based upon adequate capitalizable assets "intended for continuing productive use"[1] in the service of the public. It did not involve or contemplate any attempt to restrict the issue of equity securities in order that a material return might be expected upon such stock. (See quotation from Commission's report of October 10, 1938, appearing at page 51, above.)

---

[1] *Securities of Louisville & Nashville R. R.*, 76 I. C. C. 718, 720 (1923).

It is obvious that the interpretation and application which the Commission has given to Section 77 in this proceeding has rendered completely nugatory the provision in Section 77 for the valuation of the property of the debtor. That provision occurs as the last paragraph in subsection (e) of Section 77 and reads as follows:

> "If it shall be necessary to determine the value of any property for any purpose under this section, the Commission shall determine such value and certify the same to the court in its report on the plan. The value of any property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present, and prospective, and all other relevant facts. In determining such value only such effect shall be given to the present cost of reproduction new and less depreciation and original cost of the property, and the actual investment therein, as may be required under the law of the land, in light of its earning power and all other relevant facts."

A revaluation of the debtor's property by the Commission may not be necessary where the parties can arrive at a plan of reorganization which gives due recognition to the rights of each class of creditors and stockholders, and otherwise complies with the limitations of Section 77, but it needs no extended argument to point out that a valuation of the property of the debtor is essential before the property rights of a secured creditor can be foreclosed and this is what is attempted in the plan here before this Court. It is also obvious that the rights of general creditors and of equity owners can be held to be without value only on the basis of a valuation of the assets of the debtor in which such general creditors and equity owners have an interest.

The very language used in the quoted paragraph from subsection (e) of Section 77 of the Bankruptcy Act negatives the validity of the interpretation which the Commission has sought to give to the Section. The Commission has

tried to foreclose the interests of secured creditors and unsecured creditors and the equity on the basis of a capitalization determined solely with reference to "probable earnings reasonably foreseeable for the future" (R. 244, 310). To be sure, the Commission does not squarely find in its reports in this proceeding what the probable prospective earnings of the debtor are. More important, however, is the fact that Congress has expressly provided that the value of the properties of the debtor, which value is necessarily reflected in the values to be assigned to its securities, must be based, not upon "probable earnings reasonably foreseeable", but upon quite a different thing: "earning power".

"Power" is generally and properly defined as "capacity to produce an effect". "Earning power", as used by Congress, necessarily means "capacity to produce earnings". That is quite a different thing from "probable prospective earnings", which is interpreted by the Commission to mean earnings that are reasonably foreseeable for the immediate or near future.

Respondent earnestly contends that the above quoted language from subsection (e) of Section 77 of the Bankruptcy Act must be construed in the light of the knowledge by Congress that the Commission had, at great expense to the public and to the carriers, prepared and promulgated valuations of the properties of the carriers under Section 19a of the Interstate Commerce Act which valuations accurately disclosed the true investment of the carriers in their properties, and readjusted such valuations to exclude unwarranted capital expenditures and abandoned properties, and kept these valuations up to date by the record of additions and betterments made under Commission supervision.

The emphasis in the quoted language on earning power, construed as capacity to earn, clearly authorized and directed the Commission to make such modifications in its

valuations made under Section 19a of the Interstate Commerce Act as would take into account those situations where an actual investment in railroad property did not properly reflect a capacity to earn under present conditions, or for the future, either because of permanent changes in traffic conditions or because the industrial decline of areas served had diminished the economic usefulness of the properties, or where the original investment had been ill-conceived and did not represent such potential service to the public as would give the property a capacity to earn commensurate with the investment.

The legislative history of the enactment of the 1935 amendment to Section 77 of the Bankruptcy Act supports the view that Congress meant no more by the language it uses as to the basis of valuation in subsection (e) of Section 77 than such express extension of power to the Commission, where necessary, to revise and modify, for reorganization purposes, its prior valuations of the railroads, with full consideration of "earning power", in the sense of "capacity to earn" based on the usefulness to the public of such property. From this point of view, the concept carried into Section 77 is closely akin to the much discussed doctrine of "prudent investment", enunciated by Mr. Justice Brandeis when a member of this Court (*Southwestern Bell Telephone Co.* v. *Public Service Comm.*, 262 U. S. 276, 289).

The 1935 amendment to Section 77 of the Bankruptcy Act was separately introduced in the House of Representatives and in the Senate. Neither in the House nor in the Senate was there discussion on the floor as to the significance of the phrase "earning power" as it appears in the valuation provisions of subsection (e) of Section 77. When the House bill was before the Committee on the Judiciary of the House of Representatives, Mr. Leslie Craven, counsel for the Federal Coordinator of Transportation and accredited draftsman of the proposed legislation, appeared

on April 15 and April 16, 1935, before the Committee to outline the intent and purpose of the proposed amendment to Section 77 of the Bankruptcy Act. Throughout his presentation to the Committee on the Judiciary there appear statements which are illuminating as to the true significance and intent of the phrase "earning power" as used in Section 77. The language quoted below is that of Mr. Leslie Craven, except where otherwise indicated in the case of members of the Committee on the Judiciary of the House of Representatives:

Page 28 report of hearing before the Committee on the Judiciary of the House of Representatives

"If you have built a Mayflower Hotel in Alexandria and it is not able to make operating expenses, what it cost does not have anything really to do with the case, because that is not even evidence of the probable value of that property.

• • • • • • • • • •

"If you will excuse me I think that this is sufficiently important to read:

'For the purposes of any determination in proceedings under this section to which the fair valuation of any property used in railroad operation—'

"That is important; this would not apply to land which was held for investment purposes. [Reading:]

'may be necessary, including, but not limited by, the solvency of the debtor, such valuation shall be determined on a basis which will give due consideration to the earning power of the property, present and prospective, and all other relevant facts.'

"That is the law as we understand it for the determination of the kind of value which is here in issue.

"Personally I think that prospective earnings are the things which are the most important and you will

observe that we are talking about 'earning power'. We are not proposing that we organize these railroads on the basis of present earnings. You could not do it. The roads now either in bankruptcy or equity proceedings are only earning one-seventh of their bond interest."

Page 31

"For that reason, to be quite frank with you about the matter, this rule is not an entirely satisfactory rule, because it is not precise. It is not as definite as you would like to have it, but we do not know any way to get a more definite rule.

"This is legally sound; that is, I mean that it puts emphasis, as it ought to, off of costs and on to earnings.

"Now, we have to leave that to the determination of the court and the Commission. We do not think that it is wise to try to straightjacket that thing, by telling them how they shall do it, and we do not believe, let me say, that under this rule this Interstate Commerce Commission is going to take that provision and use it in a senseless way, that is, in a way whereby they would, for example, reorganize these railroads on the basis of these obviously subnormal present earnings.

"In getting up a statute like this, you have to count on the intelligence of your administrative agency, and you cannot legislate intelligence into it.

"Now, what I have said has largely to do with provisions designed to enable the putting through of plans, when times are propitious, with fair treatment of equity interests and in a manner not to permit their obstruction for purposes of driving a better bargain."

Page 38

"There is not any question, I believe—at least serious question—that in the determination of value for reorganization purposes, the weight must be given to the actual economic value of the property. That

is its worth. And, as I illustrated yesterday, if you should unwisely do what thousands of people have done, invest large sums in boom times in such a thing as a Mayflower Hotel located over in Alexandria, it cannot be expected, in the very nature of things, that if that property becomes insolvent, or unable to meet its bills, when it is reorganized, it shall be again organized on the basis of the investment or the reproduction cost at present prices. That is an absurdity on the face of it."

Page 39

"Another point is this: We set up in the last provision of that paragraph a rule of evidence; evidence of these respective kinds of cost figures shall not be received unless it shall be first established that in the light of its earning capacity, which we regard as the true measure of value, and all the other relevant facts —we do not exclude anything; we let the court look at the whole proposition—such sums as are evidenced by such reproduction or original cost of, or actual investment in, the property could, at the time of the proceeding or within a reasonable period thereafter, be reasonably invested therein.

"In other words, you cannot bring in testimony and prove, over months of time, with all of the labor that is required to make such proof, these investment and reproduction cost figures, unless you first establish that the sum claimed in that way could be reasonably invested.

"'Reasonably invested' is merely another way of saying that you could get a return on it in a reasonably near future period. Our authority for that is the following case, and I submit it to you as a bit of sound reasoning. It is a decision of the circuit court of appeals in *United States* v. *Boston & New York Canal Co.* (271 Fed. 877, at 889), which was a condemnation case."

Pages 40 and 41

"The point there is this: That the value that was in issue before the Interstate Commerce Commission was a value for rate-making purposes and it was based

on cost figures; because when you come to make rates on the basis of value you cannot take earnings and capitalize them, because if you do you get into a vicious circle. Therefore a value for rate-making purposes such as was found by this Commission produces a sum which, with reference to its actual value, is often tremendously in excess, because it is primarily a cost figure.

"Their effort was to ascertain as well as they could by the use of reproduction-cost figures an approximation of what they thought was probably the proven investment."

Pages 42 and 43

"Take my hotel down there in Alexandria, my Mayflower Hotel. The reproduction cost of that property at 1928 prices ought not to be received in evidence unless somebody can show that under the reasonable and prospective earnings of that property a sensible man would make that investment. Now, we are not trying to be hard-boiled about this thing. This was not an effort to be harsh. This will be objected to, you will find, by the equity holder."

Page 43

"Now, this could be done: It would be perfectly constitutional. It would be a provision that a road would be regarded as insolvent, so that there would not be the necessity of submitting a plan to stockholders, in the event that the earnings available for the payment of dividends on that stock, for a period of, say 5 years had not been adequate to pay any dividends. Under the law, there is not the slightest doubt that the Congress—it has been decided in many cases—has latitude in the fixation of its definition of insolvency. That provision would be proper. Now, if there is anyone who thinks that this valuation provision is not what it ought to be, then the substitute for it is a provision of the kind which I have suggested, which would be very effective.

"Mr. Michener (a member of the Committee on the Judiciary). It would be very effective in wiping out all equities in any kind of business in the country.

If business has got to be measured by its earnings in the last 5 years—any business, I do not care what it is—it would be just about as unfair a thing as could be imagined or suggested.

"Mr. Craven. And that is why we did not adopt it. I think this is a fairer standard.

"Now, I will say this with reference to this valuation provision. I brought it up here for discussion because it is an essential and important part of this act. But I do not think that it will attain any such importance in an actual reorganization, as you might suppose, from the conversation that has been had here, because what will happen will be that they will come in with a plan, it will be considered as to whether it is reasonable, and the valuation determination will be apt to be a secondary thing, not a primary thing.

"I do not think the court ought to—if I were a judge I would not, and I am sure you would not—sit down and say in a coldblooded way, 'Well, now, gentlemen, we are going first to fix a valuation.' I would consider the plan first. That is what the courts are going to do."

It may be conceded that Mr. Craven has subsequently made many public statements about the meaning of the valuation clause in Section 77, which might be urged as inconsistent with the excerpts set out above. There is, for instance, his explanation of the clause, which somewhat surprisingly was quoted with approval by the District Court in its opinion approving the Commission's theory of capitalization and its resulting Plan, as follows (R. 1584):

"* * * the valuation provisions in the existing law were so drawn that whoever tried to upset the valuation of the Commission would not be able to do it. The language is left in generalities. * * *"

However, what Mr. Craven said subsequently is of little importance; what he said to the House Committee, in ex-

plaining the purpose of the provision in his capacity of accredited draftsman, and during the consideration of the 1935 amendment, is of considerable importance as bearing upon the legislative intent.

In the proceeding here under review, the Commission deliberately avoided making any findings as to the valuation of the property of the debtor other than its finding under Section 19a of the Interstate Commerce Act which it incorporated in its report of October 10, 1938 (R. 224). That valuation was, as indicated above (Point I), adequate to justify the recognition of the secured claim of this respondent in full, with ample margin over for the general creditors and the equity. The Commission did in its report use discursive language expressing a doubt as to whether the original line of railroad of the debtor, which is the nucleus of its present railroad system, represented initially a prudent investment on the part of the Denver and Rio Grande Railroad Company (R. 244), which fell into financial difficulties because of that investment. It is obvious, however, that the Commission could not have found on the record before it that the present railroad system of the debtor was not a property essential to the efficient functioning of our national transportation system.

In this connection and as bearing upon the economic justification for the debtor's railroad system, attention of the Court is called to the tabulation which appears in the record as Exhibit L, annexed to the stipulation filed by the parties in the District Court (R. 1267-8). This table is reprinted for the convenience of the Court at page LIV in the appendix to this brief.

This table shows that even during the depression years the traffic burden borne by the debtor's railroad system for the benefit of the public has steadily increased in an impressive manner in ratio to the increase of traffic on

other Class I carriers. While undoubtedly, the present high level of gross earnings may be attributed in part to war conditions, it is more largely attributable to the developments in the debtor's railroad system and connections with it, which are discussed above at pages 27 to 29 of this brief. The fact that the debtor's railroad system is carrying its share of the burden of war traffic merely helps to demonstrate that its properties represent an essential investment in the public interest. That it has a capacity to earn at least commensurate with its investment valuation as found by the Commission under Section 19a of the Interstate Commerce Act is clear beyond doubt.

If the Western Pacific Railroad System, as now constituted, did not exist, the public interest would make desirable its present construction if this were possible under existing conditions. There is no doubt that the earning power of the property today fully justifies the valuation on the investment basis found by the Commission in its 19a proceedings. The actual earnings of $4,548,138 available for interest during the calendar year 1941 and of $7,987,512 available for interest for the year from August 1, 1941 to July 31, 1942, as discussed above at pages 24 and 25 of this brief, are an adequate practical demonstration that the property has a capacity to earn commensurate with its Section 19a valuation as found by the Commission.

No reasonable ground can be found in the record before this Court to justify a refusal on the part of the Commission to allow the parties to the proceeding to agree upon a plan of capitalization acceptable to creditors and stockholders, providing the limits of such capitalization fall within the 19a valuation as found by the Commission, after application of full accrued depreciation on roadway and structures as well as on equipment.

The Commission's "realistic" construction of Section 77

The Commission in its reports leans heavily upon the word "realistic" to characterize its proposal to substitute in its Plan a limited capital structure for determinations of value and earning power. For example, in its report of October 10, 1938 (R. 244) the Commission says:

> "* * * If this reorganization is to be successful, the capital structure of the reorganized company must be *realistically* related to its actual earning power, and consideration given to the investment in its property only to the extent that such investment is justified by the probable earnings reasonably foreseeable for the future."

The Commission's basic assumption is that all the ills of the railroad industry can be cured and the credit of the railroads assured, by revising downward the capitalization of the railroads, on the basis of depression earnings, so as to foreclose the interests of investors, including secured creditors, to the end that dividends may be assured on the new common stock. To characterize any such theory as "realistic" involves a sad straining of the ordinary meaning of the word. A more doctrinaire approach to the problems of the railroad industry could hardly be conceived.

It amounts to saying that every investor in railroad property placed in the service of the public takes the risk, not merely of not receiving interest or dividends during depression periods, but also of having his entire investment cancelled and foreclosed for all time on the basis of such depression earnings or forecasts based upon such depression earnings. When an attempt was made to legislate this theory into Section 77, as an amendment in 1939 (see S. 1869 and Report of Hearings before the Special Subcommittee on Bankruptcy and Reorganization of the Committee on the Judiciary of the House), the

theory was properly rejected by the Committee on the Judiciary and the proposed amendment failed of enactment.

The sound construction of Section 77

A sounder and more realistic interpretation of Section 77, and one supported by the language of the statute, would be to hold that the legislation was intended to facilitate the reorganization of railroads in distress, under regulatory supervision of the Commission and the Courts, rather than to delegate to the Commission alone the power and the responsibility of formulating plans of reorganization under economic concepts which find little or no support in the language used by Congress.

We contend that Section 77 of the Bankruptcy Act clearly contemplates that the parties in interest, creditors and stockholders, should be given an opportunity to renegotiate and adjust their contractual relationships, which have been disturbed by the failure of the property to earn its fixed charges under depression conditions. This right to renegotiate is, admittedly, subject, under the language of Section 77 of the Bankruptcy Act, to certain definite limitations.

In the first place, the plan of reorganization submitted must be "fair and equitable"; this necessarily means, among other things, that under the rule of the *Boyd* case, as reenunciated by this Court in *Consolidated Rock Products Co.* v. *du Bois, supra,* the priority rights of secured creditors must not be impaired.

In the second place, the proposed plan of reorganization must not provide for fixed charges in excess of an amount which is fully covered by "probable prospective earnings." The Commission is expressly charged under the terms of Section 77 with regulatory authority to assure

that no plan be put into effect which violates this limitation. A reasonable corollary of this clearly expressed legislative intent (although not so clearly expressed in the language of the statute) is that income bonds provided for by a plan of reorganization should be long term, and not short term securities, so as to avoid imposing upon the property the equivalent of fixed charges and the possibility of default upon its obligations within any reasonable period in the future.

In the third place, the total capitalization contemplated by the plan of reorganization must be within the amount of capitalizable assets turned over to the new company. Section 77 of the Bankruptcy Act is quite clear in supporting the standard as to capitalization which has been applied by the Commission since 1920 in the authorization of the issue of securities under Section 20a of the Interstate Commerce Act. (See discussion as to Commission's established administrative practice at pp. 59 to 69, above.) All that the valuation provision appearing in subsection (e) of Section 77 of the Bankruptcy Act can reasonably be interpreted to mean is that the Commission is authorized to revise its 19a valuation (which is substantially on an investment basis) where basic changes in economic conditions or other circumstances have permanently reduced the earning power of the assets devoted to the public service.

Practical application of Section 77 to the situation presented in this proceeding

The parties to this proceeding did not agree upon a plan of reorganization, and unite in urging it upon the Commission. Three separate plans of reorganization, and a number of modified plans, were filed with the Commission by the parties to this proceeding. All three plans submitted by the parties contemplated the refunding in full of the secured claim of this respondent. All three of these plans were rejected by the Commission on the ground

that they contemplated capital structures which the Commission regarded as in excess of that capital structure which they deemed should be created "in the public interest."

This respondent submits that within the fair contemplation of the legislative intent of Section 77, in the light of the facts before the Court, the parties should be permitted to agree upon a fair and equitable plan of reorganization which would:

(a) fully preserve the rights of priority of all creditors;

(b) contemplate a capital structure clearly within the limitation of properly capitalizable assets as determined by the 19a valuation made by the Commission (which in view of the demonstrated earning power of the present property of the debtor should not be reduced on any theory of loss of economic usefulness for the service of the public);

(c) contemplate (as does the Commission Plan) the complete elimination of all fixed charges except to the limited extent that it may be necessary to issue obligations for new money;

(d) preserve original debt as debt, on a contingent or income basis so far as interest is concerned, and on a long maturity basis so that the ability of the enterprise to function continuously for the future shall be assured against any danger arising from possible default on either fixed interest obligations or near maturity of income obligations; and

(e) avoid any unnecessary confiscation of property rights of secured creditors (such as this respondent), general creditors or equity owners, represented by investment in property fully used and usable in the public interest.

If the parties to this proceeding are allowed to renegotiate and adjust their contractual relationships within the clearly expressed limitations imposed by Section 77 and are relieved from the unreasonable limitations of the unsound economic theories which the Commission has sought to impose upon Section 77 as a gloss, it is submitted that an agreed plan of reorganization can be worked out and made effective without loss of time. Only if the parties are free from the limitation upon total capitalization proposed by the Commission can a plan be framed which is truly "fair and equitable" within the express requirements of Section 77.

What is here proposed involves no long drawn out valuation proceeding before the Commission or in the courts. The Commission has, as disclosed in its reports in this proceeding, full data as to the investment of the debtor in its properties and as to the Commission's own valuation of the properties under Section 19a. This latter valuation excluded and disregarded a substantial part of the debtor's original investment as representing excessive construction costs (*Western Pacific Ry. Co.*, 29 I. C. C. Val. Rep. 239, I. C. C. Exhibit 104, R. 2498, unprinted record). This valuation data has been kept currently up to date by the Commission through its exercise of its regulatory powers as to the debtor's additions and betterments and its accounting. There is obviously no need in this proceeding that the Commission should substantially readjust downward, for the purpose of determining the total allowable capitalization, its prior valuations of the properties of the debtor, by giving further consideration to "earning power" as authorized by subsection (e) of Section 77. The present actual earnings of the debtor's properties are a complete and irrefutable demonstration that those properties have a "capacity to earn" fully commensurate with the Commission's prior Section 19a valuation.

POINT VI

The District Court in this case failed to exercise an informed and independent judgment in approving the Commission Plan.

The Circuit Court of Appeals for the Ninth Circuit in its opinion has pointed out (R. 2672-4) that the District Court in passing upon the Commission Plan misconstrued and improperly limited its judicial functions under Section 77 of the Bankruptcy Act. Because of the District Court's misconception of its functions no adequate review of the Commission's determinations was possible, and judicial questions affecting private rights have not been decided.

The theory of the District Court

The opinion of the District Judge discloses the premises upon which he relied in dismissing all objections and approving the plan of reorganization of the debtor which was formulated and certified by the Commission. The opinion states (R. 1596):

> "• • • The determination of the amount and character of the capitalization (a legislative function affecting the public interest) is exclusively within the province of the Commission. The only qualification, if any, is that the court shall independently determine whether, in the exercise of its jurisdiction, the Commission has acted fairly, within the bounds of the Constitution, and not arbitrarily. The determination of the questions relating to the distribution of the new securities, including legal priorities and allocations, involves private rights and is a judicial function, within the province of the court. • • •"

The District Court does not tell us by what authority this division of issues is made—"amount and character of capitalization" to the Commission, "distribution of new

securities" to the Court. The phrases themselves do not appear in Section 77, 77B or in Chapter X of the Bankruptcy Act. Subsection (e) of Section 77 expressly directs the Court to approve the plan only if satisfied that it meets the requirements of the statute, and is fair and equitable, non-discriminatory and in conformity with law.

Even as to the issue of the "distribution of the new securities," as to which the District Court accepted a judicial responsibility, the opinion of the District Court shows complete surrender to "the experience, ability and specialized knowledge" of the Commission (R. 1588), and a complete acceptance of its preliminary determination of questions relating to the distribution of the new securities (R. 1597), which was of "inestimable value to the court" and with which the Judge was "wholly in accord". Hence, "further discussion would be superfluous. Every question presented by the objections was considered and passed upon by the Commission as shown by its original and supplemental reports" (R. 1597).

Thus, it appears that, as to questions of capitalization, the District Court refused to pass judgment. As to questions of distribution, the stated acceptance of judicial responsibility was not accompanied, so far as can be spelled out from the opinion of the District Court, by more than a merely superficial review of the Commission's prior determinations.

This judicial renunciation should be compared with the standard indicated by the words of Mr. Justice Douglas in *Case* v. *Los Angeles Lumber Products Co.*, 308 U. S. 106, 115 (under 77B), where this Court rejected the contention that the approval of a plan of reorganization by the great majority of security holders relieved the reorganization court of the duty to make an independent determination as to the fairness and equity of the proposed plan. The Court said:

"* * * The contrary conclusion in such cases would make the judicial determination on the issue of fairness a mere formality and would effectively destroy the function and the duty imposed by the Congress on the district courts under § 77B. That function and duty are no less here than they are in equity receivership reorganizations, where this Court said, 'Every important determination by the court in receivership proceedings calls for an informed, independent judgment.' *National Surety Co.* v. *Coriell*, 289 U. S. 426, 436."

This principle was reaffirmed in *Consolidated Rock Products Co.* v. *du Bois*, 312 U. S. 510, at page 520.

Under these decisions and the doctrine of the *Boyd* case, questions of the amount, character and distribution of new securities must be scrutinized by the District Court, notwithstanding the prior approval of the overwhelming majority of the security holders. Can the duty of the Court be less where the determination of capital structure and the distribution ordered by the Commission, without the consent of security holders, cuts off property rights of secured creditors?

Public interest and private rights are intertwined in a reorganization proceeding. The District Judge in this proceeding, by arbitrarily excluding the most important issue from his consideration, has denied a proper judicial hearing on the plan of reorganization. This abdication of judicial power and refusal to perform the Court's duty is justified neither by logic nor by authority nor by the provisions of Section 77.

In any consideration of any plan of reorganization the question of amount and character of new capitalization is a question to be determined. It is involved in an equity receivership, in a reorganization under Section 77B or Chapter X and in a reorganization under Section 77. In any reorganization this determination affects private rights as well as the public interest. Section 77 does not withdraw the consideration of this issue from the District Court.

A Reorganization Proceeding under Section 77 is a Judicial Proceeding in Bankruptcy.

Section 77 of the Bankruptcy Act is a law on the subject of bankruptcies, enacted by Congress under its power to legislate upon that subject.

Continental Illinois National Bank & Trust Co. v. *Chicago, Rock Island & Pac. Ry. Co.*, 294 U. S. 648;
Palmer v. *Massachusetts*, 308 U. S. 79.

In *Continental Illinois National Bank & Trust Co.* v. *Chicago, Rock Island & Pac. Ry. Co., supra*, the Supreme Court held that Section 77 conferred upon the bankruptcy court jurisdiction to enjoin creditors, who held notes of the debtor railway secured by its bonds and the bonds of its subsidiaries, from selling the collateral under the power of sale in the notes, and that this grant of power was a constitutional exercise of the bankruptcy power. This decision involved the Section as enacted in 1933, prior to the 1935 amendments which added the valuation provision and made numerous other changes.

The companion Section (Section 77B, now Chapter X of the Bankruptcy Act), has also been held valid as an exercise of the bankruptcy power.

Kuehner v. *Irving Trust Co.*, 299 U. S. 445;
Campbell v. *Alleghany Corporation*, 75 F. (2d) 947; certiorari denied, 296 U. S. 581.

An order confirming a plan of reorganization under Section 77B is an order in a "proceeding in bankruptcy" (*Meyer* v. *Kenmore Hotel Co.*, 297 U. S. 160).

A reorganization proceeding under Section 77 must be initiated by a petition filed with the District Court and approved by the judge. Thereupon, by the express

provisions of subsection (a), the Court is vested with "exclusive jurisdiction of the debtor and its property wherever located, and shall have and may exercise in addition to the powers conferred by this section all the powers, not inconsistent with this section, which a Federal court would have had if it had appointed a receiver in equity of the property of the debtor for any purpose."

Subject only to express provisions of the statute, the powers and duties of the court in a reorganization proceeding under Section 77 are the same as the powers and duties of the bankruptcy court in an ordinary bankruptcy proceeding. It is so provided in subsection (l) of Section 77:

> "In proceedings under this section and consistent with the provisions thereof, the jurisdiction and powers of the court, the duties of the debtor and the rights and liabilities of creditors, and of all persons with respect to the debtor and its property, shall be the same as if a voluntary petition for adjudication had been filed and a decree of adjudication had been entered on the day when the debtor's petition was filed."

Section 77 Does Not Curtail the Judicial Powers of the Bankruptcy Court.

The statute does not attempt to subject the District Court to the power and control of the Commission, or to make the Court a reviewing body or to confer upon the Commission the judicial powers of a bankruptcy court (*In re New York, N. H. & H. R. Co.*, 16 F. Supp. 504).

Under the statute only the judge may dismiss the proceedings upon the filing of the original petition, after approval of a plan by the Commission, or after certification of a plan by the Commission. While no plan shall be approved or confirmed by the Court unless it has first been approved by the Commission, the order of the Commission approving a plan is merely a jurisdictional prerequisite and is of

no force and effect unless and until the plan has received the independent approval of the Court after a judicial hearing upon the objections and claims of the parties (*In re New York, N. H. & H. R. Co., supra*).

No plan of reorganization may be submitted to the vote of creditors and stockholders by the Commission unless such plan has received the independent approval of the judge, and the judge must be satisfied as to the results of the submission to creditors and stockholders found by the Commission. A finding of the Commission that submission to any class of creditors or stockholders is not necessary is without force unless affirmed by the judge. The determination whether the rights of creditors and stockholders who refuse to accept the plan are adequately protected is left to the judge. Final confirmation of a plan is left to the judge.

Throughout the statute it is abundantly clear that a proceeding in bankruptcy, a judicial proceeding, is contemplated; and the adjudication and protection of private rights is at every point left to the court.

True, by the provisions of Section 77, Congress has delegated to the Commission primarily the duty of determining certain matters. Among these are the following: (1) the ratification of the appointment of trustees for the debtor [subsection (c) (1)]; (2) the fixing of maximum limits for expenses and fees to be paid by the debtor's estate [subsection (c) (2) and (12)]; (3) the determination of the value of any property of the debtor for any purpose under Section 77 if it shall be necessary to determine such value [subsection (e)]; and (4) whether the plan of reorganization will be compatible with the public interest [subsection (d)]. Only the third and fourth questions mentioned are in issue before this Court.

To the Commission primarily are referred issues affecting the public interest (not "determination of the extent and character of the capitalization"), but these issues also

affect private rights. As to private rights, the Commission's findings and conclusions are preliminary and advisory. Similarly, the court may deal in a preliminary way with questions affecting the public interest. In authorizing the abandonment or sale of lines or portions of lines under subsection (o), the Court makes a preliminary determination of public interest, subject to the subsequent approval of the Commission. Also, in paragraph (6) of subsection (c), during the administration, the judge may decree, after hearing, that would be "contrary to the public interest" for a lessor of the debtor to operate a leased line, in which case the Commission is given full authority in abandonment proceedings.

Cooperation and coordination are necessary for a successful reorganization, but this does not justify a refusal by the court to perform its duties.

The determination by the Commission, that the plan approved by it is compatible with the public interest, does not indicate that no other plan would be compatible with the public interest and does not require the Court to approve the plan certified by the Commission without a critical examination and determination of judicial questions affecting private rights. Another plan may be framed which will adequately protect private rights and be compatible with the public interest. Section 77 does not purport to make the findings of the Commission conclusive upon the Court.

The Commission's Determinations Are Not Binding on the District Court.

Even if we should concede that the determination, whether a plan of reorganization of the debtor railroad is compatible with the public interest, has been referred by Congress to the Commission exclusively, a finding of the Commission upon this question is subject to review by the District Court and upon this appeal if such a

finding is made arbitrarily or without support in the evidence, or if it results in the confiscation of private property rights.

St. Joseph Stock Yards Co. v. *United States,* 298 U. S. 38;
Baltimore & Ohio R. Co. v. *United States,* 298 U. S. 349;
Crowell v. *Benson,* 285 U. S. 22.

When the issue is whether the findings of the Commission result in the confiscation of private property rights, the Court is not bound to accept those findings even though supported by substantial evidence. Upon this issue the Court must weigh the evidence and determine the facts independently.

In *St. Joseph Stock Yards Co.* v. *United States,* 298 U. S. 38, this Court said (pp. 49-50, 52):

> "A preliminary question is presented by the contention that the District Court, in the presence of this issue [confiscation], failed to exercise its independent judgment upon the facts [citing cases]. The District Court thought that the question was still an open one under the Packers and Stockyards Act, and expressed the view that, even though the issue is one of confiscation, the Court is bound to accept the findings of the Secretary if they are supported by substantial evidence and that it is not within the judicial province to weigh the evidence and pass upon the issues of fact. The Government points out that, notwithstanding what was said by the court upon this point, the court carefully analyzed the evidence, made many specific findings of its own, and in addition adopted, with certain exceptions, the findings of the Secretary. * * * Hence, the Government says that the decree should be affirmed irrespective of possible error in the reasoning of the District Court. * * *
>
> * * * * * * *

> "* * * But to say that their findings of fact may be made conclusive where constitutional rights of liberty and property are involved, although the evidence clearly establishes that the findings are wrong and constitutional rights have been invaded, is to place those rights at the mercy of administrative officials and seriously to impair the security inherent in our judicial safeguards. * * * The principle applies when rights either of person or of property are protected by constitutional restrictions. Under our system there is no warrant for the view that the judicial power of a competent court can be circumscribed by any legislative arrangement designed to give effect to administrative action going beyond the limits of constitutional authority. This is the purport of the decisions above cited with respect to the exercise of an independent judicial judgment upon the facts where confiscation is alleged. The question under the Packers and Stockyards Act is not different from that arising under any other act, and we see no reason why those decisions should be overruled."

And in *Baltimore & Ohio R. Co.* v. *United States*, 298 U. S. 349, 368-369, the Court said:

> "* * * when he [the owner of private property] appropriately invokes the just compensation clause, he is entitled to a judicial determination of the amount. The due process clause assures a full hearing before the court or other tribunal empowered to perform the judicial function involved. That includes the right to introduce evidence and have judicial findings based upon it."

In *Crowell* v. *Benson*, 285 U. S. 22, where the Court even required a trial *de novo* on jurisdictional facts, the Court said (p. 60):

> "In cases brought to enforce constitutional rights, the judicial power of the United States necessarily extends to the independent determination of all questions, both of fact and law, necessary to the performance of that supreme function. The case of confiscation is illustrative, the ultimate conclusion almost invariably depending upon the decisions of

> questions of fact. This court has held the owner to be entitled to 'a fair opportunity for submitting that issue to a judicial tribunal for determination upon its own independent judgment as to both law and facts.' *Ohio Valley Water Co.* v. *Ben Avon Borough, supra.* * * *"

Moreover, if the Commission in making an administrative determination has committed an error of law or foreclosed determination by the Court of questions of private rights, the error of the Commission must be corrected by the courts. The Court must make an independent determination of challenged questions of law which are involved in administrative determinations and, if necessary, must examine the entire record, including the evidence (*St. Joseph Stock Yards Co.* v. *United States*, 298 U. S. 38, at page 74). The Court's reversal of the Commission upon a question of law will be binding on the Commission but will not prevent it from enforcing the legislative policy committed to its charge, within the limits of the law as declared by the courts.

> *Federal Communications Commission* v. *Pottsville Broadcasting Co.*, 309 U. S. 134;
> *Federal Power Commission* v. *Pacific Co.*, 307 U. S. 156.

The powers of the district courts under Section 77 were discussed by Mr. Justice Frankfurter in *Palmer* v. *Massachusetts*, 308 U. S. 79, in considering whether the statute confers upon the district courts power to authorize the abandonment by the debtor's trustees of local passenger stations without securing the approval of state agencies. He stated that the provision of Section 77(a) giving the District Court "exclusive jurisdiction of the debtor and its property wherever located" and other general provisions, were doubtless sufficient "to confer upon the district courts power appropriate for adjusting

property rights in the railroad debtor's estate and, as to such rights, beyond that in ordinary bankruptcy proceedings." He stated further: "The judicial process in bankruptcy proceedings under § 77 is, as it were, brigaded with the administrative process of the Commission"; and "the authority of the court is intertwined with that of the Commission."

Mr. Justice Reed has stressed cooperation:

> "* * * The judicial functions of the bankruptcy court and the administrative functions of the Commission work cooperatively in reorganizations. * * *" (*Warren* v. *Palmer*, 310 U. S. 132, 138)

In these statements one finds no indication that the District Court in approving a plan of reorganization is merely reviewing determinations of the Commission.

Both Court and Commission Must Perform Their Functions.

Section 77 contemplates and requires cooperation and coordinated action by the Commission and the District Court in bringing about a reorganization. The Commission must perform its administrative and quasi-judicial functions. The extent of the Commission's jurisdiction and the scope of its powers in this proceeding are fixed by the statute, and Commission action in excess of the authority conferred by the statute is always subject to review and control by the courts (*Federal Radio Commission* v. *Nelson Bros. Bond & Mortgage Co.*, 289 U. S. 266). The Commission's violation of law and failure to proceed according to law are discussed elsewhere in this brief. At this point we urge that the District Court failed to perform its proper functions as a court of bankruptcy, and that such failure is contrary to law and vitiates and nullifies the whole proceeding (*Case* v. *Los Angeles Lumber Products Co.*, 308 U. S. 106; *Gross* v. *Irving Trust Co.*, 289 U. S. 342).

Review of mere administrative orders distinguished

The petitioners would apply to this reorganization proceeding principles and rules applicable to the review of Commission action as to rates, service regulations and similar administrative matters. In rate making, service regulation and the like, the Commission is a legislative or policy making body and its determinations and conclusions are binding if they are within the power conferred by Congress and are supported by evidence. This well settled proposition is supported by many decisions of this Court, including the following:

Terminal R. R. Assn. v. *United States*, 266 U. S. 17;
United States v. *Louisiana*, 290 U. S. 70;
United States v. *Illinois Central R. Co.*, 291 U. S. 457;
Atlanta, Birmingham & Coast R. Co. v. *United States*, 296 U. S. 33;
Manufacturers Ry. Co. v. *United States*, 246 U. S. 457.

When the Commission exercises the legislative or discretionary authority conferred by Congress, it is concerned "not so much with past situations as with future adjustments" and its determinations "are clothed with a high degree of finality." (SHARFMAN, *The Interstate Commerce Commission*, Vols. I, p. 7; II p. 357). Even under Section 20a of the Interstate Commerce Act, however, "The initiation of financial policies was left undisturbed in the hands of the carriers"; and the holding of hearings was optional (*Ibid.*, Vol. I, p. 191).

But the quasi-judicial acts of the Commission under Section 77 of the Bankruptcy Act deal directly with private rights. Hence, they do not possess "the high degree of

finality" of mere administrative determinations under the Interstate Commerce Act (REMINGTON ON BANKRUPTCY, Section 4326). It is for this reason that Section 77 has not taken over the statutory provisions which govern the review of regulatory action under the Interstate Commerce Act.

Review of the Commission's administrative orders is governed by the Urgent Deficiencies Act of October 22, 1913, and must be heard by a statutory three judge court (38 Stat. 208, 220, 28 U. S. C. A. § 47). Thereafter a direct appeal to the Supreme Court lies under Section 210 of the Judicial Code (28 U. S. C. A. § 47a). Appeals in bankruptcy, however are taken to the Circuit Court of Appeals and are governed by Section 24 of the Bankruptcy Act (11 U. S. C. A. § 47).

To label the actions of the Commission under Section 77 as "legislative" and in the "public interest" by pointing to its characteristic administrative functions under Section 20a of the Interstate Commerce Act (as has been attempted by the petitioners) is to conceal the Commission's quasi-judicial powers. "The fact is that the Interstate Commerce Commission is a legislative agency or an administrative agency or a quasi-judicial agency depending upon what part of its particular job one happens to be looking at. It has all three attributes simultaneously, or perhaps it would be more accurate to say that it exhibits them successively at different stages of its activity." (CUSHMAN, *The Constitutional Status of the Independent Regulatory Commissions*, 24 Cornell Law Quarterly 13, 47; see also *Ibid.*, 49).

While the District Court should not usurp "merely administrative functions" of the Commission, or substitute its judgment as to the wisdom or expediency of the Commission's administrative action, "the essence of judicial authority may not be curtailed" or "avoided" by the Court (*Interstate Commerce Commission* v. *Illinois Central R. Co.*, 215 U. S. 452, 470).

Summary

In approving the plan of reorganization the District Court doubted its power to pass upon the Commission's legislative determinations even if arbitrary or confiscatory. The Court completely overlooked the Commission's failure to act upon the basis of adequate data and make precise findings as to the basic factors of value and earning capacity (Point I, above). But the District Court also misinterpreted Section 77 and misconstrued its own functions and duties under that section and the law of the land. Even without an express statutory command, the Court must pass independent judgment upon challenged questions of law which are involved in or imbedded in administrative determinations of the Commission. Furthermore, by the express mandate of Section 77, the District Court must, as a condition of approving the plan of reorganization, be satisfied that the plan is fair and equitable and non-discriminatory, and that it gives due recognition to the rights of each class of creditors. Although the District Court may not control the Commission's determination whether the plan is "compatible with the public interest," except where the administrative action is capricious, arbitrary or confiscatory, or not supported by adequate data and findings, the Commission's determination of the public interest does not relieve the District Court of its duty under the statute to protect private rights (*Palmer* v. *Massachusetts*, 308 U. S. 79), and to determine whether the plan is fair and equitable and non-discriminatory as to bondholders, creditors and stockholders.

Congress did not, by the enactment of Section 77, "withdraw from the courts control over insolvent railroads and lodge it with the Interstate Commerce Commission." (*Palmer* v. *Massachusetts*, 308 U. S. 79, 87)

The District Court misinterpreted the statute and failed and refused to perform its judicial functions and thereby committed reversible errors of law.

POINT VII

Preferential treatment given the claim of the Reconstruction Finance Corporation under the Commission Plan is unsupported by necessary administrative or judicial findings and cannot be justified under the facts of this case.

In the Commission Plan it is provided that the Reconstruction Finance Corporation shall "receive for the secured notes of the debtor held by it, treatment equal to that accorded to the holders of the debtor's existing first-mortgage bonds" (R. 312). The Commission states that this preferential treatment of the government Corporation's secured claim is in consideration of the purchase by that Corporation of the $10,000,000 of new first mortgage four per cent bonds which are authorized for the purpose of raising the new money said to be needed to effect the reorganization, and in consideration of the value of the collateral securing the claim. No adequate finding of the value of the collateral is made.

Thus, the Commission Plan proposes that the Reconstruction Finance Corporation shall receive a substantial underwriting fee if it elects to take this $10,000,000 of new first lien bonds upon most favorable terms, without a finding as to the value of the new bonds and without reference to the marketability of the bonds at par. Its secured claim is to be advanced to a preferred position ahead of the secured claim of The Railroad Credit Corporation and far superior to the secured claim of A. C. James Co., which is to be funded only in part.

No provision is made for a public offering of the new first mortgage bonds though considerations of equity and law require such an offering and only in the event that no other purchaser is found should the government Corporation receive an underwriting fee. And yet the pro-

posed purchase of the new bonds by the Reconstruction Finance Corporation is subject to future approval thereof by the Commission.

The preferential treatment accorded to Reconstruction Finance Corporation, by funding its secured claim in full in the same kind of securities allocated to First Mortgage bondholders, while the secured claim of The Railroad Credit Corporation does not receive comparable treatment, and more than half of the secured claim of A. C. James Co. is cut off entirely, is a clear violation of the doctrine of priorities reaffirmed by this Court in *Case* v. *Los Angeles Lumber Products Co.*, 308 U. S. 106.

In *Case* v. *Los Angeles Lumber Products Co., supra,* this Court held that stockholders could not participate in the reorganization of an insolvent corporation upon the basis of the tenuous considerations alleged. The Court said (308 U. S. at p. 122):

> "In view of these considerations we believe that to accord 'the creditor his full right of priority against the corporate assets' where the debtor is insolvent, the stockholder's participation must be based on a contribution in money or in money's worth, reasonably equivalent in view of all the circumstances to the participation of the stockholder."

In the light of this principle the preferential treatment accorded to Reconstruction Finance Corporation cannot be justified. It is not "based on a contribution in money or in money's worth" which is reasonably equivalent to the reward conferred. No provision is made for a public offering of the new first mortgage bonds; no finding was made as to the fair value of these bonds or that they could not be sold at par or better.

Under the *Los Angeles* case the Court had ample power and discretion to make the needed finding as to "money's worth" and equivalency but there is no finding and no evidence that the value to the debtor's estate of the pro-

posed purchase of bonds by Reconstruction Finance Corporation is "reasonably equivalent in view of all the circumstances" to the value of the preference accorded to that Corporation.

Furthermore, the reward and preference which the Commission Plan contemplates for the Reconstruction Finance Corporation is in violation of the provisions of the Reconstruction Finance Corporation Act and Emergency Relief and Construction Act of 1932 (15 U. S. C. A., chap. 14, § 605), which authorizes loans to railroads engaged in interstate commerce only when such railroads are "unable to obtain funds through banking channels or from the general public." The section provides further:

> "* * * *Provided*, That no fee or commission shall be paid by any applicant for a loan under the provisions hereof in connection with any such application or any loan made or to be made hereunder, and the agreement to pay or payment of any such fee or commission shall be unlawful. * * *"

In addition to the above objections, it is now obvious that since the trustees of the debtor's properties now hold cash in an amount in excess of the total amount due on the Trustees' Certificates outstanding (see brief of Institutional Bondholders, p. 110), and this cash holding is rapidly increasing, it is at least doubtful that there is need for the issue of the proposed new first mortgage bonds in that amount to furnish new money "needed" for the purposes of the reorganization.

The preference is unfair, inequitable, discriminatory and contrary to law.

POINT VIII

The General and Refunding Mortgage is a first lien upon assets of the debtor sufficient in value to cover fully the claims of the three secured creditors, including this respondent.

The unfair and discriminatory treatment of A. C. James Co. and The Railroad Credit Corporation in relation to First Mortgage bondholders and Reconstruction Finance Corporation results principally from the Commission's drastic limitation upon capitalization and its failure to recognize and give legal effect in the plan of reorganization to the value of the debtor's property. The value of the property of the debtor on the basis of "earning power" and other relevant factors, we contend, is more than sufficient to provide fully for the claims of all secured creditors.

This unfair and discriminatory treatment also results from erroneous determinations of the Commission and Court as to the priority and coverage of the debtor's General and Refunding Mortgage. A. C. James Co. contends that the assets of the debtor upon which the General and Refunding Mortgage constitutes a prior lien, when taken with the assets upon which such mortgage constitutes a lien subject only to the First Mortgage of the debtor, are sufficient to cover fully the secured claims of Reconstruction Finance Corporation, The Railroad Credit Corporation and A. C. James Co., and hence, that all three of these secured creditors should receive treatment as favorable as that accorded to First Mortgage bondholders.

In support of its contention as to the coverage and priority of the debtor's General and Refunding Mortgage and the adequacy of the security held by it thereunder, A. C. James Co. adopts and relies upon the brief and argument submitted on behalf of the Irving Trust Company of New York, Trustee under the debtor's General and Refunding Mortgage.

IN CONCLUSION

At pages 4 to 9 of this brief there are set forth some of the reasons why it is desirable that this Court, in the interests of substantial justice, fully consider and definitely dispose of the broad issues as to the construction of Section 77 of the Bankruptcy Act which arise in this proceeding.

To this respondent it seems entirely clear, on the record before this Court, that the Circuit Court of Appeals for the Ninth Circuit correctly decided the issues which it considered, and should be affirmed. There are, however, weighty considerations, both of private interest and of public interest, which render it desirable, and almost essential in the interests of substantial justice, that this Court at this time consider broadly the construction of Section 77 of the Bankruptcy Act in its application to the facts before it in this proceeding.

Section 77 has by no means accomplished, in this proceeding or in other similar proceedings, the objectives sought by Congress. It has not, in practical operation, facilitated and speeded up the reorganization of those railroads which found themselves unable to meet their fixed charges, as a result of the enormous shrinkage in traffic which followed the 1929 collapse. It has not proved itself to be better machinery for reorganization than the old equity proceedings.

This failure to accomplish the legislative purposes is not due to any inherent defect in Section 77. The difficulties in administering Section 77 have clearly resulted from an attempted administrative distortion of the clear language of the statute. An unrealistic and doctrinaire distortion of the statute has resulted from an attempt to read into the statute economic and political theories which were not within the contemplation of Congress and have no practical justification. Only such a distortion of the language

of Section 77 can explain (but not justify) the result reached in this proceeding, where the Commission's theory led it to confiscate the larger part of the claim of a secured creditor (this respondent) without any such finding of the value of the debtor's property as would justify such confiscation.

The errors which the Circuit Court of Appeals found in the proceedings below were due to basic errors in the construction of Section 77 of the Bankruptcy Act. These errors were in no sense due to an inadvertent administration of the statute; they root back into a basic misconstruction of the legislative mandate which was embodied in Section 77.

Only if the statute is given finality at this time by a clear and comprehensive construction of the legislative intent embodied in Section 77 of the Bankruptcy Act, and its appropriate application to this proceeding, can the substantial interests of the parties to this proceeding be protected and the public interest conserved.

WHEREFORE, this respondent prays this Court that it dispose of all substantial issues raised before it in this proceeding, and, on the basis of its construction of Section 77, and its disposition of the substantial issues herein raised, that it affirm the decision of the Circuit Court of Appeals for the Ninth Circuit here under review.

Respectfully submitted,

ROBERT E. COULSON,
Attorney for A. C. James Co.

HORACE E. WHITESIDE,
of Counsel.

October 3, 1942.

APPENDIX.

Section 77 of the Bankruptcy Act (47 Stat. 1474 as amended by 49 Stat. 911, 49 Stat. 1969 and 53 Stat. 1406; 11 U. S. C. A. §205).

SEC. 77. REORGANIZATION OF RAILROADS ENGAGED IN INTERSTATE COMMERCE.—(a) Any railroad corporation may file a petition stating that it is insolvent or unable to meet its debts as they mature and that it desires to effect a plan of reorganization. The petition shall be filed with the court in whose territorial jurisdiction such corporation, during the preceding six months or the greater portion thereof, has had its principal executive or operating office, and a copy of the petition shall at the same time be filed with the Interstate Commerce Commission (hereinafter called the "Commission"): *Provided,* That when any railroad, although engaged in interstate commerce, lies wholly within one State, such proceedings shall be brought in the Federal district court of the district in which its principal operating office in such State during the preceding six months or the greater portion thereof has been located. The petition shall be accompanied by payment to the clerk of a filing fee of $100, which shall be in addition to the fees required to be collected by the clerk under other sections of this Act. Upon the filing of such a petition, the judge shall enter an order either approving it as properly filed under this section, if satisfied that such petition complies with this section and has been filed in good faith, or dismissing it, if he is not so satisfied. If the petition is so approved, the court in which such order is entered shall, during the pendency of the proceedings under this section and for the purposes thereof, have exclusive jurisdiction of the debtor and its property wherever located, and shall have and may exercise in addition to the powers conferred by this section all the powers, not inconsistent with

this section, which a Federal court would have had if it had appointed a receiver in equity of the property of the debtor for any purpose. Process of the court shall extend to and be valid when served in any judicial district. The Supreme Court of the United States shall promulgate rules relating to the service of process outside of the district in which the proceeding is pending, and any other rules which it may deem advisable in order to aid district courts and circuit courts of appeal in exercising the jurisdiction herein conferred upon them. The railroad corporation shall be referred to in the proceedings as a "debtor." Any railroad corporation the majority of the capital stock of which having power to vote for the election of directors is owned, either directly or indirectly through an intervening medium, by any railroad corporation filing a petition as a debtor may file, with the court in which such other debtor has filed such a petition, and in the same proceeding, a petition, a copy of which shall also be filed at the same time with the Commission, stating that it is insolvent or unable to meet its debts as they mature, and that it desires to effect a reorganization in connection with, or as a part of the plan of reorganization of such other debtor; and upon the filing of such petition, the judge shall enter an order either approving it as properly filed under this section, if satisfied that such petition complies with this section and has been filed in good faith, or dismissing it if not so satisfied, and thereupon such court, if it approves such petition, shall have the same jurisdiction with respect to such debtor, its property and its creditors and stockholders, as the court has with respect to such other debtor. Creditors of any railroad corporation, having claims aggregating not less than 5 per centum of all the indebtedness of such corporation as shown in the latest annual report which it has filed with the Commission at the time when the petition is filed, may, if such corporation has not filed a petition under this sec-

tion, file with the court in which such corporation might file a petition under this section, a petition stating that such corporation is insolvent or unable to meet its debts as they mature and that such creditors have claims aggregating not less than 5 per centum of all such indebtedness of such corporation and propose that it shall effect a reorganization; copies of such petition shall be filed at the same time with the Commission and served upon such corporation. Such corporation shall, within ten days after such service, answer such petition. If such answer shall admit the jurisdiction of the court and the material allegations of the petition, the judge shall enter an order approving the petition as properly filed if satisfied that it complies with this section and has been filed in good faith, or dismissing it, if not so satisfied. If such answer shall deny either the jurisdiction of the court or any material allegation of the petition the judge shall summarily determine the issues presented by the pleadings without the intervention of a jury and if he shall find that the material allegations are sustained by the proofs and that the petition complies with this section and has been filed in good faith, the judge shall enter an order approving the petition; otherwise he shall dismiss the petition. If any such petition shall be so approved, the proceedings thereon shall continue with like effect as if the railroad corporation had itself filed a petition under this section. In case any petition shall be dismissed, neither the petition nor the answer of a debtor shall constitute an act of bankruptcy or an admission of insolvency or of inability to meet maturing obligations or be admissible in evidence, without the debtor's consent, in any proceedings then or thereafter pending or commenced under this Act or in any State or Federal court. If, in any case in which the issues have not already been tried under the provisions of this subdivision, any of the creditors shall, prior to the hearing provided for in paragraph (1) of subsection (c) of this section, appear

and controvert the facts alleged in the petition, the judge shall determine, as soon as may be, the issues presented by the pleadings, without the intervention of a jury, and, unless the material allegations of the petition are sustained by the proofs, shall dismiss the petition.

(b) A plan of reorganization within the meaning of this section (1) shall include provisions modifying or altering the rights of creditors generally, or of any class of them, secured or unsecured, either through the issuance of new securities of any character or otherwise; (2) may include provisions modifying or altering the rights of stockholders generally, or of any class of them, either through the issuance of new securities of any character, or otherwise; (3) may include, for the purpose of preserving such interests of creditors and stockholders as are not otherwise provided for, provisions for the issuance to any such creditor or stockholder of options or warrants to receive, or to subscribe for, securities of the reorganized company in such amounts and upon such terms and conditions as may be set forth in the plan; (4) shall provide for fixed charges (including fixed interest on funded debt, interest on unfunded debt, amortization of discount on funded debt, and rent for leased railroads) in such an amount that, after due consideration of the probable prospective earnings of the property in light of its earnings experience and all other relevant facts, there shall be adequate coverage of such fixed charges by the probable earnings available for the payment thereof; (5) shall provide adequate means for the execution of the plan, which may include the transfer of any interest in or control of all or any part of the property of the debtor to another corporation or corporations, the merger or consolidation of the debtor with another corporation or corporations, the retention of all or any part of the property by the debtor, the sale of all or any part of the property of the debtor either subject to or free from any lien

at not less than a fair upset price, the distribution of all or any assets, or the proceeds derived from the sale thereof, among those having an interest therein, the satisfaction or modification of any liens, indentures, or other similar interests, the curing or waiver of defaults, the extension of maturity dates of outstanding securities, the reduction in principal and/or rate of interest and alteration of other terms of such securities, the amendment of the charter of the debtor, and/or the issuance of securities of either the debtor or any such other corporation or corporations for cash, or in exchange for existing securities, or in satisfaction of claims or rights or for other appropriate purposes; and may deal with all or any part of the property of the debtor; may reject contracts of the debtor which are executory in whole or in part, including unexpired leases; and may include any other appropriate provisions not inconsistent with this section.

The adoption of an executory contract or unexpired lease by the trustee or trustees of a debtor shall not preclude a rejection of such contract or lease in a plan of reorganization approved hereunder, and any claim resulting from such rejection shall not have priority over any other claims against the debtor, because such contract or lease had been previously adopted. The term "securities" shall include evidences of indebtedness either secured or unsecured, bonds, stock, certificates of beneficial interest therein, certificates of beneficial interest in property, options, and warrants to receive, or to subscribe for, securities. The term "stockholders" shall include the holders of voting-trust certificates. The term "creditors" shall include, for all purposes of this section all holders of claims of whatever character against the debtor or its property, whether or not such claims would otherwise constitute provable claims under this Act, including the holder of a claim under a contract executory in whole or in part including an unexpired lease.

The term "claims" includes debts, whether liquidated or unliquidated, securities (other than stock and option warrants to subscribe to stock), liens, or other interests of whatever character. For all purposes of this section unsecured claims, which would have been entitled to priority if a receiver in equity of the property of the debtor had been appointed by a Federal court on the day of the approval of the petition, shall be entitled to such priority and the holders of such claims shall be treated as a separate class or classes of creditors. In case an executory contract or unexpired lease of property shall be rejected, or shall not have been adopted by a trustee appointed under this section, or shall have been rejected by a receiver in equity in a proceeding pending prior to the institution of a proceeding under this section, or shall be rejected by any plan, any person injured by such nonadoption or rejection shall for all purposes of this section be deemed to be a creditor of the debtor to the extent of the actual damage or injury determined in accordance with principles obtaining in equity proceedings. The provisions of section 60 of this Act shall apply to a proceeding under this section. For all purposes of this section any creditor or stockholder may act in person or by an attorney at law or by a duly authorized agent or committee subject to the provisions of subsection (p) hereof. The running of all statutes of limitation shall be suspended during the pendency of a proceeding under this section.

(c) After approving the petition:

(1) The judge shall forthwith (and in pending proceedings immediately upon the effective date of this amendatory section) require the debtor to give such notice as the order may direct to the mortgage trustees, creditors and stockholders, and to cause publication thereof for such period and in such newspapers as the judge may direct, of a hearing to be held not later than thirty days

after the date of such order, at which hearing or any adjournment thereof the judge shall appoint one or more trustees of the debtor's property. Such appointments shall become effective upon ratification thereof by the Commission without a hearing, unless the Commission shall deem a hearing necessary. Where a trustee is appointed who within one year prior thereto has been an officer, director, or employee of the debtor corporation, any subsidiary corporation, or any holding company connected therewith, the judge, subject to ratification by the Commission as herein provided, shall appoint another trustee or trustees who shall not have had any such affiliations: *Provided*, That the appointment of such additional trustee or trustees shall not be required for a debtor the annual operating revenues of which were less than $1,000,000 for the previous calendar year.

(2) The judge shall fix the amount of the bond of every trustee. He may thereafter terminate any such appointments on cause shown, and may in that event and in the event of a vacancy from any other cause, in the manner and within the qualifications herein provided for the appointment of trustees, appoint a substitute trustee or trustees, and in the same manner and within the same qualifications may appoint an additional trustee, and shall fix the amount of the bond of every such substitute or additional trustee or trustees. The judge shall in his discretion confirm the appointment of such legal counsel for the trustees as they shall select, with power of removal. The trustee or trustees and their counsel shall receive only such compensation from the estate of the debtor as the judge may from time to time allow within such maximum limits as may be approved by the Commission as reasonable. The trustee or trustees so appointed, upon filing such bond, shall have all the title and shall exercise, subject to the control of the judge and consistently with the provisions of this section, all of the powers of a trustee

appointed pursuant to section 44 of this Act or any other section of this Act, and, to the extent not inconsistent with this section, if authorized by the judge, the powers of a receiver in an equity proceeding, and, subject to the control of the judge and the jurisdiction of the Commission as provided by the Interstate Commerce Act as now or hereafter amended, the power to operate the business of the debtor. Prior to the appointment of a trustee, the debtor on behalf of the court shall continue in the possession of the property and shall operate the business thereof during such period, and shall have all the title to the property and shall exercise all power consistent with the provisions of this section, subject at all times to the control of the judge, and to such limitations, restrictions, terms, and conditions as he may from time to time impose and prescribe.

(3) The judge may, upon not less than fifteen days' notice published in such manner and in such newspapers as the judge may in his discretion determine, which notice so determined shall be sufficient, for cause shown, and with the approval of the Commission, in accordance with section 20 (a) of the Interstate Commerce Act, as now or hereafter amended, authorize the trustee or trustees to issue certificates for cash, property, or other consideration approved by the judge, for such lawful purposes and upon such terms and conditions and with such security and such priority in payments over existing obligations, secured or unsecured, or receivership charges, as might in an equity receivership be lawful.

(4) The judge shall require the officers of the debtor or the trustee or trustees, at such time or times as the judge may direct, and in lieu of the schedules required by section 7 of this Act, to file with the court such schedules and submit such other information as may be necessary to disclose the conduct of the debtor's affairs and the fair-

ness of any proposed plan; and shall direct the officers of the debtor, or the trustee or trustees, within such time as the judge shall set, to prepare and file with the court a list of all known bondholders and creditors of the debtor, and the amounts and character of their debts, claims, and securities, and the last known post-office address or place of business of each bondholder and creditor, and a list of all known stockholders of the debtor, with the last known post-office address or place of business of each, which lists the judge may require to be brought down to date at any time. The contents of such lists shall not constitute admissions by the debtor or the trustees in a proceeding under this section or otherwise.

(5) [Securing information as to holders of securities.]

* * * * * * * *

(6) [Rejection of leases.]

* * * * * * * *

(7) The judge shall promptly determine and fix a reasonable time within which the claims of creditors may be filed or evidenced and after which no claim not so filed or evidenced may participate except on order for cause shown; the manner in which such claims may be filed or evidenced and allowed, and for the purposes of the plan and its acceptance, after notice and hearing, the division of creditors and stockholders into classes according to the nature of their respective claims and interests. Such division shall not provide for separate classification unless there be substantial differences in priorities, claims, or interests. The trustee or trustees under any mortgage, deed of trust, or indenture outstanding against the property may, within the time prescribed, file a verified claim in behalf of all bonds or securities outstanding under such mortgage, deed of trust, or indenture, in which event it shall be unnecessary for the holders of such bonds or

securities to file claims in their own behalf, but nothing herein shall constitute such trustee or trustees the representative or representatives of such holders for the purpose of accepting or rejecting any plan of reorganization.

(8) The judge shall cause reasonable notice of the period in which claims may be filed, of hearings on application for the dismissal of the proceedings, or for the final allowance of fees or expenses to be given creditors and stockholders by publication or otherwise.

(9) [Reports of fraud, etc.]

* * * * * * * * * * *

(10) The judge may direct the debtor or the trustee or trustees to keep such records and accounts, in addition to the accounts prescribed by the Commission, as will permit of such a segregation and allocation, as the necessities of the case may require, of the earnings and expenses between and to the divisions and parts of the railroad or other property of the debtor which are separately subject to the liens of the various mortgages or deeds of trust, or are separately subject to lease, and may refer to the Commission for its recommendations after hearings thereon if the parties shall so request and/or the Commission determine necessary or desirable, as to the method or formula by which such segregation and allocation shall be made; and thereafter such segregation and allocation may be made at the expense of the debtor's estate.

(11) The Commission may direct such of its agencies as it may designate to file in the proceedings before the Commission a report, and additional or supplemental reports at such time or times as the Commission shall designate, of such data with reference to the property, business, earnings, and corporate organization of the debtor and such other facts as the Commission, after hearing if it deems necessary, shall determine to be necessary or help-

ful information for the purposes of the preparation of reorganization plans, and for the purpose of aiding in determining the method or formula of allocating earnings permitted by subdivision (10) of this subsection (c). Such report or reports shall be prima facie evidence of the facts therein stated in any proceeding under this section. The actual cost of preparing said report or reports shall be certified by the Commission and shall be borne by the debtor's estate.

(12) [Allowances.]

* * * * * * * * * * *

(13) The judge may on his own motion or at the request of the Commission refer any matters for consideration and report, either generally or upon specified issues, to one of several special masters who shall have been previously designated to act as special masters in any proceedings under this section by order of any circuit court of appeals and may allow such master a reasonable compensation for his services and actual and reasonable expenses. The circuit court of appeals of each circuit shall designate three or more members of the bar as such special masters whom they deem qualified for such services, and shall from time to time revise such designations by changing the persons designated or their number, as the public interest may require: *Provided, however,* That there shall always be three of such special masters qualified for appointment in each circuit who shall hear any matter referred to them under this section by a judge of any district court. The debtor, any creditor or stockholder, or the duly authorized committee, attorney or agent of either or the trustee or trustees of any mortgage, deed of trust or indenture pursuant to which securities of the debtor are outstanding, shall have the right to be heard on all questions arising in the proceedings, and, upon petition therefor and cause shown, any such person or any

other interested party may be permitted to intervene. The judge may, after hearing, make reasonable rules defining the matters upon which notice shall be given to other than interveners and the manner of giving such notice.

(d) The debtor, after a petition is filed as provided in subsection (a), shall file a plan of reorganization within six months of the entry of the order by the judge approving the petition as properly filed, or if heretofore approved, then within six months of the effective date of this Act, and not thereafter unless such time is extended by the judge from time to time for cause shown, no single extension at any one time to be for more than six months. Such plan shall also be filed with the Commission at the same time. Such plans may likewise be filed at any time before, or with the consent of the Commission during, the hearings hereinafter provided for, by the trustee or trustees, or by or on behalf of the creditors being not less than 10 per centum in amount of any class of creditors, or by or on behalf of any class of stockholders being not less than 10 per centum in amount of any such class, or with the consent of the Commission by any party in interest. After the filing of such a plan, the Commission, unless such plan shall be considered by it to be prima facie impracticable, shall, after due notice to all stockholders and creditors given in such manner as it shall determine, hold public hearings, at which opportunity shall be given to any interested party to be heard, and following which the Commission shall render a report and order in which it shall approve a plan, which may be different from any which has been proposed, that will in its opinion meet with the requirements of subsections (b) and (e) of this section, and will be compatible with the public interest; or it shall render a report and order in which it shall refuse to approve any plan. In such report the Commission shall state fully the reasons for its conclusions.

The Commission may thereafter, upon petition for good cause shown filed within sixty days of the date of its order, and upon further hearings if the Commission shall deem necessary, in a supplemental report and order modify any plan which it has approved, stating the reasons for such modification. The Commission, if it approves a plan, shall thereupon certify the plan to the court together with a transcript of the proceedings before it and a copy of the report and order approving the plan. No plan shall be approved or confirmed by the judge in any proceeding under this section unless the plan shall first have been approved by the Commission and certified to the court.

(e) Upon the certification of a plan by the Commission to the court, the court shall give due notice to all parties in interest of the time within which such parties may file with the court their objections to such plan, and such parties shall file, within such time as may be fixed in said notice, detailed and specific objections in writing to the plan and their claims for equitable treatment. The judge shall, after notice in such manner as he may determine to the debtor, its trustee or trustees, stockholders, creditors, and the Commission, hear all parties in interest in support of, and in opposition to, such objections to the plan and such claims for equitable treatment. After such hearing, and without any hearing if no objections are filed, the judge shall approve the plan if satisfied that: (1) It complies with the provisions of subsection (b) of this section, is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders; (2) the approximate amounts to be paid by the debtor, or by any corporation or corporations acquiring the debtor's assets, for expenses and fees incident to the reorganization, have been fully disclosed so far

as they can be ascertained at the date of such hearing, are reasonable, are within such maximum limits as are fixed by the Commission, and are within such maximum limits to be subject to the approval of the judge; (3) the plan provides for the payment of all costs of administration and all other allowances made or to be made by the judge, except that allowances provided for in subsection (c), paragraph (12) of this section, may be paid in securities provided for in the plan if those entitled thereto will accept such payment, and the judge is hereby given power to approve the same.

If the judge shall not approve the plan, he shall file an opinion, stating his conclusions and the reason therefor and he shall enter an order in which he may either dismiss the proceedings, or in his discretion and on motion of any party in interest refer the proceedings back to the Commission for further action, in which event he shall transmit to the Commission a copy of any evidence received. If the proceedings are referred back to the Commission, it shall proceed to a reconsideration of the proceedings under the provisions of subsection (d) of this section. If the judge shall approve the plan, he shall file an opinion, stating his conclusions and the reasons therefor, and enter an order to that effect, and shall send a certified copy of such opinion and order to the Commission. The plan shall then be submitted by the Commission to the creditors of each class whose claims have been filed and allowed in accordance with the requirements of subsection (c) of this section, and to the stockholders of each class, and/or to the committees or other representatives thereof, for acceptance or rejection, within such time as the Commission shall specify, together with the report or reports of the Commission thereon or such a summarization thereof as the Commission may approve, and the opinion and order of the judge: Provided, That submission to any class of stockholders shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding, (a) that at the time

of the finding the corporation is insolvent, or that at the time of the finding the equity of such class of stockholders has no value, or that the plan provides for the payment in cash to such class of stockholders of an amount not less than the value of their equity, if any, or (b) that the interests of such class of stockholders will not be adversely and materially affected by the plan, or (c) that the debtor has pursuant to authorized corporate action accepted the plan and its stockholders are bound by such acceptance: *Provided further,* That submission to any class of creditors shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding, that the interests of such class of creditors will not be adversely and materially affected by the plan, or that at the time of the finding the interests of such class of creditors have no value, or that the plan provides for the payment in cash to such class of creditors of an amount not less than the value of their interests. For the purpose of this section the acceptance or rejection by any creditor or stockholder shall be in writing, executed by him or by his duly authorized attorney, committee, or representative. If the United States of America, or any agency thereof, or any corporation (other than the Reconstruction Finance Corporation) the majority of the stock of which is owned by the United States of America, is a creditor or stockholder, the interests or claims thereof shall be deemed to be affected by the plan, and the President of the United States, or any officer or agency he may designate, is hereby authorized to act in respect of the interests or claims of the United States or of such agency or other corporation. The expense of such submission shall be certified by the Commission and shall be borne by the debtor's estate. The Commission shall certify to the judge the results of such submission.

Upon receipt of such certification, the judge shall confirm the plan if satisfied that it has been accepted by or on behalf of creditors of each class to which submission is

required under this subsection holding, more than two-thirds in amount of the total of the allowed claims of such class which have been reported in said submission as voting on said plan, and by or on behalf of stockholders of each class to which submission is required under this subsection holding more than two-thirds of the stock of such class which has been reported in said submission as voting on said plan; and that such acceptances have not been made or procured by any means forbidden by law; *Provided*, That, if the plan has not been so accepted by the creditors and stockholders, the judge may nevertheless confirm the plan if he is satisfied and finds, after hearing, that it makes adequate provision for fair and equitable treatment for the interests or claims of those rejecting it; that such rejection is not reasonably justified in the light of the respective rights and interests of those rejecting it and all the relevant facts; and that the plan conforms to the requirements of clauses (1) to (3), inclusive, of the first paragraph of this subsection (e): Provided further, That if, in any reorganization proceeding under this section, the United States is a creditor on claims for taxes or customs duties (whether or not the United States has any other interests in, or claim against, the debtor, as creditor or stockholder), no plan which does not provide for the payment thereof shall be confirmed by the judge except upon the acceptance, certified to the court, of a lesser amount by the President of the United States or the officer or agency designated by him pursuant to the provisions of the preceding paragraph hereof: *Provided further*, That if the President of the United States or such officer or agency shall fail to accept or reject such lesser amount for more than ninety days after receipt of written notice so to do from the court, accompanied by a certified copy of the plan, the consent of the United States insofar as its claims for taxes or customs duties are concerned shall be conclusively presumed. If the judge shall confirm the plan, he shall enter an order

and file an opinion with a statement of his conclusions and his reasons therefor. If the judge shall not confirm the plan, he shall file an opinion, with a statement of his conclusions and his reasons therefor, and enter an order in which he shall either dismiss the proceedings, or, in his discretion and on the motion of any party in interest, refer the case back to the Commission for further proceedings, including the consideration of modifications of the plan or the proposal of new plans. In the event of such a reference back to the Commission, the proceedings with respect to any modified or new plan shall be governed by the provisions of this section in like manner as in an original proceeding hereunder.

If it shall be necessary to determine the value of any property for any purpose under this section, the Commission shall determine such value and certify the same to the court in its report on the plan. The value of any property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present, and prospective, and all other relevant facts. In determining such value only such effect shall be given to the present cost of reproduction new and less depreciation and original cost of the property, and the actual investment therein, as may be required under the law of the land, in light of its earning power and all other relevant facts.

(f) Upon confirmation by the judge, the provisions of the plan and of the order of confirmation shall, subject to the right of judicial review, be binding upon the debtor, all stockholders thereof, including those who have not, as well as those who have, accepted it, and all creditors secured or unsecured, whether or not adversely affected by the plan, and whether or not their claims shall have been filed, and, if filed, whether or not approved, including creditors who have not, as well as those who have accepted

it. Upon confirmation of the plan, the debtor and any other corporation or corporations organized or to be organized for the purpose of carrying out the plan, shall have full power and authority to, and shall put into effect and carry out the plan and the orders of the judge relative thereto, under and subject to the supervision and the control of the judge, the laws of any State or the decision or order of any State authority to the contrary notwithstanding. The property dealt with by the plan, when transferred and conveyed to the debtor or to the other corporation or corporations provided for by the plan, or when retained by the debtor pursuant to the plan, shall be free and clear of all claims of the debtor, its stockholders and creditors, and the debtor shall be discharged from its debts and liabilities, except such as may consistently with the provisions of the plan be reserved in the order confirming the plan or directing such transfer and conveyance or retention; and the judge may require the trustee or trustees appointed hereunder, the debtor, any mortgagee, the trustee of any obligation of the debtor, and all other proper and necessary parties, to make any such transfer or conveyance, and may require the debtor to join in any such transfer or conveyance made by the trustee or trustees. Upon the termination of the proceedings a final decree shall be entered discharging the trustee or trustees, and making such provisions as may be equitable, by way of injunction or otherwise, and closing the case. Upon confirmation of a plan the Commission shall, without further proceedings, grant authority for the issue of any securities, assumption of obligations, transfer of any property, sale, consolidation or merger of the debtor's property, or pooling of traffic, to the extent contemplated by the plan and not inconsistent with the provisions and purposes of the Interstate Commerce Act as now or hereafter amended. The provisions of title I and of section 5 of the Securities Act of 1933, as amended,

shall not apply to the issuance, sale, or exchange of any of the following securities, which securities and transactions therein shall, for the purposes of said Securities Act, be treated as if they were specifically mentioned in sections 3 and 4 of the said Securities Act, respectively: (1) All securities issued pursuant to any plan of reorganization confirmed by the judge in accordance with the provisions of this section; (2) all securities issued pursuant to such plan for the purpose of raising money for working capital and other purposes of such plan; (3) all securities issued by the debtor or by the trustee or trustees pursuant to subdivision (*e*), clause (3) of this section; (4) all certificates of deposit representing securities of, or claims against, the debtor, with the exception of such certificates of deposit as are issued by committees not subject to subsection (p) hereof. The provisions of subdivision (a) of section (14) of the Securities Exchange Act of 1934 shall not be applicable with respect to any action or matter which is within the provisions of subsection (p) hereof.

(g) If in the light of all the existing circumstances there is undue delay in a reasonably expeditious reorganization of the debtor, the judge, in his discretion, shall, on motion of any party in interest or on his own motion, after hearing and after consideration of the recommendation of the Commission, dismiss the proceedings. Upon the filing of such an order of dismissal, all right, title, or interest of the trustee or trustees shall vest by operation of law in the debtor unless otherwise provided by such order.

(h) [Revenue acts inapplicable to issuance, etc. of securities.]

* * * * * * * *

(i) [Transfer of title between receivers and trustees or to debtor.]

* * * * * * * * *

(j) [Restraining or staying commencement or continuation of proceedings against debtor; removal of causes; owners' rights to equipment leased or conditionally sold unaffected.]

* * * * * * * * *

(k) [Certified copy of order confirming plan or directing conveyance of property as evidence.]

* * * * * * * * *

(l) In proceedings under this section and consistent with the provisions thereof, the jurisdiction and powers of the court, the duties of the debtor and the rights and liabilities of creditors, and of all persons with respect to the debtor and its property, shall be the same as if a voluntary petition for adjudication had been filed and a decree of adjudication had been entered on the day when the debtor's petition was filed.

(m) The term "railroad corporation" as used in this amendatory section means any common carrier by railroad engaged in the transportation of persons or property in interstate commerce, except a street, a suburban, or interurban electric railway which is not operated as a part of a general railroad system of transportation or which does not derive more than 50 per centum of its operating revenues from the transportation of freight in standard steam railroad freight equipment. Wherever used in this section the term "person" shall include an individual, corporation, partnership, association, joint-stock company, unincorporated organization, or a government or political subdivision thereof.

(n) [Claims of employees for personal injuries and claims of sureties as preferred claims; change in wages or working conditions regulated; moving shops, etc. regulated.]

* * * * * * * * *

(o) The trustee or trustees, from time to time, shall determine what lines or portions of lines of railroad and what other property of the debtor, if any, should be abandoned or sold during the pendency of the proceedings in the interest of the debtor's estate and of ultimate reorganization but without unduly or adversely affecting the public interest, and shall present to the judge petitions, in which other parties in interest may join, for authority to abandon or to sell any such property; and upon order of the judge made after a hearing pursuant to such reasonable notice by publication or otherwise as the judge may direct to parties in interest, authorizing any such abandonment or sale, but only with the approval and authorization of the Commission when required by the Interstate Commerce Act as amended February 28, 1920, or as it may be hereafter amended, the trustee or trustees shall take all steps and carry out all proceedings necessary for the consummation of any such abandonment or sale in accordance with the order of the judge. Any such order of the judge shall be a final order for the purposes of appeal. The judge may order and decree any sale of property, whether or not incident to an abandonment, under this subsection at public or private sale and subject to or free from liens. The proceeds derived from any such sales shall be received by the trustee or trustees subject, in case the property was sold free from lien, to any liens thereon at the time of sale, and shall be applied or disposed of in such manner as the judge by further order shall direct. The expense of such sale shall be borne in such manner as the judge may determine to be equitable. The judge may order the trustee or trustees of the debtor to deposit such proceeds with any mortgage trustee entitled thereto, to be applied in payment of all or part of such mortgage.

(p) It shall be unlawful for any person, during the pendency of proceedings under this section or of receiver-

ship proceedings against a railroad corporation in any State or Federal court, (a) to solicit, or permit the use of his name to solicit, from any creditor or shareholder of any railroad corporation by or against whom such proceedings have been instituted, any proxy or authorization to represent any such creditor or shareholder in such proceedings or in any matters relating to such proceedings, or to vote on his behalf for or against, or to consent to or reject, any plan of reorganization proposed in connection with such proceedings; or (b) to use, employ, or act under or pursuant to any such proxy or authorization from any such creditor or shareholder which has been solicited or obtained prior to the institution of such proceedings; or (c) to solicit the deposit by any such creditor, or shareholder, of his claim against or interest in such railroad corporation, or any instrument evidencing the same, under any agreement authorizing anyone other than such depositor to represent such depositor in such proceedings or in any matters relating to such proceedings, including any matters relating to the deposited security or claim; or to vote such claim or interest or to consent to or reject any such plan of reorganization; or (d) to use, employ, or act under or pursuant to any such agreement with such depositor which has been solicited or obtained prior to the institution of such proceedings; unless and until, upon proper application by any person proposing to make such solicitation or to use, employ, or act under or pursuant to such proxies, authorizations, or deposit agreements, and after consideration of the terms and conditions (including provisions governing the compensation and expenses to be received by the applicant, its agents and attorneys, for their services) upon which it is proposed to make such solicitation or to use, employ, or act under or pursuant to such proxies, authorizations, or deposit agreements, the Commission after hearing by order authorizes such solicitation, use, employment, or action: *Provided, however,*

That nothing contained in this section shall be applicable to or construed to prohibit any person, when not part of an organized effort, from acting in his own interest, and not for the interest of any other, through a representative or otherwise, or from authorizing a representative to act for him in any of the foregoing matters, or to prohibit groups of not more than twenty-five bona fide holders of securities or claims or groups of mutual institutions from acting together for their own interests and not for others through representatives or otherwise or from authorizing representatives of such groups to act for them in respect to any of the foregoing matters. The Commission shall make such order only if it finds that the terms and conditions upon which such solicitation, use, employment or action is proposed are reasonable, fair, and in the public interest, and conform to such rules and regulations as the Commission may provide. The Commission shall have the power to make such rules and regulations respecting such solicitation, use, employment, or action and with respect to the terms and the provisions of such proxies, authorizations, and deposit agreements, and with respect to such other matters in connection with the administration of this subsection as it deems necessary or desirable to promote the public interest, and to insure proper practices in the representation of creditors and stockholders through the use of such proxies, authorizations, or deposit agreements and in the solicitation thereof. It shall be unlawful for any person to solicit any such proxy, authorization, or the deposit of any such claim or interest or to use, employ, or act under or pursuant to any such proxy, authorization, or deposit agreement which has been solicited or obtained prior to the institution of such proceedings in violation of the rules and regulations so prescribed.

Every application for authority shall be made in such form and contain such matters as the Commission may

prescribe. Every such application shall be made under oath, signed by, or on behalf of, the applicant by a duly authorized agent having knowledge of the matters therein set forth. The Commission may modify any order authorizing such solicitation, use, employment, or action by a supplemental order, but no such modification shall invalidate action previously taken, or rights or obligations which have previously arisen, in conformity with the Commission's prior order or orders authorizing such solicitation, use, employment, or action.

The Commission may, in its discretion, make such investigations as it deems necessary to determine whether any person has violated or is about to violate any provision of this subsection (p) or any rule or regulation thereunder, and may require or permit any person to file with it a statement in writing, under oath, or otherwise as the Commission shall determine, as to all the facts and circumstances concerning the matter to be investigated. The Commission is authorized, in its discretion, to publish information concerning any such violations, and to investigate any such facts, conditions, practices, or matters as it may deem necessary or proper to aid in the enforcement of the provisions of this subsection (p), in the prescribing of rules and regulations thereunder, or in securing information to serve as a basis for recommending further legislation concerning the matters to which this subsection relates.

Any person who willfully violates any provision of this subsection, or any rule or regulation made thereunder the violation of which is made unlawful, or any person who willfully and knowingly makes, or causes to be made, any statement in any application, report, or document required to be filed hereunder or under any rule or regulation authorized hereby, which statement is false or misleading with respect to any material fact, shall be guilty of a mis-

demeanor, and on conviction in any United States court having jurisdiction, shall be punished by a fine of not less than $1,000 nor more than $10,000 or by imprisonment for not less than one year nor more than three years, or by both such fine and imprisonment, in the discretion of the court; but no person shall be subject to imprisonment under this section for the violation of any rule or regulation if he proves that he had no knowledge of such rule or regulation.

The provisions of this subsection (p) shall not be applicable to any person or committee which has begun to solicit, obtain, or use proxies, authorizations, or deposit agreements prior to the effective date of this amendatory section in connection with proceedings under this section as in force prior to such effective date or receivership proceedings against a railroad then pending in any State or Federal court, unless such person or committee makes application to the Commission and receives authority to act as in this subsection provided, in which event the provisions of this subsection (p) shall be applicable to such person or committee, but such authorization shall not be upon terms which shall invalidate any action theretofore taken, or any rights or obligations which have theretofore arisen: *Provided*, That with respect to committees which are not subject to this subsection (p) the judge shall scrutinize and may disregard any limitations or provisions of any deposit agreements, committee, or other authorizations affecting any creditor or stockholder acting under this section and may enforce an accounting thereunder or restrain the exercise of any power which he finds to be unfair or not consistent with public policy, including the collection of unreasonable amounts for compensation and expenses.

(q) The provisions of section 12 of the Interstate Commerce Act, as amended March 2, 1889, February 10, 1891,

and February 28, 1920, shall be applicable to enable the Commission to perform its duties under this section and the provisions of such section shall apply to the debtor, any subsidiary or affiliated company, or any other person as herein defined.

(r) If any provision of this amendatory section, or the application thereof to any person or circumstances, is held invalid, the remainder of this amendatory section, or application of such provision to other persons or circumstances, shall not be affected thereby.

(s) Proceedings pending under this section (Act of March 3, 1933) on the effective date of this amendatory section shall continue under, and be governed by, the provisions of this amendatory section: *Provided*, That the enactment of this amendatory section shall not invalidate any action taken before its effective date pursuant to this section as it existed prior to the enactment of this amendatory section.

Report of the Interstate Commerce Commission, dated November 20, 1930 (Original Exhibit No. 47, R. 2323)

FINANCE DOCKET NO. 8548

WESTERN PACIFIC RAILROAD COMPANY
DEBENTURES

Submitted November 18, 1930. Decided November 20, 1930

Authority granted to issue $5,000,000 of 5 per cent gold debentures to be sold to the highest bidder at not less than par and accrued interest and the proceeds used in connection with the construction and acquisition of an extension to the applicant's railroad.
F. M. Angellotti for applicant.

REPORT OF THE COMMISSION

DIVISION 4, COMMISSIONERS MEYER, EASTMAN, AND MAHAFFIE

By DIVISION 4:

The Western Pacific Railroad Company, a common carrier by railroad engaged in interstate commerce, has duly applied for authority under section 20a of the interstate commerce act to issue $5,000,000 of 5 per cent gold debentures. No objection to the granting of the application has been presented to us.

The debentures are to be issued in connection with the financing of the applicant's Northern California extension. The construction by the applicant of approximately 112 miles of the extension and the construction and/or acquisition by it of approximately 36 miles jointly with the Great Northern Railway Company was authorized by our certificate and order of June 9, 1930, in *Great Northern Ry. Co. Construction*, 166 I. C. C. 3. A description of the extension is contained in our report in that proceeding;

The applicant has estimated the total cost to it of the construction and acquisition of the extension as $10,049,077. A portion of this amount will be derived from proceeds of $5,000,000 of its first-mortgage bonds authorized by our order of October 6, 1930, in *Western Pac. R. Co. Bonds,* 166 I. C. C. 536. The $5,000,000 of proposed debentures are to be issued to provide additional funds to be applied in payment of the cost of the extension.

The debentures will be issued under an indenture to be entered into between the applicant and the Chase National Bank of the City of New York, as trustee, under date of July 1, 1930. They may be issued in coupon or registered form in denominations of $500, $1,000, or any multiple thereof, the coupon debentures to be dated July 1, 1930, and the registered debentures to be dated as of July 1 or January 1 next preceding the date of issue, unless issued on either of those dates, in which event they are to be dated the date of issue. They will bear interest at the rate of 5 per cent per annum, payable semiannually on January 1 and July 1, and will mature January 1, 1950. All or any part of them will be redeemable at the election of the applicant on any interest date prior to maturity at par and accrued interest.

The indenture will provide that not to exceed 50 per cent of the cost of the extension shall be met by the issue of debentures and that the amount of debentures which may be issued and outstanding at any one time shall not exceed $5,000,000. In the indenture the applicant will covenant that, so long as any of the debentures shall be outstanding, neither the applicant nor any of its subsidiaries will mortgage or, except as required by the applicant's first mortgage dated June 26, 1916, pledge any property now owned or hereafter acquired, without calling for redemption all outstanding debentures, and making suitable provision for their payment. The covenant, however, does not restrict the issue of securities,

including the securing thereof by mortgage or pledge, by subsidiary companies so far as permitted by the first mortgage, or apply to purchase-money mortgages or pledges, or to the acquisition of property already subject to lien, the issue or reissue of bonds or other obligations issuable under any existing mortgage or deed of trust, the extension or refunding of bonds or other obligations issued thereunder, or the issue of equipment-trust obligations.

A written offer to purchase the debentures was made by the A. C. James Company, but as that company and the applicant to some extent have interlocking officers and directors the proposal has taken the form of an offer to bid at par for the debentures upon a public sale thereof. The applicant therefore proposes to offer the debentures at public sale to the highest bidder at not less than par and accrued interest.

We find that the proposed issue by the Western Pacific Railroad Company of $5,000,000 of 5 per cent gold debentures as aforesaid (*a*) is for a lawful object within its corporate purposes, and compatible with the public interest, which is necessary and appropriate for and consistent with the proper performance by it of service to the public as a common carrier, and which will not impair its ability to perform that service, and (*b*) is reasonably necessary and appropriate for such purpose.

An appropriate order will be entered.

Report of the Interstate Commerce Commission, dated February 27, 1932 (Original Exhibit No. 53, R. 2341)

FINANCE DOCKET No. 9162

WESTERN PACIFIC RAILROAD COMPANY SECURITIES

Submitted February 27, 1932. Decided February 27, 1932

Authority granted to issue not exceeding $15,000,000 of general and refunding mortgage gold bonds, series A, and a promissory note or notes for not exceeding $5,000,000, said bonds or such part thereof as may be required, to be pledged as collateral security for a loan or loans and for the notes; and the notes to be exchanged at not less than par for an equal amount of outstanding 5 per cent debentures.

Frank M. Angellotti and *Carl Taylor* for applicant.

REPORT OF THE COMMISSION

DIVISION 4, COMMISSIONERS MEYER, EASTMAN, AND MAHAFFIE

By DIVISION 4:

The Western Pacific Railroad Company, a common carrier by railroad engaged in interstate commerce, by its application as amended, has duly applied for authority under section 20a of the interstate commerce act to issue not exceeding $15,000,000 of general and refunding mortgage gold bonds, series A, and a note or notes in the aggregate face amount of not exceeding $5,000,000, maturing not less than three years nor more than four years and 11 months from the date thereof, and to pledge

the bonds as collateral security for a certain loan or loans and for the note or notes. No objection to the granting of the application has been presented to us.

Our order of November 20, 1930, in *Western Pac. R. Co. Debentures,* 166 I. C. C. 720, authorized the applicant to issue not exceeding $5,000,000 of 5 per cent gold debentures in connection with the financing of its Northern California extension. By the indenture dated July 1, 1930, to the Chase National Bank of the City of New York, under which the debentures were issued, the applicant covenanted that, so long as any of the debentures were outstanding, neither it nor any of its subsidiaries, would mortgage or, except as required by the applicant's first mortgage dated June 26, 1916, pledge any property now owned or hereafter acquired, without calling for redemption all outstanding debentures and making suitable provision for their payment. The debentures were sold to the A. C. James Company. Under the terms of the sale it appears that that company has from time to time taken delivery of various amounts of the debentures so that as of February 8, 1932, the amount outstanding was $4,504,000, but is obligated to take the entire issue.

The applicant proposes to make a new mortgage on its properties and to do this must comply with the covenant mentioned. Therefore, it has arranged with the holder of the debentures to pay them by issuing to it a 5 per cent note or notes of an equal amount, to mature not less than 3 years nor more than 4 years 11 months from the date thereof, and to be secured by the pledge of bonds to be issued under the proposed mortgage. The note or notes will contain a provision for the acceleration of the maturity of the principal thereof in case of default under the first mortgage, or the proposed new mortgage, or any of the loans made to the applicant by the Reconstruction Finance Corporation or the Railroad Credit Corporation,

such provision for acceleration of principal to be in the form agreed upon by the applicant and the A. C. James Company. The applicant seeks authority to issue a note or notes in the maximum amount necessary to pay all the debentures which may be issued and outstanding under the authority heretofore granted.

The proposed new mortgage will be known as the applicant's general and refunding mortgage, will be dated as of January 1, 1932, and will be made to the Chase National Bank of the City of New York, as trustee. The mortgage will limit the amount of bonds that may be outstanding thereunder at any one time to $100,000,000, and will provide for the issue of bonds to refund the applicant's first-mortgage bonds issued under its first mortgage dated June 26, 1916, and the $5,000,000 of debentures issued under the indenture of July 1, 1930. The mortgage will also provide that bonds may be issued in series as determined by the board of directors, and under section 1 of article two $15,000,000 of general and refunding mortgage bonds of any series, one or more, may be authenticated and delivered without further action on the part of the applicant, except the filing with the trustee of (1) resolutions of the board of directors, requesting authentication and delivery of the bonds, and (2) an opinion of counsel. Pursuant to these provisions, the board of directors has determined that the initial series of general and refunding mortgage gold bonds in the total amount of $15,000,000 is to be designated series A.

The series A bonds may be issued either in coupon or registered form, coupon and registered bonds being interchangeable. Coupon bonds in denominations of $1,000 and $500 will be dated January 1, 1932, and registered bonds in the denomination of $1,000 or any multiple thereof will be dated the day of issue, if an interest date, or, if not, the last preceding interest date, and will bear interest

from the date thereof. The bonds of this series will be redeemable at the applicant's election either in whole or in part on any interest date at par and accrued interest, will bear interest at the rate of 5 per cent per annum, payable semiannually on January 1 and July 1, and will mature January 1, 1957.

The applicant has applied for a loan from the Reconstruction Finance Corporation to aid in temporarily financing its requirements and has also applied for a loan from the Railroad Credit Corporation to enable it to meet its fixed interest charges maturing on March 1, 1932. The applicant states that since the filing of these applications it has been advised that the Railroad Credit Corporation is without funds and that arrangements have been made between the two corporations whereby it is expected the Reconstruction Finance Corporation will loan to the applicant the amount applied for from the Railroad Credit Corporation, or so much thereof as may be approved.

In applying for the loans mentioned, the applicant offered to pledge as security for each of the loans such principal amount of the proposed general and refunding mortgage gold bonds, series A, as the corporation making the loan should require and we should approve. As part of its agreement to accept in payment for the outstanding debentures a 5 per cent note or notes of a like face amount, the holder of the debentures required that the applicant should pledge as security for the note or notes general and refunding mortgage bonds, such security to be of the same maturity, to bear the same rate of interest, and to be comparable in all respects with the security for the loan or loans. Accordingly, the applicant requests authority to pledge series A bonds as collateral for the note or notes on the same basis at which they are pledged for the loans.

There was not submitted with the application in support of the proposed bonds a report of uncapitalized ex-

penditures listed on Form A, as required by our order of February 19, 1927, respecting applications filed under section 20a of the act. Because of the urgency of the applicant's receiving the authority sought, we will not require that the statement of expenditures and supporting data be filed before acting upon the application, but our order to be entered herein will require the applicant to file the requisite report on Form A together with the supporting data within three months from the date of the order. In the absence of specific expenditures to support the proposed bonds, it will be necessary to consider the applicant's capital assets and capital liabilities as shown by its general balance sheet as of December 31, 1931, filed with the application.

The investment in road and equipment amounts to $138,404,243.38, and "accrued depreciation, equipment" is shown at $7,537,331.79. Miscellaneous physical property amounts to $1,816,929.57. The greater portion of this amount represents the cost of real estate in San Francisco, Oakland, and Oakland Moie, Calif., held for the development of terminal facilities and the relocation of the applicant's main line in the city of Oakland; an appreciable portion of the amount represents investment in track material leased to various companies and would be classifiable as working capital; the remainder consists mostly of improved and unimproved property adjacent to the right of way located at various points along the line. While we are without an analysis of the various items comprising the investment in miscellaneous physical property, it appears that most of the property is either being used for railroad purposes or is intended ultimately to be used for such purposes. For the purposes of this application the entire amount will be considered as part of working capital. The investments in affiliated companies aggregate $14,781,334.36. The capital stock, bonds, and notes of subsidiary companies owned by the applicant will be pledged under

the proposed general and refunding mortgage subject to their prior pledge, if so pledged, under the applicant's first mortgage. Included under investments in affiliated companies are the following: Subscriptions to capital stock of Western Pacific California Railroad $27,500, Railway Express Agency, Incorporated, capital stock $200, advances $9,600, total $37,300. The applicant does not claim that any of these items are capitalizable. Under investments in affiliated companies are also various amounts of advances to subsidiary companies aggregating $3,473,533.33. It appears that a portion of the advances was made for operating expenses and therefore would not be capitalizable. As to the remainder, the capitalization thereof by the issue of proposed bonds would be premature and should be postponed until the subsidiaries have issued and delivered to the applicant their securities in satisfaction of the advances and such securities have been or will be pledged under the proposed general and refunding mortgage. See *Stock of Baltimore & O. R. Co.*, 154 I. C. C. 258, 260.

Giving effect to the foregoing, capital assets would consist of the following:

Investment in road and equipment	$138,404,243.38	
Less "accrued depreciation — equipment"	7,537,331.79	
		$130,866,911.59
Investments in affiliated companies		11,270,501.43
Working capital:		
Cash	946,117.22	
Material and supplies	2,255,823.50	
Miscellaneous physical property	1,816,929.57	
		4,918,870.29
Total		147,056,283.31

The outstanding capital liabilities consisted of the following:

Common stock	$ 47,500,000
Preferred stock	28,300,000
First-mortgage 5 per cent gold bonds	47,940,100
5 per cent gold debentures	4,154,000
Equipment-trust certificates	4,925,000
Total	132,819,100

As has been indicated above, the amount of outstanding 5 per cent gold debentures had increased from $4,154,000, the amount shown in the balance sheet, to $4,504,000 on February 8, 1932, and it is probable that the entire authorized amount of $5,000,000 will ultimately be issued. The proposed issue of not exceeding $5,000,000 of promissory notes and the pledge as security therefor of proposed general and refunding mortgage bonds for the purpose of paying the outstanding debentures are in the nature of temporary financing, inasmuch as under the proposed general and refunding mortgage $5,000,000 of bonds issuable thereunder is reserved to refund a like amount of 5 per cent gold debentures. Therefore, for the purpose of this application and a comparison of capital assets and capital liabilities, the $4,154,000 of outstanding debentures should be considered as having been replaced by the issue of $5,000,000 of general and refunding mortgage bonds. This change would increase the total capital liabilities to $133,665,100, making the excess of capital assets over capital liabilities amount to $13,391,183.31. It has been intimated that $5,000,000 of the proposed $15,000,000 of general and refunding mortgage bonds will ultimately be issued to refund a like amount of outstanding debentures. Therefore, it appears that the remaining $10,000,000 of proposed bonds may be considered as being issuable against the excess of capital assets over capital liabilities in the amount shown above.

In *Western Pacific Ry. Co.*, 29 Rep. 239-279, we reported the value of the property of the applicant as of June 30, 1914, pursuant to section 19a of the act. We there found the value for rate-making purposes of property owned and used by the applicant to be $63,861,208, including $561,208 for working capital. In addition, there was a small amount of common-carrier property owned but not used, and the applicant held other property which we classified as noncarrier, including lands, structures, and rights in the public domain, for which we found a value of $4,469,003. As accurately as it could be determined, the original cost of all the applicant's property as of valuation date was found to be $72,555,963.87. The investment in road and equipment, including land, as stated in the applicant's books at that time, was $156,318,136.40. Subsequent to valuation date the applicant was reorganized and the investment in road and equipment as stated on its books was reduced to approximately $83,000,000. Since valuation date the applicant has reported net additions and betterments to its property to the end of 1930 costing $39,030,394. If this amount be added to the value formerly found for the applicant's property, exclusive of working capital but including property owned and classified as noncarrier, this sum is approximately $106,800,000.

We find that the proposed issue (1) of not exceeding $15,000,000 of general and refunding mortgage gold bonds, series A, and (2) of a note or notes in the aggregate face amount of not exceeding $5,000,000 by The Western Pacific Railroad Company as aforesaid (*a*) is for lawful objects within its corporate purposes, and compatible with the public interest, which are necessary and appropriate for and consistent with the proper performance by it of service to the public as a common carrier, and which will not impair its ability to perform that service, and (*b*) is reasonably necessary and appropriate for such purposes.

An appropriate order will be entered.

Report of the Interstate Commerce Commission, dated March 24, 1932 (Original Exhibit No. 53, R. 2341)

FINANCE DOCKET NO. 9162

WESTERN PACIFIC RAILROAD COMPANY SECURITIES

Submitted March 18, 1932 *Decided March 24, 1932*

---

1. Order of February 27, 1932, 180 I. C. C. 652, amended so as to permit the applicant to issue, substantially in the form submitted with the supplemental application a note or notes in the aggregate face amount of not exceeding $5,000,000, to pledge as collateral security therefor general and refunding mortgage gold bonds, series A, in the ratio of not exceeding $125, principal amount, of bonds to each $100, face amount, of notes, and to exchange the notes at not less than par for not exceeding $5,000,000 of the applicant's 5 per cent gold debentures.

2. Authority granted, upon the surrender and cancellation of a note for $4,504,000 to issue in exchange therefor a note or notes in an equal aggregate face amount, to be secured by the pledge of $5,630,000, principal amount, of the applicant's general and refunding mortgage gold bonds, series A, provided that the total amount of notes to be outstanding at any one time under authority of the original and supplemental orders shall not exceed $5,000,000, and that the total amount of bonds to be pledged as collateral security for the notes shall not exceed $6,250,000.

Carl Taylor for applicant.

SUPPLEMENTAL REPORT OF THE COMMISSION

DIVISION 4, COMMISSIONERS MEYER, EASTMAN, AND MAHAFFIE

By Division 4:

Our order of February 27, 1932, in this proceeding, 180 I. C. C. 652, authorized The Western Pacific Railroad Company, the applicant herein, to issue not exceeding $15,000,000 of general and refunding mortgage gold bonds, series A, and a promissory note or notes in the aggregate face amount of not exceeding $5,000,000, to pledge the bonds as collateral security for a loan or loans and for the notes, and to exchange the notes at not less than par for an equal amount of the applicant's outstanding 5 per cent gold debentures.

By a supplemental application filed herein on March 16, 1932, the applicant seeks an amendment of the order so as to permit it to pledge the general and refunding mortgage gold bonds, series A, as collateral for the notes at the ratio hereinafter stated and to exchange the promissory notes for not exceeding $5,000,000 of 5 per cent gold debentures. Authority is also sought to issue a new note or notes in the principal amount of $4,504,000 in exchange for, and upon the surrender and cancellation of, a note in a like amount issued March 1, 1932, under the authority heretofore granted. No objection to the granting of the supplemental application has been presented to us.

The order of February 27, 1932, authorizes the general and refunding mortgage bonds to be pledged for the promissory note or notes in the same ratio as that for a loan or loans from the Railroad Credit Corporation or the Reconstruction Finance Corporation. The applicant shows that subsequent to the entry of the order of February 27, 1932, the holder of the 5 per cent gold debentures consented to modify its previous agreement and to accept as collateral for the note issued in exchange for the debentures general and refunding mortgage bonds in the ratio of $125, principal amount, of bonds, for each $100, face amount, of the note. Authority is sought to pledge

at the ratio indicated not exceeding $6,250,000 of bonds as collateral for not exceeding $5,000,000 of promissory notes.

The report filed with and made a part of the order of February 27, 1932, indicated that as of February 8, 1932, the debentures outstanding amounted to $4,504,000, but it also indicated that the total amount that might eventually be issued and outstanding was $5,000,000, as authorized by our order of November 20, 1930, in *Western Pac. R. Co. Debentures*, 166 I. C. C. 720, and that authority was sought to issue a note or notes in the maximum amount necessary to pay all the debentures which might be issued and outstanding under that order. However, the order of February 27, 1932, provided that the $5,000,000 of notes therein authorized to be issued was to be exchanged at not less than par for an equal amount of the applicant's outstanding 5 per cent gold debentures, which then amounted to $4,504,000. As the applicant proposes to issue presently $347,000 additional debentures, and expects to issue other debentures up to the authorized limitation of $5,000,000, all of which will be exchanged for notes as aforesaid, it considers it desirable to have the order modified so as to indicate that the notes may be exchanged for a maximum of $5,000,000 of debentures.

At the date of the original order in this proceeding a form or specimen of the proposed notes had not been filed and the order required that within 10 days after the execution of the note or notes the applicant should file with us a specimen or copy thereof. The applicant has complied with that part of the order and has filed a copy of its note dated March 1, 1932, for $4,504,000, payable three years after date, to the A. C. James Company, or order. A copy of this note is also filed with the supplemental application. It bears interest at the rate of 5 per cent per annum, payable quarterly on April 1, July 1, October 1, and January 1, and is secured by the pledge of $5,630,000 of the applicant's general and refunding mortgage gold bonds, series A. The applicant agrees to deposit with

the payee such additional security as the payee may from time to time demand. Provisions are also made for selling or otherwise disposing of the collateral in the event of the nonperformance of certain covenants and agreements therein specified, and for the payee's transferring the note and the collateral therefor. Authority is sought to issue a new note or notes to replace the note already issued. Any authority herein granted is not to be construed as authorizing the applicant to pledge as collateral for the note or notes any additional securities issued or assumed by it without first obtaining our authorization under section 20a.

We find that the issue by The Western Pacific Railroad Company (1) of not exceeding $15,000,000 of general and refunding mortgage gold bonds, series A, and of a note or notes in the aggregate face amount of not exceeding $5,000,000, as heretofore authorized, such an amount of the bonds as may be required, not exceeding $6,250,000, principal amount, to be pledged as collateral security for the note or notes at the ratio of not exceeding $125, principal amount, of bonds to each $100, face amount, of notes, and the note or notes to be substantially in the form submitted with the supplemental application, and (2) of a note or notes in the face amount of not exceeding $4,504,000 in exchange for a note for a like amount issued under authority of our order of February 27, 1932, herein, the new note to be substantially in the form submitted with the supplemental application and to be secured by the pledge of not exceeding $5,630,000 of the bonds to be pledged as collateral for notes authorized by that order, (*a*) is for lawful objects within its corporate purposes, and compatible with the public interest, which are necessary and appropriate for and consistent with the proper performance by it of service to the public as a common carrier, and which will not impair its ability to perform that service, and (*b*) is reasonably necessary and appropriate for such purposes.

An appropriate supplemental order will be entered.

Report of the Interstate Commerce Commission, dated December 9, 1932 (Original Exhibit No. 92, R. 2458)

FINANCE DOCKET NO. 9572

WESTERN PACIFIC RAILROAD COMPANY BONDS

Submitted November 17, 1932. Decided December 9, 1932

1. Authority granted to issue not exceeding $4,000,000 of general and refunding mortgage gold bonds, series B, and to pledge applicant's equity therein, subject to their pledge to the Reconstruction Finance Corporation as collateral security for a note issued to the Railroad Credit Corporation amounting to $1,303,000, or any extension or renewal thereof. Condition prescribed.

2. That part of the application which seeks authority to pledge said bonds to the Reconstruction Finance Corporation dismissed.

Carl Taylor and *Rollin Browne* for applicant.

REPORT OF THE COMMISSION

DIVISION 4, COMMISSIONERS MEYER, EASTMAN, AND MAHAFFIE

BY DIVISION 4:

The Western Pacific Railroad Company, on August 5, 1932, applied for authority (1) to issue not exceeding $5,000,000 of general and refunding mortgage gold bonds, Series B, (2) to pledge them, or such amount thereof as we may authorize, to the Reconstruction Finance Corporation as collateral security for applicant's note dated June 29, 1932, for $734,584 payable to that corporation, or order, or for any extension or renewal thereof, and for

the payment of any other liability or liabilities of the applicant to the Finance Corporation, including a note dated March 1, 1932, for $799,000, and (3) to pledge all right, title, and interest in and to all of the series B bonds which may be pledged with the Finance Corporation, subject to the lien thereon of that corporation, to the Railroad Credit Corporation to secure the payment of applicant's note dated June 29, 1932, for $1,303,000, payable to the Credit Corporation, or order, or any extension or renewal thereof, as well as for the payment of any other liability or liabilities of the applicant to the Credit Corporation due or to become due or which may hereafter be contracted or existing, and as collateral for the payment of any and all indebtedness of the applicant to the Credit Corporation whether or not represented by a note or notes or in any manner secured and at any time or times incurred or to be incurred under the marshaling and distributing plan, 1934. No objection to the application has been offered.

The proposed bonds will be issued under and pursuant to the general and refunding mortgage dated January 1, 1932, made by the applicant to the Chase National Bank of the City of New York, trustee, and in accordance with the provisions of that mortgage a new series of bonds has been created to be designated as series B. The bonds of this series may be issued either in coupon or registered form, coupon and registered bonds being interchangeable. Coupon bonds in denominations of $1,000 and $500 will be dated July 1, 1932, and registered bonds in the denomination of $1,000, or any multiple thereof, will be dated the date of issue if an interest date, or, if not, the last preceding interest date, and will bear interest from the date thereof. The bonds of this series will be redeemable at the applicant's election either in whole or in part on any interest date at par and accrued interest, will bear interest at the rate of 5 per cent per annum, payable semi-annually on January 1 and July 1, and will mature January 1, 1957.

As part of the basis for the proposed issue of series B bonds, the applicant submits expenditures made during the period August 1, 1930, to May 31, 1932, for constructing its Northern California extension, in the amount of $10,183,641.90, of which $5,000,000 was capitalized by the issue of a like amount of first-mortgage gold bonds authorized to be issued by our order of October 6, 1930, in *Western Pac. R. Co. Bonds*, 166 I. C. C. 536, leaving $5,183,641.90 of expenditures to support the proposed bonds.

In *Western Pac. R. Co. Securities*, 180 I. C. C. 652, it was stated that the applicant had not submitted with the application filed in that proceeding a report of uncapitalized expenditures listed on form A, as required by our order of February 19, 1927, respecting applications filed under section 20a of the interstate commerce act and the order entered therein required the applicant to file such a report within three months from the date of the order. Pursuant to this requirement the applicant has filed the necessary form A purporting to show that during the period July 14, 1916, to January 31, 1932, it expended for capital purposes upon its properties and the properties of its subsidiaries the sum of $16,596,058.10 not theretofore used as a basis for capitalization.

The applicant states that if to this amount there be added the $10,183,641.90 above mentioned as having been expended in constructing the Northern California extension, the expenditures submitted in this and the previous applications would total $26,779,700. It is asserted that should there be deducted from that amount $1,303,679.79 which might not be considered properly capitalizable, consisting of sinking funds $326.02, deposits in lieu of mortgaged property sold $710.50, subscription to capital stock of Western Pacific California Railroad Company $27,500, Railway Express Agency capital stock $200, advances to subsidiary companies for other than capital purposes

$919,076.37, other advances $270,977.57, and other investments $84,889.33, there would remain $25,476,020.21 of expenditures, against which there has been issued and outstanding $19,999,500 of bonds, leaving $5,476,520.21 to support the proposed issue of $5,000,000 of series-B bonds.

To finance the cost of constructing its Northern California extension, the applicant was authorized to issue $19,000,000 of securities, consisting of $5,000,000 of first-mortgage gold bonds in *Western Pac. R. Co. Bonds, supra,* and $5,000,000 of 5 per cent gold debentures in *Western Pac. R. Co. Debentures,* 166 I. C. C. 720. As was indicated in *Western Pac. R. Co. Securities, supra,* and supplemental report therein, 184 I. C. C. 13, the applicant was authorized to issue to retire the 5 per cent debentures a promissory note or notes for not exceeding $5,000,000, to be secured by the pledge of not exceeding $6,250,000 of general and refunding mortgage gold bonds, series A. The applicant shows that the debentures have been retired by the issue of $4,999,800 of 3-year notes and a cash payment of $200. In the original report in the proceeding last cited, we stated that the issue of notes to retire the debentures was in the nature of temporary financing and that $5,000,000 of the series-A bonds therein authorized should be regarded as being issued to retire the debentures. Accordingly there has been authorized against the total expenditures above mentioned $5,000,000 of first-mortgage gold bonds and $15,000,000 of general and refunding mortgage gold bonds, series A, although the applicant has issued only $14,999,500 of the series-A bonds. Deducting from $25,476,020.21 the $20,000,000 of bonds authorized would leave $5,476,020.21 of expenditures as support for the series-B bonds. However, our examination of the expenditures made during the period July 14, 1916, to January 31, 1932, amounting to $16,596,058.10, discloses many duplications of expenditures submitted in prior applications as support for the issue of securities therein

sought, so that until these seeming discrepancies have been accounted for by the applicant, which has been requested of it, we are unable to accept as a basis for the issue of additional bonds the $5,476,020.21 of expenditures mentioned above.

Therefore, for the purposes of this application it will be necessary for us to consider as a basis for the issue of the series-B bonds the excess of capital assets over capital liabilities as shown by the applicant's general balance sheet as of May 31, 1932, and certain analytical statements. These assets and liabilities are as follows: Investment in road and equipment $139,226,500.53 less accrued depreciation, equipment, $7,885,379.55, net investment in road and equipment $131,341,120.98, miscellaneous physical property $1,029,513.85, investment in affiliated companies pledged under applicant's first mortgage $8,625,454, investment in affiliated companies pledged under applicant's general and refunding mortgage $2,642,648.38, advances to affiliated companies for additions and betterments (including $27,500 subscription to capital stock of the Western Pacific California Railroad Company), $2,276,316.04, working capital $2,880,994.35, consisting of cash $737,322.30 and material and supplies $2,143,672.05, total capital assets $148,796,047.60, common stock $47,500,000, preferred stock $28,300,000, first-mortgage 5 per cent gold bonds $49,290,100, general and refunding mortgage gold bonds, series A, $14,999,500, equipment-trust certificates $4,550,000, total capital liabilities $144,639,600.

The balance sheet shows investment in miscellaneous physical property in the amount of $1,817,379.03. The amount shown above as capitalizable consists of $862,429.18 representing property at Oakland, Calif., acquired for the purpose of relocating the applicant's main line and $167,084.67 representing leased track material. The remainder of the balance sheet figure for miscellaneous physical property represents investments in property of a character

not considered as affording a proper basis for capitalization. In addition to the amounts given above for advances to affiliated companies, the general balance sheet figures include, under investment in affiliated companies unpledged, other advances not considered as capitalizable and several small items representing investment in the capital stock of various companies. The sum of these items is $1,832,460.63, and consists principally of $1,383,477.43 of advances to carrier companies for purposes other than for additions and betterments, and $413,598.53 of advances to a land company. The general balance sheet shows none of the general and refunding mortgage bonds to be outstanding, but does show outstanding $4,999,800 of notes payable to A. C. James Company, and $2,102,000 of notes payable to the Reconstruction Finance Corporation. These notes are secured by the pledge of general and refunding mortgage bonds, series A, issued against capital expenditures. Therefore, for the purpose of comparing capital assets and liabilities, the primary obligations consisting of the notes have been excluded and instead there have been included the general and refunding mortgage bonds constituting the collateral security therefor.

The excess of capital assets over capital liabilities, as shown above, is $4,156,447.60, which may be accepted as a proper basis for additional capitalization and in respect of which the applicant may issue not exceeding $4,000,000 of the proposed bonds. Ordinarily, advances to affiliated companies carried in open account would not constitute an appropriate basis for the issue of capital securities, but inasmuch as the applicant included in the expenditures to January 31, 1932, amounting to $16,596,058.10, the expenditures made for additions and betterments to the properties of its affiliated companies, the advances from which such expenditures were made may, in this instance, be considered as capital assets upon condition that the applicant require the affiliated companies, upon due authorization,

to issue to it their capital stock, bonds, notes, or other obligations in payment and settlement of the advances, such securities upon their delivery to the applicant forthwith to be pledged with the trustee of its general and refunding mortgage dated January 1, 1932. The order to be entered herein will require that this be done.

As indicated above, the applicant requests authority to pledge the bonds as collateral security for two notes payable to the Finance Corporation and for the payment of any other liability or liabilities due or to become due, or which may hereafter be contracted or existing. As under the provisions of section 5 of the Reconstruction Finance Corporation Act, no authorization under section 20a of the interstate commerce act is necessary for the applicant to pledge its bonds as collateral for notes issued to evidence loans from the Finance Corporation, that part of the application will be dismissed.

The applicant also seeks authority to pledge its equity in the proposed bonds, subject to their pledge to the Finance Corporation, to the Credit Corporation for a note for $1,303,000 payable to that corporation, or order, on demand, but, if no demand is made, then on or before February 28, 1934, and any extension or renewal thereof, and for various other existing or possible obligations to the Credit Corporation. Our authorization herein will be limited to the pledge of the applicant's equity in the proposed bonds as security for the $1,303,000 note or any extension or renewal thereof.

We find that, subject to the condition indicated above, the proposed issue by The Western Pacific Railroad Company of not exceeding $4,000,000 of general and refunding mortgage gold bonds, series B, and the pledge by it of its equity therein, as collateral security for a note of $1,303,000 or any extension or renewal thereof, to the Railroad Credit Corporation as aforesaid (*a*) are for lawful objects within

its corporate purposes, and compatible with the public interest, which are necessary and appropriate for and consistent with the proper performance by it of service to the public as a common carrier, and which will not impair its ability to perform that service, and (*b*) are reasonably necessary and appropriate for such purposes.

An appropriate order will be entered.

BRIEF ON BEHALF OF THE WESTERN PACIFIC RAILROAD COMPANY, DEBTOR, RESPONDENT, PETITIONER

Foreword

The views of The Western Pacific Railroad Company (herein called the Debtor) upon the fundamental questions

now arising in this Court under Section 77 of the Bankruptcy Act (herein referred to as Section 77) are in complete accord with those presented in the brief of Western Pacific Railroad Corporation, which is the Debtor's sole stockholder and the beneficial owner of all of the Debtor's unsecured indebtedness.[1]

In order to avoid duplication of argument the Debtor, therefore, adopts in its entirety the brief filed herein by Western Pacific Railroad Corporation.

In addition, and for reasons hereinafter stated, the Debtor adopts as correctly expressing the position which the Debtor conceives it to be its duty to take in respect of conflicting lien claims asserted herein, the brief filed by Irving Trust Company, as Trustee of the Debtor's General and Refunding Mortgage.

Scope of the Debtor's Brief

This brief assumes affirmance by this Court of the decision of the Circuit Court of Appeals herein and a reference of this proceeding back to the Interstate Commerce Commission pursuant to subsection (e) of Section 77 on the basic grounds developed in the brief of the Western Pacific Railroad Corporation, and is intended (a) to supplement that brief in the discussion of certain questions which this Court may think ought to be settled before the Interstate Commerce Commission undertakes the consideration of a new plan and (b) to add a few further words of confidence in the earning capacity of the Debtor's properties and in the strength and future of the railway industry.

---

1. Tr. 1044, 1143.

The Debtor's Status Under Section 77

As this Court is aware, this proceeding was commenced (and we think this also is true of other like proceedings pending in the Courts) by the filing by the Debtor as required by Section 77 of a petition alleging in the language of subsection (a) that it is "unable to meet its debts as they mature and that it desires to effect a plan of reorganization."

Thus at the very outset the Debtor became the moving party in these proceedings and by the express terms of paragraph (13) of subsection (c) invested with "the right to be heard on all questions arising in the proceedings." That this right is a continuing one persisting throughout the proceeding is made clear by Section 77 as a whole and particularly by subsection (f) which provides—

> "* * * Upon confirmation of the plan, the debtor and any other corporation or corporations organized or to be organized for the purpose of carrying out the plan, shall have full power and authority to, and shall put into effect and carry out the plan and the orders of the judge relative thereto, under and subject to the supervision and the control of the judge, the laws of any State or the decision or order of any State authority to the contrary notwithstanding."

As stated in an opinion written by Circuit Judge PHILLIPS for the Circuit Court of Appeals in the Tenth Circuit:

> "Undoubtedly, the debtor has important duties to perform in the reorganization proceedings, *Continental Illinois National Bank & Trust Co.* v. *Chicago, Rock Island & Pacific Railway*, 294 U. S. 648, 679, * * * not only in connection with the formulation and presentation of the plan of the debtor but also in connection with the proceeding, the debtor hav-

ing the right to be heard on all questions arising therein."[2]

Since it is the statutory duty of the Debtor to formulate and carry through a reorganization plan which must conform to the meticulous statutory specifications set out and referred to in subsection (e) of Section 77, and since the formulation of such a plan necessarily involves a determination by the Debtor of the status and lien position of every security holder or creditor entitled to participate therein, it cannot perform this statutory duty and discharge its obligations to the Interstate Commerce Commission and the Court if it remain complaisant in respect of a plan proposed by any other party to the proceeding or formulated by the Commission itself which fails either as to creditor or equity interest to conform to any one or more of such statutory specifications. So it seems quite clearly to be the intent of Section 77 that the Debtor serve throughout the proceeding in a *quasi* judicial capacity and to that end have the right to be heard under paragraph (13) of subsection (e) on behalf of any creditor or equity interest whose rights are adversely affected by any feature of a plan certified to a District Court by the Interstate Commerce Commission pursuant to subsection (d). This general duty becomes definite and specific as to any class of creditors which in whole or in part may be otherwise unrepresented in the proceeding.

The holders of a very large part of the Debtor's funded debt are in this situation.

The Debtor has created and there are now outstanding an issue of its First Mortgage Bonds in the amount of $49,290,100, of which $16,941,400 are represented by an

2. *Denver and Rio Grande Western Railroad Company* v. *McCarthy, et al.*, 111 F. (2d) 820.

Institutional Bondholders' Committee,[3] a group of not more than twenty-five members organized under the following exceptive provision of subsection (p) of Section 77—

> "• • • That nothing contained in this section shall • • • prohibit groups of not more than twenty-five *bona fide* holders of securities or claims or groups of mutual institutions from acting together *for their own interests and not for others* • • •." (Italics supplied.)

The limitations of subsection (p) are clear and unequivocal. The Institutional Bondholders' Committee organized under this subsection may represent the $16,941,400 of First Mortgage Bonds owned by members of the group but *may not* represent others, thus leaving $32,348,700 of the same issue of First Mortgage Bonds wholly unrepresented in the proceeding except as they may be represented either by the mortgage trustees in the execution of their trust or by the Debtor in the proper discharge of its duties under Section 77. The authority of the mortgage trustees may, however, be subject to question in view of the *caveat* in paragraph (7) of subsection (c) that "nothing herein shall constitute such trustee or trustees the representative or representatives of such holders for the purpose of accepting or rejecting any plan of reorganization."

In the argument which follows the Debtor is aligned in its technical position with the interest of the holders of the unrepresented First Mortgage Bonds in opposing the proposed violation of their lien priority by the offer of parity of treatment to the secured notes of the Debtor held by Reconstruction Finance Corporation and in opposing the creation of a reorganization committee upon which these Bonds (nearly two-thirds of the entire issue) are accorded no representation; but, for reasons which will be

3. Tr. 1855.

apparent to this Court the Debtor has adopted the brief of the Trustee of the General and Refunding Mortgage as more consistent with its own public representations and as reflecting the definitely sounder view in the lien controversy between the Trustees of the First Mortgage and the Trustee of the General and Refunding Mortgage.[4]

Summary of Argument

I. The effective date of the Plan should be the date of the filing of the Petition.

II. The new Plan should be purged of the discriminatory treatment attempted to be given Reconstruction Finance Corporation.

III. The new Plan should provide for the surrender to the Debtor for restoration to the owners of all accommodation collateral pledged under its secured notes.

IV. The new Plan should be carried out by the Debtor and not by a Reorganization Committee.

V. The Debtor's unsecured creditors and stockholders may not lawfully be excluded from participating in the new Plan.

Argument

I. The effective date of the Plan should be the date of the filing of the Petition.

The first question which ought to be judicially settled for the future guidance of the Interstate Commerce Commission and the Courts is the precise capital structure of a Debtor to which a plan of reorganization under Section 77 should be applied.

4. Tr. 1649.

In the present case, the Interstate Commerce Commission has selected January 1, 1939, as the effective date of the plan certified to the Court and has applied the plan to the capital structure, including interest accrued at contract rates, as it existed on December 31, 1938, but it points to no legal warrant for that particular date.[5] There is no reason why it could not with equal propriety say December 31, 1937, or December 31, 1940, or why it should not project things forward to December 31, 1941, or carry them back to August 2, 1935.[6]

The Debtor says that the plan for its reorganization should be applied to its capital structure as it existed August 2, 1935 (adjusted for accounting purposes to the nearest July 1 or January 1) and it points to subsection (l) of Section 77 as its warrant for that date. The Debtor contends that Section 77 contemplated a prompt reorganization in accordance with a uniform pattern applied to the capital structure as it existed at the basic date of bankruptcy—the date of the filing of the petition—and that this is the plain implication of subsection (l) which provides—

> "In proceedings under this section * * * the rights and liabilities of creditors, * * * shall be the same as if a voluntary petition for adjudication had been filed and a decree of adjudication had been entered on the day when the debtor's petition was filed."

5. Tr. 307.

6. In an up to date study of railroad reorganization Plans certified by the Interstate Commerce Commission, issued by the Stock Exchange firm of Pflugfelder, Bampton & Rust, it appears that the following Plans bear the effective dates indicated:

Chicago, Milwaukee, St. Paul and Pacific Railroad Company	—January 1, 1939
Chicago & North Western Railway Company	—January 1, 1939
Akron, Canton & Youngstown Railway Company	—October 1, 1938
Missouri Pacific Railroad Company	—January 1, 1940
Chicago, Rock Island & Pacific Railway Company	—January 1, 1942
Florida East Coast Railway	—January 1, 1942
St. Louis Southwestern Railway Company	—January 1, 1942
St. Louis—San Francisco Railway Company	—January 1, 1940
The Denver and Rio Grande Western Railroad Company	—January 1, 1942
New York, New Haven & Hartford Railroad Company	—January 1, 1940

It is quite clear from the authorities reviewed in *Ticonic National Bank* v. *Sprague*,[7] that the capital structure to be dealt with in reorganization must include the principal of all indebtedness, both secured and unsecured, together with contract interest accrued to the basic date of bankruptcy and that the right to interest *after* that date only survives as to *secured* indebtedness. The following terse but comprehensive statement of the law appears in one of the footnotes to Mr. Justice REED's opinion in that case (p. 413): "*A mortgagee shall have his interest run on* upon a bankrupt's estate, because he hath a right in rem, *but as to other interest, it ceaseth on the bankruptcy.* Per Ld. Chan. King, 18 July 1729." In effect, therefore, the filing of a petition under Section 77 is an impounding of subsequent income for the liens under which it was earned. This also is the clear import of this Court's decision in *Sexton* v. *Lloyds Bank*.[8]

In the case now before this Court, the petition was filed August 2, 1935, and the effective date which the Interstate Commerce Commission has assigned to the plan is January 1, 1939.[9] Accordingly, the creditors are to receive upon their principal obligations, either in cash or securities, interest accrued at existing contract rates up to August 2, 1935, and thereafter until January 1, 1939; but for the period *after* January 1, 1939 (to the extent that their creditor status is permitted to survive) they are to receive interest accrued at the rates to be prescribed in the new securities. The result of this is that for approximately three and one-half years out of the seven years elapsed since August 2, 1935, the lien and secured creditors are to

---

7. 303 U. S. 406.

8. 219 U. S. 339.

9. Tr. 307.

be given recognition for interest on the basis of the pre-bankruptcy contract, and for the three and one-half years of the same seven year period (*i. e.* from January 1, 1939 to date) their interest adjustment will be on the basis of the new or substituted contract; but for neither of these two periods do they receive what the law gives them—the income actually earned under their respective liens.

The Debtor submits that reorganization plans under Section 77 should be made effective as of the date of the filing of the petition as contemplated by subsection (l) and that the rights of all parties in respect of subsequently accruing interest shall be in accordance with the terms of the substituted securities which they are allotted in reorganization. This will avoid tedious segregation or mortgage section studies of income earned *pendente lite* and will give to interest accruing after basic date the same treatment as is accorded principal and is fair and equitable if the plan itself is sound. No one could criticize as unfair and inequitable a plan otherwise sound which gives identical treatment to both principal and interest. No one could, in our view, contend, however, that a plan is not fundamentally wrong which treats interest for part of the administration period on one basis and for another part of the administrative period on a different basis but ignores in each case the actual income lawfully impounded as applicable thereto.[10]

There is no real problem in formulating a plan as of the basic date of bankruptcy and then carrying the plan for-

10. Whether a secured creditor may stand on his lien for both principal and interest and at the same time participate in the general estate presents a grave question under the Bankruptcy Act which need not be here considered. The rule seems to be settled that a secured creditor cannot prove his entire claim in bankruptcy without surrendering or abandoning his security. (*In re O'Gara Coal Company*, 12 F. [2d] 426.) The mortgage creditors who participate in a reorganization under Section 77 might logically be held to be subject to the same disability without thereby running counter to what heretofore has been deemed fair and equitable in a court of bankruptcy.

ward to any subsequent date selected as convenient and in utilizing for interest adjustments for the post-bankruptcy period the same securities as are given for principal as of basic date. Experienced railway accountants will readily make all of the adjustments and readjustments necessary to carry the capital structure forward to any given date and to expand it by issuing new capital securities in lieu of income that it may be necessary to withhold from distribution. Such a situation is well illustrated by the case now before the Court. As will be shown hereafter approximately $10,000,000 of Trustees' Certificates mature December 1, 1942, and ample funds representing income earned during trusteeship appear to be available for their payment. The use of the cash for this purpose (we shall show hereafter that the law makes its use mandatory) will, however, render impracticable any substantial cash distribution to holders of the new securities issuable under the plan. Additional new securities of precisely the same character as are to be issued under the plan in respect of principal and accrued interest at basic date will of necessity be issued in respect of such part of the $10,000,000 fund as would have been distributed on the new securities so issued if the fund had not been used to pay the Trustees' Certificates. So the holders of new securities will receive for interest after basic date exactly what they receive for interest up to basic date.

Should it be contended here that the provision of subsection (1) fixing all rights as of the date of the filing of the petition, if held to establish the basic date for a plan of reorganization, is inconsistent with the provision of subsection (e) that a finding of *no value* for a *stratum* of debt or for a class of stock in order to exclude it from the right to vote upon a plan of reorganization shall give effect to the value of the estate at "the time of the finding" it is

submitted that the contention is without merit. No inconsistency exists. The provision of subsection (e) is merely a recognition of the constitutional rule that a valuation involving possible confiscation must be on a current basis or equated to a current basis. It does no more than assure a class excluded from a plan predicated upon obsolete values the right to vote down such plan and to require the formulation of a new plan on the basis of current values. The new plan would bear the same date as the original plan corresponding to the date of bankruptcy but would establish rights translated into new securities reflecting true values instead of depression values and would give the precise relief contemplated by Section 77.

But if the Court shall conclude that a lawful plan may be formulated on the basis of the Debtor's funded debt with the capital structure moved forward and interest added to a date subsequent to bankruptcy at contract rates regardless of whether it was earned or unearned, and if earned regardless of where earned, then we submit that the plan should be moved forward to the latest practicable date which, if it be the January 1 or July 1 following the date of certification of the plan to the District Court could conveniently be made to coincide with the actual date of judicial confirmation.

II. The new Plan should be purged of the discriminatory treatment attempted to be given Reconstruction Finance Corporation.

Reconstruction Finance Corporation is the owner and holder of approximately $10,000,000 principal amount of Trustees' Certificates representing a debt incurred by the Trustees, as officers of the Court, and not by the Debtor, but constituting a first and paramount lien upon all of the Debtor's railways and other

properties and, in addition, Reconstruction Finance Corporation is the owner and holder of the Debtor's collateral notes in the principal amount of $2,963,000, secured by the pledge, among other things, of $11,750,000 principal amount of the Debtor's General and Refunding Mortgage Bonds which, under the decision of the Interstate Commerce Commission—a decision accepted by the District Court but not dealt with on this point by the Circuit Court of Appeals—are for all practical purposes subordinate to the lien of $49,290,100 principal amount of the Debtor's First Mortgage Bonds. Nevertheless, the Interstate Commerce Commission in the Plan certified to the District Court advanced or elevated the claim of Reconstruction Finance Corporation represented by the Debtor's notes in the principal amount of $2,963,000, so that this claim is given parity of treatment with the holders of the Debtor's First Mortgage Bonds. This discriminatory treatment of the claim of Reconstruction Finance Corporation, so plainly violative of the rule of strict priority, is sought to be justified upon the theory that Reconstruction Finance Corporation is to aid consummation of the Plan by buying at par (or accepting at par in exchange for its Trustees' Certificates in like principal amount) $10,000,000 principal amount of First Mortgage Bonds of the reorganized Company, bonds which witnesses undertook to testify would not be worth, when issued, more than 90% of their face.[11] The difficulties here are threefold: first, there is no commitment whatsoever on the part of Reconstruction Finance Corporation to buy the new Bonds at par or at any other price (nor any commitment to exchange the Trustees' Certificates for the new Bonds); secondly, it was quite impossible for any witness to place a dependable value upon new Bonds to be

---

11. Tr. 1530, 1537.

issued, one, two or three years hence; and, thirdly, neither the Interstate Commerce Commission nor the Court made any finding as to the amount of the claimed deficiency of which the expectation of financial aid from Reconstruction Finance Corporation was assumed to be the "equitable equivalent." Such an expectation is not a valid consideration to support the displacement or dilution of senior liens. If the new Bonds at the time of issue are not worth par, the Reconstruction Finance Corporation need not buy them and the reorganization may fail. If the new Bonds are worth par, then the Reconstruction Finance Corporation becomes the beneficiary of any premium and the unlawful discrimination in its favor is aggravated.

This question will in all probability be academic if either of the two major lien claims are decided *against* the First Mortgage and in favor of the General and Refunding Mortgage in accordance with the brief of Irving Trust Company, adopted by the Debtor, because such a decision would indicate a collateral value for the General and Refunding Mortgage Bonds pledged as security for the $2,963,500 of the Debtor's notes held by Reconstruction Finance Corporation sufficient to entitle such notes to payment in cash or at least to parity of treatment with the Debtor's First Mortgage Bonds.

Moreover, changed economic conditions since the Commission's Plan was formulated appear to have so improved the cash position of the Trustees as to assure ample funds for the payment of the Trustees' Certificates at their maturity on December 1, 1942. Indeed, $6,000,000 has been deposited as dollar collateral for these Trustees' Certificates in consideration of the abatement of all interest on $6,000,000 of the principal indebtedness represented there-

by.[12] Assuming that an extension of the Trustees' Certificates at their maturity on December 1, 1942, is the legal equivalent of a new loan (we cannot see how it can be treated otherwise) an extension becomes inadmissible because (a) Trustees' Certificates secured by dollar collateral would be readily marketable among banks and like investors at a very low interest rate and it would not be possible truly to certify as required by Section 5 of the Reconstruction Finance Corporation Act that the money cannot be obtained on reasonable terms in ordinary channels, and (b) Trustees' Certificates may only be lawfully issued in derogation of existing liens for a very limited number of purposes which do not include the maintenance of a large cash fund greatly in excess of essential working capital.

Should it become necessary, however, to look to Reconstruction Finance Corporation for any cash to be provided under a new plan of reorganization by the sale of Bonds of the reorganized Company and to give it preferred treatment in consideration thereof, it is submitted that there must be included in the arrangement a factor which does not now exist—there must be included therein a binding commitment on its part to perform the undertaking which is the consideration for such preferred treatment, subject only to such authorization as may be required by law.

III. The new Plan should provide for the surrender to the Debtor for restoration to the owners of all accommodation collateral pledged under its secured notes.

In the late depression period when the Debtor was endeavoring to protect interest payments upon its First Mortgage Bonds and at the same time finance the completion of the Northern California Extension, the A. C. James Co. loaned

12. Statement of System Operating Results for July, 1942, dated September 16, 1942. The Trustees have applied for instructions as to the action to be taken at the maturity of the Certificates and have forecast available cash for payment amounting to approximately $12,000,000.

the Debtor certain collateral which was pledged by the Debtor to Reconstruction Finance Corporation and The Railroad Credit Corporation with full knowledge on the part of these pledgees that they were receiving accommodation collateral. The Commission's original report provided:

> "The plan should provide, however, that its approval and confirmation in no wise disturbs or alters the rights of the Reconstruction Finance Corporation and the Railroad Credit Corporation in collateral pledged with them by parties *other* than the debtor."[13]

> "The plan should provide further that all collateral pledged by the debtor as security for its notes to the Reconstruction Finance Corporation, Railroad Credit Corporation, and A. C. James Company shall be surrendered to the reorganized debtor."[14]

In substance, the Commission provided that the collateral owned and pledged by the Debtor should be surrendered to the reorganized Company but that the accommodation collateral borrowed from others and pledged by the Debtor should be confiscated; or, to state the proposal somewhat differently, the accommodation collateral is to be resorted to first instead of last as is required by the most elemental principles of equity and by the authorities cited below.[15]

The Institutional Bondholders' Committee requested certain modifications of the original report of the Interstate Commerce Commission, including a modification requiring

13. Tr. 271.

14. Tr. 280.

15. 49 Corpus Juris, 982, 986;
Commercial Nat. Bank v. *National Surety Co.*, 259 N. Y. 181;
Matter of Cooke, 147 Misc. 528;
Robinson v. *Roe*, 233 Fed. 936.

that "all collateral pledged by others than the Company * * * be surrendered to the pledgors thereof."[16] The Debtor itself proposed that the following provision be inserted in any plan approved by the District Court:

> "All collateral pledged by others than the Company as security for the Company's notes to R.F.C., R.C.C. and A.C.J. shall be surrendered to the pledgors thereof, and all collateral pledged by the Company as security for said notes shall be surrendered to the New Company and cancelled, except that R.C.C. shall not release or surrender any right or interest in the distributive shares of the Company or its subsidiaries under the Marshaling and Distributing Plan, 1931, but any proceeds from such distributive shares after the effective date of the Plan, shall become the property of and be retained by the R.C.C., but to the extent to which received prior to the issue of the new securities under the Plan shall be applied in reduction of the claim of the R.C.C. in respect of which such new securities are to be issued at the rates provided in Article IV."[17]

The Interstate Commerce Commission declined to approve the proposal that all collateral pledged by others than the Debtor be surrendered to the pledgors thereof.[18] The learned District Court did not deal with this subject correctively or otherwise. The suggestion was made in the District Court and in the Circuit Court of Appeals, and we understand it is repeated here, that the District Court has no jurisdiction under Section 77 to deal with the accommodation collateral. This is a strange suggestion. Why a party who loans the Debtor collateral instead of money is not a creditor of the Debtor entitled to the protection of the

16. Tr. 812.

17. Tr. 878.

18. Tr. 345.

bankruptcy court is not at all clear. In the new plan a provision for the restoration of the accommodation collateral to the owners as proposed by the Debtor, which is a provision identical in principle with the one proposed by the Institutional Bondholders' Committee, should be included.

IV. The new Plan should be carried out by the Debtor and not by a Reorganization Committee.

Provision is made in the plan certified by the Interstate Commerce Commission to the District Court for a reorganization committee consisting of three members, one appointed by the Institutional Bondholders' Committee, one by Reconstruction Finance Corporation, and one jointly by the Debtor's two remaining holders of secured notes.[19] It may be noted in passing that inasmuch as the Institutional Bondholders' Committee represents only $16,941,400 out of $49,290,100 of First Mortgage Bonds, no recognition or voice in reorganization is given to $32,348,700 of First Mortgage Bonds which the Committee does not represent.[20] Moreover, it seems quite evident that the creditor position of Reconstruction Finance Corporation is in process of rapid liquidation.

If there is to be a reorganization committee under the new plan it should, we submit, be more distinctively representative than the Committee provided for in the Commission's Plan.

There may be cases, but this is not one of them, where a reorganization committee can serve a useful purpose.

Here the reorganization committee is assigned two general functions—

---

19. Tr. 395.

20. Tr. 1855.

First—To determine the form and character of the securities and incidental instruments created and executed under the plan, and

Second—To name the first board of directors of the reorganized Company.

The first of these functions is largely theoretical. The form and character of the securities will appear in great detail in the orders of the Commission but if and to the extent that features are left open they will necessarily conform to standards recognized and accepted by creditor interests. Whether there is or is not a reorganization committee, such problems will be solved in conference by counsel representing the parties to the present proceeding. Little will be gained by giving these same counsel an additional title as counsel for a reorganization committee. If differences between parties are not solved in conference they should be reconciled by the Judge and not committed to the decision of a reorganization committee of the character here proposed.

The second of these functions—the one involving the selection and setting up of the first board of directors of the reorganized company—is of greater practical significance.

At or near the end of the Commission's final report dated June 21, 1939, among the sections dealing with matters of mechanics and detail, is the following paragraph under the caption,

"*Management*"

"Under the modified plan of the bondholders' committee the board of directors of the reorganized

company would consist of not less than 7 nor more than 11 members, who would be elected by the stockholders of the reorganized company at an election to be held not later than 90 days after the consummation of the plan. Pending such election the board of directors would consist of such persons as may be designated by the reorganization committee with the approval of the court.

Conclusion.—We find that the foregoing provisions should be incorporated in the modified plan."[21]

Persons unfamiliar with the technique of corporate control would attribute no real importance to a temporary board of directors which is to be superseded by a definitive board elected by the stockholders within ninety days. They would assume all functions of such interim board to be wholly within the category of what is strictly routine. With but a single exception this assumption would perhaps be quite correct. This exception is the function of the temporary board to name the proxy committee which will officially solicit proxies to be voted by the management for the permanent board to be elected by the stockholders. Its exercise will, of course, enable the reorganization committee to dictate the composition of the permanent board which in turn will name the proxy committee for the stockholders' meeting to be held in the following year. This process, repeated from year to year, will assure due maintenance and preservation in corporate control and management of a sound "apostolic succession."

Since a majority of the reorganization committee will be named by the Institutional Bondholders' Committee in conjunction with Reconstruction Finance Corporation, we set out in the subjoined footnote the constituents of the

21. Tr. 354.

group which the Committee represents.[22] From this it appears that by reason (a) of ownership of $9,852,400 out of $16,941,400 of the group Bonds by the Metropolitan Life Insurance Company and The Prudential Insurance Company of America, and (b) the composition of the Committee itself, one of its three members being the Chairman of the Board of the Metropolitan Life Insurance Company and another being the Financial Vice President of The Prudential Insurance Company of America, complete control of the Institutional Bondholders' Committee rests in these two insurance companies. Upon liquidation, which seems imminent, of the loans held by Reconstruction Finance Corporation, it will, of course, cease to be a factor, leaving the control of the reorganized Company safely lodged in the Metropolitan Life Insurance Company and The Prudential Insurance Company of America.

Without intending to reflect in the slightest degree upon these splendid institutions the Debtor submits that such a result is out of line with the underlying purpose and intent of Section 77 and that in proceedings under that Section a reorganization committee should be the exception and not the rule. At least this should be the governing principle in those cases (of which we maintain the present case is pre-eminently one) where the value and earning power of the Debtor's properties require that recognition be given to existing stockholding interests. Continuity of management and a minimum disruption of organization and sacrifice of *esprit de corps* are the very

22. Metropolitan Life Insurance Company $6,852,400.00
The Prudential Insurance Company of America 2,000,000.00
The Chase National Bank of the City of New York
As Owner 25,000.00
as Pledgee 4,464,000.00

Home Life Insurance Company 300,000.00
John Hancock Mutual Life Insurance Company 300,000.00

essence of the relief to debtors contemplated by Section 77. For these reasons the Debtor urges that in any new Plan all the present provisions for a reorganization committee should go into the discard and the Debtor be expressly authorized to "put into effect and carry out the plan and the orders of the judge relative thereto, under and subject to the supervision and control of the judge" as provided in subsection (f) of Section 77.

V. The Debtor's unsecured creditors and stockholders may not lawfully be excluded from participating in the new Plan.

In concluding this argument, it may be helpful to the Court if the Debtor presents very briefly and informally its position as to the underlying purposes of Section 77, points out the salient facts of record arranged in sequence bearing upon what the Debtor conceives to be the constitutionally protected value of its properties and then directs attention to the economic changes occurring since the formulation of the Commission's Plan which have revolutionized the railway industry.

Section 77 was approved March 3, 1933, when the world-wide depression was very close to its low point.

By the title of Chapter VIII, of which Section 77 formed a part, and by the text of Section 73, this legislation was declared to be for "the relief of debtors." No one can seriously question therefore that Section 77 was and is a remedial statute subject to liberal construction for the protection and preservation of the property rights of the debtors then in jeopardy.

From the Committee Reports and Congressional debates it is clear that Congress assumed that this objective would be attained by means of speedy and economical reorganizations entirely purged of the evils of the past as

exemplified by the 1928 equity reorganization of The Chicago, Milwaukee and St. Paul Railway Company.[23] Indeed, this Court expressly so states in its opinion in *Continental Illinois Bank and Trust Company* v. *Chicago, Rock Island and Pacific Railway Company.*[24]

Since the Debtor itself had placed the same interpretation upon Section 77, it undertook to prepare and agree with its creditors and stockholders upon a plan which could be carried through without any delay and at a minimum cost to the trust estate. The outline of such a plan was annexed to the Debtor's petition as filed under Section 77 on August 2, 1935.[25] At later stages Plans were filed by other parties in interest.[26]

On October 10, 1938, the Interstate Commerce Commission made its report and order promulgating and approving a plan of reorganization which differed from all plans filed by interested parties and with the exception of a plan released somewhat later for the Chicago, Milwaukee, St. Paul and Pacific Railroad Company, is the most drastic plan ever proposed for a major property.[27] On September

23. 131 I. C. C. 615; 282 U. S. 311.

24. 294 U. S. 648.

25. Tr. 8-9, 196.

26. Tr. 196.

27. In The New York Times, April 13, 1941, it appears that in the Commission's Plan for nine major carriers the Commission prescribed annual charges and preferred dividends equivalent to a return under the respective capitalizations (no par value stock taken at $100) as follows:

Chicago & North Western	4.16
Chicago Great Western	4.06
Chicago, Milwaukee, St. Paul and Pacific	3.28
Denver and Rio Grande Western	3.86
Erie (including Chicago and Erie)	4.12
Missouri Pacific	3.95
New York, New Haven & Hartford	4.21
Western Pacific	3.73

This indicates such radical curtailment of senior securities that it will be necessary for the reorganized Western Pacific to earn only 3.73% on such revised capitalization when earnings begin to flow through to the Common Stock.

28, 1939, after various proceedings, including entry of a report and order modifying in minor features its original report and order, the Interstate Commerce Commission certified this drastic plan to the District Court.[28]

It may be observed in passing that what the Interstate Commerce Commission construed as a Congressional demand for drastic reorganizations wiping out equities and junior debt was merely an expression of the ephemeral political views of individual members.[29] This was demonstrated by the subsequent passage of the Chandler Act of July 28, 1939, under which financial readjustments liberal in their provisions for the preservation of equities were carried into effect by the Baltimore and Ohio Railroad Company and the Lehigh Valley Railroad Company.[30] A voluntary financial readjustment without the aid of any legislation was recently perfected by the Boston and Maine Railroad Company, leaving its stock undisturbed.[31]

At December 31, 1938—January 1, 1939, the latter being the effective date assigned to the plan, the Debtor's total outstanding bonds and secured notes, together with $10,000,000 of Trustees' Certificates constituting a paramount lien on the entire trust estate, amounted to $87,712,654. The Debtor has consistently urged and now confidently submits that its properties valued as of that date in accordance with the law of the land represented a sound income producing investment of not less than $120,000,000 (after applying full straight line depreciation to all depreciable property), indicating a residuum of constitu-

31. Moody's Steam Railroads (1942) 120.

tionally protected value of at least $33,287,546.[32] All parties except the Institutional Bondholders' Committee and Reconstruction Finance Corporation have supported this position and two or more reorganization proposals predicated on this approximate valuation were under consideration by the Commission, but all were rejected. As the Court is advised by briefs of other counsel, the Interstate Commerce Commission, without reporting any value for the Debtor's properties, proposed a plan providing for a total capitalization of $97,712,654 (taking no par value stock at $100 per share) all of which is allocated to holders of the Debtor's Bonds and secured notes and the holders of Trustee's Certificates without any provision for the Debtor's unsecured debt and capital stock.

Commissioner Miller, a member of Division 4 (Finance) of the Commission, dissented. We quote from his dissenting report:

> "In connection with capitalization the majority state
>
> > It is true that considered alone, the data pertaining to the rate-making value of the debtor's property, and its investment, would support capitalizations approximating those proposed in the three plans. We have hereinbefore stated, however, the reasons why, in our opinion, those factors can not be of controlling importance in a determination of the capital structure for the reorganized company.
>
> With this conclusion I can not agree but am strongly of the view that the capitalization should be generally on the basis of original cost less depreciation amounting to something over $120,000,000, which is about the same as is proposed in two of the three plans referred

32. The constitutionally protected value is believed to be substantially in excess of $120,000,000 and not lower than the 19A value of $150,000,000. Tr. 1061-1063.

to in the above quotation. The no-par-value common stock may have little or no market value when the company is reorganized, but the issuance in the neighborhood of $30,000,000 more than the majority authorize would give the present stockholders a chance to participate in the future profits of the reorganized company."[33]

It will be assumed (the point is argued by other counsel) that if the value of the Debtor's properties as a whole determined in accordance with subsection (e) of Section 77 exceeds the principal amount of the Debtor's bonds and secured debt and Trustees' Certificates, together with interest accrued to the proper basic date, recognition must be given to the Debtor's unsecured debt, and if it exceeds the combined secured debt and unsecured debt, then also to its capital stock in any *lawful* plan of reorganization under Section 77. This seems implicit in the decision of this Court in *Consolidated Rock Products Company* v. *du Bois*, where it is stated in the opinion of Mr. Justice DOUGLAS:

> "In view of what we have said, it is apparent that a determination of that value must be made so that *criteria* will be available to determine an appropriate allocation of new securities between bondholders and stockholders in case there is an equity remaining after the bondholders have been made whole."[34]

The Debtor submits (a) that upon the facts of record as to which there is no issue or dispute, there can be no lawful value for purpose of expropriation whether by eminent domain or decree in bankruptcy or other forcible divesture below $120,000,000, and (b) that earning capacity

33. Tr. 283, 284.

34. 312 U. S. 510.

established since the record was closed in the Interstate Commerce Commission, which is before the Court by stipulation but of which it would take judicial notice without such stipulation, reflects a constitutionally protected value in excess of $120,000,000.

We will discuss each of these propositions in its order.

(a) Valuation on basis of facts of record. Subsection (e) of Section 77 specifies various factors including "earning power of the property, past, present and prospective" which are to be considered in a determination of value under Section 77, but the specification of earning power is safeguarded by a reference to "the law of the land." By the reference to the law of the land the protection of the Fifth Amendment is read into Section 77 and recognition given to the rule asserted by the Court in *Monongahela Navigation Company* v. *United States*[35] that it does not lie within the competency of Congress to prescribe the test of the property value protected by the Constitution. Included within this protection, when, as here, confiscation is involved, is the right, as held by this Court in *Crowell* v. *Benson*[36] to submit "that issue to a judicial tribunal for determination upon its own independent judgment as to both law and facts."

The following facts are not in dispute and are covered by the Stipulation of Facts and by the Supplemental Record in the District Court, including the System Income Accounts to July 31, 1942:

(1) That the depreciated cost of the Debtor's properties was, as of December 31, 1938, in excess of $120,000,000.[37]

35. 148 U. S. 312.
36. 285 U. S. 22.
37. Tr. 283, 284; 1044-1047; 1062-3; 1114.

(2) That the properties of the Debtor and its subsidiaries are valued by the Interstate Commerce Commission under its drastic Section 19A valuation methods at more than $150,000,000.[38]

(3) That the Debtor's properties have been rehabilitated at a cost of $18,000,000 and henceforth may be operated economically and efficiently with only normal maintenance.[39]

(4) That the Debtor has recently opened up new routes which are profitable *per se* and are contributing greatly increased tonnage to the System lines.[40]

It is our fundamental contention that those factors establish a constitutionally protected value of not less than $120,000,000 which cannot be written down for the purpose of an expropriation of the property by an estimate of earning power based solely upon regulated past earnings; and, unless the Commission's action was wholly arbitrary, it is made clear by the simple process of elimination that such an estimate was the sole factor to which it could have resorted.

Certainly this must be true in the absence of positive evidence that earning power adequate to yield a return upon the capital prudently invested in the properties of the Debtor as they exist today was never realized or, if realized, has been permanently lost.

Facts comparable with those developed in the case of *Atlanta, Birmingham and Coast Railroad Company* v. *United States*,[41] would be necessary, assuming contrary

40. Tr. 1283-1288.

41. 296 U. S. 33.

to what we conceive to be due process of law that regulated earnings can be used at all in a determination of value as a basis for divesture of property.

That case is interesting in a double aspect.

First, it illustrates the category of purposes, all falling short of the expropriation or destruction of property or vested rights for which an administrative body may find and use a property value that cannot be disturbed by a Court unless the action is arbitrary and the finding unsupported by evidence.

Second, it illustrates the kind of factual foundation that would be required to support a finding of impaired or lost earning capacity.

It appeared that the property of the carrier had been actually acquired by another carrier and reorganized in equity and a new capital structure established which included an issue of common stock without par value; that the carrier had sought to place a book value on the new stock predicated upon the Commission's 19A valuation of the property, which was substantially in excess of the actual commercial valuation resulting from the arm's-length acquisition of the property by the Atlantic Coast Line; that the Commission's Bureau of Accounts insisted upon a lower book value somewhat related to the price at the foreclosure sale; and that this issue had finally reached the three-judge court provided for in the Urgent Deficiencies Act.[42] The Interstate Commerce Commission had, however, revalued the property for the purpose of fixing the book value of the new stock in accordance with the views of its own Bureau and in reaching its determination of value it had found among other things that the carrier's traffic—it had its origin in the consolidation of a group

42. 28 U. S. C. A. § 47.

of short line timber roads in Southern Georgia—was approaching exhaustion; that it could no longer earn the return to which it was entitled under its 19A valuation because of insufficient traffic and that its books should reflect its true financial condition. The case having arisen under the Interstate Commerce Act which made the authority of the Interstate Commerce Commission exclusive, the three-judge court held, and this Court affirmed the holding, that there being evidence to support the Commission's finding it was binding on the Court. The question was one of accounting which involved no taking or confiscation of property. The holders of the stock continued to own it and continued to have a constitutional right to earn and retain a fair return in the full 19A valuation of the property represented thereby if the finding of traffic exhaustion should prove erroneous. There was, however, a specific finding that the capacity to earn had been destroyed by exhaustion of traffic, whereas in the case of the Debtor there is not only no such finding or evidence to support such finding but there is positive evidence to the contrary.

In the State of Nevada for a distance of 178 miles the tracks of the Southern Pacific and those of the Debtor, each single track lines, are paired and operated jointly. The two companies use the Western Pacific tracks for all east bound traffic and the Southern Pacific tracks for west bound traffic. The expenses of operation are divided as to the number of cars of the two companies operating over the joint or paired tracks. This has necessitated accurate records of all car movements over this section which incidentally is a complete record of all business moving between the Great Salt Lake and the Sierra Nevada Mountains and its division between these two competing Systems. Charles Elsey, the Debtor's President testified, and his testimony was confirmed by the late Col. J. W. Williams,

the Debtor's Chief Engineer, that the physical condition of the property was better than it ever was in its history with reference to its ability to handle efficiently the traffic tendered to it or to handle a substantially increased traffic, but that it was only moving *one* car out of every *four* over the joint track. *It is apparent therefore that there has been no dearth of business moving between the east and west termini of The Western Pacific Railroad Company and that its only problem is to increase its proportion.* President Elsey further submitted figures based upon traffic over the paired track for the fifteen year period 1924-1939 showing that the Southern Pacific Company started in 1924 with 77.17% of the business against Western Pacific's proportion of only 22.83%, and that from year to year thereafter (with but few exceptions) the Southern Pacific's percentage progressively decreased and the Western Pacific's percentage progressively increased, so that in 1939 only 72.78% of the business moved Southern Pacific and 27.22% was transported by Western Pacific.[43]

Since at the time of the Court hearing the Debtor was moving only one car out of every four passing over the paired track, which represents the great bulk of the Debtor's business, and since it has consistently increased its proportion over the long period to which the data relates, the natural conclusion is that it will continue in the future as in the past to gain progressively on its competitor and if it increases its proportion from one car out of four to one and one-half cars out of four the indicated increase in its total railway operating revenue would approach 50%. If it gains only one-fourth of a car, the increase in railway operating revenue would approach

43. Tr. 1283-1288, 1530. The percentages supplied by the Trustees since the close of the record are:

1940—	S. P. 72.37%	W. P. 27.63%
1941—	S. P. 71.86%	W. P. 28.14%

25%. What this would mean in increased income available for interest and dividends if not measurable is at least suggested by the account of system operations for 1941 compared with 1940 filed herein under Stipulation, which shows that an increase of 27.74% in operating revenue in 1941 over 1940 resulted in an increase in income available for interest and dividends in the amount of $1,897,341.[44] This is in excess of 12% on the capitalization above that proposed by the Commission (taking no par stock at $100) necessary to bring the total up to the minimum of $120,000,000 required by every legally admissible factor in a valuation.

For the foregoing reasons, the Debtor submits in confidence that the action of the Interstate Commerce Commission in seeking to extinguish the equity of its unsecured creditors and stockholders was, in the light of all relevant facts as of October 10, 1938, unsupported and confiscatory.

There remains for consideration the impact of subsequent economic changes.

(b) Established earning power reflects constitutionally protected value above $120,000,000.

As already pointed out, the income accounts of the Debtor's properties for the period from the closing of the record in the Interstate Commerce Commission up to and including July, 1942, are before this Court under Stipulation and independently of the Stipulation as part of its judicial knowledge of the economic history of the period.

The chart forming part of the brief of counsel for the Western Pacific Railroad Corporation (Judge Sloss) shows that the Debtor was passing through the low point of the decade of depression culminating in the secondary reaction of 1938 when the Interstate Commerce Commission ap-

44. Statement of System Operating Results for 1941, dated February 7, 1942, filed February 17, 1942.

proved the plan which afterwards, with only minor modification, was certified to the District Court, and that at the effective date of the Plan the Debtor was definitely on the upgrade.

In 1940, income for fixed charges amounted to $2,653,396.96, an increase over 1939 of $1,268,882.43.[45] In 1941 income available for fixed charges reached $4,551,737.93.[46] This is only slightly less than 4% upon $120,000,000, which the Debtor maintains is the minimum value which may lawfully be placed upon its properties. This figure, however, understates the true available income since it is depressed by retroactive wage adjustments not compensated by rate increases afterwards granted. In the six months' period January-June, 1942, the income available for fixed charges amounts to $4,080,090.[47] This is only $471,647 below what was earned in the full calendar year 1941. Transcontinental railway revenues are invariably heavier in the last half of the year. In 1941 more than 75% of the total year's income was earned in the last six months. If this ratio is maintained throughout 1942, income available for fixed charges should reach $10,000,000. The statement for July, 1942, the latest one filed, shows an increase in revenues over July, 1941, of 48.80%.[48] If this rate of increase persists (and there is every indication of a higher rate) income available for fixed charges for the calendar year 1942 should exceed $10,000,000.

The Petitioners who are supporting the Commission's plan and would, if it is made effective, acquire by allot-

ments of new common stock a very large part of the equity which the Debtor contends belongs to its unsecured creditors and stockholders, insist that current income is not in any sense a measure of true earning capacity but is an incident of the war and must be summarily dismissed from the discussion; that it will end when the war ends and may not be given weight in a permanent valuation of the Debtor's properties.

Contrary to this contention with which the Debtor is in fundamental disagreement, it is submitted that the capacity of the railway transportation systems of the country to assume and to carry the hitherto undreamed of burdens of the present war offers conclusive proof of the kind of earning power referred to in subsection (e) and equally significant proof that these properties have been maintained and equipped not in relation to supposed normal demands or to normal levels of railway operating revenue but in relation to the maximum service that they may render to the public in any great emergency. Railways were fitted into our national economy for private ownership and operation with the knowledge that their earnings would rise and fall with the trends of commercial and industrial activity, but that they nevertheless must stand ready at all times to meet the maximum demand. In the present war emergency they have displayed both a capacity to serve and a capacity to earn and it would be incredibly unjust to forfeit their properties on the theory that their true power of usefulness will only be sporadically invoked.

No one can say, however, that the present day prosperity of the railway industry will end when the war ends. Many economists believe it will increase when the war ends and the United Nations enter upon the stupendous task of rebuilding what has been destroyed and creating a new

economy designed to revolutionize the trade and commerce of the world.[49] Much of this prosperity (as will be demonstrated by data to be submitted to this Court) is not attributable at all to the increased traffic due to the war but is the result of recent advances in the art of railway transportation and the capacity of the carriers to convert a very much higher percentage of their railway operating revenue into distributable *Net Income*. This, of course, is a permanent accretion to the earning power of the carriers.

Much of the present prosperity of the railways is due to the elimination of pre-war competition which was destructive and unsound and may never be restored. The Transcontinental Railways particularly have benefited by

---

49. The following release cabled on September 20, 1942, was made to the British Press by The Honorable Oliver Lyttleton, Chief of British War Production:

"Perhaps this war will turn out to have been far more constructive, even materially, than it has been destructive. The trouble is that most of us do not understand the colossal capacity this modern world has for recreating its wealth, for reconstruction and for production.

I once made a calculation that between the two wars—1914 and 1939—technical improvements in the production of non-ferrous metals such as copper, tin, lead, zinc, etcetera, recreated in that one industry alone more wealth than was destroyed by all the belligerents during the whole of the last war.

One of our troubles is that we take a too deflationary view. We seldom remember that from the year 800 to 1800 advance in the sciences of production was so slow that one could almost say it did not exist. Then from 1800 to 1900, with steam, steel and electricity, the advance was extraordinarily rapid.

But the advance from 1900 to 1942 was infinitely faster. We cannot even measure the ability we have now to produce.

The change-over from war industries to peace industries ought to be extremely simple. Markets will be enormous—bigger than ever before in world history. Take textiles for example. There is today probably not one yard of cloth on the shelves of merchants or in government stores from the eastern boundary of Russia at Vladivostok to the southern tip of Spain. It would take four years of unremitting full time work of all the textile factories now in existence to get the population of Europe back to its peace-time stock of textiles.

Think of the immense demand for building, not only to repair damage done but to catch up with buildings needed but not built during the war.

If labor is redistributed skillfully and our means of exchange are adjusted to our power to produce, then the postwar world ought to see a very great economic renaissance."

cessation of the competition of the Panama Canal. Many well informed persons believe that the Canal will be permanently withdrawn by the Government from commercial operation; but even if Canal competition is ultimately restored it may well be that for many years after the war ends the available vessels can be more profitably utilized in foreign commerce and it is reasonable to assume if full commercial operation of the Canal ever is resumed that tolls will be elevated so as to eliminate concealed subsidies and more truly reflect the cost of the service.

Reasons could be multiplied almost indefinitely to support the view that the existing peak demands for rail transportation service will continue after the war for a period measurable by decades rather than by years. That period will necessarily be one of construction and reconstruction unparalleled in history. No one could possibly predict either its breadth or its duration. Included in the vast economy will be the rebuilding of a world's merchant marine to take the place of what is now being destroyed; the replacement of millions upon millions of motor vehicles whose service lives already are nearing their end; the restoration of maintenance already long deferred and as the war progresses certain to be cumulating in factories, in homes, on farms and in almost every other ramification of the peacetime existence of all civilized peoples.

All of this is indicative of a long lasting era of maximum utility for the rail transportation system of our country adequate to sustain for an indefinite period the present level, if not an even higher level, of railway earnings—but however this may be surely this Court will not permit constitutionally protected investments in the great rail transportation industry to be forfeited because the Interstate Commerce Commission entertains a fear that at some

time in the future our country may suffer the visitation of another depression.

Conclusion

The Debtor asks that the proceeding be referred back to the Interstate Commerce Commission under a mandate to approve a new plan of reorganization which will give it the relief contemplated by Section 77.

Respectfully submitted,

FRANK C. NICODEMUS, JR.,
Counsel for The Western Pacific Railroad Company,
40 Wall Street,
New York, N. Y.

October 1, 1942.

v.

WESTERN PACIFIC RAILROAD CORPORATION, *et al.*

BRIEF OF RESPONDENT, IRVING TRUST COMPANY, AS REFUNDING MORTGAGE TRUSTEE

Respondent, Irving Trust Company, is Trustee under the Debtor's General and Refunding Mortgage dated as of January 1, 1932, under which there are presently outstand-

ing $18,999,500 principal amount (R. 1053) of bonds, all of which are pledged in varying amounts with three creditors of the Debtor, namely, A. C. James Co., Railroad Credit Corporation and Reconstruction Finance Corporation. Such mortgage is hereinafter called "Refunding Mortgage" and this respondent is hereinafter called "Refunding Mortgage Trustee".

The briefs of Frederick H. Ecker, et al., as Institutional Bondholders Committee, and of Crocker First National Bank et al., as Trustees under the Debtor's First Mortgage (Petitioners in Nos. 7 and 8) contain a number of statements respecting the properties subject to the lien of the Refunding Mortgage, which require answer in those proceedings.

Limitations of This Brief

The only points which we propose to answer in this brief are those which relate to the treatment to be given the Refunding Mortgage Creditors in respect of their lien on bonds and stock of Central California Traction Company, Alameda Belt Line and Tidewater Southern Railway Company. On all of these items the Refunding Mortgage is admittedly a first lien.

The questions of dispute concerning the priority of lien (relating to equipment-trust rolling stock, the Northern California Extension and non-carrier real estate) are treated in the Refunding Mortgage Trustee's brief as Petitioner in No. 61, and will not be repeated in this brief.

Cash and Securities on which Refunding Mortgage is Admittedly a First Lien

The Refunding Mortgage is *admittedly* a first lien on the following items:

Cash deposited with Refunding Mortgage Trustee as of January 1, 1939 (R. 1096).		$ 223,732
Note of Tidewater Southern Railway Co., at face amount (R. 1095)		$ 508,278
Stock of Tidewater Southern Railway Co. at par value (R. 1095)		$1,147,955
Central California Traction Company securities (at book value to Western Pacific I. C. C. Ex. 82, p. 16):		
Bonds	$270,000	
Preferred Stock	264,715	
Common Stock	128,952	$ 663,667
Stock of Alameda Belt Line (at par value —I. C. C. Ex. 103)		$ 465,300
Total		$3,008,631.

The Refunding Mortgage Trustee urged in the District Court that the Tidewater Southern stock was worth more than its par value (R. 314)—which was the value used by the Commission—, since the Tidewater Southern had not only paid regular interest on its note but had demonstrated consistent ability to earn an average of $100,000 a year (R. 1098), had furnished revenue to the Debtor of over $500,000 a year on freight interchanged (R. 1098, 1308) and had built up a corporate surplus of over $900,000 (R. 1097). For the purposes of this brief, however, the Refunding Mortgage Trustee does not dispute the value set forth above in respect of the Tidewater Southern stock, so that the question before this Court will relate primarily to whether the stocks and bonds of Central California Traction and Alameda Belt Line have any value.

The Reorganization Plan

Under the Commission's modified Plan of Reorganization, the Refunding Mortgage Bondholders were awarded new income mortgage bonds in the amount of $732,010, which is the exact total of the cash on deposit with the Refunding Mortgage Trustee and the face amount of the Tidewater Southern note (R. 313). They were also awarded preferred stock in the amount of $1,147,955, which is the exact par value of the Tidewater Southern stock (R. 313).

The Commission refused to award any securities in respect to the first lien on the Central California Traction or Alameda Belt Line bonds and stock on the ground that "the lien on the securities of these two companies has no material value" (R. 315). That is, it refused to award any new securities except insofar as the common stock allotted to the Refunding Mortgage creditors may have been based in part thereon.

Before the District Court, the Refunding Mortgage Trustee introduced additional evidence bearing on the value of these bonds and stock.

The Refunding Mortgage Trustee argued below that the Plan was unfair in refusing to award new senior securities in compensation for the first lien on the Central California Traction and Alameda Belt Line bonds and stock; and contended that the entire evidence before the Court required a finding that such bonds and stock had substantial value.

The Effect of the Circuit Court of Appeals Opinion

The opinion of the Circuit Court of Appeals requires the Commission to find "the value of (1) the property subject to the refunding mortgage only * * *" (R. 2670; 124 Fed. 2d at 139). The Refunding Mortgage Trustee believes that compliance with this instruction will result in

a determination that the Central California and Alameda Belt Line bonds and stock have substantial value, and that senior securities should be allocated to the Refunding Mortgage creditors in respect thereof.

The briefs to this Court on behalf of the Institutional Bondholders' Committee and the First Mortgage Trustees attempt to avoid the necessity of any such finding—the First Mortgage Trustees by supporting the Commission's statement that the lien on such securities has no value (Petitioner's brief in No. 8, pp. 25-26), and the Institutional Bondholders' Committee by arguing that the new income bonds and preferred stock issued to the Refunding Mortgage creditors constitute joint compensation for the Tidewater Southern securities and the other bonds and stock (Petitioner's brief in No. 7, pp. 102-03).

I

The income bonds and preferred stock awarded to the Refunding Mortgage creditors by the Commission represent compensation only for the cash deposited with the Trustee and the note and stock of Tidewater Southern.

The record is devoid of any support for the suggestion made by the Institutional Bondholders' Committee that the income bonds and preferred stock allocated to the Refunding Mortgage creditors were intended as compensation in part for the first lien on bonds and stock of Central California Traction Company and Alameda Belt Line.

The income bonds, as pointed out above, were exactly equal in face amount to the cash held by the Refunding Mortgage Trustee plus the face amount of the Tidewater Southern note. Surely cash and interest-paying notes are worth at least an equal amount of income-mortgage bonds. Therefore, none of such income bonds can be regarded as allocable to any other part of the property held by the Refunding Mortgage Trustee.

The preferred stock allocated to Refunding Mortgage creditors was exactly equal to the par value of the Tidewater Southern stock, and obviously was intended to be compensation only for that stock, and not for any other securities. The dividend requirements of such preferred stock are only $57,000, against average earnings of Tidewater Southern exceeding its interest requirements by more than $75,000 per year (R. 1098), without any consideration to Tidewater Southern's additional value as a feeder. Therefore, none of such preferred stock can be regarded as allocable to any other part of the property held by the Refunding Mortgage Trustee.

II

The evidence compels a finding that the bonds and stock of Central California Traction Company and Alameda Belt Line have substantial value.

The value of Central California Traction and Alameda Belt Line lies in the traffic which the Debtor derives from them, rather than in the earnings reflected on their books, but this in no way prevents such value from being real and substantial.

For the evidence bearing on such value, it is necessary to look to the testimony in the District Court as well as the evidence before the Commission. The right of all parties to offer additional evidence in the District Court is conceded (Petitioner's Brief in No. 7, pp. 20-21, 132; Bankruptcy Act, Section 77(e)). The Court, therefore, is not faced with a request to reverse the judgment of the Commission on the facts which were before the Commission, but simply with the question of the fairness of this phase of the Plan on consideration of all the facts in the record before the District Court.

Acquisition and Importance of Central California Traction Company

The Debtor's holdings in Central California Traction Company represent a one-third ownership in the Company, one of the remaining thirds being owned by Atchison, Topeka and Santa Fe Railway Company, and the other by Southern Pacific Company (R. 1042).

Ownership by the Debtor of an equal interest in Central California Traction Company is essential to protect its share of the traffic which originates and terminates on the Central California Traction lines. The Traction Company serves a very rich agricultural district (R. 1315). The Stipulation of Facts Not in Dispute states that the Traction Company has a value to the Debtor as a feeder and would be of value to any corporation which might succeed to its properties (R. 1102).

Mr. Elsey, chief operating officer for the Debtor's Trustees, stated to the Refunding Mortgage Trustee, in a letter which was written in 1937, after the close of the Commission hearings, and which was placed in evidence before the Court (R. 1247-63), some of the reasons why it was necessary to maintain the Debtor's equal interest in the Central California Traction Company.

This letter, designed to obtain the Refunding Mortgage Trustee's cooperation in action being taken by the other holders of the Traction Company's bonds, pointed out the difficulty the Debtor had undergone to obtain its interest in the Traction Company, and the continuing importance of preserving that pro-rata interest.

The circumstances of the Debtor's acquisition of its one-third interest in Central California Traction Company, as set forth in that letter, are extremely pertinent. Until 1927 the Traction Company had been operated as an independent electric freight and passenger railway. During 1925, however, Southern Pacific Company had made an agreement with the owner of the Traction Company to purchase all its

outstanding stock and the major portion of its First Mortgage Bonds. (All publicly-held bonds have since been retired.) When Southern Pacific Company applied for I. C. C. approval of this purchase, the Debtor and the Atchison, Topeka and Santa Fe Railway Company intervened to oppose. The Debtor felt that the matter was so serious that it filed an independent petition to construct a parallel line of railroad in the event the Traction Company ceased to be an independent line, free of control by any interstate railway company (R. 1251).

As a result of the objections by the Debtor and the Santa Fe, the Commission conditioned its permission to Southern Pacific Company to complete the purchase upon Southern Pacific's admitting the Debtor and the Santa Fe to participation equally with said Southern Pacific Company in joint control of Central California Traction Company, upon payment of proportionate shares in the cost of the securities to be acquired (R. 1251).

On the basis of these and other facts, Mr. Elsey stated to the Refunding Mortgage Trustee in such letter (R. 1262-63):

> "Parity has existed between the three parent companies from the beginning, and has been scrupulously maintained throughout the years of joint ownership. The United States District Court here which has jurisdiction of the Western Pacific reorganization proceeding made a special order permitting the Western Pacific Reorganization Trustees to make such advances and payments as might be necessary to protect Debtor's interest therein or to meet its contractual pro rata obligation as to Traction Company (and other affiliates with similar situation).
>
> "It would * * * be most unfortunate and establish a precedent with possibly far-reaching consequences to the future owner of the Western Pacific's Traction Company holdings—for one of the three owners to abandon its participation and parity in all Traction Company dealings—especially as the interest the Western Pacific and Santa Fe acquired in Traction

Company was solely because the Interstate Commerce Commission compelled the Southern Pacific to permit the participation."

The importance of the Traction Company as a source of traffic is shown by the fact that the Debtor's proportion of revenue from traffic interchanged with the Traction Company has averaged approximately $225,000 a year (R. 1102-03), with virtually no falling off even during the depression. In 1939 such proportion of revenue was $268,484 (R. 1311).

Although the Debtor has admittedly been compelled to contribute cash to the Traction Company in most of the years that the Company has operated (Petitioner's Brief in No. 7, p. 19), these contributions have been largely for capital purposes. The Company showed an average income for the five years 1934-1938 of $11,775 (R. 1100) and for the year 1939 of $30,452 (R. 1309). In only one year since 1933 has it shown an operating deficit (R. 1100).

The interest on the Central California Traction bonds pledged with the Refunding Mortgage Trustee has been paid regularly throughout the reorganization. The Stipulation of Facts Not in Dispute makes clear that the Debtor's Trustees "have considered it important that default not be permitted in the payment of interest on the outstanding bonds of the Traction Company or of the Debtor's share of other advances to the Traction Company" (R. 1102).

In the face of these facts, it is clearly unfair and improper to say that the lien on the Central California Traction bonds has no value. If the Debtor's Reorganization Trustees felt it important to maintain interest payments on the Central California Traction Bonds at a time when interest was not being paid on the Western Pacific First Mortgage bonds, the holders of the Central California Traction bonds should certainly receive in satisfaction of their lien on such bonds, at least an equal amount of income bonds of the new Company. They should also receive, in satisfaction of their lien on the stocks which represent a share in control of the Traction Company, preferred stock of the new Company

having a par value at least equal to the book value of the Debtor's Traction Company stock. It may be noted that the book value of such stock on the books of the Traction Company (based on one-third of its stated value plus one-third of the corporate surplus) is $890,862 (I. T. Co.'s Court Ex. 3; R. 1315), or substantially more than its book value on the Debtor's books, $393,667 (I. C. C. Ex. 82, p. 16).

From the nature and circumstances of the property, it is certain that if the Refunding Mortgage were foreclosed and the securities of Central California Traction Company, which are pledged thereunder, were sold, the Refunding Mortgage Trustee could realize a substantial amount from such securities, either by sale to the other proprietary companies or even to outsiders. The Commission's Plan gives no consideration or allowance to this fact.

Importance of Alameda Belt Line to the Debtor

Half the outstanding stock of Alameda Belt Line is owned by Atchison, Topeka & Santa Fe Railway (R. 1103), and half by the Debtor.

The Belt Line furnishes the sole access for Western Pacific to the industrial district of Alameda (R. 1313), and the important Encinal Terminals and docks (R. 2087), which are a source of substantial traffic that might not be available except for the Debtor's participation in ownership of the Belt Line.

As its name implies, the Belt Line is merely a switching facility (R. 1313), and does not share in a division of line-haul rates. It has operated at a deficit which the Debtor has underwritten to the extent of approximately $22,000 per year (R. 1105).

The value of the Belt Line to the Debtor is in the substantial amounts of traffic which it contributes, averaging 4800 carloads per year for the years 1935 to 1938 (R. 1105-06)—years before the war increased the importance of the Alameda docks and industries. Thus the Alameda Belt Line contributed between $315,000 and $331,000 per year to the Debtor's gross revenues (R. 1312-13), which would largely be lost if the Refunding Mortgage lien on the Belt Line were

foreclosed and the stock sold to someone other than the Western Pacific.

Lack of feeders was one of the factors which led to the first reorganization of the Western Pacific in 1916 (R. 1116). In view of the intense competitive situation on transcontinental freight, it is important for the Western Pacific to retain every feeder line in which it has an interest. The very fact that the Debtor's Trustees have felt it advisable to continue to meet their shares of the Belt Line's operating deficits during the period of reorganization shows that they consider it a valuable property. Its physical value, as fixed in Section 19-a proceedings, is over $1,140,000 (R. 1314).

Mr. Elsey was asked at the hearing before the Court:

> "Is it your best judgment that the benefit derived by the Debtor from retaining its participation in the Alameda Belt Line and the Central California Traction Company is greater than any loss through having to make advances to those companies?"

His answer was "Yes, sir" (R. 1315).

In view of this testimony, which was not in the Commission record, and in view of the facts concerning the Debtor's revenue on traffic derived from the Belt Line, which also were not in the Commission record, the conclusion that the lien on the Alameda Belt Line stock has no material value cannot be accepted as a fair basis for allocating new securities under the Plan.

III

The Refunding Mortgage creditors are entitled to senior securities of the new company in compensation for their lien on bonds and stock of Central California Traction and Alameda Belt Line.

As this Court stated in *Consolidated Rock Products Co. v. DuBois*, 312 U. S. 510, 528:

> "Full compensatory provision must be made for the entire bundle of rights which the creditors surrender".

No provision has been made for compensation for the Refunding Mortgage creditors' surrender of their first lien on the Central California Traction and Alameda Belt Line bonds and stock. Yet the Refunding Mortgage creditors are being required (by release of the lien of the Refunding Mortgage—R. 394) to give up their right to have the Refunding Mortgage foreclosed and the Alameda Belt Line and Central California Traction bonds and stock sold thereunder.

The same principle which prompted the Interstate Commerce Commission to award income bonds and preferred stock (the same securities given to First Mortgage bondholders) in recognition of the Refunding Mortgage lien upon the Tidewater Southern note and stock (R. 315) requires that similar income bonds and preferred stock be awarded in recognition of the Refunding Mortgage lien upon the securities of Central California Traction Company and Alameda Belt Line.

Conclusion

This Court should direct that the Interstate Commerce Commission, when the case is referred back to it, award senior securities of the new company to the Refunding Mortgage creditors in exchange for their first lien on the bonds and stock of Central California Traction Company and Alameda Belt Line.

Dated: October 3, 1942.

Respectfully submitted,

H. C. McCOLLOM,
Attorney for Irving Trust Company,
as Successor Trustee under Debtor's
Refunding Mortgage.

Orrin G. Judd,
of Counsel.

REPLY BRIEF ON BEHALF OF A. C. JAMES CO., RESPONDENT

ROBERT E. COULSON,
Attorney for A. C. James Co.

HORACE E. WHITESIDE,
Of Counsel.

SUBJECT INDEX

PAGE

SCOPE OF THIS BRIEF 1

(a) Disregards brief of First Mortgage Trustees on main issue

(b) Deals with certain arguments of Institutional Bondholders Committee and Reconstruction Finance Corporation

(c) Adopts reply brief of General and Refunding Mortgage Trustee on lien issue

POINTS

I. THE PETITIONERS HAVE FAILED TO SHOW ANY FINDINGS OR DETERMINATIONS OF FACT, OR ADEQUATE SUBSTITUTES THEREFOR, TO SUPPORT OR JUSTIFY THE TREATMENT OF THIS RESPONDENT'S CLAIM UNDER THE COMMISSION PLAN .. 4

II. THE COMMISSION PLAN AND THE PETITIONERS' ARGUMENTS ARE BASED UPON PAST EARNINGS OF THE DEBTOR'S PROPERTY AS IT EXISTED PRIOR TO THE SUBSTANTIAL CHANGES MADE FROM 1927 TO 1938, AND NOT UPON THE PRESENT AND PROSPECTIVE EARNING POWER OF THE PRESENT PROPERTY WHICH IS THE PROPERTY TO BE REORGANIZED 7

(a) Significance as to earning power of Northern California Extension, Improvement and Rehabilitation Program and Dotsero Cut-off

(b) Facts as to present demonstrated capacity to earn cannot be disregarded

(c) Petitioners' fourfold classification of degrees of probability is a standard which finds no support in Section 77 or Commission reports

III. PROPERTY VALUES MUST BE DETERMINED AND APPLIED IN TERMS OF DOLLARS AND NOT IN "DEGREES OF PROBABILITY OF PROSPECTIVE EARNING POWER" OR IN "EQUITABLE EQUIVALENTS" ... 14

IV. SECTION 77 OF THE BANKRUPTCY ACT DOES NOT MAKE THE COMMISSION THE "REORGANIZER" OF RAILROADS, SUBJECT ONLY TO REVIEW OF ITS DETERMINATIONS AND CONCLUSIONS AS MERE ADMINISTRATIVE MATTERS 19

IN CONCLUSION 22

REPLY BRIEF ON BEHALF OF A. C. JAMES CO., RESPONDENT

Scope of this Brief

This proceeding is before this Court under petitions and cross-petitions for certiorari. In order to simplify the presentation and eliminate any duplication of effort that might be felt to be necessary in the complicated situation pre-

sented under the rules, the parties, by a letter stipulation dated August 15, 1942, filed with the Court, agreed upon the time schedule for briefs. This stipulation provided, *inter alia:*

> "* * * that on the main issue, briefs for the parties supporting the Commission Plan should be served and filed on September 15, 1942, and briefs for the parties opposing the Commission Plan served and filed on October 3, 1942, and that **any party** may serve and file reply briefs up to the time of the argument."[1]

This respondent has construed the stipulation as authorizing the filing of this brief by the respondent, supplementing its main brief, and dealing with contentions of the parties supporting the Commission Plan which could not conveniently be discussed within the scope of the affirmative presentation of this respondent's main brief.

One of the parties supporting the Commission Plan has now objected to this construction of the stipulation. This respondent, therefore, in compliance with the request of opposing counsel, furnished counsel for adverse parties with page proofs of this brief, in substantially final form, approximately one week before the argument in this Court, and consents to matter in reply to anything herein contained being included in reply briefs of the opposing parties.

In the main brief filed on behalf of A. C. James Co. on October 3rd in these cases, we sought to present the pertinent facts as to the origin of this respondent's secured claim, and its proposed treatment under the Commission Plan, and as to the property and earning power of the debtor, all of which facts clearly indicate that the secured claim of this respondent should be recognized and refunded in full. This respondent's main brief also necessarily dealt affirmatively with the important questions of the construc-

[1] All emphasis in quoted matter has been supplied throughout this brief unless otherwise noted.

tion of Section 77 of the Bankruptcy Act and its proper application to the facts of this proceeding, which questions are necessarily raised by what we conceive to be the basically erroneous interpretation and application of Section 77 by the Interstate Commerce Commission and the District Court in this proceeding.

In connection with the factual analysis and argument, as presented in our main brief, we have answered the arguments and contentions of the petitioners which appear to be directed to or related to the affirmative presentation on behalf of this respondent. It has, however, appeared necessary and desirable to answer in this brief certain contentions of the petitioners which did not conveniently fall within the scope of the affirmative presentation in this respondent's main brief.

The First Mortgage Trustees have not in their briefs confined themselves to a discussion of the points of law and fact raised by the issues of the extent of the coverage of the debtor's First Mortgage and its General and Refunding Mortgage, respectively, and the value of the property securing the bonds issued under each mortgage (subjects properly within the scope of the duties of such trustees), but have aligned themselves with the Institutional Bondholders Committee and Reconstruction Finance Corporation in supporting the Commission Plan and have adopted and reiterated the contentions of those parties.

The Institutional Bondholders Committee (not organized as a representative committee under subsection (p) of Section 77, but acting under the exceptive clause of that subsection) acts for a group of insurance companies and one bank which hold, in the aggregate, only $16,641,400 principal amount of the First Mortgage bonds, out of a total of $49,290,100. Obviously, therefore, the Institutional Bondholders cannot, under the express provisions of Section 77, represent the remaining $32,648,700 of First Mortgage bonds of the debtor. Under the restrictive provisions of subsection (p) of Section 77, the Institutional Bondholders may act together **"for their own interests and not for others".**

Nor may the First Mortgage Trustees represent the remaining $32,648,700 of First Mortgage bonds of the debtor since subsection (c) (7) of Section 77, which permits the Trustees to file a claim in behalf of all bonds outstanding under their mortgage expressly provides:

> "• • • nothing herein shall constitute such trustee or trustees, the representative or representatives of such holders [bondholders] for the purpose of accepting or rejecting any plan of reorganization."

Congress could not have adopted language by which to prohibit more clearly the active support of the Commission Plan in this proceeding by the First Mortgage Trustees. Those who would represent security holders in a proceeding under Section 77 must comply with the requirements of subsection (p).

It would appear, therefore, unnecessary to make any reply, on behalf of A. C. James Co., to the brief submitted by the First Mortgage Trustees upon the main issues in this controversy. So far as the brief of the First Mortgage Trustees on the lien controversy is concerned, this respondent concurs in and adopts the reply brief filed by the Trustee of the General and Refunding Mortgage. This brief will, therefore, be directed to the briefs heretofore filed on behalf of Institutional Bondholders Committee and Reconstruction Finance Corporation.

POINT I

The petitioners have failed to show any findings or determinations of fact, or adequate substitutes therefor, to support or justify the treatment of this respondent's claim under the Commission Plan.

It is admitted that the Commission found that the securities allocated to this respondent under the Commission Plan would be inadequate to satisfy its claim (R 269), but made no revaluation of the property of the

debtor which would support the refusal to recognize more than half of respondent's secured claim. As is shown in our main brief, neither the prior valuation of the debtor's property, which was reported by the Commission in this proceeding, nor the fully depreciated investment, nor even the capitalization authorized by the Commission Plan, can support this confiscatory treatment of a secured creditor.

The petitioners, Institutional Bondholders Committee and Reconstruction Finance Corporation, have in their briefs conceived elaborate and even ingenious arguments and rationalization (which we believe are demonstrably unsound) in attempting to support the Commission's supposed findings that the equity of debtor's stockholder and the claims of unsecured creditors had no value. **But neither petitioner has even attempted to point out actual findings or determinations of fact which would support the elimination of more than half of this respondent's secured claim.** The treatment of this respondent's secured claim has not been set forth by either petitioner in its "Statement" or mentioned as one of the "Questions Presented".

The Commission has stated that the securities proposed to be given to this respondent will be inadequate in value to satisfy its secured claim in full (R. 269). But the necessity for or fairness of this treatment does not follow from the Commission's prior valuation of the debtor's property, which valuation is clearly in excess of the total of all secured claims (R. 224); it does not follow from the capitalization proposed by the Commission in its Plan which includes 319,441 shares of no par common stock; it does not follow from the preference accorded in the Commission Plan to the Reconstruction Finance Corporation claim, which is also secured by General and Refunding Mortgage bonds, since no sufficient facts or findings appear in justification of such preference; and it does not follow from the supposed findings that the equity of the debtor's stock and claims of unsecured creditors were without value in 1938 and 1939 (R. 269-270).

The conclusion is inescapable from the petitioners' failure to meet this issue that the record and the reports of the Commission are wholly barren of any facts or findings which would justify the elimination of substantially more than half of this respondent's secured claim.

In this connection, the language appearing at page 66 of Reconstruction Finance Corporation's brief demonstrates the petitioners' total inability to justify the treatment of this respondent's claim. The brief says (pp. 65-66):

> "We have demonstrated elsewhere in this brief that the finding of the Commission, approved by the District Court, that the equity and interests of the unsecured creditors and stockholders of the Debtor had no value was unquestionably adequate to support their exclusion from participation in the reorganized company, and that an additional attempted finding of the exact dollar value of the Debtor's assets would have served no useful purpose. **Similar situations may well exist as between senior and junior creditors. Conversely, where it is not controverted that a senior issue is fully satisfied, or that a junior issue has received all that remains after such satisfaction, is it not unnecessary to place a dollar valuation upon the property or securities received by the junior issue?** And where the contributions of different mortgage divisions to the earning power of the total enterprise are clearly shown, may not the new securities, in the application of the determination of this Court in *Consolidated Rock Products Co.* v. *DuBois*, 312 U. S. 510 (1941), that 'the criterion of earning capacity * * * is the essential one,' be distributed essentially on the basis of such contributions without attempting the intermediate formality of a dollar valuation?"

Obviously, the answer to the rhetorical questions posed in the brief must be in the negative where there are, as in this case, three secured creditors holding securities of like character, and one of these creditors is advanced to a position of equality with first mortgage bondholders, while most of this respondent's secured claim is cut off.

POINT II

The Commission Plan and the petitioners' arguments are based upon past earnings of the debtor's property as it existed prior to the substantial changes made from 1927 to 1938, and not upon the present and prospective earning power of the present property which is the property to be reorganized.

In our main brief we have discussed the revenues and earnings of the debtor's property (pp. 21, *et seq.*) and pointed out that the earnings of the property as it existed prior to the substantial changes made from 1927 to 1938 are of little significance in determining present and prospective earning power of the property.

The increases in earning power (in the sense of "capacity to produce earnings") which have necessarily resulted from the construction and operation of the Northern California Extension, the completion in 1938 of the Improvement and Rehabilitation Program, the building of the Dotsero Cut-off on the lines of the Denver & Rio Grande Western, and other relevant factors, have been reflected in the current high level of earnings of the property and in the enhanced prospects for the future. These increases in revenue and earnings are due in large measure to continuing factors other than the war effort. The present enlarged revenues conclusively demonstrate that the transportation facilities now provided by the debtor's plant are "used and useful in the public service". It is no answer to say that the present is a period of industrial expansion instead of industrial depression. The public is clearly entitled to have transportation facilities put at its service adequate to meet its needs in periods of industrial expansion.

The Commission's extended narrative of the past earnings history of the debtor's property (R. 218, *et seq.*, 308, *et seq.*), upon which the Commission Plan was based,

bears little relation to the demonstrated present and future earning capacity of the property. And yet the Commission made only casual reference to the effect of the important changes in the debtor's property which were made from 1927 to 1938, and brushed aside its prior $150,000,000 valuation of the property which had been provided and is adapted and required "for continuing productive use in the service of transportation" (*Securities of Louisville & Nashville R. R.*, 76 I. C. C. 718, 720). If the Commission meant to indicate, what it did not state, that it was reducing its prior valuation as not "justified by the probable earnings reasonably foreseeable for the future" (R. 310), then we contend that it applied a standard which (even though it justified a writing down of the Commission's prior valuations, and this respondent contends it does not) is entirely different from the "earning power" standard of subsection (e) of Section 77.

Furthermore, the Commission's exclusive emphasis on past earnings during the period which included the depression years, and its insistence that not only fixed charges, but contingent charges and dividends, should be covered by "probable earnings reasonably foreseeable" makes it certain, beyond the possibility of successful refutation, that the Commission completely ignored the statutory standard of "earning power of the property, past, present, and prospective, and all other relevant facts."

The Commission also ignored the right of the investor to earn, whenever possible, a reasonable return upon the sound investment devoted to and useful in the public service, and necessary and required to meet all reasonable maximum demands of the public.

In their efforts to support the Commission's capitalization and the resulting Plan, the petitioners have again paraded the past earnings history of the old property, before the substantial changes made from 1927 to 1938 (Institutional Bondholders' brief, pp. 58-60; Reconstruc-

tion Finance Corporation's brief, pp. 9, 37-41), have belittled the demonstrated increase in earning power of the property (Institutional Bondholders' brief, pp. 61-68; Reconstruction Finance Corporation's brief, pp. 41-44, 55), have omitted to mention the actual increased earnings from 1939 to 1942 (Reconstruction Finance Corporation's brief, p. 9) or have sought to minimize or conceal such earnings by reference to theoretical Federal taxes that would have been payable under the unsound capital structure proposed in the Commission Plan if the Plan had been approved and confirmed and in effect during these years (Institutional Bondholders' brief, pp. 6, 7, 62, 63).

In other words, in the eyes of the petitioners, the high level of earnings actually produced by the property during recent years does not demonstrate earning capacity or justify a recognition of the actual investment devoted to the public service. They contend that reduced earnings during years of industrial depression require a write-down of investment. They even contend that theoretical taxes that would be payable after an unjustified and drastic write-down in capitalization should be used to justify the proposed reduction of capitalization by more than forty per cent. This result is manifestly unsound and impracticable, as well as unfair and inequitable to this respondent.

An ingenious attempt to support the Commission's construction of Section 77 appears in the Institutional Bondholders' brief. At pages 56 to 57 of their brief, the Institutional Bondholders apparently admit that the Commission gave no substantial consideration to the investment in the property of the debtor and the Commission's prior valuation as reported in this proceeding (R. 224, 1061-63), since the only evidence of "substantial consideration" suggested in the brief is the fact that the Commission made "many references" to these factors and the Institutional Bondholders' unsupported conclusion

that the earning power of the property is inadequate, taken alone, to support the proposed capitalization.

The brief for the Reconstruction Finance Corporation evades the problem of a discussion of the demonstrated earning capacity of the debtor's railroad system by refraining from any discussion of actual earnings subsequent to the calendar year 1938. It will be remembered that it was in the calendar year 1938 that the Improvement and Rehabilitation Program was completed and the debtor's railroad system, as it exists today, emerged.

The brief for the Institutional Bondholders faces more squarely the facts as to the current level of earnings, but seeks to minimize their significance by a reference (brief, pp. 61-68) to the temporary transportation needs due to war conditions. Not satisfied, however, with the attempt to minimize the current earnings level as allegedly due in large part to war conditions, the brief for the Institutional Bondholders presents tables, charts and graphs where the demonstrated earning power of the debtor's railroad system is substantially reduced by the ingenious device of deducting large sums in taxes, not paid or payable by the debtor, but taxes that the brief insists would have been payable if the drastically reduced scheme of capitalization proposed by the Commission had been in effect (Institutional Bondholders' brief, pp. 7, 58).

There is certainly no adequate attempt made in the brief for the Institutional Bondholders to justify, in relation to the present demonstrated earning capacity of the property, a reduction in asset value from the $150,000,000, which emerged from the Commission's Section 19a valuation proceedings, to the $84,027,559, which amount the Institutional Bondholders' brief (p. 76) calculates would have been the Commission's valuation for reorganization purposes, if it had made such a valuation.

The irrefutable facts as to the present demonstrated earning capacity of the debtor's railroad system can be set out

briefly. The property's earnings available for interest were (as is pointed out in our main brief, pp. 24, 25):

$1,519,916	in	1939
$2,649,797	in	1940
$4,548,138	in	1941
$7,987,512	for the 12 calendar months, August 1, 1941 to July 31, 1942	

Apparently, the Institutional Bondholders' brief intends to build up support for the Commission's theory of capitalization by substantially ignoring the plain standard of valuation of subsection (e) of Section 77, "earning power of the property, past, present, and prospective, and all other relevant facts". Their brief seeks to escape this standard by a process of rephrasing so as to change the content and meaning of the statutory language to the standard of "probable prospective earnings of the property". They fail to face frankly the fact that this latter standard is expressly provided by the statute but in quite a different connection and application. It appears in subsection (b) of Section 77, and is used only in connection with the requirement that fixed charges of the reorganized company shall be adequately covered by the "probable earnings available for the payment thereof". The standard "probable earnings reasonably foreseeable for the future" is frankly invoked by the Commission in explanation of its refusal to recognize investment and value (R. 310), and the same standard apparently provides the basis for the Institutional Bondholders' elaborate attempt to justify the Commission's results.

It is true that the Institutional Bondholders' brief states, at page 38, that the capitalization of the reorganized company was determined "primarily upon the basis of the future earning power of the venture reasonably to be foreseen" and at page 39, that this is the standard of "value for reorganization" adopted by the Commission and approved by the District Court in this proceeding. At other points

in the brief (pp. 40, 64, 81) the Institutional Bondholders state that their "reorganization value" must be supported by "prospective earning power". To add to the general confusion of thought as to the basis upon which the Commission here proceeded, at page 87, the Institutional Bondholders' brief emphatically asserts that this Court in the *du Bois* case insists upon "capitalization of prospective earnings" (a clear departure from this Court's insistence of findings upon **earning capacity**; see 312 U. S. at 525 and 526). Later, the Institutional Bondholders' brief has further rephrased the opinion of this Court in the *du Bois* case and has stated (p. 88) that this Court stresses the "capitalization of earnings" and the "capitalization of prospective earnings" (p. 91). Actually, it is of course significant that this Court, dealing in the *du Bois* case with a statute which did not itself make the clear distinction between "probable prospective earnings" and "earning power", which is found in Section 77, gave, as it did, clear emphasis to **earning capacity**, as distinct from earnings existing at the time, or foreseeable for the immediate future.

Obviously this ingenious rephrasing of the "earning capacity" standard of the *du Bois* decision is in preparation for the figment of "different degrees of probability of prospective earning power" (p. 81 of the brief) which the Institutional Bondholders have created without the slightest evidence of support either in the record or in the reports of the Commission, in an effort to explain the Commission's treatment of capitalization. This fourfold classification of probable future earnings is fully developed at pages 46 and 53 of the Institutional Bondholders' brief. It is adopted in substance in the brief of Reconstruction Finance Corporation (pp. 47, 48, 66).

Three obvious answers can be made to this attempt by the petitioners to build a foundation under the capital structure erected by the Commission in 1937 to 1939:

(a) There is not in Section 77, in either subsection (b) or subsection (e), the slightest authority in support of a

fourfold "probable future earnings" basis for capitalization. The statute expressly and clearly lays down the standard of "probable prospective earnings" for use by the Commission in determining fixed charges, and a standard of "earning power of the property, past, present, and prospective, and all other relevant facts" for use by the Commission in determining values and hence capitalization. Nor can the suggested fourfold classification of probable earnings be read into the opinion of this Court in the *du Bois* case. In fact, that opinion quite properly recognizes the difficulties attendant upon any estimate of future earning power as a whole, difficulties which would prove insurmountable if the petitioners' fantastic scheme should ever be adopted.

(b) There is not the slightest evidence that the Commission in fact used or considered using any such fourfold classification of future probable earnings as that proposed by the petitioners. In fact, the Commission Plan allocates income mortgage bonds, preferred stock and common stock to all classes of creditors and awards to Reconstruction Finance Corporation a preferential distribution of bonds and preferred stock.

(c) The fourfold classification or levels of probable earnings, as conceived by the petitioners, together with their vague doctrine of "equitable equivalents", would, if sanctioned by this Court, represent a complete repudiation of investment and earning power in any proper sense, as the proper yardsticks to be used in determining whether the property rights of investors may be foreclosed for all time, and would permit private rights to be cancelled and annulled in complete disregard of the language of Section 77 and constitutional guarantees.

The Commission's reports in this proceeding (R. 244, 257) make it perfectly clear that the Commission did not give that consideration to the present and prospective earning power of debtor's property and all other relevant facts

which is required by Section 77 of the Bankruptcy Act (see Points I and II, respondent's main brief). The ingenious arguments of the petitioners have not changed or concealed this fact or supplied the findings or determinations and reasons which are lacking in the Commission's reports.

POINT III

Property values must be determined and applied in terms of dollars and not in "degrees of probability of prospective earning power" or in "equitable equivalents".

If there were any doubt that the Commission had failed in its reports in this proceeding to make the necessary findings or determinations of fact which would legally justify and sustain the foreclosure and cancellation of property rights of investors proposed in the Commission Plan, that doubt would be resolved by the extremes to which counsel for the petitioners are driven in their attempts to spell out a justification for the action taken by the Commission and the District Court. In the able brief submitted on behalf of the Institutional Bondholders Committee, counsel, a recognized leader of the reorganization bar, has felt it necessary to devise a new terminology in which to frame the argument that the Commission and the District Court proceeded properly and lawfully. The extremes to which the argument goes is proof of the complete absence of the essential determinations and integrated reasoning as to valuation in the reports of the Commission and the decision of the District Court required to sustain the drastic treatment of investors proposed under the Commission Plan.

A notable instance of the extremes to which counsel for the petitioners have gone is their insistence that, after all, determinations or findings, in terms of dollars, are un-

necessary and meaningless. That the language of those who have negotiated reorganizations has always been, of necessity, one of dollars and cents, just as is the language of business generally, is brushed aside and disregarded by counsel for the petitioners. They brand any requirement of adequate findings and valuation data with such labels as "fictitious mathematical formula", "excessively formalistic, unnecessary and impracticable", "specific dollars and cents findings of value", "precise number of dollars and cents findings", "exact dollars and cents valuation", etc. More specifically, the Institutional Bondholders assert that subsection (e) of Section 77 "does not require the Commission to determine and certify 'value' in detail of exact dollars and cents in every case" (Institutional Bondholders' brief, p. 72) and express no concern over the "failure of the Commission to find a specific number of dollars and cents as the Debtor's prospective earnings" (p. 44).

In support of their argument for the elimination of the dollar sign from reorganization law and practice, the petitioners cite for authority a discursive and diffuse article published in the Yale Law Journal, during the pendency of these cases before this Court, by a member of the New York Bar who has a substantial interest in other reorganization proceedings, the outcome of which may be affected by the decision by this Court of the important questions presented by this proceeding.[1]

In this connection, it should be noted that no respondent in this proceeding has ever asserted that a large railroad property has a "market value" or asked that the "market value" of the property be determined, as is suggested by the petitioners.

Another instance of the ingenuity of counsel for the petitioners in substituting phrasing for reasoning is to be found in their use of language taken from the opinion of

---

[1]Bourne, *Findings of "Value" in Railroad Reorganizations*, 51 Yale Law Journal 1057 (1942). See footnotes 1 and 16 of the article.

this Court in the *du Bois* case. As pointed out in the main brief of this respondent (Point VII), there is a complete absence, in the reports of the Commission and in the decision of the District Court, of any adequate findings or determinations of fact which would support the preferential treatment given the Reconstruction Finance Corporation for its claim as a secured creditor. Counsel for the petitioners attempt to meet this by taking the phrase "bundle of rights" from the decision in the *du Bois* case and giving to it an extended content and meaning. As used in the *du Bois* case, the phrase was quite properly used as a convenient and compact expression of the fact that a secured creditor has something more than a bare right to receive from the debtor a given principal sum and, meanwhile, interest at a given rate. The secured creditor has additional rights, such as a definite maturity for principal, a clearcut and well defined lien upon assets, a right to have payments made by way of amortization, a right to have the property of the debtor kept up and properly maintained, and many other rights arising from his contractual relations with the debtor. He has, in the true sense, in his secured claim, a "bundle of rights".

What the petitioners do with this phrase is to extend it far beyond its original content and use it as a catch basket for two entirely different groups of rights. The Reconstruction Finance Corporation holds two entirely distinct claims: one, a claim against the debtor represented by the debtor's notes secured largely by the same sort of collateral that secures the notes held by The Railroad Credit Corporation and this respondent; the other, a claim on Trustees' Certificates, authorized by the Commission and the Court after the properties of the debtor had passed from the control of the debtor to the custody of the Court, and, which, though secured by a first lien on all the assets of the debtor in the custody of the Court, is in the true sense a debt of the Court rather than a debt of the debtor. To talk about this "bundle of rights" as something which must of neces-

sity be dealt with as a whole and as justifying the preference given the Reconstruction Finance Corporation as to its secured claim against the debtor, without any necessary findings or determinations of fact, is a mere evasion of the issue. Certainly there is nothing in the *du Bois* case which supports the argument.

Moreover, the lack of weight in the argument is somewhat emphasized by the fact that the Trustees of the Court hold, as stated in the Institutional Bondholders' brief (p. 110) an amount of cash adequate to permit the Trustees to pay off and discharge at this time the temporary debt incurred by the Trustees for the maintenance of the properties of the debtor.

The resort to adjectives and catch phrases cannot conceal the absence of essential determinations and integrated reasoning as to valuation in the Commission's reports and the District Court's decision. By their oft repeated protest and by express concession (Institutional Bondholders' brief, p. 22), the petitioners admit the complete absence of findings or determinations of value, in the generally accepted sense, by the Commission and the District Court.

Since findings or determinations of value are required by the decisions of this Court and by Section 77 of the Bankruptcy Act, we again urge that affirmance of the Circuit Court of Appeals for the Ninth Circuit, upon this ground alone, is clearly indicated. Where valuation findings are needed, they must necessarily be stated in terms of dollars and not in terms of "degrees of probability" or in "equitable equivalents".

This is not to say that either the Commission or the District Court is required to initiate a lengthy valuation proceeding (in the sense of the current presentation of expert testimony on inventory of physical properties, reproduction cost of items of property, and the like, such as has been common in rate cases arising in the public

utility field) as has been suggested by the petitioners as a necessary result of insistence upon the requirement of determinations of values and supporting data. In the course of a reorganization proceeding under Section 77 of the Bankruptcy Act, a redetermination of values will ordinarily be entirely unnecessary, as we have pointed out in our main brief (p. 101). We say emphatically to this Court, from the background of contact with this proceeding from its start, that no extended presentation of additional valuation data is necessary or desirable in reorganizing the debtor. Only the attempt of the Commission to exclude entire classes of investors, for the purpose of writing down of the capitalization of the debtor to an extent which is unwarranted, in view of its demonstrated earning power, and unauthorized by Section 77, brings the issue of valuation into the picture.

The valuation data available to the Commission from its labors under Section 19a, including complete data as to the true investment, accepted by all parties to the proceeding, constitutes an entirely adequate basis for reorganization. While the clear right of the Commission, under Section 77, to revalue with reference to "earning power", in the event basic changes have occurred permanently impairing the usefulness of the debtor's railroad system or any part thereof in the public service, is recognized by the respondent, any such revaluation (even if it were justified by the facts here presented), would not involve any extended presentation of valuation data as to elements other than "earning power". If Section 77 were properly construed and a reorganization of the debtor effectuated along the lines indicated in the respondent's main brief (Point V), no valuation proceeding would conceivably be required.

POINT IV

Section 77 of the Bankruptcy Act does not make the Commission the "reorganizer" of railroads, subject only to review of its determinations and conclusions as mere administrative matters.

In our main brief, we have attempted to point out the functions of the Commission and the District Court under a proper interpretation of Section 77; at pages 59 to 70 we have shown that the interpretation urged by us is entirely consistent with the Commission's exercise of its authority under Section 20a of the Interstate Commerce Act. Furthermore, at pages 75 to 81 we have answered specifically the position taken by the petitioners that the Commission was constituted "the reorganizer" by Section 77.

In this connection, however, it should be noted that the position taken by Reconstruction Finance Corporation as to the relative functions of the Commission and the District Court (Reconstruction Finance Corporation's brief, pp. 27 and 70 to 88) would reduce the reorganization process to the same status as rate or service regulations and similar administrative functions which have been expressly delegated to the Commission by Congress, and would take away from the district courts their essential judicial powers as courts of bankruptcy in reorganization matters. The district courts would then sit merely to review, as administrative matters, the determinations and conclusions of the Commission. We will, of course, insist that Congress did not, by the enactment of Section 77, delegate to the Commission exclusive authority and power of adjudication of those phases of bankruptcy law which pertain to the reorganization of railroads or constitute the district courts merely reviewing bodies. There is not the slightest indication that Congress intended such drastic changes.

Furthermore, serious doubts would necessarily be raised as to the constitutionality of Section 77 if it could be interpreted as conferring upon the Commission the powers asserted by Reconstruction Finance Corporation.

While the brief of the Institutional Bondholders, at pages 113 to 138, purports to take a position which would confer upon the Commission exclusive jurisdiction in matters affecting the public interest, while preserving to the Courts their "traditional jurisdiction" to determine questions affecting the contractual rights of creditors and stockholders, the Institutional Bondholders have clearly adopted, in substance and effect, practically the same position as that taken by the Reconstruction Finance Corporation.

This is disclosed by the following language from pages 118-119 of the Institutional Bondholders' brief:

> "Indeed the new legislation, as has already been stated, created a procedure under which the Commission has in effect become substituted for the securityholders as the 'reorganizer' and its expert judgment substituted for the 'bargaining process' among securityholders for the determination, in the first instance, not only of the over-all questions of public interest, such as the total amount and character of capitalization to be issued in the reorganization, but also of the financial and other factual problems affecting the distribution of the capitalization in accordance with the legal rights of the old securityholders."

The above language should be considered in connection with the statement at page 114:

> "The findings and conclusions of the Commission upon questions affecting the public interest, *e. g.*, the amount and classification of the new capitalization, are binding and conclusive upon the Court, in the absence of errors of law or lack of supporting evidence. * * *"

and the statement at page 115:

> "The determination of a capital structure for a railroad is essentially a legislative and not a judicial function."

Obviously the determination of the total amount of the capitalization and the character of that capitalization and the distribution of the securities approved in the reorganization are the most important problems arising in the reorganization process. The determination of the amount and character of the capitalization necessarily affects and delimits private property or rights since thereafter the allocation and distribution of the approved securities is largely determined by the doctrine of priorities as laid down by the Court in *Northern Pacific Railway* v. *Boyd*, 228 U. S. 482 and *Case* v. *Los Angeles Lumber Products Co.*, 308 U. S. 106. If Congress has conferred upon the Commission "exclusive and plenary" power to determine the amount and character of capitalization in the public interest, subject only to the extremely limited review announced by the District Court in this case (R. 1596), then for all practical purposes the security holders of a railroad in reorganization have been deprived of the protection of the courts in respect of determinations which are essentially judicial; and the Commission has been constituted a court of bankruptcy in reorganization matters with far greater powers than any district court or court of bankruptcy has ever possessed.

In connection with this matter we call the attention of the Court to Point VI of our main brief.

There is no support either in the language of Section 77 or in the circumstances which led to its enactment that even remotely tends to sustain the extreme position taken by both petitioners.

In Conclusion, this respondent again prays this Court that it dispose of all substantial issues raised before it in this proceeding, and, on the basis of its construction of Section 77, and its disposition of the substantial issues herein raised, that it affirm the decision of the Circuit Court of Appeals for the Ninth Circuit here under review.

Respectfully submitted,

Robert E. Coulson,
Attorney for A. C. James Co.

Horace E. Whiteside,
of Counsel.

STEDMAN and REEVE SCHLEY, constituting the Institutional First Mortgage Bondholders Committee; and RECONSTRUCTION FINANCE CORPORATION,

Respondents.

ON WRIT OF CERTIORARI TO THE UNITED STATES CIRCUIT COURT OF APPEALS FOR THE NINTH CIRCUIT.

BRIEF FOR PETITIONERS, CROCKER FIRST NATIONAL BANK OF SAN FRANCISCO AND SAMUEL ARMSTRONG, AS TRUSTEES UNDER THE WESTERN PACIFIC RAILROAD COMPANY FIRST MORTGAGE DATED JUNE 26, 1916.

This is a proceeding to review a decision of the United States Circuit Court of Appeals for the Ninth Circuit rendered on November 28, 1941 (R. 2663, 2675), which reversed an order of the District Court of the United States for the

Northern District of California, Southern Division, entered on August 15, 1940 (R. 1569). The order of the District Court approved a plan of reorganization (hereinafter called the "Commission Plan") for the the Debtor, The Western Pacific Railroad Company, which had theretofore been approved and certified to the District Court by the Interstate Commerce Commission (R. 1600), in a proceeding for the reorganization of the Debtor under Section 77 of the Bankruptcy Act, as amended (11 U. S. C. A., § 205).

OPINIONS BELOW.

The Commission's report and order (R. 194, 284) dated October 10, 1938, approving a plan of reorganization for the Debtor, are reported at 230 I. C. C. 61. The Commission's report and order on further consideration (R. 300, 362) dated June 21, 1939, modifying the plan of reorganization approved in the Commission's report and order dated October 10, 1938, are reported at 233 I. C. C. 409. The Commission's report (R. 884) dated September 19, 1939, on which its order (R. 891) dated September 19, 1939, was entered, denying the Debtor's petition for modification of the Commission Plan, is reported at 236 I. C. C. 1.

The opinion of the District Court (R. 1569) dated August 15, 1940, approving the Commission Plan, is reported at 34 F. Supp. 493.

The opinion of the Circuit Court of Appeals (R. 2663) dated November 28, 1941, reversing the order of the District Court, is reported at 124 F. (2d) 136.

JURISDICTION.

The decree of the Circuit Court of Appeals was entered on November 28, 1941 (R. 2675). This decree was amended, in certain particulars not here relevant, by order of the Circuit Court of Appeals filed February 12, 1942, as amended by order of February 16, 1942 (R. 2681, 2682).

The petition for a writ of certiorari in the instant case (No. 8) was filed on December 29, 1941, and was granted on

April 27, 1942, 316 U. S. . Writs of certiorari were also granted on April 27, 1942, to the Institutional Bondholders Committee (No. 7), the Debtor (No. 20), Reconstruction Finance Corporation (No. 33), and the Trustee under the Debtor's General and Refunding Mortgage (No. 61). The writ granted to the Committee in No. 7 raises issues substantially identical with those involved in the instant case; the issues raised by the writs granted in Nos. 20, 33, and 61 are more limited in scope.

The jurisdiction of this Court is invoked under Section 240(a) of the Judicial Code, as amended by the Act of February 13, 1925 (28 U. S. C. A., § 347(a)) and Section 24(c) of the Bankruptcy Act (11 U. S. C. A., § 47(c)).

STATEMENT OF THE CASE.

A concise statement of the case, containing all that is material to the consideration of the questions here presented, appears at pages 4-27 of the brief of the Institutional Bondholders Committee which is being filed in No. 7. To avoid burdening this Court with what seems an unnecessary repetition, we beg leave to refer to that statement in the brief of the Committee and respectfully pray that that statement be deemed incorporated herein for all purposes of Rule 27.

STATUTES INVOLVED.

The statutory provisions involved are contained in Section 77 of the Bankruptcy Act, as amended (11 U. S. C. A., § 205), and in Section 20a of the Interstate Commerce Act (49 U. S. C. A., § 20a). The relevant provisions are set forth in the Appendix, *infra*, pages 35-45.

QUESTIONS PRESENTED.

The questions presented, as set forth in the petition for certiorari, are as follows:

1. Are the Commission's findings (a) that "the equity of the existing stock has no value" (R. 269) and (b) that

"the claims of the unsecured creditors • • • have no value" (R. 269-270), if supported by the requisite valuation data, sufficient to sustain the Commission's conclusions that the stockholders and unsecured creditors should be excluded from participation in the reorganization?

2. As to the following findings of the Commission: (a) that the securities available for distribution to the secured creditors holding notes secured by the pledge of Refunding Bonds "are inadequate in value to satisfy the aggregate claims of these parties" (R. 271), (b) that the "allocation of reorganization securities to" Reconstruction Finance Corporation "exhausts the value of the collateral pledged by the debtor under the notes held by" Reconstruction Finance Corporation (R. 316), and (c) that "the equity of" The Railroad Credit Corporation "in such collateral has no value" (R. 316),—are these findings sufficient, if supported by the requisite valuation data, to sustain the Commission's conclusions that the "value of each of the claims is proportionate to the collateral securing it" (R. 271) and that the allocation of new securities issued in respect of the pledged Refunding Bonds "should be made on the basis of the collateral held rather than on the amount of the claims" (R. 271)?

3. Should the participation in the reorganization of the holders of First Mortgage Bonds and of the pledgee holders of Refunding Bonds, respectively, be "in proportion to the value of their respective claims", ascertained by determining the exact dollar values of (1) the Debtor's entire property, (2) the property subject to the First Mortgage as a first lien and to the Refunding Mortgage as a second lien, (3) the property subject to the Refunding Mortgage as a first lien, and (4) the new securities distributable to each class? Or should their participation be based upon a determination by the Commission, in terms of the new securities, of the "equitable equivalent of the debtor's assets available for the satisfaction" of the respective claims of each class, giving due effect to the relative priorities of the respective mortgages upon system

earnings at the different levels which such earnings must reach in order to service the various classes of new securities and all other factors which should be considered in order that the District Court may approve the result as being fair and equitable?

4. May not the two claims of Reconstruction Finance Corporation, the one represented by the outstanding Trustees' Certificates and the other represented by notes secured by the pledge of Refunding Bonds, be treated as an "entire bundle of rights" and dealt with on the basis of a practicable and fair compromise which will eliminate the necessity of obtaining elsewhere on less favorable terms the new money needed to refinance the outstanding Trustees' Certificates?

5. Does the present record contain sufficient valuation data to support the Commission's findings and conclusions as to what classes are entitled to participate in the reorganization and as to what new securities should be allocated to each of such classes?

6. Does not Section 77 vest exclusively in the Commission jurisdiction to determine whether a plan of reorganization "will be compatible with the public interest", including jurisdiction to determine the amount, character and financial details of capitalization, and is not the scope of the judicial review of the Commission's determination of such matters limited to an inquiry as to whether the Commission's action was arbitrary or in excess of its constitutional or statutory powers?

7. Should not this Court, upon the entire record, reverse the judgment or decree of the Circuit Court of Appeals and affirm the order of the District Court approving the Commission Plan, in view of the public interest in bringing about a speedy termination of the reorganization proceedings, and in order to prevent further and unnecessary litigation of questions which were before the

Circuit Court of Appeals but as to which the Circuit Court of Appeals made no specific determination?

8. Should the costs of a successful appeal be assessed against mortgage trustees whose appearance as appellees before a circuit court of appeals is occasioned solely by reason of the circumstance that the appellants challenge the fairness of the treatment accorded their *cestuis que trustent* under a plan of reorganization approved by the Commission and by a district court, or should such costs be assessed directly against the Debtor's estate?

SUMMARY OF ARGUMENT.

I. Neither Section 77 nor judicial precedent requires the strait-jacketing of the reorganization process with the rigid valuation formula prescribed by the Circuit Court of Appeals.

II. The Commission's findings are sufficient, in the light of the valuation data in the record, to sustain the exclusion of the unsecured creditors and the sole stockholder from participation in the reorganization.

III. The Commission's findings are sufficient, in the light of the valuation data in the record, to sustain the allocations of new securities among the secured creditors.

IV. The District Court correctly conceived the relative functions of the Commission and of the court in approving a plan of reorganization.

V. This Court should, upon the entire record, reverse the decree of the Circuit Court of Appeals and affirm the order of the District Court approving the Commission Plan.

VI. The costs of the appeal should be assessed directly against the Debtor's estate.

ARGUMENT.

POINT I.

NEITHER SECTION 77 NOR JUDICIAL PRECEDENT REQUIRES THE STRAIT-JACKETING OF THE REORGANIZATION PROCESS WITH THE RIGID VALUATION FORMULA PRESCRIBED BY THE CIRCUIT COURT OF APPEALS.

A. The Valuation Formula Prescribed by the Circuit Court of Appeals.

The Circuit Court of Appeals held that the Commission was under a "duty" to determine and certify to the District Court the "values" of sixteen separate items, to enable the District Court to appraise the fairness of the Commission Plan (1) with respect to the exclusion of the unsecured creditors and the sole stockholder from participation in the reorganization and (2) with respect to the allocation of new securities among the secured creditors. "That duty", said the Circuit Court of Appeals, "was not performed" (R. 2668-2671).

In the light of the extensive valuation findings actually made by the Commission, this amounts to a requirement that the Commission make findings of exact dollar values.

Thus interpreted, the decision of the Circuit Court of Appeals means that the exclusion of the unsecured creditors and the sole stockholder from participation in the reorganization must be based upon a finding of the exact dollar value of the Debtor's entire property. It also means that the allocation of new securities among the secured creditors must be based upon a precise mathematical formula, expressed in terms of equivalents of exact dollar values of claims to exact dollar values of new securities, such dollar values to be ascertained by determining the exact dollar values of the properties securing the respective claims and the respective new securities.

If a "duty" rests upon the Commission to make such findings of exact dollar values, from what source does that "duty" spring?

B. **The Provisions of Section 77.**

Turning to Section 77, one searches in vain for language requiring the Commission to make findings of exact dollar values. Indeed, the statute is barren of mandatory provisions with respect to valuation findings of any sort.

Subsection (d) provides, among other things, that

> "the Commission shall render a report and order in which it shall approve a plan, which may be different from any which has been proposed, that will in its opinion meet with the requirements of subsections (b) and (e) of this section, and will be compatible with the public interest; or it shall render a report and order in which it shall refuse to approve any plan. *In such report the Commission shall state fully the reasons for its conclusions.*"[1]

This constitutes the only mandatory provision with respect to findings by the Commission.

Subsection (b) specifies what type of provisions must be, and what type of provisions may be, included in a plan of reorganization. Among those in the mandatory category are "provisions modifying or altering the rights of creditors generally, or of any class of them, secured or unsecured, either through the issuance of new securities of any character or otherwise". Among those in the permissive category are "provisions modifying or altering the rights of stockholders generally, or of any class of them, either through the issuance of new securities of any character, or otherwise".

Subsection (e) requires that the plan be "fair and equitable", that it afford "due recognition to the rights of each class of creditors and stockholders", that it do "not discriminate unfairly in favor of any class of creditors or

[1] Italics in this brief are ours, unless otherwise designated.

stockholders", and that it "conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders." These requirements would seem to be epitomized in the phrase "fair and equitable."[1]

The statute contains only three provisions referring specifically to findings of value by the Commission. None of them is mandatory.

The first two are the provisions in the second paragraph of subsection (e) that submission of the plan "to any class of stockholders shall not be necessary *if the Commission shall have found*, and the judge shall have affirmed the finding, (a) that at the time of the finding the corporation is insolvent, or *that at the time of the finding the equity of such class of stockholders has no value*, or that the plan provides for the payment in cash to such class of stockholders of an amount not less than the value of their equity," and that submission of the plan "to any class of creditors shall not be necessary *if the Commission shall have found*, and the judge shall have affirmed the finding, that the interests of such class of creditors will not be adversely and materially affected by the plan, or *that at the time of the finding the interests of such class of creditors have no value*, or that the plan provides for the payment in cash to such class of creditors of an amount not less than the value of their interests." Curiously enough, the Circuit Court of Appeals held that findings of "no value" made by the Commission in the exact language of these statutory provisions were insufficient to sustain the exclusion of the unsecured creditors and the sole stockholder from participation in the reorganization and held that a finding of the exact dollar value of the Debtor's property was required (R. 2668).

---

[1] This Court, in *Case v. Los Angeles Lumber Products Co., Ltd.*, 308 U. S. 106 (1939), said: "The words 'fair and equitable' as used in §77B(f) are words of art which prior to the advent of §77B had acquired a fixed meaning through judicial interpretations in the field of equity receivership reorganizations" (p. 115), and which were "used to indicate that a plan of reorganization fulfilled the necessary standards of fairness" (p. 118).

The third provision, which was quoted in part by the Circuit Court of Appeals (R. 2670-2671), is found in the last paragraph of subsection (e), reading as follows:

> "*If it shall be necessary* to determine the value of any property for any purpose under this section, the Commission shall determine such value and certify the same to the court in its report on the plan. The value of any property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present, and prospective, and all other relevant facts. In determining such value only such effect shall be given to the present cost of reproduction new and less depreciation and original cost of the property, and the actual investment therein, as may be required under the law of the land, in light of its earning power and all other relevant facts."

Had Congress intended a valuation finding by the Commission to be necessary for testing the fairness of every provision in a plan "modifying or altering the rights" of creditors or stockholders, there would have been no reason to insert the qualifying words "if it shall be necessary". Moreover, there is nothing in the language used which requires that findings of "value" under this provision be stated in terms of exact dollar values. On the contrary, the emphasis placed upon earning power as the ultimate criterion of value[1] indicates that a finding of value expressed in terms of earning power translated into new securities would satisfy every requirement of this provision.

The conclusion seems clear that the supposed "duty" of the Commission to make findings of exact dollar values springs not from any express requirement of Section 77; if such a "duty" exists, it must derive from some requirement inherent in the nature of the reorganization process and implicit in the phrase "fair and equitable".

---

[1] See *Consolidated Rock Products Co. v. Du Bois*, 312 U. S. 510, 526 (1941).

C. **The Judicial Content of the Phrase "Fair and Equitable".**

Equity Receivership Cases.

The decisions of this Court in *Railroad Company* v. *Howard*, 7 Wall. 392 (1868), *Louisville Trust Company* v. *Louisville, New Albany and Chicago Railway Company*, 174 U. S. 674 (1899)—the *Monon* case,—and *Northern Pacific Railway Company* v. *Boyd*, 228 U. S. 482 (1913), established the so-called rule of "full or absolute priority" as a "fixed principle" for judging the fairness of reorganization plans. The rule was applied in *Kansas City Southern Railway Company* v. *Guardian Trust Company*, 240 U. S. 166 (1916), and was elaborated in *Kansas City Terminal Railway Company* v. *Central Union Trust Company of New York*, 271 U. S. 445 (1926), in which the doctrine of "quantitative preference" was announced. The rule laid down in these cases forms a part of the judicial content of the phrase "fair and equitable."[1]

The Court made clear that in these cases it was prescribing merely a standard of fairness, not a rigid formula.

In the *Boyd* case, the Court spoke of a "fair offer" to unsecured creditors and stated (p. 508):

> "This conclusion does not, as claimed, require the impossible and make it necessary to pay an unsecured creditor in cash as a condition of stockholders retaining an interest in the reorganized company. His interest can be preserved by the issuance, on equitable terms, of income bonds or preferred stock."

In the *Kansas City Terminal* case, the Court, after referring to the above quoted statement in the *Boyd* case, said:

> "And we now add that, when necessary, they may be protected through other arrangements which distinctly recognize their equitable right to be preferred to stock-

[1] *Case* v. *Los Angeles Lumber Products Co., Ltd.*, 308 U. S. 106, 115 (1939).

holders against the full value of all property belonging to the debtor corporation, and afford each of them fair opportunity, measured by the existing circumstances, to avail himself of this right." (pp. 454-455.)

"But reasonable adjustments should be encouraged. Practically, it is impossible to sell the property of a great railroad for cash; and, generally, the interests of all parties, including the public, are best served by co-operation between bondholders and stockholders." (p. 455.)

"In such or similar cases the chancellor may exercise an informed discretion concerning the practical adjustment of the several rights." (p. 455.)

In none of these cases did the Court express a view as to the type of findings needed to test the fairness of a reorganization plan.

In *National Surety Co.* v. *Coriell*, 289 U. S. 426 (1933), one of the cases cited by the Circuit Court of Appeals (R. 2672), this Court held that nonassenting creditors were entitled "to a decree based on adequate data" (p. 435). The opinion referred to the "failure to require relevant data before deciding whether the plan should be approved" (p. 436) and declared that "Every important determination by the court in receivership proceedings calls for an informed, independent judgment" (p. 436). But in that case the Court was dealing with a record wholly lacking in basic valuation data; there was no evidence from which a finding of any kind could be made. To hold that a decree must be supported by proper evidence of value is vastly different from holding that, on a record containing abundant valuation data, the decree must be supported by detailed findings of exact dollar values.

First National Bank of Cincinnati v. *Flershem*, 290 U. S. 504 (1934), another of the cases cited by the Circuit Court of Appeals (R. 2672), sheds little light upon the problem we are considering. In that case, this Court found, from the evidence in the record, that the upset price and the sale price were "grossly inadequate" (p.

524) and held that a nonassenting creditor was entitled to receive "that sum in cash which it would have received if the property had been sold at a proper price" (p. 526). For the purpose of ascertaining that sum, the Court directed a "detailed appraisal" (p. 527) of the assets as of the date of the sale. In that case, the problem was to ascertain a dollar amount to be paid in cash. Our problem is quite different—it concerns the fairness of a plan under which bundles of rights represented by old securities are to be exchanged for bundles of rights represented by new securities.

The *Los Angeles Lumber Products* Case.

In *Case* v. *Los Angeles Lumber Products Co., Ltd.*, 308 U. S. 106 (1939), also cited by the Circuit Court of Appeals (R. 2672), this Court reaffirmed and clarified the doctrine of the *Boyd* case and concluded that "that doctrine is firmly imbedded in § 77B" (p. 119).

The sufficiency of the valuation findings was not in issue. The District Court had found that the debtor corporation was insolvent both in the equity sense and in the bankruptcy sense, and the facts in the record so clearly showed that the equity of the stockholders was valueless and that the "alleged consideration furnished by the stockholders" (p. 122) was inadequate that the Court had no difficulty in holding that "as a matter of law the plan was not fair and equitable" (p. 114).

The *Consolidated Rock Products* Case.

In the final analysis, the controversy in this case centers upon the correct interpretation of the decision of this Court in *Consolidated Rock Products Co.* v. *Du Bois*, 312 U. S. 510 (1941), cited by the Circuit Court of Appeals as its chief authority (R. 2668, 2670, 2671-2672). We believe the Circuit Court of Appeals misconceived the import of that decision.

In the *Consolidated Rock Products* case, the Court said (p. 520):

> "On this record no determination of the fairness of any plan of reorganization could be made. Absent the requisite valuation data, the court was in no position to exercise the 'informed, independent judgment' (*National Surety Co.* v. *Coriell*, 289 U. S. 426, 436) which appraisal of the fairness of a plan of reorganization entails."

On the record before it, the Court could not have done otherwise. What was lacking was basic evidence of value and other basic evidence without which no intelligent conclusion as to the fairness of the plan was possible. What evidence there was threw serious doubt upon the findings made by the District Court. The fatal defect in the findings lay in the failure to make a valuation based upon earning capacity.

The key to the decision, we believe, is to be found in the Court's discussion of the method of valuation:

> "From this record it is apparent that little, if any, effort was made to value the whole enterprise by a capitalization of prospective earnings. • • • Findings as to the earning capacity of an enterprise are essential to a determination of the feasibility as well as the fairness of a plan of reorganization." (p. 525.)

> "The criterion of earning capacity is the essential one if the enterprise is to be freed from the heavy hand of past errors, miscalculations or disaster, and if the allocation of securities among the various claimants is to be fair and equitable. • • • Since its application requires a prediction as to what will occur in the future, an estimate, as distinguished from mathematical certitude, is all that can be made. But that estimate must be based on an informed judgment which embraces all facts relevant to future earning capacity and hence to present worth, including, of course, the nature and condition of the properties, the past earnings record, and all circumstances which indicate whether or not that record is a reliable criterion of future performance. • • • The extent and

method of inquiry necessary for a valuation based on earning capacity are necessarily dependent on the facts of each case." (pp. 526-527.)

This flexible realistic approach to the valuation problem is the antithesis of the rigid scholastic formula prescribed by the Circuit Court of Appeals.

That this Court had in mind no strait-jacket requirement is further indicated by its discussion of the doctrine of the *Boyd* case. While insisting that "Full compensatory provision must be made for the entire bundle of rights which the creditors surrender" (p. 528), the Court said:

> "Practical adjustments, rather than a rigid formula, are necessary. The method of effecting full compensation for senior claimants will vary from case to case. * * * But whether in case of a solvent company the creditors should be made whole for the change in or loss of their seniority by an increased participation in assets, in earnings or in control, or in any combination thereof, will be dependent on the facts and requirements of each case. So long as the new securities offered are of a value equal to the creditors' claims, the appropriateness of the formula employed rests in the informed discretion of the court." (pp. 529-530.)

> "If the creditors are adequately compensated for the loss of their prior claims, it is not material out of what assets they are paid. So long as they receive full compensatory treatment and so long as each group shares in the securities of the whole enterprise on an equitable basis, the requirements of 'fair and equitable' are satisfied." (p. 530.)

> "Any other standard might well place insuperable obstacles in the way of feasible plans of reorganization." (p. 530.)

We believe that the judicial content of the phrase "fair and equitable" affords no basis for a requirement that the Commission make findings of exact dollar values.

D. The Practical Requirements of the Reorganization Process.

Finding the exact dollar value of a railroad is like finding the product of two variables. It is an attempt to reduce to certainty that which is inherently uncertain.

A valuation "by a capitalization of prospective earnings" involves two preliminary steps. The first step is to make an estimate of the prospective earnings. This at best can be no more than an informed guess and can reach only an approximate result. The second step is to determine what rate of capitalization to use. This involves a problem of judgment, which is complicated by the practical necessity of capitalizing earnings at different rates in determining what amounts of fixed interest debt, contingent interest debt, and stock the earning power of the enterprise will support. The complexity of this problem increases with the number of different types of securities having varying interest and dividend rates into which the new capital structure is to be classified.

The estimate of prospective earnings must be realistically related to the types of new securities which those earnings are to service. For the servicing of fixed interest debt, earnings must be estimated at depression levels. For the servicing of contingent interest debt, they must be estimated at levels which are reasonably certain to be maintained under "normal" future conditions. For the servicing of dividends on preferred and common stock, still higher levels of earnings may be used, depending upon the degree of probability that those levels will be reached with sufficient frequency to give value to the stock. At those rarefied levels, the inquiry reaches increasingly into the realm of the speculative, and to determine the exact point at which probability of future earnings ceases to be even a reasonable hope is obviously impossible.

The result of such a valuation is logically stated in terms of new securities. Nothing useful can be added by an unrealistic attempt to state that result in terms of exact dollar values.

The futility of requiring findings of exact dollar values becomes even more apparent when separate parts of a railroad system are valued for the purpose of determining the allocations of new securities.

By way of illustration, let us assume that a railroad has a number of divisional first and second mortgages and several system mortgages. Each of the system mortgages is a first lien on certain parts of the system and is further secured by the pledge of divisional mortgage bonds or senior system mortgage bonds, or both, and also by the pledge of stocks and bonds of subsidiary companies. Some of the divisional lines show substantial earnings at comparatively low levels of system earnings, while others do not begin to show earnings until system earnings reach higher levels. This is not an imaginary situation: it is typical of some of the railroads now in reorganization.

To measure the value of the assets contributed to the reorganization by each of the various classes of security holders in such a situation presents a staggering problem. Even with the aid of such devices as earnings segregation studies, severance studies, and contributed traffic studies, no approach can be made to scientific accuracy. Findings expressed in terms of exact dollar values would merely lend a pretense of exactness.

Findings of exact dollar values tend to obscure the real nature of the problem of allocations, because they create the impression that the things valued are exactly equal if the dollar values are equal. The problem of allocations is not one of merely matching dollar values of claims and dollar values of new securities, as the Circuit Court of Appeals apparently assumed when it said (R. 2669) that "fairness requires" that the participation of the secured creditors "should be in proportion to the value of their respective claims". Such a rule of distribution would disregard the "fixed principle" of the *Boyd* case. The problem is rather one of comparing bundles of rights—bundles of rights entitling the holders to assert claims against the income and assets in varying amounts and at varying levels of priority.

The problem cannot be resolved by a precise mathematical formula. Its solution calls instead for the exercise of an informed judgment, a careful weighing of many factors, tangible and intangible, which are not a matter of arithmetic.

Mr. Justice HOLMES has said:

> "Delusive exactness is a source of fallacy throughout the law."[1]

In no field is it more important to bear in mind the wisdom of that remark than in the field of railroad reorganization valuations.

POINT II.

THE COMMISSION'S FINDINGS ARE SUFFICIENT, IN THE LIGHT OF THE VALUATION DATA IN THE RECORD, TO SUSTAIN THE EXCLUSION OF THE UNSECURED CREDITORS AND THE SOLE STOCKHOLDER FROM PARTICIPATION IN THE REORGANIZATION.

The Commission found, with respect to the stock, "that there is no equity over and above the securities hereinbefore approved; *that the equity of the existing stock has no value*, and hence holders of such stock are not entitled to participate in the plan." (R. 269[2].)

The Commission found, with respect to the claims of the unsecured creditors, "that even though all the securities remaining available for distribution after satisfying the claims of the first mortgage bondholders are allotted to the other secured creditors, such securities will be inadequate in value to satisfy their claims * * * *that the claims of the unsecured creditors * * * have no value.*

---

[1] Dissenting opinion in *Truax* v. *Corrigan*, 257 U. S. 312, 342 (1921).

[2] See also R. 294, 393, and 889.

and hence no securities or cash should be distributed under the plan in respect to those claims." (R. 269-270[1].)

In making these findings of "no value", in the statutory language of subsection (*e*), the Commission made findings of the ultimate facts upon which the exclusion of stockholders and unsecured creditors from participation in the reorganization depends. A finding that the equity of the stock has no value is a finding that the value of the Debtor's property does not exceed the Debtor's liabilities. It is in substance and effect a finding of insolvency in the bankruptcy sense. A finding that the claims of a particular class of creditors have no value is a finding that the value of the property available for the satisfaction of those claims does not exceed the amount of the prior claims against that property. An examination of the record will show that it contains abundant valuation data to support these findings.

The Commission had before it comprehensive valuation data, including traffic studies, data as to past earnings, and an estimate of future earnings, as well as data as to the investment in the property and the physical valuation data contained in the Commission's Section 19a valuation. The Commission's report dated October 10, 1938, recites this data in great detail (R. 203-224), and a reading of that report and of the report dated June 21, 1939, will show not only that the Commission gave due weight to all of the various elements of value but that it expressed a carefully considered judgment as to the relative weight to be given to each (R. 203-224, 244, 245-246, 257, and 310). No one, we believe, can seriously contend that the Commission failed to "state fully the reasons for its conclusions."

Additional valuation data was received in evidence by the District Court (R. 1285-1296 and 1300-1317).

We believe that an analysis of the valuation data in the record will convincingly demonstrate the correctness of the Commission's findings "that the equity of the exist-

[1]See also R. 294, 392, and 889.

ing stock has no value" (R. 269) and "that the claims of the unsecured creditors * * * have no value" (R. 269-270).

The opinion of the District Court contains (R. 1591-1592) a tabulation showing the reported and adjusted earnings available for interest for each of the years from 1922 through 1938 and the first ten months of 1939. Since that opinion was written, earnings figures for the full year 1939 and for subsequent periods through the month of June 1942, have been made available in statements filed with the District Court, which are before this Court pursuant to the stipulation of the parties filed July 23, 1942.[1]

Under the Commission Plan, earnings must reach a level of over $3,500,000 per year in order to pay full dividends on the new preferred stock and must reach a level of over $4,600,000 per year in order to pay dividends of $3 per share on the new common stock.

In only five of the twenty years from 1922 through 1941 did the adjusted earnings reach a level of $3,500,000. Those were the years 1925, 1926, 1928, 1929, and 1941. In only one year (1926) did the adjusted earnings reach a level of $4,600,000.

The adjusted earnings for 1939 were slightly over $1,500,000; for 1940 they were slightly over $2,360,000; for 1941 they were slightly over $3,580,000.

On the basis of the Debtor's past earnings record (through 1941), therefore, the total authorized capitalization provided for in the Commission Plan is, if anything, over-optimistic.

Several of the respondents contended before the Circuit Court of Appeals, and will doubtless contend before this Court, that the recent upward trend of the Debtor's earnings is indicative of a prospective earning power

---

[1] A tabulation showing the reported and adjusted earnings available for interest for each of the years from 1922 through 1941 is set forth on page 7 of the brief of the Institutional Bondholders Committee.

sufficient to support a larger capitalization than is provided for in the Commission Plan.

The recent earnings of the Debtor have undoubtedly reflected the effects of increased traffic resulting from the war effort, from the diversion of traffic which would normally pass through the Panama Canal, and from the diversion of traffic which would normally be carried by motor vehicles. These are temporary factors which are a highly uncertain basis for an estimate of future earnings. Against these factors must be offset the possibility of tax increases incident to the financing of the war and the possibility of wage increases and increases in prices of materials, as well as other factors which may produce higher operating costs. War traffic demands are placing a heavy strain upon the physical plant and equipment of the American railroads, while shortages of materials are making adequate maintenance and replacements increasingly difficult. The end of the war may well find the Debtor faced with the problem of financing a rehabilitation program out of greatly reduced earnings.

To erect the new capital structure upon the unsteady foundation of wartime earnings is to build upon a quicksand.

POINT III.

THE COMMISSION'S FINDINGS ARE SUFFICIENT, IN THE LIGHT OF THE VALUATION DATA IN THE RECORD, TO SUSTAIN THE ALLOCATIONS OF NEW SECURITIES AMONG THE SECURED CREDITORS.

A. The Commission's Findings.

The allocations of new securities under the Commission Plan are premised, and we believe correctly premised, upon the complete priority of the First Mortgage over the Refunding Mortgage[1] as a lien on substantially all of

[1] The Debtor's General and Refunding Mortgage.

the Debtor's property, except with respect to certain pledged collateral held by the Refunding Mortgage Trustee.[1] The pledgee holders of Refunding Mortgage Bonds are therefore entitled to receive only (1) whatever new securities are found to be issuable in respect of the pledged collateral on which the Refunding Mortgage is a first lien, plus (2) whatever new securities remain after provision has been made for the refunding of the prior lien Trustees' Certificates and after the holders of the First Mortgage Bonds have been "made whole".

The Commission Plan, after providing for the refunding of the $10,000,000 principal amount of Trustees' Certificates with an equal principal amount of new first mortgage 4% bonds, allocates to the holders of First Mortgage Bonds (a) new income mortgage 4½% bonds in a principal amount equal to 40% of their claim for principal, (b) new 5% preferred stock of a par value equal to 60% of their claim for principal, and (c) new no par common stock in an amount which, taken at $57 per share, is equal to the amount of their claim for accrued interest (R. 317, 390-391). All of the remaining common stock is allocated to the holders of Refunding Mortgage Bonds (R. 317-318, 391-392).

Reconstruction Finance Corporation,[2] which holds all of the outstanding Trustees' Certificates and is also a pledgee holder of Refunding Mortgage Bonds, is given *pari passu* treatment with the holders of First Mortgage Bonds in respect of that portion of its claim which is secured by the pledge of Refunding Mortgage Bonds, as compensation for the sacrifice of rights involved in its acceptance of new long term first mortgage bonds in exchange for the short term Trustees' Certificates (R. 312, 317, 389, 391). As a result of this allocation, the RFC receives 29,360 shares less of new common stock than it would

[1] The determinations of the Commission (R. 261-267) and of the District Court (R. 1597) as to the relative priority of the two mortgages were not disturbed by the Circuit Court of Appeals. The correctness of those determinations is challenged by the petition of the Refunding Mortgage Trustee in No. 61.

[2] Hereinafter referred to as the "RFC".

otherwise receive as a pledgee holder of Refunding Mortgage Bonds. These additional shares of new common stock are allocated to the other pledgee holders of Refunding Mortgage Bonds, namely, The Railroad Credit Corporation[1] and A. C. James Co. (R. 317, 391-392). Common stock is allocated to the RCC at $62 per share.

In addition to their allotment of new common stock, the RCC and A. C. James Co. receive new income mortgage 4½% bonds and new 5% preferred stock in recognition of the value of the pledged collateral on which the Refunding Mortgage is a first lien (R. 315-316). The principal amount of new income mortgage bonds so allocated is equal to the amount of the deposited cash and the principal amount of the Tidewater Southern note held by the Refunding Mortgage Trustee, and the par value of the new preferred stock so allocated is equal to the par value of the Tidewater Southern stock held by the Refunding Mortgage Trustee (R. 313, 315). The Commission found that the lien of the Refunding Mortgage on the pledged securities of Central California Traction Company and Alameda Belt Line "has no material value" (R. 315).

As between the RCC and A. C. James Co., these new securities are allocated in the ratios which their holdings of Refunding Mortgage Bonds bear to the total principal amount of Refunding Mortgage Bonds outstanding, the Commission having found that the new securities "available for distribution are inadequate in value to satisfy the aggregate claims" (R. 271) of the pledgee holders of Refunding Mortgage Bonds, that the "value of each of the claims is proportionate to the collateral securing it" and that the allocation of new securities in respect of the Refunding Mortgage Bonds "should be made on the basis of the collateral held rather than on the amount of the claims" (R. 271).

The Commission further found that the "allocation of reorganization securities to" the RFC "exhausts the value of the collateral pledged by the debtor under the notes

[1] Hereinafter referred to as the "RCC".

held by" the RFC and that "the equity of" the RCC "in such collateral has no value" (R. 316).

The Commission made specific findings with respect to each of the foregoing allocations,[1] and then made the following over-all findings:

> "These securities represent the equitable equivalent of the debtor's assets available for the satisfaction of claims." (R. 316.)
>
> "Based upon our conclusion as to the relative priority, value, and equity of the various claims and the value of the new securities available in exchange therefor, we find that the new securities should be allotted as follows: * * *" (R. 317.)

These findings are in effect findings of "value", expressed in terms of new securities. We believe that they satisfy every requirement of Section 77 and that they are amply supported by the valuation data and other evidence in the record.

B. **The Fairness of the Allocations as Between Holders of First Mortgage Bonds and Holders of Refunding Mortgage Bonds.**

Considering that, as to 40% of their principal claim, the First Mortgage Bondholders are to receive, on a dollar for dollar basis, contingent interest bonds bearing a lower rate of interest and having an inferior lien position, that, as to 60% of their principal claim, they are to surrender their creditor position and receive preferred stock on a dollar for dollar basis, and that, as to their entire claim for accrued interest, they are to receive nothing but common stock on a basis only a little more than favorable than the basis upon which common stock is allocated to holders of Refunding Mortgage Bonds, we believe any con-

---

[1] These findings are summarized at pages 18-21 of the brief of the Institutional Bondholders Committee.

tention that the holders of First Mortgage Bonds are too generously treated is clearly without merit.[1]

Inasmuch as all of the remaining common stock is allocated to the holders of Refunding Mortgage Bonds, that common stock represents the entire value of the second lien of the Refunding Mortgage on the property which is subject to the liens of both mortgages. Consequently, it is unimportant to know the exact value of that property or the exact values of the new securities allocated to the holders of First Mortgage Bonds and the holders of Refunding Mortgage Bonds in respect of that property.

In valuing the pledged collateral subject to the Refunding Mortgage as a first lien, the Commission analyzed and discussed in its report dated June 21, 1939, comprehensive valuation data as to Tidewater Southern Railway Company, Central California Traction Company, and Alameda Belt Line, including traffic studies, data as to earnings, and, in the case of Tidewater Southern Railway Company, physical valuation data contained in the Commission's Section 19a valuation (R. 313-315). The Commission made specific findings as to the separate values of the pledged securities of these companies, its finding as to the value of the pledged Tidewater Southern securities being expressed in terms of new securities and its finding as to the value of the pledged securities of Central California Traction Company and Alameda Belt Line being expressed in the words "the lien on the securities of these two companies has no material value" (R. 315).

In the light of the valuation data as to Tidewater Southern Railway Company, we believe no valid contention can be made that the unsecured Tidewater Southern note has a greater value than an equal principal amount of new income mortgage bonds secured by a second lien upon the Debtor's system or that the pledged Tidewater Southern stock has a greater value than an equal par value of new preferred stock.

---

[1] See *Consolidated Rock Products Co.* v. *Du Bois*, 312 U. S. 510, 527-530 (1941).

We also believe that the data in the record as to the operating losses of Central California Traction Company and Alameda Belt Line (R. 1100-1105, 1309, 1311) fully sustain the Commission's finding that "the lien on the securities of these two companies has no material value" (R. 315).

C. **The Fairness of the Allocations as Between the RCC and A. C. James Co.**

In view of the Commission's findings (a) that the new securities "available for distribution are inadequate in value to satisfy the aggregate claims" (R. 271) of the pledgee holders of Refunding Mortgage Bonds, (b) that the "allocation of reorganization securities to" the RFC "exhausts the value of the collateral pledged by the debtor under the notes held by" (R. 316) the RFC and (c) that "the equity of" the RCC "in such collateral has no value" (R. 316), we submit that the Commission's findings that the "value of each of the claims is proportionate to the collateral securing it" (R. 271), and that the allocation of new securities in respect of the Refunding Mortgage Bonds "should be made on the basis of the collateral held rather than on the amount of the claims" (R. 271) state the obviously correct rule of distribution.

The new securities to be distributed to the RCC and A. C. James Co. comprise all of the new securities remaining after the allocations to the holders of First Mortgage Bonds and after the compromise allocation to the RFC. No additional findings of value are needed to determine the fairness of the allocations as between the RCC and A. C. James Co. Since the RCC and A. C. James Co. are to divide the entire package between them in accordance with a fixed ratio, the value of what is in the package cannot affect the result.

D. **The Fairness of the Compromise Allocation to the RFC.**

The Commission treated the two claims of the RFC as one "bundle of rights" and made an allocation to the

RFC under which the RFC is to receive *pari passu* treatment with the holders of First Mortgage Bonds in respect of its claim as a pledgee holder of Refunding Mortgage Bonds, in consideration of its accepting $10,000,000 in principal amount of new first mortgage bonds in exchange for the $10,000,000 in principal amount of Trustees' Certificates which it holds (R. 312, 317, 389, 391). The basis of the allocation was a practicable and fair compromise. In making this compromise allocation, the Commission took into account the necessity of refunding, or providing new money to pay, the outstanding Trustees' Certificates (which are short term obligations of the Debtor's trustees and rank as an expense of administration prior to the liens of the Debtor's mortgages), as well as the difficulty of financing the retirement of the Trustees' Certificates otherwise than through the RFC (R. 311).

Clearly, the exchange of the short term Trustees' Certificates for long term first mortgage bonds involves a sacrifice of rights by the RFC for which it is entitled to "full compensatory treatment". The question is whether the bundle of rights which the RFC is to receive will give to it more than the full equitable equivalent of the bundle of rights which it is to surrender. This is a question which calls for the exercise of an expert, informed judgment and is a question with which the Commission, by reason of its experience and knowledge of railroad securities, is particularly fitted to deal.

The evidence introduced before the District Court (R. 1530-1567), which indicated the difficulty of marketing the new first mortgage bonds privately (R. 1531-1533, 1545) and which indicated that they probably could not be sold for more than 85 or 90 (R. 1532, 1554), strongly tends to support the Commission's findings.

The problem of dealing with the outstanding Trustees' Certificates is peculiarly one which requires for its solution "practical adjustments, rather than a rigid formula". We believe the Commission has found a fair and sensible solution to that problem.

POINT IV.

THE DISTRICT COURT CORRECTLY CONCEIVED THE RELATIVE FUNCTIONS OF THE COMMISSION AND OF THE COURT IN APPROVING A PLAN OF REORGANIZATION.

The Circuit Court of Appeals criticized, as indicating a "possible misconception" (R. 2672), the following statement in the opinion of the District Court (R. 1588):

> "It cannot be gainsaid that the Commission knows all about the debtor, its property, its history, financial and otherwise, its traffic and revenue, and its financial structure. No official body in the country is better qualified, by reason of experience, ability and specialized knowledge than is the Commission to find the ultimate facts as to the debtor in relation to any of the matters mentioned."

After quoting from the provisions of subsection (e) of Section 77, the Circuit Court of Appeals said (R. 2674):

> "In determining whether a plan of reorganization satisfies the requirements of subsection (e), the court is not concluded by any determination made by the Commission, but may, and must, exercise its own independent judgment; and this is true whether such determination relates to value or to some other subject. Initially, however, the duty of determining the value of any property for any purpose under § 77 rests on the Commission, not on the court."

The above quoted statement of the District Court should be read in the light of the following statement in the District Court's opinion (R. 1596-1597):

> "The two issues of (1) amount and character of capitalization and (2) distribution of new securities are closely related. The determination of the amount and character of the capitalization (a legislative function affecting the public interest) is exclusively within the province of the Commission. The only qualifica-

tion, if any, is that the court shall independently determine whether, in the exercise of its jurisdiction, the Commission has acted fairly, within the bounds of the Constitution, and not arbitrarily. The determination of the questions relating to the distribution of the new securities, including legal priorities and allocations, involves private rights and is a judicial function, within the province of the court."

We submit that the District Court correctly conceived the relative functions of the Commission and of the court in approving a plan of reorganization under Section 77.

Subsection (d) of Section 77, which defines the functions of the Commission in approving a plan of reorganization, confers upon the Commission jurisdiction to determine whether the plan "will be compatible with the public interest." Subsection (e), which defines the functions of the District Court, confers no such jurisdiction upon the District Court. Thus, by the express terms of the statute, jurisdiction to determine whether a plan of reorganization "will be compatible with the public interest" is vested exclusively in the Commission.

We submit that the exclusive jurisdiction of the Commission to determine whether a plan of reorganization "will be compatible with the public interest" includes jurisdiction to determine the amount, character and financial details of capitalization.

It is difficult to imagine a question more clearly involving the public interest than the question whether a railroad is to emerge from reorganization with a sound capital structure. The disastrous effect upon railroad credit and upon the investing public of successive receiverships resulting from unsound capital structures is too well known to require further comment.

Subsection (f) of Section 77 provides that, upon confirmation of a plan, the Commission shall, among other things, "grant authority for the issue of any securities • • • to the extent contemplated by the plan and not inconsistent with the provisions and purposes of" the Interstate Commerce Act.

The phrase "compatible with the public interest" appears in paragraph (2) of Section 20a of the Interstate Commerce Act (49 U. S. C. A., § 20a), which section vests in the Commission "exclusive and plenary" jurisdiction to control the issue of new securities by carriers engaged in interstate commerce. The scope of the Commission's jurisdiction under Section 20a was defined by this Court in *New York Central Securities Corporation* v. *United States*, 287 U. S. 12 (1932) in the following language (p. 27):

> "In creating federal supervision of the issue of securities by interstate carriers, the Congress, so far from making it necessary for the Commission to determine whether there had been compliance with state requirements, expressly provided in subdivision (7) of § 20a that the jurisdiction of the Commission should be 'exclusive and plenary' and that approval other than as specified in that section, should not be necessary."

Section 20a and the decisions construing it form part of the legislative and judicial background against which the phrase "compatible with the public interest" in Section 77 must be construed.

The scope of the judicial review of the Commission's determination that a plan "will be compatible with the public interest" is limited by the well established doctrine of the finality of administrative determinations. A classic statement of that doctrine is contained in the opinion of this Court in *Interstate Commerce Commission* v. *Union Pacific Railroad Company*, 222 U. S. 541 (1912), at pages 547-548:

> "There has been no attempt to make an exhaustive statement of the principle involved, but in cases thus far decided, it has been settled that the orders of the Commission are final unless (1) beyond the power which it could constitutionally exercise; or (2) beyond its statutory power; or (3) based upon a mistake of law. But questions of fact may be involved in the determination of questions of law, so that an order, regular on its face, may be set aside if it appears that

(4) the rate is so low as to be confiscatory and in violation of the constitutional prohibition against taking property without due process of law; or (5) if the Commission acted so arbitrarily and unjustly as to fix rates contrary to evidence, or without evidence to support it; or (6) if the authority therein involved has been exercised in such an unreasonable manner as to cause it to be within the elementary rule that the substance, and not the shadow, determines the validity of the exercise of the power. *Int. Com. Com. v. Ill. Cent.*, 215 U. S. 452, 470; *Southern Pacific* v. *Int. Com. Com.*, 219 U. S. 433; *Int. Com. Com.* v. *Northern Pacific*, 216 U. S. 538, 544; *Int. Com. Com.* v. *Alabama Midland Ry. Co.*, 168 U. S. 144, 174.

"In determining these mixed questions of law and fact, the court confines itself to the ultimate question as to whether the Commission acted within its power. It will not consider the expediency or wisdom of the order, or whether, on like testimony, it would have made a similar ruling. 'The findings of the Commission are made by law *prima facie* true, and this court has ascribed to them the strength due to the judgments of a tribunal appointed by law and informed by experience.' *Ill. Cent.* v. *I. C. C.*, 206 U. S. 441. Its conclusion, of course, is subject to review, but when supported by evidence is accepted as final; not that its decision, involving as it does so many and such vast public interests, can be supported by a mere scintilla of proof—but the courts will not examine the facts further than to determine whether there was substantial evidence to sustain the order."

The applicability of this doctrine to the Commission's determinations of the "public interest" questions under Section 77 is indicated by the expressions of this Court in *Palmer* v. *Massachusetts*, 308 U. S. 79 (1939), and *Warren* v. *Palmer*, 310 U. S. 132 (1940).

In *Palmer* v. *Massachusetts*, this Court said (p. 87):

"The judicial process in bankruptcy proceedings under § 77 is, as it were, brigaded with the administrative process of the Commission. From the re-

quirement of ratification by the Commission of the trustees appointed by the court to the Commission's approval of the court's plan of reorganization the authority of the court is intertwined with that of the Commission."

And in *Warren* v. *Palmer*, this Court said (p. 138):

"The judicial functions of the bankruptcy court and the administrative functions of the Commission work cooperatively in reorganizations."

The dictum of the Circuit Court of Appeals, we submit, is not only contrary to the express provisions of Section 77; it runs counter to a principle of administrative law which has long been established by this Court.

POINT V.

THIS COURT SHOULD, UPON THE ENTIRE RECORD, REVERSE THE DECREE OF THE CIRCUIT COURT OF APPEALS AND AFFIRM THE ORDER OF THE DISTRICT COURT APPROVING THE COMMISSION PLAN.

The opinion of the Circuit Court of Appeals (R. 2663) omits to discuss the correctness of the District Court's determination of many of the issues which were before the Circuit Court of Appeals. Prominent among these issues are those involved in the so-called "lien controversy", which have been specifically brought before this Court for determination by the petition of the Refunding Mortgage Trustee in No. 61.

We shall deal with the issues involved in the "lien controversy" in a separate answering brief to be filed in No. 61. The remaining issues are comprehensively dealt with in the brief of the Institutional Bondholders Committee which is being filed in No. 7,[1] and we shall not burden the Court with a further discussion of those issues.

[1] See, in particular, pages 138-145 of the Committee's brief.

We believe that an examination of the record will convince this Court that the District Court committed no error in approving the Commission Plan.

Unless the questions which the Circuit Court of Appeals left unanswered are settled by this Court, they are likely to become the subject of further litigation, which will result in further and unnecessary delay and expense to the parties concerned. To the end that these reorganization proceedings, which have been pending since 1935, may be speedily determined,[1] we believe that this Court should, upon the entire record, reverse the decree of the Circuit Court of Appeals and affirm the order of the District Court approving the Commission Plan.

POINT VI.

THE COSTS OF THE APPEAL SHOULD BE ASSESSED DIRECTLY AGAINST THE DEBTOR'S ESTATE.

The First Mortgage Trustees in this case are not like ordinary litigants trying a private lawsuit.

The Commission Plan was not proposed by the First Mortgage Trustees. It was formulated by the Commission independently in the exercise of its statutory powers under Section 77, and it was approved by the District Court as being fair and equitable. The efforts of the First Mortgage Trustees before the Circuit Court of Appeals were directed to a defense of the Commission Plan; the Commission did not appear before the Circuit Court of Appeals to defend its plan.

The appearance of the First Mortgage Trustees as appellees before the Circuit Court of Appeals was occasioned solely by the circumstance that the appellants challenged the fairness of the treatment accorded the holders of First Mortgage Bonds under the Commission

---

[1] See *Continental Illinois National Bank & Trust Co. v. Chicago, Rock Island & Pacific Ry. Co.*, 294 U. S. 648, 685 (1935).

Plan and in so doing put in issue the relative priority of the lien of the First Mortgage on important parts of the Debtor's property.

We believe that the public interest in the proper determination of questions affecting the fairness of plans of reorganization under Section 77 makes it important that the courts have the benefit of an adequate presentation of both sides of controversies arising in connection with proceedings for the approval of such plans. Accordingly, we submit that assessing the costs of the appeal directly against the Debtor's estate, rather than against individual parties, is appropriate.

CONCLUSION.

We respectfully submit that the decision of the Circuit Court of Appeals should be reversed and that the order of the District Court approving the Commission Plan should be affirmed.

Dated, New York, N. Y., September 15, 1942.

Respectfully submitted,

ORVILLE W. WOOD,
Attorney for Petitioners, Crocker First National Bank of San Francisco and Samuel Armstrong, as Trustees under The Western Pacific Railroad Company First Mortgage dated June 26, 1916.

ARTHUR A. GAMMELL,
Of Counsel.

Appendix.

The Statutes Involved.

Subsection (b) of Section 77 of the Bankruptcy Act, as amended (11 U. S. C. A., § 205(b)), provides as follows:

"(b) A plan of reorganization within the meaning of this section (1) shall include provisions modifying or altering the rights of creditors generally, or of any class of them, secured or unsecured, either through the issuance of new securities of any character or otherwise; (2) may include provisions modifying or altering the rights of stockholders generally, or of any class of them, either through the issuance of new securities of any character, or otherwise; (3) may include, for the purpose of preserving such interests of creditors and stockholders as are not otherwise provided for, provisions for the issuance to any such creditor or stockholder of options or warrants to receive, or to subscribe for, securities of the reorganized company in such amounts and upon such terms and conditions as may be set forth in the plan; (4) shall provide for fixed charges (including fixed interest on funded debt, interest on unfunded debt, amortization of discount on funded debt, and rent for leased railroads) in such an amount that, after due consideration of the probable prospective earnings of the property in light of its earnings experience and all other relevant facts, there shall be adequate coverage of such fixed charges by the probable earnings available for the payment thereof; (5) shall provide adequate means for the execution of the plan, which may include the transfer of any interest in or control of all or any part of the property of the debtor to another corporation or corporations, the merger or consolidation of the debtor with another corporation or corporations, the retention of all or any part of the property by the debtor, the sale of all or any part of the property of the debtor either subject to or free from any lien at not less than a fair upset price, the distribution of all or any assets, or the proceeds de-

rived from the sale thereof, among those having an interest therein, the satisfaction or modification of any liens, indentures, or other similar interests, the curing or waiver of defaults, the extension of maturity dates of outstanding securities, the reduction in principal and/or rate of interest and alteration of other terms of such securities, the amendment of the charter of the debtor, and/or the issuance of securities of either the debtor or any such other corporation or corporations for cash, or in exchange for existing securities, or in satisfaction of claims or rights or for other appropriate purposes; and may deal with all or any part of the property of the debtor; may reject contracts of the debtor which are executory in whole or in part, including unexpired leases; and may include any other appropriate provisions not inconsistent with this section.

"The adoption of an executory contract or unexpired lease by the trustee or trustees of a debtor shall not preclude a rejection of such contract or lease in a plan of reorganization approved hereunder, and any claim resulting from such rejection shall not have priority over any other claims against the debtor because such contract or lease had been previously adopted. The term 'securities' shall include evidences of indebtedness either secured or unsecured, bonds, stock, certificates of beneficial interest therein, certificates of beneficial interest in property, options, and warrants to receive, or to subscribe for, securities. The term 'stockholders' shall include the holders of voting-trust certificates. The term 'creditors' shall include, for all purposes of this section all holders of claims of whatever character against the debtor or its property, whether or not such claims would otherwise constitute provable claims under this Act, including the holder of a claim under a contract executory in whole or in part including an unexpired lease.

"The term 'claims' includes debts, whether liquidated or unliquidated, securities (other than stock and option warrants to subscribe to stock), liens, or other interests of whatever character. For all purposes of

this section unsecured claims, which would have been entitled to priority if a receiver in equity of the property of the debtor had been appointed by a Federal court on the day of the approval of the petition, shall be entitled to such priority and the holders of such claims shall be treated as a separate class or classes of creditors. In case an executory contract or unexpired lease of property shall be rejected, or shall not have been adopted by a trustee appointed under this section, or shall have been rejected by a receiver in equity in a proceeding pending prior to the institution of a proceeding under this section, or shall be rejected by any plan, any person injured by such nonadoption or rejection shall for all purposes of this section be deemed to be a creditor of the debtor to the extent of the actual damage or injury determined in accordance with principles obtaining in equity proceedings. The provisions of section 96 of this title shall apply to a proceeding under this section. For all purposes of this section any creditor or stockholder may act in person or by an attorney at law or by a duly authorized agent or committee subject to the provisions of subsection (p) of this section. The running of all statutes of limitation shall be suspended during the pendency of a proceeding under this section."

Subsection (d) of Section 77 of the Bankruptcy Act, as amended (11 U. S. C. A., § 205(d)), provides as follows:

"(d) The debtor, after a petition is filed as provided in subsection (a) of this section, shall file a plan of reorganization within six months of the entry of the order by the judge approving the petition as properly filed, or if heretofore approved, then within six months of August 27, 1935, and not thereafter unless such time is extended by the judge from time to time for cause shown, no single extension at any one time to be for more than six months. Such plan shall also be filed with the Commission at the same time. Such plans may likewise be filed at any time before, or with the consent of the Commission during, the hearings

hereinafter provided for, by the trustee or trustees, or by or on behalf of the creditors being not less than 10 per centum in amount of any class of creditors, or by or on behalf of any class of stockholders being not less than 10 per centum in amount of any such class, or with the consent of the Commission by any party in interest. After the filing of such a plan, the Commission, unless such plan shall be considered by it to be prima facie impracticable, shall, after due notice to all stockholders and creditors given in such manner as it shall determine, hold public hearings, at which opportunity shall be given to any interested party to be heard, and following which the Commission shall render a report and order in which it shall approve a plan, which may be different from any which has been proposed, that will in its opinion meet with the requirements of subsections (b) and (e) of this section, and will be compatible with the public interest; or it shall render a report and order in which it shall refuse to approve any plan. In such report the Commission shall state fully the reasons for its conclusions.

"The Commission may thereafter, upon petition for good cause shown filed within sixty days of the date of its order, and upon further hearings if the Commission shall deem necessary, in a supplemental report and order modify any plan which it has approved, stating the reasons for such modification. The Commission, if it approves a plan, shall thereupon certify the plan to the court together with a transcript of the proceedings before it and a copy of the report and order approving the plan. No plan shall be approved or confirmed by the judge in any proceeding under this section unless the plan shall first have been approved by the Commission and certified to the court."

Subsection (e) of Section 77 of the Bankruptcy Act, as amended (11 U. S. C. A., § 205(e)), provides as follows:

"(e) Upon the certification of a plan by the Commission to the court, the court shall give due notice

to all parties in interest of the time within which such parties may file with the court their objections to such plan, and such parties shall file, within such time as may be fixed in said notice, detailed and specific objections in writing to the plan and their claims for equitable treatment. The judge shall, after notice in such manner as he may determine to the debtor, its trustee or trustees, stockholders, creditors, and the Commission, hear all parties in interest in support of, and in opposition to, such objections to the plan and such claims for equitable treatment. After such hearing, and without any hearing if no objections are filed, the judge shall approve the plan if satisfied that: (1) It complies with the provisions of subsection (b) of this section, is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders; (2) the approximate amounts to be paid by the debtor, or by any corporation or corporations acquiring the debtor's assets, for expenses and fees incident to the reorganization, have been fully disclosed so far as they can be ascertained at the date of such hearing, are reasonable, are within such maximum limits as are fixed by the Commission, and are within such maximum limits to be subject to the approval of the judge; (3) the plan provides for the payment of all costs of administration and all other allowances made or to be made by the judge, except that allowances provided for in subsection (c), paragraph (12) of this section, may be paid in securities provided for in the plan if those entitled thereto will accept such payment, and the judge is hereby given power to approve the same.

"If the judge shall not approve the plan, he shall file an opinion, stating his conclusions and the reason therefor, and he shall enter an order in which he may either dismiss the proceedings, or in his discretion and on motion of any party in interest refer the proceedings back to the Commission for further action, in which

event he shall transmit to the Commission a copy of any evidence received. If the proceedings are referred back to the Commission, it shall proceed to a reconsideration of the proceedings under the provisions of subsection (d) of this section. If the judge shall approve the plan, he shall file an opinion, stating his conclusions and the reasons therefor, and enter an order to that effect, and shall send a certified copy of such opinion and order to the Commission. The plan shall then be submitted by the Commission to the creditors of each class whose claims have been filed and allowed in accordance with the requirements of subsection (c) of this section, and to the stockholders of each class, and/or to the committees or other representatives thereof, for acceptance or rejection, within such time as the Commission shall specify, together with the report or reports of the Commission thereon or such a summarization thereof as the Commission may approve, and the opinion and order of the judge: *Provided*, That submission to any class of stockholders shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding, (a) that at the time of the finding the corporation is insolvent, or that at the time of the finding the equity of such class of stockholders has no value, or that the plan provides for the payment in cash to such class of stockholders of an amount not less than the value of their equity, if any, or (b) that the interests of such class of stockholders will not be adversely and materially affected by the plan, or (c) that the debtor has pursuant to authorized corporate action accepted the plan and its stockholders are bound by such acceptance: *Provided, further*, That submission to any class of creditors shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding, that the interests of such class of creditors will not be adversely and materially affected by the plan, or that at the time of the finding the interests of such class of creditors have no value, or that the plan provides for the payment in cash to such class of creditors of an amount not less than the value of their interests. For the purpose of this

section the acceptance or rejection by any creditor or stockholder shall be in writing, executed by him or by his duly authorized attorney, committee, or representative. If the United States of America, or any agency thereof, or any corporation (other than the Reconstruction Finance Corporation) the majority of the stock of which is owned by the United States of America, is a creditor or stockholder, the interests or claims thereof shall be deemed to be affected by the plan, and the President of the United States, or any officer or agency he may designate, is hereby authorized to act in respect of the interests or claims of the United States or of such agency or other corporation. The expense of such submission shall be certified by the Commission and shall be borne by the debtor's estate. The Commission shall certify to the judge the results of such submission.

"Upon receipt of such certification, the judge shall confirm the plan if satisfied that it has been accepted by or on behalf of creditors of each class to which submission is required under this subsection holding more than two-thirds in amount of the total of the allowed claims of such class which have been reported in said submission as voting on said plan, and by or on behalf of stockholders of each class to which submission is required under this subsection holding more than two-thirds of the stock of such class which has been reported in said submission as voting on said plan; and that such acceptances have not been made or procured by any means forbidden by law: *Provided*, That, if the plan has not been so accepted by the creditors and stockholders, the judge may nevertheless confirm the plan if he is satisfied and finds, after hearing, that it makes adequate provision for fair and equitable treatment for the interests or claims of those rejecting it; that such rejection is not reasonably justified in the light of the respective rights and interests of those rejecting it and all the relevant facts; and that the plan conforms to the requirements of clauses (1) to (3), inclusive, of the first paragraph of this subsection (e): *Provided further*, That if, in any reorganization proceeding under this section, the United States is a

creditor on claims for taxes or customs duties (whether or not the United States has any other interest in, or claim against, the debtor, as creditor or stockholder), no plan which does not provide for the payment thereof shall be confirmed by the judge except upon the acceptance, certified to the court, of a lesser amount by the President of the United States, or the officer or agency designated by him pursuant to the provisions of the preceding paragraph hereof: *Provided further*, That if the President of the United States or such officer or agency shall fail to accept or reject such lesser amount for more than ninety days after receipt of written notice so to do from the court, accompanied by a certified copy of the plan, the consent of the United States insofar as its claims for taxes or customs duties are concerned shall be conclusively presumed. If the judge shall confirm the plan, he shall enter an order and file an opinion with a statement of his conclusions and his reasons therefor. If the judge shall not confirm the plan, he shall file an opinion, with a statement of his conclusions and his reasons therefor, and enter an order in which he shall either dismiss the proceedings, or, in his discretion and on the motion of any party in interest, refer the case back to the Commission for further proceedings, including the consideration of modifications of the plan or the proposal of new plans. In the event of such a reference back to the Commission, the proceedings with respect to any modified or new plan shall be governed by the provisions of this section in like manner as in an original proceeding hereunder.

"If it shall be necessary to determine the value of any property for any purpose under this section, the Commission shall determine such value and certify the same to the court in its report on the plan. The value of any property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present, and prospective, and all other relevant facts. In determining such value only such effect shall be given to the present cost of reproduction new and less depreciation and original cost of the property,

and the actual investment therein, as may be required under the law of the land, in light of its earning power and all other relevant facts."

Subsection (f) of Section 77 of the Bankruptcy Act, as amended (11 U. S. C. A., § 205(f)), provides as follows:

"(f) Upon confirmation by the judge, the provisions of the plan and of the order of confirmation shall, subject to the right of judicial review, be binding upon the debtor, all stockholders thereof, including those who have not, as well as those who have, accepted it, and all creditors secured or unsecured, whether or not adversely affected by the plan, and whether or not their claims shall have been filed, and, if filed, whether or not approved, including creditors who have not, as well as those who have, accepted it. Upon confirmation of the plan, the debtor and any other corporation or corporations organized or to be organized for the purpose of carrying out the plan, shall have full power and authority to, and shall put into effect and carry out the plan and the orders of the judge relative thereto, under and subject to the supervision and the control of the judge, the laws of any State or the decision or order of any State authority to the contrary notwithstanding. The property dealt with by the plan, when transferred and conveyed to the debtor or to the other corporation or corporations provided for by the plan, or when retained by the debtor pursuant to the plan, shall be free and clear of all claims of the debtor, its stockholders and creditors, and the debtor shall be discharged from its debts and liabilities, except such as may consistently with the provisions of the plan be reserved in the order confirming the plan or directing such transfer and conveyance or retention, and the judge may require the trustee or trustees appointed hereunder, the debtor, any mortgagee, the trustee of any obligation of the debtor, and all other proper and necessary parties, to make any such transfer or conveyance, and may require the debtor to join in any such transfer or conveyance made by the trustee or trustees. Upon the termination of the proceedings a final decree shall be

entered discharging the trustee or trustees, and making such provisions as may be equitable, by way of injunction or otherwise, and closing the case. Upon confirmation of a plan the Commission shall, without further proceedings, grant authority for the issue of any securities, assumption of obligations, transfer of any property, sale, consolidation or merger of the debtor's property, or pooling of traffic, to the extent contemplated by the plan and not inconsistent with the provisions and purposes of chapter 1 of Title 49 as on August 27, 1935, or thereafter amended. The provisions of sections 77a to 77aa of Title 15 shall not apply to the issuance, sale, or exchange of any of the following securities, which securities and transactions therein shall, for the purposes of said sections, be treated as if they were specifically mentioned in sections 77c and 77d of Title 15, respectively: (1) All securities issued pursuant to any plan of reorganization confirmed by the judge in accordance with the provisions of this section; (2) all securities issued pursuant to such plan for the purpose of raising money for working capital and other purposes of such plan; (3) all securities issued by the debtor or by the trustee or trustees pursuant to subsection (c), clause (3) of this section; (4) all certificates of deposit representing securities of, or claims against, the debtor, with the exception of such certificates of deposit as are issued by committees not subject to subsection (p) of this section. The provisions of subdivision (a) of section 78n of Title 15 shall not be applicable with respect to any action or matter which is within the provisions of subsection (p) of this section."

Paragraph (2) of Section 20a of the Interstate Commerce Act (49 U. S. C. A., § 20a (2)), provides as follows:

"(2) *Issuance of securities; assumption of obligations; authorization.* It shall be unlawful for any carrier to issue any share of capital stock or any bond or other evidence of interest in or indebtedness of the carrier (hereinafter in this section collectively termed 'securities') or to assume any obligation or liability

as lessor, lessee, guarantor, indorser, surety, or otherwise, in respect of the securities of any other person, natural or artificial, even though permitted by the authority creating the carrier corporation, unless and until, and then only to the extent that, upon application by the carrier, and after investigation by the commission of the purposes and uses of the proposed issue and the proceeds thereof, or of the proposed assumption of obligation or liability in respect of the securities of any other person, natural or artificial, the commission by order authorizes such issue or assumption. The commission shall make such order only if it finds that such issue or assumption: (a) is for some lawful object within its corporate purposes, and compatible with the public interest, which is necessary or appropriate for or consistent with the proper performance by the carrier of service to the public as a common carrier, and which will not impair its ability to perform that service, and (b) is reasonably necessary and appropriate for such purpose."

Paragraph (7) of Section 20a of the Interstate Commerce Act (49 U. S. C. A., § 20a (7)), provides as follows:

"(7) *Jurisdiction of commission as exclusive and plenary.* The jurisdiction conferred upon the commission by this section shall be exclusive and plenary, and a carrier may issue securities and assume obligations or liabilities in accordance with the provisions of this section without securing approval other than as specified herein."

Motion of Irving Trust Company, Refunding Mortgage Trustee, to Defer Consideration of Petitions for Writs of Certiorari and Extend Time to File Brief in Answer to Same

Now comes Irving Trust Company, as Substituted Trustee (hereinafter termed the Refunding Mortgage

Trustee) under the General and Refunding Mortgage of the Debtor, dated as of January 1, 1932, one of the respondents in the above-captioned cases, and respectfully moves that this Honorable Court defer consideration of the above-captioned petitions for certiorari until after the decision by the Circuit Court of Appeals for the Ninth Judicial Circuit of petitions for rehearing of the decision to which said petitions for certiorari are directed, and that this Court extend the time of the Refunding Mortgage Trustee to file its brief in answer to such petitions for certiorari until twenty (20) days after the decision of its said petition for rehearing.

The facts on which this motion is based are as follows:

The two petitions referred to in the caption, one filed by a Committee for Institutional Holders of First Mortgage bonds of the Debtor, and the other by the Trustees of the First Mortgage of the Debtor, both relate to the same decree of the United States Circuit Court of Appeals for the Ninth Judicial Circuit, and each raises substantially the same questions as the other.

The opinion of the Circuit Court of Appeals, which is the subject-matter of the petitions, was rendered on November 28, 1941. On December 22, 1941, and within the time limited by the Rules (Rule 25) of said Circuit Court of Appeals, the Refunding Mortgage Trustee filed in the Circuit Court of Appeals its petition for rehearing.

The petitions for certiorari were not served upon counsel or filed until December 29, 1941.

Meanwhile the Debtor, on or about December 29, also filed with the Circuit Court of Appeals a petition for rehearing.

This is a proceeding under Section 77 of the Bankruptcy Act for the reorganization of a railroad.

The decree of the Circuit Court of Appeals reverses an order of the District Court which approved a plan of reorganization certified to it by the Interstate Commerce Commission.

One of the purposes of the Refunding Mortgage Trustee's petition for rehearing was to obtain a determination of the lien issues which it had raised as an appellant in that Court, and which, as stated in the First Mortgage Trustees' petition for certiorari (No. 820, p. 6) "were before the Circuit Court of Appeals but as to which the Circuit Court of Appeals made no specific determination."

The position of the Refunding Mortgage Trustee

There are outstanding $18,999,500 of bonds issued under the Debtor's General and Refunding Mortgage (R. 4053), all of which are pledged as collateral with three creditors, the A. C. James Company, Railroad Credit Corporation, and Reconstruction Finance Corporation (all of whom are parties to the proceeding).

Throughout the proceedings in the Interstate Commerce Commission, and in the courts below, the pledgees of such bonds and all other parties to the proceedings recognized that the Refunding Mortgage Trustee was the appropriate party to present questions of conflicting lien between the Refunding Mortgage and the so-called First Mortgage (R. 911, 961, 1631, 1644; I.C.C. Min. 477, 550-51).

In the District Court the Refunding Mortgage Trustee asserted in its objections to the Plan (R. 974-82) that the Interstate Commerce Commission's plan was based upon an erroneous assumption as to the respective liens of the two mortgages. The District Court having

adopted the Interstate Commerce Commission's views concerning lien (R. 1597), the Refunding Mortgage Trustee appealed from the order approving the Plan. Although the Refunding Mortgage Trustee was fully heard in the Circuit Court of Appeals without objection by any party, and although the two pledgees of Refunding Mortgage bonds who had also appealed relied on the Trustee's arguments with respect to the lien questions, the Circuit Court of Appeals in its opinion determined that the Refunding Mortgage Trustee was not entitled to appeal, and dismissed its appeal (R. 2668), leaving all the questions of conflicting lien undetermined.

The Refunding Mortgage Trustee's petition for rehearing urges as its first point that the Trustee was a proper party appellant, both as the only proper party to enforce or protect the lien of the mortgage, entitled to be heard under the specific provisions contained in Section 77(c)(13) of the Bankruptcy Act, and also as the Trustee of an express trust to enforce the direct obligations of the mortgagor; and that the Circuit Court of Appeals, in dismissing the appeal without the benefit of argument or brief on the question of the Trustee's standing, disregarded controlling authorities and pertinent facts.

The second point of the Refunding Mortgage Trustee's petition for rehearing is that decision of the lien questions by the Circuit Court of Appeals is necessary in order for the Commission to make the findings which that Court's opinion requires with respect to the value of "(1) the property subject to the Refunding Mortgage only and (2) the property subject both to the Refunding Mortgage and to the First Mortgage" (R. 2670).

The nature of any brief which the Refunding Mortgage Trustee may wish to submit in answer to the petitions for certiorari will be affected by the action which the Circuit Court of Appeals takes on its pending petition for rehearing, both with respect to its standing as an appellant and its contentions as to lien. Consequently it is desirable that the filing of a formal answer by this respondent to the certiorari petitions be postponed until the petitions for rehearing have been decided.

The lien questions

If the Refunding Mortgage is a prior lien on the properties to which the Refunding Mortgage Trustee lays claim it is not disputed that the reorganization plan is unfair to the creditors secured by Refunding Mortgage bonds. The matters in controversy are important and of great value.

The first issue of lien relates to rolling stock acquired under conditional sale or equipment-trust agreements, in which the Debtor had an equity at the date of institution of the proceedings of over $6,000,000 (R. 1074). The Refunding Mortgage Trustee contends that the granting clauses of the First Mortgage expressly exclude this equipment from the property subject to its lien; and that it is expressly made subject to the lien of the Refunding Mortgage. The Commission based its plan on the assumption that the First Mortgage covered this equipment, although stating that final adjudication of the lien questions must be made by the Court (R. 262).

The second question relates to the lien of the General and Refunding Mortgage on the Debtor's Northern California Extension. This Extension was completed in 1932 at a cost of over $10,000,000, and has proved to be

one of the most valuable parts of the Debtor's system. The Refunding Mortgage Trustee claims that the Extension is subject to the lien of the First Mortgage only to the extent of the First Mortgage bonds ($5,000,000 principal amount) used in the construction thereof and that otherwise it is subject, under the facts appearing in the Record, to the *pari passu* lien of the General and Refunding Mortgage, inasmuch as the moneys for the completion of the Extension were supplied by the Refunding Mortgage creditors.

The third question relates to non-carrier real estate of a book value of approximately $1,850,000, which the Refunding Mortgagee contends is free from both the First Mortgage and the Refunding Mortgage and must be given consideration in the allocation of securities to the Refunding Mortgage creditors in the event it is found that they are not fully secured.

None of these questions was passed on by the Circuit Court of Appeals.

A fourth question was presented to that Court, relating to the amount of securities that should be issued to the Refunding Mortgage creditors in recognition of their undisputed first lien on pledged securities of Alameda Belt Line and Central California Traction Company. Since the Circuit Court of Appeals' opinion requires the Interstate Commerce Commission to find the value of the property subject to the General and Refunding Mortgage (R. 2670), including these securities, and since the lien on these securities is conceded by all parties, the petition for rehearing did not touch this fourth question.

Decision of the lien questions is necessary in connection with any reorganization plan

The Commission, in promulgating its Plan, recognized in respect of the lien questions that "final adjudication of this and similar questions must be made by the Court" (R. 262). Obviously the decision of legal questions relating to the lien on over $12,000,000 of property has an important bearing on the fairness of any reorganization plan. Under this Court's decision in the *Consolidated Rock Products* case (312 U. S. 510, 520) one of the fundamental questions in connection with any reorganization plan is the "determination of what assets are subject to the payment of the respective claims".

One of the petitions to this Court recognizes this fact. The petition of the First Mortgage Trustees (No. 820, pp. 9-10), states "the decision of the Circuit Court of Appeals has left unanswered many important questions, affecting virtually every feature of the Commission Plan. An authoritative determination of all of these questions is essential to the final approval of a plan of reorganization".

The Refunding Mortgage Trustee's petition for rehearing is designed to expedite the ultimate decision of the case, by obtaining a ruling from the Circuit Court of Appeals on questions which were fully argued before the Circuit Court of Appeals and which this Court, if it should grant certiorari, might decline to pass on until they had first been determined by the Circuit Court of Appeals.

Cf. *Grant* v. *Leach & Co.*, 280 U. S. 351;
Lutcher & Moore Lumber Co. v. *Knight*, 217 U. S. 257, 267;
Brown v. *Fletcher*, 237 U. S. 583, 587;
District of Columbia v. *Murphy*, 86 L. Ed. 277, 285 (Dec. 15, 1941).

With respect to the petitions

Although the lien questions have not been decided by the Circuit Court of Appeals and are not directly brought in issue by the petitions to this Court, there are certain statements in those petitions which should be corrected.

The First Mortgage Trustees assert (No. 820, Petition pp. 4-5, 7, Brief p. 17) that the Circuit Court of Appeals' opinion requires allocation of new securities to secured creditors "in accordance with a precise mathematical formula based upon exact dollar values" instead of upon the "equitable equivalent of the assets available for the satisfaction" of their respective claims. We do not so read the Circuit Court of Appeals' opinion. What the opinion holds is that the Court is not in a position to exercise an "informed, independent judgment" (R. 2671) concerning the equitable equivalent of the assets securing the two issues of bonds without knowing the value of those assets; and it directs that such value be fixed.

The Committee argues (p. 15 of Petition in No. 819) that such senior securities as were allotted to the Refunding Mortgage bondholders constitute adequate recognition of their aggregate rights by reason of their admitted first lien on securities of Tidewater Southern Railway Company, Central California Traction Company and Alameda Belt Line. The Commission stated that the lien on the latter two items "has no material value" (R. 314-15), but it did not make any finding with respect to the actual values of either of such properties, both of which are important feeders, producing together over $500,000 per year of traffic for the Debtor (R. 110, 203, 1312-13).

An analysis of the Commission's Plan shows very plainly that it makes no allowance for the Central Cali-

fornia Traction or Alameda Belt Line securities. It awarded to the Refunding Mortgage bondholders, by its supplemental report, $732,010 of new income mortgage bonds and $1,147,955 par value of new participating preferred stock (R. 315). The amount of such income bonds was exactly equal to the sum of (R. 313):

1. The amount of cash in the hands of the Refunding Mortgage Trustee	$223,732.00
and	
2. The face amount of the note of Tidewater Southern Railway Company pledged with the Refunding Mortgage Trustee, on which interest is being currently paid at the rate of 5% per annum	508,278.00
Total	$732,010.00

The Commission made no finding that the new income bonds were worth par (which would seem to be the only justification for allotting income bonds in exchange for cash) nor did it make any finding concerning the value of the Tidewater Southern note.

The amount of preferred stock allocated to the Refunding Mortgage bondholders was exactly equal to the par value ($1,147,955) of the stock of Tidewater Southern Railway Company pledged with the Refunding Mortgage Trustee (R. 313). There was no finding concerning the value of the Tidewater Southern stock, although the record showed that its rate-making value was substantially greater than its par value (R. 314), and that its net earnings represent approximately 7% of the total system earnings (R. 1065, 1098)—as compared with its rate-making valuation, referred to by the Committee (p. 15 of

Petition in No. 819), which was 1.3% of the comparable system valuation.

We submit, therefore, that the Circuit Court of Appeals was correct, at least insofar as the relative rights of mortgage creditors are concerned, in holding that the Commission had not furnished to the District Court adequate information on which to determine that the new securities allotted to the Refunding Mortgage bondholders represented an equitable equivalent of the property on which the Refunding Mortgage was admittedly a first lien.

The effect of the Refunding Mortgage Trustee's petition for rehearing

This Court has previously held that an appeal will not lie until after the disposition of petitions for rehearing.

Cherokee Nation v. *Whitmire*, 223 U. S. 108;
Voorhees v. *Nome Manufacturing Co.*, 151 U. S. 135;
Wolf Packing Co. v. *Industrial Court*, 267 U. S. 552.

Whether or not these cases are strictly applicable to petitions for certiorari, we submit that it is desirable in the present circumstances to defer action upon the petitions for certiorari until the Circuit Court of Appeals has had an opportunity to decide the petitions for rehearing which have been filed with it.

For the foregoing reasons, this respondent respectfully prays that this Court defer consideration of the petitions for certiorari until after the Circuit Court of Appeals shall have acted on the petitions for rehearing.

which are pending before it, and that this Court extend the time of this respondent to file its brief in answer to such petitions for certiorari until twenty (20) days after the decision of its petition for rehearing; or in the alternative, if this respondent's motion to defer consideration of such petitions for certiorari be denied, then that this respondent's time within which to file its brief in answer to such petitions shall be extended to a date ten (10) days from the date of such denial.

January 16, 1942.

Respectfully submitted,

HAROLD C. MCCOLLOM,
Counsel for Irving Trust Company, as Substituted Trustee under the General and Refunding Mortgage of the Western Pacific Railroad Company.

FRANCIS R. KIRKHAM,
ORRIN G. JUDD,
Of Counsel.

Respondents.

PETITIONERS' REPLY BRIEF, MEMORANDUM IN OPPOSITION TO MOTION OF RESPONDENT IRVING TRUST COMPANY TO DEFER CONSIDERATION OF PETITION FOR CERTIORARI, AND MEMORANDUM IN REPLY TO CROSS-PETITION OF THE DEBTOR FOR A WRIT OF CERTIORARI

To the Honorable the Chief Justice and the Associate Justices of the Supreme Court of the United States:

Your petitioners respectfully request leave to file the attached (1) brief in reply to the briefs submitted by respondents Western Pacific Railroad Corporation, A. C. James Co. and The Railroad Credit Corporation in opposition to the petition for certiorari, (2) memorandum in opposition to the motion of respondent Irving Trust Company to defer consideration of the petition and (3) memorandum in reply to the Debtor's cross-petition.

REPLY BRIEF

I. THE DECISION OF THE SEVENTH CIRCUIT IN THE *MILWAUKEE* CASE, AS TO THE ADEQUACY OF THE ICC FINDINGS OF ABSENCE OF VALUE, IS IN SQUARE CONFLICT WITH THE DECISION OF THE NINTH CIRCUIT COURT OF APPEALS IN THE INSTANT CASE.

Various respondents urge that the instant decision and that of the Seventh Circuit in *In re Chicago, Milwaukee, St. Paul & Pacific R. R.* (unreported, December 4, 1941) are identical in reasoning and "arrived at the identical result".[1] They accuse your petitioners of straining "to create an appearance of conflict"[2] which one respondent is "unable to see"[3].

Upon a motion by the Milwaukee Preferred Stockholders Committee requesting the Seventh Circuit Court of Appeals to modify its December 4, 1941, opinion to bring that opinion into full accord with that in the Ninth Circuit in the instant case, the Court, in a memorandum filed January 12, 1942 (printed as an appendix hereto), said:

> "Because counsel seemingly misunderstand our position upon the failure of the Commission to make necessary findings of value so as to allocate the new securities amongst existing bondholders and creditors, we deem it necessary, or at least advisable, to make our position clear.
>
> * * * * * * * *
>
> "Now, to make our position entirely clear, we add this memorandum and hold that the finding of the I. C. C. as to absence of value of old common and preferred stock, is specific, definite and certain,

---

[1]ACJ brief, p. 9. [2]ACJ brief, p. 11. [3]RCC brief, p. 7.

and fully meets the rule which requires finding on values of assets."

If the Seventh Circuit is correct in this ruling, the Ninth Circuit must necessarily be wrong[1] in holding inadequate the Commission's negative findings (1) that the Debtor's stock is without value, (2) that the claims of the Debtor's unsecured creditors are without value, and (3) that the second lien equity of RCC in the collateral pledged with RFC is without value.

Until this Court settles the irreconcilable conflict between these two decisions, the District Courts in the Seventh and Ninth Circuits must work at cross purposes in administering the railroad reorganizations in their charge, and the District Courts in other Circuits and the Interstate Commerce Commission will be wholly at a loss to know which of the two conflicting Court-pronounced methods they themselves should follow.

---

[1]Respondent WP Corp. has, in the appendix to its brief, endeavored to distinguish the two decisions on the basis of an asserted difference in fact—that the increase in Western Pacific earnings since the date of the Commission Plan has been "vastly greater, relatively, than that relied on by the stockholders in the Milwaukee case". Increases enjoyed by the two roads are compared in terms of percentages which are meaningless except to establish that the rise in Western Pacific earnings began at a point closer to zero dollars than the rise in Milwaukee earnings. Even on the basis of the asserted $2,958,189 of earnings for the first nine months of 1941 (which makes allowance neither for the subsequent wage increase nor for probable tax liabilities), the earnings of the Western Pacific would have to be capitalized at the rate of 4.5% to produce a dollar value in excess of $87,981,672, the dollar figure below which the interests of WP Corp. would necessarily be without value.

However, war-inflated earnings can hardly be a sound foundation for permanent railroad capitalization, a point which this Court may well accent in any ultimate decision in the instant case.

II. THE PETITION FOR CERTIORARI IS NOT PREMATURE MERELY BECAUSE THE DECREE OF THE CIRCUIT COURT OF APPEALS IS INTERLOCUTORY OR BECAUSE THE SECURITYHOLDERS HAVE NOT VOTED ON THE COMMISSION PLAN.

Respondent ACJ contends that the petition for certiorari is premature because the plan of reorganization has not yet "had full consideration by the Commission, by the District Court, and by the Circuit Court of Appeals",[1] and for the further reason that the securityholders have not yet voted on the Commission Plan.

All of the questions involved in this reorganization have had "full consideration by the Commission and by the District Court" and have been decided by those bodies. All the issues presented to, but left undecided by, the Circuit Court of Appeals are clear-cut questions of law, involve no complicated or disputed questions of fact and can readily be decided by the Court at the present time on the present record. None of the further proceedings which respondents say should be had before any decision by the Supreme Court would render any of these issues moot. In truth such further proceedings—as well as many other pending railroad reorganization proceedings—will be a waste of the time and money of everyone (securityholders, Interstate Commerce Commission and Courts) until the questions involved in the instant case are decided by this Court. If the Ninth Circuit Court of Appeals is wrong in its decision in the *Western Pacific* case, the time to find out is now, before years of time and millions of dollars are spent in unnecessary dollars and cents valuation proceedings.

Respondents' contention that an appeal or a petition for certiorari may not properly be taken to review, respectively,

---

[1] ACJ brief, p. 19.

a District Court order "approving" a Section 77 plan, or a Circuit Court of Appeals decree reversing that order, merely because creditors have not yet voted upon the plan, goes only to establish that the decree of the Circuit Court of Appeals is not a "final judgment", but is interlocutory only[1].

Petitioners do not contend that the decree of the Ninth Circuit Court of Appeals is anything but interlocutory. However, the certiorari jurisdiction of this Court extends to interlocutory decisions of Circuit Courts of Appeals (as none of the respondents has denied) and the present case is a particularly suitable one for the exercise of that discretionary jurisdiction.[2]

Numerous important recent decisions of this Court on bankruptcy and reorganization matters have been written on certiorari to review similar interlocutory orders.[3] More-

---

[1]Bankruptcy Act § 77(e) [11 U. S. C. § 205(e)] provides that the judge shall "approve" the plan. Section 24 b (11 U. S. C. § 47 a) gives the Circuit Courts of Appeals appellate jurisdiction to review interlocutory, as well as final orders entered in bankruptcy proceedings. Section 24 c (11 U. S. C. § 47 c) gives the Supreme Court power to review all "judgments, decrees, and orders" entered by Circuit Courts of Appeals.

[2]Cases in which the power to review interlocutory orders of Circuit Courts of Appeals has been specifically discussed and specifically exercised include *Forsyth* v. *Hammond*, 166 U. S. 506, 511-515 (1897); *Denver* v. *New York Trust Co.*, 229 U. S. 123, 133 (1913); *Union Pacific R. R.* v. *Board of County Commissioners*, 247 U. S. 282, 284 (1918); *Hanover Star Milling Co.* v. *Metcalf*, 240 U. S. 403, 408 (1916); *Gay* v. *Ruff*, 292 U. S. 25, 30 (1934); *Spiller* v. *Atchison, T. & S. F. Ry.*, 253 U. S. 117, 121 (1920); *United States* v. *Gulf Refining Co.*, 268 U. S. 542, 545 (1925).

[3]*E.g.*, *Adair* v. *Bank of America National Trust & Savings Ass'n*, 303 U. S. 350 (1938); *Consolidated Rock Products Co.* v. *Du Bois*, 312 U. S. 510 (1941); *In re 620 Church Street Building Corp.*, 299 U. S. 24 (1936); *Sampsell* v. *Imperial Paper & Color Corp.*, 313 U. S. 215 (1941).

over, the number of cases in which this Court has granted certiorari "solely because a Circuit Court of Appeals has required further findings from an administrative agency"[1] are legion.[2]

MEMORANDUM IN OPPOSITION TO MOTION OF IRVING TRUST COMPANY

Respondent Irving Trust Company, the Refunding Mortgage Trustee, has moved that consideration of the petitions[3] for certiorari be deferred "until after the decision by the Circuit Court of Appeals for the Ninth Judicial Circuit of petitions for rehearing of the decision to which said petitions for certiorari are directed", and has also asked that its time for filing a brief in this Court be extended until twenty days "after the decision of its said petition for rehearing".

Petitioners submit that this motion should be dismissed for the following reasons:

1. *Standing of Refunding Trustee in this Court.* The decree of the Ninth Circuit Court of Appeals dismissed the appeal of Irving Trust Company, as the Refunding Mortgage Trustee.[4] Neither of the petitions for certiorari seeks

---

[1] ACJ brief, p. 20.

[2] *E.g., Federal Communications Commission* v. *Sanders Bros. Radio Station*, 309 U. S. 470 (1940); *National Labor Relations Board* v. *Bradford Dyeing Ass'n*, 310 U. S. 318 (1940); *United States* v. *Louisiana*, 290 U. S. 70 (1933) (statutory 3-judge court); *Meeker & Co.* v. *Lehigh Valley R. R.*, 236 U. S. 412 (1915).

[3] The petitions in this case (No. 819) and the companion case (No. 820) in which certiorari is requested by the First Mortgage Trustees.

[4] All the holders of Refunding Mortgage Bonds (RFC, RCC and ACJ) are parties in the proceeding and respondents upon the petitions for certiorari.

to review that dismissal. While Irving Trust Company is named as a respondent in the petitions for certiorari because your petitioners believed that it was not for them to decide the right of Irving Trust Company to appear as a respondent in this Court, Irving Trust Company has now placed squarely before this Court the issue of its right to be a respondent party to these Supreme Court proceedings, and to address any motions to this Court.

2. *Propriety of the motion at this time.* Irving Trust Company has filed no brief in opposition to the petitions. Its motion to defer consideration of the petitions until its application for rehearing is passed upon by the Ninth Circuit Court of Appeals is, in practical effect, a motion to *dismiss* the petitions for certiorari without prejudice to the filing of another petition on the same papers after the Ninth Circuit Court of Appeals has acted on the application for rehearing.

Rule 7 of the Rules of this Court provides:

> "3. No motion by respondent to dismiss a petition for writ of certiorari will be received. Objections to the jurisdiction of the court to grant writs of certiorari may be included in briefs in opposition to petitions therefor."

Your petitioners therefore submit that Irving Trust Company's motion should be dismissed as improper in form.

3. *Power of this Court to entertain the certiorari petition.* Irving Trust Company implies (at pp. 10-11 of its motion) that this Court is without jurisdiction to entertain a petition for certiorari if an application for rehearing is pending in a Circuit Court of Appeals. The cases it cites in support of this apparent contention were all decided at times when the jurisdiction of the Supreme Court to review

decisions of the particular lower courts involved was limited to cases in which a final judgment had been rendered.[1] Each of these cases, and many other decisions applying the same rule, proceeded on the theory that until the application for rehearing had been passed upon the lower court judgment was not final but interlocutory, and outside the statutory jurisdiction of this Court.

Since the passage of the amendments to the Judicial Code in 1891, certiorari jurisdiction of the Supreme Court over the decisions of the Circuit Courts of Appeals has not been limited to final judgments, and this Court has held:

> "that the power may be exercised before, as well as after, any decision by that court [Circuit Court of Appeals] and irrespective of any rule or determination therein; and that the sole essential of this Court's jurisdiction to review is that there be a case pending in the circuit court of appeals." [*Gay* v. *Ruff, supra,* 292 U. S., at p. 30.]

Since the passage of the 1925 amendments to the Judicial Code, this power has been plainly conferred by statute (Judicial Code, Section 240, 28 U. S. C. § 347; 43 Stat. 938).

4. *Reasons why this Court should exercise its discretion to entertain the certiorari petition notwithstanding the pen-*

---

[1] *Wolff Packing Co.* v. *Industrial Court*, 267 U. S. 552 (1925), involved a writ of error from a *state* court decision, and was governed by the "final judgment" requirement of Judicial Code § 237 (a), 28 U. S. C. § 344 (a), and its predecessors. *Cherokee Nation* v. *Whitmire*, 223 U. S. 108 (1912), and *Voorhees* v. *Noye Manufacturing Co.*, 151 U. S. 135 (1894), involved appeals from the Court of Claims and the old Circuit Court, respectively, and were governed by the requirements embodied in Judicial Code §§ 242, 243 [36 Stat. 1157-(1911)], repealed by 43 Stat. 941 (1925), and Rev. Stat. § 691, repealed by 26 Stat. 829 (1891).

dency of the Refunding Mortgage Trustee's petition for rehearing below. As early as 1893, when petitions for certiorari were the exception rather than the rule, and when finality was the controlling consideration on the more usual writs of error and appeals, this Court said:

> "But the question at what stage of the proceedings, and under what circumstances, the case should be required, by *certiorari* or otherwise, to be sent up for review, is left to the discretion of this court, as the exigencies of each case may require." [*American Construction Co.* v. *Jacksonville Ry.*, 148 U. S. 372, at p. 385 (1893).]

Your petitioners submit that the pendency of the rehearing petition below should not deter this Court's exercise of its discretionary power to grant certiorari:

(a) Petitions for rehearing in the Ninth Circuit Court of Appeals were filed by two appellants in that court whose appeals to that Court had been dismissed by the Ninth Circuit decree. Your petitioners did not join in such petitions for rehearing, nor did they file any memorandum in opposition thereto.

Good cause might exist for refusing to exercise the discretionary certiorari jurisdiction of this Court in favor of a litigant[1] who was simultaneously pursuing a different remedy—such as an application for rehearing—in the Circuit Court of Appeals. But your petitioners have done nothing to prejudice their right to relief before this Court and they respectfully submit that none of the issues or questions involved in the petition for certiorari can or will be affected by the outcome of the rehearing applications instituted by two of the respondents.

---

[1]Such as the Debtor.

Although Irving Trust Company's application for rehearing not only asks reconsideration of its status as an appellant in the Circuit Court of Appeals, but also requests that court to reverse the District Court's decision of the lien questions between the First Mortgage and the Refunding Mortgage on the merits, these lien questions cannot fairly be said to have been put before the Circuit Court of Appeals by Irving Trust Company's application for rehearing. As a dismissed would-be appellant in the Circuit Court of Appeals, Irving Trust Company has no right to ask that court to pass on any question on the merits until it is first reinstated as an appellant. Until such reinstatement is accorded to Irving Trust Company—the earliest date at which it may properly urge the Circuit Court of Appeals to decide the lien questions—its motion addressed to this Court should be dismissed.

(b) Irving Trust Company, as the Refunding Mortgage Trustee, is a fiduciary representing only three persons —RFC, RCC and ACJ—who hold as collateral for the Debtor's Notes all of the Refunding Bonds. All three are themselves parties in the reorganization proceeding, have been represented by counsel and have filed briefs before the Commission, the District Court and the Circuit Court of Appeals. Since RFC has supported the Commission Plan,[1] Irving Trust Company, as a practical matter, is acting only as the *alter ego* of RCC and ACJ.

If a decision by the Circuit Court of Appeals on the lien questions had been the primary objective of any rehearing application, it would not have been necessary to ask the Circuit Court of Appeals, as a preliminary matter, to

[1]Your petitioners are advised that RFC has itself filed, or expects shortly to file, its own petition for certiorari in the instant case.

reconsider the perplexing problem of the right of a mortgage trustee to appeal when all of his *cestuis* are parties and represent themselves before the court. Since these *cestuis* themselves had the right to request a rehearing before the Circuit Court of Appeals and remained silent, Irving Trust Company, as their representative, can hardly be heard in this Court to urge the inconvenience to their interests resulting from a refusal by this Court to wait upon the outcome of the petitions for rehearing.

Against this imaginary inconvenience to RCC and ACJ, which they themselves made no effort to avoid, stand the interests of senior creditors[1] holding $52,253,100 of the Debtor's securities on which they have received no interest for more than eight years, and the interests of all railroad bondholders. All parties sincerely interested in the expedition of this and other railroad reorganizations anxiously await an early Supreme Court decision so that this and all other pending reorganizations may proceed intelligently.

Whatever may be the motive of the Refunding Trustee, the effect of its success in obtaining a rehearing in the Circuit Court of Appeals and deferring review in this Court until after decision on such rehearing would only be to add at least another year to the already too many years by which the junior interests have succeeded in delaying the Western Pacific reorganization.

(c) The contention of Irving Trust Company that the lien questions adjudicated by the Commission and the District Court must in any event be resubmitted to the Circuit Court of Appeals for decision, even if the certiorari petition is entertained and the decree of the Circuit Court of Appeals reversed, is wholly unsound, and does not

[1]The First Mortgage Bondholders and RFC.

support the claim that the whole proceeding will therefore be expedited by awaiting the decision on rehearing.

In *Story Parchment Co.* v. *Paterson Parchment Paper Co.*, 282 U. S. 555 (1931), this Court dealt with an identical problem. Reversing a judgment of the Circuit Court of Appeals and reinstating the judgment of the District Court, the Supreme Court passed on several assignments of error in the Circuit Court of Appeals made there by the Supreme Court respondent in his successful attack on the District Court judgment, including several assignments of error which were not discussed by the Circuit Court of Appeals when it decided in his favor. The Supreme Court said (at pp. 567-8):

> "Other assignments of error made on the appeal from the district court were not considered by the court below. No argument in support of these assignments has been submitted here, and respondents assume that they will be remitted for the consideration of the court below if the judgment of that court be reversed. The entire record, however, is before this court with power to review the action of the court of appeals and direct such disposition of the case as that court might have made of it upon the appeal from the district court. *Lutcher & Moore Lumber Co.* v. *Knight*, 217 U. S. 257, 267; *Delk* v. *St. Louis & S. F. R. Co.*, 220 U. S. 580, 588. And see *Langnes* v. *Green, supra* [282 U. S. 531]. Accordingly, we have examined these assignments, some eight in number. One or more of them involve questions which have been disposed of by the foregoing opinion. We find nothing in any of the others of sufficient substance or materiality to call for consideration."

To the same effect is *Cole* v. *Ralph*, 252 U. S. 286, 290 (1920).

MEMORANDUM IN REPLY TO CROSS-PETITION OF THE DEBTOR (No. 885)

It may be desirable that in connection with the review of all the substantive issues in the instant case, this Court should also, as urged by the Debtor, consider the status of a debtor corporation all of whose stockholders are themselves parties to the proceeding.

But three features of the Debtor's cross-petition sharply accentuate the necessity that this Court's review should not be limited to this one question:

1. The Debtor lists, under five sub-headings (pp. 3, 4), a mass of statistical and philosophical findings which it insists must be made to render adequate a fundamental finding that a debtor's stock is without value. Your petitioners believe that the Debtor's bare statement of the requirements which it would impose upon the Commission and the securityholders, shows the impossibility, if not the absurdity, of the alleged requirement. However, if there is any such requirement the Commission and the senior securityholders should know it now in order that they may, after the many years which such a requirement would consume, finally perfect a valid plan. If there is no such requirement everyone should be spared the effort and expense involved in trying to meet it.

2. The Debtor's attack[1] upon an alleged "accord" between "great concentrations of capital as represented by the life insurance companies and the savings banks" and the Commission, whereby senior bondholders are to appropri-

[1]Debtor's cross-petition, p. 8.

ate values belonging to junior debt and capital stock, should be faced squarely by this Court.[1] The Commission, in the spirit of this Court's decisions in the *Consolidated Rock Products* case, *supra*, and the *Los Angeles Lumber Products* case,[2] has, in the Western Pacific as well as in other railroad reorganization plans, refused to take from senior bondholders a part of the permissible reorganized capitalization in order to placate junior interests having no value other than nuisance value. Your petitioners believe it was the intent of this Court, by those two decisions, to eliminate such nuisance value as a factor in any reorganization. It is imperative, therefore, that this Court should promptly put an end to the now general misuse of the two decisions to create a nuisance value for junior interests against senior interests.[3]

3. The inconsistencies of procedural techniques, as well as of argument, between the Debtor's cross-petition, the ACJ brief, the WP Corp. brief, and the Refunding Mortgage Trustee's motion, might mislead this Court into the belief that it is dealing with four *bona fide* separate interests. In fact, these four inconsistent documents represent in substance *one* interest. The record establishes that the same interests which control ACJ also control WP Corp., which in turn controls 100% of the stock and the unsecured debt of the Debtor (R. 1030, 1051). ACJ, as

---

[1]It is, of course, true that large amounts of senior railroad bonds are held by insurance companies and savings banks. The nature of their interest in these bonds, however, not only is as fiduciary for innumerable policyholders and depositors, but also is identical with that of the millions of scattered small holders of the same issues.

[2]308 U. S. 106 (1939).

[3]See Mr. Arthur Krock's column in N. Y. Times, January 8, 1942, p. 20, col. 5.

pledgee, is interested in a majority of the Refunding Mortgage Bonds objecting to the Commission Plan (R. 1053-8). It therefore in effect controls the action of the Refunding Mortgage Trustee. Your petitioners do not question the legal right of the James Interests thus to exhibit their split personality in this Court, as they have from the outset of the proceeding before the Commission and the courts below. However, this continued resort to a multiplicity of corporate entities is obviously primarily for the purpose of creating an appearance of confusion of issues and procedural problems as a basis for deferment of review by this Court. Such attempts to impede reorganization by inconsistent procedural techniques and arguments accentuates the public importance of final disposition by this Court of the Western Pacific reorganization and the many questions which it, in common with most other railroad reorganizations, involves. After being deprived of any income return for the past eight years, the First Mortgage Bondholders believe it is time that this Court forcefully demonstrate that "there is no occasion" for the Courts, the Commission, or the senior securityholders, "to yield to such pressures."[1]

Respectfully submitted,

ROBERT T. SWAINE,
Attorney for Petitioners.

APPENDIX

IN THE

UNITED STATES CIRCUIT COURT OF APPEALS

FOR THE SEVENTH CIRCUIT

Nos. 7590, 7610-7617.

October Term, 1941, January Session, 1942.

In the Matter of CHICAGO, MILWAUKEE, ST. PAUL & PACIFIC R.R. Co., *Debtor.*	On Motion to Modify Opinion

---

January 12, 1942.

Before EVANS, and KERNER, *Circuit Judges*, and LINDLEY, *District Judge*.

PER CURIAM. We are asked to modify our opinion announced in this case, by striking therefrom three paragraphs, beginning with the words, "We are satisfied that the evidence supports the finding of the Commission," appearing on page 15 of the opinion, and ending with the words, "* * * which must be at the bottom of all reorganization plans."

Because counsel seemingly misunderstand our position upon the failure of the Commission to make necessary findings of value so as to allocate the new securities amongst existing bondholders and creditors, we deem it necessary, or at least advisable, to make our position clear.

It was, and is, our opinion that the I. C. C. made a sufficiently specific finding as to value of the equity represented by the common and preferred stock of the Debtor, so as to permit the court to intelligently review this issue, the determination of which is necessary to a disposition of the other questions presented by the reorganization plan.

On these other questions there was lacking the necessary findings by the I. C. C. to permit us to approve or disapprove of the value of the old securities and the value of the new securities, given in exchange for them.

Now, to make our position entirely clear, we add this memorandum and hold that the finding of the I. C. C. as to absence of value of old common and preferred stock, is specific, definite and certain, and fully meets the rule which requires finding on values of assets.

Second, we meant to hold, and do hold, that the evidence supports this finding, that there is no value to either the common or preferred stock of debtor. It follows that this branch of the case, the value of the equity of the debtor, evidenced by the common and preferred stock, is closed, and the I. C. C. need not further investigate or make further finding on this issue unless it is convinced that changed conditions in railroad earnings warrant it. In other words, the I. C. C. has jurisdiction of the matter and may, although it is not required to do so, re-examine the evidence, or receive additional evidence, if in its judgment, justice to the parties requires it.

The motion to amend the opinion is DENIED.

PETITION FOR REHEARING OF THE WESTERN PACIFIC RAILROAD COMPANY, DEBTOR, RESPONDENT, PETITIONER

The Western Pacific Railroad Company, herein called the Debtor, respectfully applies to this Court, pursuant to

Rule 33 of the Revised Rules of this Court for a rehearing on the following grounds:

I.

This Court appears to have overlooked the fact that as the result of its own decision establishing the lien priority of the First Mortgage upon the Debtor's estate (except as to relatively unimportant unmortgaged assets and items pledged under the General and Refunding Mortgage) it has created in this case the same situation as in the companion case of Chicago, Milwaukee, St. Paul and Pacific Railroad Company was held by this Court to require that the proceeding be referred back to the Interstate Commerce Commission to determine and fix the compensation due from the junior lienors to the holders of First Mortgage Bonds for their sacrifices under the Plan. Here, as there, "a large amount of new common stock" is given to the junior lienors in respect of their "claims upon the mortgaged assets" while the holders of First Mortgage Bonds secured by a paramount lien upon the same "mortgaged assets" are "to receive under the plan only a face amount of inferior securities equal to the face amount of their claims." Under the companion case, however, they "must receive in addition compensation for the senior rights which they are to surrender." (All quotations are from the contemporaneous Opinion of Mr. Justice DOUGLAS in the matter of the reorganization of Chicago, Milwaukee, St. Paul and Pacific Railroad Company.) While it is true that the new common stock is allotted to holders of First Mortgage Bonds at $57 per share and to a junior creditor at $62 per share, this differential is too slight even to be considered as compensation for the sacrifices of the senior lienors. For these reasons it is submitted that this Court

should modify its decision herein so that the cause will be remanded to the District Court with the same direction as to a determination and finding as to the compensation due the senior lienors as is given in the case of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company.

II.

This Court in approving as not legally unwarranted or unduly discriminatory the preferential treatment accorded Reconstruction Finance Corporation has apparently *assumed*, but without searching the record for supporting evidence, that Reconstruction Finance Corporation had in fact given a commitment to purchase $10,000,000 principal amount of new First Mortgage Bonds at par or to exchange $10,000,000 principal amount of Trustees' Certificates for a like amount of new First Mortgage Bonds. A present willingness of Reconstruction Finance Corporation to purchase these new First Mortgage Bonds at par which may be a price well below what could be obtained under prevailing market conditions is not evidence of a prior commitment to purchase at that price regardless of market conditions at the time of purchase and may not be a lawful consideration to support the treatment proposed for the favored creditor. Since the record is silent upon this critical point the cause should it is submitted be remanded to the District Court for reference back to the Interstate Commerce Commission for either (a) a specific finding supported by substantial evidence that such a commitment had been made and has been kept good by Reconstruction Finance Corporation or (b) a modification of the Plan to conform the treatment of Reconstruction Finance Corporation to what is justifiable by its junior collateral position.

III.

This Court did not itself determine that economic changes since closing of the hearings in the Interstate Commerce Commission or the hearing in the District Court are not of such significance as in equity and good conscience to require that the Plan be recommitted to the Interstate Commerce Commission—all that this Court held, as we interpret the Opinion, is that the increased earnings since the hearing in the District Court do not necessarily lead to a rejection of the Commission's Plan by the appellate Courts. It does not follow, however, that a proper analysis of these vastly increased earnings supported by expert opinion would not establish many permanent accretions to earning power which would require a complete reappraisal of past, present and prospective earning power. It is submitted therefore that this cause should be remanded to the District Court without prejudice to its right to receive further evidence or to refer the proceeding back to the Interstate Commerce Commission to take further evidence as to the value of the Debtor's railway properties in the light of changed economic conditions.

IV.

This Court apparently holds that Congress intended to invest the Interstate Commerce Commission with power "to select the date for the institution of the reorganization." This is based upon the broad language of subsection (b). It is submitted, however, that subsection (l) inserted at a later point in the statute clearly fixes all rights as of the date of the filing of the Petition and should under established rules of construction be given effect as expressly limiting

the general language of the earlier subsection to which this Court refers.

Upon each of the foregoing grounds the Debtor respectfully asks that this Court grant a rehearing and remand this cause to the District Court for further proceedings.

Respectfully submitted,

FRANK C. NICODEMUS, JR.,
Counsel for The Western Pacific Railroad Company,
40 Wall Street,
New York, N. Y.

ANSWER OF INSTITUTIONAL BONDHOLDERS COMMITTEE

to

PETITION FOR REHEARING OF THE WESTERN PACIFIC RAILROAD COMPANY, DEBTOR, RESPONDENT, PETITIONER

Frederick H. Ecker, John W. Stedman, and Reeve Schley (herein called the Institutional Bondholders Committee), answering the Petition for Rehearing of The Western Pacific Railroad Company, Debtor, herein, dated April 8, 1943, respectfully show:

I

As to the Debtor's argument that the proceeding should be referred back to the Interstate Commerce Commission "to determine and fix the compensation due from the junior lienors to the holders of First Mortgage Bonds for their sacrifices under the Plan":

1. The Debtor, whose interest in its property has been found to be without value, is without status to assert any rights of the First Mortgage Bondholders.

2. The point now made was not included within the "Objections and Claims for Equitable Treatment" filed by the Debtor in the District Court pursuant to the provisions of subsection (e) of Section 77, nor made by the Debtor in argument in the District Court, the Circuit Court of Appeals, or the Supreme Court.[1] This Court will not examine a point raised for the first time in a petition for rehearing, where the party has failed to make it in its petition for certiorari, briefs, or argument.[2]

3. The contentions of the Debtor throughout the proceeding prior to the filing of the Petition for Rehearing (in contradiction of the argument now made in that Petition) were that the First Mortgage Bondholders should be subjected to further sacrifices, of the character for which the Debtor now asserts compensation should be made, and that the First Mortgage Bondholders were not entitled to

---

[1]R. 963-73, 1645-51.

[2]*Independent Wireless Telegraph Company* v. *Radio Corporation of America*, 270 U. S. 84 (1926).

the various forms of compensation embodied in the securities and allocations under the Commission Plan against the sacrifices required of them by that Plan.[1]

4. The problem of the compensation to which the First Mortgage Bondholders might be entitled for their sacrifices under the Plan was fully dealt with in the briefs of the parties and on oral argument, it being the position of the Institutional Bondholders Committee, both in its briefs and on oral argument, that while such Bondholders might succeed in a claim for further compensation, such compensation under the capitalization permitted by the Interstate Commerce Commission could only be in the form of Common Stock, and, in the light of past and prospective earnings, would have only nominal value, and in any event less value than the damage suffered by the First Mortgage Bondholders through delaying reorganization and thereby depriving the First Mortgage Bondholders (a) of income currently being earned upon their investment, and (b) a voice in the management of the property, of which they are the preponderant beneficial owners.[2]

II

There has been no contention by any party throughout the proceeding that Reconstruction Finance Corporation was under any legal commitment to accept the provision made for it by the Plan, any more than any other security-holder was under any such commitment. The only question dealt with before the Commission, the District Court, the Circuit Court of Appeals and the Supreme Court was

---

[1]R. 819, 824, 826, 829, 832, 836-41, 843, 857, 963, 965, 970-71, 1645, 1646-47. See Debtor's main brief, pp. 2, 17.

[2]See Committee's main brief, pp. 96-104, 138-45.

whether if Reconstruction Finance Corporation did supply $10,000,000 of new money (or accept new First Mortgage Bonds for its Trustees' Certificates issued against such new money), as provided in the Plan, it could be compensated therefor as provided in the Plan. This issue was fully dealt with in the briefs of the parties and on oral argument, and fully disposed of by the Court's opinion herein.[1]

III

The question as to what evidence the District Court may hereafter take in further proceedings under Section 77 was not involved upon the appeal to the Supreme Court, that appeal being solely from an interlocutory order of approval of the Plan by the District Court pursuant to subsection (e). The evidence to be received by the District Court in the further proceedings, particularly upon the further hearing expressly provided for by Section 77 prior to the entry of an order of confirmation, is a matter for determination by the District Court when the question arises.

IV

The question whether the effective date of the Plan may be a date other than the date of the institution of the proceeding under Section 77 was fully dealt with in the briefs and on oral argument in this Court and was disposed of in the Court's opinion.[2]

---

RECONSTRUCTION FINANCE CORPORATION, PETITIONER

v.

WESTERN PACIFIC RAILROAD CORPORATION ET AL.

MEMORANDUM FOR THE INTERSTATE COMMERCE COMMISSION, AS AMICUS CURIAE

The Interstate Commerce Commission, as *amicus curiae*, urges this Court to grant the petitions for writs of certiorari in these cases. The interest of the Interstate Commerce Commission arises from the fact that under subdivision (d) of Section 77 of the Bankruptcy Act the Commission is charged with the duty of certifying to the

district courts plans of reorganization for railroad corporations which are in reorganization under Section 77. The Commission has already certified many such plans to the appropriate district courts and will be obliged to certify others in the future. In view of the doubt created by the decision below when compared with the decisions of the Circuit Court of Appeals for the Seventh Circuit in *Matter of Chicago, Milwaukee, St. Paul & Pacific R. R. Co.*[1] and *Matter of Chicago & North Western Ry Co.*, it is important to the efficient performance of the Commission's duties under Section 77 that the procedure to be followed and the findings to be made by the Commission should be established by a definitive decision of this Court.

Respectfully submitted.

CHARLES FAHY,
Solicitor General.

DANIEL W. KNOWLTON,
Chief Counsel, Interstate Commerce Commission.

MARCH 1942.

BRIEF FOR INTERSTATE COMMERCE COMMISSION AS AMICUS CURIAE

PRELIMINARY STATEMENT

The Interstate Commerce Commission, charged with primary responsibility in the administration of railroad reorganization proceedings, respectfully submits this brief as *amicus curiae* in the *Western Pacific* cases. To avoid unnecessary repetition the Commission refers the Court to the statements of fact as they appear in the briefs of the Reconstruction Finance Corporation (No. 33) and of the Institutional Bondholders Committee (No. 7). Several of the points of argument which the Commission would desire to urge upon the Court have likewise been adequately presented *in*

extenso by these briefs. The argument here will be confined to discussion of the case under the following headings:

I. The decision of the court below and the position of the Commission with respect thereto.

II. Precise dollar and cents findings of value would be fictitious and misleading.

III. Compliance with the decision of the court below will involve administrative difficulties tending to defeat the objectives of Section 77.

IV. The court below misapplied the *Consolidated Rock Products* decision.

ARGUMENT

I

The disputes which gave rise to the appeals from the action of the District Court in approving a plan of reorganization concerned the relative treatment of the stockholders and junior creditors of the debtor. There was no challenge to the new security structure in its provision for $10,000,000 first mortgage fixed income bonds or in their allocation to the payment of the trustees' certificates. The same was true in respect of permitting the equipment trusts to remain undisturbed. The exclusion of stockholders and unsecured creditors and the allotment of income mortgage bonds and the new stocks were the only substantial points

upon which the Circuit Court of Appeals was asked to pass.

That court declined to approve the plan because, as it asserted, the Commission had failed in its duty under the Act of making determinations of value upon which the District Court could independently determine subordinate factual matters on which to predicate an ultimate finding that the plan "is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders." In so doing, the court relied upon that portion of subparagraph (e) of Section 77 providing that "If it shall be necessary to determine the value of any property for any purpose under this section, the Commission shall determine such value and certify the same to the court in its report on the plan." The essence of the court's decision is that where any class of claimants is to be excluded from participation and where senior and junior creditors are involved, the necessity for precise valuation is also present.

The court strongly intimates that the record before the Commission was deficient in "requisite valuation data." If this is the holding of the lower court, it becomes pertinent to determine

what elements of value are to be considered in reorganization proceedings, first, as a basis for denying participation to any class of stockholders or creditors, and, secondly, as a basis for determining whether senior claimants have received full compensatory treatment before distribution is made to junior claimants.

The Commission's position in this case is that the Circuit Court of Appeals has placed a too restrictive interpretation upon Section 77 with respect to the Commission's part in the reorganization proceedings. It has failed to give recognition to the administrative function of the Commission. It has failed to give effect to the object sought in the 1935 amendment to Section 77, and in so doing, has needlessly created an impractical procedure entailing great delay and heavy expense both to the parties and the railroad estate. If the court's opinion means that the Commission must undertake a valuation of the whole estate of the debtor and of the several parts that may be the subject of the lien of different mortgages, using the same principles that are applicable in Section 19 (a) valuations, the effectiveness of reorganization proceedings has been destroyed.

Under the original provisions of Section 77, as enacted in 1933, no reorganizations were consummated. It was early found that the requirement that an elimination of the consent of a claimant

must be conditioned by a determination by the court that its interest was without value,[1] would lead to long delays and unwarranted expense by requiring the introduction of testimony on valuation of property and its segments applicable under section 19a in the determination of rate-making value. This, the Commission considered, was not a true test of value in the reorganization sense; rate-making value arrived at by conven-

[1] 48th Annual Report of the Interstate Commerce Commission, 1934, pp. 18, 19:

"It has become quite evident that the advantages hoped for in the enactment of section 77 of the Bankruptcy Act are not likely to be realized without substantial changes in its provisions. * * *

"Proceedings under section 77 could be further facilitated by a legislative definition of insolvency, as applied to operating railroads, and the designation of an agency and procedure whereby the fact of insolvency may be uniformly, speedily, and economically determined. * * * Further, the acceptance of a proposed plan of consolidation by the stockholders of a railroad corporation is not necessary where the court shall have determined that the corporation is insolvent; and an approved plan of reorganization is binding upon stockholders where a finding of insolvency has been made. The Supreme Court has provided in its rules that upon our application, prior to our approval of a plan of reorganization, the court, after a hearing, shall determine whether or not a corporation is insolvent. Apparently, the courts are regarded as the only present authority for the determination of this question. Considering that reorganizations will take place in many different jurisdictions, there is ground for the belief that better results might be obtained by the designation of a common agency for the performance of this duty."

tional means is not a true measure of value for reorganization purposes.[2]

In arriving at its findings in the case and in its consideration of the factors upon which they were based, the Commission deemed that it was following the prescription of the statute and the legislative intent as expressed by the 1935 amendment. It considered that the public interest in the preservation of the railroad as an operating concern and its ability to continue in that capacity was of equal importance to the private rights of existing creditors and stockholders. Its endeavors have been pointed to that objective, while at the same time it has sought to preserve the relative priorities of the several classes of claimants in their participation in the reorganized company. In applying the legislative mandate of the valuation provisions of subparagraph (e), it did not read in them a duty to make exact findings of value in order to reach findings of want of equity or to determine exactly in dollars the respective equities of the several classes of claimants. The Commission realized that at best it could only reach an approximation of value and that its findings would still be an approximation in fact, although clothed in terms of dollars and cents findings. It construed the provisions as a delegation of a duty to use its best judgment in arriving at a fair and

[2] See testimony of Mr. Craven in Hearing before the Committee on Judiciary on H. R. 6249, 74th Cong., 1st Sess. (1935), pp. 23 *et seq.*

equitable plan of reorganization based upon valuations that were the closest estimation of the commercial worth of the property securing liens, having in mind the necessity of giving principal weight to earning power. Observance of the rule of absolute priority was a consideration which had to be fitted into the legislative scheme of reorganization. This entailed a determination of what allotment of new securities would satisfy the rule. It was clear that the value of the property as a whole was not to be measured by liquidation value or realizable yield upon forced sale. When such value had to be translated into terms of allowable capitalization, economic principles as well as the legislative direction dictated that earning power be given great weight. But it was also recognized that other elements might have to be given consideration. So, too, in evaluating the component parts of a property in order to apply the rule of absolute priority, the value of the isolated item—which would be the limit of the security of the lien should it be reduced to cash—was not a true test since each item of property derived additional value by reason of its relation to the whole property as an operating unit. Faced with these conditions, the Commission has consistently determined the allowable capitalization, the kind and character of the new securities making up the total and the allocation of the new securities to the various classes of claimants upon a finding

that "the securities represent the equitable equivalent of the debtor's assets available for satisfaction of claims" and has made its allotment upon its finding "as to the relative priority, value, and equity of the various claims and the value of the new securities available in exchange therefor." This method of treatment the Commission considers to be sufficient under Section 77 and to comply fully with the rule of absolute priority and the principles enunciated by this Court in *Case* v. *Los Angeles Lumber Co.*, 308 U. S. 106, and *Consolidated Rock Products Co.* v. *DuBois*, 312 U. S. 510.

II

The fairness and equitableness of a plan of reorganization does not depend upon findings of absolute values even assuming they could be ascertained. That would be to assume a simplicity which does not and cannot exist. The formulation of a fair and equitable plan is not a mere matter of a mathematical calculation. This Court has repeatedly recognized that value is a judgment figure. Even where it is necessary to adopt a dollar value as a practical necessity, as in rate-making or taxation, this Court has recognized that the value so reached is more or less fictitious. Thus in *The Minnesota Rate Cases*, 230 U. S. 352, 434, it was said:

> The ascertainment of that [rate-making] value is not controlled by artificial rules. It is not a matter of formulas, but there

> must be a reasonable judgment having its basis in a proper consideration of all relevant facts. * * *

Mr. Justice Brandeis, dissenting in *Missouri ex rel. Southwestern Bell Telephone Co.* v. *Public Service Commission,* 262 U. S. 276, 292, said:

> It is impossible to find an exchange value for a utility, since utilities, unlike merchandise or land, are not commonly bought and sold in the market. * * *

Again speaking of value of a railroad for tax purposes this Court in *Rowley* v. *Chicago & N. W. Ry.,* 293 U. S. 102, 109–110, said:

> The ascertainment of the value of a railway system is not a matter of arithmetical calculation and is not governed by any fixed and definite rule. Facts of great variety and number, estimates that are exact and those that are approximations, forecasts based on probabilities and contingencies have bearing and properly may be taken into account to guide judgment in determining what is the money equivalent—the actual value—of the property. * * * The determination is to be made in the exercise of a reasonable judgment based on facts so pertinent and significant as to be of controlling weight as indications of the value of the property.

In *Nashville, C. & St. L. Ry.* v. *Browning,* 310 U. S. 362, 370, which dealt with a tax assessment, this Court said:

> * * * railroads, unlike farms and city lots and stocks and bonds, are not objects of exchange. The very notion of a "full cash value" for a railroad is in many respects artificial. See 1 Bonbright, The Valuation of Property, pp. 511–632. Whatever may be the pretenses of exactitude in determining such a "value," to claim for it "scientific" validity, is to employ the term in its loosest sense. * * *

In railroad reorganizations the same obstacle to true findings of dollar value obtains. The exchange is not one of property or securities for cash, but of new securities for old securities or claims. A fair exchange is all that the law requires. And whether it is a fair exchange must be based upon the exercise of an informed judgment. If dollar value could be matched against dollar value there would be no need for an expert body. So if certainty cannot be attained the use of terms of certainty is illusive. But here the practical necessity does not exist. The rule of full compensatory provision should be applied realistically, and if the Commission's allocation of new securities—representing as it does its best judgment as to comparative values of both the new securities and the old securities to be surrendered—is supported by reasoned analysis of the evidence the plan should not be condemned simply because the Commission has not arbitrarily stated that the exact dollar values of the securities to be exchanged are absolutely equal.

With respect to making a precise finding of value of parts of the system the Commission recently has said in *St. Louis-S. W. Ry. Reorganization*, 252 I. C. C. 325, 361:

> The properties comprise one operating unit; a complete separation of values would necessarily have to be based on extensive assumptions of unprovable validity; and any attempt at such a separation would in the end serve no purpose except to present an apparent certainty in the formulation of the plan which does not exist in fact. The Act calls for valuations only where necessary and in our view further valuations are not necessary here.

III

From a practical standpoint a compliance with the decision here in issue will involve administrative difficulties without corresponding benefits. We do not advance the impracticability of complying with the decision as ground *per se* for its reversal. But where as here compliance will spell nothing in terms of accomplishment and will tend to defeat two of the main objectives in the enactment of Section 77, namely, the expediting of the reorganization process and curtailment of expenses (*Continental Bank v. Chicago, R. I. & P. Ry.*, 294 U. S. 648, 685), any interpretation which tends to circumvent these objectives should be viewed doubtfully.

The administrative difficulties are real if not so apparent in the case of the Western Pacific Railroad where the capital structure is comparatively simple. In the case of the larger systems undergoing reorganization, these difficulties will be greatly magnified. In the *Milwaukee Reorganization* there are sixteen classes of system securities outstanding as of December 31, 1938, of which eleven are bond issues having varying liens on different parts of the system.

The decision of the court below requires the Commission in the instant case to evaluate each of the claims of the Reconstruction Finance Corporation, the Railroad Credit Corporation, and other secured creditors including the holders of outstanding mortgage bonds. This would involve a valuation of the security for these claims. The opinion below asserts that there must be a finding of value of the pledged bonds and of the property securing the bonds. If a valuation of the bonds be made upon the basis of the value of the property securing them there arises the impracticability of reaching a separate value on various mortgage divisions operated as a part of a railroad system. If market value of the bonds be used no true value may be reached. A thin market for railroad securities, the presence of distress sales and the fact that the company is undergoing reorganization, leave little weight to the market quotations as a basis for valuing the bonds. Some issues

outstanding may not be listed on the exchange. The values of these bonds if they are to be determined on a market basis would have to be gauged from prices of securities of other railroads by a comparison of yields, earnings coverage, and the separate provisions of the various securities. There would be relatively few securities available for comparison and fewer still which would reflect liens and traffic conditions in any way similar to those of the debtor. A valuation on such a basis would be of little practical help in determining fairness of treatment under a plan of reorganization.

The opinion below asserts that the Commission must find in dollars and cents the value of the new securities which are to be exchanged for the old. Here the difficulties would be accentuated by the lack of information as to the demand on the market for the securities of a railroad just released from bankruptcy with no established credit. Ordinarily there is not even a "when issued" market at the time the plan is approved by the Commission. In the *St. Louis-S. W. Ry. Reorganization, supra,* the Commission said, p. 356:

> A reorganization based on expected value of the new securities on the immediate market would necessarily be much more drastic, and result in great and in our view unnecessary, hardship to the junior creditors.

Evidence in support of such values would merely be the expressions of opinion, and the ultimate finding of the Commission even though stated in terms of dollars and cents would be nothing more than informed guesswork.

IV

Section 77 was enacted principally as a procedural reform. Expedition and economy were among its chief objects. While rehabilitation of insolvent railroads was possible under equity receivership certain weaknesses, as for instance the use of foreclosure sale and inability to bind non-assenting security holders, as well as lack of control by the court over charges of committees for security holders, also impelled the legislation. Under equity proceedings certain principles had been developed to govern confirmation of plans of reorganization. These principles were not discarded by the enactment of reorganization procedures under the bankruptcy powers. On the contrary, the validity of a plan under Section 77 must be tested by the same principles as have obtained in equity proceedings. Particular reference to these principles has been incorporated in subsection (e) where it is provided that the plan shall "conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders."

The development of these requirements may be briefly recounted.

Northern Pacific Ry. v. *Boyd*, 228 U. S. 482, established the principle that a plan of reorganization was subject to judicial scrutiny as to its fairness. The exclusion of junior claims while permitting old stockholders to participate in the reorganization was condemned. If the value of the road justified the issuance of new stock in exchange for old shares, the creditors could not be foreclosed but were entitled to the benefit of that value, whether it was present or prospective, for dividends or only for purposes of control. Continuing, the opinion states (p. 508):

> This conclusion does not, as claimed, require the impossible and make it necessary to pay an unsecured creditor in cash as a condition of stockholders retaining an interest in the reorganized company. His interest can be preserved by the issuance, on equitable terms, of income bonds or preferred stock. * * *

Thereafter the courts undertook to pass upon the fairness of plans. Compare *Guaranty Trust Co.* v. *Missouri Pacific Ry. Co.*, 238 Fed. 812; *Graselli Chemical Co.* v. *Aetna Explosives Co.*, 252 Fed. 456. But dollar findings of value were not considered as essential in order to adjudge the fairness and equitableness of the plan. This requirement was specifically rejected in the *Guaranty Trust* case, *supra*, the court saying (p. 818):

> Complaint is also made that the holders of the bonds on four other branch or subsidiary lines are offered the same or better terms, and comparisons are made between those lines and the Kansas City Northwestern as regards values of the properties and amounts of encumbrance. But there are other considerations than those. The relation of a particular railroad to the system as a whole, its value to the system on that account, and the advisability of including or excluding it, in view of the necessities of the reorganization, enter into the problem. A court cannot well review such matters, but must leave them largely to the business judgment of those in charge. It would, perhaps, be going too far to say a court should never interfere on a complaint of that kind; but clearly it should not do so unless in an exceptional instance of fraud or grossly inequitable discrimination. Generally the objection to a plan of reorganization should involve a definite principle, and not require a long complicated investigation of values, properties, etc. As to this an analogy may be found in the opinion of the Supreme Court on a phase of the Boyd Case.

In dealing with the reorganization of the Missouri-Kansas-Texas Railway this Court, in *Kansas City Ry.* v. *Central Union Trust Co.*, 271 U. S. 445, passed upon certain questions dealing with the comparative treatment accorded unsecured creditors and stockholders under the proposed

plan of reorganization. In holding upon principles enunciated in the *Boyd* case, *supra*, that a plan will be fair if it tenders to such creditors all that could reasonably be expected under all existing circumstances notwithstanding that it provides for stockholder participation, no suggestion was made that precise dollar findings of value are a prerequisite to a finding of fair treatment.

In *National Surety Co.* v. *Coriell*, 289 U. S. 426, the Court rejected the plan because the district court had before it only informal, inadequate and conflicting *ex parte* assertions unsupported by testimony. In discussing this deficiency the Court took occasion to say that (p. 436) "A trustworthy appraisal; an account showing the result of recent operations of the business; an accurate determination of the number of creditors, the amounts of their respective claims, and the extent to which collateral given or payments made to them might be deemed preferences; these were facts which might have influenced the court in deciding whether the plan should be approved or should be approved only upon a public sale."

But even here the decision does not assume to state what must comprise the record in order to sustain the fairness of the plan. Concededly there must be adequate and competent evidence upon which the fairness of the plan can be tested and the Court points out the kind and qual-

ity of evidence that will be sufficient for that purpose. But there is no holding that dollars and cents values of the items of property which go to make up the plan, and of the old and new securities, must be ascertained and set out in order to determine whether full compensatory treatment has been accorded.

In *Case v. Los Angeles Lumber Co.*, 308 U. S. 106, a plan of reorganization under Section 77B of the Bankruptcy Act provided for the participation of the old stockholders to the extent of 23 percent of the assets and voting power of the new company in spite of a finding of insolvency by the lower court and a finding that the total of the new stock to be issued would exhaust the total value of all the assets of the debtor. In condemning the plan this Court reiterated and clarified the doctrine of absolute priority and held that the words "fair and equitable" as used in Section 77B were words of art which had acquired a fixed meaning through judicial interpretations in the field of equity receivership reorganizations. But again there is no suggestion in the opinion that the rule of absolute priority must be tested by precise findings of dollar value.

We come then to *Consolidated Rock Products Co.* v. *Du Bois*, 312 U. S. 510, which the court below has said ruled its opinion. There the plan of reorganization under Section 77B provided for participation of stockholders of the debtor holding company when it did not appear that the un-

mortgaged assets of the subsidiaries had been exhausted, particularly in view of a claim of the subsidiaries under an operating agreement with the debtor. In the present case the court of appeals has seized upon an introductory paragraph in that opinion as laying down a rule that valuations are at all times necessary. It has, however, disregarded the context and the special circumstances involved in the decision. Thus the lower court says (R. 2671):

> Lacking the requisite valuation data, the court was in no position to exercise the "informed, independent judgment" which appraisal of the fairness of a plan of reorganization entails.

The court below has interpreted the *Rock Products* decision as requiring the Commission to make sixteen specific dollars and cents findings of value as a condition to approving the plan proposed. But the corresponding paragraph of the *Rock Products* decision reads (p. 520):

> On this record no determination of the fairness of any plan of reorganization could be made. Absent the requisite valuation data, the court was in no position to exercise the "informed, independent judgment" (*National Surety Co.* v. *Coriell*, 289 U. S. 426, 436) which appraisal of the fairness of a plan of reorganization entails. *Case* v. *Los Angeles Lumber Products Co.*, 308 U. S. 106. And see *First National Bank* v. *Flershem*, 290 U. S. 504, 525. * * *

The decision then proceeds to consider why in that case no appraisal of fairness could be made. It holds that under the absolute priority rule the bondholders of the subsidiaries were entitled to recourse against the unmortgaged assets of the subsidiaries before the stockholders of the holding debtor company could participate; that there was a claim against the holding company which if valid only to the extent of 25 percent of the book figure would have drawn the entire assets of the debtor down into the estates of the subsidiaries, that thus while the mortgaged assets were found by the district court to be insufficient to pay the mortgage debt, it was also necessary to find the amount of the deficiency and the amount of the unmortgaged assets in order to find that the bondholders would receive full compensation. This Court further held that it was also necessary to determine the fairness of the plan in respect to the subsidiary bondholders *inter sese* because the plan treated them equally while claim was made that the value of the assets of one subsidiary was greater than that of the other. In this connection the opinion states there should be "some appropriate formula for at least an approximate ascertainment of their respective assets."

We submit that this Court did not lay down any rule of exact determination in terms of dollars and cents of the values of the various items treated in formulating a plan of reorganization

in order to test its fairness. Indeed the opinion recognizes that the rule of full compensation is flexible and will yield to the practicalities of the case (pp. 529–530):

> Practical adjustments, rather than rigid formula, are necessary. The method of effecting full compensation for senior claimants will vary from case to case. As indicated in the *Boyd* case (228 U. S. at p. 508) the creditors are entitled to have the full value of the property, whether "present or prospective, for dividends or only for purposes of control," first appropriated to payment of their claims. But whether in case of a solvent company the creditors should be made whole for the change in or loss of their seniority by an increased participation in assets, in earnings or in control, or in any combination thereof, will be dependent on the facts and requirements of each case. So long as the new securities offered are of a value equal to the creditors' claims, the appropriateness of the formula employed rests in the informed discretion of the court.

The decision of the court below in the instant case attempts to measure the adequacy of the Commission's treatment of the various claims upon the form in which its findings and conclusion were stated. In so doing it reads into the *Rock Products* case a rule that was not enunciated or intended. The inadequacy of the findings in the *Rock Products* case did not derive from the form which they

took but from a deficiency in the record. The decision declares that earning power is the dominant measure of present worth for reorganization purposes and any estimate of future earnings "must be based on an informed judgment which embraces all facts relevant to future earning capacity and hence to present worth"; and "since its application requires a prediction as to what will occur in the future, an estimate, as distinguished from mathematical certitude, is all that can be made."

The Commission's report gave dominant weight to earning power in determining total allowable capitalization and the allocation of the new securities. It had before it extensive studies of the Debtor's traffic and revenues and earnings as a whole and broken down, insofar as was possible, with respect to the several divisions of the system. The Commission's analysis of this and other elements of value supported its findings as to the fairness of the exchanges of securities provided by the plan. Its conclusions were expressed in terms of the new capital structure; it did not assume to ascribe absolute dollar values in order to give the appearance of certainty.

What the Commission has done is to provide a plan of reorganization which fully complies with the rule of full compensatory treatment based upon its opinion as to what allocation of new securities will constitute equitable treatment for the surrender of the entire "bundle of rights." This, we submit, is all that Section 77 and the decisions of this Court require.

CONCLUSION

The Commission's interest in this case lies primarily in working out a definite, well-understood procedure which will admit of prompt and efficacious railroad reorganizations. The procedure required by the decision of the Circuit Court of Appeals does not subserve this end. If the rights of all parties to the proceedings are protected, if their treatment in the plan of reorganization provides substantial justice having due regard to judicial determination of the nature and extent and the relation of such rights to those of other parties in interest, all of which has been provided in a plan based upon substantial evidence, no obeisance should be made to form at the sacrifice of what otherwise is a "fair and equitable" plan.

The judgment of the Circuit Court of Appeals should be reversed and the cause remanded with directions to affirm the order of the District Court approving the plan of reorganization.

Respectfully submitted.

CHARLES FAHY,
Solicitor General.

No. 33

RECONSTRUCTION FINANCE CORPORATION,

PETITIONER

v.

WESTERN PACIFIC RAILROAD CORPORATION, ET AL.

ON WRIT OF CERTIORARI TO THE CIRCUIT COURT OF APPEALS FOR THE NINTH CIRCUIT

BRIEF FOR THE PETITIONER

OPINIONS BELOW

The initial report and order of the Interstate Commerce Commission (R. 194) [1] are reported in 230 I. C. C. 61; its report and order on further consideration (R. 300) are reported in 233 I. C. C. 409; and its order denying the further petition of the Debtor, The Western Pacific Railroad Company, for modification of the plan approved by it (R. 884) is reported in 236 I. C. C. 1. The opinion of the District Court

[1] The full record in this case consists of the transcripts of the proceedings before the Interstate Commerce Commission, the District Court and the Court below, together with numerous exhibits, all of which have been certified and filed with this Court. In view of the voluminous character of the record, the parties have stipulated (R. 2625) for the printing of only selected portions thereof. Those portions have been consolidated into nine volumes, designated herein as "R".

(R. 1569) is reported in 34 F. Supp. 493. The opinion of the Circuit Court of Appeals (R. 2663) is reported in 124 F. (2d) 136.

JURISDICTION

The decree of the Circuit Court of Appeals was entered November 28, 1941 (R. 2675-2676). Petitions for rehearing were filed by Irving Trust Company, an indenture trustee, and by the Debtor, whose appeals had been dismissed by the decree of November 28, 1941. On February 12, 1942, a rehearing was granted. On February 16, 1942, an order was entered setting aside so much of the decree of November 28, 1941, as had dismissed the appeals of the Irving Trust Company and of the Debtor, but denying all further relief sought by the petitions for rehearing (R. 2681). The petition for a writ of certiorari was filed February 28, 1942, and was granted [2] on April 27, 1942. The jurisdiction of this Court rests on Section 240(a) of the Judicial Code, as amended by the Act of February 13, 1925, and on Sections 24(c) and 77 of the Bankruptcy Act.

QUESTIONS PRESENTED

On July 29, 1939 the Interstate Commerce Commission, in proceedings under Section 77 of the Bank-

[2] The other respondents below, Frederick H. Ecker, John W. Stedman, and Reeve Schley, constituting the Institutional First Mortgage Bondholders Committee; and Crocker First National Bank of San Francisco and Samuel Armstrong, as Trustees under the First Mortgage of the Western Pacific Railroad Company, each filed petitions for writs of certiorari and the Western Pacific Railroad Company filed a cross petition. These petitions and the cross petition were also granted.

ruptcy Act, issued an order approving a plan of reorganization (R. 362-400) for the Western Pacific Railroad Company, Debtor. The principal questions are:

1. Whether the findings and conclusions of the Interstate Commerce Commission were sufficient to support the exclusion of the stockholders and unsecured creditors of the Debtor from participation, as provided in the plan.

2. Whether the findings and conclusions of the Interstate Commerce Commission were sufficient to support the allocation of the securities of the reorganized company among those found to be entitled to share therein, in the manner provided in the plan.

3. Whether, as the Circuit Court of Appeals indicated in its opinion, the District Court misconceived the respective functions of the Interstate Commerce Commission and the District Court in connection with plans of reorganization under Section 77 of the Bankruptcy Act.

STATUTE INVOLVED

The relevant portions of Section 77 of the Bankruptcy Act, 47 Stat. 1474, 11 U.S.C. §205, as amended, are set forth in Appendix A, *infra*, pp. 92 to 105.

STATEMENT

This case arises out of reorganization proceedings instituted over seven years ago. On August 2, 1935 the Western Pacific Railroad Company (hereinafter called the Debtor) filed its petition (R. 4) for reorganization under Section 77 of the Bankruptcy Act (hereinafter called Section 77) with the District

Court for the Northern District of California, Southern Division, and a copy thereof with the Interstate Commerce Commission (hereinafter called the Commission. Over four years later, after extended proceedings, the Commission, on September 28, 1939, certified to the District Court (R. 1034) a plan (R. 362) for the reorganization of the Debtor. The plan excluded the stockholders and unsecured creditors of the Debtor from participation, their equity and claims having been found to have "no value" (R. 269) and allocated new securities to the creditors found to be entitled thereto. The District Court, after hearing, approved the Commission's plan by its order of August 15, 1940 (R. 1569). Because the Commission had not made certain findings considered essential by the Circuit Court of Appeals, that court, without passing on the findings made and conclusions arrived at by the Commission or upon the merits of the plan, reversed and remanded the cause to the District Court with directions to dismiss it or, in the court's discretion, to refer it back to the Commission for further action (R. 2663).

THE DEBTOR AND ITS PROPERTIES

The Debtor was organized in 1916 to acquire and operate, pursuant to a plan of reorganization, the properties of Western Pacific Railway Company (R. 1043). At the time of filing its petition, the principal assets of the Debtor were 1207.51 miles of standard gauge railroad in the States of Utah, Nevada and California, rolling stock and equipment, and securities of certain small operating railway companies. The

Debtor's main line, 924.17 miles, runs from Oakland, California, to Salt Lake City, Utah (R. 1037). The balance of its mileage consists of branch lines springing from the main line and an additional segment of main line, known as the Northern California Extension, connecting the Debtor's line with the Great Northern (R. 1037). The Debtor also owned and operated a ferry service from Oakland to San Francisco and undivided interests in various pieces of track operated jointly with others (R. 1038-1039).

The Debtor's properties are subject to two mortgages, its First Mortgage, dated June 26, 1916, under which there are outstanding in the hands of the public $49,290,100 principal amount of 5% bonds (R. 1047) and its General and Refunding Mortgage, dated January 1, 1932, pursuant to which there have been issued $18,999,500 principal amount of bonds, all of which have been pledged to secure notes of the Debtor in the principal amount of $10,408,409.88 (R. 1053-1057). The annual fixed interest charges on said bonds and secured notes and other interest bearing obligations of the Debtor amounted to $3,177,302 (R. 9a). On August 2, 1935, the date of the filing of the petition, the accrued and unpaid interest on the Debtor's First Mortgage bonds amounted to $4,730,480.42 (R. 1022), interest having been last paid thereon on September 1, 1933 (R. 1022). On the Debtor's secured notes interest was last paid at varying dates in 1933 and 1934 so that at the time of the filing of the petition accrued and unpaid interest amounted to $396,511.92 on the notes

of the Debtor held by A. C. James Co. (R. 1023), $393,691.00 on those held by Reconstruction Finance Corporation (R. 1023-1024) and $57,307.94 on those held by The Railroad Credit Corporation (R. 1024-1025). The interest due on the First Mortgage Bonds in 1934 amounting to $2,133,800 was deferred to January 1, 1937, pursuant to an agreement to which the unsecured creditors of the Debtor were parties. That agreement provided for the subordination of the claims of the unsecured creditors [3] to the bondholders' deferred claims for interest (R. 1047-1048).

The book value of all of the Debtor's assets as of December 31, 1935, was $166,960,037.15 (R. 1062). Its investment in road and equipment and that of its subsidiaries (excluding one abandoned in 1939) less accrued depreciation on equipment as of December 31, 1938 was $144,978,559 (R. 1062-1063). The rate making valuation [4] of the Debtor's properties and that of its subsidiaries (excluding the one which was abandoned in 1939) as of December 31, 1938, was $150,907,623.49 (R. 1061-1062).

FINANCIAL HISTORY OF THE DEBTOR

Upon commencing operations in 1916, the capital liabilities of the Debtor consisted of $20,000,000 of first mortgage bonds, $27,500,000 par value of preferred stock and $47,500,000 par value of common

---

[3] Western Pacific Railroad Corporation and Western Realty Company, respectively the parent and an affiliate of the Debtor.

[4] Determined under Section 19 (a) of the Interstate Commerce Act, 29 U.S.C.A., Sec. 19(a).

stock, or a total of $95,000,000. Its annual fixed charges were $1,000,000, the interest on the first mortgage bonds (R. 1044-1045).

Beginning in 1921, the First Mortgage indebtedness was increased from time to time until 1931. As of January 1, 1939, there were outstanding $49,290,100 principal amount of First Mortgage Bonds (R. 1047). In addition to the increase of its indebtedness through the issuance of First Mortgage Bonds, the Debtor in 1930 issued $5,000,000 principal amount of debentures, all of which (except $200 principal amount) were refunded in 1932 (R. 1054) by the issuance of notes in the principal amount of $4,999,800 (R. 1054). The indebtedness of the Debtor was further increased in 1932 and 1933 in the amount of $5,408,609.88 for money borrowed to meet First Mortgage bond interest and for other purposes (R. 1055-1057). At the time of filing its petition, the Debtor was also indebted to its parent corporation, Western Pacific Railroad Corporation, in the amount of $5,818,791, for advances on open account and had outstanding equipment obligations of $2,994,065 (R. 9). The increase in indebtedness between 1916 and 1933 resulted in the Debtor's annual fixed interest charges increasing from $1,000,000 to $3,177,302 (R. 9a).

While the increase in indebtedness above outlined was going on, the Debtor during part of the period (1921-1926) appeared to be prosperous. A 6% dividend was regularly paid in those years on its preferred stock and in 1925 a 5% dividend was paid on the common. The total dividend payments during those years

amounted to $13,115,920 (R. 1050-1051). In 1925 when the largest dividend payment, $4,453,420 (R. 1050), was made, the Company increased its First Mortgage indebtedness by $4,000,000 for "General Corporate Purposes" (R. 1046). In the following year, the increase in First Mortgage indebtedness for the same purposes was $2,600,000. At the same time "a substantial amount of deferred maintenance had been permitted to accrue on the Debtor's property" (R. 218) so that in 1927 dividend payments were stopped and "an Improvement Program initiated which contemplated the expenditure of approximately $18,000,000 to rehabilitate the Debtor's property" (R. 1052). $8,000,000 of the $18,000,000 Improvement Program was completed by the Debtor. The balance was undertaken by the Debtor's Trustees and the indebtedness against the property was increased by $10,000,000 through the issuance of Trustees' certificates to finance the program (R. 1028).

THE DEBTOR'S EARNINGS

The consolidated earnings of the Debtor and its subsidiaries, available for interest, for the years 1922 to 1938, as reported by the Debtor and as adjusted "to take into account (a) rehabilitation expenditures in the years 1927-1931 and 1934-1938, (b) amortization of discount on First Mortgage Bonds of the Debtor in the years 1922-1938, and (c) deductions and credits in the years 1931-1934 made by the Commission to accord with its Accounting Rules and Regulations," were (R. 1064-1066):

Year	Earnings available for Interest Reported	As Adjusted
1922	$2,306,124	$2,404,890
1923	3,313,976	3,412,234*
1924	3,144,124	3,241,823
1925	4,454,352	4,557,798
1926	4,759,282	4,868,390
1927	2,674,494	3,470,861
1928	2,964,371	4,376,972
1929	2,529,846	3,718,436
1930	1,552,487	2,381,529
1931	186,708 (D)	220,494 (D)
1932	252,706	283,912
1933	674,007	474,365
1934	1,084,244	1,396,353
1935	805,589	1,377,026
1936	181,102	1,901,423
1937	903,113 (D)	1,077,407
1938	1,243,916 (D)	255,431

(D) Deficit.

* The adjusted figure for 1923 shown (R.1065) as $4,412,234 is a typographical error for $3,412,234. See R. 2063.

For the seventeen-year period, 1922-1938, inclusive, the average earnings available for interest as adjusted were $2,292,844. For the ten years 1929-1938, inclusive, the average was $1,265,539 and for the five years 1934-1938, inclusive, the average was $1,195,528. As previously stated, the annual fixed interest charges of the Debtor at the time of the filing of its petition were $3,177,302 (R. 9a) and the then accrued and unpaid interest amounted to $5,577,991.28 (R. 1022-1025).

Although probably not significant in the determination of the questions involved (see discussion, *infra*, pp. 41-45), it may be noted that the earnings from the

properties of the Debtor have increased very substantially in the last two or three years as the result of the national defense program and later of our war effort, being greater in 1941 than the amount of the Debtor's annual fixed interest charges and running at a higher rate in 1942.

PROCEEDINGS BEFORE THE COMMISSION

Hearings on a plan of reorganization for the Debtor were held before the Commission on March 23, April 21, May 13, July 1, September 28, October 26, November 19 and December 9, 1936, at which all the parties were given an opportunity to be heard. Briefs were then filed. On August 1, 1937, the Bureau of Finance of the Commission issued a proposed report and recommended a plan (R.116). Exceptions thereto were filed and oral argument was had thereon before the full Commission on November 17, 1937. On October 10, 1938, the Commission issued its report and order (R. 194) approving a plan of reorganization of the Debtor. Petitions for rehearing and for modification of the October 10, 1938 report and order and the plan of reorganization therein approved were filed with the Commission on December 9, 1938 and on December 30, 1938 a rehearing was granted. Oral argument was had before the Commission on January 20, 1939 on the petitions for modification. On June 21, 1939 the Commission issued its "Report on Further Consideration" (R. 302-362) and made an order approving a plan of reorganization for the Debtor (R. 362-400) differing in certain respects from the plan ap-

proved in the order of October 10, 1938. On August 2, 1939, the Debtor petitioned the Commission for a rehearing and modification of the plan approved in the report and order of June 21, 1939. That petition was denied (R. 884) on September 19, 1939 and on September 28, 1939 the Commission certified (R. 1034-1035) its plan to the Court as required by Section 77.

THE COMMISSION'S PLAN

The claims against and interests in the property of the Debtor dealt with in the Commission's plan, including accrued interest to January 1, 1939, the effective date of the plan, are as follows (R. 1022-1027):

Claim or Interest	*Principal of claim or interest*	*Accrued Interest*	*Total Claim*
Trustees' Certificates	$10,000,000.00	$ ——	$10,000,000.00
Equipment obligations	2,750,050.00	94,202.00	2,844,252.00
First Mortgage 5% Bonds	49,290,100.00	13,143,776.66	62,433,876.66
Reconstruction Finance Corporation Notes	2,963,000.00	899,869.98	3,862,869.98
Railroad Credit Corporation Notes	2,445,609.88	145,314.23	2,590,924.11
A. C. James Co. Notes	4,999,800.00	1,249,950.00	6,249,750.00
Total secured debt	$72,448,559.88	$15,533,112.87	$87,981,672.75
Advances on Open account[a]	5,818,791.00	1,992,096.00	7,810,887.00
Total debt	$78,267,350.00	$17,525,208.87	$95,792,559.75
Preferred stock, par value $100 per share[a]	28,300,000.00	——	28,300,000.00
Common stock, par value $100 per share[a]	47,500,000.00	——	47,500,000.00
Totals	$154,067,350.88	$17,525,208.87	$171,592,559.75

[a] All owned by Western Pacific Railroad Corporation, except a small part of the open account advances owned by Western Realty Company, its wholly-owned subsidiary.

The Debtor's note indebtedness to Reconstruction Finance Corporation shown in the foregoing schedule is secured by $10,750,000 principal amount of its General and Refunding Mortgage Bonds, its indebtedness to The Railroad Credit Corporation by $4,000,000 principal amount of such Bonds and its indebtedness to A. C. James Co. by $4,249,500 principal amount thereof. These amounts aggregate $18,999,500, the entire outstanding issue of the Debtor's General and Refunding Mortgage Bonds.

The approved plan provides for a capital structure of the reorganized company as follows (R. 310, 364):

Title of issue	*Amount*	*Annual interest, dividends or other charges*
Undisturbed Equipment Obligations	$ 2,750,050	$ 94,202
First Mortgage 4% Bonds, Series A, due January 1, 1974	10,000,000	400,000
Total Annual Fixed Charges		$494,202
Mandatory Capital Fund		500,000
Income Mortgage 4½% Bonds, Series A, due January 1, 2014. Interest cumulative to 13½%, otherwise non-cumulative	21,219,075	954,858
Total funded debt	$33,969,125	
Total annual charges (fixed and contingent) and Capital Fund		$1,949,060
Income Mortgage Sinking Fund		106,095
Participating 5% Preferred Stock ($100 par value). Dividends non-cumulative, participating share for share with Common Stock in dividends declared in any year after dividends have been declared on Common Stock at rate of $3 per share	31,850,297	1,592,515
Total securities with par value	$65,819,422	
Total annual charges, Capital Fund, and Preferred dividend requirements		$3,647,670
Common Stock (without par value)	319,441 shs.	

The plan provides for the distribution of securities of the reorganized company among existing claimants as follows (R. 317, 390-393):

Claimants	*New First Mortgage 4% Bonds Series A*	*New Income Mortgage 4½% Bonds Series A*	*New 5% Preferred Stock Series A ($100 Par)*	*New Common Stock (No Par)*
First Mortgage Bondholders		$19,716,040	$29,574,060	230,593 shs.
Reconstruction Finance Corporation (in exchange for Trustees' Certificates and Notes)	$10,000,000	1,185,200	1,777,800	15,788 shs.
Railroad Credit Corporation		154,111	241,681	35,425 shs.
A. C. James Co.		163,724	256,756	37,635 shs.
Totals	$10,000,000	$21,219,075	$31,850,297	319,441 shs.

Under the plan holders of the Debtor's First Mortgage 5% bonds receive new 4½% income mortgage bonds in an amount equal to 40% of the principal of their claims, new preferred stock in an amount equal to 60% thereof and 4.67 shares of new common stock in respect of the $266.67 accrued interest per thousand dollar bond (R. 317, 390). For its claim based on the Debtor's secured notes, Reconstruction Finance Corporation receives the same treatment as the First Mortgage bondholders, in consideration of exchanging its Trustees' certificates for an equal principal amount of new first mortgage bonds. The Railroad Credit Corporation and A. C. James Co. are allotted new securities on the basis of the General and Refunding Mortgage Bonds of the Debtor securing their respective claims. The unsecured claim of Western Pacific Railroad Corporation and its interest as the owner of all of the preferred and common

stock of the Debtor were not accorded participation because they were found to have "no value" (R. 392-393).

The Commission found that the securities, $21,219,075 principal amount of income bonds, $31,850,297 par value of preferred stock and 319,441 shares of no par value common stock, allocable to the creditors of the Debtor other than holders of equipment obligations and Trustees' certificates, "represent the equitable equivalent of the debtor's assets, available for the satisfaction of claims" (R. 316). The Commission also found that "the securities remaining available for distribution after satisfying the claims of the first mortgage bondholders * * * will be inadequate in value to satisfy" the claims of "the other creditors" (R. 269). With respect to a second lien held by The Railroad Credit Corporation on the Reconstruction Finance Corporation collateral, the Commission found that "the allocation of reorganization securities to" Reconstruction Finance Corporation "exhausts the value of the collateral pledged" and that the equity "in such collateral has no value" (R. 316).

The Commission's initial report of October 10, 1938 and its report on further consideration of June 21, 1939, contain the Commission's findings, conclusions and reasons therefor. The October 10, 1938 report (R. 194-284) states the proceedings which had been had before the Commission up to that time and proceeds to an exhaustive study of (1) the "Location and General Description of the Property" (R. 197), (2)

the "Owned or Controlled and Jointly Affiliated Railroad Companies" (R. 198), (3) the "Corporate and Financial History" of the Debtor (R. 199-203); (4) the Debtor's "Present Financial Structure" (R. 203-207), (5) the Debtor's "Traffic and Revenue" (R. 207-215), (6) the "Traffic and Revenue of Subsidiaries" of the Debtor (R. 215-218), (7) the Debtor's "Earnings Available for Charges" (R. 218-224), (8) "Value for Rate Making Purposes" (R. 224), and (9) "Classes of Creditors and Stockholders" (R. 224-227). On the basis of the factual discussion under the above headings and a detailed consideration of plans of reorganization filed by the Debtor and other parties (R. 227-241), the Commission stated its findings, "conclusions and reasons therefor" (R. 241-281) as required by Section 77. As to the existing stock interest the Commission found "that the equity of the existing stock has no value, and hence holders of such stock are not entitled to participate in the plan" (R. 269). The Commission also found that "the claims of the unsecured creditors, of the Western Pacific Railroad Corporation and of the Western Realty Company, have no value, and hence no securities or cash should be distributed under the plan in respect to those claims" (R. 269-270).

On the basis of the Commission's conclusions as to fixed charges, total charges, etc. of the reorganized company (R. 246-257), the Commission, in its initial report of October 10, 1938, stated the capitalization and the fixed, contingent and total charges of the new company as follows:

> "... the total capitalization, excluding 313,703 shares of no-par value common stock, would be $62,356,217, consisting of $3,066,117 of equipment obligations, $10,000,000 of first mortgage 4-per cent bonds, $19,716,040 of income mortgage 4-per cent bonds, and $29,574,060 of 5-per cent preferred stock. Treating the no-par-value common stock at $100 per share, the total capitalization would be $93,726,517. Total fixed interest charges would be $511,001, total fixed and contingent interest charges, plus the payments into the capital fund, and sinking fund would be $1,898,223, and preferred dividends would be $1,478,703, a grand total of $3,376,926 per annum" (R. 259).

Having set up a capital structure for the reorganized company, the Commission proceeded to consider the distribution of the new securities (R. 261-279). The first problem was a determination of the properties subject to the liens of the Debtor's two mortgages and the priorities thereof. It was admitted that the Debtor's first mortgage was a first lien "on the main line of the Debtor's railroad and the securities physically pledged under that mortgage" (R. 261). However, there was a dispute as to the Northern California Extension, various branches and spurs of the Debtor's line, as to the equity in rolling stock subject to equipment obligations and as to certain non-carrier real estate. The Commission considered the pertinent provisions of the granting clauses of the two mortgages and other relevant factors and concluded that the Debtor's First Mortgage bondholders "should be con-

sidered as having a first lien upon practically all of the assets of the debtor" [6] (R. 264-267). In deciding the lien questions, the Commission stated that the final adjudication thereof must be made by the court but that nevertheless it was necessary to determine them "preliminarily for the purpose of consideration of the plans before us" [7] (R. 262).

The October 10, 1938 report and order allocated all of the income bonds and preferred stock and 154,241 shares of the new no par common stock therein authorized to the holders of the existing First Mortgage Bonds (R. 270). The balance of the common stock, 159,462 shares, was allotted to the secured noteholders on the basis of the General and Refunding Mortgage Bonds held by them as collateral.

In its "report upon further consideration" of the October 10, 1938 report, which was issued by the Commission on June 21, 1939 after rehearing, the Commission concluded that certain modifications should be made in the plan previously approved (R. 300). Those modifications included (1) the increasing of the amount of income bonds to $21,219,075, the preferred

[6] Upon reconsideration the Commission found that certain items subject to the first lien of the General and Refunding Mortgage were of such a value as to justify the allocation of new income mortgage bonds therefor. (See *infra*, p. 53.)

[7] The District Court was wholly in accord with the Commission's conclusions on the lien questions (R. 1597) and this brief proceeds on the assumption that they were decided correctly. They will be the subject matter of briefs filed by the two Mortgage Trustees.

stock to $31,850,297 and the common stock to 319,441 shares, (2) increasing the rate of interest on the income bonds from 4% to 4½%, (3) a reallocation of securities, including an increase in the common stock allocable to the First Mortgage bondholders from 154,241 shares to 230,593, (4) allocating income bonds, preferred and common stock to Reconstruction Finance Corporation on the same basis as to First Mortgage bondholders, in consideration of the funding into new first mortgage bonds at par of the Trustees' certificates held by it, and (5) allocating income bonds, preferred and common stock to The Railroad Credit Corporation and the A. C. James Co. on the basis of the securities found on reconsideration to be allocable to the General and Refunding Mortgage Bonds securing these claims.

As the Commission expressly stated in its report of June 21, 1939, its allocation of new securities in the approved plan was "based upon our conclusion as to the relative priority, value, and equity of the various claims and the value of the new securities available in exchange therefor" (R. 317). And in accordance with the statutory requirement, the Commission in the same report and order specifically made the over-all finding "that the plan of reorganization approved in our report and order of October 10, 1938, *supra*, modified as herein indicated, will meet with the requirements of Section 77(b) and (e) of the Bankruptcy Act, as amended, and will be compatible with the public interest" (R. 354). Section 77(e), quoted in full in Appendix A hereto, requires the determination by the Com-

mission [8] that the approved plan "is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders." This specific finding the Commission expressly declined to modify upon consideration of a petition of the Debtor for further modification of the approved plan (R. 889-890).

PROCEEDINGS BEFORE THE DISTRICT COURT

Following the certification of the plan to the District Court, that court by its order of November 8, 1939 (R. 1035) required the parties to file their objections to the plan and claims for equitable treatment on or before December 8, 1939, and set January 22, 1940 for a hearing thereon (R. 1274). In order to simplify the issues, the District Judge called a pre-trial conference which was held on December 18th to 20th, 1939. At that time, a stipulation (R. 1017-1272) of facts not in dispute was filed. On January 22, 1940 a hearing (R. 1280-1569) was had in the District Court at which witnesses were called by various of the parties in support of their objections and claims for equitable treatment. In the proceedings before the District Court, Reconstruction Finance Corporation, the Institutional Bondholders Committee and the First Mortgage Trustees supported the Commission's plan. The other parties, the A. C. James Company, The Railroad Credit Corporation, Irving Trust Company, Western Pacific

[8] See Section 77(d).

Railroad Corporation and the Debtor, objected to its approval.

On August 15, 1940 the District Court handed down its opinion (R. 1569-1600) and entered its order (R. 1600-1607) overruling the objections to and approving the Commission's plan. The District Court affirmed the finding of the Commission that the pre-preferred and common stock of the Debtor had no value and likewise affirmed the Commission's finding that the claims of the unsecured creditors had no value. The court also found that the plan was fair and equitable and complied with all the requirements of Section 77.

THE ACTION OF THE COURT BELOW

From the District Court's order of approval, the objectors in the District Court appealed to the Circuit Court of Appeals for the Ninth Circuit. That court reversed the order of the District Court and remanded the proceeding to the District Court "with directions to dismiss it, or in the court's discretion and on motion of any party in interest, refer it back to the Commission for further action" (R. 2674).

The Circuit Court of Appeals did not purport to pass upon the merits of the plan or upon the accuracy of any of the Commission's findings or conclusions. The court took the view that other and different findings and conclusions than those made and arrived at by the Commission were necessary. The court said:

> "In this case, as has been seen, it was necessary to determine the value of (1) the debtor's

entire property, (2) each of the claims of Reconstruction Finance Corporation, (3) the claim of Railroad Credit Corporation, (4) the claim of A. C. James Company, (5) the claims of the holders of first mortgage bonds now outstanding, (6) the $10,000,000 of new first mortgage bonds, (7) the $21,219,075 of income bonds, (8) the 318,502.97 shares of new preferred stock, (9) the 319,441 shares of new common stock, (10) the property subject to the first mortgage now outstanding, (11) the $18,999,500 of refunding bonds pledged to secure the claims of Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James Company, (12) the other collateral pledged to secure each of said claims, (13) the property subject to the refunding mortgage only, (14) the property subject both to the refunding mortgage and to the first mortgage now outstanding, (15) the property which would be subject to the new first mortgage and (16) the property which would be subject to the income mortgage. It thus became the duty of the Commission to determine these values and certify them to the court. That duty was not performed.

"Lacking the requisite valuation data, the court was in no position to exercise the 'informed, independent judgment' which appraisal of the fairness of a plan of reorganization entails." (124 F.(2d) at 139; R. 2671.)

The Circuit Court of Appeals also indicated that the District Court had overstated the expert character of the Commission and had misconceived the weight to be

given to the Commission's determinations. The District Court, in its opinion, said:

> "It cannot be gainsaid that the Commission knows all about the Debtor, its property, its history, financial and otherwise, its traffic and revenue, and its financial structure. No official body in the country is better qualified, by reason of experience, ability and specialized knowledge than is the Commission to find the ultimate facts as to the Debtor in relation to any of the matters mentioned." (R. 1588; 34 F. Supp. at 501.)

Referring to that statement, the Circuit Court of Appeals said:

> "The statement indicates a possible misconception * * *
>
> "In determining whether a plan of reorganization satisfies the requirements of subsection e, the Court is not concluded by any determination made by the Commission, but may, and must, exercise its own independent judgment; and this is true whether such determination relates to value or to some other subject. Initially, however, the duty of determining the value of any property for any purpose under §77 rests on the Commission, not on the court." (124 F.(2d) at 140; R. 2672-2674.)

THE PARTIES AND THEIR CONTENTIONS

Reconstruction Finance Corporation, the Institutional Bondholders Committee, holders of the Debtor's First Mortgage bonds, and Crocker First National

Bank of San Francisco and Samuel Armstrong, as Trustees under the Debtor's First Mortgage, support the Commission's plan as complying with all the requirements of Section 77 of the Bankruptcy Act and challenge the holding of the court below that the Commission should have made findings other than and additional to the findings and conclusions appearing in its reports and orders embodying the plan.

The Commission's plan is objected to by (1) the Debtor, (2) Western Pacific Railroad Corporation, the Debtor's parent company, (3) A. C. James Company,[9] (4) the trustee of the Debtor's General and Refunding Mortgage and (5) The Railroad Credit Corporation. In general, the objections go to the total capitalization of the reorganized company, the contention being that the value of the Debtor's properties is sufficient to permit a larger one than that provided for in the Commission's plan. In particular the stock and unsecured creditor interests object to their claims and interests having been found to have "no value," and contend that the Commission's findings of "no value" with respect to their claims and interest are insufficient to deny them participation. The Trustee of the Debtor's General and Refunding Mortgage, together with A. C. James Company and The Railroad Credit Corporation, holders of the Debtor's General and Refunding Bonds as collateral, object to the find-

[9] A. C. James interests hold over 61% of the common stock and 40.36% of the total stock of Western Pacific Railroad Corporation, which is in turn the sole stockholder of the Debtor (R. 1051, 1528-1529).

ings of the Commission as to the liens of the Debtor's two mortgages. The Debtor joins in that objection. The same parties also object to the amount of new securities allocated with respect to the Debtor's General and Refunding Bonds. The Debtor also objects to January 1, 1939 as the effective date of the plan since it involves the accrual of interest to that date in determining the amount of creditors' claims. The Debtor would avoid interest accruals on creditors' claims by making the date of filing of the petition the effective date of the plan. A. C. James Company and The Railroad Credit Corporation object to the secured note claim of Reconstruction Finance Corporation against the Debtor being treated on the same basis as the Debtor's First Mortgage bonds, such treatment being in consideration of Reconstruction Finance Corporation exchanging the Trustees' certificates which it holds for an equal principal amount of new First Mortgage bonds. Objections are also made by some of the respondents to numerous details of the plan.

SPECIFICATION OF ERRORS TO BE URGED

The Court below erred:

1. In holding inadequate as a basis for excluding stockholders and unsecured creditors from participation in the reorganization the Commission's findings that (1) "the equity of the existing stock has no value," and (2) "the claims of the unsecured creditors * * * have no value."

2. In deciding that the findings, "conclusions and reasons therefor" of the Commission regarding the

allocation of new securities to those entitled to share are insufficient to support that allocation.

3. In deciding that the allocation of new securities in a reorganization under Section 77 should and must be based on exact dollars and cents valuations of all claims, properties and new securities.

4. In deciding that the functions of the Interstate Commerce Commission in Section 77 proceedings are confined within narrow limits and in general misstating the relative functions of the Commission and the District Court in such proceedings.

5. In failing to affirm the decision of the District Court.

SUMMARY OF ARGUMENT

1. In excluding the stockholder and unsecured creditors from participation in the distribution of new securities, the Commission found that these claims had no value, and that the securities allocable to the junior secured creditors will be insufficient to satisfy their claims. That these findings are adequate is attested by the terms of Section 77(e), as well as by the approval of plans based on similar findings in ten recent railroad reorganization proceedings in seven district courts. See also *In re 620 Church Street Building Corp.*, 299 U.S. 24, 27 (1936). The findings, moreover, are supported by the record. Giving proper weight to the earnings and financial history of the Debtor, the Commission could not well have reached a different conclusion. *Consolidated Rock Products Co.* v. *Du Bois*, 312 U.S. 510 (1941). The contention that a new plan is required because of wartime earnings is dangerously un-

sound, as has been recognized by the Commission and by two Circuit Courts of Appeals.

2. The requirement in the decision below of sixteen dollars and cents findings of value is excessively formalistic, unnecessary and impracticable. The findings and conclusions of the Commission are adequate to support its allocation of new securities among those entitled to participate. The First Mortgage Bonds were found to be a first lien on substantially all the Debtor's properties. The General and Refunding Bonds, held as collateral by noteholders, were found to be a first lien on a relatively small portion of the Debtor's assets, including the note and stock of a subsidiary and certain other securities, and a junior lien on the properties as a whole. Their participation was considered in the light of the assets subject to the first lien of this mortgage, the earnings, properties and traffic of the subsidiary and the dependence of its earnings on the Debtor, and in relation to the treatment of the First Mortgage Bondholders. In relation to each other, the participation of the secured noteholders, apart from the RFC, was fixed in proportion to the collateral held, since it was found that the collateral was inadequate to satisfy their claims. A practical adjustment was made for the RFC, as compensation for its exchange of Trustees' certificates, admittedly the equivalent of cash, for an equal face amount of new first mortgage bonds.

3. In stating that the District Court must exercise its independent, *de novo* judgment on all matters in reviewing a plan approved by the Commission, and

apparently that it must disregard even the expert character of the Commission as an administrative body long experienced in the railroad field, the court below misconceived the respective functions of the District Court and the Commission. Such a conception is at variance with the statutory scheme and the historical background of Section 77, with the well-established doctrine of this Court regarding the administrative finality of the Commission's decisions, and with the practical realities of railroad reorganization procedure.

Under Section 77 Congress has delegated the primary responsibility for the development of the reorganization plan to the Commission, and it is submitted that "having found that the record permitted the Commission to draw the conclusion that it did a court travels beyond its province to express concurrence therein as an original question." *Rochester Telephone Corp.* v. *United States*, 307 U.S. 125, 145-146 (1939). Certainly, the findings and conclusions of the Commission, in the performance of the task delegated to it by Congress, are entitled to great weight as the determinations of the expert administrative body long charged with the protection of the public interest in the railroad field. Only thus can the intent of Congress be made effective, and Section 77 rendered a workable statute for the consummation of railroad reorganizations.

Since the District Court had expressed independent approval of the plan, the statement of the Circuit Court of Appeals as to the functions of the District Court and the Commission was in any event uncalled for; but

in the interest of indicating proper and workable principles and procedure and of dispelling confusion, correction by this Court is important.

4. In view of the length of time for which these proceedings have been pending, and of the thoroughness with which all of the problems involved have been explored and determined by the Commission and the District Court, the issues here in controversy should be definitively disposed of by affirming the decree of the District Court.

ARGUMENT

I

THE FINDINGS OF "NO VALUE" ARE SUFFICIENT TO EXCLUDE THE STOCKHOLDER AND UNSECURED CREDITORS FROM PARTICIPATION, AND ARE ADEQUATELY SUPPORTED BY THE RECORD

The Commission found that the equity of the preferred and common stock had "no value" (R. 269) and likewise found that the claims of the unsecured creditors had "no value" (R. 269-270). The District Court affirmed those findings (R. 1605), and on the basis thereof decreed that "the holders of such unsecured claims and such shareholders are not entitled to participate in the distribution of new capital securities or other assets of the Debtor" (R. 1605). It would seem to be elementary that if a claim or interest in a corporation undergoing reorganization has no value the holder thereof would not be entitled to par-

ticipation. However, the effect of the decision of the court below is that findings of "no value" are insufficient to establish as a fact that the claims or interests with respect to which such findings are made in fact have no value. The Circuit Court of Appeals did not discuss the Commission's "no value" findings nor, as a matter of fact, did it discuss any of the other numerous findings or the voluminous valuation data contained in the Commission's reports. With respect to the participation of the stockholders, that court, in its discussions of the objections of the Western Pacific Railroad Corporation, the owner of all of the stock of the Debtor, said:

> "The objection states that the debtor is not insolvent, but has property of a value greatly in excess of its liabilities. Obviously, if the statement is true, the holding company is entitled to participate in the reorganization, and its exclusion therefrom is unfair and inequitable. Thus, to determine the question raised by the holding company's objection, it was necessary to determine the value of the debtor's property as of the effective date of the plan—January 1, 1939" (124 F.(2d) at 138; R. 2668).

The Court seems to have overlooked the provisions of Section 77(e) for the exclusion of both stockholders and creditors from participation in a plan which are as follows:

> "*Provided,* That submission to any class of stockholders shall not be necessary if the Com-

> mission shall have found, and the judge shall have affirmed the finding, (a) that at the time of the finding the corporation was insolvent, or that at the time of the finding the equity of such class of stockholders has no value, * * * *Provided further*, That submission to any class of creditors shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding, * * * that at the time of the finding the interests of such class of creditors have no value * * *." [10]

The unambiguous language of the above provisions would seem to make it perfectly clear that any class of stockholders may be excluded from participation either by (1) a finding that—"the corporation is insolvent" or (2) a finding that—"the equity of such class of stockholders has no value," and that a class of creditors may likewise be excluded from participation on a finding of "no value." That alternative courses in excluding stockholders from participation were intended by Congress is emphasized by the fact that the second alternative was written into subsection

---

[10] The subsection further provides that: "the judge shall confirm the plan if satisfied that it has been accepted by or on behalf of creditors of each class to which submission is required under this subsection * * *." The following subsection (*f*) provides that upon confirmation:

> "the plan * * * shall, * * * be binding upon the debtor, all stockholders thereof, including those who have not, as well as those who have, accepted it, and all creditors, secured or unsecured, whether or not adversely affected by the plan * * *, including creditors who have not, as well as those who have, accepted it."

(e) of Section 77 by the 1935 amendments [11] to Section 77.

In addition to overlooking the Commission's findings of "no value" regarding the claims and interests of unsecured creditors and stockholders, the court below apparently overlooked a confirmatory finding. With respect to the securities allocable to the secured creditors other than to the First Mortgage bondholders, the Commission found that "they will be inadequate in value to satisfy the claims" of such creditors (R. 269). Furthermore the court seems to have overlooked the decision of this Court in *In re 620 Church Street Building Corp.*, 299 U. S. 24 (1936). In that case the Supreme Court stated:

> "* * * Petitioners insist that their consent to the plan of reorganization was necessary or that their claims should have been accorded 'adequate protection'. But the adequate protection to which the statute refers is 'for the realization of the value of the interests, claims or liens' affected. *Here the controlling finding is not only that there was no equity in the property above the first mortgage but that petitioners' claims were appraised by the court as having 'no value.'* There was no value to be protected." (299 U. S. at 27; italics supplied.)

The court below, in holding that a valuation of all of the Debtor's property was necessary, relied upon the decision of this Court in *Consolidated Rock Products Co.* v. *DuBois*, 312 U.S. 510 (1941). Under

[11] Act of August 27, 1935, c. 774, 49 Stat. 911.

the plan in that case, stockholders were participating although it appeared probable from the record that claims of creditors were not being satisfied. Obviously, as between stockholders and creditors, if stockholders are to participate in a reorganization, it would have to appear affirmatively that there was value in the properties in reorganization over and above that necessary to satisfy creditors. On the other hand if creditors cannot be satisfied in full, the making of a finding of the value of all of the Debtor's properties could serve no useful purpose other than to determine how far the stock was under water. In terms of mathematical accuracy, such a finding would only prove by how much the claims of creditors could not be satisfied, and would add no information of legal significance.

Since the decision of the court below was announced, the Circuit Court of Appeals for the Seventh Circuit has passed upon plans of reorganization for the Chicago, Milwaukee, St. Paul and Pacific Railroad Company [12] and for the Chicago and North Western Railway Company [13] and the Circuit Court of Appeals for the Sixth Circuit has affirmed a decree confirming a plan of reorganization for the Akron Canton and Youngstown Railway Company.[14] In all three cases the plans excluded stockholders from

---

[12] 124 F. (2d) 754 (C.C.A. 7th, 1941), and unreported supplemental opinion (C.C.A. 7th, January 12, 1942).

[13] 126 F. (2d) 351 (C.C.A. 7th, 1942).

[14] *Akron Canton & Youngstown Railway Co.* v. *Hagenbuch*, 128 F. (2d) 932 (C. C. A. 6th, 1942).

participation on findings of "no value," except that in the Akron case the stockholders were given warrants entitling them to purchase new securities. In the North Western case the Circuit Court of Appeals sustained the District Court which had confirmed the plan certified by the Commission. In the Milwaukee case the Circuit Court of Appeals reversed the District Court which had approved the Commission's plan. However, both these cases, the findings by the Commission that the equity of the stockholders had no value were sustained as sufficient to exclude stockholders from participation. In the Milwaukee case, the court said in part:

> "We are well satisfied that the evidence supports the finding of the Commission approved by the District Court 'that the equity of the holders of the debtor's preferred stock and its common stock has no value'." (124 F. (2d) at 764.)

On a motion to modify the opinion, insofar as it approved the Commission's finding of "no value" in the stock, the court reaffirmed its previous position:

> "Now, to make our position entirely clear, we add this memorandum and hold that the finding of the I.C.C. as to absence of value of old common and preferred stock is specific, definite and certain, and fully meets the rule which requires finding on values of assets." [15]

---

[15] *In re Chicago, Milwaukee, St. Paul & Pacific Railway Company*, unreported supplemental opinion (C.C.A. 7th, January 12, 1942).

In the North Western case the Commission's finding of "no value" of the preferred and common stock was likewise approved:

> "There are three vital, determinative questions, (and numerous less important questions) presented by this appeal.
>
> "(a) The finding, and the sufficiency of the evidence to support it, that the common and preferred stock of the old company are without value."
>
> * * * *
>
> "The finding which determined the absence of value in the common and preferred stock must be, and is, approved as fair to the creditors, to the stockholders, and to the public." (126 F. (2d) at 360, 364.)

In re Yosemite Valley Ry. Co., unreported opinion (D.C.S.D. Cal. N.D., Oct. 28, 1941).

THE RECORD SUPPORTS THE FINDINGS OF "NO VALUE"

In the court below and in the District Court, the stock interests [18] took the position that there was in fact value for the stock of the debtor and that the stock was entitled to participation. That position was taken despite the fact that the plan submitted to the Commission by the A. C. James Company provided (R. 101, 106-108) for the surrender by Western Pacific Railroad Corporation of all of the stock of the Debtor for distribution to creditors, the Reorganization Committee, and for retention in the treasury of the Company, and despite the fact that the plan submitted by the Debtor provided for the cancellation of an unsecured claim of over $5,000,000 held by Western Pacific Railroad Corporation (R. 19, 22).

The Commission's initial report (R. 194) and its report on further consideration (R. 300) are replete with factual data regarding the Debtor's property and its earnings. It appears that for the years 1926 to 1935, inclusive, the operating ratio of the Debtor—that is, the percentage of gross revenues consumed in operations—increased from 70.3% in 1926 to 83.7% in 1935 (R. 139-140). As a result the Debtor's earn-

[18] The Debtor, the Western Pacific Railroad Corporation, the owner of all stock of the Debtor, and the A. C. James Company. See *supra*, p. 23, footnote 9.

ings available for charges were decreasing and as previously pointed out (page 8) the Debtor began borrowing money to pay interest approximately two years before the filing of its petition. In no year between 1930 and 1938 were the earnings of the Debtor equal to the amount of its fixed charges at the time of the filing of its petition (R. 1064-1066). The average for those years is $1,265,539 or somewhat less than one-half the fixed charges under the present capital structure. Furthermore even the Debtor's estimates before the Commission of income available for interest for the years 1936-1940, inclusive, averaged $2,715,306 (R. 221).[19] The Commission also had before it the financial history of the Debtor (pp. 6-8 *supra*). In addition to failing to earn its interest charges, the Debtor had not been meeting its obligation to the public of maintaining its properties (R. 202-203). The financial history of the Debtor was one of debt, dividends and deferred maintenance. In addition to earnings and financial history the Commission had before it and gave consideration to the value of the Debtor's prop-

[19] The amounts forecast by witnesses for the Debtor as being available for fixed charges in the years 1936 to 1940, inclusive (I.C.C. Ex. 29; R. 221-222, 2027), together with the actual amounts so available (R. 1065-1066, 2629, 2635), were as follows:

	Estimated by Debtor	*Actual (as adjusted)*
1936	$1,524,086	$1,901,423
1937	2,342,586	1 077,407
1938	2,929,586	225,431
1939	3,652,486	1,519,916
1940	4,056,486	2,648,492

erties for rate making purposes (R. 224), book values and liabilities (R. 203-207), the Debtor's traffic (R. 207-215), traffic and revenues of subsidiaries (R. 215-218) and other factors too numerous to mention without quoting pages of the Commission's reports, particularly pages 195-224 of the record.

Throughout the proceedings the stock interests have contended that either the capitalization of the reorganized company should be larger so that there will be more securities to distribute, or the claims of the various classes of creditors, except the unsecured creditors (who received nothing under the plan), should be cut down so as to leave something over for distribution to stockholders. The increase would be brought about by disregarding earnings, or, if earnings were to be considered at all, the argument appears to be that earnings in these abnormal war years, after the close of the Commission's hearings, should be the basis rather than earnings in normal years. As for a decrease in the creditors' claims, the Debtor argued in its brief in the court below with respect to interest after the filing of the petition:

> "there are no interest *accruals* after that date. Interest actually earned, however, belongs to the lien upon which it was earned."

That argument of the Debtor apparently was not taken seriously by the Circuit Court of Appeals since in referring to claims throughout its opinion accrued and unpaid interest to the effective date of the plan was

included. In the light of this Court's decision that "interest is entitled to the same priority as principal" (*Consolidated Rock Products Co.* v. *DuBois*, 312 U.S. 510, 527 (1941)) the question of the accrual of interest is not now open to dispute.

The Debtor's contention that there is value in the property for the stockholders has been based on the assertion that the Commission considered only depression earnings and that the present earnings, the facts with respect to which were not before the Commission, should be given such weight as to justify a scrapping of the Commission's plan and making provision for participation by the stockholders. That the Commission did not consider only depression earnings is evidenced by the Commission's reports themselves in which every relevant fact regarding the Debtor and its properties was weighed. These facts included the Debtor's own estimates of future earnings (R. 221). The Commission also had before it plans suggested by the Debtor (R. 19), by the First Mortgage Bondholders (R. 48) and by the A. C. James Co. (R. 101). Each of those plans substantially reduced fixed charges. Under the Debtor's plan, fixed interest would be $905,321 (R. 245). Under the Bondholders' plan, fixed interest would be $905,322 (R. 245). Under the James' plan, fixed interest would be $511,001 (R. 245). It will be recalled that the fixed charges on the Debtor's existing capitalization are over $3,000,000 (R. 9). In other words, not one of the interested parties even suggested that a reorganized Western Pacific could meet

the fixed charges under the present capitalization. Thus, even the opponents of the Commission's plan have agreed that creditors must make sacrifices, for they cannot be fully satisfied. In that situation the participation of stockholders is an impossibility. *Case* v. *Los Angeles Lumber Products Co.*, 308 U.S. 106 (1939); *Consolidated Rock Products Co.* v. *DuBois*, 312 U.S. 510 (1941).

Furthermore, the contention that the plan is based on depression earnings is answered by the fact that $1;181,528, the average system earnings available for interest for the five years ending December 31, 1938 (R. 1548), would not be sufficient to meet full interest on the new income mortgage bonds ($1,949,060 required) and there would be nothing for that part of the creditors' claims to be exchanged for preferred and common stock. In order to meet the fixed and contingent charges under the new capitalization, pay a 5% dividend on the preferred stock and a $3.00 dividend on the common stock, the reorganized company would have to show earnings after taxes of $4,499,898. That amount is in excess of the Debtor's earnings for any year since 1926 for which the figures were before the Commission. In other words, the Commission, in providing a capitalization of the new company, took an optimistic view of the future and provided for the issuance of securities beyond anything that could have been thought of if depression earnings had been the prime consideration. The Debtor's average earnings, as adjusted, for the ten years 1929-

1938, inclusive, were $1,265,539. If that figure were capitalized on a 5% [20] basis, the amount would be $25,230,780. In fact, the Commission's total capitalization is $65,829,422, plus 319,441 shares of no par common stock. The contention that depression earnings were the basis of the plan will not hold water.

The present high earnings, resulting from wartime traffic, were carefully considered by the District Court in these proceedings on a motion to use $3,000,000 of the Trustees' cash to retire an equal amount of Trustees' certificates. In denying the motion, the court said:—

> "The increased earnings lately reported may disappear as rapidly as they have accumulated. In these grave and uncertain times, there is no knowing what may happen in the matter of increased cost of maintenance and operation. Recently the President of the railroad has called the attention of the Trustees to the necessity for the expenditure of about $4,000,000 for necessary new equipment, and the Court will soon be asked to approve the program." [21]

Early this year the Circuit Court of Appeals for the Seventh Circuit in considering the decree of the District Court, which had confirmed the plan of reorgan-

[21] *In re Western Pacific Railroad Company*, 38 F. Supp. 877 (D.C.N.D. Calif., 1941), appeal dismissed 122 F. (2d) 807 (C.C.A. 9th, 1941).

ization for the Chicago and North Western Railway Company, was confronted with the same argument by the stockholders there as was made below in this case. In dealing with the question, that court said:—

> "The unusual and extraordinary increases in revenue of carriers during the last year have made the Commission's estimate the subject of determined and vigorous attack by the stockholders. This has caused us no end of anxiety and concern. This radical change (for the better) in the past year can not and should not be ignored. Nor can we dismiss it as undisclosed by the record which deals with a more distant past. It is something we can, and should, and do, take judicial notice of. It is, we believe, temporary, and like a crop failure year, in the Northwest—which this Debtor serves—not to be taken too seriously when viewing the long future of this railroad. In making this statement we are aided by the experiences of railroads during and after the last war." *In re Chicago and North Western Railway Co.*, 126 F. (2d) 351, 364 (C.C.A. 7th, 1942).

The question of the effect to be given to the abnormal earnings of railroads in these war years was also considered by the Circuit Court of Appeals for the Sixth Circuit in an appeal from the order of confirmation of the Commission's plan for the reorganization of the Akron, Canton & Youngstown Railway Company. The Circuit Court of Appeals in that case

took the long term view as was done by the Circuit Court of Appeals for the Seventh Circuit and in disposing of the question said:

> "Appellants lay great stress on the fact that for 1940 the debtors earned $498,029.00 and that for twelve months ending October 31, 1941, the earnings available for interest and dividends were $732,190. It is conceded that these abnormal increases are solely attributable to the prosecution of the war effort of the Government. These abnormalities are not proper tests by which to measure the Commission's determination of the somewhat imponderable prospective earnings in 1937. Subsequent earnings due to unforeseeable circumstances may not be used to check the correctness of prospective earnings as determined by the Commission under the Act." [22]

The Commission in approving two recent plans of reorganization has specifically rejected the war earnings as a basis for a permanent capitalization of the reorganized company. *St. Louis Southwestern Railway Company Reorganization*, 249 I.C.C. 5 (1941), 252 I.C.C. 325 (1942); *Florida East Coast Railway Company Reorganization*, not yet reported (Finance Docket No. 13170, April 6, 1942 and August 10, 1942). In the latter decision the Commission stated:

> "In the report of April 6, 1942, Division 4 recognized the fact that 1941 earnings were influenced by the extraordinary conditions exist-

[22] *Akron, Canton & Youngstown Railway Co.* v. *Hagenbuch*, 128 F. (2d) 932 (C.C.A. 6th, 1942).

> ing as the result of the war and in the report stated fully all considerations leading to its conclusions as to justifiable amounts of capitalization and of new general mortgage bonds. Under present conditions, the fact that the year 1942 gives promise of producing even larger earnings than 1941 affords too uncertain and precarious a basis to justify the increases sought."

The present Director of the Office of Defense Transportation, when he was still Chairman of the Interstate Commerce Commission, issued a timely warning:

> "Let me suggest, however, that those who regard these present earnings as evidence of the unsoundness of our reorganization plans may well give heed to the source from which these earnings spring and to the future conditions which are likely to flow from the same source. * * * All this in the end means burden and sacrifice for all concerned." [23]

To base a capitalization on the inflated earnings of a war economy would not only be to invite but also to guarantee future financial disaster for the reorganized company. There is an important public interest in sound capitalizations for railroad companies. If railroads are to perform the function to which their properties are primarily dedicated,[24] namely, providing safe

---

[23] Hon. Joseph B. Eastman, Address before National Association of Mutual Savings Banks, Philadelphia, May 7, 1941.

[24] *Union Trust Company* v. *Illinois Midland Railway Company*, 117 U.S. 434, 455-456 (1886); *Pennsylvania Steel Co.* v. *New York City Ry. Co.*, 190 Fed. 609, 618 (C.C.S.D. New York, 1911).

and efficient transportation for the public, they must be so capitalized when created as to avoid, as far as possible, being involved in financial difficulties within the foreseeable future. Their capital structures should be such that new money for necessary improvements would be readily available. Otherwise, they will fail in the performance of their duty to the public. Aside, however, from the public interest in sound capitalizations the fact is that the Debtor has an unsupportable debt structure and there is no alchemy for changing a debt-ridden property into a solvent going concern which does not at the same time change its ownership unless the stockholders supply the catalytic agent—a substantial number of dollars. The dollars that might have left the Debtor a going concern went as dividends in 1921 to 1926. The stockholders took their "value" out of the properties then—if not also some properly belonging to creditors. The debt, dividends and deferred maintenance of the 1921-1926 period sapped the Debtor's vitality and spelled its eventual financial disaster. True, upon the acquisition of the stock of the Debtor by Western Pacific Railroad Corporation in 1927 the policy of paying dividends while maintenance was being deferred was changed (R. 1052). However, the damage had been done and the company was not able to make up the deferred maintenance in its properties.

The Commission was therefore unquestionably correct in finding, and the District Court in approving the findings, that the equity of the stockholders and the

claims of the unsecured creditors of the Debtor were without value; and such determination required the exclusion of these interests from participation in the reorganized company. As the Circuit Court of Appeals for the Seventh Circuit pointed out in *In re Chicago, Milwaukee, St. Paul and Pacific Railroad Company*, 124 F. (2d) 754, 763 (1941):

> "* * * Neither the Commission nor the court is authorized or permitted to give these stockholders anything, if the Debtor's assets are of a value less than the aggregate of its debts. Consolidated Rock Products Co. v. DuBois, 312 U. S. 510, 61 S. Ct. 675, 685, 85 L. Ed. 982; Case v. Los Angeles Lumber Products Co., 308 U. S. 106, 60 S. Ct. 1, 84 L. Ed. 110; Northern Pacific Railway Co. v. Boyd, 228 U. S. 482, 23 S. Ct. 554, 57 L. Ed. 931. It is not a matter of discretion. The absolute priority principle forbids it."

II

THE FINDINGS AND CONCLUSIONS OF THE COMMISSION ARE SUFFICIENT TO SUPPORT ITS ALLOCATION OF THE SECURITIES OF THE REORGANIZED COMPANY AMONG THOSE FOUND TO BE ENTITLED TO SHARE THEREIN.

THE SECURITIES AVAILABLE FOR ALLOCATION

The Commission found that the securities provided for in the plan for distribution to creditors of the Debtor "represent the equitable equivalent of the debtor's assets available for the satisfaction of claims"

(R. 316). Those securities consist of $21,219,075 of income mortgage bonds, $31,850,297 of preferred stock and 319,441 shares of no-par-value common stock (R. 316). In addition, the plan provides for the issuance of $10,000,000 principal amount of first mortgage bonds, exchangeable in part consideration for a like principal amount of Trustees' certificates, and the assumption of existing equipment obligations.

As previously pointed out, pp. 14-15, *supra*, the Commission's reports show an exhaustive study of the Debtor and its properties from every angle. Based on those studies, the Commission arrived at a number of subsidiary conclusions, which in turn form the basis for the above finding. The principal of those subsidiary conclusions, in its initial report, are:

1.

"the fixed charges of the reorganized company should not initially and substantially exceed $500,000, if the reorganized company is to maintain its property properly and to secure 'necessary new capital in the future' " (R. 246).

2.

"We conclude, therefore, after a consideration of the debtor's past, present, and probable future earnings, that the plan of reorganization should provide for the immediate issue and sale of not to exceed $10,000,000 of new first mortgage bonds, the proceeds of which should be used to retire outstanding trustees' certificates." (R. 246-247.)

3.

"To avoid embarrassment in the securing of funds, especially for future routine additions and betterments, which are estimated by the debtor $500,000 annually, we find that the plan should provide for the creation of a capital fund out of the available net income remaining after the payment of fixed charges." (R. 250.)

4.

"On the basis of the facts heretofore recited with respect to traffic and earnings, we find that the total annual fixed and contingent interest charges of the reorganized company, plus requirements for the capital fund and sinking funds should not exceed $2,000,000 per annum." (R. 253.)

5.

"In order to allot as large an amount of new bonds as possible to present creditors, we find that the new income bonds should bear interest at the rate of 4% per annum. We further find that the principal amount of such bonds should not exceed $19,716,040." (R. 254.)

6.

"As hereinbefore stated, the debtor's estimate of income available for interest averaged $2,715,306 per year for the period 1936-40, inclusive, the maximum amount for any one year in the period (1940) being $3,769,836. That amount, with prior charges of $1,898,-

223, would permit the payment of dividends at the rate of 5% on only $37,432,000 of stock. It is obvious, therefore, that based on the most optimistic estimate of earnings of record, the capitalization of the reorganized company must be maintained within strict limits if any material return on its capital stock is to be expected and the shares of its stock are not to become mere tokens for stock market speculation. It is true that considered alone, the data pertaining to the rate-making value of the debtor's property, and its investment, would support capitalizations approximating those proposed in the three plans. We have hereinbefore stated, however, the reasons why, in our opinion, those factors can not be of controlling importance in a determination of the capital structure for the reorganized company. Considering all relevant data of record, we find that the approved plan should provide for the immediate issue by the reorganized company of not to exceed 295,740-3/10 shares of preferred stock of the par value of $100 per share, and not more than 313,703 shares of no-par-value common stock." (R. 257.)

Following a rehearing, the Commission approved an increase in the amount of income bonds from $19,716,040 to $21,219,075 and provided that the interest rate thereon should be 4½% instead of 4% as specified in its initial report. The amounts of preferred stock and common stock also were increased from 295,740-3/10 to 318,502-97/100 and

313,703 to 319,441 shares, respectively (R. 254, 257, 310).

The court below, in its opinion, does not mention any of the above quoted conclusions and very little of the great mass of factual data contained in the Commission's reports. The Court apparently thought that there was some requirement of formalism with respect to the Commission's reports. That phase of the case is discussed later (pp. 62 to 68, *infra*). True, the Commission's conclusions are not stated as "findings" would be stated in the decree of a court but there is no difficulty either in understanding them or in working from them in the setting up of a capital structure for the reorganized company. And the above quoted parts of the Commission's reports are not merely conclusions; they are, as required by Section 77, "conclusions and reasons therefor." True, those parts do not contain the full statement of the reasons for the conclusions. That would require the quotation of the Commission's reports almost *in toto*.

THE ALLOCATION OF NEW SECURITIES IS FAIR AND EQUITABLE

On the basis of its many other conclusions[25] and its consideration (R. 241-244) of the requirements of Section 77 the Commission in its report on further consideration concluded:—

> "We find that the plan of reorganization approved in our report and order of October 10,

---

[25] See, for example, R. 241-281, 307, 309, 312, 315, 317, 324, 329, 336, 340, 345, 347, 353.

1938, supra, modified as herein indicated, will meet with the requirements of section 77 (b) and (e) of the Bankruptcy Act, as amended, and will be compatible with the public interest" (R. 354).

Under the plan approved by the Commission $2,750,050 principal amount of equipment obligations were to be left undisturbed, and $10,000,000 of new first mortgage bonds issued to fund the $10,000,000 of Trustees' certificates held by Reconstruction Finance Corporation. These two allocations having exhausted the fixed interest securities available under the new capitalization, the Debtor's old First Mortgage Bondholders, in recognition of their first lien upon substantially all of the Debtor's properties, were allocated $19,716,040 principal amount of new income bonds, $29,574,060 par value of new preferred stock and 230,593 shares of new common stock without par value, and Reconstruction Finance Corporation, in consideration of its exchange of the Trustees' certificates held by it for new first mortgage bonds on a par for par basis, was given in respect of its claim on the Debtor's secured notes treatment on the same basis as the old First Mortgage Bondholders.[26] While the Debtor's First Mortagage bondholders were thus required to make substantial sacrifices, compensation thereof was provided in the allocation of the new stock to them at a lower price than that at which it was allocated to junior interests, in the opportunity to share through stock

[26] The practical adjustment involved in this procedure is discussed *infra*, pp. 56-62.

ownership in possible earnings of the reorganized company, and in the control of that company through the ownership of a substantial majority of its preferred and common stock.

In consideration of their first lien upon certain assets of the Debtor, and of their junior claims upon the Debtor's assets as a whole, the Commission under its approved plan determined that there was allocable in respect of the Debtor's General and Refunding Mortgage Bonds $732,010 principal amount of new income bonds, $1,147,955 par value of new preferred stock and all of the new common stock remaining after prior allocations. All of the General and Refunding Mortgage Bonds were pledged with the Debtor's three note creditors. The Commission found that the securities allocable to such Bonds were inadequate in value to satisfy the claims of the note-holders and that the value of each of the claims was accordingly proportionate to the collateral securing it (R. 271). The new securities —except for the separate treatment of the claim of Reconstruction Finance Corporation explained below [26a] —were therefore divided between the Debtor's noteholders in proportion to the amount of General and Refunding Mortgage Bonds held by them as collateral for their respective notes.

[26a] See pp. 56-62, *infra*. The income bonds and preferred stock which Reconstruction Finance Corporation would have received had it been solely a noteholder were included in those allocated to it on the basis described below, and the shares of common stock allocable to it as a noteholder in excess of those in fact allocated to it were in effect reallocated to the other noteholders.

Other than the expedient that was necessarily resorted to from practical considerations to provide for the taking care of the outstanding Trustees' certificates, the allocation of the new securities was comparatively simple because of the fact that the claims (other than those found to have no value, the equipment obligations, which were to be assumed, and the Trustees' certificates) were based on First Mortgage Bonds of the Debtor and on notes of the Debtor, secured by its General and Refunding Mortgage Bonds. The first step, therefore, involved a determination of the properties subject to the liens of the two mortgages.

In its original report the Commission, after considering the granting clauses of the two mortgages, concluded that the Debtor's First Mortgage bondholders "should be considered as having a first lien upon practically all of the assets of the Debtor." (R. 267). Upon rehearing, the question of the liens of the two mortgages was reargued and upon reconsideration the Commission determined that certain assets, subject to the Debtor's General and Refunding Mortgage as a first lien, required "a re-examination of the allocation of new securities to the holders of the debtor's notes secured by the general and refunding bonds." (R. 312-313). In general, the First Mortgage was determined to be a first lien on the Debtor's lines of railroad. The Refunding General and Mortgage was determined to be a first lien on:

1. The funded debt ($508,278) and 97.5% of the capital stock of Tidewater Southern

Railway Company, an operating railway company,

2. $270,000 principal amount of bonds and $360,834 par value of the stock of Central California Traction Company.

3. $465,300 par value of capital stock of Alameda Belt Line, and

4. Cash in the amount of $223,732 (R. 313).

The Debtor's holdings in the Central California Traction Company represent a one-third ownership along with the Atchison, Topeka & Santa Fe Railway Company and the Southern Pacific Company (R. 314). The Debtor's holding in the Alameda Belt Line is a one-half interest, the other half being owned by the Atchison, Topeka & Santa Fe Railway Company (R. 315).

Much was made in the court below of the contention that the earnings of the Tidewater Southern Railway Company, in effect wholly owned by the Debtor, justified a larger participation by the General and Refunding Mortgage bondholders in the income bonds of the reorganized company. This subsidiary and the character of its earnings and properties, the nature of its traffic and its dependence upon the Debtor, were carefully considered by the Commission, which concluded that the allocation of additional securities to those provided in its report on further consideration would not be justified. Such a contention also overlooks the fact that Central California Traction Company and Alameda Belt Line, whose securities are likewise subject to the first lien of the General and Refunding Mort-

gage, are poor relations and that it is necessary for them to be supported. For example, in 1934 and 1935, although the Central California Traction Company reported net income of $48,690 and $6,314 respectively, the parent companies at the same time were called upon to contribute to its support $91,638 in 1934 and $61,373 in 1935 (R. 315). During the same years the contributions of the two parent companies of the Alameda Belt Line were $18,305 and $27,727 while the Company was reporting no net earnings in 1934 and $480.00 in 1935. For the ten year period 1929-1938, inclusive, the portions of the income and profit and loss deficits of the Central California Traction Company absorbed by the Debtor, amounted to $319,194, an average of $31,919 per year (R. 1101). For the eleven year period 1928-1938, inclusive, the portions of the deficits of the Alameda Belt Line, absorbed by the Debtor, aggregate $243,035, an average of $22,095 per year (R. 1105). If the allocation of the income bonds had been made on the basis of the average earnings applicable to the properties determined to be subject to the two mortgages as first liens, reducing the earnings of the Tidewater by the average contributions of the Debtor to the support of the other two companies and allowing 4% interest on the cash in the hands of the mortgage trustee, the allocation would be within a hair's breadth of that made by the Commission.

On the basis of a complete statement of the elements of value, other factual data and earnings of the assets securing the General and Refunding Bonds (R. 313-

315), the Commission concluded in its report on further consideration that "the creditors secured by the general and refunding mortgage bonds should be awarded new income mortgage bonds in the amount of $732,010, and new participating preferred stock of a par value of $1,147,955" (R. 315), as well as the shares of new common stock available after satisfying prior claims. In view of the inadequacy of their security, and subject to the practical provision with respect to RFC's claim, these securities, as pointed out above, were then allocated to the secured noteholders in proportion to their collateral.

THE ALLOCATION OF NEW SECURITIES TO RECONSTRUCTION FINANCE CORPORATION IS FAIR AND EQUITABLE

The allocation of new securities to Reconstruction Finance Corporation is one of the subjects of attack on the Commission's plan.

At the time the plan was approved, Reconstruction Finance Corporation (hereinafter sometimes called RFC) held and now holds certificates of indebtedness issued by the Trustees, in the then principal amount of $10,000,000 (reduced to $9,625,000 as of August 15, 1942). These certificates are secured by a first lien on all the property of the Debtor, rank as expenses of administration and are entitled to payment in cash. That is not in dispute. RFC also holds notes of the Debtor which, with accrued interest to the effective date of the plan, January 1, 1939, amounted to $3,862,869 (R. 391). Those notes are secured by $10,-

750,000 principal amount of the Debtor's Refunding and General Mortgage Bonds (R. 225)."[27]

The plan treats the RFC position (Trustees' certificates and secured notes) as a whole by providing:

> "3. The Reconstruction Finance Corporation shall receive in respect of the $10,000,000 of new money provided for in subdivision O (or the surrender of trustees'-certificates at their principal amount and accrued interest, to a like amount) and its existing claim in the principal amount of $2,963,000, together with $899,870 of interest accrued and unpaid thereon to Janu-

[27] The notes are also secured by all right, title and interest of the Western Pacific Railroad Corporation in 150,000 shares of the common capital stock of The Denver & Rio Grande Western Railroad Company (R. 226). The stock of The Denver & Rio Grande Western Railroad Company has been found to have no value in the reorganization proceedings of that Company (*Denver & Rio Grande R. R. Reorganization*, 233 I.C.C. 515, 580 (1939), 239 I.C.C. 583 (1940), (Finance Docket No. 11002, July 13, 1942, not yet reported). The Railroad Credit Corporation also holds some collateral put up by Western Pacific Railroad Corporation (the Debtor's parent company) and it was argued below that the plan was defective in not making provision for the disposition of the so-called "third party" collateral. The answer is so obvious that we merely mention it and point out that the confirmation of a plan is court action with respect to property and under Section 77 the jurisdiction of the court extends only to "the debtor and its property" (Section 77(a)). If the plan had attempted to deal with the "third party" collateral, the confirmation of the plan would have been beyond the jurisdiction of the court. *Cf. In re Diversey Building Corp.*, 86 F. (2d) 456 (C.C.A. 7th, 1936), *certiorari* denied 300 U. S. 662 (1937); *In re Nine North Church Street, Inc.*, 82 F. (2d) 186 (C.C.A. 2d, 1936). Accordingly, the plan provides for the surrender only of collateral "pledged by the Debtor." (R. 345, 394.)

ary 1, 1939, approximately $10,000,000 of new first-mortgage 4 percent bonds, series A (being 100 percent of said new money); $1,185,200 of income-mortgage 4½-percent bonds, series A (being 40 percent of the principal of said claim); $1,777,800 of 5-percent preferred stock, series A (being 60 percent of the principal of said claim); and 15,788 shares of common stock (being common stock taken at the price of $57 a share for 100 percent of said accrued and unpaid interest)" (R. 391).

If the treatment of the Trustees' certificates and the Debtor's secured notes held by RFC could be separated, as the respondents have contended they should be, and the new first mortgage bonds considered as allocated alone to the Trustees' certificates and the income bonds, preferred and common stock which RFC receives under the plan, allocated to the secured claim alone, three things would be clear:

1. That the RFC as the holder of the Trustees' certificates, with their inherent right of payment in cash, was not being fully compensated,

2. That the allocation of income bonds and preferred stock in respect of the General and Refunding Mortgage Bonds held by RFC as collateral to the Debtor's notes is on a more favorable basis than the allocation of those securities to The Railroad Credit Corporation and A. C. James Co., likewise holders of the General and Refunding Mortgage Bonds as collateral for the Debtors' notes held by them, and

3. That the allocation of common stock to

RFC is not on as favorable a basis as the allocation to The Railroad Credit Corporation and A. C. James Co.

The reason for the treatment of the RFC position as a whole was the necessity of either providing for $10,000,000 of new money to retire the Trustees' certificates or providing in some way adequate compensation for the surrender of the senior rights inhering in the Trustees' certificates. The payment in cash was not possible other than through the sale of new first mortgage bonds, and obviously, first mortgage bonds of a comparatively small railroad such as the Debtor, with a rather unfavorable financial history, would not sell at par. Also there were only $10,000,000 of such bonds available. That the new bonds would not sell at par was recognized by all parties. The Debtor's original plan provided that $10,000,000 of new money should be furnished by RFC and in consideration thereof RFC would receive for its claim on the secured notes of the Debtor held by it, the same treatment as that accorded to the holders of the Debtor's First Mortgage Bonds (R. 22, 28-29). The first plan (R. 85) filed by the Institutional Bondholders Committee provided for a stock bonus of 150,000 shares of new common stock to the purchaser of $10,000,000 principal amount new first mortgage bonds. The A. C. James Co. plan (R. 104) contemplated a similar bonus and a second plan filed by the Institutional Bondholders Committee suggested the very treatment of the RFC position provided for in the Commission's plan. The suggestion of the Bondholders Committee was:—

"In consideration of R.F.C.'s providing said new money by so purchasing said First Mortgage Bonds, Series A, R.F.C.'s existing claim against the Company, amounting as of January 1, 1939, to $3,862,870 ($2,963,000 principal and $899,870 interest) and represented by notes secured by General and Refunding Mortgage Bonds of the Company and other collateral, shall be provided for under the Plan in like securities and in like proportions as those given holders of the Company's existing First Mortgage Bonds;" (R. 806-807).

If no other consideration were involved, RFC, The Railroad Credit Corporation and A. C. James Co. would be entitled to treatment in proportion to the General and Refunding Bonds held by each as collateral. On that basis, RFC would receive, for its secured notes:—

$414,175 new income mortgage bonds
$649,518 new preferred stock
45,148 shares, new common stock

The Commission's plan, as has been noted, treats as a whole the claims of RFC on the secured notes and on the Trustees' certificates. If the allotment of new income bonds and stock to RFC under the plan were considered as being in exchange *only* for the Debtor's notes and the General and Refunding Bonds securing them, the effect of the Commission's plan would be to allot therefor:—

$1,185,200 new income mortgage bonds
$1,777,800 new preferred stock
15,788 shares, new common stock

The difference is $771,025 *more* income bonds, 11,282.82 *more* shares of preferred stock and 29,360 shares *less* of common stock. That difference has been referred to as the "RFC preference."

The record before the Commission was full and complete and it is submitted that on the basis of the facts with regard to the Debtor, its earnings, properties, and future prospects hereinbefore described, and of the proposals of various of the parties themselves, the Commission was well justified in concluding that the new first mortgage bonds were not on a parity with the Trustees' certificates now held by RFC and that the provision contained in the approved plan represented a reasonable adjustment of RFC's total rights. In addition to the detailed record before the Commission, testimony was introduced through two expert witnesses at the hearing in the District Court as to the factors to be taken into consideration in determining the market value of the proposed new securities. The testimony conclusively established that the new first mortgage bonds would have a market value substantially less than par and would probably sell for approximately 85 or 90 (R. 1530-1536). Assuming that the new first mortgage bonds would sell at 90, RFC would receive $1,000,000 less than that to which it is entitled for the Trustees' certificates, if the certificates were to be surrendered in consideration of the same principal amount of new first mortgage bonds alone. The value of $771,025 principal amount of new income bonds and of 11,282.82 shares of new preferred stock less the value of 29,360 shares of new common stock

would have to be $1,000,000 in order that RFC be fully compensated for the surrender of its rights as holder of the Trustees' certificates. The value may well be less and upon the argument we will ask the Court to take judicial notice of the prices at which similar securities of comparable railroad companies are actually selling on the market.

The treatment of the position of RFC is one of those "practical adjustments" which are part and parcel of the reorganization process. As this Court said in *Consolidated Rock Products Co.* v. *Du Bois*, 312 U.S. 510, 529 (1941):

> "Practical adjustments, rather than a rigid formula, are necessary. The method of effecting full compensation for senior claimants will vary from case to case."

The practical nature of the adjustment is rather conclusively established by the fact that, as above pointed out, it is in accordance with the suggestion of the Debtor and the Institutional Bondholders Committee, consisting of owners of the Debtor's First Mortgage Bonds. The adjustment is still supported by the Institutional Bondholders Committee.

THE COMMISSION'S REPORTS MET ALL FORMAL REQUIREMENTS

The court below, in requiring some sixteen separate findings of dollars and cents values, sets up requirements of formalism with respect to the Commission's reports which are not warranted, we submit, by the statute or applicable decisions of this Court. On the

contrary, the statutory provisions and the applicable principles of law as determined by this Court require simply that valuations should be made in such instances and to such extent as the practical necessities of the particular case may require. Impracticable formality in the statement of the Commission's conclusions in this connection is not required.

Section 77 contains no requirement that findings shall be made by the Commission on all matters, but on the contrary provides broadly that in its report "the Commission shall state fully the reasons for its conclusions." This is in accordance with the general requirements for action by the Commission in other matters subject to its jurisdiction, as to which Section 14 of the Interstate Commerce Act now requires only, except in cases where damages are awarded, that the Commission shall file a written report stating "the conclusions of the Commission together with its decision." [28]

---

[28] Prior to 1906 Section 14 required that the Commisison's report "shall include the findings of fact upon which the conclusions of the Commission are based," and was amended in that year to eliminate this requirement.

Even in damage cases impractical formality in the Commission's findings is not now required. *Meeker & Co.* v. *Lehigh Valley R. R.*, 236 U. S. 412 (1915); *Mills* v. *Lehigh Valley* R. R., 238 U. S. 473, 481 (1915). In the former case this Court stated "True, the findings in the original report are interwoven with other matters and are not expressed in terms which courts generally employ in special findings of fact, but there is no difficulty in separating the findings of fact from the other matter or in fully understanding them." (236 U. S. 428.)

Thus in *United States* v. *Louisiana*, 290 U. S. 70 (1933), a rate case, this Court stated that "there are no formal requirements for the findings to be made by the Commission in this type of case"; and while not commending the form of the particular report, the Court further held:

> "the report, read as a whole, sufficiently expresses the conclusion of the Commission, based upon supporting data including estimates of experienced railroad traffic men, to which the report refers, that the probability of increased revenue was sufficiently great to make the increase of rates a reasonable exercise of sound managerial judgment. This, we think, meets the requirements of the statute." (290 U. S. at 80)

This decision, and the long line of cases in accord [29] have been specifically followed in Section 77 reorganizations by the Circuit Court of Appeals for the Sixth Circuit in *Akron, Canton & Youngstown Ry. Co.* v. *Hagenbuch*, 128 F. (2d) 932 (C.C.A. 6th, 1942), and in numerous District Court cases in which plans of reorganization based upon essentially the same character of report as that in the present case have been approved.[30]

S. 454 (1935); *Pisceglia* v. *United States*, 24 F. Supp. 355 (D. C. S. D. N. Y., 1938); *Quanah, A. & P. Ry. Co.* v. *United States*, 28 F. Supp. 916 (D. C. Texas, 1939).

[30] See cases cited *supra*, pp. 34-36.

Although in *In re Chicago, Milwaukee, St. Paul and Pacific*

The contention of the Circuit Court of Appeals that findings of dollar valuation on all questions of allocations are for some reason necessary is clearly untenable. It is understood, of course, that the findings and conclusions of the Commission with respect to the interests and claims among which allocation of new securities is to be made, and with respect to the allocation itself, must be adequate for a fair and equitable allocation, and to enable the District Court, when the plan is certified to it to determine whether the statutory standard has been applied. It is submitted, however, that insistence upon universal dollar valuations in this connection is not only unnecessary but impracticable, and indeed that such valuation would in many circumstances tend to complicate rather than simplify the problems involved.[31]

We have demonstrated elsewhere in this brief that the finding of the Commission, approved by the District Court, that the equity and interests of the unsecured creditors and stockholders of the Debtor had

---

Railroad Company, 124 F.(2d) 754 (C.C.A. 7th, 1941), the Circuit Court of Appeals for the Seventh Circuit appeared to agree with the Court below as to the necessity of further findings of value for the allocation of the new securities among the creditors (but not with respect to the exclusion of stockholders upon the basis of the finding that their interests were without value), the same Court in *In the Matter of Chicago and North Western Railway Company*, 126 F.(2d) 351, (C.C.A. 7th, 1942), recognized that its objection presented only "a procedural question," which it is submitted cannot stand in the light of the statutory provisions and decisions above referred to.

[31] See Bourne, *Findings of "Value" in Railroad Reorganizations*, 51 Yale L. J. 1057 (1942).

no value was unquestionably adequate to support their exclusion from participation in the reorganized company, and that an additional attempted finding of the exact dollar value of the Debtor's assets would have served no useful purpose. Similar situations may well exist as between senior and junior creditors. Conversely, where it is not controverted that a senior issue is fully satisfied, or that a junior issue has received all that remains after such satisfaction, is it not unnecessary to place a dollar valuation upon the property or securities received by the junior issue? And where the contributions of different mortgage divisions to the earning power of the total enterprise are clearly shown, may not the new securities, in the application of the determination of this Court in *Consolidated Rock Products Co. v. DuBois*, 312 U. S. 510 (1941), that "the criterion of earning capacity . . . is the essential one," be distributed essentially on the basis of such contributions without attempting the intermediate formality of a dollar valuation?

This is not to say that dollar valuations, where it is practicable to make them, may not be desirable or helpful under some circumstances. On the other hand, differences in the source and stability of the earnings capitalized, differences in the relative contribution of particular mortgage divisions to the total income of the enterprise at various earnings levels, controversies over the rate of capitalization to be applied and other circumstances may result in attempted dollar valuations, particularly of parts of a railroad system, in effect adding additional complications rather than constituting a help

toward the solution of the problem of allocating the securities of the reorganized company. The desirability and usefulness of an attempted dollar valuation is also affected by the type of the enterprise involved and the practicability of making such a valuation. This is particularly applicable to railroads, as to which this Court has expressly recognized that "* * * railroads, unlike farms and city lots and stocks and bonds, are not objects of exchange. The very notion of a 'full cash value' for a railroad is in many respects artificial. See 1 Bonbright, *The Valuation of Property*, pp. 511-632. Whatever may be the pretenses of exactitude in determining such a 'value', to claim for it 'scientific' validity, is to employ the term in its loosest sense." *Nashville, Chattanooga & St. Louis Ry.* v. *Browning*, 310 U. S. 362, 370 (1940).[32]

The decision of this Court in *Consolidated Rock Products Co.* v. *DuBois*, 312 U. S. 510 (1941), contains nothing to the contrary and indeed supports the conclusions just stated. The essential difficulty in the *Consolidated Rock Products* case was not the form of the opinion of the District Court approving the plan, but the absence of the essential evidence required to

---

[32] "The ascertainment of the value of a railway system is not a matter of arithmetical calculations and is not governed by any fixed and definite rule. Facts of great variety and number, estimates that are exact and those that are approximations, forecasts based on probabilities and contingencies have bearing and properly may be taken into account to guide judgment in determining what is the money equivalent—the actual value—of the property." *Rowley* v. *Chicago & N. W. Ry. Co.*, 293 U. S. 102, 109 (1934).

sustain it. In the present case the Commission has rendered a detailed report and a supplemental report on further consideration in which, on the basis of the full and complete record made before it, it has "stated fully the reasons for its conclusions" on all matters here in question. Both in determining the aggregate capitalization of the reorganized company and in allocating new securities the Commission, recognizing the principle later definitely established by this Court in the *Consolidated Rock Products* case, gave dominant weight to the earning capacity of the system and of the property subject to its mortgages. In allocating on this fundamental basis the Commission, as has been demonstrated in our discussion of the fairness of the plan, made and applied all determinations of value necessary to assure a fair and equitable allocation without the necessity of making the formalistic dollars and cents valuations demanded by the Circuit Court of Appeals. The Commission has also specifically found in accordance with the statutory requirements (Section 77(d)) that the plan approved by it is fair and equitable and otherwise complies with the requirements of subsection (d) and (e) of Section 77, and will be compatible with the public interest. There is nothing in the statutory provisions or the requirements of due process which demands more.

III

THE CIRCUIT COURT OF APPEALS MISCONCEIVED THE RELATIVE FUNCTIONS OF THE COMMISSION AND THE DISTRICT COURT.

The Circuit Court of Appeals' view of the relative functions of the Commission and the District Court was stated to correct what the Circuit Court of Appeals considered "a possible misconception" on the part of the District Court regarding the expert character of the Commission in railroad matters. The District Court, in its opinion, had said:

> "It cannot be gainsaid that the Commission knows all about the Debtor, its property, its history, financial and otherwise, its traffic and revenue, and its financial structure. No official body in the country is better qualified, by reason of experience, ability and specialized knowledge than is the Commission to find the ultimate facts as to the Debtor in relation to any of the matters mentioned." (R. 1588; 34 F. Supp. at 501.)

This statement, said the Circuit Court of Appeals, "indicates a possible misconception" (R. 2672; 124 F. (2d) at 140), and after quoting the provisions of Section 77(e) the Circuit Court of Appeals stated its views as follows:

> "In determining whether a plan of reorganization satisfies the requirements of subsection e, the court is not concluded by any determination made by the Commission, but may, and

> must, exercise its own independent judgment; and this is true whether such determination relates to value or to some other subject. Initially, however, the duty of determining the value of any property for any purpose under §77 rests on the Commission, not on the court." (R. 2674; 124 F. (2d) at 140.)

In effect the position of the Circuit Court of Appeals is that the Commission on the record before it should make detailed dollar and cents valuations of properties, claims, new securities, etc., and that upon receiving the record certified to it by the Commission the District Court should independently and *de novo*, disregarding even the expert character of the Commission, again make detailed dollar and cents valuations of the same properties, claims, new securities, etc. If the determinations thus made by the Court should happen to agree with those made by the Commission, then and only in that event would the Court be in a position to approve the plan.

Obviously this view of the relationship between the Commission and the District Court is utterly inconsistent with the repeated decisions of this Court, which have recognized that the determinations of the Interstate Commerce Commission are entitled to "the strength due to the judgments of a tribunal appointed by law and informed by experience." *Illinois Central Railroad Company* v. *Interstate Commerce Commission*, 206 U.S. 441, 454 (1906). Indeed, it hardly seems necessary to cite to the Court at this date

the long line of cases [33] in which as summarized in *Rochester Telephone Corp.* v. *United States*, 307 U.S. 125, 139 (1939) this Court has held that "even when resort to courts can be had to review a Commission's order, the range of issues open to review is narrowed. Only questions affecting constitutional power, statutory authority and the basic prerequisites of proof can be raised. If these legal tests are satisfied the Commission's order becomes incontestible." And in the very recent case of *Gray* v. *Powell*, 314 U.S. 402, 412 (1941), this Court has warned that "It is not the province of a court to absorb the administrative functions to such an extent that the executive or legislative agencies become mere fact-finding bodies deprived of the advantages of prompt and definite action." The view of the court below as to the functions of the Commission in railroad reorganizations would not only reduce that agency to a "mere fact-finding body," but would permit the courts then to disregard the facts which the Commission had found.

[33] E. g., *Illinois Central R. R. Co.* v. *Interstate Commerce Commission*, 206 U. S. 441 (1906); *Interstate Commerce Commission* v. *Illinois Central R. R. Co.* 215 U. S. 452, 471 (1910); *Interstate Commerce Commission* v. *Union Pacific R. R. Co.*, 222 U. S. 541 (1912); *Manufacturers Ry. Company* v. *United States*, 246 U. S. 457 (1918); *United States* v. *Illinois Central Railroad*, 263 U. S. 515 (1924); *Western Paper Makers' Chemical Co.* v. *United States*, 271 U. S. 268, 271 (1926); *Virginian Railway Company* v. *United States*, 272 U. S. 658, 665 (1926); *Assigned Car Cases*, 274 U. S. 564 (1927); *New York Central Securities Co.* v. *United States*, 287 U. S. 12, 29 (1932); *Atlanta, Birmingham and Coast R. R. Co.* v. *United States*, 296 U. S. 33 (1935); *Rochester Telephone Corp* v. *United States*, 307 U. S. 125 (1939).

That the view of the Circuit Court of Appeals was erroneous is established by the provisions of Section 77 itself, and its historical background. Section 77, under which railroad reorganizations were brought for the first time within the provisions of the Bankruptcy Act, was enacted in order to remedy a long series of abuses in prior equity receivership proceedings relating to railroads, which had resulted in unsound capital structures, excessive allowances of fees and lack of consideration of the public interest. While under Section 20a of the Interstate Commerce Act (49 U.S.C., Sec. 20a(2)), the Commission had jurisdiction over the issuance of securities by railroads, it had no direct power over the plan of reorganization itself, and was frequently placed in a very embarrassing position by the practice of reorganizers not to make application under Section 20a until substantially all other steps in the reorganization had been completed and the plan was on the verge of final consummation.[34] This situation was brought particularly to public attention during the 1925-1928 reorganization of the Chicago, Milwaukee and St. Paul Railway Company.[35]

---

[34] See *Denver & Rio Grande Western Reorganization*, 90 I.C.C. 141, 158 (1924); *Chicago, Milwaukee and St. Paul Reorganization*, 131 I.C.C. 615, 671 (1928).

[35] *United States* v. *Chicago, Milwaukee and St. Paul Railway Company*, 282 U. S. 311 (1931). Section 77 was avowedly intended to write into law the dissenting opinion in that case. See the remarks of Representative La Guardia, the manager of bill, upon the floor of the House in 76 Cong. Rec. 2924.

In enacting Section 77 Congress sought to remedy these evils by the introduction in the public interest of an administrative agency into railroad organizations and the strengthening of the power of that agency to deal with the abuses which had previously existed. The Interstate Commerce Commission was utilized as the appropriate administrative tribunal because of its specialized knowledge of railroad problems and its long experience in the field. Indeed, when Section 77 was under consideration there was a considerable body of opinion in favor of entirely withdrawing control of railroad reorganizations from the Courts and lodging such control with the Interstate Commerce Commission. This was recognized by this Court in *Palmer* v. *Massachusetts*, 308 U.S. 79, 86-87 (1939), in which the Court stated:

> "Until the amendment of March 3, 1933, railroads were outside the Bankruptcy Act. But the long history of Federal railroad receiverships, with the conflicts they frequently engendered between the federal courts and the public, left an enduring conviction that a railroad was not like an ordinary insolvent estate. Also an insolvent railroad, it was realized, required the oversight of agencies specially charged with the public interest represented by the transportation system. Indeed, when, in the depth of the depression, legislation was deemed urgent to meet the grave crisis confronting the railroads, there was a strong sentiment in Congress to withdraw from the courts control over insolvent rail-

roads and lodge it with the Interstate Commerce Commission. Congress stopped short of this remedy. But the whole scheme of §77 leaves no doubt that Congress did not mean to grant to the district courts the same scope as to bankrupt roads that they may have in dealing with other bankrupt estates.

"The judicial process in bankruptcy proceedings under §77 is, as it were, brigaded with the administrative process of the Commission. From the requirement of ratification by the Commission of the trustees appointed by the court to the Commission's approval of the court's plan of reorganization the authority of the court is intertwined with that of the Commission." [36]

---

[36] Accordingly, as summarized by this Court in the footnote to the statement quoted in the text: "Section 77(c)(1) requires the appointment of trustees to be ratified by the Commission; §77(c)(2) gives the Commission supervision over the compensation paid to trustees and their counsel; §77(c)(3) permits the issuance of trustees' certificates only with the Commission's approval; §77(c)(9) permits the Commission, on request of the court, to investigate facts pertaining to mismanagement of the debtor; §77(c)(10) empowers the Commission to set up accounts for the allocation of earnings among the various portions of the debtor's lines; §77(c)(11) empowers the Commission to file reports as to the debtor's property, prospective earnings, etc., and gives to the facts stated in such reports a presumption of correctness; §77(c)(12) gives the Commission a supervision over allowances for the expenses of various parties in interest in connection with the reorganization proceedings; §77(d) and 77(e) give to the Commission control over any proposed plan of reorganization; §77(p) gives to the Commission control over the solicitation of proxies or deposit agreements."

To the same effect is *Warren* v. *Palmer*, 310 U. S. 132, 138 (1940) where this Court stated that "the judicial functions of the bankruptcy court and the administrative functions of the Commission work cooperatively in reorganizations."

With regards to plans of reorganization, the debtor's plan is required to be filed simultaneously with the Court and the Commission. Other plans may be filed by specified percentages of creditors and stockholders, or by any party in interest with the consent of the Commission. If a plan filed with the Commission is considered by it to be prima facie impracticable, it receives no further consideration. Except in this event, public hearings on the proposed plan of reorganization are held before the Commission at which opportunity is given to any interested party to be heard and following which the Commission renders a report and order approving a plan (which may be different from any proposed in the proceedings) which will in its opinion meet the requirements of sub-sections (b) and (e) of Section 77 and will be compatible with the public interest.

Sub-section (b) describes broadly what the plan of reorganization may contain. In finding that the plan meets the requirements of sub-section (e) the Commission is required to find that it "is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of

the law of the land regarding the participation of the various classes of creditors and stockholders." [37] Subsection (e) also provides that if it shall be necessary to determine the value of any property for any purpose under Section 77, such value shall be determined by the Commission in the manner there provided. Under the same sub-section the Commission is authorized to find that the interests of any class of creditors or stockholders are not adversely and materially affected by the plan, or (as alternatives to a specific finding of insolvency) that the equity or interests of such class of creditors or stockholders has no value, or that the plan provides for the payment to such creditors or stockholders of an amount not less than the value of their equity or interests. If any such finding be affirmed by the court, as hereinafter described, submission of the plan to such class of creditors or stockholders for acceptance or rejection is not to be required. In addition to the foregoing findings under sub-sections (b) and (e) the Commission, as has been pointed out, is required to find that the plan approved by it "will be compatible with the public interest."

When the plan so approved by the Commission is certified to the court objections and claims for equitable treatment may be filed by all parties in interest and a hearing, as was done in the present case, is to be held

[37] In addition, subsection (e) contains certain requirements as to expenses and costs of administration of the proceedings, and regarding the provisions made in the plan for claims of the United States.

thereon. Following such hearing the court is to approve the plan, if satisfied that it meets the requirements next to be described. If the court for any reason should disapprove the plan, it is not authorized to make changes or modifications therein, but has as its only alternatives the reference of the proceedings back to the Commission or the dismissal thereof.

In approving the plan certified to it by the Commission the Court is required to find that it complies with the provisions of sub-section (b) above referred to and "is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders."[38] No provision is made, it will be noted, for a finding by the court that the plan "will be compatible with the public interest"; nor is the court, as distinguished from the Commission, specifically authorized to pass upon the valuation of the property of the Debtor for reorganization purposes. In the event of findings by the Commission that a particular class of creditors or stockholders is not materially adversely affected by the plan, or that the equity or interests of such creditors or stockholders is without value, the statute provides that if such determination is "affirmed" by the court

[38] The findings with reference to the expenses and allowances involved in the proceeding, and with respect to provision for the claims of the United States, are applicable to the court as well as to the Commision.

submission of the plan to such creditors or stockholders will not be required.

In two decided cases the Commission's determinations of capitalization and value under Section 77 have been held conclusive where not arbitrary or exceeding constitutional limitations. *Akron, Canton & Youngstown Railway Company* v. *Hagenbuch*, 128 F. (2d) 932 (C.C.A. 6th, 1942); *In re Erie Railroad Company*, 37 F. Supp. 237, 243-245 (D.C.N.D. Ohio, 1940). In the *Akron, Canton & Youngstown* case the Circuit Court of Appeals for the Sixth Circuit stated:

> "The duties imposed on the courts and the powers conferred on the Interstate Commerce Commission under this Section of the Act, when construed in relation to other Sections, are separate and distinct. As to some matters under the Act, such as the determination of value, a broad discretion is lodged in the Interstate Commerce Commission and the court does not sit as a board of revision to substitute its judgment for that of the Commission. In such matters, the judicial inquiry into the facts goes no further than to ascertain whether there is substantial evidence to support the findings of the Commission and the question of the weight of the evidence in determining such matters lies with the Commission when acting within its statutory authority. *Palmer* v. *Massachusetts*, 308 U. S. 7, 87, 60 S. Ct. 34, 84 L.Ed. 93. Section 77, sub. d., 11 U. S. C. A. §205, sub. d., provides that the Commission 'shall approve a plan . . . that will in its opinion meet with the requirements of subsections (b) and (e) of

this section, and will be compatible with the public interest.' Similar terms are found in paragraph (2) of Section 20(a) and paragraph (3) of Section 5 of the Interstate Commerce Act, 49 U. S. C. A., §§(5) (3), 20a(2), which were in effect before the passage of the Act in question. The validity of the Act conferring such power on the Commission was approved in New York Central Securities Corporation v. United States, 287 U. S. 12, 24, 53 S. Ct. 45, 77 L. Ed. 138. Historically, the power to value railroad properties for rate making and capitalization purposes has always been lodged in the Interstate Commerce Commission.

"There is nothing in the present Act which would indicate that the Congress intended to deprive the Commission of any of the powers it had so long exercised in valuing railroad properties for capitalization purposes.

"The determination of the value of the properties, and the amount and character of capitalization, are legislative functions affecting the public interest and are exclusively within the province of the Commission under the Act. The only qualification is that the court shall independently determine whether, in the exercise of its jurisdiction, the Commission has acted fairly within the bounds of the Constitution and not arbitrarily." (128 F. (2d) at 940.)

This appears also to have been the view of the District Court in the present case (R. 1596-1597; 34 F. Supp. at 501, 504), although the District Court in addition made expressly clear (R. 1597; 34 F. Supp. at 504-505) that it was itself wholly in accord with the

conclusions reached by the Commission upon all issues. Whether applied to all matters passed upon by the Commission or considered as particularly applicable to determinations of capitalization and value and other matters directly affecting the public interest, it is also directly in line with the numerous decisions of this Court above referred to in which findings of the Interstate Commerce Commission upon a controversy within its jurisdiction, supported by substantial evidence, have been held to constitute a determination by an administrative tribunal not open to review. Naturally, as all of the cases recognize and the opinion of the District Court in the present proceedings expressly points out, this interpretation of the relative functions of the Court and the Commission is subject to the qualification that the Court "shall independently determine whether, in the exercise of its jurisdiction, the Commission has acted fairly, within the bounds of the Constitution, and not arbitrarily." (R. 1596; 34 F. Supp. at 504). The District Court found, and we have demonstrated elsewhere in the present brief, that these requirements were fully complied with.

In numerous other cases under Section 77 the lower courts, without directly passing upon the exact weight to be given the Commission's findings, have repeatedly emphasized that, directly contrary to the views of the Circuit Court of Appeals in the present case, the Commission's determinations are entitled to great weight as those of an expert administrative body

"appointed by law and informed by experience."[39] *In re Chicago, Milwaukee, St. Paul and Pacific Railroad Company*, 124 F. (2d) 754 (C.C.A. 7th, 1941); *In re Chicago and North Western Railway Company*, 35 F. Supp. 230 (N.D. Ill., 1940), affirmed 126 F(2d) 351 (C.C.A. 7th, 1942); *In re Denver and Rio Grande Western Railroad Company*, 38 F. Supp. 120 (D.C., Colo., 1941); *In re Missouri Pacific Railroad Company*, 39 F. Supp. 436 (D.C.E.D., Mo., 1941); *In re St. Louis-San Francisco Railway Company*, not yet reported (D.C.E.D., Mo., July 25, 1942).

Thus in the *Milwaukee* case the Circuit Court of Appeals stated:

> "* * * While question-arousing arguments have been advanced for and against the plan, which invite lengthy discussion by us, the outstanding, unchallenged fact is that the conclusions of the I. C. C., approved by the District Court, are entitled to great weight, and we are hardly justified in substituting our judgment for that of those tribunals, save where clearly satisfied that their judgment is erroneous, or is based upon incorrect assumptions, or where an incorrect rule or principle is applied."[40] (124 F. (2d) at 762.)

---

[39] *Illinois Central Railroad Company v. Interstate Commerce Commission*, 206 U. S. 441, 454 (1906).

[40] The District Court in the Milwaukee case, whose decision was reversed on other grounds by the Circuit Court of Appeals, stated in this connection:

> "It is apparent that it was intended by the law that the bankruptcy court and the Interstate Commerce Com-

The Interstate Commerce Commission has through long experience acquired a highly specialized knowledge of railroad problems, and has for many years been charged with the protection of the public interest in this field. Obviously the Commission, through the training and experience of its members and its specialized knowledge and facilities, is peculiarly qualified for the consideration of questions of the character here involved, and was specially charged with their consideration by Congress under the provisions of Section 77. These qualifications of the Commission, as has been seen, were directly recognized by the District Court in the present case (R. 1588; 34 F. Supp. at 501), and it is submitted that far from indicating, as

---

mission should cooperate to the end that a fair and equitable plan of reorganization might be provided. Such purpose has been declared in a recent decision of the Supreme Court of the United States in Warren v. Palmer, 310 U.S. 132, 60 S. Ct. 865, 85 L. Ed. 1118.

"That Court has not yet determined just what weight should be given by the court to the findings and conclusions of the Commission. Clearly, the court has power to correct errors of law into which the Commission may have fallen and to set aside findings of fact which are not supported by the record or conclusions which violate constitutional rights. On the other hand, the initial determinations of the questions bearing on the soundness and reasonableness of a plan of reorganization is the responsibility of the Commission which is peculiarly fitted for the consideration of such questions and its findings and conclusions, made and reached after extended hearings and exhaustive study, as in this case, should be given great weight." *In re Chicago, Milwaukee, St. Paul and Pacific Railroad Company*, 36 F. Supp. 193, (D.C.N.D. Ill., 1940).

the Circuit Court of Appeals stated, " a possible misconception" (R. 2672; 124 F.(2d) at 140), such recognition constituted the least possible weight which could be given to the Commission's determinations.

The Circuit Court of Appeals' strictures may possibly have resulted from an unexpressed acceptance of an argument made by the objectors to the plan that because Section 77(e) requires the judge to be "satisfied" that the plan is fair and equitable, they were entitled to an independent, *de novo* judgment by the District Court on all points, disregarding the Commission's determinations. The record suggests, indeed, that the objectors would be satisfied that the "independent judgment" of the District Court had been exercised only if it disagreed on all points with the Commission, and agreed entirely with their own contentions. In any event, it is submitted that the statutory language will not bear the construction sought to be placed upon it. Having in mind the well established doctrine of this Court as to the administrative finality of the Commission's decisions, the expertness of the Commission in the field and the practical reality that no two persons acting fully independently would ever arrive at an identical plan,[41] the

[41] There is no requirement under Section 77 that the Court should find that a plan of reorganization approved by the Commission is *the* plan which the Court would have written. Nor is it necessary for the Court to find that it is the best plan. As was said by the District Court in approving the Commission's plan for the reorganization of the Chicago and North Western:

"It has been observed that the Interstate Commerce

Congress presumably contemplated that the District Court in becoming "satisfied" that the plan was fair and equitable should proceed upon the basis of the factual determinations and the conclusions of the Commission, where these were supported by substantial evidence, do not involve errors of law and are within constitutional limits.[42] Certainly the recognition by the District Court of the expert administrative character of the Commission, and the according of great weight to its conclusions, are in no way inconsistent with the District Court itself being fully and completely "satisfied" with the fairness and equity of the plan. That a builder should be satisfied with the architect's plan before undertaking construction in accordance therewith does not mean that the builder must make, or

---

Commission is not required to formulate the best possible plan of reorganization and that the Court is not limited to the approving of the best possible plan of reorganization." *In re Chicago and North Western Railway Company*, 35 F. Supp. 230, 256 (D.C.N.D. Ill., 1940).

[42] One court, referring to the observation of this Court in *Case* v. *Los Angeles Lumber Products Co.*, 308 U.S. 106, 113-114 (1939) that the question whether on predetermined facts a plan was fair and equitable was a question of law, has suggested that this required the Court to exercise its independent judgment on questions of fact, specifically, the soundness of the estimated revenues in a normal year as determined by the Commission. *In re Chicago and North Western Railway Company*, 126 F. (2d) 351, 364 (C.C.A. 7th, 1942). Obviously, no such implication is justified. In addition, Section 77B reorganizations involved no such determinations by an expert administrative body as are provided for in railroad reorganizations under Section 77.

would consider himself competent to make, all the detailed calculations made by the architect in arriving at the plans and specifications. And when Congress, as in the Railroad Adjustment Act of 1939,[43] desired to provide that the Court should consider certain plans of reorganization independently of the findings of the Commission, it made express provision to that effect.

In a few cases in the lower courts some emphasis has been laid upon the exercise of an independent judgment by the District Court, but even these decisions, with the exception of that of the Circuit Court of Appeals in the present case, have repeatedly emphasized the great weight to be accorded the conclusions of the Commission. *In re Chicago and North Western Railway Company*, 121 F.(2d) 791 (C.C.A. 7th, 1941); *In re Chicago and North Western Railway Company*, 126 F.(2d) 351 (C.C.A. 7th, 1942); *In the Matter of New York, New Haven and Hartford Railroad Company*, not yet reported (D.C. Conn., December 8, 1941). Thus in the Chicago and North Western decision first cited the Circuit Court of Appeals for the Seventh Circuit, although referring to "jurisdiction" as in the Court and "judicial action" as

---

[43] 53 Stat. 1134-1151; 11 U.S.C. Secs. 1200-1255. In the Railroad Adjustment Act Congress provided that in passing upon the fairness and equity of the plan "the Court shall scrutinize the facts independently * * * of the fact that the Commission under Section 20a of Title 49, has authorized the issuance or modification of securities as proposed by such plan, and of the fact that the Commission has made such or similar findings." 11 U.S.C. Section 1225(3).

required, also described matters "such as relate to financial set-up, meeting of obligations, determinations of value, etc." as particularly entrusted to the I.C.C., and stated:

> "In the field wherein it exercises the powers expressly given it, the findings of the I.C.C. are well nigh conclusive. True, it may not be said that the orders of the I.C.C. are unassailable if wholly lacking in evidentiary support. But where, in matters relating to plans of reorganization, earning power of the debtor, its operations, having in view the greatest service to the public and the greatest net earnings for its security holders, the findings of the I.C.C. should be, as they are, accepted almost as verities by the Court." (121 F.(2d) at 796.)

Several cases in the lower courts have also recognized that the question of the precise weight which should be accorded to the determinations of the Commission arises only where disagreement with such findings might otherwise exist. *In re Chicago Great Western Railroad Company*, 29 F. Supp. 149, 160 (D.C.N.D. Ill., 1939); *In re Chicago and North Western Railway Company*, 35 F. Supp. 230, 237, 253 (D.C.N.D. Ill., 1940), affirmed 126 F. (2d) 351 (C.C.A. 7th, 1942). In its opinion approving the plan of reorganization in the present case the District Court made clear that it was not in disagreement but wholly in accord with the findings of the Commission. After discussion of the two issues of the amount and character of capitalization and the dis-

tribution of the new securities provided for under the plan, the District Court emphatically stated that:

> "I have read the record and carefully considered all of the objections offered by the respective objectors to the Commission plan. I have also read the briefs of respective counsel in support of the objections. *I am wholly in accord with the conclusions reached by the Commission upon both issues and all matters incidental thereto.* It seems to me that further discussion would be superfluous. * * * *
>
> *"Upon a consideration of the entire record I am of the opinion* that the Commission plan complies with the provisions of subsection b of Section 77 and is supported by the evidence; that it is fair and equitable; that it affords due recognition to the rights of each class of creditors and stockholders; that it does not discriminate unfairly against any class of creditors or stockholders; that it will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders; and that it provides for payment of all costs of administration and other allowances made or to be made by this court." (R. 1597, 1599-1600; 34 F. Supp. at 504-505; italics supplied.)

Accordingly, since the District Court was entirely in agreement with the determinations made by the Commission, it properly approved its findings regardless of the technical weight to be given to them.

Under these circumstances definite determination by this Court of the relative functions of the Commission

and the District Court in railroad reorganizations under Section 77 is not absolutely essential in the present case. Nevertheless, in view of the conflicting theories which have been argued at length in these proceedings, and of the number of railroads in reorganization under Section 77, we urge the Court to pass upon this matter, and to give to the provisions of Section 77 a construction which will make the statute a workable one.

As a practical matter, there are only two avenues of approach in the doing of any job in which two people or two bodies have responsibility, but in which neither has authority to change what the other has done. Either each must do parts of the job independently of the other with questionable results in fitting together their finished products or one must take the initiative and do the job, leaving it to the other to check the results against required standards and on the basis of that check to approve or disapprove it. Under Section 77 Congress has delegated the taking of the initiative—the "doing of the job"—to the Commission, and it is submitted that "having found that the record permitted the Commission to draw the conclusion that it did a court travels beyond its province to express concurrence therein as an original question." *Rochester Telephone Corp.* v. *United States*, 307 U.S. 125, 145-146 (1939). Certainly, the findings and conclusions of the Commission, in the performance of the task delegated to it by Congress, are entitled to great weight as the determinations of the expert administrative body long charged with the protection of the public

interest in the railroad field. Only thus can the intent of Congress be made effective, and Section 77 rendered a workable statute for the consummation of railroad reorganizations.

IV

UPON THE ENTIRE RECORD THIS COURT SHOULD REVERSE THE DECREE OF THE CIRCUIT COURT OF APPEALS AND AFFIRM THE ORDER OF THE DISTRICT COURT APPROVING THE PLAN

Instituted in 1935, these reorganization proceedings have now been pending for more than seven years. In accordance with the provisions of Section 77 the Interstate Commerce Commission, the administrative body experienced in the field, has held lengthy hearings in which the full record hereinbefore described was developed, including all requisite valuation data and all other information necessary for the reorganization of the Debtor.

Upon the basis of this complete record and after hearing all of the parties the Commission developed a plan of reorganzation for the Debtor which, as modified after again hearing all of the parties on petitions for modification, became the plan of reorganization approved by the Commission and certified to the District Court, and now under consideration here. This plan the Commission found to be compatible with the public interest, fair and equitable, and in all respects in accordance with the provisions of Section 77. In the District Court further evidence was taken and all parties again heard both on brief and in oral argument, and the District Court thereafter likewise ap-

proved the plan and declared its provisions to be fair and equitable and in all respects in accordance with law.

The Circuit Court of Appeals, as has been pointed out, failed to pass definitely upon the controversies involved, and on the basis of a misinterpretation of the decision of this Court in the *Consolidated Rock Products* case demanded that numerous formalistic dollars and cents valuations should be made by the Commission, and independently made again by the District Court, before it would pass thereon.

That the Commission in its reports and orders stated fully its conclusions and the reasons therefor in accordance with the statutory requirement, and made all necessary findings and conclusions, has been hereinbefore fully established. Under these circumstances, and in view of the full and complete record, we urge this Court in the public interest and in the interest of the conclusion of these long drawn out proceedings not to remand the case to the Circuit Court of Appeals for further action but to dispose finally and conclusively of the problems involved."

As hereinbefore pointed out, the same general principles and procedure followed by the Commission in this case have been followed by it in numerous other reorganizations under Section 77 now pending either before the Commission or the courts. The aggre-

" The jurisdiction of this Court to make such final disposition notwithstanding the failure of the Circuit Court of Appeals to pass upon the merits, is unquestionable. *Story Parchment Co.* v. *Paterson Parchment Co.*, 282 U. S. 555, 567-568 (1931); *Cole* v. *Ralph*, 252 U. S. 286, 290 (1920).

gate principal amount of the outstanding loans of Reconstruction Finance Corporation itself to railroads or their trustees in cases where the plans of reorganization may be affected by the decision in the present case exceeds $125,000,000. In order that the parties in these various proceedings, as well as the Commission and the courts, may be advised of the proper principles and procedure to be followed in reorganizations under Section 77, it is respectfully requested that the Court in its decision in the present case clear away the misconceptions which, it is believed, have arisen about the decision in the *Consolidated Rock Products* case, and indicate practicable principles and procedure to be followed in railroad reorganizations on the matters herein involved.

CONCLUSION

It is submitted that the decree of the Circuit Court of Appeals should be reversed, and that the order of the District Court should be affirmed.

Respectfully submitted,

CHARLES FAHY,
Solicitor General

RUSSELL L. SNODGRASS,
Assistant General Counsel,

EMMET MCCAFFERY,
Counsel,
Reconstruction Finance Corporation

CLAUDE E. HAMILTON, JR.,
General Counsel,
Reconstruction Finance Corporation

SEPTEMBER, 1942

APPENDIX A

The provisions of Section 77 of the Bankruptcy Act (11 U. S. C., Section 205) pertinent in this case are the following:

(a) Any railroad corporation may file a petition stating that it is insolvent or unable to meet its debts as they mature and that it desires to effect a plan of reorganization. The petition shall be filed with the court in whose territorial jurisdiction such corporation, during the preceding six months or the greater portion thereof, has had its principal executive or operating office, and a copy of the petition shall at the same time be filed with the *Interstate Commerce Commission* (hereinafter called the *"Commission"*).

* * * * *

(b) A plan of reorganization within the meaning of this section (1) shall include provisions modifying or altering the rights of creditors generally, or of any class of them, secured or unsecured, either through the issuance of new securities of any character or otherwise; (2) may include provisions modifying or altering the rights of stockholders generally, or of any class of them, either through the issuance of new securities of any character, or otherwise; (3) may include, for the purpose of preserving such interests of creditors and stockholders as are not otherwise provided for, provisions for the issuance to any such creditor or stockholder of options or warrants to receive, or to subscribe for, securities of the re-

organized company in such amounts and upon such terms and conditions as may be set forth in the plan; (4) shall provide for fixed charges (including fixed interest on funded debt, interest on unfunded debt, amortization of discount on funded debt, and rent for leased railroads) in such an amount that, after due consideration of the probable prospective earnings of the property in light of its earnings experience and all other relevant facts, there shall be adequate coverage of such fixed charges by the probable earnings available for the payment thereof; (5) shall provide adequate means for the execution of the plan, which may include the transfer of any interest in or control of all or any part of the property of the debtor to another corporation or corporations, the merger or consolidation of the debtor with another corporation or corporations, the retention of all or any part of the property by the debtor, the sale of all or any part of the property of the debtor either subject to or free from any lien at not less than a fair upset price, the distribution of all or any assets, or the proceeds derived from the sale thereof, among those having an interest therein, the satisfaction or modification of any liens, indentures, or other similar interests, the curing or waiver of defaults, the extension of maturity dates of outstanding securities, the reduction in principal and/or rate of interest and alteration of other terms of such securities, the amendment of the charter of the debtor, and/or the issuance of securities of either the debtor or any such other corporation or corporations for cash, or

in exchange for existing securities, or in satisfaction of claims or rights or for other appropriate purposes; and may deal with all or any part of the property of the debtor; may reject contracts of the debtor which are exccutory in whole or in part, including unexpired leases; and may include any other appropriate provisions not inconsistent with this section.

* * * * *

(c) After approving the petition:

* * * * *

(10) The judge may direct the debtor or the trustee or trustees to keep such records and accounts, in addition to the accounts prescribed by the *Commission*, as will permit of such a segregation and allocation, as the necessities of the case may require, of the earnings and expenses between and to the divisions and parts of the railroad or other property of the debtor which are separately subject to the liens of the various mortgages or deeds of trust, or are separately subject to lease, and may refer to the *Commission* for its recommendations after hearings thereon if the parties shall so request and/or the *Commission* determine necessary or desirable, as to the method or formula by which such segregation and allocation shall be made; and thereafter such segregation and allocation may be made at the expense of the debtor's estate.

(11) The *Commission* may direct such of its agencies as it may designate to file in the proceedings before the *Commission* a report, and additional or sup-

plemental reports at such time or times as the *Commission* shall designate, of such data with reference to the property, business, earnings, and corporate organization of the debtor and such other facts as the *Commission*, after hearing if it deems necessary, shall determine to be necessary or helpful information for the purposes of the preparation of reorganization plans, and for the purpose of aiding in determining the method or formula of allocating earnings permitted by subdivision (10) of this subsection (c). Such report or reports shall be prima facie evidence of the facts therein stated in any proceeding under this section. The actual cost of preparing said report or reports shall be certified by the *Commission* and shall be borne by the debtor's estate.

* * * * *

(d) The debtor, after a petition is filed as provided in subsection (a) of this section, shall file a plan of reorganization within six months of the entry of the order by the judge approving the petition as properly filed, or if heretofore approved, then within six months of August 27, 1935, and not thereafter unless such time is extended by the judge from time to time for cause shown, no single extension at any one time to be for more than six months. Such plans shall also be filed with the *Commission* at the same time. Such plans may likewise be filed at any time before, or with the consent of the *Commission* during, the hearings hereinafter provided for, by the trustee or trustees, or by or on behalf of the creditors being not less than

10 per centum in amount of any class of creditors, or by or on behalf of any class of stockholders being not less than 10 per centum in amount of any such class, or with the consent of the *Commission* by any party in interest. After the filing of such a plan, the *Commission*, unless such plan shall be considered by it to be prima facie impracticable, shall, after due notice to all stockholders and creditors given in such manner as it shall determine, hold public hearings, at which opportunity shall be given to any interested party to be heard, and following which the *Commission* shall render a report and order in which it shall approve a plan, which may be different from any which has been proposed, that will in its opinion meet with the requirements of subsections (b) and (e) of this section, and will be compatible with the public interest; or it shall render a report and order in which it shall refuse to approve any plan. In such report the *Commission* shall state fully the reasons for its conclusions.

The *Commission* may thereafter, upon petition for good cause shown filed within sixty days of the date of its order, and upon further hearings if the Commission shall deem necessary, in a supplemental report and order modify any plan which it has approved, stating the reasons for such modification. The *Commission*, if it approves a plan, shall thereupon certify the plan to the court together with a transcript of the proceedings before it and a copy of the report and order approving the plan. No plan shall be approved

or confirmed by the judge in any proceeding under this section unless the plan shall first have been approved by the *Commission* and certified to the court.

* * * * *

(e) Upon the certification of a plan by the Commission to the court, the court shall give due notice to all parties in interest of the time within which such parties may file with the court their objections to such plan, and such parties shall file, within such time as may be fixed in said notice, detailed and specific objections in writing to the plan and their claims for equitable treatment. The judge shall, after notice in such manner as he may determine to the debtor, its trustee or trustees, stockholders, creditors, and the *Commission*, hear all parties in interest is support of, and in opposition to, such objections to the plan and such claims for equitable treatment. After such hearing, and without any hearing if no objections are filed, the judge shall approve the plan if satisfied that: (1) It complies with the provisions of subsection (b) of this section, is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders; (2) the approximate amounts to be paid by the debtor, or by any corporation or corporations acquiring the debtor's assets,

for expenses and fees incident to the reorganization, have been fully disclosed so far as they can be ascertained at the date of such hearing, are reasonable; are within such maximum limits as are fixed by the *Commission*, and are within such maximum limits to be subject to the approval of the judge; (3) the plan provides for the payment of all costs of administration and all other allowances made or to be made by the judge, except that allowances provided for in subsection (c), paragraph (12) of this section, may be paid in securities provided for in the plan if those entitled thereto will accept such payment, and the judge is hereby given power to approve the same.

If the judge shall not approve the plan, he shall file an opinion, stating his conclusions and the reason therefor, and he shall enter an order in which he may either dismiss the proceedings, or in his discretion and on motion of any party in interest refer the proceedings back to the *Commission* for further action, in which event he shall transmit to the *Commission* a copy of any evidence received. If the proceedings are referred back to the *Commission*, it shall proceed to a reconsideration of the proceedings under the provisions of subsection (d) of this section. If the judge shall approve the plan, he shall file an opinion, stating his conclusions and the reasons therefor, and enter an order to that effect, and shall send a certified copy of such opinion and order to the *Commission*. The plan shall then be submitted by the Commission to the creditors of each class whose claims have been filed and

allowed in accordance with the requirement of subsection (c) of this section, and to the stockholders of each class, and/or to the committees or other representatives thereof, for acceptance or rejection, within such time as the *Commission* shall specify, together with the report or reports of the *Commission* thereon or such a summarization thereof as the *Commission* may approve, and the opinion and order of the judge: *Provided,* That submission to any class of stockholders shall not be necessary if the *Commission* shall have found, and the judge shall have affirmed the finding, (a) that at the time of the finding the corporation is insolvent, or that at the time of the finding the equity of such class of stockholders has no value, or that the plan provides for the payment in cash to such class of stockholders of an amount not less than the value of their equity, if any, or (b) that the interests of such class of stockholders will not be adversely and materially affected by the plan, or (c) that the debtor has pursuant to authorized corporate action accepted the plan and its stockholders are bound by such acceptance: *Provided further,* That submission to any class of creditors shall not be necessary if the *Commission* shall have found, and the judge shall have affirmed the finding, that the interests of such class of creditors will not be adversely and materially affected by the plan, or that at the time of the finding the interests of such class of creditors have no value, or that the plan provides for the payment in cash to such class of creditors of an amount not less than the value of

their interests. For the purpose of this section the acceptance or rejection by any creditor or stockholder shall be in writing, executed by him or by his duly authorized attorney, committee, or representative. If the United States of America, or any agency thereof, or any corporation (other than the Reconstruction Finance Corporation) the majority of the stock of which is owned by the United States of America, is a creditor or stockholder, the interests or claims thereof shall be deemed to be affected by the plan, and the President of the United States, or any officer or agency he may designate, is hereby authorized to act in respect of the interests or claims of the United States or of such agency or other corporation. The expense of such submission shall be certified by the *Commission* and shall be borne by the debtor's estate. The *Commission* shall certify to the judge the results of such submission.

Upon receipt of such certification, the judge shall confirm the plan if satisfied that it has been accepted by or on behalf of creditors of each class to which submission is required under this subsection holding more than two-thirds in amount of the total of the allowed claims of such class which have been reported in said submission as voting on said plan, and by or on behalf of stockholder of each class to which submission is required under this subsection holding more than two-thirds of the stock of such class which has been reported in said submission as voting on said plan; and that such acceptances have not been made or procured

by any means forbidden by law: *Provided*, That, if the plan has not been so accepted by the creditors and stockholders, the judge may nevertheless confirm the plan if he is satisfied and finds, after hearing, that it makes adequate provision for fair and equitable treatment for the interests or claims of those rejecting it; that such rejection is not reasonably justified in the light of the respective rights and interests of those rejecting it and all the relevant facts; and that the plan conforms to the requirements of clauses (1) to (3), inclusive, of the first paragraph of this subsection (e): *Provided further*, That if, in any reorganization proceeding under this section, the United States is a creditor on claims for taxes or customs duties (whether or not the United States has any other interest in, or claim against, the debtor, as creditor or stockholder), no plan which does not provide for the payment thereof shall be confirmed by the judge except upon the acceptance, certified to the court, of a lesser amount by the President of the United States or the officer or agency designated by him pursuant to the provisions of the preceding paragraph hereof: *Provided further*, That if the President of the United States or such officer or agency shall fail to accept or reject such lesser amount for more than ninety days after receipt of written notice so to do from the court, accompanied by a certified copy of the plan, the consent of the United States insofar as its claims for taxes or customs duties are concerned shall be conclusively presumed. If the judge shall confirm the plan, he shall enter an order

and file an opinion with a statement of his conclusions and his reasons therefor. If the judge shall not confirm the plan, he shall file an opinion, with a statement of his conclusions and his reasons therefor, and enter an order in which he shall either dismiss the proceedings, or, in his discretion and on the motion of any party in interest, refer the case back to the *Commission* for further proceedings, including the consideration of modifications of the plan or the proposal of new plans. In the event of such a reference back to the *Commission*, the proceedings with respect to any modified or new plan shall be governed by the provisions of this section in like manner as in an original proceeding hereunder.

If it shall be necessary to determine the value of any property for any purpose under this section, the *Commission* shall determine such value and certify the same to the court in its report on the plan. The value of any property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present, and prospective, and all other relevant facts. In determining such value only such effect shall be given to the present cost of reproduction new and less depreciation and original cost of the property, and the actual investment therein, as may be required under the law of the land, in light of its earning power and all other relevant facts.

(f) Upon confirmation by the judge, the provisions of the plan and of the order of confirmation shall, sub-

ject to the right of judicial review, be binding upon the debtor, all stockholders thereof, including those who have not, as well as those who have, accepted it, and all creditors secured or unsecured, whether or not adversely affected by the plan, and whether or not their claims shall have been filed, and, if filed, whether or not approved, including creditors who have not, as well as those who have, accepted it. Upon confirmation of the plan, the debtor and any other corporation or corporations organized or to be organized for the purpose of carrying out the plan, shall have full power and authority to, and shall put into effect and carry out the plan and the orders of the judge relative thereto, under and subject to the supervision and the control of the judge, the laws of any State or the decision or order of any State authority to the contrary notwithstanding. The property dealt with by the plan, when transferred and conveyed to the debtor or to the other corporation or corporations provided for by the plan, or when retained by the debtor pursuant to the plan, shall be free and clear of all claims of the debtor, its stockholders and creditors, and the debtor shall be discharged from its debts and liabilities, except such as may consistently with the provisions of the plan be reserved in the order confirming the plan or directing such transfer and conveyance or retention, and the judge may require the trustee or trustees appointed hereunder, the debtor, any mortgagee, the trustee of any obligation of the debtor, and all other proper and necessary parties, to make any such transfer or conveyance, and may require the

debtor to join in any such transfer or conveyance made by the trustee or trustees. Upon the termination of the proceedings a final decree shall be entered discharging the trustee or trustees, and making such provisions as may be equitable, by way of injunction or otherwise, and closing the case. Upon confirmation of a plan the *Commission* shall, without further proceedings, grant authority for the issue of any securities, assumption of obligations, transfer of any property, sale, consolidation or merger of the debtor's property, or pooling of traffic, to the extent contemplated by the plan and not inconsistent with the provisions and purposes of chapter 1 of Title 49 as on August 27, 1935, or thereafter amended.

* * * *

(g) If in the light of all the existing circumstances there is undue delay in a reasonably expeditious reorganization of the debtor, the judge, in his discretion, shall, on motion of any party in interest or on his own motion, after hearing and after consideration of the recommendation of the *Commission*, dismiss the proceedings. Upon the filing of such an order of dismissal, all right, title, or interest of the trustee or trustees shall vest by operation of law in the debtor unless otherwise provided by such order.

* * * *

(q) The provisions of section 12 of Title 49 shall be applicable to enable the *Commission* to perform its duties under this section and the provisions of such

section shall apply to the debtor, any subsidiary or affiliated company, or any other person as herein defined.

STATUTES

Bankruptcy Act, Section 77 1

To the Honorable the Chief Justice and the Associate Justices of the Supreme Court of the United States:

This respondent respectfully states that the grounds upon which Petitioner bases its application for a writ of certiorari to review the opinion of the United States Circuit Court of Appeals for the Ninth Circuit (reported in 124 F. (2d), 136) (R. 2663), entered November 28, 1941, reversing an order of the United States District Court for the Northern District of California, Southern Division (34 F. Supp. 423), (R. 1600), which had approved a plan of reorganization for The Western Pacific Railroad Company under Section 77 of the Bankruptcy Act (11 U. S. C. A. § 205) are in substance like those enumerated in Petitions Nos. 819 and 820, in this cause.

In its answering brief filed with this Court on January 16, 1912, respondent urged that the requests sought by Petitions Nos. 819 and 820 in these proceedings for the issuance of writs of certiorari be denied for the reasons that said petitions contained no grounds justifying the issuance of said writ; that the opinion of the Court below was not only in accordance with the requirements of Section 77 of the Bankruptcy Act (11 U. S. C. A. § 205), but was not in conflict, as asserted, with any decision of this Court or any Circuit Court of Appeals and, further, that there was no special or important reason for granting the petitions for certiorari. Since the grounds upon which the present petitioner predicates its request for certiorari are in substance similar to those recited in Petitions Nos. 819 and 820, it is the opinion of respondent that its brief of January 16, 1942, sufficiently answers the questions presented in Petition No. 989 and, therefore, respectfully urges that the request for certiorari be denied.

REASONS ASSIGNED BY PETITIONER FOR GRANTING THE WRIT OF CERTIORARI

On pages 5 to 9, inclusive, of its petition, petitioner sets forth under Paragraphs (1) and (2) its reasons for granting the writ of certiorari.

Paragraph (5) of Rule 38 of this Court clearly outlines the reasons which this Court will consider in a petition for review on writ of certiorari. Upon analysis, it becomes apparent that most of the "reasons" assigned by petitioner amount to nothing more than a statement showing how the Interstate Commerce Commission arrived at its conclusions embodied in the plan of reorganization; the adoption by the District Court of the Commission's findings; and the reversal by the Court below of the order of the District Court approving the plan of reorganization. These are not "special and important reasons" which Rule 38, paragraph (5), prescribes as grounds or causes for issuance of the writ.

In addition to these general statements of petitioner under this caption, it also alleges the following grounds for the exercise of this Court's judicial discretion in granting the writ:

(a) ". . . The court below, however, reversed on the ground that the Commission had not made findings of fact as to the value of the railroad as a whole, the value of the securities held by each class of creditors, and the value of the new securities to be issued. . . .". (Page 6).

(b) ". . . The decision below is in square conflict with the decision of the Circuit Court of Appeals for the Seventh Circuit in *Matter of Chicago, Milwaukee, etc., Railroad Company*, decided December 4, 1941, . . . upon the question of whether stockholders can be excluded from participation in the reorganized company upon a finding that their equity is without value because the earnings

of the Debtor would not support a capital structure large enough to include them. . . ." (Page 8),

(c) ". . . If the opinion of the court below is to be construed as requiring an independent determination by the District Court of all questions of valuation, despite an initial determination of such questions by the Commission, it constitutes, we believe, a serious misconstruction of the provisions of Section 77. . . ." (Page 9).

In its opinion approving the plan of reorganization certified by the Commission, the District Court (34 F. Supp. 493, 504), said:

> "The determination of the questions relating to the distribution of the new securities, including legal priorities and allocations, involves private rights and is a judicial function, within the province of the court. . . . I am wholly in accord with the conclusions reached by the Commission upon both issues and all matters incidentally related thereto. . . ." (R. 1597).

The District Court thereupon summarily adopted the conclusions of the Commission. The opinion of the Court below held that the duty of determining the values of certain items of property by the Commission had not been performed, in consequence of which "Lacking the requisite valuation data, the court was in no position to exercise the 'informed, independent judgment' which appraisal of the fairness of a plan of reorganization entails", (R. 2671) citing *Consolidated Rock Products Co. v. Du Bois*, 312 U. S. 510; *National Surety Co. v. Coriell*, 289 U. S. 426, 436; *First National Bank v. Flershem*, 290 U. S. 504, 525; *Case v. Los Angeles Lumber Products Co.*, 308 U. S. 106, 115. The opinion of the Court below is altogether consistent with the statute, Subsection (e) of which provides that "If it shall be necessary to determine the value of any property for any purpose under this section,

the Commission [Interstate Commerce] shall determine such value and certify the same to the court in its report on the plan." The opinion of the Circuit Court of Appeals, Ninth Circuit, recognizes that the duty of determining the value of any property for any purpose under Section 77 rests initially on the Commission, and not on the court, but such determination must, however, include a valuation of the entire enterprise, after which the court must "exercise its own independent judgment; and this is true whether such determination relates to value or to some other subject." Such clear-cut findings or values are essential to the intelligent approval of the plan.

The Court below has no quarrel with the findings of the Commission so far as it has gone, its opinion intimating that it failed to go far enough in valuing all items of property, some sixteen of which the opinion enumerates, which under the statute it is its duty to determine and which the court found was not performed. Furthermore, the opinion of the Court below is not, as alleged by petitioner, contrary to the views expressed by this Court in *Palmer v. Massachusetts*, 308 U. S. 79, 87. Admittedly, a proceeding under Section 77 is not an ordinary proceeding in bankruptcy, but "is a special proceeding which seeks only to bring about a reorganization, if a satisfactory plan to that end can be devised." *Continental Illinois Natl. Bank & Trust Co. v. Chicago R. I. & P. Ry. Co.*, 294 U. S. 648, 676. Insisting, as it does, upon a finding of values by the Commission before the District Court can exercise an "informed, independent judgment" the decision of the Court below does no more than to follow the principle enunciated by this Court in the *Palmer* case that "The judicial process in bankruptcy proceedings under § 77 is, as it were, brigaded with the administrative process of the Commission."

From the foregoing this respondent claims there is no special or important reason for granting the writ to review the issues raised in (a) and (c) above which are not among those reasons outlined in paragraph (5) of Rule 38.

In paragraph (b) above, petitioner contends that the decision below is in square conflict with the decision of the Circuit Court of Appeals for the Seventh Circuit in *Matter of Chicago, Milwaukee, etc., Railroad Company*, 124 F. (2d) 754. The decisions of both Courts were arrived at in the light of the *Consolidated Rock Products* case, *supra*, resulting in disapproval of both plans because of lack of findings by the Commission on "all vital issues, controverted and uncontroverted" which must include "values of properties separately considered and also of Debtor's property as a whole. Findings must cover values of liens to be surrendered and values of securities given in exchange. . . . The findings must be sufficiently complete on these matters, that the court may, from its examination, ascertain whether full compensation has been made for the entire bundle of rights which each of the creditors is called upon to surrender." *Matter of Chicago, Milwaukee, etc., Railroad Company, supra.*

The only difference between the two decisions is that in the *Milwaukee* case the Court was "satisfied that the evidence supports the finding of the Commission approved by the District Court 'that the equity of the holders of the debtor's preferred stock and its common stock has no value'." The fact that in the *Milwaukee* case the Court was satisfied with the Commission's findings as to a lack of equity for the stockholders, it does not follow that because the Court below left this question open until the Commission had determined the value of those units of property which it felt it had not done there is necessarily a conflict in the decisions of the two cases. Likewise with respect to the decision of the Court in *Matter of Chicago and North Western Ry. Co.* (unreported) (referred to on Page 8 of petitioner's application) where the same Court as in the *Milwaukee* case affirmed the order of the District Court confirming the plan of reorganization. In the *Northwestern* decision the Court affirmed the order of the District Court

confirming the plan not because the Commission had made specific findings of value, but

> "It is a question of whether the report of the I.C.C., which was full and complete, fair and open, but lacking in one respect, — failure to make specific findings of values, — may, or should, be approved without said findings. In fact, the issue may be stated even more strongly against the minority. Does not the vote of approval supply the proof that the report of the Commission contained the evidence, and the Commission's finding sufficiently states the facts, to justify us in holding that separate and more detailed findings are unnecessary? We think it does."

Because the creditors had almost unanimously voted approval of the plan the Court differentiated between the two cases by holding that said vote of approval

> ". . . was an equivalent of a waiver of more specific findings by all who approved the plan. . . ."

While respondent may disagree with the reasoning of that Court, and, therefore, its conclusion, in the matter of approving the plan as fair and equitable because "all the creditors of each group who have voted, are overwhelmingly in favor of it", and obviously offered as a means of terminating these lengthy proceedings, the soundness or unsoundness of the reasoning does not present a conflict with the decision of the Court below. Here we have decisions of two Circuit Courts of Appeal both holding a lack of specific findings by the Commission, one of which waives the requirement of specific finding because the creditors voted acceptance of the plan, a situation which did not obtain with respect to the other. Where then is the conflict with respect to the duties of the Commission under the statute?

The decision admits that there was a failure by the Commission "to make specific findings of values." Being realistic because the various groups of creditors had agreed to support the plan, it does not follow that the decision is in conflict with that of the Court below.

Contrary to what petitioner alleges to be a conflict, the decisions in all these cases follow the provisions of the statute with respect to the duties and obligations imposed upon the Commission and the District Courts. Nor is there any other ground in petitioner's application which may not have been answered herein that would justify this Court in granting the writ of certiorari.

CONCLUSION

It is respectfully submitted, therefore, that the questions raised in Petition No. 989 have been answered with finality by the decisions of this Court in *Consolidated Rock Products Co. v. Du Bois, supra*; that no conflict exists between the decisions of any of the Circuit Courts of Appeal under Section 77; that there is no special or important reason for granting petition for certiorari and, therefore, petitioners application should be denied.

Respectfully submitted,

EDWARD G. BUCKLAND,
WILLIAM J. KANE,
Attorneys for The Railroad Credit Corporation, Respondent.

Dated: March 24, 1942.

Opinions below	2
Jurisdiction	2
Statement of the case	2
The Reorganization Plan	3
Action of the courts below	5
The properties in dispute	7
Specification of errors intended to be urged	9
Summary of argument	10
I. Determination of the property on which creditors respectively hold liens is fundamental to the enforcement of the absolute priority doctrine laid down by this Court	11
II. The rolling stock acquired under lease or equipment-trust agreement is free from the First Mortgage and subject to the prior lien of the Refunding Mortgage	16
The equipment-trust clause	18
The general rule of strict construction of after-acquired property clauses	20
The First Mortgage clearly does not cover the equipment-trust rolling stock	21
The Commission's interpretation of the equipment-trust clause was erroneous	23

PAGE

The practical interpretation shows that the First Mortgage was not considered to cover equipment-trust rolling stock 26

Other cases on equipment-trust clauses confirm the Refunding Mortgage Trustee's contention 27

III. The First Mortgage Trustees can sustain no claim under the replacement clauses of the First Mortgage which materially affects the rights of Refunding Mortgage Trustee in the equipment-trust rolling stock 32

The equipment covenants apply only to equipment that has been worn out, destroyed or disposed of 34

The equipment covenants cannot be satisfied by rolling stock subject to equipment-trusts 35

The equipment covenants relating to replacement are not self-executing 36

IV. The Northern California Extension is subject to the lien of the First Mortgage only to the extent of the First Mortgage Bonds used in the acquisition thereof. Otherwise it is subject to the prior lien of the Refunding Mortgage..... 40

Facts 40

No supplemental indenture subjecting Extension to First Mortgage 43

Limitations on after-acquired property clauses 44

Argument 45

There is no equitable basis for giving the First Mortgage a lien on the Extension beyond the amount which it contributed towards its construction 46

PAGE

V. The Refunding Mortgage creditors are entitled to additional securities in recognition of their interests in free assets of the Debtor 51

Supreme Court of the United States

OCTOBER TERM 1942

No. 61

IN THE MATTER

of

THE WESTERN PACIFIC RAILROAD COMPANY, a corporation,

Debtor.

IRVING TRUST COMPANY, as Substituted Trustee under the General and Refunding Mortgage of The Western Pacific Railroad Company,

Petitioner,

against

CROCKER FIRST NATIONAL BANK OF SAN FRANCISCO and SAMUEL ARMSTRONG, as Trustees under The Western Pacific Railroad Company First Mortgage dated June 26, 1916, et al.,

Respondents.

BRIEF OF PETITIONER, IRVING TRUST COMPANY, AS REFUNDING MORTGAGE TRUSTEE

This case is before this Court on writ of certiorari granted April 27, 1942, directed to the United States Circuit Court of Appeals for the Ninth Circuit, to review the decree of said Circuit Court of Appeals rendered November 28, 1941 (R. 2675), as amended by decree on rehearing rendered

February 16, 1942 (R. 2681), which decree reversed an order of the United States District Court for the Northern District of California entered August 15, 1940 (R. 1569) approving a plan of reorganization for the Debtor under Section 77 of the Bankruptcy Act.

Opinions below

The opinion of the District Court, dated August 15, 1940 (R. 1569), is reported in 34 F. Supp. 493.

The opinion of the Circuit Court of Appeals, dated November 28, 1941 (R. 2663), is reported in 124 F. (2d) 136. No opinion was rendered on rehearing.

Jurisdiction

The jurisdiction of the Court is invoked under Section 240-a of the Judicial Code, as amended by Act of Congress of February 13, 1925 (U. S. Code, Title 28, Section 347-a).

Statement of the case

The decree under review was entered in a proceeding for reorganization of the Debtor, a railroad company, pursuant to Section 77 of the Bankruptcy Act.

Petitioner, Irving Trust Company, is Trustee under the Debtor's General and Refunding Mortgage dated as of January 1, 1932, having been substituted as such Trustee on November 13, 1936 (R. 1053) during the course of hearings before the Interstate Commerce Commission on various proposed plans of reorganization. (Such mortgage is hereinafter called the "Refunding Mortgage", and petitioner is hereinafter called the "Refunding Mortgage Trustee".)

This petition relates to the relative liens of the Refunding Mortgage and the First Mortgage of the Debtor upon

very important properties—the extent of their relative liens being essential in determining the proper allocation of new securities to be issued under the reorganization plan.

The lien questions were not passed on by the Circuit Court of Appeals, although they were presented by the Refunding Mortgage Trustee's appeal. The review on this petition therefore relates both to the question whether the Circuit Court of Appeals erred in failing to decide the lien questions, and to the question whether the District Court erred in respect of the merits of the lien questions.

Bonds outstanding under the Refunding Mortgage aggregate $18,999,500 principal amount (R. 1053), and all of them are pledged, in varying amounts, with three creditors of the Debtor, namely, A. C. James Company, Railroad Credit Corporation, and Reconstruction Finance Corporation.

The Refunding Mortgage is a lien on substantially all the property of the Debtor (R. 1231-46).[1] The lien of the Refunding Mortgage is subject "in so far, *but only in so far*[2] (in extent, degree of priority or otherwise), as in law the same respectively may attach" (R. 1245) to the First Mortgage of the Debtor dated June 26, 1916, under which there are outstanding approximately $50,000,000 principal amount of bonds (R. 1047).

The Reorganization Plan

Evidence respecting the relative liens of the two mortgages on various parcels of property was introduced before the Interstate Commerce Commission. This evidence gave

---

[1] The granting clauses of the Refunding Mortgage are printed in the record at the pages indicated. The balance of the Mortgage (I. C. C. Ex. 6) is not printed, but constitutes part of the record, which may be referred to, by stipulation (R. 2612-25).

[2] Italics throughout the brief are supplied by counsel, unless otherwise indicated.

rise to legal issues, which had not been presented to the court for decision before the Commission hearings, the present Refunding Mortgage Trustee not having been appointed until after the proceedings in the Commission were under way.

The Commission made a preliminary decision of the legal issues presented by such evidence, although stating that "final adjudication of this and similar questions must be made by the court" (R. 262). Its original report overruled all the Refunding Mortgage Trustee's contentions and stated that the First Mortgage bondholders should be "considered as having a first lien upon practically all the assets of the Debtor" (R. 267). In consequence, such Report provided for the issuance of nothing but common stock to the creditors secured by Refunding Mortgage bonds (R. 278)—except as the R. F. C. was offered special treatment, on a parity with First Mortgage Bondholders, in consideration of its purchase of new bonds of the reorganized company.

Following a petition for modification filed by the Refunding Mortgage Trustee, the Commission, in a supplemental report, recognized that cash deposited with the Refunding Mortgage Trustee, and certain securities of Tidewater Southern Railway Company (a subsidiary of the Debtor) which were admittedly subject to the Refunding Mortgage as a first lien, had substantial value, and directed that the holders of Refunding Mortgage bonds be awarded, in consideration thereof, new income mortgage bonds in the amount of $732,010 and new participating preferred stock of a par value of $1,147,955 (R. 315).

Under the Plan as so modified, the three pledgees of Refunding Mortgage bonds would thus receive, in addition to cor mon stock, varying amounts of such new income mortgage bonds and new participating preferred stock, the allocation of such new securities being made in proportion to the amount of Refunding Mortgage bonds which each creditor holds in pledge (R. 315),—subject to the aforesaid special provisions for the R. F. C. in consideration of its purchase of new bonds (R. 312, 316).

The total principal amount of debts secured by Refunding Mortgage bonds aggregates $10,257,580.76 (R. 1953-57), so that the new income mortgage bonds awarded by the Commission amount to approximately 7% of the principal debt, and the new participating preferred stock to approximately 11% of such debt; these ratios are still far below those allotted to First Mortgage bondholders, namely 40% of the principal of their debt in new income mortgage bonds and 60% of such debt in new participating preferred stock (R. 390-91).

The Refunding Mortgage Trustee is not concerned with the distribution of the new income mortgage bonds and participating preferred stock as between the three Refunding Mortgage creditors, but only with its claim that the Refunding Mortgage is a first lien on additional properties, in respect of which senior securities should also be issued. On this lien question the Refunding Mortgage creditors have relied upon the Trustee, and at least two of them have specifically requested it to obtain review of the decision by this Court.

The Reconstruction Finance Corporation, although it supported the Plan proposed by the Interstate Commerce Commission, has waived none of its rights as a holder of Refunding Mortgage bonds in the event of a favorable determination concerning the relative liens of the First Mortgage and the Refunding Mortgage (R. F. C. Brief in Circuit Court of Appeals, p. 8).

Action of the courts below

The Refunding Mortgage Trustee filed, in the District Court, objections to the Plan (R. 974-79), alleging that the Plan was unfair in failing to award any senior securities to the Refunding Mortgage creditors in recognition of the prior lien which the Trustee claimed upon:

> (1) The Debtor's equity in rolling stock subject to lease, conditional sale agreement or equipment trust; and

(2) A proportionate interest in the Debtor's newly constructed Northern California Extension; and

(3) The undisputed first lien of the Refunding Mortgage upon securities of Central California Traction Company and Alameda Belt Line; and

(4) Their additional rights, in common with general creditors, against non-carrier real estate.

The detailed basis of these objections is left for a later portion of the brief.

The District Court made no independent discussion of the merits of the Refunding Mortgage Trustee's objections with respect to the distribution of new securities, but simply stated, with reference to the capitalization of the new Company as well as the distribution of new securities, that "I am wholly in accord with the conclusions reached by the Commission upon both issues and all matters incidentally related thereto. It seems to me that further discussion would be superfluous" (R. 1597). The Refunding Mortgage Trustee appealed from the District Court's decree approving the Plan, and set forth in its Statement of Points all the lien issues already mentioned (R. 1652-53). The Circuit Court of Appeals, in its opinion, did not discuss the legal questions of conflicting lien and made no determination of the merits of the Refunding Mortgage Trustee's appeal. On the contrary, it ruled that the Refunding Mortgage Trustee was not adversely affected by the Plan, and consequently that it was not entitled to appeal (R. 2668; 124 F. (2d) at 138).

The decree of the Circuit Court of Appeals, entered November 28, 1941, accordingly dismissed the appeal of the Refunding Mortgage Trustee without consideration of the issues presented (R. 2675).

Thereafter, on petition for rehearing filed by the Refunding Mortgage Trustee, the Circuit Court of Appeals set aside (R. 2681) that portion of the decree holding that

the Refunding Mortgage Trustee was not entitled to appeal, but still failed to decide the questions raised by its appeal.

As appears from the other petitions filed in this proceeding, the Circuit Court of Appeals, on the appeals of other creditors, reversed the judgment of the District Court approving the Plan of reorganization, and suggested that the proceeding be referred back to the Interstate Commerce Commission for further action (R. 2674) to determine necessary questions concerning valuation, including

> "The value of (1) the property subject to the refunding mortgage only and (2) the property subject both to the refunding mortgage and to the first mortgage" (R. 2670; 124 F. (2d) at 139).

The properties in dispute

The issues presented by the Refunding Mortgage Trustee in the Circuit Court of Appeals related to the following four major items of property:

1. The Debtor's equity, amounting to approximately $6,000,000 (R. 1074), in equipment purchased under lease, conditional sale, or equipment trust (R. 1244-45). Petitioner's contention is that a proper construction of the two mortgages shows that such equity is expressly free from the lien of the First Mortgage and expressly subject to the lien of the Refunding Mortgage.

2. The Northern California Extension, a branch line running from Keddie to Bieber, which was built at a cost of more than $10,000,000 (R. 1053) and is one of the most profitable portions of the Debtor's road. Petitioner's contention is that the Extension is subject to the First Mortgage only to the extent of the $5,000,000 of First Mortgage money which was used in its construction, and that otherwise it is subject to the prior lien of the Refunding Mortgage, under which the balance of its cost was financed.

3. The securities of Central California Traction Company and Alameda Belt Line, on which it is not disputed

that the Refunding Mortgage is a first lien. The Interstate Commerce Commission did not find the value of these securities, but stated that, because of apparent operating deficits of the companies, the lien on the securities had "no material value" (R. 315). Petitioner's contention is that under the undisputed evidence the Interstate Commerce Commission and the District Court were wrong in treating the lien on these securities as having no value, and that the Refunding Mortgage creditors are entitled to compensation for being deprived of their right to foreclose on and sell these securities.

The Circuit Court of Appeals stated that the Interstate Commerce Commission should find the value of the property subject to the Refunding Mortgage (R. 2670). This will compel a specific valuation of the Central California Traction and Alameda Belt Line securities, which the Commission has not yet undertaken. Consequently, if the decision of the Circuit Court of Appeals stands, the error in respect of these securities will be corrected. If this Court, however, should adopt any different principle of decision from that laid down by the Circuit Court of Appeals, it would become necessary to consider the effect of the lack of findings concerning the value of these securities, as well as the Trustee's claim that the evidence shows that they have substantial value.

4. Non-carrier real estate of the Debtor, together with cash and receivables on hand at the date of the institution of the reorganization proceedings. Petitioner claims that these items are free from both the First Mortgage and the Refunding Mortgage, and must be given consideration, as unmortgaged property, in the allocation of securities to the Refunding Mortgage creditors as well as the First Mortgage creditors in the event it is found that they are not fully secured.

If the contentions advanced by the Refunding Mortgage Trustee with respect to the first 3 items above are sustained, however, the Refunding Mortgage will be fully

secured, and the Refunding Mortgage creditors should receive the same treatment as the First Mortgage creditors.

The facts relating to the several lien questions are so distinct from each other and from the primary question of the error of the Circuit Court of Appeals in leaving the lien questions undecided that the interest of clarity will be served by reserving the statement of such facts to the separate points in the argument.

Specification of errors intended to be urged

The Circuit Court of Appeals erred:

1. In remanding the proceeding to the Interstate Commerce Commission for determination of the value of the property subject to the liens of the various mortgages without making a final adjudication of legal questions squarely and properly presented to it concerning the extent of the liens of such mortgages;

2. In leaving undetermined, upon review of objections to the reorganization plan, questions of law squarely and properly presented to it affecting the priority of lien on over $12,000,000 worth of the Debtor's property;

3. In failing to hold that rolling stock acquired by the Debtor with free funds under equipment-trust agreements was free from the lien of the Debtor's First Mortgage and subject to the prior lien of the Refunding Mortgage;

4. In failing to hold that the Northern California Extension is subject to the lien of the First Mortgage only to the extent of the First Mortgage bonds used in the acquisition thereof, and that otherwise it is subject to the prior lien of the Refunding Mortgage; and

5. In failing to hold that the non-carrier real estate (including the Islais Creek property) is free from both the First Mortgage and the Refunding Mortgage and should be given consideration, as unmortgaged property, in the allocation of securities to the Refunding Mortgage creditors.

Summary of Argument

I. Determination of the property on which creditors respectively hold liens is fundamental to the enforcement of the absolute priority doctrine laid down by this Court.

II. The rolling stock which was acquired under lease or equipment-trust agreement is free from the First Mortgage and subject to the prior lien of the Refunding Mortgage.

The general rule of strict construction is applied to after-acquired property clauses.

The First Mortgage clearly does not cover the equipment-trust rolling stock.

The Commission's interpretation of the equipment-trust clause of the First Mortgage was erroneous.

The practical interpretation shows that the First Mortgage was not considered to cover equipment-trust rolling stock.

Other cases on equipment-trust clauses confirm the Refunding Mortgage Trustee's contention.

III. The First Mortgage Trustee can sustain no claim under the replacement clauses of the First Mortgage which materially affects the rights of the Refunding Mortgage Trustee in the equipment-trust rolling stock.

The equipment covenants apply only to equipment that has been worn out, destroyed or disposed of.

The equipment covenants cannot be satisfied by rolling stock subject to equipment-trusts.

The equipment covenants relating to replacement are not self-executing.

IV. The Northern California Extension is subject to the lien of the First Mortgage only to the extent of the First

Mortgage Bonds used in the acquisition thereof. Otherwise it is subject to the prior lien of the Refunding Mortgage.

No supplemental indenture subjecting Extension to First Mortgage.

Limitations on after-acquired property clauses.

There is no equitable basis for giving the First Mortgage a lien on the Extension beyond the amount which it contributed towards its construction.

V. The Refunding Mortgage bondholders are entitled to additional securities in recognition of their interest in free assets of the Debtor.

I

Determination of the property on which creditors respectively hold liens is fundamental to the enforcement of the absolute priority doctrine laid down by this Court.

The dismissal of the Refunding Mortgage Trustee's appeal was not requested by any party in the Circuit Court of Appeals. The standing of the Trustee to appeal was not questioned either in the briefs or in the argument before that Court. Nor, when the Court of its own motion had dismissed the appeal, did any party file a brief in opposition to the Refunding Mortgage Trustee's petition for rehearing.

It therefore appears necessary at this point only to outline the argument concerning the standing of a mortgage trustee and the duty of an appellate court to decide the issues presented by the mortgage trustee's appeal.

Not only does the Refunding Mortgage expressly authorize the Trustee "to take all steps needful for the protection and enforcement of its rights and the rights of the holders of the General and Refunding Bonds * * *" (I. C. C. Ex. 6, p. 136; see also pp. 135, 142-43, 148-49), but Section

77 of the Bankruptcy Act expressly provides that a mortgage trustee "shall have the right to be heard on all questions arising in the proceedings" (Section 77(c)(13)). Moreover, Rule 17(a) of the Rules of Civil Procedure for the District Courts of the United States permits a trustee to be a party in its own name to any action.

The power and duty of mortgage trustees to protect the mortgage security has been recognized also in many court decisions.

> *Hascall* v. *Wilcox*, 115 U. S. 598, 599-600;
> *Old Colony Trust Co.* v. *Wichita*, 123 Fed. 762, 767 (C. C. Kans.), aff'd. 132 Fed. 641 (C. C. A. 8);
> *Equitable Trust Co.* v. *Denney*, 24 F. (2d) 169, 170 (C. C. A. 7th);
> *Seaboard Nat. Bank* v. *Rogers Milk Products Co.*, 21 F. (2d) 414, 418-19 (C. C. A. 2nd).

The holders of Refunding Mortgage bonds expressly relied upon the Refunding Mortgage Trustee in this case to present the issues respecting the relative liens of the First Mortgage and the Refunding Mortgage. Thus, counsel for the Railroad Credit Corporation stated at the hearings before the Interstate Commerce Commission in 1936:

> "We have relied on counsel for the Trustee to make the case. We have not made the effort to do it ourselves, as to priority." (I. C. C. Min. 550-51)

The A. C. James Co., in its objections in the District Court, referred only briefly to the lien questions, stating (R. 911):

> "In this connection your petitioner concurs in the objections filed herein by the Irving Trust Company as substituted Trustee under the General and Refunding Mortgage."

And the R. F. C., in its brief in the Circuit Court of Appeals, pointing out that it waived none of its rights as a holder of Refunding Mortgage bonds in the event of a favorable determination of the lien questions, stated:

"This will be presented in the briefs of the respective Mortgage Trustees." (Brief, p. 8)

The Circuit Court of Appeals, therefore, should have determined the lien questions on the merits, under the rule stated in *The Bay of Naples*, (48 Fed. 737, 738 C. C. A. 2nd):

> "When the law gives a party a right to appeal, he has the right to demand the conscientious judgment of the appellate court on every question in the case."

This Court has held that it is reversible error to refuse to make a finding one way or another on a question of fact material to the determination of the case. (*The "Francis Wright"*, 105 U. S. 381, 387; *Merchants Insurance Co.* v. *Allen*, 121 U. S. 67, 71.) The same principle should apply to the decision of questions of law raised on appeal.

Determination of the property on which each group of creditors holds liens is fundamental to the enforcement of the doctrine of absolute or full priority pronounced by this Court in *Northern Pacific Railway Company* v. *Boyd*, 228 U. S. 482, and reaffirmed in *Case* v. *Los Angeles Lumber Co.*, 308 U. S. 106, 122.

In one of this Court's most recent decisions on the fairness of reorganization plans (*Consolidated Rock Products Co.* v. *duBois*, 312 U. S. 510), the necessity of such a decision was emphatically stated in the following language:

> "In the first place, there must be a determination of what assets are subject to the payment of the respective claims. This obvious requirement was not met" (p. 520).

And again (pp. 524-25):

> "There is another reason why the failure to ascertain what assets are subject to the payment of the Union and Consumers bonds is fatal. There is a question raised as to the fairness of the plan as respects the bondholders *inter sese*. * * * some appropriate formula for at least an approximate ascertainment of their respective assets must be designed in spite of the difficulties occasioned by the commingling."

The opinion of the Circuit Court of Appeals in this very case recognizes the principle of the *Rock Products* opinion, and expressly points out that the determination of the property on which each mortgage is a lien is an essential preliminary to the findings of value which it held the Commission should have made. The opinion below on this point reads as follows:

> " * * * to determine the value of the refunding bonds, it was necessary to determine the value of (1) the property subject to the refunding mortgage only and (2) the property subject both to the refunding mortgage and to the first mortgage now outstanding. *This, of course, necessitated a determination as to which of the debtor's property is, and which is not, subject to each mortgage.* Consolidated Rock Products Co. *v.* duBois, supra" (R. 2670).

Clearly, and beyond dispute, the lien questions are questions of law, which should have been decided by the Court and not remanded to the Commission. The Commission recognized this when it stated, in its report on the present Plan:

> "While final adjudication of this and similar questions must be made by the Court, it becomes our duty, in the absence of such adjudications, to determine them preliminarily for the purpose of consideration of the plans before us" (R. 262).

The District Court likewise recognized it when it stated (R. 1597):

> " * * * The determination of the questions relating to the distribution of the new securities, including legal priorities and allocations, involves private rights and is a judicial function, within the province of the court."

We are confident, therefore, that this Court will rule that the lien question should be decided before any further proceedings are had with respect to the reorganization plan. The only question is whether this Court will decide the questions itself or remand them to the Circuit Court of Appeals (*cf. Grant* v. *Leach & Co.*, 280 U. S. 351).

This Court has power, on certiorari, to dispose of all questions presented by the record

Story Parchment Co. v. *Paterson Parchment Paper Co.*, 282 U. S. 555, 567-68;

Donovan v. *Pennsylvania Company*, 199 U. S. 279, 292;

Delk v. *St. Louis & San Francisco R. R.*, 220 U. S. 580, 588-89.

While this Court might remand the case to the Circuit Court of Appeals for further hearing, even on the same briefs which were submitted previously, this would create delay that can be obviated if this Court itself decides the lien questions,—as its general grant of certiorari indicates a willingness to do. The policy of expediting railroad reorganization (*Continental Illinois National Bank* v. *Chicago, Rock Island & Pacific Railway*, 294 U. S. 648, 685) likewise supports this request.

The principal respondents on this petition, the First Mortgage Trustees, are in agreement with us, we believe, in requesting this Court to decide the lien issues itself. This is indicated by the statement in their petition (October Term, 1941, No. 820):

> "6. In omitting to discuss all of the issues which were before the Circuit Court of Appeals, the decision of the Circuit Court of Appeals has left unanswered many important questions, affecting virtually every feature of the Commission Plan. An authoritative determination of all of these questions is essential to the final approval of a plan of reorganization. Unless these questions are settled by this Court, they are likely to become the subject of further litigation, which will result in further and unnecessary delay and expense to the parties concerned.
>
> * * * * *
>
> To the end that these reorganization proceedings, which have been pending since 1935, may be speedily determined, the petitioners respectfully pray that this Court review the entire case upon the entire record and determine all of the questions involved" (pp. 9-10).

II

The rolling stock acquired under lease or equipment trust agreement is free from the First Mortgage and subject to the prior lien of the Refunding Mortgage.

Neither the initial payment nor any subsequent payment for the rolling stock claimed by the Refunding Mortgage Trustee (hereinafter called "equipment-trust rolling stock") was made out of proceeds of First Mortgage bonds or out of cash deposited under the First Mortgage; all such payments were made either from free funds of the Debtor or from funds derived by pledge of Refunding Mortgage bonds (R. 1073-74).

The equipment-trust rolling stock includes 27 locomotives, 3,626 freight cars of various types, and 48 passenger cars (R. 1071-73). This equipment was originally purchased under, and was subject at the time of the institution of the reorganization proceedings to, Equipment Trust Agreements Series B, C, and D and the Baldwin Locomotive lease (R. 1068-69). Each equipment-trust agreement stated that the equipment was "let and leased * * * to the railroad company" by the trustee under the agreement, and that title was vested in said trustee (Ex. 108, lease p. 2—not printed*), but that it would become the Debtor's property upon final payment. The Baldwin Locomotive lease (Ex. 109) similarly provided that the locomotives covered thereby were leased to the Debtor with title reserved in the Lessor until the covenants of the lease were fully per-

* Pursuant to stipulation (R. 2612-26), which has been approved by this Court, certain exhibits and other papers which constitute part of the record on appeal were omitted from the printed record, with the understanding that they might nevertheless be referred to by any party in brief or argument. Exhibits which were printed are referred to herein by page in the record, unprinted exhibits by the number given them in the Commission or the District Court.

formed. Although there was no trustee under the Baldwin Locomotive lease, the equipment covered by it is included, for simplicity of expression, in the phrase "equipment-trust rolling stock" as used in this brief.

The amounts originally payable under the equipment-trust agreements and Baldwin Locomotive lease amounted to approximately $10,430,000 (R. 1048-49). Application of free funds and of money obtained from Refunding Mortgage creditors (R. 1055) had reduced the indebtedness to $2,682,598 (R. 1074) at the institution of the reorganization proceeding.

The value of the Debtor's equity in the equipment-trust rolling stock at the date of the institution of the proceedings was $6,163,838, after allowance for accrued depreciation (R. 1074).

Although the equipment-trust rolling stock was acquired for use on all the Debtor's lines of railroad, including those specifically described in the granting clauses of the First Mortgage, it was consistently described by the Debtor as not subject to the First Mortgage. In a series of listing statements filed with the New York Stock Exchange in connection with issues of First Mortgage bonds between 1926 and 1932, the Debtor, after describing the property on which the First Mortgage constituted a first lien, stated:

> "The foregoing equipment does not include additional *unmortgaged equipment* covered by equipment trust agreements Series B, Series C and Series D, as follows" (R. 1074).

On the other hand, the equipment-trust rolling stock was included each year in the lists of equipment subject to the Refunding Mortgage, which were furnished to the Refunding Mortgage Trustee in compliance with Article Five, Section 16 of the Refunding Mortgage (R. 1073).

Lists of mortgaged equipment were required by the First Mortgage to be furnished to the First Mortgage Trustees upon request (I. C. C. Ex. 5, p. 77). No evidence was of-

fered by the First Mortgage Trustees that the equipment-trust rolling stock had ever been described as subject to the First Mortgage in any statement furnished to them.

The equipment-trust clause

A specific exception, in the granting clauses of the First Mortgage, permits the acquisition of rolling stock by lease, conditional sale or equipment trust, free from the lien of the First Mortgage. This equipment-trust clause is significantly placed at the very end of the free funds paragraph (R. 1229). The free funds paragraph states that nothing in the mortgage shall limit the power of the company, by use of its credit or of free funds, to acquire equipment or other property free from the lien of the First Mortgage, provided such property does not come within one of four categories: (a) property acquired with the proceeds of First Mortgage bonds, (b) integral parts of the mortgaged railroad, (c) property acquired for use on the mortgaged railroad, or (d) stock of certain subsidiaries; and then concludes with the words, separated by a semi-colon into a complete and final clause, as follows:

> "*and* the Company may, *unless First Mortgage Bonds shall have been authenticated and delivered or their proceeds or other cash deposited hereunder paid out against the same*, purchase and acquire equipment, *free from the lien hereof*, by lease, conditional sale agreement or under any form of equipment trust, or purchase such equipment and issue obligations therefor secured by mortgage or pledge of such equipment superior to the lien of this indenture."

It will be noted that this equipment-trust clause repeats only one of the four provisos of the preceding free funds paragraph, namely, that First Mortgage bonds or their proceeds shall not have been paid out for the purchase of the equipment.

The equipment-trust clause of the Refunding Mortgage, on the other hand, although it begins in the same way, *is followed by a statement, without counterpart in the First Mortgage, placing the equity in such equipment under the Refunding Mortgage.* This statement reads:

> "*provided*, however, that, when and as and to the extent that the title to or any interest, legal or equitable, in rolling stock or equipment, however acquired, for use or used upon or in connection with the lines of railroad and property now or hereafter subject to this indenture, shall vest in the Company or in any successor company operating said lines of railroad and property free in whole or in part from such trust, mortgage or pledge, then the rolling stock or equipment or such interest therein as it becomes vested in the Company or such successor company shall become subject to the lien of this indenture" (R. 1244-45).

Comparing these two clauses, we find that equipment-trust rolling stock was freed in the first instance from the lien of both mortgages, but that immediately afterward, in the case of the Refunding Mortgage, the *equity* was placed back under the mortgage lien, whereas this was not done in the case of the First Mortgage. There would have been no point in expressly placing back the equity in equipment-trust rolling stock under the lien of the Refunding Mortgage if the preceding language of the equipment-trust clause as contained in the Refunding Mortgage (being the same language as contained in the First Mortgage) did not exclude it.

The facts outlined above are not open to controversy, and are not disputed. None of the equipment-trust rolling stock was owned by the Debtor at the time the First Mortgage was created. None of it was financed in any part with First Mortgage funds. No instrument or act of the Debtor ever expressly subjected it to the First Mortgage.

The question is therefore entirely one of the construction of the free funds clause and the equipment-trust clause

of the First Mortgage as applied to after acquired property. In deciding this question of construction the Court is free to draw on arguments from the logical meaning of the mortgage provisions as well as on canons of interpretation laid down by the courts of any jurisdiction.

The mortgage was executed in New York (I. C. C. Ex. 6, pp. 188-97). The mortgagor is a California corporation, and both the original Trustee and the substituted trustee are domiciled in New York. The mortgaged property is located or used within the States of California, Nevada and Utah (Ex. 6, p. 1). Neither party relies on any rules of law or construction which are peculiar to any of these jurisdictions.

In both New York and California the courts will look to the decisions of other common-law jurisdictions for a statement of the applicable law, where no controlling local decision exists:

Davis v. *Modern Industrial Bank*, 279 N. Y. 405, 411;
Lux v. *Haggin*, 69 Calif. 355, 379-380, 384-85;
Fletcher v. *Los Angeles Trust etc. Bank*, 182 Calif. 177, 183-84;
Adair v. *Beverly Hills Petroleum Corp.*, 59 F. (2d) 94 (S. D. Calif.).

The general rule of strict construction of after-acquired property clauses.

If there were room for doubt that the equipment-trust rolling stock is free from the First Mortgage, the doubt would be resolved by the rule that after-acquired property clauses must be strictly construed, and that property acquired after the execution of a mortgage will not be brought under its lien unless the intention so to do is expressed beyond dispute.

This rule was stated in *Cleveland Trust Co.* v. *Consolidated Gas, E. L. & P. Co.*, 55 F. (2d) 211 (C. C. A. 4) in the following words:

> "The great weight of authority sustains the rule of strict construction in interpreting 'after acquired property' clauses in a mortgage. To use the words of the court, in the case of Smith *v.* McCullough, 104 U. S. 25, 26 L. Ed. 637, the terms employed in describing the property mortgaged must 'imperatively demand' the construction contended for" (p. 214).

To the same effect are

Guaranty Trust Co. v. *Minneapolis & St. L. R. Co.*, 36 F. (2d) 747, 751 (C. C. A. 8);
Westinghouse Electric and Mfg. Co. v. *Brooklyn R. T. Co.*, 263 Fed. 532, 536 (C. C. A. 2).

Mr. Swaine, counsel for the Institutional First Mortgage Bondholders, recognized this rule when he stated before the Commission that it was part of his affirmative case to show what the First Mortgage lien is (R. 2303).

The First Mortgage clearly does not cover the equipment-trust rolling stock.

Not only has the burden resting upon the First Mortgage not been sustained, but the granting clauses of the two mortgages clearly and affirmatively show that the Refunding Mortgage (as is not disputed) is a lien on the equipment-trust rolling stock and that the First Mortgage is not.

The principal argument advanced by the First Mortgage Trustees for claiming that the equipment-trust rolling stock is subject to their Mortgage is that it was acquired for use on the mortgaged railroad and therefore should be excluded from the operation of the equipment-trust clause. However, this argument is not based on any express language of the equipment-trust clause, which, on the contrary, expressly fails to make any exception for equipment used on the mortgaged line. As a practical matter, the First Mortgage Trustees' argument would severely limit the

operation of the equipment-trust clause, since the only equipment to which the clause could apply, under their argument, would be equipment bought for use exclusively on after-acquired branches or extensions not financed with First Mortgage funds and which was never used on the main line. Such a limitation would be unreasonable, and also contrary to sound railroading practice, for efficient use of equipment requires that it be available for use on any portion of the railroad's property.

It will be noted that in the first part of the free funds clause (R. 1228-29) there are *four* limitations, one of which—(c)—is the limitation upon which the First Mortgage Trustees rely. However, it will also be noted that before the last sentence of the paragraph, and separated by a semicolon and the correlative conjunction "and" from the preceding clause, appears the separate clause covering equipment acquired under lease or equipment trust, and that this clause has only *one* limitation, relating to the use of First Mortgage bonds or deposited cash.

There would have been no point in repeating this one exception in the equipment-trust clause if it had been intended that all four of the limitations in the earlier paragraph apply to property acquired under the equipment-trust clause. Conversely, the statement of this one limitation makes it as clear as language can make it that the other limitations (including limitation (c), upon which the First Mortgage Trustees rely) do not apply to property acquired under the equipment-trust clause.

The absence of a provision, such as is contained in the Refunding Mortgage, to put the equity of the equipment-trust rolling stock under the lien of the First Mortgage only serves to emphasize what the language of the equipment-trust clause in the First Mortgage clearly expresses, namely, that "the Company may * * * acquire equipment, free from the lien hereof * * * under any form of equipment trust", provided only that it is not bought with proceeds of First Mortgage bonds.

The Commission's interpretation of the equipment-trust clause was erroneous.

The reason given by the Commission (R. 266), and adopted without comment by the District Court, for rejecting the Refunding Mortgage Trustee's claim was that treating such equipment as free from the lien of the First Mortgage would be inconsistent with the paragraph in the habendum clause of the First Mortgage which reads:

> "SUBJECT, HOWEVER, as to all equipment now owned to the equipment trust or conditional sale agreements secured thereon, and as to equipment hereafter acquired, to the equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby * * *."

The Commission argued (R. 266) that "If all equipment acquired under equipment trusts was to be entirely free of the first mortgage", the reference in the subject clause to a permitted lien on equipment-trust rolling stock could not be explained.

The basic error in this reasoning lies in the Commission's use of the word "all". The Refunding Mortgage Trustee has never argued that *all* equipment acquired under equipment trusts must be entirely free of the First Mortgage, but only that it is free of the First Mortgage if acquired without the use of First Mortgage Bonds or cash. As already quoted, the First Mortgage provides that such equipment-trust rolling stock should be free from the Mortgage

> "* * * *unless First Mortgage Bonds shall have been authenticated and delivered or their proceeds or other cash deposited hereunder paid out against the same* * * *" (R. 1229).

The Commission overlooked that the First Mortgage contemplates that rolling stock may be acquired under equipment trust either (1) with First Mortgage funds—

in which event the First Mortgage will be a lien thereon "subject * * * to the equipment trust or conditional sale agreements * * * permitted hereby", or (2) with free funds —in which event it will be "free from the lien hereof".

Other provisions of the First Mortgage (in clauses subsequent to the granting clause) expressly cover the use of First Mortgage funds for the purchase of property which is subject to equipment-trust or other prior liens. Purchase of equipment is one of the purposes for which First Mortgage Bonds or cash are expressly permitted to be used (Ex. 5, Art. Second, Sec. 2, Par. A, Clause (b), p. 41). Paragraph E of the same Section which covers issuance of Bonds for new equipment provides (Ex. 5, pp. 57, 58) that whenever the certificate delivered to the Trustees to draw down cash or bonds for the purchase of additional property "shall state the existence of any lien, charge or indebtedness", there shall be reserved from delivery First Mortgage bonds or cash equal to the face amount of such liens or charges, and provides that these shall be delivered only after the payment or redemption of such "liens, charges or indebtedness".

The "liens" or "charges" subject to which property may be purchased with First Mortgage funds include the lien of equipment-trust agreements, for paragraph G of the same Section defines the words "lien" and "charge" as used in that Section to include

> "deferred instalments of the purchase price of property in every case where title thereto has not been vested in the purchaser or, having so vested, is subject to a vendor's lien or any right of the seller to retake or enforce a charge upon such property upon default in the payment of such deferred instalments of the purchase price and also the *deferred payments to be made or rentals to be paid under any conditional sale agreement or lease or trust agreement covering equipment*" (Ex. 5, p. 60).

At least one example appears in the record of First Mortgage funds being drawn down for the purchase of prop-

erty subject to liens, with the First Mortgage Trustees withholding the amount of such lien until satisfied that the lien had been discharged (R. 2549-2550).

In other words, there is a class of equipment-trust rolling stock to which the First Mortgage may attach, that is, equipment on which the down payments are made from First Mortgage funds.

Therefore the "Subject, however" clause can and should be given meaning without detracting from the plain language of the equipment-trust clause, which excludes equipment-trust rolling stock from the lien of the First Mortgage if not financed with First Mortgage funds.

The interpretation urged by the Refunding Mortgage Trustee gives effect to every part of the First Mortgage granting clauses. Property may be acquired under equipment trust or conditional sale by the use of First Mortgage funds, and it will then be under the First Mortgage, but subject to the prior lien of the equipment trust "as permitted hereby" (First Mortgage, I. C. C. Ex. 5, p. 22). Or it may be acquired by equipment trust or conditional sale without the use of First Mortgage funds, and then it will be "free from the lien" of the First Mortgage.

On the other hand, the interpretation which the District Court approves gives no effect to the provision of the First Mortgage that equipment-trust rolling stock is free from the Mortgage lien "unless First Mortgage Bonds shall have been authenticated * * * against the same", for it makes the lien applicable to all equipment-trust rolling stock whether or not it is purchased with First Mortgage funds. Furthermore, such an interpretation would make unnecessary the express language of the Refunding Mortgage which subjects the equity in such equipment to the Refunding Mortgage.

The Refunding Mortgage Trustee's interpretation is therefore supported not only by the rule of strict construction of after-acquired property clauses, but also by the rule laid down in the following authorities, that a construction

which gives effect to all provisions of an instrument is preferable to one which nullifies the meaning of any portion:

Westinghouse Electric & Mfg. Co. v. *Brooklyn R. T. Co.*, 276 Fed. 152, 158 (S. D. N. Y.);
Canadian Northern Ry. Co. v. *Northern Mississippi Ry. Co.*, 209 Fed. 758, 761-2 (C. C. A. 8);
E. I. Du Pont De Nemours & Co. v. *Claiborne-Reno Co.*, 64 F. (2d) 224, 228 (C. C. A. 8);
2 Williston, Contracts (Rev. Ed.), Sec. 619.

The practical interpretation shows that the First Mortgage was not considered to cover equipment-trust rolling stock.

As shown in the statement of facts, the Debtor repeatedly indicated its understanding that the equipment-trust rolling stock was subject to the Refunding Mortgage but free from the lien of the First Mortgage, not only by listing it as so subject in reports furnished to the Refunding Mortgage Trustee and omitting any similar reports to the First Mortgage Trustees, but by express description thereof in listing statements, prior to the issuance of the Refunding Mortgage, as "additional *unmortgaged* equipment covered by equipment trust agreement" (R. 1074).

The First Mortgage Trustees have disputed the relevancy of the listing applications, on the theory that they are not binding upon the First Mortgage bondholders. This position is not justified. Stock Exchange listing applications are prepared contemporaneously with the issuance of the bonds covered thereby, are filed as the basis for obtaining a nation-wide market for such bonds, and constitute a public summary of the conditions affecting such bonds, which are available to every bondholder and which are among the sources of general information concerning such bonds.

The use of listing statements as a source of interpretation was approved by this Court in *Continental Insurance Co.* v. *United States*, 259 U. S. 156, 180, where it stated that not only was the corporation which filed the statement the

representative of the security holders (stockholders in that case), but that the statement

> "has the additional weight of a representation to future purchasers of the two classes of stock as to the kind of interests they were buying in the Company" (259 U. S. at 181).

Other cases on equipment-trust clauses confirm the Refunding Mortgage Trustee's contention.

In two other cases similar mortgage covenants have been construed, and in both cases the result clearly supports the claim of the Refunding Mortgage Trustee. One case is a decision by Judge Sanborn in the first *Wabash Receivership* (unreported, but printed in the record herein—R. 1721-34), and the other is a recent decision by Judge Wilkerson in the *Rock Island Reorganization* (also unreported).

1. The decision of Circuit Judge Sanborn, rendered November 7, 1921, in the United States District Court for the Eastern District of Missouri in *The Equitable Trust Co.* v. *Wabash Railroad Co.* (In Equity No. 3977), held that certain after-acquired locomotives purchased under equipment-trust agreements did not come within the language of the granting clauses of the Wabash Refunding Mortgage; and then went on to hold that even if they were covered they were taken out from under the mortgage by the exception clause. The Wabash Refunding Mortgage included by reference the property which was subject to

underlying mortgages, one of which, like the First Mortgage in this case, covered all after-acquired property "used" "in connection with" the mortgaged railroads (R. 1725). Judge Sanborn held that in spite of this language the Wabash Refunding Mortgage was not intended to include the interest of the mortgagor in locomotives which were purchased after the date of such mortgage through equipment trusts. After so holding he stated:

> "But supposing that the paragraph quoted from the mortgage of July 1, 1889, is broad enough to cover the interest which the mortgagor secured in the seventy locomotives in October 1907 and thereafter under the equipment agreement; * * *. Nevertheless, it was competent for the parties to that mortgage, by a stipulation therein, to except that interest from the lien thereof." (R. 1727).

The free funds clause in that case read:

> "'But it is hereby covenanted and agreed that the Railroad Company reserves the right, except as in this indenture expressly otherwise provided * * * to acquire any stocks, bonds, securities and other property of any kind and description free from the lien of this indenture and any railroad, branch or extension and any stocks, bonds, securities and other property of any kind or description, acquired by the Railroad Company without the use of bonds or proceeds of bonds issued hereunder * * * shall, except as in this Indenture expressly otherwise provided, be free from the lien of this Indenture unless specifically subjected thereto by an instrument in writing * * *'." (R. 1728).

The discussion of this clause in the opinion attaches particular significance to its location at the end of the granting clause (the same position occupied by the equipment-trust clause of the Western Pacific First Mortgage). Judge Sanborn further stated:

> "But (1) if the granting parts of the mortgage fail to evidence an intention of the parties to subject after acquired locomotives, procured through equip-

ment trust agreements, to the lien of the refunding mortgage, they were not subjected thereto by the reservation paragraph, and the question presented by this contention becomes immaterial; (2), if, on the other hand the granting clauses do evidence such an intention, the position of the reservation paragraph in the mortgage after all the descriptions of the property granted and just before the habendum paragraph, its independent, clear and sweeping covenant in these terms 'but it is hereby covenanted and agreed that the railroad company reserves the right, except as in this indenture expressly otherwise provided, to acquire or construct any railway, branch, or extension and to acquire any stock, bonds and other property' not other property of the kinds therein described, but 'of any kind and description free from the lien of this indenture' etc., and the evident purpose of this paragraph to carry out thereby the intention expressed in the authorizing resolution seem to the court, to converge with almost compelling force to persuade that the construction which this contention seeks to apply to the reservation never was intended by the parties to it, * * *" (R. 1732-33).

The foregoing reasoning applies directly to the Western Pacific First Mortgage. It was competent for the parties to except the interest in equipment-trust rolling stock from the lien of the mortgage; and the position of the equipment-trust paragraph in the mortgage after all the description of the property and just before the habendum paragraph, together with its independent statement of the only exception to such freedom—namely, the use of First Mortgage funds in the acquisition of such equipment—prove with compelling force that the construction which the First Mortgage Trustees now claim was never intended by the parties to the Mortgage.

Judge Wilkerson's opinion was rendered on October 31, 1939, in the United States District Court for the Northern District of Illinois, in the *Chicago, Rock Island and Pacific Railway Company* reorganization. (See record in that case, pp. 2807-38.) It involved the construction of two

separate mortgages, each of which resembled the Western Pacific First Mortgage in important particulars. The first, the General Gold Bond Mortgage, referred in its granting clauses to equipment "*hereafter acquired* * * * *for use upon*" the mortgaged Railway, which is substantially the language upon which the First Mortgage Trustees here rely. It also contained a proviso in the following language, which closely resembles the general proviso in the Western Pacific First Mortgage:

> "'And *Provided,** further, that nothing in this indenture contained shall be construed to limit the right or power of the Railway Company, hereby expressly reserved, to own and hold, or in any manner, *except by the use of bonds secured by this indenture*, to construct or to acquire, by purchase or by lease, other lines of railway, branches or extensions, *or** equipment or interest therein, *or** new terminals, and to hold and to dispose of, any line or property so acquired, and to retain the proceeds thereof free from the lien of this indenture'" (CRI&P rec., p. 2817).

The Court overruled a contention that the words "or equipment or interest therein" in the proviso must be held to relate only to equipment not intended for use on the mortgaged railway, stating, among other things:

> "If the parties intended that only after-acquired equipment, obtained by the railway company on its own credit for use upon lines of railway not subject to the mortgage, should be excluded from the mortgage lien, there was no reason why that intention could not have been stated in clear and unmistakable terms. The intention should not be left to be determined by conjecture or inference if two provisions or clauses, not harmonious on their face, can be reconciled by allocating to each a separate field of operation that will not be in conflict with the other. That result follows by a determination that the after-acquired property clauses apply to equipment later

---

* Words followed by asterisk are italicized in the mortgage.

acquired to replace equipment no longer fit for service, and equipment acquired by the use of general mortgage bonds; and that equipment later acquired by the railway company on its own credit, without further qualification, is not subject to the mortgage lien." (CRI&P rec., p. 2821).

The other mortgage interpreted in the *Rock Island* case, was known as the First and Refunding Mortgage. The granting clauses covered equipment "appurtenant to" any of the mortgaged lines of railway (Opinion, CRI&P rec., p. 2822); and also property of every kind and description "acquired for use" upon the mortgaged lines (Opinion, CRI&P rec., p. 2826). It contained the following free property clause:

> "But nothing expressed or implied in this indenture is intended, or shall be construed, (a) to limit the right or power of the Railway Company, hereby expressly reserved, by the use of its credit, * * * or *in any manner other than by the use of bonds issued or to be issued under the provisions of * * * this indenture*, or their proceeds, to construct or acquire lines of railway, branches or extensions, or interests therein, or other property, free from the lien hereof:" (p. 2827).

The Court again held that the application of the free property clause was not limited to property acquired for use on lines free from the mortgage, stating:

> "But the suggestion is made that the words 'or other property' in the free property clause, if those words include equipment, should be construed to include only that equipment, acquired by the railway company with free money, that is purchased for use on other lines of railway, branches or extensions that have been acquired with free money, and are not, therefore, subject to the mortgage lien. No such limitation or restriction is to be found in the free property clause. * * *" (p. 2829).
>
> "* * * If the parties had so intended, there were numerous specific words and sentences that could have been used clearly to express such intention.

Without clear expression of such intention it is not proper to supply it by judicial determination where the language in dispute can be otherwise applied" (p. 2831).

The equipment-trust rolling stock has been shown to be free from the First Mortgage by the language of that Mortgage, by analysis of well-considered decisions, and by the practical interpretation of the properties. It is not disputed or disputable that it is subject to the Refunding Mortgage. Its value is so substantial that the creditors secured by Refunding Mortgage bonds are plainly entitled, on the basis of their lien on $6,000,000 worth of such equipment, to far better treatment than is given by the Plan,—which is based on their having only a second lien thereon.

III

The First Mortgage Trustees can sustain no claim under the replacement clauses of the First Mortgage which materially affects the rights of the Refunding Mortgage Trustee in the equipment-trust rolling stock.

The First Mortgage Trustees contended in the District Court (although no such contention had been made before the Commission) that even if the equipment-trust clauses excepted the equipment-trust rolling stock from the First Mortgage, it became subject to the First Mortgage by reason of the replacement provisions thereof.

Again the facts are undisputed. The net book value of equipment subject to the First Mortgage which has been retired or otherwise disposed of is only $442,287.* The

* The gross retirals to March 1, 1932, when the Refunding Mortgage became a lien, amounted to $690,912 (next-to-the-last sheet of Exhibit G to Stipulation of Facts not in Dispute—not printed), while equipment acquired with free funds (other than equipment-trust rolling stock), together with additions and betterments to the First Mortgage equipment from free funds, aggregated $248,625, (Exhibit G, 3d and 6th to 16th sheets).

First Mortgage Trustees, however, assert that they are entitled under the replacement clauses to have allocated to them from any free equipment a total book value equal to the aggregate accrued depreciation on equipment subject to the First Mortgage, which depreciation aggregates over $5,000,000 (Exhibit G to Stipulation of Facts not in Dispute).

The only two covenants in the First Mortgage imposing any obligation to acquire new equipment are restricted to equipment worn out, destroyed or disposed of. Article Fourth, Section 9 of the First Mortgage (Ex. 5, p. 76—not printed), contains a covenant (herein termed the "maintenance covenant") that all equipment subject to the Mortgage shall be marked so as to identify the same as subject thereto, and that the Company

> "will at all times keep such equipment in good order and condition, reasonable wear and tear excepted, * * * and will replace such of said equipment as shall be worn out or destroyed with other equipment of at least equal value on which this indenture shall constitute a first lien" (p. 76).

In Article Seventh, Section 5 of the First Mortgage (p. 111), there is also a provision (herein termed the "replacement covenant") permitting the Company "to dispose of" mortgaged equipment "free from the lien" of the Mortgage if it has "become unsuitable or unnecessary for use",

> "first or simultaneously replacing the same by new * * * equipment * * * of substantially equal value to the Company, which shall become subject to the lien of this indenture in like degree * * *" (p. 111).

The issue therefore is whether the replacement covenant or the maintenance covenant requires Debtor to supply new equipment annually to the extent (in cost) of the book-keeping charge made in that year for depreciation of existing equipment or only to the extent that existing equipment has been disposed of, worn out or destroyed. We believe the language of the instrument and the authorities clearly support the latter conclusion.

The equipment covenants apply only to equipment that has been worn out, destroyed or disposed of.

The maintenance covenant does not require any guarantee against depreciation, but on the contrary states only that the equipment is to be kept "in good order and condition, *reasonable wear and tear excepted*". This statement clearly relates to the repair of existing equipment, not the acquisition of new equipment. There is no allegation or proof of failure to comply with the covenant to keep the First Mortgage equipment in good repair. The second clause of the maintenance covenant contains a provision requiring replacement of such equipment "as shall be worn out or destroyed". This is not a covenant to provide new equipment before the old is worn out or destroyed; in fact it is clear evidence that no equipment need be acquired to satisfy the First Mortgage until the old equipment has been worn out or destroyed.

The replacement covenant relates to a case where the company has undertaken "to dispose of" mortgaged equipment which has "become unsuitable or unnecessary for use". There is no evidence that any First Mortgage equipment has been so disposed of, or has become unsuitable or unnecessary for use. Consequently, there is nothing to bring the replacement covenant into play.

From the above it is obvious that nothing in the equipment covenants justifies an interpretation that, to the extent of annual depreciation charges against equipment, the railroad must acquire new equipment in which it has an equity equal to the amount of such depreciation. Yet the substance of the First Mortgage Trustees' argument is that these carefully drafted covenants should be treated as if they imposed such an obligation.

The equipment covenants cannot be satisfied by rolling stock subject to equipment trusts.

Another feature of the covenants defeats the construction which the First Mortgage Trustees attempt to place on them. Both covenants require that the replacement items shall be subject to the first lien of the mortgage, which cannot be true in the case of rolling stock acquired under lease or equipment trust.

The maintenance covenant states that equipment that is worn out or destroyed must be replaced with other equipment "on which this indenture shall constitute a first lien". The replacement covenant requires that equipment which has been disposed of be replaced by new equipment "which shall become subject to the lien of this indenture in like degree". The company could not give anything better than a second lien on equipment-trust rolling stock, and therefore could not satisfy those covenants except by equipment which was bought free and clear. The First Mortgage Trustees could not properly (assuming, contrary to the fact, that any deficiency existed in respect of equipment) have accepted equipment-trust rolling stock as replacement of items worn out, destroyed or disposed of. *A fortiori*, they cannot claim such items after the lien of a new mortgage has attached to them.

Maintenance and replacement covenants similar to those in the Western Pacific First Mortgage were interpreted in accordance with our argument herein in *Chase National Bank* v. *Mobile & Ohio R. R. Co.* (S. D. Ala., Civil Action No. 56, Special Master's report filed March 25, 1940, confirmed June 14, 1940—not officially reported) where the special master stated:

> "* * * From my construction of the Montgomery Divisional Mortgage, the security demanded, insofar as it concerned rolling stock, was sufficient rolling stock to amount in value to the rolling stock orignally purchased, subject to wear and tear. The reason I

say subject to wear and tear is that *it was the intention of the parties replacements should not be made until items of rolling stock became unfit for use*, and the evidence shows that this happened at various times over a long period."

"I believe that the parties to the Montgomery Division Mortgage intended to provide, and did provide for a lien upon all equipment originally purchased and the replacements that later were purchased, and I have so found. The latter lien would be on the rolling stock of Mobile and Ohio in valued amount sufficient to replace the original equipment *in its depreciated condition. Guaranty Trust Company* v. *Minneapolis & St. L. Ry. Co., supra.*"*

The equipment covenants relating to replacement are not self-executing.

Neither the Debtor nor the First Mortgage Trustees had taken any steps to subject the equipment-trust rolling stock to the First Mortgage prior to the time when the Refunding Mortgage became a lien thereon. In fact, no steps were taken by either party prior to the filing of the Debtor's petition for reorganization,—or for that matter, prior to the filing in 1940 of the First Mortgage Trustees' brief in the District Court.

Under such circumstances, even if there were any basis for a different interpretation of the extent of the equipment covenants, they could not bring the equipment-trust rolling stock under their lien. The First Mortgage provides a definite method to determine what property, if any, is allocated as replacements. This method—the marking of the equipment "so as to identify the same as equipment subject to this indenture"—was not followed. Nor was any of the equipment-trust rolling stock described in any list of mortgaged equipment furnished to the First Mortgage Trustees under the provisions of the Mortgage (p. 77).

* 36 F. (2d) 747 (C. C. A. 8).

As against a subsequent mortgagee, the First Mortgage Trustees clearly have no right to claim that equipment which was acquired as free equipment must be treated as if it had been subjected to their Mortgage as replacements. There would be no way, in the absence of marking or other specific allocation, of knowing what equipment was thus mortgaged.

Similar replacement covenants were held not to give a lien on free rolling stock in a decision of Justice (then Judge) Shiras, in *United States Trust Co.* v. *Wabash Western Ry. Co.*, 38 Fed. 891 (C. C. S. D. Iowa). A covenant in a divisional mortgage there required that a certain amount of rolling stock be assigned to the division and appropriately marked, and that the company at all times keep a definite amount of rolling stock designated as belonging to the division. The Court held that a deficiency in complying with this covenant could not be made good by subjecting to the mortgage cars taken from the railway's general equipment, stating:

> "The findings of the master show that the covenant in the mortgage, that the mortgagor would equip the Omaha Division with rolling stock proportionately equivalent in amount to that used upon the other portions of the system, has not been performed, and it is claimed on behalf of the present purchasers that the deficiency should be made good by assigning a sufficient number of cars out of the general equipment of the Wabash, St. Louis & Pacific Railway to make the equipment equal to what it would have been had the covenant been performed. If this were done, the cars so taken would reduce to that extent the security of other mortgagees, who are not in fault. If no other interests were involved, save those of the mortgagor and the mortgagees of the Omaha Division, it might be that specific performance of the covenant in this particular could be decreed, but whether the decree would be for the assignment of specific rolling stock already in the possession of the company or for the purchase of other stock would be an open question, and it is doubtful whether a court of equity would undertake to give relief in

this form. But however this may be, it is clear that when the question is presented, as it now is, upon this record, the court is not justified in attempting to enforce the covenant in the manner indicated. *The liens of other mortgages have attached to the equipment in question, and the court is not justified in attempting to displace or defeat these liens, in order to make good to the mortgagees of the Omaha Division the loss resulting from the breach of the covenant in their mortgage.* Practically it is a question of lien, and the mortgagees under the latter mortgage are entitled to assert a claim only to such rolling stock as *in fact* became subject to the lien of the mortgage of February 15, 1879" (pp. 892-3).

The First Mortgage Trustees have cited Judge Wilkerson's unreported opinion in the *Rock Island* case (mentioned above, p. 29) as being to the contrary. The opinion there held that each mortgage was entitled to credit against the "disputed equipment" for the amount necessary to "*replace*" original equipment. In fixing a formula for calculating the rights in "disputed equipment" the Court charged "disputed equipment" with the difference between the original cost of mortgaged equipment and the original cost, less depreciation, of such equipment which was in service at the date of the reorganization. The effect of this may be said to be the recognition of a lien equal to the dollar amount of depreciation, but the distinction between depreciation of existing equipment and replacement of equipment which was worn out, destroyed or disposed of does not appear to have been argued before him. Clearly, the obligation stated in the opinion to "replace" original equipment does not support a decree which requires the addition of equipment which does not replace non-existent equipment.

In any event the covenants in the Western Pacific First Mortgage clearly require only the replacing of equipment which has been removed from the Mortgage lien and not the addition to the mortgaged property of new units where the mortgaged units are still in service, having merely suffered *depreciation* through normal use.

Moreover, the interpretation which the First Mortgage Trustees urge would be contrary to the rulings of the Circuit Court of Appeals for the Seventh Circuit, which are controlling on Judge Wilkerson's Court. That circuit has followed the *Wabash Western* case in *Metropolitan Trust Co.* v. *Chicago & E. I. R. Co.*, 253 Fed. 868, 879, where, after holding that a covenant similar to that in Article Seventh, Section 5 of the Western Pacific First Mortgage, was not a replacement covenant, the Court ruled that a replacement covenant would not be effective in any event to impose a lien as distinguished from a general claim for breach of contract, stating:

> "* * * But if it were there, or if the provisions present were properly to be construed as such a covenant, no lien would attach merely because of the mortgagor's breach of the covenant through its failure to maintain and replace the Coal Company equipment in 1894. United States Trust Co. *v.* Wabash W. Ry. Co. (C. C.) 38 Fed. 891; Fosdick *v.* Schall, 99 U. S. 235, 25 L. Ed. 339" (p. 879).

Thus it appears that nothing in the First Mortgage covenants placed under said Mortgage any equipment-trust rolling stock acquired with free funds which had not become subject to the First Mortgage by March 1, 1932, the effective date of the Refunding Mortgage. None of the equipment-trust rolling stock having become subject to the First Mortgage up to that time, it became expressly subject to the Refunding Mortgage on that date and could not, under any theory, be taken out from under the Refunding Mortgage to replace First Mortgage equipment because of events occurring after March 1, 1932.

A similar principle was applied in *Guaranty Trust Co.* v. *New York & Queens Co. Ry. Co.*, 253 N. Y. 190, 170 N. E. 887. In that case an underlying mortgage made by Steinway Railway Company covered a powerhouse and a car-barn. Later, after these properties had partly deteriorated, the Steinway Company was merged into New York & Queens County Railway Company. The merged company made a new ("consolidated") mortgage, and acquired a new par-

cel of land for a new carbarn and new powerhouse, continuing to use the old carbarn as a repair shop and the old powerhouse for a time, and then scrapping them.

The claim of the Steinway bondholders that the new carbarn and powerhouse should be considered subject to the after-acquired property clause of the Steinway mortgage was denied in an opinion by Judge Cardozo, who stated in part (253 N. Y. at 210-11, 170 N. E. at 894):

> " * * * At all events, the line was not a shell when the newly-acquired property came under the lien of the consolidated deed of trust. During a substantial period thereafter, it was maintained not only with its own power house and barn, but with equipment and machinery properly kept up. For any loss that has been suffered through the removal at a later time of this equipment and machinery, the plaintiff had its remedy, equitable or legal. Even now it does not show the relation between the value of the equipment and machinery and the value of the land and buildings, part of the old line. The failure of the Steinway bondholders or of the plaintiff as their spokesman to take advantage of remedies, preventive or reparative, did not divest a lien in favor of the consolidated bondholders attaching in the interval."

IV

The Northern California Extension is subject to the lien of the First Mortgage only to the extent of the First Mortgage Bonds used in the acquisition thereof. Otherwise it is subject to the prior lien of the Refunding Mortgage.

Facts

Less than half the total cost of the Northern California Extension was supplied from proceeds of First Mortgage bonds (R. 1078). Much less than half the cost of the land on which it was built was paid from proceeds of First Mortgage bonds (R. 1082-84). It is not described in the First

Mortgage, or covered by any supplemental indenture subjecting it to the lien of the First Mortgage (R. 1077); on the other hand, it is specifically mentioned as one of the branches mortgaged under the Refunding Mortgage (R. 1236).

The inequity of the First Mortgage Trustees' assertion of an exclusive prior lien on the Extension to the extent of the entire $50,000,000 of First Mortgage bonds outstanding, and to the complete exclusion of the Refunding Mortgage creditors who supplied more than half its construction cost, is emphasized by the fact that the Extension has proved to be the most valuable part of the Debtor's entire road.

The cost of construction of the Northern California Extension was $10,183,641.90 up to May 31, 1932 (R. 1078). Some additional amounts were spent after that date, although it was placed in operation for freight service on June 1, 1932 (R. 1077). Of such total cost, the sum of $5,000,000 was supplied by A. C. James Company, under debentures which were subsequently exchanged for notes secured by Refunding Mortgage bonds; the sum of $4,875,000 was supplied from the proceeds of sale of First Mortgage bonds (R. 1047); and the sum of $559,408 was supplied by Reconstruction Finance Corporation under notes secured by Refunding Mortgage bonds (R. 1088). Were it not for the application of the funds advanced by Refunding Mortgage creditors, the line could not have been completed, for not only did it cost over twice as much as the $5,000,000 originally contemplated (R. 2321), but, as was stated in the Debtor's petition to the Interstate Commerce Commission for authority to borrow from the Reconstruction Finance Corporation the sums necessary to complete contract obligations, "failure by the carrier to make the payments under its contract renders the carrier subject * * * to the enforcement of a lien upon its property" (Ex. 52, p. 647).

The Extension is probably worth much more than it cost. At any rate, there has been no suggestion that it is worth less than it cost.

The Northern California Extension, in conjunction with the Great Northern Railway, furnished a new route to the north and a source of entirely new traffic, which increased tremendously after the first full year of operation (R. 1935). The Interstate Commerce Commission's report stated that further increased traffic over the Extension could be reasonably expected (R. 215). All the traffic estimates indicated a greater percentage increase for traffic over the Northern California Extension, than over the balance of the system (R. 1980, 1942-48).

Although the Northern California Extension represents less than 10% of the total system mileage, it has produced approximately 20% of the total system revenue, an average of over $3,000,000 of freight traffic per year since 1936 (R. 1268), and nearly $3,500,000 in 1939 (R. 1306). Figures for later years are not in the record, but the predictions in the testimony were that it would increase in relation to the balance of the road. The figures just given include the revenue for carrying Northern California Extension traffic over other parts of the system, but it appears that practically none of this traffic would accrue to the system if it were not for the existence of the Extension (R. 1316). The cost of operation of the Extension is less than $400,000 (R. 2195), and its net earnings available for interest are estimated at approximately $500,000 (R. 220).

Moreover, the Northern California Extension was in first-class condition when the reorganization proceedings began, and required no improvements of any importance (R. 2224), whereas considerable amounts had to be spent on the improvement of the system as a whole during the period of reorganization.

It is no wonder that counsel for the First Mortgage bondholders described the Extension as "a very important piece of line" (R. 2438), and conceded that the decision of the question of the lien on the Extension would have a direct bearing upon the fairness of the Plan treatment.

No supplemental indenture subjecting Extension to First Mortgage.

No supplemental indenture was ever executed subjecting the Extension to the First Mortgage (R. 1077). It was not part of the line which the Debtor was authorized to operate at the time of its incorporation, but was first mentioned in an amendment to the certificate of incorporation in 1929 (R. 1076-77). Thus there was no evidence of an intention in 1916, when the First Mortgage was executed, that it should cover any such new line of railroad. It is inconceivable that such an important acquisition as the Northern California Extension would not have been expressly subjected to the First Mortgage if it had been intended to be entirely subject to the entire First Mortgage.

The First Mortgage permits the Debtor to draw down $1,000 worth of First Mortgage bonds for every $1,000 spent on additions or extensions (Ex. 5, pp. 44 to 45). This lends added significance to the fact that, out of the total cost of land for transportation purposes for the Northern California Extension of $504,590.66 (R. 1084), the requests for First Mortgage moneys show an expenditure therefrom of an aggregate of only $196,805.73 (R. 1082-83), *or less than 40% of the cost of land supplied from First Mortgage money.*

Even the "specifications of the securities offered for sale" at the time of the issue of the First Mortgage bonds (Ex. 93) which were used in financing the Extension did not promise a first lien upon the entire Extension. They read:

> "Said First Mortgage constitutes a first lien on the main line of railroad of the Company extending from San Francisco, California, to Salt Lake City, Utah, and branches, aggregating 1050.5 miles, more or less, of first track, the Company's terminal and other railroad properties in the cities of San Francisco, Oakland and elsewhere, and certain of its rolling stock and equipment. Upon the completion

> of the construction and/or acquisition of the Company's 'Northern California Extension' its main line of railroad will aggregate 1198.5 miles, more or less. A map of the Company's railroad system is hereto annexed."

It would have been simple to state definitely, and it would have been definitely stated if so intended, that "upon the completion of the Northern California Extension the First Mortgage will constitute a first lien thereon". The Refunding Mortgage, it will be recalled, does not describe the property covered thereby as being entirely subject to the First Mortgage, but states that its lien is "subject, however, in so far, but *only in so far* (in extent, degree of priority or otherwise), as in law the same respectively may attach to any part or parts of the trust estate * * *".

Limitations on after-acquired property clauses.

The after-acquired property clauses of the First Mortgage are so phrased as to subject only limited classes of property thereto. These classes are described in paragraph Third of the granting clauses (R. 122-24). They are expressly limited to:

(a) Properties "acquired or constructed by the use of First Mortgage bonds or proceeds thereof or cash deposited" thereunder, "or on account of the purchase, acquisition or construction" whereof First Mortgage bonds or proceeds or deposited cash were used;

(b) Property or facilities "constituting an integral part" of the mortgaged property;

(c) Property or facilities "used or acquired for use in or for the maintenance or operation of or appertaining to" the mortgaged property;

(d) Certain securities or properties of specified "subsidiary" companies.

The free funds paragraph, already mentioned in Point II (see page 18, *supra*), includes a right "to construct or acquire *free from the lien hereof* lines of railroad, extensions or branches or interests therein" provided they do not fall in any of the four classes which were described in paragraph Third above mentioned.

Argument

In view of the absence of any supplemental indenture or other recorded instrument expressly subjecting the Northern California Extension to the lien of the First Mortgage, the only basis for the First Mortgage Trustees' claim of lien thereon must be that the after-acquired property clause of the First Mortgage compels such a result.

Any claim of the First Mortgage Trustees to the Northern California Extension must be based on clause (a), relating to the use of First Mortgage bonds or proceeds in the construction or acquisition thereof. The other clauses may be ruled out at the outset.

Clause (b), relating to property "constituting an integral part" of the mortgaged property, is obviously of extremely narrow effect, and cannot cover a new branch extending one hundred miles from the main line. Certainly it cannot have a broader meaning in this connection than the succeeding appurtenance clause (Clause (c)).

Clause (c), relating to property "appertaining to the mortgaged premises", also has a very limited application. It cannot cover other real estate or branches.

In *New Orleans Pacific Railway Co.* v. *Parker*, 143 U. S. 42, 55, the Court said:

> "Property, however, not connected with what is ordinarily termed the plant, or not forming a part of the organic structure of the road, is never treated as appurtenant to it."

See also *Humphreys* v. *McKissock*, 140 U. S. 304, 313-14, where the Court said:

"A thing is appurtenant to something else only when it stands in the relation of an incident to a principal, and is necessarily connected with the use and enjoyment of the latter. *Harris* v. *Elliott*, 10 Pet. 25, 54; *Jackson* v. *Hathaway*, 15 Johns. 447, 455; *Linthicum* v. *Ray*, 9 Wall. 241. Of two parcels of land one can never be appurtenant to the other."

* * * * * * *

"Under the term 'appurtenances,' as used in the mortgage in question, only such property passes as is indispensable to the use and enjoyment of the franchises of the company. It does not include property acquired simply because it may prove useful to the company and facilitate the discharge of its business. A distinction is made in such cases between what is indispensable to the operation of a railway and what would be only convenient. *Bank* v. *Tennessee*, 104 U. S. 493, 496."

The same principle of construction was applied in *Great Northern Railroad Co.* v. *Central Hanover Bank and Trust Co.*, 12 F. Supp. 846 (W. D. Wash.), and *Old Colony Trust Co.* v. *Standard Beet Sugar Co.*, 150 Fed. 677 (N. D. Neb.).

Clause (c) also refers to property "for use in or for the maintenance or operation of" the mortgaged property. This cannot apply to the Extension, for such a covenant is restricted in application to property strictly necessary for such maintenance or operation. *New Orleans Pacific Railway Co.* v. *Parker*, 143 U. S. 42, 54-57.

There is no equitable basis for giving the First Mortgage a lien on the Extension beyond the amount which it contributed towards its construction.

From the foregoing rules, it follows that the First Mortgage Trustees cannot claim a lien on any portions of the Northern California Extension which were not acquired with the proceeds of their bonds. Since they have shown no evidence as to the portions of the Extension on which

their money was used, it is only fair that their lien be restricted to the proportion which the $5,000,000 of First Mortgage Bonds issued for the Extension bear to the total cost of over $10,000,000.

Under the provisions of the First Mortgage there could be no question that, if First Mortgage money had been applied to the acquisition and construction of the Extension northwardly from its beginning at Keddie until it was exhausted, and money from other sources then applied to the acquisition and construction of the remainder of the line, the northerly portion would be free from the lien of the First Mortgage and subject to the Refunding Mortgage. The proof does not indicate whether this took place or whether funds from all sources were spent indiscriminately over the whole mileage.

In a court of equity, which looks to substance rather than form, it should be of no consequence which method was used or who has the burden of proof—although it is conceded that the burden is on the First Mortgage Trustees. A court of equity should decree either that the First Mortgage is a first lien on a portion of the total Extension mileage equal to the proportion that its contribution bears to the total cost, or that it has a first lien on an undivided interest in the whole Extension in the same proportion, and that the Refunding Mortgage has a first lien on the remaining undivided interest.

Equitable principles are the only basis for enforcing after-acquired property clauses at all (*Pennock* v. *Coe*, 23 How. 117), since a mortgage cannot create a legal lien on non-existent property. Substantially this view of after-acquired property clauses is upheld in the California decision of *Bibend* v. *L. & L. F. & L. Insurance Co.*, 30 Calif. 78, 86, quoted in *Mason* v. *Citizens National Trust and Savings Bank*, 71 F. (2d) 246 (C. C. A. 9), which discusses the general rule that assignments of things having no present actual existence are not recognized at law, but are given effect only by courts of equity.

Equitable treatment of the Refunding Mortgage creditors, who supplied the major portion of the money necessary to place the Extension in operation, is required also by the provisions of Section 77, which authorizes creditors affected by a plan to file their "claims for equitable treatment" (Section 77(e)).

Moreover, after-acquired property clauses, as set forth in Point II (pp. 20-21), are strictly construed, and enforced only to the extent that their terms "imperatively demand".

Within these rules the First Mortgage Trustees have failed to prove that the entire Extension ever became subject to their entire mortgage as a first lien.

There is no unfairness to the First Mortgage Bondholders in limiting their lien to $5,000,000. All that they contributed to the construction of the line was $5,000,000. All that their mortgage entitled them to in respect of property financed with First Mortgage funds was dollar for dollar value, that is, $5,000,000 of new property for $5,000,000 of First Mortgage money. In seeking to obtain the entire $10,000,000 value of the Northern California Extension for a $5,000,000 investment, and to make the Refunding Mortgage creditors junior in lien on the Extension to the $45,000,000 of First Mortgage bonds which were outstanding before the Extension was built, the First Mortgage bondholders are demanding a gift at the expense of the creditors whose money made possible the completion of the Extension.

The position of the First Mortgage Trustees and bondholders is that since part of the cost of the Extension was financed with First Mortgage money the entire Extension comes under the entire lien of their mortgage. No limits to this contention are, or could be, suggested. It would make the whole $10,000,000 Extension subject to the entire mortgage if only the most trivial amount of First Mortgage moneys were used thereon. The First Mortgage Committee even argued in the Circuit Court of Appeals that they were entitled to a $50,000,000 lien on the Extension if "one penny" of First Mortgage money were spent thereon (Brief in C. C. A., p. 60)—a result which would be in the highest

degree inequitable. The language of the First Mortgage does not require any such inequitable result, and courts will always refrain from adopting a construction which works injustice if another one is available. *Graselli Chemical Co.* v. *Aetna Explosives Co.*, 252 Fed. 456, 459-60 (C. C. A. 2d); *Pavlowski* v. *Mohawk Golf Club*, 204 App. Div. (N. Y.) 200, 204; 198 N. Y. Supp. 30, 34; *Restatement of Contracts*, Section 236(a).

The only possible method of imposing equitable limits upon the theory that the First Mortgage Trustees advance is, as we suggest, to limit the lien of the First Mortgage to, or make it proportionate with, the amount of First Mortgage money used.

The decisions which the First Mortgage Trustees have heretofore cited, and will doubtless cite in this Court, in opposition to the existence of any lien for Refunding Mortgage creditors, all involve a question of a claimed exclusive prior lien—that is, an effort entirely to displace a first mortgage. That is not what we seek in this case at all. The Refunding Mortgage Trustee's position is that, in arriving at an equitable distribution of the new securities, the creditors whose money made possible the completion of a line which is worth much more than the amount of First Mortgage money spent thereon, are entitled to receive securities of a higher rank than common stock in recognition of the very real contribution which they have made to the system. Even if the Refunding Mortgage creditors were to be treated as having only a second lien, subject to $5,000,000 of First Mortgage bonds, upon the Northern California Extension, they would be entitled to receive new income mortgage bonds and new preferred stock in recognition of this second lien. However, their lien is entitled to equal rank with that of the First Mortgage bondholders.

Although few decisions have been found which involve a similar situation, equity will not be precluded from granting proper relief even though the circumstances may be unusual. *Graselli Chemical Co.* v. *Aetna Explosives Co.*, *supra.*

The right to a coordinate or *pari passu* lien was recognized in the well considered case of *Citizens Savings and Trust Co.* v. *First Cincinnati & Dayton Traction Co.*, 106 Ohio St. 577; 140 N. E. 380. In that case three companies had made mortgages each containing after-acquired property clauses. These companies were later consolidated to form the Southern Ohio Traction Corporation which, of course, acquired the property subject to all existing liens. The new corporation made a mortgage on the consolidated property, covering properties received from the three underlying companies and also other properties. The three underlying companies had each owned a separate power plant and transmission lines. Upon consolidation it was decided to discontinue the separate power plants and build a general power plant to furnish energy for the operation of the entire consolidated system. The Court held that the three underlying mortgages were entitled to liens of equal rank upon the central power plant in proportion to the power requirements of each.

This result is almost identical in substance with what we have suggested with respect to the Northern California Extension. First Mortgage creditors and Refunding Mortgage creditors have both contributed to its construction. Neither can claim that it could have been completed without the contribution of the other. Both should be held entitled to liens of equal rank thereon.

In the present case the equities are even stronger than in the *Cincinnati & Dayton* case, for the creditors secured by the Refunding Mortgage bonds contributed actual new money, which was certainly a more valuable contribution than the old individual power plants which were contributed to the common enterprise in the *Cincinnati & Dayton* case.

In *Guaranty Trust Co. of New York* v. *Minneapolis & St. L. R. Co.*, 36 F. (2d) 747 (C. C. A. 8), the Court went so far in protecting a later mortgage as to hold that it was the first lien upon a bridge described therein, although an earlier mortgage covered one line terminating on the east-

erly bank of the river and another line terminating on the westerly bank—between which lines the bridge was the only connection.

The Plan fails to give equitable treatment to the Refunding Mortgage creditors insofar as it refuses to accord them any securities senior to common stock in recognition of their lien on the Northern California Extension.

V

The Refunding Mortgage creditors are entitled to additional securities in recognition of their interests in free assets of the Debtor.

Facts

The items of non-carrier real estate which are in dispute herein are valued on the Debtor's books at over $1,850,000. The major item consists of acreage in the Islais Creek district of San Francisco (R. 1090), which is described in the printed record. The other items, together with certain facts respecting each, are listed on an exhibit (Ex. H to the Stipulation of Facts Not in Dispute) which is not printed as part of the record.

Portions of such non-carrier real estate have been sold from time to time during the course of the reorganization proceedings, and the proceeds deposited in escrow pending determination of the lien thereon. Up to December 20, 1939, the total of such proceeds amounted to over $204,000 (R. 1093-94).

The Islais Creek property is a tract of land and land under water bordering on San Francisco Bay, which was acquired by Debtor's predecessor in the hope that it could be developed into a great industrial center, which might produce traffic for the Debtor (R. 2528). When the Commission, in 1929, valued the Western Pacific property pursuant to Section 19-a of the Interstate Commerce Act, it

ruled, after analyzing the history of the property and acquisition, that the Islais Creek tract was not carrier property (Ex. 104, p. 276):

> "It thus appears that these lands were not used for common carrier purposes on June 30, 1914, and that their use for such purpose cannot be said to have been imminent."

The present First Mortgage bonds were issued pursuant to a reorganization plan in 1915, which contemplated that they should be a lien only upon "*railway properties*". The 1915 plan, in describing the new issues, states as follows:

> "First Mortgage Gold Bonds (the new bonds) Authorized Issue $50,000,000.
>
> To be secured by First Mortgage upon all of the *existing railway properties* of the old company and all property hereafter acquired by the operating company *integrally connected therewith* and all property *acquired by means of the use of the proceeds of the new bonds* or against which new bonds shall be issued" (R. 1141).

The properties in dispute were not integrally connected with the Debtor's railway property, and were not acquired from proceeds of First Mortgage bonds. In fact, an examination of the schedule of uncapitalized expenditures (Ex. 31) reveals that no part of the moneys used for payment of benefit assessments or other expenditures in connection with the Islais Creek properties was ever made the subject of withdrawal of First Mortgage moneys.

The Islais Creek property was originally included in account 701 on the Debtor's books, entitled "Investment in Road and Equipment", and was transferred in 1935 to the account entitled "Miscellaneous Physical Property" (R. 1090).

Argument

Although there is some language in the First Mortgage which may be broad enough to cover pre-existing non-carrier real estate, the Mortgage must be read in the light of the 1915 reorganization plan, which constituted a contract between the stockholders of the Debtor (who were bondholders of the predecessor company) and the new First Mortgage bondholders, as was expressly ruled in the case of *American Brake Shoe and Foundry Company* v. *New York Railways Co.*, 277 Fed. 261, 271-72 (S. D. N. Y.). See also

Safety Car Heating & Light Co. v. *U. S. Light & Heating Co.*, 2 F. (2d) 384, 388 (W. D. N. Y.);
Harris Trust & Savings Bank v. *Chicago Railways Co.*, 56 F. (2d) 942, 947 (C. C. A. 7).

Any interpretation of the First Mortgage as granting a lien on property in excess of the lien provided under the 1915 reorganization plan would violate the terms under which the old bondholders agreed to take stock in the new company (the Debtor herein) in exchange for their claims.

Moreover, the First Mortgage contains no description of the Islais Creek real estate or the other non-carrier real estate then owned. *Property of the size and importance of the Islais Creek real estate would certainly have been included in the First Mortgage by specific description if it had been intended to cover it thereby.* An interpretation of the general language in the First Mortgage with respect to the mortgaging of lands, etc., "whether or not for use in connection with the railroad" (R. 1217-18) as covering this property would be inconsistent with the later provision of the First Mortgage by which the lien upon land is limited to such thereof as is appurtenant to the railroad lines (R. 1226).

The attempt by the First Mortgage Trustees to impose a lien upon non-carrier real estate is also met by the rule

that non-carrier real estate owned at the date of a railroad mortgage will not be considered subject to the lien thereof unless expressly described.

State v. *Gleen*, 18 Nev. 34, 48; 1 Pac. 186, 193-94;
Shirley v. *Waco Tap Railway Co.*, 78 Texas 131, 146; 10 S. W. 543, 550, 551;
National Bank of Commerce v. *Lock*, 17 Washington 528, 532-33; 50 Pac. 478, 480.

The fact that items of non-carrier real estate were listed until comparatively recent years on the railroad's books under the account "Investment in Road and Equipment" carries no inference as to their nature or as to whether they were subject to the First Mortgage, and in any event could not alter their character or create a lien on them which the reorganization plan forbade and the First Mortgage did not impose.

It requires much more definite language than anything the First Mortgage Trustees can point to in order to bring these substantial parcels of real estate under its lien.

The necessity of recognizing the rights of creditors in unmortgaged assets was pointed out by this Court in *Consolidated Rock Products Co.* v. *DuBois*, 312 U. S. 510, where it was held that bondholders of a subsidiary would have, to the extent that they were general creditors of the parent company, "prior recourse against any unmortgaged assets" of the parent company, under the rule of absolute

priority laid down in the cases of *Northern Pacific R. Co.* v. *Boyd*, 228 U. S. 482 and *Case* v. *Los Angeles Lumber Products Co.*, 308 U. S. 106.

The distribution of any new securities granted in lieu of the free assets should depend on the rights of the various parties as general creditors; that is, for any difference between the total debt and the value of their security the First Mortgage creditors and the Refunding Mortgage creditors would share in these assets with Western Pacific Railroad Corporation (or Railroad Credit Corporation, as pledgee of the latter's claim) and Western Realty Company.

There has been no precise determination of the amount of the assets subject to the payment of the respective claims or of the extent of the deficiency of mortgaged assets to pay the mortgage debt. However, a practicable and equitable method for such determination here would be to base the participation of the secured creditors on the difference between the total amount of their claims and the par value of income bonds and preferred stock otherwise issuable to each—the exact figures being subject to computation after the other objections to the Plan have been determined.

CONCLUSION

1. The issues relating to the extent of the Refunding Mortgage lien must be determined before the reorganization plan is sent back to the Commission.

2. This Court should adjudge that the Refunding Mortgage constitutes a first lien on the equipment-trust rolling stock and a first lien to the extent of $5,000,000 (subject to a *pari passu* first lien of $5,000,000 by the First Mortgage) upon the Northern California Extension.

3. The non-carrier real estate, and the cash proceeds, now held in escrow, of non-carrier real estate which has been sold during the reorganization proceedings, should be decreed to be free from the lien of the First Mortgage.

4. The Commission should be instructed, in passing upon any substitute plan of reorganization, to give due recognition to the lien of the Refunding Mortgage upon the equipment-trust rolling stock and the Northern California Extension, and should also be instructed to fix the value of the Central California Traction and Alameda Belt Line securities, on which the Refunding Mortgage is admittedly a first lien, and give recognition to such value in the allocation of new securities.

The decrees of the Circuit Court of Appeals should be modified in accordance with the foregoing brief, and the proceeding referred back to the Interstate Commerce Commission for appropriate modification of the reorganization plan.

New York, September 14, 1942.

Respectfully submitted,

H. C. McCOLLOM,
Attorney for Petitioner,
IRVING TRUST COMPANY, as

REPLY BRIEF OF PETITIONER, IRVING TRUST COMPANY, AS REFUNDING MORTGAGE TRUSTEE

This brief is confined, as in the case of our main brief, to the question of relative priority of lien, as between Debtor's Refunding Mortgage and its First Mortgage.

Since the three principal lien questions are separate and distinct in nature, we deal with the arguments advanced by the respondents on each question in a separate Point.

The respondent, Institutional Bondholders Committee, says (Brief, p. 3) that the facts were not stated with sufficient fullness in our Main Brief, but that they are stated in the answering brief of the respondent, First Mortgage Trustees, "in most complete detail". It may be debatable whether our statement should have been longer or whether the statement by the First Mortgage Trustees is unnecessarily long. However, the important consideration is that the facts are singularly free from dispute although, of course, we disagree with various conclusions of fact drawn by the respondents.

I

Rolling stock acquired under conditional sale or equipment trust agreement is "free from the lien" of the First Mortgage and subject to the prior lien of the Refunding Mortgage.

(Answering Points I and II of the brief of the Institutional Bondholders Committee, and Points I and II of the brief of the First Mortgage Trustees.)

The respondents do not dispute that in order to bring any of the after-acquired property which is in question under the lien of the First Mortgage they must meet the test laid down in the decisions cited in our main brief (pp. 20-21) to the effect that after-acquired property clauses are to be strictly construed, and that the terms employed must "imperatively demand" the construction contended for by those asserting the lien. The respondents have fallen far short of meeting such test. In the case of the equipment purchased under conditional sale or equipment trust agreements (which equipment herein and in our main brief is sometimes termed "equipment-trust rolling stock"), the

language of the First Mortgage clearly leads to the opposite of the conclusion from that which the respondents seek.

The "exception clause" makes equipment-trust rolling stock "free from the lien" of the First Mortgage.

The clause which in our main brief is termed the "equipment trust clause", but in the brief of the First Mortgage Trustees and in the present brief is termed the "exception clause", reads as follows[1]:

> ... • • • the Company may, *unless First Mortgage Bonds shall have been authenticated and delivered or their proceeds or other cash deposited hereunder paid out against the same*,[2] purchase and acquire equipment, *free from the lien* hereof, by *lease, conditional sale agreement or* under any form of *equipment trust*, or purchase such equipment and issue obligations therefor secured by mortgage or pledge of such equipment superior to the lien of this indenture."

The respondents state, in effect, that the words "free from the lien hereof" do not mean what they plainly say. The Institutional Bondholders Committee argues (Brief, p. 16) that the foregoing clause was not intended to create an exception "to *any* coverage by the First Mortgage" but "only to the *first lien character* of that First Mortgage coverage". The First Mortgage Trustees argue (Brief, p. 16), that the purpose was "not to free the Debtor's equity from the lien of the First Mortgage but merely to enable the Debtor to vest an *unencumbered security title* in the equipment lienor".

The respondents make many complicated arguments in their attempt to avoid the clear language of the "exception clause". While we are compelled to follow these arguments, to some extent, into their devious by-paths, we hope that

---

[1]First Mortgage Trustee's brief, bottom of p. 114.

[2]Italics throughout the brief are supplied by counsel unless otherwise stated.

these arguments will not be permitted to obscure the real and very simple issue—which is whether the mortgage is to be read as it is written, or is to be read as rewritten by the respondents.

We have here a mortgage which in its earlier clauses contains language broad enough to cover the equipment in question; but such language is qualified by the final provision (the "exception clause") stating that unless First Mortgage cash or bonds have been used in the acquisition the Company may acquire equipment "free from the lien hereof" by conditional sale agreement or equipment trust.

In addition to the broad and plain words thus used, it is noteworthy that the respondents cite no decisions sustaining their position, while the position of the Refunding Mortgage Trustee is strongly sustained by the only two pertinent decisions which we have seen—i. e., the decision of Circuit Judge Sanborn in the first *Wabash Railroad Company* case (opinion printed in Record—R. 1721-34) and the decision of Judge Wilkerson in the *Chicago, Rock Island & Pacific Railway Company* case (printed as Appendix B to brief of respondents First Mortgage Trustees, pp. 116-144)—which decisions are referred to in our main brief (pp. 27-32).

The briefs of both respondents attempt to distinguish these decisions; but an examination of them will show that they are not distinguishable. We are unable to follow the respondents' argument[1] that those decisions are distinguishable because the provisions cutting down the broad coverage of the granting clauses in those cases were "free funds" clauses, whereas in the present case the cutting-down provision is termed an "exception clause". In the *Wabash* case, the language which it was assumed would place the equipment under the mortgage lien covered after-acquired property owned or used in connection with the mortgage lines of railroad (R. 1726); but nevertheless it

[1] Institutional Bondholders Committee brief, p. 8; First Mortgage Trustees' brief, p. 36.

was held that the clause which respondents term the "free funds" provision (and which, as in the present case, was the final clause) eliminated equipment not acquired by the use of the bonds issued under the Refunding Mortgage (R. 1728).

Similarly, in the *Chicago, Rock Island & Pacific* case, Judge Wilkerson said:[1]

> "Granting Clause Third, as noted above, conveys to the mortgage trustee all locomotives, cars and other rolling stock and equipment 'now held * * * or hereafter acquired * * *, and appertaining to or provided for use upon' said railway. On its face, this language, if not qualified by other language in the indenture, would seem to be broad enough to include additional rolling stock or equipment of the kind defined in the preceding paragraph. But, at the end of Granting Clause Fourth, a proviso will be noted that may materially qualify or circumscribe the broader language in Granting Clause Third."

It was then held that the proviso did cut down the broad language used in the prior clause and excluded the equipment claimed to be covered thereby.

The respondents endeavor to avoid the "exception clause" in the present case by arguing that the mortgage language must mean that the equipment in question is to be "free from the lien" of the mortgage, but also subject to the lien of the mortgage. It could not be both—unless, as was done in the case of the Refunding Mortgage, the equipment was first excluded from the lien, and then the equity in the equipment was placed back under the mortgage lien by the specific additional provision contained in the Refunding Mortgage (our Main Brief, p. 19).

The First Mortgage expressly purported to cover equitable as well as legal interests.[2] If it were not for the

---

[2] See Appendix A to First Mortgage Trustees' brief, pp. 109, 110, 113.

"exception clause", the granting clauses of the First Mortgage would have covered the interest from time to time acquired by the Railroad Company in the equipment; but by the "exception clause" such equipment, as in the decisions just cited, was taken out from the lien unless acquired by the use of First Mortgage bonds or moneys. It cannot be asserted, even plausibly, that the equitable interest still remains under the lien.

The exclusion is perfectly clear; and the language used by Judge Sanborn in the *Wabash* case (R. 1724) is extremely pertinent:

> "* * * The natural, reasonable, more obvious meaning of a mortgage or contract should be preferred to a curious recondite signification discovered by ingenuity and study."

The Institutional Bondholders Committee asserts (Brief, p. 10) that it would be inequitable to enforce what we believe to be the plain language of the "exception clause". Such an argument has no force against the clear wording of the mortgage.

Moreover, if any inequity is involved it is on the part of the Institutional bondholders, who are trying to obtain property to which they made no contribution. It may also be noted that, so far from there having been any decrease in the amount of equipment subject to the First Mortgage, the mortgaged equipment has increased from 1,589 units, with a book value of $3,550,748, at the date of execution of the First Mortgage, to 7,032 units, with a book value (before depreciation) of $15,034,389 (First Mortgage Trustees' brief, p. 14)—not including the equipment-trust rolling stock here in dispute.

The only limitation upon the "exception clause" is the one limitation stated therein—that is, the case where First Mortgage Bonds or First Mortgage cash are uesd in the acquisition.

The First Mortgage Trustees attempt (Brief, pp. 21-25) to avoid the plain and compelling implications of the fact that four limitations are contained in the "free funds" clause and only one of the four limitations (that is, the case where First Mortgage bonds or cash are used) is contained in the "exception clause". They argue that the function of this limitation in the "exception clause" is different from the function of the identical limitation in the "free funds"; and therefore that the limitation contained in the "exception clause" should be disregarded in determining whether the equipment in question is excluded from the mortgage lien and that all four of the limitations contained in the "free funds" clause should be imported bodily into the "exception clause", including particularly the limitation in respect of property acquired for use upon the mortgaged lines.

In effect, they say that the function of this limitation (that is, the case where First Mortgage bonds or cash are used) in the "free funds" clause is to limit what would otherwise be a complete exclusion of all interest in the equipment, but that the function of the same limitation in the "exception clause" is to limit what otherwise would be only an exclusion of the legal title, not of the equitable title; and this argument is made in the face of the fact that in both the "free funds" clause and the "exception clause" the exclusion is worded in identical language: to-wit, "free from the lien hereof". Having thus established to their satisfaction that the limitation has no pertinent function in the "exception clause", because the words "free from the lien hereof" as used therein do not prevent the lien of their mortgage from attaching to the equitable title, they then argue that—there being no applicable limitation at all in the "exception clause"—all four of the limitations

(including the limitation in respect of property acquired for use upon the mortgaged lines) must carry over into the "exception clause".

This argument—that is, that the existence of only one limitation in the "exception clause" is immaterial—is built upon the assumption that the words "free from the lien hereof", as contained in said clause, do not mean (as in the case of the "free funds" clause) that the equipment in question is totally excluded. They propose that such words, as used in the "exception clause", be construed as if they read "free from the lien hereof to the extent (but only to the extent) necessary to vest an unencumbered security title in the equipment lienor, but otherwise to remain subject to the lien hereof". Obviously, the language of the "exception clause" does not "imperatively demand", or even suggest, that such a meaning be given. If the First Mortgage Trustees could rewrite their mortgage we have no doubt that they could devise language sustaining their claim. What we request is that the Court interpret the mortgage as it is.

The absence from the First Mortgage of such a provision as is contained in the Refunding Mortgage, expressly subjecting the equity in equipment-trust rolling stock to the mortgage lien, strongly supports the position of the Refunding Mortgage Trustee.

As is stated in our main brief (pp. 18-19), the First Mortgage, after excluding from the lien thereof equipment-trust rolling stock not acquired from First Mortgage cash or bonds, does not place back under the mortgage lien the equitable interest from time to time acquired by the Railroad Company in such rolling stock—although it is placed back under the lien of the Refunding Mortgage by the paragraph quoted in our main brief (p. 19). The First Mortgage Trustees urge (Brief, p. 29) that the inclusion of this clause in the Refunding Mortgage was due to a "meticulous" and unnecessary caution on the part of its

draftsman; and the Institutional Bondholders Committee state (p. 17) that the inclusion of such a provision in the First Mortgage would have been "surplusage" and its inclusion in the Refunding Mortgage was due to the "increasing excess of care taken by draftsmen of corporate documents". Apart from the fact that the First Mortgage is manifestly a very carefully drawn instrument, and the fact that there is nothing to indicate that later mortgages were drawn with greater care than was the First Mortgage, we do not see how the respondents—in the light of the law which existed at the date of the First Mortgage and long prior thereto—can assert that it would have been unnecessary caution on the part of the draftsman of the First Mortgage if, after excluding in plain and broad terms ("from the lien hereof") equipment-trust rolling stock, he had added a provision embodying the supposed intention to place the equity back under the mortgage lien.

In the *Chicago, Rock Island & Pacific* case, above mentioned, Judge Wilkerson was considering the meaning of an exception clause which took out from the mortgage lien after-acquired equipment not purchased by the use of the bonds issued under the mortgage. The mortgage trustee claimed that the broad language of the exclusion should be limited to equipment not acquired for use upon the mortgaged lines. The Court overruled this contention, saying (Appendix B to First Mortgage Trustees' Brief, p. 129):

> "If the parties intended that only after-acquired equipment, obtained by the railway company on its own credit for use upon lines of railway not subject to the mortgage, should be excluded from the mortgage lien, there was no reason why that intention could not have been stated in clear and unmistakable terms. The intention should not be left to be determined by conjecture or inference . . ."

There was nothing novel, when the First Mortgage was made in 1916, in the principle thus stated.

Therefore, it would have been far from an excess of caution if the draftsman of the First Mortgage had expressed the intention to subject the equity to the First Mortgage, assuming such intention. On the contrary, if such intention existed and was not expressed—particularly when the rolling stock was stated to be "free from the lien" of the mortgage—the draftsman was highly incompetent—which is not indicated by the manner in which the mortgage was drawn.

The "Subject, However," Clause does not have the effect of placing under the First Mortgage the equipment-trust rolling stock which under the "exception clause" is to be "free from the lien" of the Mortgage.

The "Subject, However," clause—so far as material in this connection—reads as follows:

> "SUBJECT, HOWEVER, as to all equipment now owned to the equipment trust or conditional sale agreements secured thereon, and as to equipment hereafter acquired, to the equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby, * * * ."

We pointed out in our main brief that the "subject, however," clause (referred to on page 25 of the First Mortgage Trustees' brief) does not have the effect given to it in the Commission's tentative decision of the lien question—which decision was accepted without discussion by the District Court. The Commission reasoned (R. 266) that, since the "subject, however," clause must refer to property covered by the mortgage and subject to prior liens, and since such clause refers to the prior liens of equipment trusts, the implication must be that the equity in *all* rolling stock acquired under equipment trusts would be under the First Mortgage. This reasoning is unsound because if over-

---

First Mortgage Trustees' Brief, p. 115.

looks the fact that some of such rolling stock is certainly subject to the First Mortgage, to wit; the rolling stock in which the equity was acquired by the use of First Mortgage moneys. Such rolling stock would be subject to the equipment trusts and to the First Mortgage; but, if not financed by First Mortgage moneys, it would be "free from the lien" of the mortgage, as expressly stated in the "exception clause".

In order to support their interpretation of the "subject, however," clause as a modification—which would be, in fact, a complete abrogation—of the "exception clause", and to meet our argument that the "equipment trust or conditional sale agreements * * * permitted hereby" refer to equipment financed with First Mortgage moneys, the First Mortgage Trustees argue (Brief, pp. 25-37) that First Mortgage funds could not be used to finance down payments or installments on equipment trust rolling stock.

This argument requires them to say in effect (Brief, pp. 26-27) that the words "liens or charges" in the clause of the First Mortgage relating to draw-down of cash (Ex. 5, p. 54) do not have the definition given to those same words in that very section of the First Mortgage (Ex. 5, p. 60).

The First Mortgage requires that, for bonds or deposited cash to be taken down, there must have been delivered to the Company, all documents necessary "to vest the title to such property in the Company subject only to liens or charges certified as required * * * this Section 2" (Ex. 5, p. 54—clause (a) of paragraph Sixth). By definition (Ex. 5, p. 60) the words "lien" and "charge" include "deferred payments * * * under any conditional sale agreements or lease or trust agreement covering equipment".

To avoid the evident meaning of these provisions the First Mortgage Trustees argue (Brief, pp. 25-28) that the existence of a conditional sale agreement or equipment trust makes it impossible for the Company to be vested with the "title" called for by the first quotation; but the

very case which they previously cited (*United States Mortgage & Trust Co.* v. *Chicago & A. R. Co.*, 40 F. (2d) 386; Brief, p. 16) shows that such interest as the Debtor has in equipment-trust rolling stock, whether constituting *legal* title or not, constitutes a title which may become subject to the mortgage. It is specious to argue that a clause which requires only "title * * * subject * * * to liens or charges", which latter are defined as including deferred installments under equipment trusts, can not be applied to equipment-trust rolling stock. How could the permitted "liens" and "charges" include, as specifically they do, equipment trusts, if the "title" did not include the interest acquired under the equipment trusts? The First Mortgage Trustees again resort to rewriting of the Mortgage to suit their purposes, by stating that "title" in clause (a) of paragraph Sixth must mean "legal title".

The words "lien" and "charge" are defined (Ex. 5, p. 60) as including deferred installments of purchase price of property "where title thereto has not *then* vested in the purchaser". Since clause (a) of paragraph Sixth refers to "title * * * subject only to liens or charges", it must include the equitable title or interest which is conferred by an equipment-trust agreement covering rolling stock "where title thereto has not *then* vested in the purchaser".

The First Mortgage Trustees argue (Brief, pp. 17-18) that First Mortgage bonds or cash could not be used toward the purchase of chattel-mortgaged equipment unless the lien of the chattel mortgage is subordinate to the lien of the First Mortgage; and, therefore, that it was not intended to permit the use of First Mortgage bonds or cash toward the purchase of equipment-trust rolling stock. This is one of the many involved, indirect and immaterial arguments contained in their Brief. We do not agree with their assumption regarding chattel mortgages; but we are not dealing here with chattel mortgages. We are dealing with equipment trust agreements, in respect of which the language is as plain as it could be.

There is nothing "whimsical" about the Refunding Mortgage Trustee's interpretation of the "exception clause".

The Institutional Bondholders Committee (Brief, p. 11) urges that, under the Refunding Mortgage Trustee's claim, the failure of the First Mortgage to obtain a lien on the equipment-trust rolling stock will result from the "chance circumstance" that the property was bought under equipment trusts rather than through some other form of financing. The First Mortgage Trustees assert (Brief, p. 20) that an interpretation of the Mortgage which makes its lien depend on whether equipment was purchased under an equipment trust or was purchased in some other way imputes to the draftsman "a whimsical intent which is not consistent with any intelligent purpose".

We believe that the language of the instrument should be given effect even if the respondents consider it whimsical; and we do not believe that, when clear language was used, it is necessary—or even appropriate—to speculate as to the reason. Whatever the reason for the distinction was, and whether or not the reason commends itself to the respondents as sensible, there cannot be the slightest question that the distinction was made. Where, as in the present case, the parties to a mortgage have used language plainly expressing their intention, the mortgagees cannot be heard to say some 26 years later that they do not consider that the intention expressed was sensible. As one of the judges in the Circuit Court of Appeals pointed out during the oral argument, it would have been perfectly competent for the Mortgage to provide that all locomotives bought from Baldwin Locomotive Works should be free from the lien thereof; and the enforcement of such a provision would not depend on the parties' ability many years later to explain the reason why such a provision had been agreed on.

The listing applications should not be disregarded.

The meaning of the "exception clause" is sufficiently clear without the Court's being required to rely on the statements in the First Mortgage Bond Listing Applications which refer to this very equipment-trust rolling stock as "additional *unmortgaged* equipment * * *" (R. 1074); but we maintain that such listing applications, submitted, at the time of issue of First Mortgage Bonds, to the stock exchange which furnished the principal market for such bonds, are entitled to substantial weight.

The same statement, that equipment-trust rolling stock was unmortgaged, was contained in every listing application for First Mortgage bonds from July 16, 1925 (R. 1325-1335) to December 21, 1931 (R. 1074). Regardless of whether the First Mortgage bondholders made the statement, it constituted, in the language of this Court "a representation to future purchasers" as to the limitations of their lien (*Continental Co.* v. *U. S.*, 259 U. S. 156, 181). The relevance of the listing applications does not depend exclusively on their character as an admission against interest, as the First Mortgage Trustees seem to argue. They constitute a source of information for investors inquiring concerning the lien of the bonds, and are entitled to the same weight which would be given to a prospectus. The assertion by the Institutional Bondholders Committee that the listing statements are self-serving declarations by holders of Refunding Mortgage bonds (Brief, pp. 18-19) is wholly unjustified. As a matter of fact, the last listing application was issued some months before the Refunding Mortgage was executed.

The only First Mortgage bonds ($27,000,000 in principal amount) which had been issued before the 1925 listing application was filed were the original issue ($20,000,000) in 1916, an issue in 1921 used to purchase the Sacramento Northern Railroad properties, and an issue in 1922 to retire outstanding equipment trust certificates (R. 1046). Obvi-

ously none of the holders of these issues had relied on the equipment-trust rolling stock here in dispute, which was acquired under the agreements of 1923, 1924 and 1929, and the Baldwin lease of 1931. It follows that there is no injustice to them—as is claimed by the First Mortgage Trustees (Brief, p. 35)—in considering the listing applications as evidence of the meaning of the "exception clause."

There is no evidence that any prospectus inconsistent with the listing statements was ever distributed to purchasers of First Mortgage bonds. On the contrary, the only preliminary information concerning First Mortgage bonds which the record contains (I. C. C. Ex. 93) clearly indicates that substantial equipment was free from the First Mortgage lien. The "Specifications of Securities Offered for Sale", in connection with the issue of $1,000,000 of First Mortgage bonds in January, 1931 (before the Refunding Mortgage was created), stated (third page of Exhibit 93):

> "Said First Mortgage constitutes a first lien on the main line of railroad of the Company extending from San Francisco, California, to Salt Lake City, Utah, and branches, aggregating 1050.5 miles, more or less, of first track, the Company's terminal and other railroad properties in the cities of San Francisco, Oakland and elsewhere, and *certain* of its rolling stock and equipment * * *."

Equipment which is "free from the lien" of the First Mortgage is not made subject to its lien by any covenant in the First Mortgage.

In Part V of Point II of the First Mortgage Trustees' brief (pp. 37-50), they try to bring the equipment-trust rolling stock within their mortgage lien by arguing that the rolling stock is made subject to the First Mortgage by the provision of the granting clauses which covers, among other things, "additions", and by the covenant in Article Fourth of the Mortgage to keep the railroad supplied with "replacements and * * * additions".

In the face of the specific provision in the final paragraph (the "exception clause") of the granting clauses that equipment-trust rolling stock shall be "free from the lien hereof", the general reference to "additions" in an earlier part of the granting clauses is limited, as are the other general granting clause provisions, by the "exception clause"—so that the granting clauses need not be further considered.

The position of the First Mortgage Trustees with respect to the mortgage covenants represents a new shift of ground, abandoning the contentions on which they previously relied. Their present brief, filed 5½ years after the conclusion of the Commission hearings, is the first time that the present argument has appeared in the case. In the Commission, both before the Examiner and on objections to the Examiner's report, the First Mortgage Trustees omitted any suggestion that they relied on any part of the First Mortgage except the granting clauses. In the District Court and the Circuit Court of Appeals they introduced a claim that the maintenance covenant and the replacement covenant, referred to in our main brief in this Court (pp. 32-40), gave them a lien on so much in value of the equipment-trust rolling stock as was necessary to equal the bookkeeping entries made for depreciation on First Mortgage equipment up to the date when the Refunding Mortgage lien attached. They now virtually abandon the claim formerly made under the *second* part of the maintenance covenant and under the replacement covenant, and say that our answers to that claim (which, we believe, conclusively disposed of it) "have no bearing" (Brief, p. 45) because the real question is the effect of the word "additions" in the *first* part of the maintenance covenant.

The covenant on which they now rely significantly omits the language of the replacement covenant which states that the First Mortgage "shall constitute a first lien" on replacements of equipment which is "worn out or destroyed". The reason for this omission is apparent. They are seek-

ing not only the replacement of equipment "worn out or destroyed", but also an amount in new equipment equivalent to the book depreciation on the equipment actually in use. The entire maintenance covenant is as follows:[1]

> "Section 9.—The Company will diligently preserve all of the rights and franchises to it granted and upon it conferred and will at all times maintain, preserve and keep its railroad system and property in good repair, working order and condition and will from time to time make all needful and proper repairs, renewals and replacements and alterations, additions, betterments and improvements; and will cause each subsidiary company to preserve its rights, franchises and property in like manner and to like extent.
>
> All equipment upon which this indenture is or shall be a first lien shall be marked so as to identify the same as equipment subject to this indenture as a first lien thereon, and the Company will at all times keep such equipment in good order and condition, *reasonable wear and tear excepted*, and marked distinctively as aforesaid, and will replace such of said equipment as shall be worn out or destroyed with other equipment of at least equal value on which this indenture shall constitute a first lien.
>
> The Company will, at such times as the Trustees may request, furnish to them a complete list of all equipment upon which this indenture is or shall be a first lien; but the fact that any such equipment shall not be marked or included in such list shall not create any presumption that the same is not subject to this indenture as a first lien thereon."

When the covenant is read as a whole it is clear that the language in the first part of the covenant with regard to "additions", on which the First Mortgage Trustees rely, relates to the railroad property generally and does not apply to equipment, concerning which there is a specific provision in the succeeding paragraph of the covenant. An

[1] I. C. C. Ex. No. 5, p. 76.

argument that the use of the words "alterations, additions, betterments and improvements" means that the Railroad Company must subject to the mortgage equipment equivalent in value to the accrued depreciation is very far-fetched indeed.

One section of the First Mortgage Trustees' brief (pp. 40-43) is given over to a discussion of the *Minneapolis & St. Louis* case (36 F. (2d) 747—C. C. A. 8) and the unreported *Rock Island* decision of Judge Wilkerson (First Mortgage Trustees' brief, pp. 116-144).

These cases relate to maintenance and replacement covenants but not to the claim respecting "additions". Neither of those cases contains any discussion of the question whether maintenance or replacement covenants are brought into play by mere depreciation—particularly where, as in the present case, replacement for reasonable "wear and tear" is specifically not required. So far as appears from the language in the *Minneapolis & St. Louis* case, which interprets a replacement covenant to require that "the same value amount" of equipment be kept under the lien of the Mortgage, the holding should receive the same interpretation which we assert herein—namely, that equipment which is worn out, destroyed or disposed of be replaced with equipment of corresponding value and amount. The covenant which was being interpreted in the *Minneapolis & St. Louis* case related to the disposal and replacement of equipment which had "become unfit for such use" (36 F. (2d) at 756). There is no suggestion that the covenant required equipment to be supplemented by the amount of depreciation charged on the books of the railroad against equipment in use.

The opinion in *Chase National Bank* v. *Mobile & Ohio R. R. Co.*, (unreported—cited at page 35 of our main brief) interprets the *Minneapolis & St. Louis* case as meaning only that equipment which has become unfit for use must be replaced with new equipment of equal value. In that

case there were maintenance and replacement covenants[1] in a divisional mortgage, very similar to the covenants contained in the First Mortgage in this case.

After citing the *Minneapolis & St. Louis* case with approval, the Special Master (whose report was confirmed by the Court) stated (Report, pp. 139, 138):

> "* * * From my construction of the Montgomery Division Mortgage, the security demanded, insofar as it concerned rolling stock, was sufficient rolling stock to amount in value to the rolling stock originally purchased, subject to wear and tear. The reason I say subject to wear and tear is that *it was the intention of the parties that replacements should not be made until items of rolling stock became unfit for use*, and the evidence shows that this happened at various times over a long period."

---

[1] The covenants in the *Mobile & Ohio* case read as follows (Special Master's report, p. 132):

> "The mortgagor shall and will, until all the Montgomery Division Bonds are fully paid and satisfied, well and thoroughly keep up and maintain as fast as the same shall be constructed and opened for operation, the mortgaged line of railway as a first-class railway, and will keep the same in all respects well and sufficiently equipped, and make all necessary repairs and replacements, so to keep up in good order the mortgaged railway property, rolling-stock and equipment."

> "The mortgagor, its successors and assigns, may from time to time, dispose, according to its or their discretion, of such portion of the equipment, machinery and implements at any time held or acquired for the use of the said line of railway, as may have become unfit for such use, replacing the same by new, which shall at once be subject to the lien of this indenture without any further conveyance or mortgage; and if the Trustee so desire, the same shall be conveyed and transferred to it for the purposes and upon the trusts herein declared, in such manner as it shall be advised by counsel."

> "I believe that the parties to the Montgomery Division Mortgage intended to provide, and did provide for a lien upon all equipment originally purchased and the replacements that later were purchased, and I have so found. The latter lien would be on the rolling stock of Mobile and Ohio in valued amount sufficient to replace the original equipment *in its depreciated condition. Guaranty Trust Company* v. *Minneapolis & St. L. Ry. Co.*, supra."

The complicated formula of Judge Wilkerson in the *Rock Island* case, from which the First Mortgage Trustees attempt to spell out a requirement that *additional* equipment be placed under their mortgage to compensate for depreciation, cannot be relied upon for that purpose. In the first place, there is nothing in the opinion to indicate that the extent of replacement claims (as distinguished from the question of lien, with which the opinion was primarily concerned) was contested or, if so, the grounds upon which it was contested. In the second place, the Court refers in three successive clauses to credit for equipment necessary "to *replace*" mortgaged equipment; and, we repeat, "replace" does not mean "add equipment equal in value to book charges for depreciation on equipment in use."

Moreover, as we showed in our main brief (pp. 36-40), maintenance and replacement covenants are not self-executing, and do not create a lien on equipment not otherwise placed under a mortgage. If Judge Wilkerson's decision were construed as creating a lien on otherwise free equipment as a replacement of mortgaged equipment[1], it would be contrary to the rule of the Seventh Circuit (controlling on Judge Wilkerson) as established in *Metropolitan Trust Co.* v. *Chicago and E. I. R. Co.*, 253 Fed. 868, 879 (our main brief, p. 39), and to the other cases set forth in our main brief.

---

[1]The only First Mortgage equipment which there can be any obligation to "replace" is the net retirements, aggregating not more than $641,886 in original book value (First Mortgage Trustees' brief, p. 14).

In effect, the First Mortgage Trustees are attempting to import another limitation into the "exception clause" so that, for equipment to be "free from the lien" of the First Mortgage, it must not only not have been acquired with First Mortgage funds, but also there must be no existing depreciation of mortgaged equipment.

III

The Northern California Extension is subject to the lien of the First Mortgage only to the extent of the First Mortgage money used in the acquisition thereof.

(Answering Point III of First Mortgage Trustees' brief and Point III of Institutional Bondholders Committee's brief.)

The Northern California Extension, built at a cost of over $10,000,000, was financed only to the extent of less than half of its cost by First Mortgage money. No Supplemental indenture placing the extension under the First Mortgage lien was ever executed. It was not even a part of the line which the Debtor was authorized to operate at the time the First Mortgage was created (although later authorized); and it was not built until some 15 years after the date of such mortgage.

The brief of the First Mortgage Trustees indicates (pp. 67-68, 78-81) a misunderstanding of our argument in respect of the absence of a supplemental indenture. We do not assert that, if the Extension can be said to be covered to any extent by the after-acquired property clauses contained in the First Mortgage, a supplemental mortgage was necessary in order to perfect such coverage. The question is whether the Extension was covered by the First Mortgage to the extent of the entire issue of $50,000,000, or only to the extent of the First Mortgage money expended thereon. What we do assert is that it would be inconceivable for a supplemental mortgage to be omitted when so important an item of uncontemplated property was acquired so many

years after the date of the original mortgage, if it was intended that the Extension should come under the full $50,000,000 lien of the original mortgage—rather than under the mortgage lien to the extent of the First Mortgage money expended thereon—in spite of the fact that more than one-half of its cost was financed outside of the mortgage.

We suggest that the omission of such a supplemental indenture may well be explained by the fact that ever since the second offer by the A. C. James Company in June, 1929 (I. C. C. Ex. 46) to finance a part of the cost of the Extension, it had been known that the Extension would be built in part by First Mortgage moneys and in part by other moneys, and the relative rights were controversial. However that may be, if it had been the intention to subject the Extension to the entire $50,000,000 First Mortgage lien, it seems certain that a supplemental indenture would have been executed so providing.

Otherwise the First Mortgage bondholders would have to rely on the counsel's opinions (next mentioned) which accompanied the requests for the drawdown of cash, all of which simply stated that (see I. C. C. Exhibit 62):

> "In my opinion title to those portions of this Company's new line of railroad known as its 'Northern California Extension' * * * as to which reimbursement for deposited cash is sought by this requisition for expenditures in the matter of construction and/or acquisition, has vested in the Western Pacific Railroad Company, subject only to liens or charges certified in said certificate and to liens or charges of the character not required to be certified * * * and all said portions of said extension and said property are subject to the lien of this Company's First Mortgage, and no supplemental indenture or instruments of further assurance are necessary to subject said property, or any part thereof, to the lien of said First Mortgage, subject only to the liens and charges aforesaid."

It is no answer to suggest, as does the brief of the Institutional Bondholders Committee (pp. 26-27), that the sup-

plemental indenture was omitted because of counsel's said opinions. We do not dispute that the First Mortgage attached to the Extension; but there is nothing in the counsel's opinions (I. C. C. Exs. 61-73)—or in anything else which we have seen—which states that the First Mortgage would become a lien beyond the amount of the First Mortgage moneys expended on the property.

The Extension has been a major factor in producing revenue for the Debtor, and has shown itself to be worth at least the amount of its cost. The Refunding Mortgage Trustee asks that the creditors secured by Refunding Mortgage bonds, who supplied more than half of the money required for the construction of the Extension, and whose money enabled the Extension to be completed, be recognized as having a lien on the Extension coordinate with the lien of the First Mortgage for First Mortgage funds expended thereon, or even a second lien but subject only to the $5,000,000 which the First Mortgage creditors contributed to its construction.

In our appellant's brief before the Circuit Court of Appeals we pointed out that the argument made by the First Mortgage Trustees, if correct, would lead to the conclusion that the whole of the $10,000,000 Extension would be subject to the $50,000,000 mortgage if, for example, only $5,000 of First Mortgage moneys had been expended thereon, and that such an argument completely disregards the equities in a case wherein the First Mortgage Trustees—in asking the enforcement of after-acquired property clauses—are seeking equitable relief. In answering, the brief of the First Mortgage Trustees asserted that the Extension would be thus subject even if only "one penny" of First Mortgage money had been expended thereon. Nothing could bring out more clearly the extreme results to which their argument leads. There is no stopping point between a substantial expenditure and an expenditure of "one penny".

We do not argue for any such breaking up of the extension into scattered pieces as the First Mortgage Trustees state (Brief, pp. 75-78) under what they term our "separate segment theory". The First Mortgage Trustees, who admittedly had the burden of showing on what property their mortgage was a lien, did not undertake to show what portions of the "land for transportation purposes" were acquired with their money. It is unjustified, we believe, for the First Mortgage Trustees to assume, as they do in their brief (p. 51), that the Extension had come into existence "as a continuous right of way" before any of the Debentures (which were later converted into debt secured by the Refunding Mortgage) had been issued; or to assume, as their brief does (p. 76), that "it is a fair inference that" by December 31, 1930 "the right of way for the entire line had by then been acquired." Our argument is that, especially where it appears that the acquisition of the entire right of way was not financed under the First Mortgage, a court of equity should treat the Extension as subject to the First Mortgage only in proportion to the amount which was financed with First Mortgage money, and that this gives the First Mortgage all that it is entitled to.

Incidentally, the Institutional Bondholders' Committee is incorrect in asserting (Brief, p. 21) that the Extension was completed and put into operation on November 10, 1931. Although the tracks were laid so that trains could be run over the Extension at that time, it was still under the jurisdiction of the construction department, and was not placed in commercial operation until June 1, 1942 (Stipulation of Facts not in Dispute, R. 1077)—a fact which is recognized in the brief of the First Mortgage Trustees (p. 50).

The brief of the First Mortgage Trustees quotes (at pp. 70-71) granting clause Third, paragraph (a) of the First Mortgage. The First Mortgage Trustees' brief argues (p. 70) that this clause

> "is stated in the alternative: an after-acquired extension falls within the scope of the after-acquired

property clause, if either (1) the extension be 'acquired or constructed' by the use of First Mortgage Bonds or deposited cash, or (2) First Mortgage Bonds or deposited cash be taken down 'on account of the purchase, acquisition or construction thereof or work thereon.'

The difference between the two alternatives is apparent from the words used. The first alternative must contemplate a financing entirely by the use of First mortgage Bonds or deposited cash; the second alternative, with the words 'on account of', and the words 'or work thereon', must contemplate a financing in part by such means. In either case, the extension falls within the scope of the after-acquired property clause, and there is no language which suggests an intent that the lien of the First Mortgage should attach to an extension financed in part by the use of First Mortgage Bonds or deposited cash to a lesser extent than would be the case if the extension were financed entirely by such means."

The question immediately arises as to why there were alternative provisions. If it was intended that the extension should be subject to the entire First Mortgage lien independent of the amount of First Mortgage moneys expended, there would have been no reason for the alternative. If the extension would have been thus subject to the entire First Mortgage lien in the event that First Mortgage bonds or deposited cash be taken down "on account of the purchase, acquisition or construction thereof or work thereon", this would have taken care of the entire situation. It certainly would not have been necessary to provide also that the Extension would be subject to such lien if totally financed by First Mortgage bonds or deposited cash.

We agree with their argument to the extent that we make no assertion that extensions financed in part by First Mortgage bonds or deposited cash are wholly free from the First Mortgage. Our argument is that such an extension is entirely subject to the First Mortgage if wholly financed by

First Mortgage bonds or deposited cash; that if financed only in part by such bonds or cash it is subject to the First Mortgage lien to the extent so financed; and that the mortgage itself shows the intention to differentiate between the case where the financing is done entirely by the use of such bonds or cash and the case where it is only partially so done. We suggest that the reason for the differentiation may well have been to recognize that the money extent of the mortgage lien would depend upon the amount of First Mortgage moneys used in the financing.

In this connection, we again refer to the authorities cited in our main brief (pp. 20-21) holding that, in order to extend the coverage of a mortgage by its after-acquired property clauses, the terms employed must "imperatively demand" the construction contended for. This test has not been met.

Both the First Mortgage Trustees and the Institutional Bondholders' Committee make much of Mr. A. C. James' connection with the financing of the Extension, the Committee stating (Brief, p. 27) that the James interests are "in equity estopped" to make any claim that the Extension is not subject to the entire First Mortgage issue. No such claim is made against the other Refunding Mortgage creditors. This statement is not justified, even against the James interests. The most that can be said is that Mr. James knew that $5,000,000 of First Mortgage money was going into the Extension, and that such money was entitled to a lien which could not be displaced; but there is nowhere any proof that he understood that the Extension would be subject to the Mortgage lien beyond the amount of the First Mortgage moneys expended. It is significant that, as the figures set forth in the First Mortgage Trustees' brief (pp. 46-47) show, the total amount of expenditure certified to the First Mortgage Trustees was only $5,000,000. There was thus no representation to the First Mortgage Trustees that they were obtaining a lien in excess of the First Mortgage funds expended. And, as we have pointed out in our main

brief (pp. 37-38), the "specifications of the securities offered for sale" when the First Mortgage Bonds were issued carefully avoided stating that the First Mortgage debt would be a first lien on the Extension. It is true that the specifications under which the Debentures were purchased by A. C. James Company referred to the Extension as to be a part of the "main" line, and that the Specifications contained the statement set out in the First Mortgage Trustees' brief (p. 60) and in the Institutional Bondholders Committee brief (p. 23) as follows:

> "The First Mortgage of this Company dated June 26, 1916, securing this Company's First Mortgage Bonds, whereunder not more than $50,000,000 thereof may be outstanding at any one time, is a first lien on said main line of railroad."

We believe that the words "whereunder not more than $50,000,000 thereof may be outstanding at any one time" are merely descriptive of the First Mortgage, and fall far short of establishing that the entire $50,000,000 lien would fasten to the Extension independent of the amount of First Mortgage moneys expended thereon. The "main line" referred to in said Specifications was stated as aggregating 1956.5 miles (prior to the construction of the Extension of 112 miles (R. 1076)), so that as to most of the railroad it was correct to refer to the $50,000,000 lien. However, there was no necessity, in generally-worded specifications of this nature, to define the money extent of the First Mortgage lien on the Extension, provided always that the First Mortgage lien, to such extent as it should attach, should not be displaced.

As illustrative of the loose manner in which the lien of the First Mortgage on the Extension was described, it should be noted that in its application to Reconstruction Finance Corporation, dated February 5, 1932, for the loan which included the first R. F. C. advance of $259,000 on account of the Northern California Extension (I. C. C. Ex. 82), the Debtor stated (I. C. C. Ex. 82, sheet 6 in Schedule

P) that $259,000 was required to pay contractors for work in constructing the "branch line", that is, the Northern California Extension (see First Mortgage Trustees' brief, p. 65), and furthermore, the property of the Debtor was described as consisting of 925.706 miles of main line with various branches, including the Northern California Extension, "making a total of main line and branch line mileage of approximately 1163 miles". Thus, in spite of the earlier description of the Northern California Extension as a part of the "main line", it was later classified not as "main line" but as "branch line". This gives point, we believe, to our statement that the extract just quoted from the specifications was a general description and was not intended to settle such controversy as might later arise as to the extent of the First Mortgage lien.

Whatever may have been the situation prior to the time and at the time (February 27, 1931—First Mortgage Trustees' brief, p. 62) when the first of the Debentures were issued, it should be noted that the situation changed materially by the time when the Refunding Mortgage was executed (February 29, 1932—R. 1022).

While it is true that the $5,000,000 originally advanced for the completion of the Extension was advanced in return for the Debentures (Stip., par. 99, R. 1078), it is not entirely accurate to say that they were "unsecured". In the original proposal of the A. C. James Company (I. C. C. Ex. 45), which was not acted upon, it was stated that its advance of $5,000,000 was to be secured by a "first lien" upon the Extension, and that the new trust indenture should expressly provide:

> "* * * you will not place any additional mortgage indebtedness upon any other real property owned by you, over and above the bonds authorized under your present existing first mortgage of June 26, 1916, without providing, from the proceeds of such additional financing, for the redemption of these bonds."

The subsequent proposal (I. C. C. Ex. 46), which was acted upon, omitted the demand for a "first lien"; but it continued the requirement for the redemption of the Debentures in case that any further lien (other than authorized first mortgage bonds) should be placed upon the Railroad Company's real property. The last mentioned provision was embodied in the indenture under which the Debentures were issued (I. C. C. Ex. 50, p. 32). Not only was this provision embodied in the indenture, but it came into full force and effect because the First Mortgage bonds and the Debentures were not sufficient to finance the Extension, and it was necessary to borrow an additional amount of over $500,000 from the Reconstruction Finance Corporation and to secure said loan by a lien (i. e. the Refunding Mortgage) on the property (Stip., pars. 99, 112-123, R. 1078, 1084-1089). Therefore, the Debentures were in effect redeemed (Refunding Mortgage, I. C. C. Ex. 6, pp. 2-3); but the holder thereof, instead of receiving cash, accepted a new note secured by Refunding Mortgage bonds (Stip. pars. 116, 117, R. 1085-1086).

The retirement of the Debentures and the simultaneous issuance of a new note secured by the Refunding Mortgage bonds created a new transaction—just as if the holder of the Debentures had received cash in redemption and then had reloaned the cash upon the security of the Refunding Mortgage. Thus, not only the other creditors but also the A. C. James Company, as the holder of the originally-issued Debentures, have come into their existing position in proper reliance upon the lien of the Refunding Mortgage; and there is no estoppel against A. C. James Company except to prevent it from asserting—what never has been asserted—that the first lien of the First Mortgage, to the extent of the First Mortgage moneys expended thereon, has been displaced.

The First Mortgage Trustees rely (Brief, p. 57) on statements, in the resolutions accompanying the requests for draw-down of First Mortgage cash, that "all portions

of said extension which have been constructed and/or acquired being subject to the lien of said First Mortgage and now in the possession of this Company" (I. C. C. Ex. 62, sheet 10). However, the opinions of Debtor's counsel which accompanied said resolutions carefully described as subject to the First Mortgage not all portions constructed or acquired, but only "those portions as to which reimbursement from deposited cash is sought by this requisition" (I. C. C. Ex. 62, sheets 8-9). The language of the resolutions must be interpreted in the light of the opinions of counsel which accompanied them, and should not be given any broader effect.

The First Mortgage Trustees also rely (Brief, p. 57) on statements in the officers' certificates that "so far as known or believed by us the property so constructed or acquired as aforesaid, is not subject to any lien or charge, except (a) necessarily undetermined liens or charges ordinarily incident to construction and (b) the lien of said First Mortgage" (I. C. C. Ex. 62, sheet 11). These certificates can have no relation to the lien of the Refunding Mortgage since they were all executed *before the date of execution of the Refunding Mortgage* (Stip. Par. 109, R. 1081). They contain no assurance that the First Mortgage was a lien for $50,000,000 upon an Extension to which it contributed $5,000,000.

The First Mortgage Trustees also rely (Brief, p. 66) on the following statement contained in the application to the Reconstruction Finance Corporation for a loan on May 23, 1932 (I. C. C. Ex. 87, p. 15):

> "The General and Refunding Mortgage is a first lien on certain securities having a book value of $2,374,655, and a second lien on all of the remaining property of the Railroad Company, subject only to $49,290,100 First Mortgage Bonds now outstanding and $4,550,000 of Equipment Trust Certificates."

Upon its face this is merely a loose and general statement. It is true as to most of this large railroad property:

but it is slim ground upon which to rely for a contention that the Refunding Mortgage was thus excluded from a *pari passu* lien on the Extension. The careful specification in the Refunding Mortgage that it was subject to the First Mortgage "only in so far (in extent * * * or otherwise)" as the same attached to any of the Debtor's property, may not be nullified by such a statement.

III

The First Mortgage is not a lien on non-carrier real estate.

(Answering Point IV of the First Mortgage Trustees' Brief, and Point IV of the Institutional Bondholders Committee's brief).

The Institutional Bondholders Committee set up a straw man in the first part of their Point IV, in arguing concerning the effect of the 1934 subordination agreement on the cash and receivables which the Debtor had on hand when the reorganization proceedings began. No claim to those items has been made by the Refunding Mortgage Trustee in this Court or in the court below.

In respect of the non-carrier real estate, the Institutional Bondholders Committee asserts (Brief, p. 33) that First Mortgage money has been spent on the Islais Creek property. This statement is extremely misleading, for the property which was acquired with the First Mortgage moneys referred to by the Committee is not the same property which the Refunding Mortgage Trustee claims. No First Mortgage money was used on the portions of the Islais Creek property which were owned at the date of the First Mortgage. Although substantial amounts were spent for improvement or benefit assessments on such property, the Debtor carefully refrained from making any of them the

subject of requisitions against First Mortgage bonds or cash, and all of them remained on the list of uncapitalized expnditures (I. C. C. Ex. 31—lines 1565, 1694, 1715, 1752 etc—R. 2694) at the time of the reorganization.

The Islais Creek property which the Debtor owned in 1916, and which is the principal real estate item in dispute, was never carrier property. Its description as "non-carrier" property was not a mere change in accounting classification by the Interstate Commerce Commission, as the First Mortgage Trustees suggest (Brief, p. 99), but a recognition of what had always been true. It was based upon a finding by the Commission (Ex. 104, p. 276) that the lands were not used for carrier purposes on June 30, 1914 (prior to the date of the First Mortgage), and that there was then no prospect of their use for such purposes.

Although the First Mortgage Trustees argue (Brief, pp. 99-103) that the First Mortgage provisions are broader than the description of the First Mortgage lien in the 1915 reorganization plan and that the plan language does not control, it is significant that the only prospectus for First Mortgage bonds which is in the record (Ex. 93, p. 3) repeats substantially the language of the 1915 plan with respect to the extent of coverage, stating:

> "Said First Mortgage constitutes a first lien on the main line of railroad of the Company extending from San Francisco, California, to Salt Lake City, Utah, and branches, aggregating 1050.5 miles, more or less, of first track, the Company's terminal and other *railroad* properties in the cities of San Francisco, Oakland and elsewhere, and certain of its rolling stock and equipment. * * *"

The claim to a lien on the non-carrier real estate is not altogether consistent with what the First Mortgage Trustees argue (in their Point I) was the "underlying purpose" of the First Mortgage, to give a lien on the "*railroad* enterprise as an *operating* entity". In the absence of a clearer reason for including it than is stated in the respondents' briefs, it should be treated as unmortgaged property.

IV

Answering the "practical interpretation" claimed by the Institutional Bondholders Committee.

The Institutional Bondholders Committee argue (Brief, pp. 37-38) that the Refunding Mortgage Trustee's claims of priority are entitled to little weight because of the concession of the First Mortgage priority in various plans which were proposed during the course of the proceedings. Their brief neglects to state that the plans proposed by A. C. James Company, Reconstruction Finance Corporation, and the Debtor (which proposals, of course, represent compromises rather than statements of legal position) each provide for a substantial *quid pro quo* in return for the concession of priority. Each of the plans referred to provided for a capitalization adequate to satisfy the claims of the Refunding Mortgage creditors in full and leave something over for the Debtor's general creditors and stockholders (of which A. C. James Company is one).

The willingness of parties to concede one position in order to gain another one in no way deprives them of their right to insist on the original position if the compromise fails, and should not be referred to as an admission any more than any unconsummated settlement negotiations.

In asserting "practical interpretation" as against the Refunding Mortgage creditors, the brief of the Institutional Bondholders Committee states (p. 38):

> "No specific provision for the relative participation of the First Mortgage Bondholders and the collateral noteholders was made in any proposed plan which did not recognize such priority, until the filing before the District Court of the ACJ objections on December 8, 1939, containing the suggestion by ACJ of a wholly new plan never therefore discussed."

This statement may well carry the inference that the A. C. James interests and the other Refunding Mortgage creditors did not dispute the priority of the First Mortgage until they came before the District Court. Such an inference would be entirely contrary to the fact. The priority of the First Mortgage in respect of the properties now in question was disputed during the taking of testimony before the Commission and in the briefs filed with the Commission.

Conclusion

The decrees of the Circuit Court of Appeals should be modified in accordance with the prayer of petitioner's main brief, and the proceeding referred back to the Interstate Commerce Commission for appropriate modification of the reorganization plan.

New York, October 10, 1942.

Respectfully submitted,

H. C. McCOLLOM,
Attorney for petitioner, Irving Trust Company, as Trustee under Debtor's Refunding Mortgage.

ORRIN G. JUDD,
Of Counsel.

Supreme Court of the United States

October Term, 1942

No. 61

IN THE MATTER

of

THE WESTERN PACIFIC RAILROAD COMPANY, a corporation,

Debtor.

IRVING TRUST COMPANY, as Substituted Trustee under the General and Refunding Mortgage of The Western Pacific Railroad Company,

Petitioner,

against

CROCKER FIRST NATIONAL BANK OF SAN FRANCISCO and SAMUEL ARMSTRONG, as Trustees under The Western Pacific Railroad Company First Mortgage dated June 26, 1916; FREDERICK H. ECKER, JOHN W. [2] R. 2663.

JURISDICTION

The jurisdiction of this Court is invoked under Section 240(a) of the Judicial Code, as amended by the Act of February 13, 1925 [28 U. S. C. § 347(a)].

QUESTIONS PRESENTED

The issue upon the writ of certiorari granted to Irving Trust Company, as Refunding Mortgage Trustee, is whether the Interstate Commerce Commission (hereinafter called the Commission) and the United States District Court for the Northern District of California, Southern Division, were correct in denying the Refunding Mortgage Trustee's claims

(1) that the Refunding Mortgage is the sole lien on the Debtor's equity in equipment bought for use and used on First Mortgage lines, the purchase of which was financed by the Debtor under equipment trust agreements;

(2) that the lien of the First Mortgage upon the Northern California Extension is limited to either (a) a lien upon only a part of the mileage of the Northern California Extension, the Refunding Mortgage being a first lien upon the remainder of the Extension, or (b) a lien only upon an undivided interest in the entire Extension *pari passu* with a lien of the Refunding Mortgage upon the remaining undivided interest; and

(3) that neither Mortgage is a lien on certain so-called non-carrier real estate, or on cash or current assets on hand at the date of the institution of this proceeding, and that, therefore, the Refunding Bonds

are entitled to new securities representing an interest therein on the basis of an alleged deficiency judgment on the Refunding Mortgage Bonds.

As indicated in the main brief of the Institutional Bondholders Committee (hereinafter called the Committee) upon its own writ of certiorari (No. 7), the Committee agrees with the Refunding Mortgage Trustee that, notwithstanding the failure of the Circuit Court of Appeals to pass upon these issues properly raised before it, this Court should determine the issues in order to expedite the Western Pacific reorganization.

STATEMENT

The Committee will rely on the answering brief of the Trustees under the First Mortgage for a detailed statement of the facts and the law establishing the fallacy of the Refunding Mortgage Trustee's contentions.

On the one hand, the brief of the Refunding Mortgage Trustee omits to state most of the material facts upon which determination of the three claims must depend. On the other hand, in order to avoid any failure to disclose any of the material facts the non-disclosure of which would make those disclosed misleading, the answering brief of the First Mortgage Trustees has stated the relevant facts in most complete detail. The Committee therefore believes that it will be of assistance to this Court to accent, from among the many relevant facts, those which, in the Committee's opinion, conclusively negative any basis for the three contentions.

ARGUMENT

I

THE GRANTING CLAUSES OF THE FIRST MORTGAGE

The Granting Clauses of the First Mortgage[1] strikingly evidence the intent of its draftsman to accomplish two major purposes:

(1) that the First Mortgage should in the first instance constitute a first lien upon the entire venture taken over by the Debtor from its predecessor in the 1916 reorganization; and

(2) that the First Mortgage should draw to itself, through its after-acquired property clauses, a first lien on all property of every character thereafter acquired by the Debtor for use in connection with the mortgaged property or on account of the acquisition or construction of which, or any work thereon, any First Mortgage Bonds or proceeds thereof were expended.

The draftsman made it abundantly clear that this First Mortgage was to be and remain a first lien for the aggregate amount of Bonds at any time outstanding upon that enterprise as an entirety and that no loopholes were to be left whereby the effective lien upon the enterprise might be whittled away by the Debtor, whether intentionally or unintentionally, for the benefit of subsequent creditors.

---

[1]These Granting Clauses are set forth in full at R. 1215-29.

Granting Clause First covers both in detail and by a general statement all "real and personal property and interests and rights in property" which had been owned by the Debtor's predecessor in title, "or to which it may be entitled," except only cash items. Paragraphs I to VI, inclusive, cover in detail the specific railroad lines and classes of property. Paragraph VII covers "All and singular the property, interests and rights" [except cash items] "which belong to the Company or to which it may be entitled in any manner and which heretofore were owned by" the Debtor's predecessor in title.

To make certain that there was no mistake of the purport of Paragraph VII, Granting Clause Second subjected to the Mortgage

> "All other lines of railroad, extensions, branches, terminals, lands, structures, equipment, shares of stock, bonds, notes and other securities, claims, franchises, privileges and immunities and other property and estates, interests and rights (whether legal or equitable) now owned by or belonging to the Company, notwithstanding the same or any thereof may not be particularly set forth in these granting clauses."

This probably is the language to which the Refunding Mortgage Trustee's brief refers in its cautious concession that "there is some language in the First Mortgage which may be broad enough to cover pre-existing non-carrier real estate" (p. 53). That characterization is a considerable understatement. The language above quoted makes it clear that as to all property which the Debtor owned or to which it was entitled on the date of the execution of the First Mortgage, June 26, 1916, (whether or not such property

was of a character which by subsequent accounting practice later became known as "carrier" or "non-carrier" property) the First Mortgage became and remains a first lien.

Granting Clause Third covers "Any and all property and facilities of any and every kind and description * * * which may from time to time hereafter be acquired or constructed by or belong to" the Debtor if such after-acquired property falls within one of four specified categories:

(1) If any "First Mortgage Bonds or proceeds thereof or cash deposited" under the First Mortgage have been authenticated or paid out "*on account of* the purchase, acquisition or construction thereof or work thereon;"[1] or

(2) If the property constitutes "an integral part or parts of lines of railroad, extensions, branches, or other property subject to the lien" of the First Mortgage "or some other integral portion whereof is * * * subject to the lien hereof;" or

(3) If the property is "used or acquired for use in or for the maintenance or operation of or appertaining to" any of the property subject to the lien of the First Mortgage; or

(4) If the property consists of securities of named companies or of any subsidiary company, as defined.

Granting Clause Fourth covers all properties which might thereafter be specifically mortgaged or pledged with

[1]All italics in quoted matter throughout this brief have been supplied, unless the contrary is indicated.

the First Mortgage Trustees, and is not relevant to any of the issues here in controversy.

Granting Clause Fifth covers, with a multiplicity of verbiage, substantially every kind of property and facility used or useful in the operation of a railroad (including, expressly, *equipment*) and

> "all other property of every description and *all rights and interests in or with respect to the use of property* * * * whether now owned by the Company or *at any time hereafter acquired* by it * * * appurtenant to or *used* or held for use as, or as a part or as parts of, or *to facilitate* or safeguard the *maintenance or operation of, any lines of railroad, extensions*, branches, * * * or other properties now or at any time hereafter subject to the lien of this indenture—whether the same exclusively appertain to or be used as parts of or in or for the maintenance or operation of lines of railway or other properties subject to the lien hereof or appertain to or be so used as parts of or in or for the maintenance or operation of such lines of railroad or other properties in common with lines of railroad or property not subject to the lien hereof; * * * also any and all *replacements* * * * of and *additions* to * * * any property or rights of whatsoever description now or at any time hereafter subject to the lien of this indenture, whensoever and by whomsoever such replacements * * * or additions may be made."

Granting Clause Sixth covers all possible "estates, rights, titles, interests, possession, claims and demands, whatsoever, *as well at law as in equity*," of the Debtor in or to any property, including expressly equipment and lands.

There then follows a proviso permitting the Debtor by the use of free funds to acquire property free of the lien

of the First Mortgage, *but only if such property is not of the character described in one of the four sub-divisions of Granting Clause Third* (see p. 6, *supra*). This, it will be noted, is not one of those "free funds" provisions, such as were involved in the mortgages construed in the *Wabash*[1] and *Rock Island*[2] cases discussed by the Refunding Mortgage Trustee at pages 27 to 32 of its brief, under which all equipment purchased with free funds, whether or not for use upon the mortgaged lines of railroad, was to be excluded from the lien of the mortgage.

It will thus be seen that, by the express provisions of these Granting Clauses, all property and rights in property which the Debtor acquired after June 26, 1916, became subject to the First Mortgage,—except only property which was in substance of a character wholly independent from the Debtor's properties owned at the time of the creation of the Mortgage or thereafter subjected to it, and even then only if no First Mortgage Bonds or proceeds thereof were used "*on account of* the purchase, acquisition or *construction* thereof *or work thereon.*"

In the light of these Clauses it is clear that all the Debtor's property (except only the Tidewater Southern stock and note, the Central California Traction stock and bonds, the Alameda Belt Line stock, and cash) is subject to the lien of the First Mortgage.

Following the so-called "free funds" proviso is a clause permitting the financing of equipment purchases by purchase money liens prior to the lien of the First Mortgage either through the device of "lease, conditional sale agree-

---

[1] *Equitable Trust Co.* v. *Wabash Railroad Co.*, (unreported, D. C. Mo., 1921).

[2] *In re Chicago Rock Island & Pacific Ry.*, (unreported, D. C. Ill., 1939).

ment * * * or equipment trust" under which legal title would be retained by the vendor, the Debtor obtaining only an "equity," or by chattel mortgage permitted to be "superior to the lien of" the First Mortgage. These latter clauses, which will be discussed later in greater detail, thus permitted the lien of the First Mortgage upon new equipment so acquired by the Debtor to be subordinated to the lien of the financing media, as was made doubly clear by the Habendum Clause,

> "Subject, However, * * * as to equipment hereafter acquired, to the equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby, * * *."[1]

The grant and conveyance under the First Mortgage is expressed to be "in order to secure the payment of *all of said bonds* * * * at any time issued and outstanding * * *."

The grant in trust is expressed to be "for the equal and proportionate benefit and security of all present and future holders of First Mortgage Bonds * * * without preference, priority or distinction as to lien or otherwise of one bond over any other bond * * * so that each and every bond hereby secured shall have the same right, lien and privilege * * * and * * * be equally and proportionately secured hereby, as if all the First Mortgage Bonds had been made, * * * delivered and negotiated simultaneously * * *."

The Granting Clauses thus make the First Mortgage a lien for the full amount of the debt thereunder upon all the Debtor's initially acquired property, upon all property and rights in property thereafter acquired for use in connection with any of the First Mortgage property and upon all property "on account of the purchase, acquisition or con-

[1]R. 1230.

struction thereof or work thereon" First Mortgage Bonds or their proceeds are used. Not a shadow of foundation can be found for the suggestion that upon any specific piece of property the First Mortgage is a lien only to the amount of the First Mortgage Bonds or proceeds thereof spent on that particular piece of property. It is doubtful that any responsible issuer has ever imposed on the public any such financial monstrosity as would result from this suggestion of the Refunding Mortgage Trustee.

This First Mortgage is clear that, if any proceeds of First Mortgage Bonds have been spent in connection with the acquisition or construction of any piece of property, or any work thereon, that piece of property, *as an entirety*, must be subjected to the First Mortgage as security for the First Mortgage debt *as an entirety*. The Refunding Mortgage Trustee's attempted "interpretation" of the First Mortgage would produce the absurdities (1) that it was the intent of the First Mortgage to permit its security gradually to be frittered away as property existing in 1916 was replaced by new property, particularly in respect of equipment, and (2) that upon a foreclosure of the First Mortgage the Court would have to go up and down the lines of the system, find the specific bits of property in respect of which First Mortgage moneys had been expended, and, if such property had not been acquired entirely by the use of First Mortgage funds, grant to the First Mortgage Bonds security only in the proportion which their funds had contributed to the cost of the particular bits of property. The accounting problems involved in giving effect to any such construction, quite apart from the injustice to the First Mortgage Bondholders, demonstrate the unrealistic character of the suggestions of the Refunding Mortgage Trustee.

II

THE FIRST MORTGAGE LIEN ON EQUIPMENT

Admittedly, every unit of equipment owned by the Debtor, whether acquired through equipment trusts or otherwise, was in fact used on the lines of railroad subject to the First Mortgage as a first lien.[1]

This equipment, it is also conceded, would be subject to the First Mortgage as a first lien, notwithstanding no issue of First Mortgage Bonds in connection with its acquisition, if its acquisition had been financed by cash payments out of earnings or by chattel mortgage or by a combination of those two methods. But because of the chance circumstances that three lots of equipment necessary to the operation of the First Mortgage properties were purchased under Philadelphia Plan equipment trusts in 1923, 1924 and 1929, and a fourth lot was purchased under the Baldwin Lease of 1931 (the vendor in each case reserving legal title and the Debtor immediately obtaining only a right of use and ultimate acquisition), the Refunding Mortgage Trustee claims a prior lien under the Refunding Mortgage created in 1932.

It is submitted that by the terms of the Granting Clauses of the First Mortgage (Clauses Third, Fifth and the proviso relating to free funds), all right and interest of the Debtor to use and ultimately acquire title to that equipment, *i. e.*, the equity of the Debtor, is subject to the lien of the First Mortgage in priority to the Refunding Mortgage. The payments, from time to time as they become due, of instalments of equipment trust certificates

---

[1]R. 1075.

(both those prior to the creation of the Refunding Mortgage in 1932, and those since the creation of the Refunding Mortgage), have operated to feed the security afforded by the First Mortgage to the extent of the Debtor's increasing equity in the equipment resulting from such payments. Those additions to the security more or less offset the constant depreciation in value of all the equipment upon which the First Mortgage is a first lien.

The Refunding Mortgage Trustee's answer is that the Court should wrench from its context the equipment financing clause at the end of the Granting Clauses of the First Mortgage which permits subordination of the First Mortgage lien to equipment obligations issued to finance new equipment, and should then construe that clause to negative the effect of all the other provisions of the First Mortgage with respect to equipment. The clause, which is a part of the "free funds" proviso, reads as follows:

> "and the Company may, unless First Mortgage Bonds shall have been authenticated and delivered or their proceeds or other cash deposited hereunder paid out against the same, purchase and acquire equipment, *free from the lien hereof,* by lease, conditional sale agreement or under any form of equipment trust, or purchase such equipment and issue obligations therefor secured by mortgage or pledge of such equipment *superior to the lien of this indenture.*"[1]

To this contention of the Refunding Mortgage Trustee the Commission and the District Court correctly accepted as a complete answer the fact that the clause must be construed, not only in the light of the language which pre-

[1] R. 1229.

cedes it in the same paragraph evidencing the intent that the First Mortgage should be a lien upon a railroad venture as an entirety (*i. e.*, not only the rails but all rights in respect of equipment used on the rails), but also in the light of the subsequent paragraph of the Habendum Clause which reads:

> "SUBJECT, HOWEVER, * * * as to equipment hereafter acquired, to the equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby, * * *."[1]

As the Commission concisely stated in its Original Report:

> "If all equipment acquired under equipment trusts was to be entirely free of the lien of the first mortgage, it is not apparent why the words 'equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby' were made part of the last quoted provision."[2]

The Refunding Mortgage Trustee urges, in reply to the Commission, that the quoted reference is to a provision of the First Mortgage claimed by the Refunding Mortgage Trustee to permit financing of an equipment purchase by the use of both First Mortgage Bonds and equipment trust certificates at the same time. The difficulty with the Refunding Mortgage Trustee's reply is, as pointed out in the brief of the First Mortgage Trustees,[3] that there is no such provision in the First Mortgage, and, as a matter of reasonable and sound financing, there couldn't be.

---

[1]R. 1230.
[2]R. 266.
[3]Answering brief of the First Mortgage Trustees, pp. 25-28.

The Refunding Mortgage Trustee appeals to what it calls a "practical interpretation" of the First Mortgage.[1] The Committee agrees that a "practical interpretation" must be made of the equipment financing clause in the light of the customary methods of purchasing railroad equipment. The purpose of the clause becomes simple and clear, despite the efforts of the Refunding Mortgage Trustee to becloud it, when the practical methods of purchasing railroad equipment are kept in mind. Upon buying equipment, the Debtor might (1) pay for it in cash out of so-called free funds; (2) finance it by the issue of First Mortgage Bonds; (3) finance it by chattel mortgage; or (4) finance it by "* * * lease, conditional sale agreement or under any form of equipment trust * * *."

While legal title to the purchased equipment would vest in the Debtor under the first three enumerated forms of acquisition, under the fourth form of acquisition the technical legal title would remain in the lessor, conditional vendor or equipment trustee as security, the Debtor having only the rights of use and of ultimate acquisition of technical legal title upon full payment of the equipment obligations. These rights are commonly referred to as the "equity" of the purchaser.

It is undisputed that as to all equipment purchased by the Debtor under either the first or second of the above enumerated forms of financing, the First Mortgage would become a first lien, in both cases because of the lien of the First Mortgage upon all Debtor-owned railroad property, including equipment, and in the second case, also because of financing the purchase out of the proceeds of First Mort-

[1]Refunding Mortgage Trustee's brief, p. 26.

gage Bonds. It is equally undisputed that had the Debtor purchased any equipment under the third form of financing (chattel mortgage), the First Mortgage would have become a lien thereon subject only to the superior lien of the chattel mortgage upon the purchased equipment. This is expressly provided by the last few words of the very equipment financing clause which the Refunding Mortgage Trustee attempts to misconstrue. The Refunding Mortgage Trustee's position therefore is that, merely because the equipment here in question happened to be financed by the fourth specified method, not only the legal title thereto, but all rights of the Debtor therein, are wholly free from the lien of the First Mortgage.

With the practical facts in mind, analysis of the clause itself evidences that the words upon which the Refunding Mortgage Trustee relies, viz., "free from the lien hereof," were used in the technical sense that the legal title to the equipment could be vested in the trustee of an equipment trust and that *such legal title* would be free from the lien of the First Mortgage.

The fact that the clause goes on to provide that obligations created by the Debtor in the purchase of such equipment might be "secured by mortgage or pledge of such equipment superior to the lien of this indenture" clearly indicates an intent that the equity or rights of use and acquisition of the Debtor in equipment subject to such "lease, conditional sale agreement or * * * form of equipment trust," as contrasted with the legal title, should be subject to the lien of the First Mortgage. That right of use and acquisition is expressly subjected to the lien of the First Mortgage by Granting Clause

Fifth, which covers "all rights and interests in or with respect to the use of property * * * at any time hereafter acquired * * * for use * * * to facilitate or safeguard the maintenance or operation of" any of the property subject to the lien of the First Mortgage.

The purpose of the equipment financing clause, therefore, was not to create an exception to *any* coverage by the First Mortgage of all equipment used upon the lines of railroad subject to that Mortgage, but to create an exception only to the *first lien character* of that First Mortgage coverage. The purpose of that exception was to permit the financing of new equipment either by the conventional form of equipment trust under which the legal title is not immediately vested in the purchaser, or by the chattel mortgage form of equipment obligation under which the purchaser gets legal title subject to a purchase money lien. Any other construction would produce the highly strained result that whether the rights and interests of the Debtor in equipment purchased for use on lines of railroad subject to the First Mortgage became (a) subject to the lien of that Mortgage or (b) wholly free from the lien of that Mortgage would depend upon the pure accident of the method which the Debtor chose for financing the purchase, or, worse, upon design of the Debtor hostile to the interests of the First Mortgage Bondholders.

Since the lien of the First Mortgage, by its express terms, attached to all the Debtor's rights of use and acquisition in all such equipment trust equipment immediately upon its being acquired by the Debtor, notwithstanding that the legal title was technically in an equipment trustee, there was no necessity of incorporating in the First Mortgage any express provision that, as the senior lien of the equipment

obligations disappeared through payment, the lien of the First Mortgage on the Debtor's rights in the equipment should thereby increase. Three times in its brief,[1] however, the Refunding Mortgage Trustee urges that the inclusion of such an express provision in the Refunding Mortgage in 1932 must be taken as indicating that its omission from the First Mortgage in 1916 left in the First Mortgage a gap through which all the equipment on the First Mortgage lines could be drained away from the First Mortgage Bondholders. But the inclusion of such an express provision in the First Mortgage in 1916 would have been clearly surplusage in the light of all the provisions of the Granting Clauses already quoted. Indeed, it was surplusage in the Refunding Mortgage in 1932. That provision is but an illustration of the increasing excess of care taken by draftsmen of corporate documents over the period between 1916 and 1932 in working out provisions to lay the ghosts of such unfounded contentions as that of the Refunding Mortgage Trustee.

The Refunding Mortgage Trustee also seems to make a point of the fact that "application of * * * money obtained from Refunding Mortgage creditors" had reduced the indebtedness under the equipment obligations outstanding under the equipment trusts and lease in question.[2] The term "Refunding Mortgage creditors" must have been carefully chosen by the Refunding Mortgage Trustee to avoid any misleading implication that any payments of the equipment obligations were funded under the Refunding Mortgage, either through the issue of Refunding Mortgage Bonds or the use of cash deposited under that Mortgage. The facts are that no such moneys were so provided, that of

---

[1]Pages 19, 22 and 25.

[2]Brief of Refunding Mortgage Trustee, p. 17.

the three pledgees of Refunding Mortgage Bonds, ACJ[1] and RCC provided no such moneys, and that out of moneys borrowed against the RFC Notes secured by the pledge of Refunding Mortgage Bonds and other collateral, $406,466 was applied in 1935 to one maturity of the 1923 equipment trust obligations and one maturity under the Baldwin Lease.[2] These payments could not operate to divest any part of the lien of the First Mortgage upon the Debtor's rights in the equipment.

Reference has been made to the Refunding Mortgage Trustee's argument for a "practical interpretation" of the First Mortgage. It bases its argument upon certain of the Debtor's Listing Applications for First Mortgage Bonds.[3] When the facts, omitted from the Refunding Mortgage Trustee's brief, with reference to these Listing Applications are appreciated, the argument becomes a somewhat weird reversal of the general doctrine enunciated by this Court in *Taylor* v. *Standard Gas & Electric Co.*, 306 U. S. 307 (1939).

In those Listing Applications, the first in 1925 and the last in 1931, the Debtor, one of the James Interests corporate entities,[4] described the equipment in question as "un-

---

[1]Hereinafter the following abbreviations are used: ACJ—A. C. James Co.; RCC—Railroad Credit Corporation; RFC—Reconstruction Finance Corporation; WP Corp.—Western Pacific Railroad Corporation.

[2]R. 1055.

[3]Refunding Mortgage Trustee's brief, p. 26.

[4]As noted in the Committee's main brief (p. 50), the interests controlled by Mr. A. C. James (now his estate) own, in addition to the ACJ Notes, more than $8,000,000 of the First Mortgage Bonds of the Debtor and 8.76% of the outstanding Preferred Stock and 61.2% of the outstanding Common Stock, or 40.36% of all the outstanding capital stock, of WP Corp. WP Corp., with its 100% owned subsidiary, Western Realty Company, in turn owns all the unsecured debt, Preferred Stock and Common Stock of the Debtor.

mortgaged." The statement was far from an admission against the interests of the Debtor in favor of the First Mortgage Bonds. It was a self-serving declaration of one James Interests corporate entity, the Debtor itself, first in its own interest, and then in the interest of two other James Interests corporate entities, WP Corp. and ACJ as holders of substantially all of the Debtor's unsecured debt. Now after ACJ has converted its then unsecured Debentures into the ACJ Notes,[1] the self-serving declaration is asserted in the interest of the Refunding Mortgage Bonds pledged to secure the ACJ Notes. With these facts in mind, it is submited that it is unnecessary for the Court to give any great thought to the problem of when a Listing Application is or is not binding upon the holders of securities to which it relates.

In the light of all the foregoing facts, the first lien of the First Mortgage, as against the Refunding Mortgage, upon the Debtor's rights of use and acquisition of the equipment trust and Baldwin Lease equipment need not depend upon the three separate replacement covenants contained in the First Mortgage or the replacement and additions grant contained in the Granting Clauses. As pointed out in the brief of the First Mortgage Trustees,[2] however, the First Mortgage, as a result of those provisions, had attached as a first lien to all rights of the Debtor in the disputed equipment long before the Refunding Mortgage was created in 1932.

III

THE NORTHERN CALIFORNIA EXTENSION

The omissions from the Refunding Mortgage Trustee's brief of the material facts respecting the Northern California Extension are so many and so vital that their omission causes the statements of fact which are contained in the Refunding Trustee's brief to be wholly misleading.

1. Authorization and Construction—Change of Original Intent

Application for authority to construct the so-called Northern California Extension was made to the Interstate Commerce Commission by the Debtor on February 8, 1929.[1] At that time it was estimated that the cost would be $5,000,000. On May 14, 1929, ACJ offered to provide the necessary funds against the issue to ACJ of bonds and notes to be secured by a first lien on the Extension.[2]

Later, upon making a change in the route and new estimates, it was found that the construction would approximate $10,000,000. This necessitated new arrangements for financing. Under a superseding offer dated June 19, 1929, ACJ offered (as its intervening petition before the Commission in this proceeding recognizes) to furnish $5,000,000 "upon evidences of debt which were junior to the First Mortgage."[3] ACJ agreed to purchase

[3] ACJ Petition for Intervention before I. C. C., verified April 18, 1936, p. 6 (not printed); I. C. C. Ex. 46 (see R. 2319, 1079), not printed.

$5,000,000 of unsecured 5% Debentures, provided $5,000,000 of First Mortgage Bonds were also sold to provide construction funds.[1]

The indenture, under which the Debentures to be acquired by ACJ were issued, was executed on January 6, 1931.[2] It was wholly without mortgage or pledge of any property, and made no pretense of constituting a lien on any of the property of the Debtor.

Construction had been commenced in August, 1930. The Extension was substantially completed and put into operation for freight service on November 10, 1931,[3] not June 1, 1932, as stated by the Refunding Mortgage Trustee.[4]

2. The Sale of Debentures to ACJ

The $5,000,000 of Debentures were sold to ACJ in February, 1931, pursuant to published notice inviting bids, specifications describing the Debentures, and receipt of bid.[5]

The Refunding Mortgage Trustee's brief contains the following argument (at pp. 43-44):

> "Even the 'specifications of the securities offered for sale' at the time of the issue of the First Mortgage bonds (Ex. 93) which were used in financing the Extension did not promise a first lien upon the entire Extension. They read:
>
> "'Said First Mortgage constitutes a first lien on the main line of railroad of the Company extending from San Francisco, California, to

[1] I. C. C. Ex. 46 (see R. 2319, 1079); not printed.
[2] I. C. C. Ex. 50 (see R. 2335), not printed.
[3] R. 1863, 1942. See also R. 1077.
[4] Brief, p. 41.
[5] R. 1078; I. C. C. Exs. 48 and 49 (see R. 2325-27), not printed.

> Salt Lake City, Utah, and branches, aggregating 1050.5 miles * * *. Upon the completion of the construction and/or acquisition of the Company's Northern California Extension its main line of railroad will aggregate 1198.5 miles * * *.'
>
> It would have been simple to state definitely, and it would have been definitely stated if so intended, that 'upon the completion of the Northern California Extension the First Mortgage will constitute a first lien thereon.'"

It will be remembered that the language thus quoted by the Refunding Mortgage Trustee was used in connection with the sale of First Mortgage Bonds for the express purpose of financing *half* of the construction cost of the Northern California Extension. We submit that, even if the quoted language were the sole evidence, no court should sanction the weasel interpretation suggested by the Refunding Mortgage Trustee, that the First Mortgage Trustees and Bondholders were warned by the quoted language that the First Mortgage, in violation of its express terms, was not to constitute a lien upon the entire Northern California Extension for the benefit of the entire First Mortgage debt.

Be that as it may, the Refunding Mortgage Trustee's brief omits to draw to the attention of the Court the specifications above referred to, inviting bids for the unsecured Debentures sold to ACJ to provide the remaining half of the cost of the Extension. Those specifications were publicly issued on the same day as the specifications quoted in the Refunding Mortgage Trustee's brief.[1]

---

[1] R. 2324, 2327.

The Debenture specifications stated:

> "The main line of railroad of the Company extends from San Francisco, California, to Salt Lake City, Utah, with branches, and aggregates 1050.5 miles, more or less of first track. Upon the completion of the Company's 'Northern California Extension' its main line of railroad will aggregate 1198.5 miles, more or less. * * *
>
> "The First Mortgage of this Company dated June 26, 1916, securing this Company's First Mortgage Bonds, whereunder not more than *$50,000,000 thereof may be outstanding* at any one time, *is a first lien on said main line* of railroad."[1]

These specifications would seem to put the intent that the First Mortgage was to be a first lien upon the entire Extension sufficiently clearly to escape even the Refunding Mortgage Trustee's meticulous criticism of the First Mortgage specifications.

The bid, dated January 22, 1931, of ACJ[2] stated that it was made "in accordance with and subject to all the terms of the notice * * * and in accordance with the specifications referred to in said notice."

Deliveries of the Debentures were made from time to time to ACJ against payment therefor in cash, such cash being used to reimburse the Debtor for a portion of the expenditures made in connection with the construction of the Extension. The first lot of Debentures was issued and delivered on February 27, 1931, and the last lot on May 31, 1932.[3]

---

[1] I. C. C. Ex. 48 (see R. 2326), not printed.

[2] I. C. C. Ex. 49 (see R. 2327), not printed.

[3] I. C. C. Exs. 95 and 97 (see R. 2463-75), not printed.

In the spring of 1932, after the Northern California Extension had been substantially completed and put into operation, the entire $5,000,000 of Debentures were exchanged by ACJ for $200 in cash and the $4,999,800 ACJ Notes secured by the pledge of Refunding Mortgage Bonds.[1]

3. Sale of $5,000,000 First Mortgage Bonds and Withdrawal of Cash Proceeds

During the period when the Debentures were being issued, the $5,000,000 of First Mortgage Bonds which were to provide that part of the Northern California Extension construction costs not provided for by the Debentures, were sold for cash pursuant to the specifications against which the Refunding Mortgage Trustee leveled the unfounded criticism above quoted from its brief.[2]

The cash proceeds were drawn down from time to time in compliance with the provisions of the First Mortgage, the Trustees having been furnished with certified copies of resolutions of the stockholders and Executive Committee of the Debtor, certificates of officers of the Debtor covering expenditures and opinions of counsel.[3]

Mr. A. C. James (the controlling interest in all the corporate entities in which the James Interests hold their various Western Pacific claims) was a member of the Executive Committee of the Debtor and attended all meetings of the Executive Committee at which the necessary resolutions were adopted authorizing the withdrawal

[3] R. 1081; I. C. C. Exs. 61-73, 86 (see R. 2359-80, 2455), not printed.

of cash for the purpose of reimbursing the Debtor for expenditures made by it in connection with the construction of the Extension.[1] Each of these resolutions stated, among other things, that "all portions of said extension which have been constructed and/or acquired" are "subject to the lien of said First Mortgage and now in the possession of this Company."[2]

The first withdrawal of cash was made on February 11, 1931, and the last withdrawal on January 29, 1932.[3] The resolutions delivered to the First Mortgage Trustees in connection with such last withdrawal were adopted on January 29, 1932, and contained the above-quoted statement with reference to the lien of the First Mortgage on the Extension.[4] At that time the Northern California Extension had been substantially completed and was being operated for freight traffic.

The certificates of expenditures furnished to the First Mortgage Trustees in accordance with the provisions of the First Mortgage in each case stated that the expenditures had been made within a certain period and specified the particular items of property or of work in respect of which expenditures had been made by the Debtor. For example, the certificates covered land, engineering, grading, bridges, tunnels, rails, ties, ballast, stations, buildings and various other items of property and facilities ordinarily required in the construction of a railroad. The certificates further stated that, so far as known or believed by the officers executing the respective certificates, the

[1]R. 1081; 2344-46; I. C. C. Ex. 86 (see R. 2455), not printed.
[2]I. C. C. Ex. 86 (see R. 2455), not printed.
[3]R. 1081; I. C. C. Exs. 62-73 (see R. 2366-80), not printed.
[4]I. C. C. Ex. 86 (see R. 2455), not printed.

property described in such certificates was not subject to any lien or charge except "(a) necessarily undetermined liens or charges ordinarily incident to construction and (b) the lien of said First Mortgage;" and that all deeds, conveyances and other instruments necessary to vest title to the property in the Debtor had been executed and delivered to the Debtor.[1]

The Refunding Mortgage Trustee's brief makes much of the absence of a supplemental indenture expressly subjecting the Northern California Extension to the lien of the First Mortgage and argues that "it is inconceivable that such an important acquisition as the Northern California Extension would not have been expressly subjected to the First Mortgage if it had been intended to be entirely subject to the entire First Mortgage." (pp. 43, 45)

The Refunding Mortgage Trustee's brief fails, however, to point out to this Court that the opinions of counsel delivered to the First Mortgage Trustees in accordance with the requirements of the First Mortgage were given by the then general counsel of the Debtor, Mr. F. M. Angellotti. The opinions, after referring to the officers' certificate of expenditures, stated that, in the opinion of said general counsel, the properties referred to in the certificate were subject to the lien of the First Mortgage as a first lien thereon, and that no supplemental indenture or instruments of further assurance were necessary to place said property or any part thereof under the lien of the First Mortgage.[2] These opinions (which were clearly correct) were by an officer of the Debtor, one of the James Interests corporate entities. They were acted upon by the First Mortgage

[1] I. C. C. Exs. 61-73 (see R. 2359-80), not printed.

[2] I. C. C. Exs. 61-73 (see R. 2359-80), not printed.

Trustees. They fully explain the absence of supplemental indentures. They destroy any possible basis for the Refunding Mortgage Trustee's contention that the absence of such indentures resulted in the strange 50% limitation on the First Mortgage lien for the benefit of another James Interests corporate entity, ACJ.

It was the clear purpose and intent of all the parties, and all their action was designed to the end, that the First Mortgage as an entirety should be a lien upon the entire Northern California Extension and that all funds required for the Extension, other than those realized from the First Mortgage Bonds, should not only have no lien upon the Extension itself, but should be wholly unsecured obligations of the Debtor. Mr. A. C. James actively participated in the expression of this purpose and intent.

The facts as to the Northern California Extension, taken in connection with the Granting Clauses of the First Mortgage, establish that the First Mortgage became in law and in fact a first lien upon every part of the Northern California Extension and for the entire First Mortgage debt, during every stage of the construction of the Northern California Extension. They further establish that, even if that were not so, the James Interests are in equity estopped to make any contrary claim as against the First Mortgage Bondholders.

4. The Creation of the Refunding Mortgage After the Lien of the First Mortgage Had Attached to the Extension

The Refunding Mortgage was not executed and delivered until February 29, 1932,[1] several months after the

[1] R. 1067; I. C. C. Ex. 6, pp. 168-197 (see R. 1872), not printed.

Extension had been substantially completed on November 10, 1931, and put into freight operation, and more than a year after the lien of the First Mortgage had attached.

Notice of the attachment of the lien of the First Mortgage and the priority thereof on the Extension was brought home to ACJ, RFC and RCC not only constructively but actually.

The Extension is wholly within Lassen and Plumas Counties, California.[1] The First Mortgage was recorded in those counties on July 17, 1916[2] long before the Refunding Mortgage had been created.

The fact of the priority of the First Mortgage over the Refunding Mortgage was actually brought to the attention of ACJ, RCC and RFC, not only as to ACJ by the facts heretofore recited, but also as to all three pledgees of Refunding Mortgage Bonds by the Report of the Commission,[3] approving the making to the Debtor by RFC of the first loan on the RFC Notes. In describing the bonds to be pledged as collateral for that loan the Commission said:[4]

> "The carrier offers to pledge as collateral security for the loans its general and refunding mortgage * * * bonds * * *. These bonds * * * are to be issued under a proposed new general and refunding mortgage and will be a second lien upon all the carrier's property, including personal property * * *."

After describing the collateral now physically pledged with the Refunding Mortgage Trustee, the Report con-

[2] R. 1066.

[3] 180 I. C. C. 645. This Report is also I. C. C. Ex. 52 (see R. 2340), not printed.

[4] 180 I. C. C. 645 at 648.

tinued that the new bonds would be a "first lien" upon that collateral and "a lien upon substantially all the remainder of the carrier's property subject only to a first mortgage securing $50,000,000 of first mortgage bonds and about $5,000,000 of equipment-trust certificates."

By reason of transactions between RCC and RFC, in connection with the making of this loan, it is apparent that RCC had actual notice of this Commission Report.[1]

In the Debtor's application dated May 23, 1932, to RFC for a further loan it described the Refunding Mortgage as follows:[2]

> "The General and Refunding Mortgage is a first lien on certain securities having a book value of $2,374,655, and a second lien on all of the remaining property of the Railroad Company * * *."

5. The Alleged "Inequity" of the First Mortgage Lien on the Northern California Extension "to the Complete Exclusion of the Refunding Mortgage Creditors"

The brief of the Refunding Mortgage Trustee complains bitterly of the inequity of giving to the First Mortgage a lien for the entire First Mortgage debt upon the Extension as an entirety, "to the complete exclusion of the Refunding Mortgage creditors who supplied more than half its construction cost * * *" (p. 41).

Again, this expression "Refunding Mortgage creditors" carefully avoids any misrepresentation that Refunding Mortgage Bonds, or their cash proceeds deposited with the Refunding Mortgage Trustee, were issued or paid out to finance any part of the construction of the Northern

---

[1] 180 I. C. C. 645 at 646-647.

[2] I. C. C. Ex. 87, p. 15 (see R. 2456), not printed.

California Extension. None of the cost was so provided, the facts as to contributions by the "Refunding Mortgage creditors" being these:

(1) ACJ, as heretofore shown, provided for half the cost of the construction against *unsecured* Debentures, the other half being financed with First Mortgage Bonds. After the Extension had been completed and the First Mortgage had become a first lien thereon, ACJ exchanged its unsecured Debentures for the ACJ Notes secured by the pledge of Refunding Mortgage Bonds expressly declared in all the contemporaneous descriptive material to constitute a second lien on the Extension.

(2) Out of the funds provided by RFC in 1932 against the RFC Notes, secured in part by the pledge of these expressly declared second lien Refunding Mortgage Bonds, $559,408 were expended upon the Extension to provide for final items not covered by the original $10,000,000 financing.[1]

(3) RCC, the other "Refunding Mortgage creditor," provided no funds used in connection with the Northern California Extension.

IV

THE ALLEGED REFUNDING MORTGAGE DEFICIENCY CLAIM AGAINST UNMORTGAGED ASSETS

1. The 1934 Subordination Agreements

The Refunding Mortgage Trustee contends that the so-called "Refunding Mortgage creditors" are entitled to

[1]R. 1055-56.

better treatment in the reorganization because of alleged rights in cash and receivables of the Debtor at the inception of the reorganization proceedings, based upon an asserted right to a deficiency judgment upon the Refunding Mortgage Bonds.

As pointed out in the main brief of the Committee[1] upon its own writ of certiorari (No. 7), this case presents no problem of dealing with such unmortgaged assets.

As of July 31, 1935 (two days before these Section 77 proceedings began), the Debtor had cash on hand amounting to $911,682.42, and receivables aggregating $1,336,664.53.[2]

While it may be true that such cash and current assets are technically free from the lien of the First Mortgage as executed, the Refunding Mortgage Trustee's brief omits to mention the existence of subsequent agreements by the so-called "Refunding Mortgage creditors," which render those assets unavailable for the satisfaction of the Debtor's general creditors.

An indisputable prior right to the cash and current assets of the Debtor was created for the First Mortgage Bondholders by the agreement effecting an extension of the 1934 interest on the First Mortgage Bonds. The interest accrued in the year 1934 amounted to $2,264,505, compared with the total cash and receivables stated above of $2,248,346.95. By agreement dated July 25, 1934, the interest accruing on the First Mortgage Bonds during the year 1934 was extended to January 1, 1937, pursuant to

---

[1]Page 10.

[2]R. 1091. The figure for cash on hand is after deducting $38,120.89, representing interest paid by Tidewater Southern on its note pledged under the Refunding Mortgage.

the modified extension agreement[1] subject to the conditions set forth in the Debtor's letter of May 29, 1934,[2] as modified by the Debtor's letter of July 25, 1934.[3] Under the extension agreement RFC, ACJ, RCC (who hold as collateral all the outstanding Refunding Mortgage Bonds) and WP Corp. (the only unsecured creditor of the Debtor) agreed that until such time as the 1934 extended interest on the First Mortgage Bonds should have been paid in full, such extended interest should be entitled to priority of payment over interest and principal of the loans of said junior creditors.[4] That 1934 extended interest has never been paid and under the Commission Plan is included in the unpaid interest for which the First Mortgage Bonds receive new Common Stock.

For the information of this Court, a copy of the subordination agreement executed by ACJ is annexed as Appendix I. The subordination agreements signed by both the other so-called "Refunding Mortgage creditors" and by WP Corp. are in substantially the same form.

The intent and effect of the agreements was and is to require all unmortgaged assets, including cash and current assets, to be applied to the 1934 interest on the First Mortgage Bonds prior to the application thereof to the creditors having claims junior to those of the holders of First Mortgage Bonds. The amount of the extended First Mortgage interest for 1934 exceeds the amount of cash, current assets and other unmortgaged assets, if any, on hand at the

---

[1]R. 1092, 2529-39; I. C. C. Ex. 122 (see R. 2536-8), not printed.

[2]I. C. C. Ex. 118 (see R. 2533), not printed.

[3]I. C. C. Ex. 121 (see R. 2537-38), not printed.

date of the filing of the Debtor's petition instituting these proceedings.

Can the Refunding Mortgage Trustee by any possibility have rights which the pledgees of *all* the Refunding Mortgage Bonds have expressly waived?

2. "Non-carrier Property"

The Refunding Mortgage Trustee also contends that the First Mortgage is not a lien on certain so-called "non-carrier property" to which, if it were unmortgaged assets, the alleged deficiency judgment under the Refunding Mortgage would extend.

This claim of the Refunding Mortgage Trustee refers principally to property at San Francisco, California, acquired by the Debtor at various dates at a cost of $1,586,395.54, similar property at Oakland, California, acquired at various dates at a cost of $355,813.16, and similar property at Sacramento, California, acquired at various dates at a cost of $40,896.91.

Most of the San Francisco property was acquired prior to July 14, 1916, the greater portion of it being the Islais Creek property.[1] The First Mortgage, therefore, is a prior lien thereon as property belonging to the predecessor of the Debtor and specifically covered in Granting Clause First of said First Mortgage. Moreover, the record shows that proceeds of First Mortgage Bonds were expended on account of acquisition of at least a part of the Islais Creek property, or for work thereon. Part of the property was acquired in 1921 and another part in 1925, and expenditures for the acquisition thereof were reimbursed to the Debtor in the amount of $176,734.68.[2]

---

[1] R. 2527-28.

[2] I. C. C. Ex. 124 (see R. 2563), not printed.

The Oakland property consists of land acquired by the Debtor from its predecessor with the exception of a certain tract carried on the Debtor's books at $1,306.60, which was a part of a larger tract purchased for right-of-way purposes and financed by the use of deposited cash under the First Mortgage. The Sacramento property consists of land acquired by the Debtor from its predecessor and was a part of a larger tract purchased for station facilities.[1]

As pointed out in the discussion of the Granting Clauses of the First Mortgage (Point I, *supra*), the First Mortgage purports to be, and is, a first lien on all property which belonged to the predecessor of the Debtor of whatever kind or description. Not only is no distinction made in the First Mortgage as to the use to which such property may have been put, but Granting Clause Second expressly subjected to the lien of the First Mortgage, as a supplement to the particular description of railroad property contained in Granting Clause First, "all other * * * lands * * * now owned by or belonging to the Company, notwithstanding the same or any thereof may not be particularly set forth in these granting clauses."

Nowhere, either in the First Mortgage or in the Refunding Mortgage, can the term "non-carrier property" be found. That term had its origin in valuation proceedings made by the Interstate Commerce Commission pursuant to Section 19a of the Interstate Commerce Act long after the First Mortgage was created. The purpose of distinguishing between carrier and non-carrier property in proceedings involving valuation for rate-making purposes is sound. That, however, does not support the validity of such a dis-

---

[1]Exhibit H to Stipulation as to Facts Not in Dispute (R. 1017, 1091, 1299), not printed.

tinction for the purpose of determining the lien of a mortgage.

All of the so-called "non-carrier property" of the Debtor was, in fact, formerly classified as "carrier" or "operative" property. For example, this same San Francisco property—the Islais Creek property—was formerly classified as "operative" property, but was transferred to "non-operative property."[1] Clearly a change in accounting classification of the property subject to the lien of the First Mortgage did not destroy the lien of that Mortgage.

The foregoing conclusions are not at all affected by the fact that the 1915 Reorganization Plan of the Debtor's predecessor described the First Mortgage to be created pursuant to that Plan as a first lien on "railroad properties."

Of the approximately $50,000,000 First Mortgage Bonds now outstanding, only $20,000,000 were issued in the 1916 reorganization.[2] To determine the rights of the present First Mortgage Bondholders this Court must look to the First Mortgage as it was actually executed, not to some antecedent and superficial description of it. Indeed, the 1915 Plan did not state that the proposed First Mortgage should not be a lien on other properties which the Debtor might acquire.

3. The Alleged Right to a Deficiency Judgment Under the Refunding Mortgage

None of the Refunding Mortgage Bonds has ever been issued by the Debtor except by way of pledge for the RFC, RCC and ACJ Notes. They therefore do not represent a *debt* of the Debtor.

---

[1] See footnote *supra*, p. 34.

[2] R. 120-21. The 1915 Reorganization Plan was consummated in 1916.

It is elemental that the pledge of $2,000 of a debtor's mortgage bonds to secure a $1,000 note of the debtor does not increase the debt beyond $1,000.[1] The only significance of the pledged bonds is that they vest in their pledgees, as security for the primary obligations for which they have been pledged (here the RFC, RCC and ACJ Notes), the right to realize upon the mortgaged property as security for the primary obligations, proportionately to the respective amounts of such pledged bonds.

RFC, RCC and ACJ were, of course, vested by the primary obligations (their respective Notes) with powers of attorney from the Debtor to sell the pledged Refunding Mortgage Bonds at any time prior to the commencement of any legal proceedings against the Debtor designed to crystallize the rights of its creditors *inter se*, such as the appointment of an equity receiver or a bankruptcy trustee. After such appointment, however, a pledgee may not dilute the claims of other creditors of the Debtor by increasing its debt through the sale of such pledged bonds.[2] No such sale has ever been sought by any of the pledgees in the *Western Pacific* case.

Because bonds so pledged are not themselves a debt, but only an indicia of participation in mortgaged security, it is well established that no proof of claim can be made upon pledged bonds; and that they are not entitled as such

---

[1] *Merrill* v. *National Bank of Jacksonville*, 173 U. S. 131 (1899); *Mississippi Valley Trust Co.* v. *Railway Steel Spring Co.*, 258 Fed. 346 (C. C. A. 8th, 1919); *Worth* v. *Marshall Field & Co.*, 240 Fed. 395 (C. C. A. 4th, 1917); *Butterfield* v. *Woodman*, 223 Fed. 956 (C. C. A. 1st, 1915); *Hitner* v. *Diamond States Steel Co.*, 176 Fed. 384 (C. C. Del., 1910).

[2] *Mississippi Valley Trust Co.* v. *Railway Steel Spring Co.* 258 Fed. 346 (C. C. A. 8th, 1919).

to a deficiency judgment.[1] The deficiency judgments in the present case (which admittedly exist) are for those parts of the RCC and ACJ Notes which have not been fully provided for by new securities in the reorganization. Those unsecured claims the Commission, as pointed out in the Committee's main brief, found "have no value."[2]

The Refunding Mortgage Trustee is, of course, wholly without standing to assert any rights in respect of those deficiency judgments.

V

ANOTHER "PRACTICAL INTERPRETATION"

While the following facts are concededly not conclusive, they have some persuasive effect as "practical interpretations," to borrow a phrase from the Refunding Mortgage Trustee:

All three plans originally proposed before the Commission by the Debtor, the Committee and ACJ were predicated on the full priority of the First Mortgage over the Refunding Mortgage, except as to the collateral specifically pledged under the latter.

The ACJ Second Plan, the Debtor's First, Second, Third and Fourth Plans and the RCC Plan were all predicated on that priority.

---

[1] *Union National Bank* v. *People's Savings & Trust Co.*, 28 F. (2d) 326 (C. C. A. 3rd, 1928); *New York Trust Co.* v. *Palmer*, 101 F. (2d) 1 (C. C. A. 2nd, 1939); see *Jones* v. *Third Nat. Bank of Sedalia*, 13 F. (2d) 86, at 87 (C. C. A. 8th, 1926). See Hatch, *A Form of Depression Finance—Corporations Pledging Their Own Bonds* (1934) 47 Harv. L. Rev. 1093, 1103 *et seq.*

[2] See Committee's main brief, p. 18, and R. 269-70.

No question as to that priority was raised during the period of the negotiation of the Debtor's First Plan or of any of the other original plans.

No specific provision for the relative participation of the First Mortgage Bondholders and the collateral noteholders was made in any proposed plan which did not recognize such priority, until the filing before the District Court of the ACJ objections on December 8, 1939, containing the suggestion by ACJ of a wholly new plan never theretofore discussed.[1]

VI

CONCLUSION

The decision of the District Court approving the tentative determination by the Commission of the various lien questions should be affirmed.

Dated October 2, 1942.

Respectfully submitted,

ROBERT T. SWAINE,
Attorney for Frederick H. Ecker, John W. Stedman and Reeve Schley, constituting the Institutional Bondholders Committee, Respondent.

HERBERT W. CLARK,
BENJAMIN R. SHUTE,
Of Counsel.

APPENDIX I

I. C. C. EXHIBIT 117[1]

A. C. JAMES CO.
40 Wall Street
New York

July 2, 1934.

The Western Pacific Railroad Company,
37 Wall Street,
New York.

Dear Sirs:

We refer to the letter written to you by the Reconstruction Finance Corporation dated June 23, 1934, and signed by the Chairman of such Corporation.

Subject to your obtaining from the holders of at least 75% of your outstanding First Mortgage Bonds, assents to the agreement of extension, dated as of March 1, 1934, as modified by the additional conditions contained in the printed letter of The Western Pacific Railroad Company dated May 29, 1934 (omitting the condition that the Reconstruction Finance Corporation, The Railroad Credit Corporation, A. C. James Co. and The Western Pacific Railroad Corporation shall in writing unconditionally consent and agree as provided in paragraph 2 contained in said printed letter and substituting therefor that the Reconstruction Finance Corporation, The Railroad Credit Corporation, A. C. James Co. and The Western Pacific Railroad Corporation shall agree as herein set forth) and subject to your obtaining from The Railroad Credit Corporation the Reconstruction Finance Corporation, and The Western Pacific Railroad Corporation an agreement with respect to their

[1]Introduced at R. 2532.

respective loans to your Company similar to the agreement herein contained (with like exception with respect to collateral held by them respectively and in the case of The Railroad Credit Corporation its right to retain sums payable under the Marshalling and Distributing Plan 1931), this corporation agrees, in the circumstances, that it will not, prior to January 1, 1937, or should prior to such date receivers be appointed for the Railroad Company or the filing of a petition by or against it be allowed by the Court under Section 77 of the Federal Bankruptcy Act, as amended, then prior to the appointment of such receivers or the allowance of the filing of such petition, whichever may be earlier, take any action with respect to collecting the interest falling due during the calendar year 1934 on loans of this Corporation to the Railroad Company, and further agrees that, until such time as the 1934 extended interest on the First Mortgage Bonds shall be paid in full, the 1934 extended interest on such assenting First Mortgage Bonds shall be entitled to priority of payment over interest and principal of loans of this Corporation to the Railroad Company (except with respect to assets or the income therefrom on which any mortgage securing bonds comprised in the collateral pledged as security for loans of this Corporation is a lien prior to the lien of said First Mortgage and except the collateral for such loans or the proceeds thereof or any payments which may be received by this Corporation therefrom or be realized by it out of the same) in any proceedings commenced prior to July 1, 1937, whether taken by this Corporation to enforce payment of interest or principal of such loans or otherwise.

Yours very truly,

A. C. JAMES CO.

IN THE

Supreme Court of the United States,

OCTOBER TERM, 1942.

No. 61.

IN THE MATTER OF
THE WESTERN PACIFIC RAILROAD COMPANY,
a corporation,

Debtor.

IRVING TRUST COMPANY, as Substituted Trustee under the General and Refunding Mortgage of The Western Pacific Railroad Company,

Petitioner,

against

CROCKER FIRST NATIONAL BANK OF SAN FRANCISCO and SAMUEL ARMSTRONG, as Trustees under The Western Pacific Railroad Company First Mortgage dated June 26, 1916; FREDERICK H. ECKER, JOHN W. STEDMAN and REEVE SCHLEY, constituting the Institutional Bondholders Committee; WESTERN PACIFIC RAILROAD CORPORATION; THE WESTERN PACIFIC RAILROAD COMPANY; A. C. JAMES CO.; THE RAILROAD CREDIT CORPORATION; and RECONSTRUCTION FINANCE CORPORATION,

Respondents.

ON WRIT OF CERTIORARI TO THE UNITED STATES CIRCUIT COURT OF APPEALS FOR THE NINTH CIRCUIT.

BRIEF FOR RESPONDENTS CROCKER FIRST NATIONAL BANK OF SAN FRANCISCO AND SAMUEL ARMSTRONG, AS TRUSTEES UNDER THE WESTERN PACIFIC RAILROAD COMPANY FIRST MORTGAGE DATED JUNE 26, 1916.

This is a proceeding instituted by the Refunding Mortgage Trustee to review a decree of the United States Circuit

Court of Appeals for the Ninth Circuit entered on November 28, 1941 (R. 2675), as amended on rehearing by order filed February 12, 1942, as amended by order of February 16, 1942 (R. 2681, 2682), which decree reversed an order of the District Court of the United States for the Northern District of California, Southern Division, entered on August 15, 1940 (R. 1569). The order of the District Court approved a plan of reorganization (hereinafter called the "Commission Plan") for the Debtor, The Western Pacific Railroad Company, which had theretofore been approved and certified to the District Court by the Interstate Commerce Commission (R. 1600), in a proceeding for the reorganization of the Debtor under Section 77 of the Bankruptcy Act, as amended (11 U. S. C. A., § 205).

OPINIONS BELOW.

The Commission's report and order (R. 194, 284) dated October 10, 1938, approving a plan of reorganization for the Debtor, are reported at 230 I. C. C. 61. The Commission's report and order on further consideration (R. 300, 362) dated June 21, 1939, modifying the plan of reorganization approved in the Commission's report and order dated October 10, 1938, are reported at 233 I. C. C. 409. The Commission's report (R. 884) dated September 19, 1939, on which its order (R. 891) dated September 19, 1939, was entered, denying the Debtor's petition for modification of the Commission Plan, is reported at 236 I. C. C. 1.

The opinion of the District Court (R. 1569) dated August 15, 1940, approving the Commission Plan, is reported at 34 F. Supp. 493.

The opinion of the Circuit Court of Appeals (R. 2663) dated November 28, 1941, is reported at 124 F. (2d) 136. No opinion was rendered on rehearing.

JURISDICTION.

The jurisdiction of this Court is invoked under Section 240(a) of the Judicial Code, as amended by the Act of February 13, 1925 (28 U. S. C. A., § 347(a)).

QUESTIONS PRESENTED.

The questions presented are essentially these:

1. Should not this Court, in view of the public interest in bringing about a speedy termination of the reorganization proceedings, decide the issues involved in the so-called "lien controversy", which issues were before the Circuit Court of Appeals but as to which the Circuit Court of Appeals made no specific determination?

2. Were the issues involved in the "lien controversy" correctly determined by the Commission and by the District Court?

With respect to the first question, no controversy exists between the Refunding Mortgage Trustee and the First Mortgage Trustees. In their brief filed in No. 8, the First Mortgage Trustees have taken the position that this Court should decide all of the issues which were before the Circuit Court of Appeals, including the issues involved in the "lien controversy", and should, upon the entire record, reverse the decree of the Circuit Court of Appeals and affirm the order of the District Court approving the Commission Plan.[1]

With respect to the second question, the First Mortgage Trustees believe that the issues involved in the "lien controversy" were correctly determined by the Commission and by the District Court. The argument in this brief will be confined to a discussion of those issues.

---

[1] A similar position has been taken by the Institutional Bondholders Committee in its brief filed in No. 7 and by Reconstruction Finance Corporation in its brief filed in No. 33.

STATEMENT OF THE CASE.

A. The "Lien Controversy".

The allocations of new securities under the Commission Plan are premised upon the complete priority of the First Mortgage [1] over the Refunding Mortgage [2] as a lien on substantially all of the Debtor's property, except with respect to certain pledged collateral held by the Refunding Mortgage Trustee (R. 261-267). The correctness of that basic premise is challenged by the Refunding Mortgage Trustee with respect to three classes of property:

(1) The Debtor's equity in certain equipment acquired under three Philadelphia Plan equipment trusts and the so-called Baldwin Lease;

(2) The Northern California Extension; and

(3) Certain so-called "noncarrier" real estate.

A statement of the relevant facts with respect to each of these classes of property will be set forth immediately preceding the portion of the argument to which it relates. This method of presentation, we believe, will facilitate a ready understanding of the questions involved.

---

[1] I. C. C. Exhibit No. 5 (R. 1872).

[2] I. C. C. Exhibit No. 6 (R. 1872).

I. C. C. Exhibit Nos. 5 and 6 are among the portions of the record which, by stipulation (R. 2612, 2614), were not printed but which are before this Court pursuant to the stipulation filed July 23, 1942.

The granting clauses of the First Mortgage are printed at R. 1215-1231, as Exhibit D to the Stipulation As To Facts Not In Dispute (R. 1017-1272, 1285)—hereinafter referred to as the "Stipulation" or "Stip." The granting clauses of the Refunding Mortgage are printed at R. 1231-1246, as Exhibit E to the Stipulation. For the convenience of the Court, we have set forth the granting clauses of the First Mortgage in Appendix A of this brief, *infra*, pages 105-115. Page references in this brief to the granting clauses of the First Mortgage are to Appendix A of this brief; page references to other parts of the First Mortgage are to I. C. C. Exhibit No. 5.

Other exhibits which were not printed are referred to in this brief by their exhibit numbers, with citations to the respective pages of the record at which they were offered in evidence.

B. Two Significant Provisions of the First Mortgage.

The answers to the questions involved depend mainly upon the interpretation of the provisions of the First Mortgage.

The provisions chiefly in controversy are the after-acquired property clause in Granting Clause Third [1] and the so-called "free funds" provision.[2] These two provisions fix the boundaries of the lien on after-acquired property. To assist the Court in comparing them, we here set them forth in sequence.

Granting Clause Third.

"*Third.*—Any and all property and facilities of any and every kind and description, including among other things lines of railroad, extensions and branches, telegraph and telephone lines, lines and instrumentalities of water transportation, terminal facilities, equipment, lands, buildings, machinery and tools, stocks, bonds, notes and other obligations and securities and any and all right, title and interest in any of such properties or facilities which may from time to time hereafter be acquired or constructed by or belong to the Company or any successor or purchasing corporation if

(*a*) acquired or constructed by the use of First Mortgage Bonds or proceeds thereof or cash deposited hereunder (except bonds delivered or cash paid out under any of the provisions of this indenture in reimbursement of previous expenditures certified as hereinafter provided) or on account of the purchase, acquisition or construction thereof or work thereon First Mortgage Bonds shall hereafter be authenticated and delivered or the proceeds of First Mortgage Bonds or other cash deposited hereunder shall hereafter be paid out under any of the provisions of this indenture; or

---

[1] Appendix A, *infra*, pp. 110-111.

[2] Appendix A, *infra*, pp. 113-114.

(*b*) consisting of or, if securities, representing property or facilities constituting an integral part or parts of lines of railroad, extensions, branches, or other property subject to the lien of this indenture or some other integral portion whereof is or integral portions whereof are subject to the lien hereof or represented by securities subject to the lien hereof; or

(*c*) consisting of or, if securities, representing property or facilities used or acquired for use in or for the maintenance or operation of or appertaining to any of the lines of railroad, extensions, branches or other property subject, or represented by securities subject, to the lien of this indenture; or

(*d*) consisting of shares of stock in or other securities of said The Salt Lake City Union Depot and Railroad Company or said Standard Realty and Development Company or any subsidiary company or any right, title or interest which the Company or any successor or purchasing corporation may hereafter acquire in or to any of the property of either of said companies or in or to any line of railroad or other property of any corporation which shall then be or immediately prior thereto shall have been a subsidiary company, as the term 'subsidiary company' is defined in Section 2 of Article Second hereof."

THE "FREE FUNDS" PROVISION.

"But nothing express or implied in this indenture shall be construed to limit the right or power of the Company or any successor or purchasing corporation, which right and power is hereby expressly reserved, by the use of its credit or free funds or by the use of First Mortgage Bonds delivered to the Company or any successor or purchasing corporation as in this indenture provided to reimburse the Company or any such successor or purchasing corporation for expenditures theretofore actually made out of its free funds, to construct or acquire free from the lien hereof lines of railroad, extensions or branches or interests

therein, equipment, stocks, bonds or other securities or other property, rights, franchises, immunities or privileges provided the same shall not be lines of railroad, extensions, or branches or interests therein, equipment, stocks, bonds or other securities, or other property, rights, franchises, immunities or privileges (*a*) on account of the purchase, acquisition or construction whereof or work whereon First Mortgage Bonds shall be authenticated and delivered or their proceeds or other cash deposited hereunder shall be paid out as herein provided; or (*b*) consisting of, or if securities representing, property or facilities constituting an integral part or parts of lines of railroad, extensions, branches or other property subject to the lien of this indenture or some other integral portion whereof is or integral portions whereof are subject to the lien hereof or represented by securities subject to the lien hereof; or (*c*) consisting of or, if securities, representing property or facilities used or acquired for use in or for the maintenance or operation of or appertaining to any of the lines of railroad, extensions, branches or other property subject, or represented by securities subject, to the lien of this indenture; or (*d*) consisting of shares of stock in or other securities of said The Salt Lake City Union Depot and Railroad Company or said Standard Realty and Development Company or any subsidiary company or of any right, title or interest which the Company or any successor or purchasing corporation may acquire in or to any of the property of either of the companies above named or in or to any line of railroad or other property of any corporation which shall then be or immediately prior thereto shall have been a subsidiary company as the term subsidiary company is defined in Section 2 of Article Second hereof; and the Company may, unless First Mortgage Bonds shall have been authenticated and delivered or their proceeds or other cash deposited hereunder paid out against the same, purchase and acquire equipment, free from the lien hereof, by lease, conditional sale agreement or under any form of equipment trust, or purchase such equipment and issue obligations therefor secured by mortgage or pledge of such equipment superior to the lien of this indenture."

As we interpret these provisions, Granting Clause Third extends the lien to all after-acquired property which falls within any one of the four enumerated categories; the "free funds" provision limits the Debtor's right to acquire property free of the lien to property which does not fall within any one of these same four categories.

SUMMARY OF ARGUMENT.

I. The concept underlying the First Mortgage is that of a mortgage upon a railroad enterprise as an operating entirety.

II. The First Mortgage is a first lien on the Debtor's equity in equipment subject to the Equipment Trusts of 1923, 1924, and 1929, and the Baldwin Lease of 1931.

A. The "exception clause" in the First Mortgage does not have the effect of excepting from the lien equipment acquired under equipment trusts, if such equipment was used or acquired for use on the mortgaged lines.

B. The inclusion in the Refunding Mortgage of language not contained in the First Mortgage does not affect the interpretation of the First Mortgage.

C. The statements contained in the Debtor's listing applications are not binding upon the holders of First Mortgage Bonds.

D. The *Wabash* and *Rock Island* cases, cited by the Refunding Mortgage Trustee, are distinguishable.

E. The First Mortgage covers additions to equipment needed for the efficient operation of the mortgaged enterprise.

III. The Northern California Extension is subject in its entirety to the First Mortgage as a first lien thereon.

A. The granting clauses of the First Mortgage cover in its entirety an extension financed in any part

with First Mortgage Bonds or deposited cash; the lien thus created is not limited, either in extent or priority, to the amount of First Mortgage Bonds or deposited cash used in such financing.

B. The Northern California Extension cannot be divided into bonded and unbonded segments.

C. No supplemental indenture was necessary to entitle the First Mortgage to priority over the Refunding Mortgage on the entire Northern California Extension.

D. The advances by A. C. James Co. and Reconstruction Finance Corporation were not made under such circumstances as to create liens on the Northern California Extension in favor of either.

IV. The First Mortgage is a first lien on the so-called "noncarrier" property.

A. The characterization of property as "noncarrier" property in the Debtor's accounts does not affect the scope of the granting clauses of the First Mortgage.

B. The granting clauses of the First Mortgage expressly cover "noncarrier" real estate owned by the Debtor at the date of the execution and delivery of the First Mortgage.

ARGUMENT.

POINT I.

THE CONCEPT UNDERLYING THE FIRST MORTGAGE IS THAT OF A MORTGAGE UPON A RAILROAD ENTERPRISE AS AN OPERATING ENTIRETY.

The Debtor's First Mortgage, like the Debtor itself, is a child of the 1916 reorganization.

The Western Pacific came out of that reorganization with its entire bonded debt wiped out as debt. Every class of security holders was eliminated except one: holders of old first mortgage bonds received stock in the new holding company, together with the right to purchase new First Mortgage Bonds (R. 1112, 1137, 1143, 1150).

Thus the problem which confronted the draftsman of the new First Mortgage was a simple one. The sole problem was to create a single system first mortgage which would provide the new money immediately needed for the reorganization and which would also provide an adequate vehicle for future financing by the Debtor.

To that end, the draftsman created a first mortgage upon the Debtor's railroad enterprise as an operating entirety.

He provided for the issue under that mortgage of $50,000,000 in principal amount of First Mortgage Bonds. Of these, $20,000,000 in principal amount were to be immediately issued to provide new money for the reorganization (Article Second, Section 1[1]), and the remaining $30,000,000 in principal amount were reserved to finance the making of improvements and to finance the acquisition of new lines of railroad and other properties added to the mortgaged enterprise in the course of its future growth (Article Second, Section 2[2]).

First the draftsman placed under the lien all of the property which the Debtor acquired from its predecessor

---

[1] I. C. C. Exhibit No. 5, pp. 37-40.

[2] I. C. C. Exhibit No. 5, pp. 40-44.

(the old Western Pacific Railway Company)—except cash items and except certain claims against The Denver and Rio Grande Railroad Company,—together with all other property owned by the Debtor at the date of the execution and delivery of the First Mortgage, including not merely the right of way and station buildings but also tracts of land which were not at the time being used for the transportation of passengers and freight (Granting Clauses First, Second, Fifth, and Sixth[1]).

He then provided that the lien should attach to all after-acquired property the cost of which should be financed in any part with First Mortgage Bonds or deposited cash, and also to all after-acquired property which should be essentially a part of the mortgaged enterprise (Granting Clauses Third, Fifth, and Sixth[2]).

The draftsman did not limit the lien on after-acquired property to property acquired for use on the Debtor's railroad as it existed in 1916. He extended it as well to new lines of railroad to be acquired in the future (Granting Clause Third[3]), and he provided that the lien should attach not only to the franchises with which the Debtor commenced its operations but also to all after-acquired franchises incidental to the maintenance or operation of the mortgaged enterprise, including new franchises acquired in connection with new lines of railroad thereafter becoming subject to the lien (Granting Clause Fifth[4]).

In order not to hamper the Debtor in financing separate ventures, the draftsman specified (in the "free funds" provision[5]) that the lien should not attach to any new property not essentially a part of the mortgaged enterprise, provided the Debtor finance the acquisition of such property entirely outside of the First Mortgage.

---

[1] Appendix A, *infra*, pp. 105-109, 111-113.

[2] Appendix A, *infra*, pp. 110-113.

[3] Appendix A, *infra*, pp. 110-111.

[4] Appendix A, *infra*, pp. 111-113.

[5] Appendix A, *infra*, pp. 113-114.

At the end of the "free funds" provision, the draftsman added the so-called "exception clause",[1] which permits the Debtor to create a first lien security in financing purchases of new equipment under equipment trusts and chattel mortgages, provided the financing be done entirely outside of the First Mortgage.

In order to preserve the integrity of the mortgaged enterprise, the draftsman inserted covenants of the Debtor to maintain its railroad system and property, including its equipment, in good condition and to make all necessary replacements, and also all necessary additions, so that the security of the bondholders might not be depleted by a failure to keep up the operating efficiency of the enterprise (Article Fourth, Section 9[2]).

Throughout the pages of the First Mortgage there appears the concept of a mortgage upon a railroad enterprise as an operating entirety. It is the concept that everything which is essentially a part of that enterprise, or to acquire which any First Mortgage money has been used, shall stand as security for the entire mortgage debt. It is not a concept of undivided interests in separate pieces of property standing as security for separate parts of the debt, but a concept of the enterprise as a whole standing as security for the debt as a whole.

The solution of the interpretation problems raised by the "lien controversy" will be simplified, we believe, if this underlying concept be borne in mind.

[1] Appendix A, *infra*, p. 114.

[2] I. C. C. Exhibit No. 5, pp. 76-77.

POINT II.

THE FIRST MORTGAGE IS A FIRST LIEN ON THE DEBTOR'S EQUITY IN EQUIPMENT SUBJECT TO THE EQUIPMENT TRUSTS OF 1923, 1924, AND 1929, AND THE BALDWIN LEASE OF 1931.

A. FACTS.

At the date of the execution and delivery of the Refunding Mortgage (March 1, 1932) and at the date of the institution of the Section 77 proceedings (August 2, 1935), equipment trust obligations of the Debtor were outstanding under three Philadelphia Plan equipment trusts (hereinafter called, respectively, the "Equipment Trust of 1923", the "Equipment Trust of 1924", and the "Equipment Trust of 1929"), and the Baldwin Lease of 1931. These equipment trust obligations were of serial maturities, and in each case the agreement provided for a cash payment equal to the difference between the cost of the equipment delivered and the principal amount of the equipment trust certificates (R. 1068-1070).

The initial payments and all payments made by the Debtor on the equipment trust obligations were made with funds other than proceeds of First Mortgage Bonds or deposited cash. Since the institution of the Section 77 proceedings, additional payments on the equipment trust obligations have been made by the Trustees of the Debtor and the Equipment Trusts of 1923 and 1924 have been satisfied (R. 1073-1074).

All of the equipment subject to these three equipment trusts and the Baldwin Lease of 1931 was acquired for use on all of the Debtor's lines of railroad, including those specifically described in the granting clauses of the First Mortgage, and was in fact so used (R. 1975).

An analysis of Exhibit G to the Stipulation (R. 1298)[1] shows the following facts:

[1] This exhibit was not printed.

At the date of the execution and delivery of the First Mortgage, the equipment subject to the lien of the First Mortgage consisted of 1,589 units, which had a book value less accrued depreciation as of that date of $3,550,748.93. Subsequent to the execution and delivery of the First Mortgage, the Debtor acquired by the use of First Mortgage Bonds or deposited cash 5,443 additional units of equipment, which had a book value at the date of acquisition of $11,483,640.21. Thus, the equipment on which the First Mortgage became an undisputed first lien (hereinafter called "Original Equipment") aggregated 7,032 units, of an aggregate book value of $15,034,389.14 (hereinafter called "Original Value of Original Equipment").

As of March 1, 1932, 626 units of Original Equipment, having an Original Value of $690,913.11, had been retired. As of that date, the Debtor had acquired by the use of free funds (not under equipment trusts) 52 units of equipment, having a book value at the date of acquisition of $49,027.16, and had acquired under equipment trusts 3,705 units of equipment, having a book value at the date of acquisition of $13,006,454.87,[1] making a total of 3,757 units, having a book value at the date of acquisition of $13,055,482.03.

As of March 1, 1932, the book value of the Original Equipment then remaining in service, less accrued depreciation to that date, was $9,684,906.77, representing a depreciation in the Original Value of Original Equipment of $5,349,482.37.

---

[1] This equipment was acquired under the Equipment Trusts of 1923, 1924, and 1929, and the Baldwin Lease of 1931, and the book value stated above is the total value of the equipment and not merely the value of the Debtor's equity, as is shown by the figures set forth in paragraph 83 of the Stipulation (R. 1068-1070).

B. ARGUMENT.

(I) The "Exception Clause" in the First Mortgage Does Not Have the Effect of Excepting from the Lien Equipment Acquired under Equipment Trusts, if Such Equipment Was Used or Acquired for Use on the Mortgaged Lines.

THE OPPOSING CONTENTIONS AS TO THE INTERPRETATION OF THE "EXCEPTION CLAUSE".

The controversy as to the equipment centers in a single phrase, "free from the lien hereof", appearing in the "exception clause",[1] which is a part of the "free funds" provision in the First Mortgage.

Isolating this phrase from its context, ignoring other significant language in the "exception clause", and giving to the "exception clause" a meaning wholly inconsistent with the general purpose evidenced by the remainder of the "free funds" provision and by the granting clauses as a whole, the Refunding Mortgage Trustee contends that the "exception clause" has the effect of making the Debtor's equity in this equipment entirely free of the lien of the First Mortgage, because this equipment was acquired under equipment trusts and was not financed under the First Mortgage.[2]

But the phrase "free from the lien hereof" cannot be construed in a vacuum.[3]

The equipment in controversy was acquired for use and was actually used on the mortgaged lines—it is essentially a part of the mortgaged enterprise. That being so, it falls

[2] Brief of Refunding Mortgage Trustee, pp. 18-32.

[3] "The meaning of a writing may be distorted where undue force is given to single words or phrases. We read the writing as a whole." *Empire Properties Corp.* v. *Manuf'rs T. Co.*, 288 N. Y. 242, 248, 43 N. E. (2d) 25, 28 (N. Y., 1942).

within the after-acquired property clauses of the First Mortgage.

As we interpret the "exception clause", its purpose and effect are merely to enable the Debtor to vest an unencumbered security title in the equipment lienor, whether the financing be done under an equipment trust or under a chattel mortgage. Our contention is that the lien of the First Mortgage attached to the Debtor's equity in this equipment immediately upon its acquisition and spread as that equity was increased by the subsequent installment payments on the equipment trust obligations.[1]

The interpretation problem presented by the "exception clause" will be more readily visualized if the methods of equipment financing ordinarily used by railroads are kept in mind. The Debtor might finance a purchase of new equipment (1) entirely with treasury cash, or (2) with First Mortgage Bonds or deposited cash, or (3) under a chattel mortgage, or (4) under what are known in common parlance as "equipment trusts". The two usual types of equipment trusts are: (a) a lease or conditional sale agreement, under which the legal title to the equipment is reserved in the lessor or vendor until payment of the final installment of the purchase price, and (b) a Philadelphia Plan equipment trust, under which the legal title to the equipment is conveyed to a trustee, which then issues equipment trust certificates for the unpaid balance of the purchase price (an initial down payment in cash being made by the railroad) and leases the equipment to the railroad under a lease which provides that the installments of rental shall be applied to the retirement of the equipment trust certificates and that the legal title to the equipment shall remain in the trustee until all of the equipment trust certificates are retired. Under both types of equipment trusts,

[1] In *United States Mortgage & Trust Co.* v. *Chicago & A. R. Co.*, 40 F. (2d) 386 (C. C. A., 7th Circ., 1930), the court said, at page 392:

> "The lien of the first lien mortgage did not remain suspended until final payment under the lease or equipment obligation, but attached to the interest of the consolidated company as current payments were made out of its general funds, * * *."

the legal title is reserved in the equipment trust lienor as security for the payment of the unpaid balance of the purchase price, and the railroad acquires an "equity" in the equipment by virtue of the initial down payment, which equity increases in amount as successive installments of the purchase price are paid.

Under the first three methods of financing above mentioned, the legal title to the equipment is vested in the Debtor. Under the fourth method, the legal title (which is merely a security title) is vested in the equipment trust lienor.

The interpretation placed upon the "exception clause" by the Refunding Mortgage Trustee leads to this curious result: In the case of equipment financed entirely with treasury cash, and in the case of equipment financed with First Mortgage Bonds or deposited cash, and also in the case of equipment financed under a chattel mortgage—in other words, in every case in which the legal title to the equipment is vested in the Debtor,—the equipment clearly becomes subject to the lien of the First Mortgage, if it be used or acquired for use on the mortgaged lines. In the first two cases mentioned, the First Mortgage attaches to the equipment as a first lien; in the case of equipment financed under a chattel mortgage, the lien of the First Mortgage is subordinated, by virtue of the "exception clause", to the lien of the chattel mortgage. But, in the single case of equipment financed under an equipment trust, in which the legal title to the equipment is vested, not in the Debtor but in the equipment trust lienor, the "exception clause" (so the Refunding Mortgage Trustee contends) has the effect of making the Debtor's equity entirely free of the lien of the First Mortgage.

The General Purpose Evidenced by the Granting Clauses of the First Mortgage.

No rule of construction is more fundamental than that the "writing will be read as a whole, and every part will be interpreted with reference to the whole; and if possible

it will be so interpreted as to give effect to its general purpose."[1]

The general purpose evidenced by the granting clauses of the First Mortgage is expressed in two parallel and complementary provisions.

The first is a provision in Granting Clause Third,[2] which is to the effect that all after-acquired property, including equipment, and including "any and all right, title and interest" in equipment, shall become subject to the lien, provided that such property falls within any one of four specifically enumerated categories (hereinafter for convenience referred to as the "four categories"), viz.:

> (1) Property on account of which First Mortgage Bonds or deposited cash shall have been taken down;
>
> (2) Property constituting an integral part of the mortgaged property;
>
> (3) Property used or acquired for use in or for the maintenance or operation of or appertaining to any of the mortgaged property; and
>
> (4) Securities of and property acquired from certain subsidiary corporations.

The second is the "free funds" provision,[3] which in effect permits the Debtor, by the use of its credit or free funds, to acquire property, including equipment, free of the lien, provided that such property does not fall within any one of these same "four categories".

The language used in Granting Clause Third to define the extent of the after-acquired property clause is substantially identical with the language used in the "free funds" provision (preceding the "exception clause") to define the limitations upon the Debtor's right to acquire property free of the lien. The language used is not con-

---

[1] 3 Williston on Contracts (Williston and Thompson Rev. Ed. 1936), p. 1779.

[2] Appendix A, *infra*, pp. 110-111.

[3] Appendix A, *infra*, pp. 113-114.

tradictory; it is complementary. The after-acquired property clause and the "free funds" provision, when placed side by side, fit together like the two parts of an ancient parchment indenture and indicate clearly a general purpose (1) to subject to the lien all after-acquired property, provided that such property falls within any one of the "four categories", and (2) to permit the Debtor, by the use of its credit or free funds, to acquire any property free of the lien, provided that it does not fall within any one of the "four categories".

The Purpose of the "Exception Clause".

The "exception clause" was obviously inserted to meet the requirements of a particular situation of great practical importance—the necessity of permitting the Debtor to finance purchases of equipment through loans secured by liens upon the equipment purchased. To that end, it was essential to empower the Debtor to make effective pledges of the equipment—whether under some form of equipment trust or under some form of chattel mortgage—as security for the advances obtained. There is no reason to believe that the draftsman of the First Mortgage sought to accomplish anything more. To accomplish that result, consistently with the general purpose above stated, it was necessary only to create an exception to the first lien character of the coverage of the First Mortgage, so as to enable the Debtor to vest an unencumbered security title in the equipment lienor. It was not necessary also to prevent the lien of the First Mortgage from attaching to the Debtor's equity in the equipment, and such a result would be inconsistent with the general purpose above stated.

If the equipment in controversy had been acquired by the Debtor entirely by the use of free cash in its treasury, it would unquestionably be subject to the lien of the First Mortgage, because it was acquired for use and was actually used on the mortgaged lines and therefore falls within the third of the "four categories". What reason can there be for making a distinction based on the fact that this equip-

ment was acquired under equipment trusts instead of with treasury cash? It is fair to assume that the draftsman of the First Mortgage was seeking to accomplish an intelligent purpose. But to impute to the draftsman an intent that the lien of the First Mortgage should attach or should not attach to equipment, according to the chance circumstance of whether it is acquired with treasury cash or under an equipment trust, is to impute to the draftsman a whimsical intent which is not consistent with any intelligent purpose.

We submit that the "exception clause" should be given a sensible meaning consistent with the general purpose above stated and that the after-acquired property clause and the "free funds" provision, when read as a whole, have the effect of subjecting the Debtor's equity in this equipment to the lien of the First Mortgage.

Not only does the Refunding Mortgage Trustee lift the "exception clause" out of its context as a part of the "free funds" provision; it does not even construe the "exception clause" itself as a whole.

The "exception clause" deals with two alternative methods of equipment financing, viz., (a) financing under some form of equipment trust, with the legal title vested in the equipment lienor, and (b) financing under a chattel mortgage, with the legal title vested in the Debtor subject to the lien securing the equipment obligations.

We believe the language used in dealing with these two alternative methods of financing shows that the purpose of the "exception clause" is not to free the Debtor's equity from the lien of the First Mortgage but merely to enable the Debtor to vest an unencumbered security title in the equipment lienor. In dealing with financing under an equipment trust, where the legal title is in the equipment lienor, the draftsman used the words "free from the lien hereof". In dealing with financing under a chattel mortgage, where the legal title is in the Debtor, the draftsman used the words "superior to the lien of this indenture". This differentiation in the language used shows that the draftsman was thinking, not of the Debtor's equity

but of the security title. In each case, he used appropriate words to disencumber the security title.

The context clearly shows that, in the case of chattel mortgage financing, the draftsman contemplated that the First Mortgage would be a lien on the Debtor's equity in the equipment. Why should he make a whimsical distinction between equipment financed under a chattel mortgage and equipment financed under an equipment trust? The sensible interpretation, we submit, is that the Debtor's equity is subject to the lien of the First Mortgage in both cases and that the "exception clause" merely disencumbers the security title, thereby enabling the Debtor to create a first lien security for the equipment obligations.

The Function of the Single Limitation in the "Exception Clause".

The "exception clause" places a single limitation upon the right of the Debtor to finance purchases of equipment with first lien equipment obligations, that limitation being expressed in the words "unless First Mortgage Bonds shall have been authenticated and delivered or their proceeds or other cash deposited hereunder paid out against the same".[1]

Relying upon a superficial resemblance of language, the Refunding Mortgage Trustee erroneously assumes that the single limitation in the "exception clause" is identical with the first of the four limitations upon the right of the Debtor to acquire property free of the lien which are specified in the preceding part of the "free funds" provision,[2] and it proceeds to argue that there "would have been no point in repeating" that first limitation in the "exception clause", if it had been intended that all four of the limitations specified in the preceding part of the "free funds"

---

[1] Appendix A, *infra*, p. 114.

[2] The "free funds provision" permits the Debtor to acquire property free of the lien, provided that such property does not fall within any one of the "four categories". The "four limitations" referred to in the brief of the Refunding Mortgage Trustee (p. 22) are those expressed in the enumeration of the "four categories".

provision should apply to property acquired under the "exception clause".[1]

The fallacy of this argument lies in its premise. As an analysis will show, the single limitation in the "exception clause" is not identical with the first of the four limitations expressed in the "four categories"; their functions are distinct and independent. The function of the four limitations expressed in the "four categories" is to limit the right of the Debtor to acquire property free of the lien; the function of the single limitation in the "exception clause" is to limit the right of the Debtor to finance purchases of new equipment with first lien equipment obligations.

Nor does the single limitation in the "exception clause" have the effect of preventing the lien of the First Mortgage from attaching to equipment acquired under the "exception clause" and not financed with First Mortgage Bonds or deposited cash. This becomes instantly apparent when the "exception clause" is read as a whole.

The "exception clause", as we have seen, deals with two alternative methods of equipment financing, viz., (a) equipment trust financing, and (b) chattel mortgage financing. The single limitation in the "exception clause" applies equally to both, and it is logical to assume that its effect is the same in both cases.

The words "superior to the lien of this indenture"[2] show that equipment financed under a chattel mortgage may come under the lien, even though no First Mortgage Bonds or deposited cash be used in the financing. The single limitation in the "exception clause" does not have the effect, then, of preventing the lien of the First Mortgage from attaching.

But what is the test of whether, in a particular case, the lien attaches or does not attach to equipment financed under a chattel mortgage? Obviously, that test must be sought outside of the "exception clause". The "exception clause" is not a granting clause. Equipment comes

[1] Brief of Refunding Mortgage Trustee, p. 22.

[2] Appendix A, *infra*, p. 114.

under the lien, not by virtue of the "exception clause" but by virtue of the after-acquired property clauses, which by their terms extend the lien to all property falling within any one of the "four categories". If, as the Refunding Mortgage Trustee contends, the test of the "four categories" does not apply, we are left without any test for determining whether, in a particular case, the lien attaches or does not attach to equipment financed under a chattel mortgage.

Accepting the argument of the Refunding Mortgage Trustee leads to this bizarre result: If the test of the "four categories" does not apply, equipment financed under a chattel mortgage must come under the lien, not by virtue of the after-acquired property clauses but by virtue of the "exception clause" itself, operating as an independent granting clause. Since nothing in the "exception clause" limits the extent of the lien in such a case, it must follow that the lien attaches to all equipment financed under a chattel mortgage, even to equipment used exclusively on unmortgaged lines.

This but shows the morass of logical difficulties into which we are led by the attempt of the Refunding Mortgage Trustee to lift the phrase "free from the lien hereof" out of its context and to construe it in a vacuum without regard to the general purpose evidenced by the granting clauses.

When the "exception clause" and the preceding part of the "free funds" provision are read together as one harmonious whole, the function of the single limitation in the "exception clause" becomes perfectly clear. It prohibits the Debtor from financing purchases of new equipment with first lien equipment obligations, unless the financing be done entirely outside of the First Mortgage.

Whether the lien of the First Mortgage attaches or does not attach to the Debtor's equity in the equipment is determined, not by the "exception clause" but by the test of the "four categories". Under that test, the lien attaches to all equipment used or acquired for use on the mortgaged lines, whether the cost be financed entirely with

treasury cash, or be financed with First Mortgage Bonds or deposited cash or be financed under a chattel mortgage, or be financed under an equipment trust.

This interpretation gives due effect both to the single limitation specified in the "exception clause" and to the four limitations specified in the preceding part of the "free-funds" provision, and it gives a sensible meaning to the "exception clause" which is consistent with the general purpose evidenced by the granting clauses.

The Refunding Mortgage Trustee argues that our interpretation of the "exception clause" would limit the operation of the "exception clause" to "equipment bought for use exclusively on after-acquired branches or extensions not financed with First Mortgage funds and which was never used on the main line" and argues that such a limitation "would be unreasonable, and also contrary to sound railroading practice, for efficient use of equipment requires that it be available for use on any portion of the railroad's property".[1]

A complete answer to this argument is found in Granting Clause Fifth,[2] which in effect provides that the lien shall attach to after-acquired equipment (among the other property) which is "* * * used or held for use as, or as a part or as parts of, or to facilitate or safeguard the maintenance or operation of, any lines of railroad, extensions, branches, * * * or other properties now or at any time hereafter subject to the lien of this indenture—*whether the same exclusively appertain to or be used as parts of or in or for the maintenance or operation of lines of railway or other properties subject to the lien hereof or appertain to or be so used as parts of or in or for the maintenance or operation of such lines of railroad or other properties in common with lines of railroad or property not subject to the lien hereof*".[3]

---

[1] Brief of Refunding Mortgage Trustee, pp. 21-22.

[2] Appendix A, *infra*, pp. 111-113.

[3] Italics in this brief are ours, unless otherwise designated, or unless otherwise clearly indicated by the context.

This language evidences a clear intent that the First Mortgage shall become a lien on all after-acquired equipment which is essentially a part of the mortgaged enterprise, even though the Debtor may also use such equipment in connection with wholly separate unmortgaged ventures.

THE "SUBJECT, HOWEVER," CLAUSE.

Although, as we believe, one need not look beyond the provisions already discussed for convincing proof of the correctness of our interpretation of the "exception clause", that interpretation finds added support in the "subject, however," clause,[1] which immediately follows the habendum clause in the First Mortgage. This provision was cited by the Commission in its report dated October 10, 1938 (R. 266). It reads:

> "SUBJECT, HOWEVER, as to all equipment now owned to the equipment trust or conditional sale agreements secured thereon, *and as to equipment hereafter acquired, to the equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby,* and as to any property hereafter acquired by the Company or by any successor or purchasing corporation and becoming subject to the lien of this indenture, to any liens thereon existing at the time of such acquisition and not expressly prohibited by the terms of this indenture."

As the Commission aptly said, "If all equipment acquired under equipment trusts was to be entirely free of the lien of the first mortgage, it is not apparent why the words 'equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby' were made part of the last quoted provision" (R. 266).

The Refunding Mortgage Trustee contends that these words refer to a situation in which the cost of new equipment is financed partly with First Mortgage Bonds or deposited cash and partly under an equipment trust. In such a situation, the Refunding Mortgage Trustee con-

[1] Appendix A, *infra*, p. 115.

tends, the First Mortgage will attach to the Debtor's equity as a lien subordinate to the lien created by the equipment trust.[1]

For a railroad to purchase equipment under an equipment trust and to finance the acquisition of the equity with first mortgage bonds authenticated and delivered against the acquisition of such equity would be so unusual as to be a practically unheard of situation. It is difficult to believe that the draftsman of the First Mortgage inserted the phrase above quoted merely to provide for such a situation. It is logical to suppose that he had in mind situations involving the ordinary methods of equipment trust financing.

In support of its contention, the Refunding Mortgage Trustee refers to the bond and cash takedown provisions in Section 2 of Article Second of the First Mortgage[2] and particularly to the definition of the words "lien" and "charge" in subsection G, on page 60, as indicating that the First Mortgage contemplates that the cost of new equipment may be so financed.

We believe the provisions of the First Mortgage do not permit the cost of new equipment which is being financed in part under an equipment trust to be made the basis for taking down First Mortgage Bonds or deposited cash.

The definition of the words "lien" and "charge", in subsection G, on page 60, is as follows:

> "The words 'lien' and 'charge,' as used in this Section 2, shall be deemed to include, among other things, *deferred instalments of the purchase price of property in every case where title thereto has not then vested in the purchaser* or, having so vested, is subject to a vendor's lien or any right of the seller to retake or enforce a charge upon such property upon default in the payment of such deferred instalments of the purchase price and also *the deferred payments to be made or rentals to be paid under any conditional sale agreement or lease or trust agreement covering equipment.*"

---

[1] Brief of Refunding Mortgage Trustee, pp. 23-25.

[2] I. C. C. Exhibit No. 5, pp. 40-60.

The purpose of requiring the Debtor to certify "liens" and "charges" in an application to take down bonds or deposited cash is twofold: (1) to disclose to the First Mortgage Trustees the existence of any encumbrances which might affect the right of the Debtor to bond the property, so as to enable them to determine whether the property can be bonded at all, and (2), if the property is bondable, to show the amount of indebtedness secured by such encumbrances, so that bonds or deposited cash may be reserved against them pursuant to subsection E, on pages 57-58.

The mere fact that a certain kind of encumbrance is included in the definition of the words "lien" or "charge" does not mean, however, that property subject to such an encumbrance may be bonded. The bond and cash takedown provisions specify various conditions precedent to the bonding of property, which must in each case be complied with. Among these conditions precedent is the requirement, in clause (a) of paragraph Sixth, on page 54, that the First Mortgage Trustees shall be furnished with evidence of the execution and delivery to the Debtor of "all deeds, conveyances or other instruments necessary to vest the title to such property" in the Debtor.

The definition of the words "lien" and "charge", on page 60, includes at least one example of an encumbrance the existence of which would prevent the bonding of property, because the requirement that title be vested in the Debtor could not be met. The definition includes "deferred instalments of the purchase price of property in every case where title thereto has not then vested in the purchaser."

Obviously, the term "title", as used in the above-quoted language of the definition, has the same meaning as in clause (a) of paragraph Sixth. Although the term is not defined, the context indicates that it means "legal title". If this be the correct meaning, then equipment acquired under an equipment trust or conditional sale agreement could not be bonded, because the requirement in clause (a) of paragraph Sixth that title be vested in the Debtor could not be met.

If we accept the Refunding Mortgage Trustee's explanation of the "subject, however," clause, we are obliged to draw another illogical distinction between equipment financed under an equipment trust and equipment financed under a chattel mortgage.

In the case of equipment financed under a chattel mortgage, the "exception clause" makes perfectly clear that First Mortgage Bonds or deposited cash may not be used unless the lien of the chattel mortgage be subordinate to the lien of the First Mortgage. Otherwise, the single limitation specified in the "exception clause" becomes meaningless, for the language is,

> "and the Company *may, unless* First Mortgage Bonds shall have been authenticated and delivered or their proceeds or other cash deposited hereunder paid out against the same, * * * purchase such equipment and issue obligations therefor secured by mortgage or pledge of such equipment *superior to the lien of this indenture.*"[1]

Yet, in the case of equipment financed under an equipment trust, the Refunding Mortgage Trustee contends that if First Mortgage Bonds or deposited cash be used in the financing, the lien of the First Mortgage will be subordinate to the lien created by the equipment trust.

To require that the bondholders be given a first lien on the equipment in the one case, but not in the other, would be no less than capricious.

(II) The Inclusion in the Refunding Mortgage of Language Not Contained in the First Mortgage Does Not Affect the Interpretation of the First Mortgage.

The "exception clause" appearing in the Refunding Mortgage[2] contains a proviso to the effect that, when and as the Debtor acquires an equity in equipment acquired under

---

[1] Appendix A, *infra*, p. 114.

[2] I. C. C. Exhibit No. 6, pp. 22-23.

equipment trusts or chattel mortgages, such equity shall become subject to the lien of the Refunding Mortgage. The Refunding Mortgage Trustee contends that the absence from the First Mortgage of a similar proviso indicates an intent that the Debtor's equity in equipment acquired under equipment trusts shall be free of the lien of the First Mortgage.[1]

We submit that the interpretation of the provisions of the First Mortgage must be governed exclusively by the terms of that instrument, without reference to the terms of the Refunding Mortgage. We believe that, under the proper interpretation of the granting clauses of the First Mortgage, the Debtor's equity in the equipment subject to the Equipment Trusts of 1923, 1924, and 1929, and the Baldwin Lease of 1931 is subject to the lien of the First Mortgage. We do not perceive how this result can be deemed to be affected by the chance circumstance that the draftsman of a mortgage executed nearly sixteen years after the execution of the First Mortgage considered it appropriate to insert in that instrument additional language not appearing in the First Mortgage. As is well known, during the period since 1916, there has been an increasing tendency on the part of meticulous draftsmen to insert in corporate mortgages language intended to dispose of every conceivable question which might be raised as to their meaning, even though under a reasonable interpretation the meaning would otherwise be clear.

(III) The Statements Contained in the Debtor's Listing Applications Are Not Binding upon the Holders of First Mortgage Bonds.

The Refunding Mortgage Trustee contends that certain language appearing in certain of the Debtor's listing applications, in connection with issues of First Mortgage Bonds, indicates a practical construction of the First Mortgage as not covering the Debtor's equity in the equipment

[1] Brief of Refunding Mortgage Trustee, pp. 19, 22, 25.

subject to the Equipment Trusts of 1923, 1924, and 1929, and the Baldwin Lease of 1931.[1]

The language of the listing applications, however, at most indicates the construction placed upon the First Mortgage by the Debtor, which is the party beneficially affected by such construction. There is nothing in the record to indicate that either the First Mortgage Trustees or the holders of First Mortgage Bonds—the parties adversely affected—acquiesced in such construction. It is difficult to understand how the meaning of a contract can be deemed to be governed by a purely unilateral construction placed upon it by the party beneficially affected, without such construction being acquiesced in by the parties adversely affected.

> "Contemporary construction of a contract by acts of the parties is entitled to very great weight, but it ought to appear with reasonable certainty that they were acts of both parties, done with knowledge, and in view of a purpose at least consistent with that to which they are now sought to be applied." *Kane* v. *Schuylkill Fire Ins. Co.*, 199 Pa. 205, 207, 48 Atl. 989 (Pa., 1901); cited with approval in *Sternbergh* v. *Brock*, 225 Pa. 279, 74 Atl. 166, 169 (Pa., 1909).

To give to the language of the listing applications the effect claimed by the Refunding Mortgage Trustee would amount to adopting the fantastic proposition that the lien of the holders of outstanding bonds can be changed or made to vanish by the mortgagor company inserting a statement in a listing application which the bondholders may never have seen or heard of.

Nor do the cases cited by the Refunding Mortgage Trustee[2] support such a proposition.

---

[1] Brief of Refunding Mortgage Trustee, pp. 17, 26-27.

[2] *Continental Co.* v. *United States*, 259 U. S. 156 (1922); *In re New York, N. H. & H. R. Co.*, 27 F. Supp. 392 (D. C., D. Conn., 1938), aff'd on op. below, 104 F. (2d) 1018 (C. C. A., 2nd Circ., 1939); *Cunningham* v. *Pressed Steel Car Co.*, 238 App. Div. 624; 265 N. Y. Supp. 256 (N. Y., 1933); *Continental Ins. Co.* v. *Minneapolis, St. P. & S. S. M. Ry. Co.*, 283 Fed. 276 (D. C., D. Minn., 1922).

Continental Co. v. *United States* involved a controversy between the preferred and common stockholders of the Reading Company as to their respective rights in the distribution of capital assets on liquidation. This Court based its conclusion on the construction of the words of the organization agreement of 1896 and referred to the language of the listing application of 1904 merely as confirming that conclusion.

The Refunding Mortgage Trustee interprets this case as holding that the corporation which filed the listing application was "the representative of the security holders".[1] This interpretation is apparently based upon the language of the first part of the sentence appearing at the bottom of page 180 and the top of page 181 of 259 U. S., only the last part of which is quoted in the brief of the Refunding Mortgage Trustee. We submit that the language does not justify such an interpretation. We quote the full text of the sentence:

> "Coming as this must have come from the *representatives of both* the preferred and common stockholders, it is significant evidence of *what they then thought* of their respective rights and has the additional weight of a representation to future purchasers of the two classes of stock as to the kind of interests they were buying in the company."

The use of the plural "representatives" and the reference to "both" groups of stockholders indicate that the Court was referring, not to the corporation but to individuals having authority to speak for both groups, and the words "what they then thought" indicate that the Court had in mind persons consciously formulating an opinion as to their rights with knowledge of the facts.

If it be argued that the directors of a corporation are the "representatives" of the stockholders, who elected them, it does not follow that either the directors or the corporation are the "representatives" of bondholders, with authority to compromise or destroy their security by

[1] Brief of Refunding Mortgage Trustee, pp. 26-27.

statements made without the knowledge or consent of the bondholders. Even a mortgage trustee is not the "representative" of its bondholders to that extent.

In *Guaranty Trust Co. of New York, et al.* v. *Minneapolis & St. L. R. Co., et al.*, 36 F. (2d) 747 (C. C. A., 8th Circ., 1929), cert. denied, 281 U. S. 756 (1930), the trustee under the Minneapolis & St. Louis First and Refunding Mortgage joined with a successor to the mortgagor company and the trustee under the successor company's mortgage in executing a so-called "closure agreement", the effect of which, if valid, would have been to terminate the operation of the after-acquired property clauses of the Minneapolis & St. Louis First and Refunding Mortgage. The Minneapolis & St. Louis First and Refunding Mortgage bondholders were not parties to the "closure agreement", but it was argued that the mortgage trustee was the "duly accredited representative of the bondholders", and that the bondholders were therefore bound. The Circuit Court of Appeals concurred in the view of the District Court that the mortgage trustee was without such authority (p. 753).

The District Court nevertheless held the "closure agreement" to be binding on the bondholders "upon the ground that there was no sufficient proof in the record that the agreement was entered into without their knowledge; that there was no showing as to the time when the bondholders first learned of the agreement, even if they did not know of it at the time of its execution; that there was no showing whether these bondholders had held their holdings in 1912; and, finally that the recording of this agreement in the various counties in Minnesota, and with the secretary of state of South Dakota, besides other acts of publicity, showed laches on their behalf in asserting the alleged violation of their rights" (p. 754). The Circuit Court of Appeals, in holding that the "closure agreement" was not binding on the bondholders, said (p. 754):

> "The bondholders, in their pleading denied knowledge of the 1912 agreement, but the decision of the lower court, in effect, imputed knowledge to them, apparently on the ground that a reasonably prudent man

should have found out what was shown by the public records, or what was a matter of some notoriety. We are of the view that such an imputation is not warranted. The agreement was made without consulting the bondholders, and without their knowledge; and, until there was a default in the payment of the interest coupons, there was nothing to arouse in any bondholder the least suspicion that the mortgage had been modified by a subsequent agreement."

The *New Haven* case involved a controversy between the trustee under the Air Line Mortgage and the trustee under the New Haven First and Refunding Mortgage as to which mortgage constituted a first lien on certain parcels of land originally acquired by the Air Line Company or its predecessor. The Air Line Mortgage, which purported to cover all of the property of the Air Line Company, was executed in 1905 at the request of the New Haven, at a time when the New Haven was operating the Air Line property as lessee, and the mortgage recited that the Air Line Company had been legally requested to execute a mortgage of all of its property. In 1907, the New Haven acquired all of the Air Line property through a merger. The New Haven First and Refunding Mortgage was not executed until 1920.

The court, after finding in the Air Line Mortgage a plainly expressed intent to cover the parcels of land in question, then went on to state (p. 395) that an examination of the circumstances surrounding the execution of the Air Line Mortgage led to no different conclusion. In that connection, the court referred to a listing application filed by the New Haven in 1908—twelve years before the execution of the New Haven First and Refunding Mortgage—in which the New Haven stated that the Air Line bonds were secured by a mortgage upon all of the property of the Air Line Company. The court overruled an objection of the trustee under the New Haven First and Refunding Mortgage to the introduction of the listing application in evidence.

The listing application, which was filed years before the New Haven First and Refunding Mortgage came into exist-

ence, constituted an admission against interest by the New Haven, the party adversely affected by the interpretation placed by the court upon the language of the Air Line Mortgage. There is nothing in the *New Haven* case to show that a listing application not acquiesced in by bondholders may be used to support an interpretation of the mortgage adverse to the bondholders. The same is true of the *Cunningham* case.

In the *Cunningham* case, a bondholder sued to enforce payment of his bonds after maturity, and the question was whether the unconditional promise to pay at maturity, contained on the face of the bonds, could be contradicted by a reference in the bonds to the indenture, which indenture contained provisions restricting the right of bondholders to sue. The court held that it could not. In the opinion, the court mentioned the fact that the listing application filed by the defendant referred to no provision in the indenture, or otherwise, which would preclude any bondholder from enforcing collection of his bonds at maturity (p. 627 of 238 App. Div.). To the extent that the listing application was given any weight, it constituted an admission against interest by the party adversely affected.

In *Continental Ins. Co.* v. *Minneapolis, St. P. & S. S. M. Ry. Co.*, the plaintiffs, preferred stockholders of the defendant railway company, sought to enjoin the payment of a dividend to holders of common stock, on the ground that the payment would violate their preferential rights as specified in the preferred stock certificates. The court held that the language of the preferred stock certificates was inconsistent with the provisions of the articles of consolidation and that the latter must prevail. The court held that the rights of stockholders established by the articles of consolidation "could not be changed, either by inadvertent or intentional action, by the board of directors" (p. 284).

The court further held that there was no estoppel in favor of the plaintiffs against the defendant and added that there had been a practical construction of the contract with reference to the preferred stock (p. 284). The facts which the court recited as establishing a practical construction showed that the plaintiffs, with knowledge,

acquiesced in a course of conduct by the defendant railway company which negatived the interpretation of the contract for which the plaintiffs were contending.

In the preliminary statement of facts in the first part of the opinion, the court quoted language appearing in two applications made to the New York Stock Exchange for the listing of preferred stock (p. 278), but the court made no mention of the listing applications in its recital of the facts which it regarded as establishing a practical construction (p. 284). Curiously enough, the language of the listing applications supported the interpretation contended for by the plaintiffs rather than the interpretation adopted by the court.

Prior to the filing of the first of the listing applications relied upon by the Refunding Mortgage Trustee, over $27,000,000 in aggregate principal amount of First Mortgage Bonds had been issued (R. 1045-1046). It is absurd to say that the holders of those bonds were bound, at their peril, to ascertain from day to day whether the Debtor was about to file with some stock exchange a listing application containing statements which compromised or destroyed their security and to take steps to prevent such filing.

(IV) The Wabash and Rock Island Cases, Cited by the Refunding Mortgage Trustee, Are Distinguishable.

As authority for its interpretation of the "exception clause", the Refunding Mortgage Trustee places reliance upon an unreported opinion of Judge SANBORN in *The Equitable Trust Company of New York, Trustee* v. *The Wabash Railroad Company, et al.* (R. 1721-1734) and upon an unreported opinion of Judge WILKERSON filed on October 31, 1939, in the Rock Island reorganization proceeding.[1]

---

[1] Brief of Refunding Mortgage Trustee, pp. 27-32.

For the convenience of the Court, a copy of Judge WILKERSON's opinion, as it appears at pages 2807-2838 of the Printed Record in the Rock Island reorganization proceeding, is set forth in Appendix B of this brief

A comparison of the granting clauses of the Wabash mortgage and of the two Rock Island mortgages with the granting clauses of the First Mortgage will show that the provisions of the Wabash and Rock Island mortgages differed so radically from the provisions of the First Mortgage that these cases throw little light upon the interpretation of the "exception clause".

Neither the Wabash mortgage *nor the* Rock Island mortgages contained any provision comparable to the "exception clause" in the First Mortgage. The so-called "reservation paragraph" in the Wabash mortgage, which was the provision which Judge SANBORN was construing, was in reality a "free funds" provision. The same is true of the so-called "proviso" in the Rock Island "general gold bond mortgage" and of the so-called "free property clause" in the Rock Island "first and refunding mortgage".

In the *Wabash* case, Judge SANBORN relied upon specific repugnant language in the "reservation paragraph" (or "free funds" provision), coming at the end of the granting clauses, to contradict and cut down the sweeping general language of the after-acquired property clauses.

In the *Rock Island* case, Judge WILKERSON was faced with the problem of reconciling seemingly contradictory language in the granting clauses (including the "free funds" provision) of each of the two Rock Island mortgages. In each case, he considered the effect of particular language in the after-acquired property clauses and in the "free funds" provision as indicating a general purpose and sought to give a meaning to both the after-acquired property clauses and the "free funds" provision which would be consistent with that general purpose.

As we have pointed out, the language of the after-acquired property clauses and the language of the "free-funds" provision in the First Mortgage are not contradictory but complementary and, when read together, clearly indicate an intent to subject to the lien of the First Mortgage the Debtor's equity in the equipment subject to the Equipment Trusts of 1923, 1924, and 1929, and the Baldwin Lease of 1931.

(V) The First Mortgage Covers Additions to Equipment Needed for the Efficient Operation of the Mortgaged Enterprise.

THE COVENANT TO MAINTAIN THE OPERATING EFFICIENCY.

In addition to the grant, in Granting Clause Third, of after-acquired equipment "used or acquired for use in or for the maintenance or operation" of the mortgaged enterprise,[1] and in addition to the grant, in Granting Clause Fifth, of after-acquired equipment "used or held for use * * * to facilitate or safeguard the maintenance or operation" of the mortgaged enterprise,[2] the First Mortgage contains, in Granting Clause Fifth, the following grant of after-acquired equipment (among other property):

> "any and all *replacements*, renewals, improvements and betterments of *and additions* to any such lines of railroad or any property or rights of whatsoever description now or at any time hereafter subject to the lien of this indenture, whensoever and by whomsoever such replacements, renewals, improvements, betterments or additions may be made."[3]

The last quoted after-acquired property clause is supplemented by a covenant of the Debtor, in the first paragraph of Section 9 of Article Fourth,[4] which reads as follows:

> "Section 9.—The Company will diligently preserve all of the rights and franchises to it granted and upon it conferred and will at all times maintain, preserve and keep its railroad system and property in

---

[1] Appendix A, *infra*, p. 110.
[2] Appendix A, *infra*, p. 112.
[3] Appendix A, *infra*, p. 113.
[4] I. C. C. Exhibit No. 5, p. 76.
The second paragraph of Section 9 contains a special maintenance and replacement covenant which applies only to equipment upon which the First Mortgage is a first lien. This covenant is quoted and discussed at pages 44-46 of this brief.

good repair, working order and condition and *will from time to time make all needful and proper* repairs, renewals and *replacements and* alterations, *additions*, betterments and improvements; and will cause each subsidiary company to preserve its rights, franchises and property in like manner and to like extent."

This covenant, which requires the Debtor not only to make all needful and proper repairs, renewals, and replacements but also to make all needful and proper "additions", is in effect a covenant of the Debtor to maintain under the First Mortgage a railroad fully equipped for efficient operation and, to that end, to make such "additions" to its equipment and other property as may be necessary to keep up the operating efficiency of the mortgaged enterprise. Coupled with the corresponding language in Granting Clause Fifth, this covenant defines the scope of the grant of after-acquired property as including after-acquired equipment coming within the description of such "additions", and it has the effect of causing the lien to attach to all after-acquired equipment which is needed for the efficient operation of the mortgaged enterprise.

The governing principle was stated by then Chief Judge Cardozo of the New York Court of Appeals in *Guaranty Trust Co.* v. *N. Y. & Q. C. Ry. Co.*, 253 N. Y. 190, 170 N. E. 887 (N. Y., 1930), in the following language (p. 199 of 253 N. Y.):

> "A mortgage of property to be acquired in the future is not a present lien at law (*Rochester Distilling Co.* v. *Rasey*, 142 N. Y. 570). It is, however, equivalent to a covenant to give a lien, and as such, when the property comes into existence, may be specifically enforced in equity (*Kribbs* v. *Alford*, 120 N. Y. 519): *In the absence of intervening equities forbidding such a use, the property, when acquired, is deemed to feed the mortgage, as if in existence at the beginning* (*Holroyd* v. *Marshall*, 10 H. L. Cas. 191; *Zartman* v. *First Nat. Bank*, 189 N. Y. 267). There is need to distinguish, however, between the enforce-

ment of the covenant in respect of property thereafter acquired by the mortgagor itself, and property thereafter acquired by a successor or a purchaser. *Property thereafter acquired by the mortgagor itself will be subject to the mortgage, if within the description of the covenant*, however alien it may be in quality or function to the property presently subjected to the lien (*People's Trust Co.* v. *Schenck*, 195 N. Y. 398; *Ithaca Trust Co.* v. *Ithaca Traction Corp.*, 248 N. Y. 322). It is otherwise in respect of purchasers, and even at times successors. To spread the lien of the mortgage to property acquired by these, there must be an independent ground of duty. This may have its origin in a statute or in a covenant of assumption or in the principles of estoppel or accession, or in some other kindred equity (*Trust Co.* v. *City of Rhinelander*, 182 Fed. Rep. 64, 69; *Metropolitan Trust Co.* v. *Chicago, etc., R. R. Co.*, 253 Fed. Rep. 868; certiorari denied, 248 U. S. 586)."

There can be no question but that the equipment acquired under the Equipment Trusts of 1923, 1924, and 1929, and the Baldwin Lease of 1931 was needed for the efficient operation of the mortgaged enterprise. The fact that this equipment was acquired for use and was actually used on the mortgaged lines, and the fact that the Debtor's management deemed the acquisition of this equipment to be so essential as to justify a resort to borrowing, sufficiently evidence the need. This equipment therefore is "within the description of the covenant".

At the time this equipment was acquired, there were no "intervening equities" to prevent the lien of the First Mortgage from attaching. The Refunding Mortgage had not come into existence, and, in any case, the holders of Refunding Mortgage Bonds could not establish superior equities with respect to this equipment. In view of the subordination provision in the Refunding Mortgage,[1] the holders of Refunding Mortgage Bonds could have no standing in equity to claim a prior lien on property coming

[1] I. C. C. Exhibit No. 6, p. 23.

"within the description of the covenant" in the First Mortgage and which the Debtor was under an equitable duty to subject to the lien of the First Mortgage.

See *Westinghouse Electric & Mfg. Co.* v. *Brooklyn R. T. Co.*, 276 Fed. 152 (D. C., S. D. N. Y., 1921).

As will be observed, the covenant in the first paragraph of Section 9 of Article Fourth is more than a mere covenant to replace specific units of equipment as they are retired from service: it is a covenant to make all needful and proper "additions". Moreover, the "description of the covenant" is not confined to equipment on which the First Mortgage is a first lien: it is broad enough to include equipment acquired under equipment trusts. Nor is there anything in the language of the covenant, or in the corresponding language in Granting Clause Fifth, to suggest that a marking of the equipment is a condition precedent to the attaching of the lien.

Regardless of the interpretation placed upon the "exception clause", we submit that the First Mortgage is a first lien on the Debtor's equity in all of the equipment in controversy, because this equipment constitutes "additions" needed for the efficient operation of the mortgaged enterprise.

The Doctrine of the Minneapolis & St. Louis Case.

As applied to equipment, the covenant in the first paragraph of Section 9 of Article Fourth is a threefold covenant: it is a covenant (1) to maintain in good condition, (2) to make replacements, and (3) to make "additions".

In *Guaranty Trust Co. of New York, et al.* v. *Minneapolis & St. L. R. Co., et al.*, 36 F. (2d) 747 (C. C. A., 8th Circ., 1929), cert. denied, 281 U. S. 756 (1930), the Circuit Court of Appeals for the Eighth Circuit considered the effect of maintenance and replacement provisions of a railroad mortgage as causing the lien of the mortgage to attach to equipment which would otherwise be free of the lien.

In that case, the Iowa Central First Mortgage contained maintenance and replacement provisions in the following language (p. 756):

> "The trustee shall also have power to allow the mortgagor, its successors or assigns from time to time to dispose, according to its or their discretion, of such portion of the equipment, machinery and implements at any time held or acquired for the use of the said railways as may have become unfit for such use, replacing the same by new, which shall at once be subject to the lien of these presents without any further conveyance or mortgage. * * *" (eighth paragraph).
>
> "The mortgagor shall and will until the bonds secured by this indenture are fully paid, make all necessary repairs and replacements to keep up the property, rolling stock and equipment hereby conveyed and transferred, * * *." (fourteenth paragraph).

As will be observed, the fourteenth paragraph of the Iowa Central First Mortgage contained a maintenance and replacement covenant substantially similar to the maintenance and replacement covenant in the first paragraph of Section 9 of Article Fourth of the First Mortgage, but it contained no covenant comparable to the covenant to make "additions" which appears in the first paragraph of Section 9 of Article Fourth of the First Mortgage.

After holding that the granting clauses of the Iowa Central First Mortgage did not cover after-acquired equipment, the court said (p. 757):

> "The mortgage does, however, contain replacement clauses, and under these it was the duty of the mortgagor and its successors to maintain and replace the mortgaged equipment. Under this covenant the mortgagor, and its successors, were required to keep under the lien of this mortgage *the same value amount of equipment as it existed at the time of the execution of the mortgage.* In other words, the lien of this mortgage attached to all equipment owned by the Iowa Central at the time of its execution, and so much of the equipment thereafter acquired, either by itself or its

successors, *as was necessary to keep intact in value the equipment as it existed at the date of the execution of the mortgage.* * * *"*

In other words, the court construed the limited maintenance and replacement provisions of the Iowa Central First Mortgage as requiring the mortgagor company to maintain under the mortgage equipment of a value equal to the original value of all mortgaged equipment. The principle applied was the maintenance of the original value of the mortgaged equipment and not the replacement of specific units of equipment which had been worn out or destroyed.

The doctrine of the *Minneapolis & St. Louis* case was applied by Judge WILKERSON in his recent opinion in the Rock Island reorganization proceedings, which is set forth in Appendix B of this brief, although Judge WILKERSON did not cite the *Minneapolis & St. Louis* case. That Judge WILKERSON applied the same principle, namely, the maintenance of the original value of the mortgaged equipment, is apparent from the formula which he prescribed, which is set forth at pages 142-144 of Appendix B.

Applying the doctrine of the *Minneapolis & St. Louis* case to the facts of the present case, and giving effect only to that portion of the covenant in the first paragraph of Section 9 of Article Fourth which requires the Debtor to maintain in good condition and to make replacements, would lead to the conclusion that, prior to the execution and delivery of the Refunding Mortgage on March 1, 1932, the lien of the First Mortgage had already attached to the Debtor's equity in substantially all of the equipment in controversy.

The Original Value of Original Equipment was $15,034,389.14.[1]

On March 1, 1932, the depreciated book value of the Original Equipment then remaining in service was $9,684,906.77. At the date of the execution and delivery of the Refunding Mortgage, therefore, the Debtor was required, under the doctrine of the *Minneapolis & St. Louis*

[1] See page 14, *supra*.

case, to place under the lien of the First Mortgage equipment having a value of $5,349,482.37.

The only equipment which the Debtor on that date had available for that purpose consisted of 52 units of equipment acquired by the use of free funds (not under equipment trusts), having a book value at the date of acquisition of $49,027.16, and its equity in 3,705 units of equipment acquired under the Equipment Trusts of 1923, 1924, and 1929, and the Baldwin Lease of 1931, having a total book value at the date of acquisition of $13,006,454.87, making a total of 3,757 units, having a book value at the date of acquisition of $13,055,482.03.[1] Inasmuch as $5,297,329.36 in principal amount of equipment obligations were then outstanding under the three equipment trusts and the Baldwin Lease,[2] the Debtor's equity in this equipment, after taking into account accrued depreciation, could not have greatly exceeded the amount required to maintain under the First Mortgage equipment equal in value to the Original Value of Original Equipment.

As we have pointed out, the covenant in the first paragraph of Section 9 of Article Fourth of the First Mortgage goes beyond the limited maintenance and replacement covenant which the court was considering in the *Minneapolis & St. Louis* case. It is also a covenant to make all needful and proper "additions", and it has the effect of causing the lien of the First Mortgage to attach to all after acquired equipment which is needed for the efficient operation of the mortgaged enterprise. Giving effect to the covenant in its entirety, the conclusion seems clear that the Debtor's equity in all of the equipment in controversy is subject to the First Mortgage as a first lien.

---

[1] Although the depreciated book values of this equipment on March 1, 1932, are not shown by the record, they were obviously much less than the amounts above stated.

[2] This figure represents the aggregate principal amount of equipment trust obligations which were unmatured on March 1, 1932, as shown by paragraph 83 of the Stipulation (R. 1068-1070) and by I. C. C. Exhibit No. 110 (R. 2517).

The Contentions of the Refunding Mortgage Trustee.

The brief of the Refunding Mortgage Trustee ignores the covenant in the first paragraph of Section 9 of Article Fourth and the provision in Granting Clause Fifth of the First Mortgage; the argument in the brief (pp. 32-40) is directed exclusively to the provisions of the second paragraph of Section 9 of Article Fourth[1] and to the provisions of the first paragraph of Section 5 of Article Seventh.[2]

The second paragraph of Section 9 of Article Fourth reads as follows:

> "All equipment upon which this indenture is or shall be a first lien shall be marked so as to identify the same as equipment subject to this indenture as a first lien thereon, and the Company will at all times keep such equipment in good order and condition, reasonable wear and tear excepted, and marked distinctively as aforesaid, and will replace such of said equipment as shall be worn out or destroyed with other equipment of at least equal value on which this indenture shall constitute a first lien.
>
> "The Company will, at such times as the Trustees may request, furnish to them a complete list of all equipment upon which this indenture is or shall be a first lien; but the fact that any such equipment shall not be marked or included in such list shall not create any presumption that the same is not subject to this indenture as a first lien thereon."

The first paragraph of Section 5 of Article Seventh reads as follows:

> "Section 5.—The Company shall have full power from time to time in its discretion to dispose of free from the lien hereof any of the rails, equipment, machinery, tools and implements at any time subject hereto that may have become unsuitable or unneces-

[1] I. C. C. Exhibit No. 5, pp. 76-77.
[2] I. C. C. Exhibit No. 5, p. 111.

sary for use, first or simultaneously replacing the same by new rails, equipment, machinery, tools and implements of substantially equal value to the Company, which shall become subject to the lien of this indenture in like degree; and any subsidiary company may dispose of similar property, replacing it with property of substantially equal value."

The covenants in the second paragraph of Section 9 of Article Fourth are special covenants which apply only to equipment upon which the First Mortgage is a first lien. They in no way limit the covenant in the first paragraph of the section, which requires the Debtor to make such "additions" to its equipment and other property as may be necessary to keep up the operating efficiency of the mortgaged enterprise.

The first paragraph of Section 5 of Article Seventh merely confers upon the Debtor the power to dispose of equipment and other property which has become unsuitable and unnecessary for use. It in no way affects the scope of the covenant in the first paragraph of Section 9 of Article Fourth.

The Refunding Mortgage Trustee contends (1) that the maintenance and replacement provisions above quoted apply only to equipment "worn out or destroyed" or "disposed of", (2) that these maintenance and replacement provisions cannot be complied with except by the use of equipment on which the First Mortgage will be a first lien, and (3) that the lien of the First Mortgage cannot attach to equipment by virtue of these maintenance and replacement provisions until such equipment has been marked or otherwise specifically allocated as replacements.

The first two contentions may be disposed of briefly. They have no bearing upon the question whether the equipment in controversy was brought under the lien by virtue of the covenant in the first paragraph of Section 9 of Article Fourth. As we have pointed out, that covenant is more than a mere covenant to replace specific units of equipment as they are retired from service: it is a covenant to make all needful and proper "additions". The

scope of that covenant is not limited to equipment upon which the First Mortgage is a first lien.

The third contention of the Refunding Mortgage Trustee requires more detailed comment.

The grant of after acquired equipment contained in Granting Clause Fifth, as supplemented by the covenant in the first paragraph of Section 9 of Article Fourth, includes in its scope all after acquired equipment falling within the description of "needful and proper additions". There is nothing in the language of either of these provisions to suggest that a marking, or any other form of specific allocation, of the equipment is a condition precedent to the attaching of the lien.

Nor is there anything in the language of the second paragraph of Section 9 of Article Fourth which imposes such a condition precedent.

The covenant as to marking, contained in that paragraph is not, as stated on page 33 of the brief of the Refunding Mortgage Trustee, a covenant to mark "all equipment subject to the Mortgage". It is a covenant to mark "All equipment upon which this indenture is or shall be a first lien".[1]

The language of the covenant, which applies to all equipment upon which the First Mortgage is a first lien, and not merely to equipment acquired as replacements, makes clear that the covenant relates to equipment already subject to the lien and that it does not impose a condition precedent to the attaching of the lien. This is shown by the provision (in the last sentence of the paragraph) that the failure to mark shall not create any presumption that the equipment is not subject to the lien.

Nor was a marking or other specific allocation of the equipment in controversy necessary to identify it as equipment falling "within the description of the covenant" in the first paragraph of Section 9 of Article Fourth. We are not dealing here with a divisional mortgage but with

[1] Inasmuch as all of the equipment in controversy was acquired under equipment trusts, it was not, by the terms of this covenant, required to be marked.

a system mortgage, which covers all of the lines of railroad owned by the Debtor. The equipment in controversy was acquired for use and was actually used on the mortgaged lines; its dedication to that use identifies it as coming "within the description of the covenant".

The three cases cited at pages 37-40 of the brief of the Refunding Mortgage Trustee[1] are not in point.

The *Wabash Western* case involved a divisional mortgage, which by its terms was to cover only "the rolling stock belonging" to the Omaha Division (p. 891). The requirement as to marking was for the express purpose of designating the equipment "belonging" to the Omaha Division and "distinguishing it from the rolling stock appurtenant to the main line and other branches of the road" (p. 891). In other words, under the peculiar provisions of the Omaha Division mortgage, equipment did not come within the description of the granting clauses unless it had been designated by a marking as being equipment "belonging" to the Omaha Division. The mortgagor company having failed to perform its covenant to designate, the foreclosure purchasers of the Omaha Division property sought to make good the deficiency out of the general equipment owned by a successor company, to which the liens of the successor company's mortgages had already attached. The court held merely that the lien of the successor company's mortgages could not be displaced. The opinion does not indicate whether the successor company had assumed the covenants of the mortgagor company under the mortgage.

The *Metropolitan Trust Company* case and the *New York and Queens County Railway* case each involved the question of the extent to which the covenants of the original mortgagor company became binding upon a successor

---

[1] *United States Trust Co.* v. *Wabash W. Ry. Co.*, 38 Fed. 891 (Circ. Ct., S. D. Iowa, W. D., 1889), appeal dismissed, 140 U. S. 703 (1891); *Metropolitan Trust Co.* v. *Chicago & E. I. R. Co., et al.*, 253 Fed. 868 (C. C. A., 7th Circ., 1918); *Guaranty Trust Co.* v. *N. Y. & Q. C. Ry. Co.*, 253 N. Y. 190, 170 N. E. 887 (N. Y., 1930).

company after a consolidation or merger, whereas in the present case the equipment in controversy was acquired by the original mortgagor company (the Debtor).

In the *Metropolitan Trust Company* case, the court, after holding that the after-acquired property clauses of the Metropolitan mortgage did not survive the consolidation of the mortgagor company, held that the successor company was under no contractual obligation to maintain and replace the mortgaged equipment. The court expressly found (p. 879) that the usual covenant for maintenance and replacement of equipment was not to be found in the Metropolitan mortgage. It then went on to state (p. 879) by way of dictum that, "if it were there, or if the provisions present were properly to be construed as such a covenant, no lien would attach merely because of the mortgagor's breach of the covenant through its failure to maintain and replace the Coal Company equipment of 1894". This dictum goes no further than to state the obviously correct principle that the covenant could not be enforced in respect of equipment acquired by a successor company which had not assumed the obligations of the mortgagor company.

In the *New York and Queens County Railway* case, the question was whether the lien of the Steinway mortgage attached to property acquired subsequent to a merger by a successor company which had not assumed the obligations of the mortgagor company.

The controlling principle of the case is stated in that part of the opinion which is quoted on pages 38-39 of this brief.

After holding that the successor company was under no statutory or contractual duty to subject the property to the lien of the Steinway mortgage and that the lien of the Steinway mortgage did not spread by reason of estoppel or accession, the court then considered whether the extension of the lien of the Steinway mortgage to the new power house and car barn could be justified on the theory that the successor company was under an equitable duty to provide a substituted security when it abandoned or disman-

tled the old Steinway power house and car barn. The court held that, inasmuch as the old Steinway power house and car barn were not abandoned or dismantled until after the new power house and car barn had been acquired and had become subject to the lien of the successor company's mortgage, no equity arose in favor of the Steinway bondholders which could displace the existing lien of the successor company's mortgage.

In the present case, the equipment in controversy was acquired, not by a successor company, but by the original mortgagor company (the Debtor), which was bound by its covenant to make all "additions" to its equipment which were "needful and proper" to keep up the operating efficiency of the mortgaged enterprise. The holders of Refunding Mortgage Bonds can establish no superior equity with respect to equipment coming "within the description of the covenant" in the First Mortgage.

As we interpret the provisions of the First Mortgage, they clearly evidence a purpose that the security under the mortgage shall at all times consist of a railroad fully equipped for efficient operation. The interpretation placed upon these provisions by the Refunding Mortgage Trustee would permit that purpose to be defeated: the Debtor could, over a period of years, allow the mortgaged enterprise to become denuded of equipment, thus leaving the bondholders with an empty shell.

By purchasing all of its new equipment under equipment trusts, the Debtor could, under the Refunding Mortgage Trustee's interpretation of the "exception clause", entirely escape the operation of the after-acquired property clauses, even as to equipment acquired for use and used exclusively on the mortgaged lines.

Under the Refunding Mortgage Trustee's interpretation of the equipment covenants, as the mortgaged equipment became obsolete and new equipment was needed to maintain the operating efficiency of the mortgaged enterprise, the Debtor would be under no duty to acquire new equipment, except to replace specific units as they became ready for the scrap heap. And even as to equipment ac-

quired as replacements, the lien of the First Mortgage would not attach if the Debtor neglected to make a specific allocation, by marking or otherwise.

Thus, upon a foreclosure, the bondholders might find themselves with a lien upon a gutted property—a line of railroad without equipment.

Surely, the draftsman of the First Mortgage did not intend to create so illusory a thing as a vanishing security.

POINT III.

THE NORTHERN CALIFORNIA EXTENSION IS SUBJECT IN ITS ENTIRETY TO THE FIRST MORTGAGE AS A FIRST LIEN THEREON.

A. FACTS.

The Construction of the Northern California Extension.

The Northern California Extension connects with the main line of the Debtor at Keddie, Plumas County, California, and extends to a connection with the Great Northern Railway at Bieber, Lassen County, California, a distance of approximately 112 miles (R. 1076).

Construction of the Northern California Extension was commenced on August 16, 1930, and by December 31, 1930, there had been completed 32% of the grading, 16% of the tunneling, practically all of the clearing, and a large percentage of the culvert installation; construction of concrete bridge foundations was largely under way. Connection with the Great Northern Railway at Bieber was made on November 10, 1931, and freight service was then inaugurated under the jurisdiction of the construction department. Owing to the approach of the winter season, complete ballasting of the line, as well as the completion of certain other facilities, was deferred until 1932. Ballasting was practically completed in 1932, and on June 1, 1932, the line was placed in full commercial operation for freight service (R. 1077).

The Method of Financing.

The total cost of construction of the Northern California Extension was in excess of $10,000,000 (the cost to May 31, 1932, was $10,183,641.90). The cost of construction was financed (1) by the sale at 97½ to The Western Pacific Railroad Corporation of $5,000,000 principal amount of First Mortgage Bonds, (2) by the sale at par to the A. C. James Co. of $5,000,000 principal amount of Debentures issued under the Indenture dated July 1, 1930 (I. C. C. Exhibit No. 50, R. 2327, 2335), and (3) by loans obtained by the Debtor from Reconstruction Finance Corporation aggregating $559,408 (R. 1078).

The first step in the actual financing was the sale of $1,000,000 principal amount of said First Mortgage Bonds, the deposit on February 11, 1931, of the cash proceeds thereof with the First Mortgage Trustees and the simultaneous withdrawal of the cash proceeds to reimburse the Debtor for expenditures made by it out of its own funds for the construction of the Northern California Extension between February 1, 1929, and November 30, 1930. By February 11, 1931, before any of the Debentures had been issued and before any of the loans had been obtained from Reconstruction Finance Corporation, the Northern California Extension had come into existence as a continuous right of way with substantial improvements, owned by the Debtor, and used as a basis for the withdrawal of deposited cash under the First Mortgage (R. 1077, 1079-1082, 1084-1085, 1088-1089).

The Negotiations with A. C. James Co.

Under date of May 14, 1929, while the original application of the Debtor to the Interstate Commerce Commission for a certificate of public convenience and necessity for the construction of the Northern California Extension was still pending before the Commission, the A. C. James Co. made to the Debtor a written offer (I. C. C. Exhibit No. 45; R. 1078-1079, 2308, 2316), in which it stated:

"In the event your application for a certificate of public convenience and necessity is granted by the Interstate Commerce Commission, this company is prepared to advance to you, from time to time as requested by you, all moneys required for the construction of the proposed Northern Extension. Such advances are to be evidenced by your bonds or notes, bearing interest at 5 per cent. per annum, payable semi-annually; principal payable January 1, 1950; said bonds or notes to be redeemable in whole or part, at par, at your option upon any interest date, on thirty days' notice; said bonds or notes are to be secured by a trust indenture creating a first lien upon the proposed Northern Extension as security for said bonds or notes and expressly providing that you will not place any additional mortgage indebtedness upon any other real property owned by you, over and above the bonds authorized under your present existing first mortgage of June 26, 1916, without providing, from the proceeds of such additional financing, for the redemption of these bonds."

This financing was not carried out on the basis outlined in I. C. C. Exhibit No. 45 (R. 2308, 2315), but, under date of June 19, 1929, the A. C. James Co. made a new offer (I. C. C. Exhibit No. 46; R. 1079, 2319), in which it stated:

"In the event a certificate of public convenience and necessity is granted by the Interstate Commerce Commission, this company is prepared to advance to you, from time to time, as requested by you, fifty per cent. (50%) of all moneys required for the construction of the proposed Northern Extension, our advances to be limited in the aggregate to the sum of Five Million Dollars ($5,000,000).

"We understand that you propose to provide the remaining funds required for the extension by application of current funds and/or sale of First Mortgage Bonds, under your existing mortgage of June 26, 1916. The advances to be made you by this company are to be evidenced from time to time as made to you, by your debenture bonds or notes, bearing interest at 5 per

cent. per annum, payable semi-annually; principal payable January 1, 1950; said bonds or notes to be redeemable in whole or in part, at par at your option upon any interest date, on thirty days' notice; said bonds or notes are to be issued under an indenture which will contain, in addition to the conventional provisions of such agreements, an express provision that you will not place any mortgage indebtedness or other lien upon any property owned by you, other than the bonds authorized under your existing first mortgage of June 26, 1916, without providing, from the proceeds of such additional financing, for the redemption of the debenture bonds or notes issued to us under the terms of this offer. This shall not be construed, however, as limiting your company in the issue of equipment trust certificates or other purchase money obligations.

"In view of the fact that Mr. A. C. James, a director of your company, is substantially interested in this company, we are advised that this offer on our part necessarily takes the form of an offer to bid at par for the securities mentioned above upon a public sale, and that your company is under the necessity of complying with the requirements of public sale provided by the Clayton Act as to such securities and cannot commit itself to dispose of the securities to this company on the basis indicated above. It is intended, however, that this letter shall be a firm commitment to you that this company will bid for such securities on the terms indicated, at any such public sale.

* * * * *

"We understand that you propose, in reliance upon this offer, to make definite commitments in connection with the construction of the proposed Northern Extension. It is further understood that this offer is *in lieu of and in substitution for our offer* of May 14, 1929, *which contemplated the issue to us of bonds or notes secured by a first lien* on the Northern Extension as then proposed and described in the original application for a certificate of public convenience and necessity filed February 8, 1929."

This offer was accepted by the Executive Committee of the Debtor at a meeting held June 19, 1929, Mr. A. C. James being present but not voting (Exhibit VII to I. C. C. Exhibit No. 80; R. 1079, 2444). The minutes of this meeting show that the original offer (I. C. C. Exhibit No. 45, R. 2308, 2316) was based upon the understanding that the proposed new line could be constructed for approximately $5,000,000.

THE ISSUE OF FIRST MORTGAGE BONDS.

The $5,000,000 principal amount of First Mortgage Bonds issued to finance in part the construction of the Northern California Extension were offered from time to time at public sale to the highest bidder in blocks of $1,000,000 principal amount or less, all of them being purchased by The Western Pacific Railroad Corporation at 97½ and accrued interest. The notice, dated January 8, 1931 (I. C. C. Exhibit No. 93, sheet 1, R. 2459), calling for bids on the first block of $1,000,000 principal amount, referred to the specifications, form of proposals and form of contract on file with the Debtor. The specifications contained the following statement (I. C. C. Exhibit No. 93, sheet 2, R. 2459):

> "Said First Mortgage constitutes a first lien on the main line of railroad of the Company extending from San Francisco, California, to Salt Lake City, Utah, and branches, aggregating 1050.5 miles, more or less, of first track, the Company's terminal and other railroad properties in the cities of San Francisco, Oakland and elsewhere, and certain of its rolling stock and equipment. Upon the completion of the construction and/or acquisition of the Company's 'Northern California Extension' its main line of railroad will aggregate 1198.5 miles, more or less. A map of the Company's railroad system is hereto annexed."

The bid of The Western Pacific Railroad Corporation (I. C. C. Exhibit No. 93, sheet 6, R. 2459) stated that it was made

> "In accordance with and subject to all the terms of the notice dated January 8, 1931, published by

> your Company in newspapers of New York and San Francisco, and in accordance with the specifications referred to in said notice, which notice and specifications have been examined by the undersigned, * * *."

The notices, specifications and bids in connection with the sale of the remainder of the bonds were substantially identical with those contained in I. C. C. Exhibit No. 93. (R. 1079-1080, 2459.)

Mr. A. C. James was then a director of The Western Pacific Railroad Corporation (R. 1080).

The bonds were authenticated and delivered by the First Mortgage Trustees pursuant to paragraph B of Section 2 of Article Second of the First Mortgage,[1] which provides for the authentication and delivery of bonds against the deposit with the Trustees of the cash proceeds of their sale. The dates of authentication and delivery, the principal amounts of bonds authenticated and delivered, the amounts of cash proceeds deposited, and the numbers of the I. C. C. exhibits containing the application papers furnished to the First Mortgage Trustees are as follows (R. 1080, 2358-2359, 2378-2380):

Date	Principal Amount of Bonds	Amount of Cash Proceeds	I. C. C. Exhibit No.
Feb. 11, 1931	$1,000,000	$975,000	61
June 25, 1931	1,000,000	975,000	63
July 23, 1931	900,000	877,500	65
Nov. 25, 1931	750,000	731,250	68
Jan. 8, 1932	350,000	341,250	70
Jan. 29, 1932	1,000,000	975,000	72

The deposited cash was withdrawn by the Debtor on requisitions filed with the First Mortgage Trustees, pursuant to Section 2 of Article Second of the First Mortgage, to reimburse the Debtor for expenditures made in the construction of the Northern California Extension, the expenditures certified being equal to the principal amount

[1] I. C. C. Exhibit No. 5, p. 44.

of the bonds represented by the deposited cash, as required by the provisions of the First Mortgage (p. 45) (R. 1080-1081, 1872).

The application papers contained in the requisitions included in each case resolutions of the Executive Committee of the Debtor, pursuant to subparagraph First of Section 2 of the First Mortgage (pp. 45-46), a certificate signed by officers of the Debtor, pursuant to subparagraphs Second (pp. 46-48), Sixth (pp. 54-55), Seventh (pp. 55-56) and Eighth (pp. 56-57) of Section 2 of Article Second, certifying, *inter alia*, the amounts and dates of the expenditures made, and an opinion of the Debtor's General Counsel, pursuant to clause (c) of subparagraph Sixth (p. 55) and clause (c) of subparagraph Seventh (p. 56) of Section 2 of Article Second (I. C. C. Exhibits Nos. 62, 64, 66, 67, 69, 71, and 73, R. 2368, 2378-2380).

The resolutions in each case recited that expenditures of a specified amount had been made between specified dates "for the construction and/or acquisition of a new line of railroad by this Company known as its 'Northern California Extension' to connect with the existing main line of the Company in the vicinity of Keddie, Plumas County, California, and extending to a point at or near Bieber, Lassen County, California; and including a line of railroad to be acquired and/or constructed by this Company jointly with Great Northern Railway Company to connect with said line of railroad first above mentioned via trackage rights, and extending from a point at or near Lookout, Modoc County, California, to a point at or near Hambone, Siskiyou County, California", and also contained the language "all portions of said extension which have been constructed and/or acquired being subject to the lien of said First Mortgage and now in the possession of this Company" (I. C. C. Exhibit No. 62, sheet 10, which is typical of all of the subsequent requisitions, R. 2368).

The officers' certificate in each case stated that expenditures of a specified amount had been made between specified dates "for the construction of a new line of railroad, known as this Company's 'Northern California Extension'", describing the line as in the resolutions of the

Executive Committee (I. C. C. Exhibit No. 62, sheet 11, R. 2368), and also stated:

> "3. That so far as known or believed by us the property so constructed or acquired as aforesaid, is not subject to any lien or charge, except (a) necessarily undetermined liens or charges ordinarily incident to construction and (b) the lien of said First Mortgage. That there have been executed and delivered to the Company all deeds, conveyances, or other instruments necessary to vest the title to the property constructed or acquired as aforesaid in the Company, subject only to the liens or charges aforesaid." (I. C. C. Exhibit No. 62, sheet 13, R. 2368.)

The opinion of counsel in each case stated that title to all those portions of the Debtor's new line of railroad known as its "Northern California Extension" and to all of the property mentioned in the officers' certificate "has vested in The Western Pacific Railroad Company, subject only to liens or charges certified in said certificate and to liens or charges of the character not required to be certified under the terms of paragraph 'Second' of subsection D of Section 2 of Article Second of The Western Pacific Railroad Company's First Mortgage dated June 26, 1916, and all deeds, conveyances or other instruments necessary to vest the title to said property in said Company have been executed and delivered to it, and all said portions of said extension and said property are subject to the lien of this Company's First Mortgage, and no supplemental indenture or instruments of further assurance are necessary to subject said property, or any part thereof, to the lien of said First Mortgage, subject only to the liens and charges aforesaid" (I. C. C. Exhibit No. 62, sheets 8-9, R. 2368).

The resolutions authorizing the withdrawal of the deposited cash were adopted by the Executive Committee of the Debtor at its meetings held on February 11, June 25, July 23, October 15, November 17, and December 21, 1931, and January 29, 1932 (I. C. C. Exhibit No. 86, R. 2455). Mr. A. C. James was present at each of those meetings (R. 1081).

The dates and amounts of the withdrawals of deposited cash, the numbers of the requisitions and their I. C. C. exhibit numbers are as follows (R. 1081, 2368, 2378-2380):

Requisition No.	Date	Amount	I. C. C. Exhibit No.
244	Feb. 11, 1931	$975,000.00	62
246	June 25, 1931	975,000.00	64
247	July 23, 1931	812,571.03	66
248	Oct. 24, 1931	64,928.97	67
250	Nov. 25, 1931	731,250.00	69
251	Jan. 8, 1932	341,250.00	71
252	Jan. 29, 1932	975,000.00	73

The amounts and dates of the expenditures and the itemization of the expenditures, as set forth in the officers' certificates contained in these requisitions, are as follows (R. 1081-1083):

Req. No. 244 Amount $999,998.98	Date February 1, 1929, to November 30, 1930
Engineering	$ 244,777.82
Land for Transportation Purposes	121,377.67
Grading	589,393.37
Tunnels and Subways	44,450.12
Total Expenditure	$ 999,998.98

Req. No. 246 Amount $1,000,000.00	Date January 1, 1931, to April 30, 1931
Engineering	$ 25,001.21
Land for Transportation Purposes	16,965.14
Grading	358,532.33
Tunnels and Subways	298,589.02
Bridges, Trestles and Culverts	286,163.05
Ties	2,014.38
Rails	3,021.57
Track Laying and Surfacing	130.00
Right of Way Fences	3,198.56
Crossings and Signs	3,040.97
Station and Office Buildings	990.26
Water Stations	717.55
Other Expenditures—Road	1,635.96
Total Expenditure	$1,000,000.00

Req. No. 247 Amount $833,406.18	Date May 1, 1931, to June 30, 1931
Engineering	$ 27,108.10
Land for Transportation Purposes	58,732.92
Grading	346,349.05
Tunnels and Subways	67,990.50
Bridges, Trestles and Culverts	157,575.37
Ties	31,861.33
Rails	58,146.84

Other Track Material	73,112.72
Ballast	191,428.53
Track Laying and Surfacing	139,660.60
Water Stations	5,594.37
Total Expenditure	$ 750,000.00

Req. No. 251 Amount $350,000.00	Date September 1, 1931, to October 31, 1931
Engineering	$ 31,703.24
Tunnels and Subways	100,386.60
Bridges, Trestles and Culverts	217,910.16
Total Expenditure	$ 350,000.00

Req. No. 252 Amount $1,000,000.00	Date June 1, 1931, to November 30, 1931
Grading	$1,000,000.00

The Issue of Debentures.

The $5,000,000 principal amount of Debentures issued to finance in part the Northern California Extension were offered at public sale to the highest bidder in a single block, all of them being purchased by the A. C. James Co. at par and accrued interest (I. C. C. Exhibits Nos. 48 and 49; R. 1084-1085, 2326-2327). The notice, dated January 8, 1931 (I. C. C. Exhibit No. 48, sheet 14, R. 2326), calling for bids, referred to the specifications, form of proposals and form of contract on file with the Debtor. The specifications contained the following statement (I. C. C. Exhibit No. 48, sheet 5, R. 2326):

> "The main line of railroad of the Company extends from San Francisco, California, to Salt Lake City, Utah, with branches, and aggregates 1050.5 miles, more or less of first track. Upon the completion of the Company's 'Northern California Extension' its main line of railroad will aggregate 1198.5 miles, more or less. A map of the Company's railroad system is hereto annexed.
>
> "The First Mortgage of this Company dated June 26, 1916, securing this Company's First Mortgage Bonds, whereunder not more than $50,000,000. thereof may be outstanding at any one time, is a first lien on said main line of railroad."

The bid of the A. C. James Co. (I. C. C. Exhibit 49, R. 2327) stated that it was made "In accordance with and subject to all the terms of the notice dated January 8, 1931, published by your Company in newspapers of New York and San Francisco, and in accordance with the specifications referred to in said notice, which notice and specifications have been examined by the undersigned, * * *".

Mr. A. C. James was then the President and a Director of the A. C. James Co. (R. 184).

The Debentures were authenticated and delivered pursuant to Article II of the Indenture dated July 1, 1930 (R. 1084).

Section 1 of Article II provides (I. C. C. Exhibit No. 50, pp. 16-17, R. 2327, 2335) for the authentication and delivery of Debentures "for the purpose of constructing, purchasing, and/or otherwise acquiring the proposed so-called Northern California Extension" (which is described by its termini), "*provided, however,* that not to exceed 50% of the cost of any such construction, purchase or acquisition, may be met by the issue of the Debentures hereunder and the other 50% of such cost shall be paid by the Company by the sale of First Mortgage bonds of the Company issued under the Company's First Mortgage dated June 26, 1916, and/or funds derived from other sources; * * *".

Section 2 (pp. 17-19) specifies the application papers to be furnished to the Trustee, including, *inter alia,* (1) a written order of the Debtor, (2) a certificate signed by officers of the Debtor stating, *inter alia,* that liabilities to an amount specified have been incurred, or within 60 days next succeeding the date of the certificate will be incurred, and/or that expenditures to an amount specified have been made, for the purposes set forth in Section 1, and that the total amount of liabilities and/or expenditures so certified is equal to at least twice the aggregate principal amount of the Debentures then applied for, and (3) an opinion of counsel to the effect that the issue of the Debentures has been duly authorized by any governmental bodies having jurisdiction.

Under the terms of the Indenture (I. C. C. Exhibit No. 50, R. 2327, 2335), the Debentures were entirely unsecured.

The dates on which the Debentures were authenticated and delivered and the respective principal amounts thereof are as follows (R. 1084-1085):

Date	Amount
Feb. 27, 1931	$1,000,000
March 26, 1931	600,000
May 25, 1931	530,000
June 20, 1931	995,000
Aug. 25, 1931	309,000
Oct. 20, 1931	600,000
Nov. 25, 1931	120,000
Jan. 28, 1932	350,000
March 28, 1932	347,000
May 31, 1932	149,000

The officers' certificate contained in the requisition for the first $1,000,000 principal amount of Debentures shows that, by February 1, 1931, a total of $1,682,298.18 had been expended by the Debtor on the Northern California Extension (I. C. C. Exhibit No. 95, sheet 10, R. 2464).

THE CANCELLATION OF THE DEBENTURES.

On March 1, 1932, contemporaneously with the execution and delivery of the Refunding Mortgage and the authentication and delivery of the initial issue of $14,380,000 principal amount of Refunding Mortgage Bonds, the A. C. James Co. surrendered to the Trustee under the Indenture dated July 1, 1930 (I. C. C. Exhibit No. 50, R. 2327, 2335) for cancellation $4,504,000 principal amount of Debentures, being all of the Debentures then outstanding. These Debentures were surrendered for cancellation by the A. C. James Co. in exchange for a note of the Debtor in the principal amount of $4,504,000 secured by the pledge of $5,630,000 principal amount of Refunding Mortgage Bonds (R. 1085).

The $347,000 principal amount of Debentures authenticated and delivered on March 28, 1932, were simultaneously surrendered to the Trustee under the Indenture dated July 1, 1930 (I. C. C. Exhibit No. 50, R. 2327, 2335) for cancellation, in exchange for the delivery to the A. C. James Co. of a note of the Debtor in like principal amount secured by the pledge of $433,500 principal amount of Refunding Mortgage Bonds. A similar procedure was fol-

lowed in the case of the $149,000 principal amount of Debentures authenticated and delivered on May 31, 1932, the principal amount of Refunding Mortgage Bonds then pledged being $186,000 (R. 1085-1086).

THE EXECUTION AND DELIVERY OF THE REFUNDING MORTGAGE AND THE ISSUE OF REFUNDING MORTGAGE BONDS.

The aggregate principal amount of bonds authenticated and delivered under the Refunding Mortgage is $18,999,500. The dates on which these bonds were authenticated and delivered to the Debtor and the respective principal amounts thereof are as follows:

Date	Amount
March 1, 1932	$14,380,000
March 28, 1932	433,500
May 31, 1932	186,000
Feb. 27, 1933	4,000,000

All of the bonds were bonds of Series A, except the $4,000,000 principal amount authenticated and delivered on February 27, 1933, which were of Series B (R. 1086).

All of the bonds were pledged with the A. C. James Co., Reconstruction Finance Corporation, and The Railroad Credit Corporation (R. 1086-1087).

The Series A bonds were authenticated and delivered to the Debtor pursuant to Section 1 of Article Two of the Refunding Mortgage,[1] which provides for an initial issue of $15,000,000 principal amount of bonds upon the furnishing by the Debtor to the Refunding Mortgage Trustee of a certified copy of resolutions of the Board of Directors of the Debtor requesting the authentication and delivery of the bonds, together with an opinion of counsel with respect to the due authorization of the issue of the bonds by any governmental bodies having jurisdiction (R. 1087).

The Series B bonds were authenticated and delivered to the Debtor pursuant to Sections 1 and 2 of Article Two of the Refunding Mortgage.[2] Under Section 2, $5,000,000

[1] I. C. C. Exhibit No. 6, pp. 36-37.
[2] I. C. C. Exhibit No. 6, pp. 36-44.

principal amount of Refunding Mortgage Bonds were required to be reserved for the purpose of refunding the $5,000,000 principal amount of Debentures issued under the Indenture dated July 1, 1930 (pp. 37-38), but it was provided (p. 43) that bonds reserved under Section 2 for the purpose of refunding Debentures could be released from reservation by a resolution of the Board of Directors of the Debtor declaring them to be no longer needed for that purpose, in which event such reserved bonds might be authenticated and delivered in accordance with the provisions of either Section 1 or Section 3[1] of Article Two. The Board of Directors of the Debtor, at a meeting held on July 14, 1932, adopted resolutions declaring that the $5,000,000 principal amount of Refunding Mortgage Bonds reserved under Section 2 for the purpose of refunding the $5,000,000 principal amount of Debentures need no longer be held or reserved for that purpose (Exhibit H to I. C. C. Exhibit No. 90, R. 2457), and the Series B bonds were accordingly authenticated and delivered in accordance with the provisions of Section 1 of Article Two (R. 1087-1088).

None of the Refunding Mortgage Bonds were authenticated and delivered upon the basis of the construction or acquisition of any property, as permitted by Section 3.

The Advances by Reconstruction Finance Corporation.

The construction of the Northern California Extension was financed in part with funds advanced by Reconstruction Finance Corporation on the following dates and in the following amounts:

Date	Amount
March 1, 1932	$259,000
June 29, 1932	268,061
Aug. 1, 1932	32,347

[1] Section 3 provides for the authentication and delivery of bonds upon the basis of the construction or acquisition of additional property (I. C. C. Exhibit No. 6, pp. 44-48).

These advances formed part of loans of larger amounts made by Reconstruction Finance Corporation to the Debtor, which were secured by the pledge of Refunding Mortgage Bonds and other collateral (R. 1088-1089).

In its application to Reconstruction Finance Corporation dated February 5, 1932, for the loan which included the first advance of $259,000 on account of the Northern California Extension (I. C. C. Exhibit No. 82; R. 1089, 2449, 2451), the Debtor stated (I. C. C. Exhibit No. 82, sheet 6, and Schedule P, R. 2449, 2451) that $259,000 was required on or before March 1, 1932 "to pay contractors for work in constructing the branch line (now nearly completed)", the reference being to the Northern California Extension. It further stated (I. C. C. Exhibit No. 82, sheet 7, R. 2449, 2451) that the Refunding Mortgage "will be a lien on all of the properties, and assets of the Applicant [*i. e.*, the Debtor] subject only to equipment trust obligations and the lien of the Applicant's First Mortgage". The property of the Debtor was described as consisting of 925.706 miles of main line running from Salt Lake City, Utah, to San Francisco, California, with various branches, including the Northern California Extension, "making a total of main line and branch line mileage of approximately 1163 miles, together with adequate side tracks and industrial spur tracks".

In its application to Reconstruction Finance Corporation dated May 23, 1932, for the loans which included the remainder of the advances made for the construction of the Northern California Extension (I. C. C. Exhibit No. 87; R. 1089, 2456), the Debtor stated that $253,311 was required on or before June 20, 1932, for work in constructing the line, "$164,133 being either past due or payable in June to contractors for work in constructing such line, and the balance to provide funds to pay for work under way in the Fall of 1931 which was temporarily discontinued by reason of winter conditions and which must now be carried out" (I. C. C. Exhibit 87, p. 3, R. 2456). It further stated that $14,750 was required on or before July 1, 1932 (I. C. C. Exhibit No. 87, p. 4, R. 2456), and $32,347

on or before August 1, 1932 (I. C. C. Exhibit No. 87, p. 5, R. 2456) to pay for work of similar character. The details of the work for which these advances were sought are set forth in Schedule P annexed to I. C. C. Exhibit No. 87 (R. 2456). An examination of Schedule P shows that the greater part of the expenses was for labor.

This application (I. C. C. Exhibit No. 87, R. 2456) contains the following statement (p. 15):

> "The General and Refunding Mortgage is a first lien on certain securities having a book value of $2,374,655, and a second lien on all of the remaining property of the Railroad Company, subject only to $49,290,100 First Mortgage Bonds now outstanding and $4,550,000 of Equipment Trust Certificates."

The report of the Commission which formed the basis of the certificate of approval, issued February 29, 1932 (I. C. C. Exhibit No. 52; R. 1089, 2340), states that the Refunding Mortgage Bonds to be pledged as collateral for the loan "are to be issued under a proposed new general and refunding mortgage and will be a second lien upon all the carrier's property, including personal property" (I. C. C. Exhibit No. 52, p. 3, R. 2340).

The Recordation of the First Mortgage and of the Refunding Mortgage.

The Northern California Extension is situate entirely within the counties of Plumas and Lassen, California (R. 1076).

The First Mortgage was recorded in both of these counties on July 17, 1916 (R. 1066-1067). The Refunding Mortgage was recorded in Plumas County on March 12, 1932, and in Lassen County on March 14, 1932 (R. 1067).

B. ARGUMENT.

The contentions advanced by the Refunding Mortgage Trustee with respect to the Northern California Extension we understand to be as follows:

(a) The granting clauses of the First Mortgage permit the Debtor, by the use of its credit or free funds, to construct extensions free of the lien of the First Mortgage; therefore, the First Mortgage is a lien on the Northern California Extension as an entirety only to the extent that it was financed by the use of First Mortgage Bonds or deposited cash, and, to the extent that it was not so financed, the lien of the Refunding Mortgage ranks prior to or *pari passu* with the lien of the First Mortgage, because the granting clauses of the Refunding Mortgage specifically describe the Northern California Extension, and because the Refunding Mortgage provides that the property conveyed thereunder is subject to the lien of the First Mortgage only in so far (in extent, degree of priority, or otherwise) as in law it may attach;[1]

(b) Since only a part of the cost of the land acquired for the Northern California Extension was financed by the use of First Mortgage Bonds or deposited cash, the First Mortgage is a lien only on such portions of the Northern California Extension as were financed by the use of First Mortgage Bonds or deposited cash; the Refunding Mortgage is a first lien on any portions of the Northern California Extension not so financed;[2]

(c) In the absence of a recorded supplemental indenture specifically describing the Northern California Extension, the notice imparted by the recording of the First Mortgage was insufficient to entitle the

[1] Brief of Refunding Mortgage Trustee, pp. 7, 41, 44-51.

[2] Brief of Refunding Mortgage Trustee, pp. 40, 43, 46-47.

First Mortgage to priority over the Refunding Mortgage on the entire Northern California Extension;[1]

(d) Those holders of Refunding Mortgage Bonds who participated in the financing of the Northern California Extension (the A. C. James Co. and Reconstruction Finance Corporation)[2] made their advances under such circumstances as to create in their favor liens on the Northern California Extension ranking *pari passu* with the lien of the First Mortgage.[3]

The first two contentions present alternative theories as to the relative priorities of the First Mortgage and the Refunding Mortgage. The theory of the first contention (which we may call the "undivided interest theory") is that the First Mortgage is in effect a lien on an undivided interest in the entire Northern California Extension. The theory of the second contention (which we may call the "separate segment theory") is that the Northern California Extension is divisible into bonded and unbonded segments, the bonded segments being subject to the lien of the First Mortgage and the unbonded segments being subject only to the lien of the Refunding Mortgage.

The third contention is apparently merely a subsidiary contention advanced in support of both the "undivided interest theory" and the "separate segment theory", but it can more conveniently be discussed as a separate proposition.

The theory of the fourth contention apparently is that the advances made by the A. C. James Co. and Reconstruction Finance Corporation are secured by equitable liens, analogous to purchase-money liens, entirely apart from the lien created by the Refunding Mortgage.

These four contentions will be discussed in order.

---

[1] Brief of Refunding Mortgage Trustee, pp. 41, 43-44, 45.

[2] The Railroad Credit Corporation did not participate in the financing.

[3] Brief of Refunding Mortgage Trustee, pp. 41, 48-51.

(I). The Granting Clauses of the First Mortgage Cover in Its Entirety an Extension Financed in Any Part with First Mortgage Bonds or Deposited Cash; the Lien Thus Created Is Not Limited, Either in Extent or Priority, to the Amount of First Mortgage Bonds or Deposited Cash Used in Such Financing.

There can be no question but that, as regards California property, a mortgage of after-acquired property, duly recorded, is effective against creditors and subsequent encumbrancers.

Section 2883 of the Civil Code of California[1] provides as follows:

> "§ 2883. *Lien on future interest.* An agreement may be made to create a lien upon property not yet acquired by the party agreeing to give the lien, or not yet in existence. In such case the lien agreed for attaches from the time when the party agreeing to give it acquires an interest in the thing, to the extent of such interest."

Section 2930 of the Civil Code of California[2] provides as follows:

> "§ 2930. [*Subsequently acquired title inures to mortgagee.*] Title acquired by the mortgagor subsequent to the execution of the mortgage, inures to the mortgagee as security for the debt in like manner as if acquired before the execution."

See:

California Title Insurance & Trust Co. v. *Pauly*, 111 Cal. 122, 43 Pac. 586 (Cal., 1896);

Mason v. *Citizens' Nat. Trust & Savings Bank of Los Angeles*, 71 F. (2d) 246 (C. C. A., 9th Circ., 1934).

---

[1] Cal. Civ. Code (Deering, 1941) § 2883.

[2] Cal. Civ. Code (Deering, 1941) § 2930.

The question here is solely one of interpretation of the after-acquired property clauses of the First Mortgage.

THE GRANTING CLAUSES OF THE FIRST MORTGAGE.

Granting Clause Third[1] of the First Mortgage covers, *inter alia*:

> "Any and all * * * extensions * * * which may from time to time hereafter be acquired or constructed by or belong to the Company * * * if
>
> "(a) acquired or constructed by the use of First Mortgage Bonds or proceeds thereof or cash deposited hereunder (except bonds delivered or cash paid out under any of the provisions of this indenture in reimbursement of previous expenditures certified as hereinafter provided) *or on account of the purchase, acquisition or construction thereof or work thereon* First Mortgage Bonds shall hereafter be authenticated and delivered or the proceeds of First Mortgage Bonds or other cash deposited hereunder shall hereafter be paid out under any of the provisions of this indenture; * * *."

It is significant that the qualifying proviso in subparagraph (a) is stated in the alternative: an after-acquired extension falls within the scope of the after-acquired property clause, if either (1) the extension be "acquired or constructed" by the use of First Mortgage Bonds or deposited cash, or (2) First Mortgage Bonds or deposited cash be taken down "on account of the purchase, acquisition or construction thereof or work thereon."

The difference between the two alternatives is apparent from the words used. The first alternative must contemplate a financing entirely by the use of First Mortgage Bonds or deposited cash; the second alternative, with the words "on account of", and the words "or work thereon", must contemplate a financing in part by such means. In either case, the extension falls within the scope of the after-acquired property clause, and there is no language

[1] Appendix A, *infra*, pp. 110-111.

which suggests an intent that the lien of the First Mortgage should attach to an extension financed in part by the use of First Mortgage Bonds or deposited cash to a lesser extent than would be the case if the extension were financed entirely by such means.

The "undivided interest theory" is based primarily upon the "free funds" provision,[1] which reads in part as follows:

> "But nothing express or implied in this indenture shall be construed to limit the right or power of the Company or any successor or purchasing corporation, which right and power is hereby expressly reserved, by the use of its credit or free funds or by the use of First Mortgage Bonds delivered to the Company or any successor or purchasing corporation as in this indenture provided to reimburse the Company or any such successor or purchasing corporation for expenditures theretofore actually made out of its free funds, to construct or acquire free from the lien hereof lines of railroad, extensions or branches or interests therein, * * * *provided the same shall not be* lines of railroad, extensions, or branches or interests therein, * * * (a) *on account of the purchase, acquisition or construction whereof or work whereon* First Mortgage Bonds shall be authenticated and delivered or their proceeds or other cash deposited hereunder shall be paid out as herein provided; * * *."

But the right reserved, viz., to acquire property free of the lien, is strictly limited by the language of the proviso, which is to the effect that such property shall not be property "on account of the purchase, acquisition or construction whereof or work whereon" First Mortgage Bonds or deposited cash shall be taken down. The language of the proviso in the "free funds" provision is substantially identical with the language in the after-acquired property clause—the "free funds" provision and the after-acquired property clause are parallel and complementary. The right to acquire an extension free of the lien stops at the

[1] Appendix A, *infra*, pp. 113-114.

point where the after-acquired property clause begins, namely, the point at which First Mortgage Bonds or deposited cash are used to finance in any part the purchase, acquisition or construction of such extension or any work thereon.

Construing the "free funds" provision in the light of the after-acquired property clause in Granting Clause Third, it is apparent that an after-acquired extension becomes subject in its entirety to the lien of the First Mortgage if financed either in whole or in part with First Mortgage Bonds or deposited cash and that the lien thus created is not limited, either in extent or in priority, to the amount of First Mortgage Bonds or deposited cash used in such financing.

The Bond and Cash Takedown Provisions.

That this is the correct interpretation is further indicated by the provisions of Section 2 of Article Second,[1] which specify the conditions upon which bonds and deposited cash may be taken down in respect of the acquisition of property. These provisions permit the bonding of property, although only a portion of its entire cost be used as the basis for the takedown of bonds or deposited cash;[2] but these provisions require that the entire interest acquired by the Debtor in the property bonded shall be subjected to the lien of the First Mortgage, and do not permit any part of the interest acquired by the Debtor to be kept out of the lien of the First Mortgage and pledged to some other party.[3] Furthermore, they con-

---

[1] J. C. C. Exhibit No. 5, pp. 40-60.

[2] Although this is apparent from a reading of the bond and cash takedown provisions as a whole, the provisions of clause (f) on page 43 will serve as a specific illustration. Clause (f) permits bonds or deposited cash to be taken down to reimburse the Debtor "*in whole or in part* for money expended by it after June 30, 1916, for any one or more of the purposes enumerated in clauses (a), (b), (c), (d) and (e) of this subsection A".

[3] Paragraph Sixth, on pages 54-55, requires the delivery to the First Mortgage Trustees, in case bonds or deposited cash are taken down "with respect to the construction or acquisition of *any prop-*

template that the First Mortgage shall be in effect a first lien on the property bonded; the only outstanding prior encumbrances permitted are certain excepted encumbrances,[1] such as charges ordinarily incident to construction, which are treated as *de minimis*, and liens existing at the time of acquisition, which are required to be certified at the time of the bonding and which are required to be taken care of by reserving bonds or deposited cash. The curious encumbrance contended for by the Refunding Mortgage Trustee is not one of the excepted encumbrances or certified liens.

Since the First Mortgage requires that the Debtor's entire interest in all property bonded shall be subject to the lien, the words "on account of the purchase, acquisition or construction thereof or work thereon" in Granting Clause Third,[2] and the words "on account of the purchase, acquisition or construction whereof or work whereon" in the "free funds" provision,[3] would seem to be meaningless and to serve no useful purpose, unless these provisions be construed as causing the lien of the First Mortgage to attach to the Debtor's entire interest in after-acquired extensions, if the purchase, acquisition

---

erty", of (a) evidence of the execution and delivery to the Debtor of "all deeds, conveyances or other instruments necessary to vest the title to *such property*" in the Debtor, subject only to excepted encumbrances and certified liens, (b) "all supplemental indentures or instruments of further assurance necessary to subject *any such property acquired*" by the Debtor to the lien of the First Mortgage, subject only to excepted encumbrances and certified liens, and (c) an opinion of counsel to the effect that the instruments delivered as called for by clauses (a) and (b) are sufficient for the purposes above specified or that no such instrument is necessary for either or both of said purposes.

[1] The excepted encumbrances include (p. 50): (1) necessarily undetermined liens or charges ordinarily incident to construction or operation and current indebtedness arising from operation for a period not exceeding six months, (2) the lien of the First Mortgage, (3) liens subordinate to the lien of the First Mortgage, (4) liens pledged under the First Mortgage, and (5) liens previously certified against which bonds or deposited cash have already been reserved.

[2] Appendix A, *infra*, p. 110.

[3] Appendix A, *infra*, p. 114.

or construction thereof, or any work thereon, be financed in any part with First Mortgage Bonds or deposited cash.

THE SUBORDINATION COVENANT.

Further evidence of the correctness of this interpretation is found in the covenant contained in Section 13 of Article Fourth of the First Mortgage,[1] which reads as follows:

> "In case the Company shall hereafter mortgage any of the property which is, or by the terms hereof purports to be or which is intended to become, subject hereto, such mortgage shall be, and shall be expressed to be, subject to the prior lien of this indenture for the security of all First Mortgage Bonds then or thereafter to be outstanding hereunder."

In the face of this covenant, it is impossible to construe the after-acquired property clauses of the First Mortgage as creating a lien ranking merely *pari passu* with the lien of a subsequently executed mortgage on property financed only in part with First Mortgage Bonds or deposited cash. If the lien of the First Mortgage attaches at all to the property, it clearly attaches as a first lien upon the Debtor's entire interest in the property and is prior in every respect to the lien of the subsequently executed mortgage.

Such a result is not inequitable, as contended by the Refunding Mortgage Trustee.[2] The terms of the mortgage contract are perfectly clear. They impose a condition upon the right of the Debtor to take down bonds or deposited cash. The Debtor is not obliged to finance any part of the cost of new property with First Mortgage Bonds or deposited cash, but, if it chooses to do so, the First Mortgage requires that its entire interest in the property bonded be subjected to the lien. If the Debtor wishes to acquire

---

[1] I. C. C. Exhibit No. 5, p. 79.

[2] Brief of Refunding Mortgage Trustee, pp. 48-49.

property free of the lien, it must finance it entirely outside of the First Mortgage.

As we have pointed out, the bond and cash takedown provisions of the First Mortgage evidence a purpose that the First Mortgage shall be in effect a first lien on all property bonded. The draftsman sought to accomplish that purpose by carefully providing that liens existing at the time of acquisition should be certified at the time of the bonding and that First Mortgage Bonds or deposited cash should be reserved against them. That purpose would be defeated if the Debtor were permitted at a later date to create all sorts of *pari passu* liens without reserving First Mortgage Bonds or deposited cash to take care of them.

The concept underlying the First Mortgage is not a concept of undivided interests in separate pieces of property standing as security for separate parts of the debt, but a concept of the mortgaged enterprise as a whole standing as security for the debt as a whole.

(II) The Northern California Extension Cannot Be Divided into Bonded and Unbonded Segments.

The "separate segment theory" is based principally upon the fact that the cash requisitions under the First Mortgage in connection with the Northern California Extension include only $197,075.73 of expenditures for "land for transportation purposes",[1] whereas the total amount spent from all sources for "land for transportation pur-

[1] There is nothing in the record to indicate that these expenditures can be allocated to any particular portion of the land acquired. It is logical to assume that the expenditures certified represent merely a proportionate amount of the aggregate cost of all of the land acquired. This is consistent with the scheme of financing outlined in Sections 1 and 2 of Article II (pp. 16-19) of the Indenture dated July 1, 1930 (I. C. C. Exhibit No. 50, R. 2327, 2335), which contemplated that Debentures and First Mortgage Bonds would be used in approximately equal proportions to meet the cost of the Northern California Extension as the work went forward.

poses" in connection with the Northern California Extension was $504,590.66 (R. 1084). The argument is made, therefore, that the lien of the First Mortgage attached only to the land acquired with the proceeds of the First Mortgage Bonds.

This argument overlooks the fact that the cash requisitions under the First Mortgage included expenditures for other purposes in connection with the construction of the Northern California Extension and that there is nothing in the record to indicate that these expenditures were made only upon land acquired with the proceeds of the First Mortgage Bonds. On the contrary, the evidence strongly indicates that the proceeds of the First Mortgage Bonds were applied indiscriminately over the entire line.

The officers' certificates included in the cash requisitions under the First Mortgage, in certifying that expenditures have been made, refer to the extension in its entirety (I. C. C. Exhibit No. 62, sheet 11, which is typical of all of the subsequent requisitions, R. 2368), and the itemizations of the expenditures made indicate that they were not confined to any particular sections of the line.

The first requisition, under which the proceeds of $1,000,000 principal amount of bonds were withdrawn on February 11, 1931, was based upon expenditures between February 1, 1929, and November 30, 1930, including items of engineering, land, grading, tunnels and subways (R. 1082). By December 31, 1930, a substantial part of the grading, tunneling and culvert installation, and practically all of the clearing, had been completed (R. 1077), so that it is a fair inference that the right of way for the entire line had by then been acquired and that the expenditures certified in the various cash requisitions under the First Mortgage were made over the entire line and not merely upon segments or sections of an incomplete right of way.

The large amounts of expenditures certified in the various cash requisitions for such purposes as engineering ($345,392.32), grading ($2,323,625.48), tunnels and subways ($561,053.14), and bridges, trestles and culverts

($868,830.53)[1] are a strong indication that the expenditures certified were not confined to land acquired with the proceeds of the First Mortgage Bonds, All of the expenditures certified in the cash requisitions were made prior to November 30, 1931,[2] and the last withdrawal of deposited cash under the First Mortgage was made on January 29, 1932, prior to the execution and delivery of the Refunding Mortgage, so that none of the expenditures certified could have been made on land to which the lien of the Refunding Mortgage had already attached (R. 1067, 1081-1083).

The bond and cash takedown provisions of the First Mortgage (clauses (a) and (f) of subsection A of Section 2 of Article Second[3]) permit the bonding of an extension only when it is "connecting with" a line of railroad owned by the Debtor and subject to the lien of the First Mortgage. Accordingly, the First Mortgage would not have permitted the Debtor to bond disconnected segments of the Northern California Extension. The fact that, in the cash requisitions, the Northern California Extension was described by its termini as a new line of railroad "to connect with the existing main line" of the Debtor indicates an inten-

---

[1] The aggregate amounts of the expenditures for the various purposes specified in the cash requisitions are as follows (R. 1081-1083):

Land for Transportation Purposes	$. 197,075.73
Engineering	345,392.32
Grading	2,323,625.48
Tunnels and Subways	561,053.14
Bridges, Trestles and Culverts	868,830.53
Ties	137,701.78
Rails	61,168.41
Other Track Material	94,860.96
Ballast	191,778.07
Track Laying and Surfacing	162,784.18
Right-of-Way Fences	3,534.20
Crossings and Signs	6,254.56
Station and Office Buildings	1,206.98
Water Stations	13,844.32
Telegraph and Telephone Lines	14,461.63
Other Expenditures—Road	16,426.69

[2] Connection with the Great Northern Railway at Bieber was made on November 10, 1931, and freight service was then inaugurated under the jurisdiction of the construction department (R. 1077).

[3] I. C. C. Exhibit No. 5, pp. 41, 43.

tion to bond the extension as an entirety and not merely disconnected segments of the extension.

Even if it could be demonstrated that all of the expenditures certified were made on particular segments of the line and that there were other segments upon which no proceeds of the First Mortgage Bonds were expended, that fact would not prevent the lien of the First Mortgage from attaching to the entire Northern California Extension.

Granting Clause Third[1] of the First Mortgage covers, *inter alia*,

> "Any and all property and facilities * * * which may from time to time hereafter be acquired or constructed by or belong to the Company * * * if
>
> * * * * * *
>
> "(b) consisting of * * * property or facilities constituting *an integral part or parts* of * * * extensions * * * subject to the lien of this indenture *or some other integral portion whereof is or integral portions whereof are subject to the lien hereof* * * *."

Assuming that the Northern California Extension is divisible into bonded and unbonded segments, it is clear that each segment is an "integral part" of the extension. Inasmuch as the bonded segments are admittedly subject to the lien of the First Mortgage, the conclusion is inescapable that the unbonded segments are likewise subject to the lien of the First Mortgage, because they constitute integral parts of an extension of which other integral portions are subject to the lien of the First Mortgage.

(III) No Supplemental Indenture Was Necessary to Entitle the First Mortgage to Priority over the Refunding Mortgage on the Entire Northern California Extension.

The third contention of the Refunding Mortgage Trustee is that, in the absence of a recorded supplemental in-

[1] Appendix A, *infra*, pp. 110-111.

denture specifically describing the Northern California Extension, the notice imparted by the recording of the First Mortgage was insufficient to entitle the First Mortgage to priority over the Refunding Mortgage on the entire Northern California Extension.

This contention apparently is founded upon the argument that the descriptive language in the after-acquired property clauses of the First Mortgage is not sufficiently definite.

Under the test laid down by the California statutes and by the authorities, a description in a deed or mortgage is sufficiently definite if the property can be identified by extrinsic evidence.

Section 3538 of the Civil Code of California[1] provides as follows:

> "§ 3538. That is certain which can be made certain."

See:

California Title Insurance & Trust Co. v. *Pauly*, 111 Cal. 122, 43 Pac. 586 (Cal., 1896);

Higgins v. *Higgins*, 121 Cal. 487, 53 Pac. 1081 (Cal., 1898);

Hancock v. *Watson*, 18 Cal. 137, 140 (1861).

In the *Pauly* case, the court held that a mortgage of a street railway line, the granting clauses of which contained the language "and its real, personal, and mixed property, franchises, rights of way, privileges, interests, and appurtenances, of every kind and nature, that it now owns, or that it may hereafter acquire, for use, or adapted to use, on or about its said lines of railway" covered an after-acquired piece of land which, by parol evidence, was shown to have been acquired for use, and to be adapted to use, on or about the mortgaged lines. Counsel for the appellant objected to the admission of parol evidence to show that the property was of the character described in the granting clauses.

[1] Cal. Civ. Code (Deering, 1941) § 3538.

In holding that the evidence was admissible, the court said (p. 588 of 43 Pac.):

> "The purpose for which such evidence was introduced, and which it served, was to prove that the pavilion grounds were acquired by the railway company for use, and adapted to use, 'on or about its said lines of railway;' and thus to identify them as being after-acquired real estate described in the mortgage, or, as may be otherwise expressed, to apply to those grounds the description contained in the mortgage, though the description of itself is unambiguous and sufficiently certain. That parol evidence is competent for this purpose does not admit of a doubt. Greenl. Ev. § 287; Hancock *v.* Watson, 18 Cal. 137; Began *v.* O'Reilly, 32 Cal. 11; Marriner *v.* Dennison, 78 Cal. 202, 20 Pac. 386; Towle *v.* Coal Co., 99 Cal. 397, 33 Pac. 1126."

Section 19 of the Civil Code of California[1] provides as follows:

> "§ 19. *Constructive notice, when deemed.* Every person who has actual notice of circumstances sufficient to put a prudent man upon inquiry as to a particular fact, has constructive notice of the fact itself in all cases in which, by prosecuting such inquiry, he might have learned such fact."

The law is well settled that a description in a mortgage sufficient to put a subsequent purchaser or encumbrancer upon inquiry as to the property intended to be conveyed is constructive notice of the effect of the recorded instrument.

Vercruysse v. *Williams*, 112 Fed. 206 (C. C. A., 8th Circ., 1901).

---

[1] Cal. Civ. Code (Deering, 1941) § 19.

The First Mortgage was recorded in the counties in which the Northern California Extension is situate in 1916 (R. 1066-1067). The Refunding Mortgage, by the provisions appearing on page 23 of I. C. C. Exhibit No. 6, is made expressly subject to the lien of the First Mortgage. Aside from the notice thus imparted, we do not believe it can be seriously contended, on the facts disclosed in the record in this proceeding, that the holders of Refunding Mortgage Bonds did not have at least constructive, if not actual, notice as to the lien of the First Mortgage on the Northern California Extension.

(IV) The Advances by A. C. James Co. and Reconstruction Finance Corporation Were Not Made Under Such Circumstances as to Create Liens on the Northern California Extension in Favor of Either.

The doctrine under which parties making advances for the acquisition or construction of property may, under certain circumstances, become entitled to liens on the property prior to the lien of an existing mortgage containing an after-acquired property clause is well known to equity. But the authorities which establish the doctrine also prescribe certain essential requirements which must be met. In the case of the advances made by the A. C. James Co. and Reconstruction Finance Corporation, as will be shown, these requirements were not met.

In an effort to escape the inexorable conclusion to which these authorities lead, the Refunding Mortgage Trustee insists that it is claiming, not prior liens but merely *pari passu* liens.[1] But we know of no other doctrine, legal or equitable, under which parties making such advances can obtain either priority over or parity with the lien of an existing mortgage with an after-acquired property clause:

[1] Brief of Refunding Mortgage Trustee, pp. 49-51.

The case of *Citizens' Savings & Trust Co.* v. *Cincinnati & D. Traction Co.*, 106 Ohio St. 577, 140 N. E. 380 (Ohio, 1922), cited by the Refunding Mortgage Trustee, is so clearly not in point that it scarcely merits discussion.

In that case, each of the three divisional mortgages covered a power plant. When the consolidated company discontinued these separate power plants, it took away part of the security of each of the divisional mortgages, which it then became under an equitable duty to restore. This it did in effect by building a central power plant. But, since the court could not divide the central power plant into three parts and give one part to each of the three divisional mortgages, it did the only thing which a court of equity could do under the circumstances—it gave to each a *pari passu* lien on an undivided interest in the whole. There is no analogy between the situation in that case and the situation of a creditor seeking to displace the lien of an existing mortgage.

The Two Requirements: Time and Intent.

The doctrine under which parties making advances for the acquisition or construction of property become entitled to liens on the property prior to the lien of an existing mortgage containing an after-acquired property clause is subject to two important requirements:

(1) The advances must have been made before or in substance at the very time of the coming of the property into the possession or ownership of the mortgagor, and

(2) An express agreement or intent to create a prior lien securing the advances must have been clearly evidenced.

The Authorities.

In *Harris* v. *Youngstown Bridge Co.*, 90 Fed. 322 (C. C. A., 6th Circ., 1898), the court, consisting of Circuit Judges Taft and Lurton and District Judge Clark, in

an opinion rendered by Judge TAFT, discussed and applied the doctrine.

In 1881, the Kentucky & Indiana Bridge Company made the "first mortgage" to secure $1,000,000 in principal amount of bonds; the "first mortgage" in terms covered the bridge and its approaches and all after-acquired property.

In 1886, after the "bridge and its main line" were completed, the Bridge Company, to secure a new tenant, agreed to connect the bridge with additional railroads and terminals and to replace the wooden approach by a steel structure. For the purpose, the Bridge Company made the "terminal trust deed" to Theodore Harris as trustee securing an issue of $400,000 in principal amount of bonds issued to the "contract company"; the "contract company" with its own funds purchased additional land and constructed tracks connecting the bridge with the additional railroads and terminals; the "contract company" acquired title to the land, either in its name or in the name of a trustee, and, after the partial completion of the tracks, conveyed the property to the Bridge Company.

The "terminal trust deed" bonds were held entitled to priority over the "first mortgage" bonds in respect of the additional land and tracks paid for by the "confract company".

The court, after mentioning vendor's liens, liens of purchase-money mortgages, rights of conditional vendors, and liens of unrecorded mortgages as examples of claims entitled to priority over the lien of a mortgage containing an after-acquired property clause, stated in general terms the rule that (p. 329), "where the legal or equitable title of the mortgagor ripens and is acquired only through the outlay or expenditure of another, under such circumstances that, as between the other and the mortgagor, the former has a lien in equity upon the interest of the latter, the prior mortgage with an after-acquired property clause attaches only to the interest of the mortgagor subject to the same lien".

For the general statement of the rule, the court cited *Bear Lake Irrigation Co.* v. *Garland*, 164 U. S. 1 (1896),

in which case this Court referred to the doctrine in the following terms (pp. 15-16):

> "On the contrary, the latter claim to bring their case within the rule recognized in this court, that even under the after-acquired property clause in a mortgage, if property be burdened with an incumbrance or lien at the very time of coming into the possession or ownership of the mortgagor, such incumbrance remains prior and superior to the lien of the mortgage, although it was actually subsequent thereto in point of time. * * *"

The Circuit Court of Appeals, after stating the general rule and citing the *Garland* case, then applied the general rule to the claim of the "contract company" (p. 329):

> "* * * Where, therefore, at the instance of the mortgagor, a third person pays the purchase money for additions, and takes title to them himself, or directs their conveyance directly to the mortgagor, with an express agreement that he shall have a lien for the purchase money, such lien is prior to that of the mortgagor, because it is only through his expenditure that the purchase is effected and the addition acquired. * * * So long as the lien asserted is for money used in good faith to acquire the very thing upon which the lien is claimed, we do not see how the first mortgagee is defrauded."

The court stated its conclusion that the "terminal trust deed" bonds were entitled to a prior lien as follows (p. 330):

> "* * * We are therefore of opinion that in the case before us all the rights of way which were purchased and paid for by the contract company, together with all the improvements placed thereon by that company, whether the rights of way were first put in the name of Harris, trustee, as the contract required they should be, before transfer to the bridge company, or were conveyed directly to the bridge company, without the interposition of Trabue or Harris, trustee, are subject to a lien in favor of Harris, trustee, for the bondholders, prior to that of the first mortgage. This

will include the two lots acquired by condemnation, for which the contract company paid the full purchase-price. The payment of the price was a condition precedent to the passing of any title at all, and the contract company, and Harris, trustee, for the bondholders, in thus effecting the purchase, are entitled to rely on the rights secured to them by their contract with the bridge company."

The court, however, took a distinction as to the rights of way not paid for by the "contract company" but apparently constituting essential parts of the addition acquired through the "terminal trust deed" transaction (pp. 331-332):

"What has been said applies only to the private property bought by the contract company with its money. With respect to the rights of way obtained by ordinances from the city of Louisville and the village of Parkland, the case is different. The contract company paid nothing for these rights of way, and contributed nothing to their acquisition. Therefore they came into the possession and enjoyment of the bridge company burdened with no lien except such as might arise from the improvement of that which was already the property of the bridge company. * * *

It follows that the lien given by the after-acquired property clause of the first mortgage attached to the rights of way in the streets immediately upon the passage of the ordinances, and that improvements upon the rights of way only increased the security by becoming part of the realty. The lien asserted by Harris, trustee, on this part of the terminals, did not arise in the act of acquisition, but only in the improvement after acquisition. * * *

"It remains to consider those cases in which the land for rights of way was given for a nominal consideration to the bridge company. It is impossible to distinguish them from the rights of way granted by ordinance; The title to the land passed to the bridge company, and the improvements constructed thereon became a part of the realty of that company, to which

the lien of the first mortgage attached the moment the title to the land passed to the company. The lien of Harris, trustee, upon such lands, must therefore be postponed to that of the first mortgage.

"The result is that the lien of the terminal trust bondholders upon the new terminals is, as to that part situate upon real estate or rights of way for which the contract company paid, prior in right to the lien of the first mortgage, to the extent of the sums expended in buying the lands or easements, and in erecting the necessary structures thereon, but that as to the remainder of the new terminals their lien is junior to that of the first mortgage."

A separate claim was made by the Columbia Finance & Trust Company and sustained by the court.

Some land was bought and a new steel approach substituted for the old wooden approach with funds borrowed from the Trust Company, under a contract (which expressly provided for a lien to secure the Trust Company [p. 334])[1] pursuant to which the Trust Company pur-

[1] The Transcript of the Record on Appeal in that case (pp. 97, 98 and 99) shows the contract contained the following provisions in addition to those quoted in the opinion at page 334:

"Whereas * * * the Trust Company is willing to advance the money for the purchase of said lots of land, and the Bridge Company expects to obtain other persons, as friends of the company, to advance to or for it the means necessary to pay for the labor or material * * * but said persons will not be willing to advance said money unless secured therein in manner and form as herein set forth; and

* * * * *

"III

"All of the ground so to be conveyed to the Trust Company, together with the entire railroad to be constructed thereon, and all the material embraced therein, shall be held by it in trust as follows:

"First. To secure to the said Trust Company the payment by the Bridge Company of all sums of money which it may have advanced for the purchase of said tracts of ground above mentioned, * * *. And for any unpaid residue the said Trust Company shall have the right by legal proceedings to cause a sale of the entire ground occupied by said railroad and said railroad itself."

chased with its own funds the rights of way and took title in its own name and thereafter conveyed title to the Bridge Company. The court held that the Trust Company was entitled to a first lien on the property so purchased to secure the amount of the advances and the consequential damages and compensation provided for pursuant to the contract.

An additional claim was made by indorsers of notes of the Bridge Company sold to obtain funds for the construction of the new steel approach. The claim was for a prior lien to secure the amounts which the indorsers had been required to pay to discharge their liabilities as indorsers. The claim was rejected.

The court pointed out (p. 334) that the funds obtained appeared to have been turned in to the general account of the Bridge Company and that the testimony merely showed an amount equal to the funds so obtained was at some time expended on the construction of the new steel approach. The court said (p. 334):

> "* * * The after-acquired property clause in a mortgage does not displace any equitable lien which really grows out of the act of acquisition, by purchase or otherwise, so that the mortgagor may be properly said to acquire the property with the lien on it, or less the lien. It is not infrequently a nice question to decide whether the lien really inheres in the act of acquisition, or whether it is given the false appearance of doing so at the instance of the purchaser, for the purpose of evading an after-acquired property clause in a prior mortgage, and is really nothing more than a lien taking effect after the act of acquisition, and not as part of it, and is thus subordinate to the mortgage. * * * The creditors sought to be secured were the creditors of the bridge company. They loaned their credit to the bridge company to enable it to borrow money to build its own bridge. The bridge company secured to them a lien on its equitable interest in the land bought for it by the Columbia Trust Company, after it should have paid the purchase price to the trust company. To that equitable interest the lien

of the first mortgage attaches the moment the purchase money is paid. As the learned judge of the circuit well said, 'The interest which was thus made subject to these advances was the interest of the bridge company, and not the title or interest of the trust company.' The lien of Gaulbert and others upon the new approach is therefore subordinate to the lien of the first mortgage."

The court rejected the claim of the indorsers even though an agreement, which was put in evidence and quoted in part in the opinion (p. 334), expressly provided for a lien to secure "moneys raised upon notes or other obligations upon which individuals may have become bound for the bridge company, as indorsers, guarantors, accommodation makers, or otherwise".

The doctrine discussed and applied in the *Harris* case was also discussed and applied, with particular stress upon the necessity of an express agreement or intent to create a prior lien securing the advances, in *Shooters Island S. Co.* v. *Standard Shipbuilding Corp.*, 293 Fed. 706 (C. C. A., 3rd Circ., 1923).

In 1915, the Standard Shipbuilding Corporation made a mortgage in the amount of $863,000 to secure the purchase price of premises constituting a shipbuilding plant; the mortgage in terms covered the premises "'And all additions and extensions to said real property, including any and all rights to lands under water adjoining said premises' * * *". In 1917, a supplemental mortgage was given, pursuant to the covenant of further assurance in the mortgage, covering a leasehold interest (in land under water) acquired by the Shipbuilding Corporation after the execution of the mortgage; the lease contained an option to purchase the fee.

Subsequent to the execution of the supplemental mortgage, the United States Shipping Board Emergency Fleet Corporation, following the requisitioning of all ships under construction in the Shipbuilding Corporation's plant, made various advances to the Shipbuilding Corporation, includ-

ing an advance of more than $5,000,000 for additions and improvements to the plant. The court pointed out (p. 709) that this advance was made without demanding security and, so far as the record in the case showed, without a move to question or disturb the lien of the mortgage upon the after-acquired properties.

The advance of more than $5,000,000 was used, among other things, for the purchase (pursuant to the option) of the fee to the land a leasehold interest in which was covered by the supplemental mortgage.

In 1920, the Shipbuilding Corporation and the Emergency Fleet Corporation made a contract adjusting their accounts, which found the sum of $1,337,000 to be due to the Emergency Fleet Corporation. The Shipbuilding Corporation delivered bonds for this amount secured by a mortgage on the plant; the mortgage was executed pursuant to an agreement which provided that the mortgage should be subject to the existing mortgage for $863,000. The court pointed out (p. 710) there could be no doubt that, at the time of the execution of the mortgage to the Emergency Fleet Corporation, it had no other thought than that it was obtaining a mortgage whose lien was subject to the prior lien of the $863,000 mortgage.

In 1922, in connection with suits to foreclose the two mortgages, the Emergency Fleet Corporation claimed, for the first time, a prior lien on the fee to the land purchased with the money advanced by the Emergency Fleet Corporation (and the improvements made to said land with money so advanced).

In rejecting the claim to priority, the court said (pp. 713-714):

> "The claimed equitable lien, therefore, rests on the single fact that money which the Fleet Corporation loaned or advanced to the Shipbuilding Corporation under shipping contracts was used in the purchase and improvement of the land. That the Fleet Corporation intended it to be so used is evidenced by the warrant issued for the money and its expenditure, * * *. Unless we are to hold that such expenditures, singly

and alone, create in each instance, wherever applied and expended, an equitable lien in favor of the party advancing the money, thereby divesting rights held under an existing mortgage, we are constrained to hold that the purchase of lands from the State of New Jersey and the building of ways thereon with moneys which the Fleet Corporation either loaned or advanced to the Shipbuilding Corporation do not, without more, give it an equitable lien on the properties so purchased and improved. We freely admit that under different circumstances an equitable lien could have been created which would have displaced the lien of the prior mortgage under its after-acquired property clause. But under the circumstances as they were, we are unable to find, either on authority or principle, that the rights of one silently and unconditionally loaning money for the purchase and improvement of property are superior to the rights of a party who holds the lien of a prior mortgage against the property.

. . . . .

"[5] We come to this conclusion not on the theory of estoppel of or waiver by the Fleet Corporation in adjusting its differences with the Shipbuilding Corporation in 1922 and accepting a second mortgage in settlement, as urged by the Shooters Island Company, although there is substance in this contention, Griffin *v.* Smith, 143 Fed. 865, 75 C. C. A. 73, but on the ground that where the evidence shows nothing, expressly or impliedly, was demanded or promised by either party, an equitable lien is not raised by the mere loaning and application of money for purchases and improvements that were understood and intended.

"[6] Passing from its alternative claims to legal and equitable liens, the Fleet Corporation next maintains that, having supplied the purchase money for the after-acquired property, its mortgage is a purchase money mortgage on the principle that an instrument may be a purchase money mortgage although given to a third person to secure money advanced by him. There is ample authority for this proposition. But even in such a situation the mortgage must be given for the purpose and with the intention of

securing the purchase money and, without regard to the date, it must be a part of one continuous transaction. New Jersey Building Loan & Investment Co. *v.* Bachelor, 54 N. J. Eq. 600, 35 Atl. 745; Stewart *v.* Smith, 36 Minn. 82, 30 N. W. 430, 1 Am. St. Rep. 651. Here the mortgage was given the Fleet Corporation five years after the money was advanced and there is nothing to show an agreement that, at the time of the advance, repayment was to be secured by the mortgage. It is, of course, not necessary that a deed and mortgage should be executed at the same hour, or even on the same day, provided, as the authorities say,

> 'the execution of the two instruments constitute part of one continuous transaction and were so intended. But where the mortgage is not executed until a considerable time after the deed, they cannot be construed as simultaneous and the mortgage will be postponed to intervening valid liens.' 1 Jones on Mortgages, § 469; Bridges *v.* Cooper, 98 Tenn. 381, 39 S. W. 720."

THE REQUIREMENT AS TO TIME WAS NOT MET.

As we have pointed out, the Debtor commenced making expenditures in connection with the Northern California Extension as early as February 1, 1929 (R. 1082). Actual construction work was commenced on August 16, 1930, and, by the end of 1930, practically all of the clearing and a substantial part of the construction work for the entire line had been completed (R. 1077), so that presumably the entire right of way had been acquired. By February 1, 1931, a total of $1,682,298.18 had been expended by the Debtor (I. C. C. Exhibit No. 95, sheet 10, R. 2464), before a single dollar had been advanced by either the A. C. James Co. or Reconstruction Finance Corporation.

On February 11, 1931, the first $1,000,000 principal amount of First Mortgage Bonds was authenticated and delivered and their cash proceeds withdrawn to reimburse the Debtor for the expenditures made up to November 30, 1930 (R. 1080-1082), and the lien of the First Mortgage

attached, by virtue of the after-acquired property clauses, to the line as it then existed.

The bid of the A. C. James Co. for the $5,000,000 principal amount of Debentures (I. C. C. Exhibit No. 49, R. 2327) was dated January 22, 1931, but the first $1,000,000 principal amount of Debentures was not authenticated and delivered until February 27, 1931 (R. 1084-1085).

Thus, the Northern California Extension had come into existence as a continuous right of way, with substantial improvements, owned by the Debtor, before a single dollar was advanced by the A. C. James Co.

Consequently, to use the language of Judge TAFT quoted at page 85 of this brief, the property "came into the possession and enjoyment of the * * * company burdened with no lien except such as might arise from the improvement of that which was already the property of the * * * company", and that property and the improvement were subject to the lien of the First Mortgage as a first lien. The liens claimed "did not arise in the act of acquisition, but only in the improvement after acquisition."

As indicated by the officers' certificates included in the cash requisitions under the First Mortgage, the expenditures made subsequent to February 27, 1931, were made chiefly for improvements to the real property constituting the right of way (R. 1081-1083), so that, even to the extent financed by the subsequent advances made by the A. C. James Co., the "improvements upon the rights of way only increased the security by becoming part of the realty" covered by the First Mortgage as a first lien,—to use the language of Judge TAFT quoted on page 85 of this brief.

The same is true of the advances made by the Reconstruction Finance Corporation, which were made between March 1 and August 1, 1932 (R. 1088), by which time the Northern California Extension was nearly completed and had already been placed in operation for freight service under the jurisdiction of the construction department (R. 1077). As shown by the applications submitted by the

Debtor to Reconstruction Finance Corporation, the advances were made entirely for the purpose of financing improvements to the already existing line (I. C. C. Exhibit No. 82, sheet 6 and Schedule P, R. 2449, 2451; I. C. C. Exhibit No. 87, pp. 3-5 and Schedule P, R. 2456).

Thus an examination of the record discloses a complete failure to meet the requirement that advances must be made before or in substance at the very time of the coming of the property into the possession or ownership of the mortgagor in order to cause such advances to be entitled to a lien on the property prior to the lien of a mortgage containing an after-acquired property clause.

THE REQUIREMENT AS TO INTENT WAS NOT MET.

Furthermore, an examination of the record discloses a complete failure to meet the requirement that an express agreement or intent to create a prior lien securing the advances must have been clearly evidenced.

The record contains no indication that either the A. C. James Co. or Reconstruction Finance Corporation had any intention that their advances when made would be secured by a prior lien on the Northern California Extension; the record indicates the opposite, namely, an intention or understanding that the Northern California Extension would be subject to the lien of the First Mortgage as a first lien.

The original offer of the A. C. James Co., dated May 14, 1929, stipulated that the advances should be secured by a first lien upon the Northern California Extension (I. C. C. Exhibit No. 45, R. 2308, 2316), but this offer was withdrawn and a new offer substituted, under date of June 19, 1929, which stipulated that the loan should be evidenced by unsecured debentures (I. C. C. Exhibit No. 46, R. 2319).

The specifications on the basis of which the A. C. James Co. purchased the Debentures issued under the Indenture dated July 1, 1930, stated in effect that the First Mortgage would constitute a first lien on the Northern California Extension (I. C. C. Exhibit No. 48, sheet 5, R. 2326). A

similar statement appeared in the specifications upon the basis of which The Western Pacific Railroad Corporation (of which Mr. A. C. James was a director) purchased the $5,000,000 principal amount of First Mortgage Bonds which were issued to finance in part the construction of the new extension (I. C. C. Exhibit No. 93, sheet 2, R. 2459; R. 1079-1080).

The resolutions adopted by the Executive Committee of the Debtor (Mr. James being a member of the Executive Committee and being present at the meetings at which those resolutions were adopted), and the opinions of counsel which the Debtor furnished to the First Mortgage Trustees in applying for the withdrawal of the cash proceeds of the First Mortgage Bonds showed that the Debtor regarded the entire Northern California Extension as being subject to the lien of the First Mortgage (I. C. C. Exhibit No. 86, R. 2455; I. C. C. Exhibit No. 62, sheets 8-9, R. 2368). In view of the close relationship of Mr. James to the Debtor, these formal expressions of the position of the Debtor indicate to an important extent the intention or understanding of Mr. James.

That intention or understanding is further indicated by the following statement appearing at page 6 of the petition of the A. C. James Co. for leave to intervene in the proceeding before the Commission (R. 2194, 2196):[1]

> "During the depression, the Northern California Extension, now recognized in any estimate of the future earning power of the road to be a factor of great importance, was built under the lien of the First Mortgage. Approximately $7,000,000 was advanced for the purpose by your petitioner, upon evidences of debt which were junior to the First Mortgage. The security held for the benefit of the First Mortgage bondholders was thus improved during the depression years."

The record shows that the intention or understanding of Reconstruction Finance Corporation also was that the

[1] This petition was not printed.

First Mortgage would constitute a first lien on the Northern California Extension. The applications made by the Debtor to Reconstruction Finance Corporation for loans to be secured by the pledge of Refunding Mortgage Bonds in effect stated that the lien securing the Refunding Mortgage Bonds would be junior to the lien of the First Mortgage on all of the properties of the Debtor except certain securities (I. C. C. Exhibit No. 82, sheet 7, R. 2449, 2451; I. C. C. Exhibit No. 87, p. 15, R. 2456).

POINT IV.

THE FIRST MORTGAGE IS A FIRST LIEN ON THE SO-CALLED "NONCARRIER" PROPERTY.

A. FACTS.

The Debtor's Account No. 705, entitled "Miscellaneous Physical Property", at December 31, 1935, contained certain items described as being property for "noncarrier" purposes (R. 1090-1091, and Exhibit H to the Stipulation,[1] p. 1, R. 1299). We understand that the claims with respect to "noncarrier" property asserted by the Refunding Mortgage Trustee are limited to the six items appearing in Lines 41, 66, 86, 105, 123, and 151.[2]

The only one of these items specifically mentioned in the brief of the Refunding Mortgage Trustee is the item appearing in Line 123. This item consists of numerous parcels of land in the Islais Creek District of San Francisco, which are shown in detail on the maps and schedules annexed to Exhibit H to the Stipulation. An analysis of these maps and schedules shows that by far the greater part of this property was acquired by the Debtor from its predecessor, Western Pacific Railway Company. All of the property acquired by the Debtor subsequent to the

[1] This exhibit was not printed.

[2] Stip., Exhibit H, p. 1, and Brief of Refunding Mortgage Trustee, p. 51.

execution and delivery of the First Mortgage was either acquired by the use of deposited cash under the First Mortgage or was acquired in exchange for property of the Debtor which was released from the lien of the First Mortgage, with the exception of two parcels of an aggregate book cost of approximately $7,000, which were acquired in 1932.[1] These two parcels, which are shown on Map "B", and on sheet 1 of Schedule B annexed to Exhibit H, as I. C. C. Parcels Nos. 253-A and 261-A, are situate in the area west of Illinois Street. They were acquired for industrial sites and trackage necessary to serve future industries (R. 1299-1300) and were originally carried on the books of the Debtor as "carrier" property (Stip., Exhibit H, p. 4).

The remaining items consist of (1) land in Oakland and Sacramento, California, all of which was either acquired by the Debtor from its predecessor, Western Pacific Railway Company, or was acquired by the use of deposited cash under the First Mortgage, and (2) land of negligible value acquired subsequent to the execution and delivery of the First Mortgage for use as gravel pits, none of which was acquired by the use of First Mortgage Bonds or deposited cash (Stip., Exhibit H, pp. 2-3).

The items appearing in Lines 86, 105 and 123 were originally carried on the Debtor's books in Account No. 701, entitled "Investment in Road and Equipment", and were subsequently transferred to Account No. 705, entitled "Miscellaneous Physical Property" (Stip., Exhibit H, p. 1).

---

[1] Exhibit H to the Stipulation (pp. 5-6) clearly shows that some of the Islais Creek property was acquired subsequent to the execution and delivery of the First Mortgage and was acquired by the use of deposited cash under the First Mortgage. We understand the statement on page 52 of the brief of the Refunding Mortgage Trustee, that "The properties in dispute * * * were not acquired from proceeds of First Mortgage Bonds", to mean that the claims of the Refunding Mortgage Trustee are limited to that portion of the property which was not acquired by the use of deposited cash under the First Mortgage.

B. ARGUMENT.

All of the above described items of so-called "noncarrier" property fall within one or the other of two general classes, namely, (1) property acquired by the Debtor from its predecessor, Western Pacific Railway Company, and owned by the Debtor at the date of the execution and delivery of the First Mortgage, and (2) property acquired by the Debtor subsequent to the execution and delivery of the First Mortgage.

The brief of the Refunding Mortgage Trustee does not make clear whether the Refunding Mortgage Trustee is asserting its claims with respect to both classes of property or only with respect to property in the first class. Although the statement of facts in the brief (pp. 51-52) contains language indicating that the Refunding Mortgage Trustee may be asserting its claims with respect to property in both classes, the argument in the brief (pp. 53-55) deals only with "noncarrier" real estate acquired by the Debtor from its predecessor, Western Pacific Railway Company, and owned by the Debtor at the date of the execution and delivery of the First Mortgage. We shall therefore direct the argument in this brief primarily to property belonging in that class.

We do not believe that any valid contention can be made that the "noncarrier" property acquired by the Debtor subsequent to the execution and delivery of the First Mortgage is not subject to the First Mortgage as a first lien.

That portion of the after-acquired "noncarrier" property which was acquired by the use of deposited cash is subject to the lien of the First Mortgage by reason of the provisions of Granting Clause Third.[1]

That portion of the after-acquired "noncarrier" property which was acquired in exchange for property released from the lien of the First Mortgage is subject to the lien of the First Mortgage by reason of the provisions appearing in the last sentence of Section 8 of Article Seventh.[2]

---

[1] Appendix A, *infra*, pp. 110-111.

[2] I. C. C. Exhibit No. 5, p. 115.

The two after-acquired parcels in the Islais Creek District of San Francisco which were acquired for industrial sites and trackage necessary to serve future industries are subject to the lien of the First Mortgage for the reason that they are property "acquired for use in or for the maintenance or operation" of the mortgaged lines (Granting Clause Third[1]) and are property "held for use * * * to facilitate * * * the maintenance or operation" of the mortgaged lines (Granting Clause Fifth[2]). The acquisition of land to be held for future sale to industries for the construction of plants and warehouses is an important and useful means of increasing the traffic and revenues of a railroad. An analogous situation was considered by the Supreme Court of California in *California Title Insurance & Trust Co.* v. *Pauly*, 111 Cal. 122, 43 Pac. 586 (Cal., 1896); see also *People's Trust Co.* v. *Schenck*, 195 N. Y. 398, 88 N. E. 647 (N. Y., 1909).

The three gravel pit properties are subject to the lien of the First Mortgage for a similar reason. A gravel pit is used by a railroad chiefly for the purpose of supplying material for ballast and other purposes in connection with the maintenance of the right of way.

The Refunding Mortgage Trustee contends, we understand, that the "noncarrier" real estate with respect to which it is asserting its claims is free of the lien of the First Mortgage and constitutes free assets against which the pledged holders of Refunding Mortgage Bonds are entitled to assert deficiency claims.[3]

---

[1] Appendix A, *infra*, p. 110.

[2] Appendix A, *infra*, p. 112.

[3] Brief of Refunding Mortgage Trustee, pp. 53-55.

As pointed out in the answering brief of the Institutional Bondholders Committee (pp. 36-37), no deficiency claims can be asserted on the pledged Refunding Mortgage Bonds as such.

The cash and other current assets on hand at the date of the institution of the Section 77 proceedings, which the brief of the Refunding Mortgage Trustee (p. 8) mentions as being unmortgaged, are no longer available as a fund out of which the claims of creditors may be satisfied. Pursuant to orders of the District Court $10,000,000 in principal amount of prior lien trustees' certificates

(I) The Characterization of Property as "Noncarrier" Property in the Debtor's Accounts Does Not Affect the Scope of the Granting Clauses of the First Mortgage.

The fact that the Debtor, in accordance with the accounting regulations prescribed by the Interstate Commerce Commission, characterized certain property in its accounts as being for "noncarrier" purposes does not affect the scope of the granting clauses of the First Mortgage. The phrase would seem to have no other significance than as indicating that the property was not at the time actually being used for transportation purposes.

The granting clauses of the First Mortgage are not limited to property actually used for transportation purposes.

(II) The Granting Clauses of the First Mortgage Expressly Cover "Noncarrier" Real Estate Owned by the Debtor at the Date of the Execution and Delivery of the First Mortgage.

THE GRANTING CLAUSES OF THE FIRST MORTGAGE.

Granting Clause First of the First Mortgage[1] covers:

"All and singular the following described lines of railroad, terminals, lands, equipment, shares of stock

---

have been issued to finance necessary maintenance expenditures in connection with the Debtor's three-year rehabilitation program (R. 1092-1093). Inasmuch as the District Court had no power to authorize the issuance of these trustees' certificates, except upon a showing that there were no funds available to finance the expenditures, it must follow that all of these current assets have been used up in the operation of the Debtor's railroad, to enable it to discharge its primary duty to the public to provide safe and efficient operation of transportation facilities required by the public interest. See: *Union Trust Co.* v. *Illinois Midland Co.*, 117 U. S. 434, 455-456 (1886); *International Trust Co.* v. *Decker Bros., et al.*, 152 Fed. 78 (C. C. A., 9th Circ., 1907); *Meyer* v. *Johnston*, 53 Ala. 237, 346-350 (1875).

[1] Appendix A, *infra*, pp. 105-109.

and other real and personal property and interests and rights in property owned by the Company or to which it may be entitled, formerly the property of or belonging to Western Pacific Railway Company, a corporation of the State of California, or its receivers:"

This language is followed by specific descriptions contained in six subdivisions.

Subdivision III reads as follows:

"All terminals and *all lands and interests in lands, easements therein and improvements thereon*, including, among other things, yards, station and depot grounds, sheds, station houses, freight houses, warehouses, elevators, stockyards, carhouses, engine houses, oil tanks, water tanks, water supply, shops, hotels, boarding houses, hospitals, docks, wharves, piers, slips, telephone and telegraph lines and other structures and erections and the appurtenances of all and every of the foregoing, *whether or not for use in connection with said or any lines of railroad.*"

Subdivision VII reads as follows:

"All and singular the property, interests and rights, (except cash, accounts and bills receivable, traffic and other operating balances and other cash items) not comprised in the descriptions contained in the foregoing subdivisions of this clause *First* of these granting clauses, which belong to the Company or to which it may be entitled in any manner and which heretofore were owned by Western Pacific Railway Company or to which said company was or its receivers were entitled."

Granting Clause Second[1] covers:

"All other lines of railroad, extensions, branches, terminals, lands, structures, equipment, shares of stock, bonds, notes and other securities, claims, franchises, privileges and immunities and other property and estates, interests and rights (whether legal or

[1] Appendix A, *infra*, p. 109.

> equitable) now owned by or belonging to the Company, notwithstanding the same or any thereof may not be particularly set forth in these granting clauses."

It is difficult to see how the draftsman of the First Mortgage could express more clearly an intent that all property (with certain specified exceptions not relevant to this discussion) owned by the Debtor at the date of the execution and delivery of the First Mortgage, including property acquired by it from its predecessor, Western Pacific Railway Company, should be subject to the lien of the First Mortgage. The words "whether or not for use in connection with said or any lines of railroad", appearing in subdivision III of Clause First, clearly show that the property mortgaged included "noncarrier" property as well as "carrier" property.

The Provisions of the 1915 Plan of Reorganization Are Not Relevant.

The Refunding Mortgage Trustee contends that "noncarrier" real estate owned by the Debtor at the date of the execution and delivery of the First Mortgage is not subject to the lien, because of the provision appearing in Article VII of the plan of reorganization of the Debtor's predecessor, Western Pacific Railway Company, dated December 15, 1915, which describes the new First Mortgage Bonds to be issued by the Debtor pursuant to the plan in the following language (R. 1141):

> "To be secured by first mortgage upon all of the existing railway properties of the Old Company and all property hereafter acquired by the Operating Company integrally connected therewith and all property acquired by means of the use of proceeds of the New Bonds or against which New Bonds shall be issued."

The Refunding Mortgage Trustee contends that the plan "constituted a contract between the stockholders of the Debtor (who were bondholders of the predecessor company) and the new First Mortgage bondholders" and that

to interpret the First Mortgage as covering the "noncarrier" real estate in question "would violate the terms under which the old bondholders agreed to take stock in the new company (the Debtor herein) in exchange for their claims."[1]

We question whether the words "existing railway properties" were used in the plan in a narrow sense as excluding from their meaning physical properties used or acquired for use in the business of the railroad but not used in the actual transportation of passengers and commodities. The provisions of the plan indicate rather that the draftsman used these words to describe the properties of the predecessor company which were to be transferred to the new operating company (the Debtor), as distinguished from the claims against The Denver and Rio Grande Railroad Company which were to be transferred to the new holding company (R. 1135-1136).

The language of Granting Clause First of the First Mortgage,[2] amounts to an interpretation of these words in the plan as having that meaning.[3]

But, even if the words "existing railway properties" be held to exclude from their meaning "noncarrier" real estate, the provisions of the plan are not relevant to the question of the scope of the granting clauses of the First Mortgage. The language used in the above quoted provisions of the granting clauses is clear and free from ambiguity. It plainly includes all "noncarrier" real estate owned by the Debtor at the date of the execution and de-

---

[1] Brief of Refunding Mortgage Trustee, p. 53.

Although the distinction seems immaterial, we wish to point out for the sake of accuracy that the bondholders of the predecessor company did not become direct stockholders of the Debtor. Under the plan, all of the stock of the Debtor was placed in the new holding company (R. 1135-1136), and the bondholders of the predecessor company were given stock of the holding company (R. 1143-1144).

[2] Appendix A, *infra*, pp. 105-109.

[3] The agreement of reorganization (R. 1165-1210) provided (R. 1178):

> "The Reorganization Committee may construe the Plan and Agreement and its construction thereof or action thereunder in good faith shall be final and conclusive."

livery of the First Mortgage, including "noncarrier" real estate acquired by the Debtor from its predecessor, Western Pacific Railway Company.

The provisions of the plan are inadmissible to contradict the clear and unambiguous provisions of the granting clauses of the First Mortgage.

CONCLUSION.

We respectfully submit:

1. That this Court, in view of the public interest in bringing about a speedy termination of the reorganization proceedings, should decide the issues involved in the "lien controversy".

2. That this Court should decide that the issues involved in the "lien controversy" were correctly determined by the Commission and by the District Court.

3. That, for the reasons set forth in this brief and in the brief of the First Mortgage Trustees filed in No. 8, this Court should reverse the decision of the Circuit Court of Appeals and affirm the order of the District Court approving the Commission Plan.

Dated, New York, N. Y., October 3, 1942.

Respectfully submitted,

ORVILLE W. WOOD,
Attorney for Respondents Crocker First National Bank of San Francisco and Samuel Armstrong, as Trustees under The Western Pacific Railroad Company First Mortgage dated June 26, 1916.

ARTHUR A. GAMMELL,
Of Counsel.

Appendix A.

The Granting Clauses of the First Mortgage.

"NOW, THEREFORE, THIS INDENTURE WITNESSETH, that, in order to secure the payment of all of said bonds (which are hereinafter called 'First Mortgage Bonds') at any time issued and outstanding under this indenture according to their tenor, purport and effect, as well the interest as the principal thereof, and to secure the performance and observance of all of the covenants and conditions therein and herein contained and to declare the terms and conditions upon which the First Mortgage Bonds are to be executed, authenticated, delivered and received, the Company, in consideration of the premises and of the acceptance or purchase of said bonds by the holders thereof and of the sum of One hundred Dollars, lawful money of the United States of America, to it duly paid by the Trustees at or before the ensealing and delivery of these presents, the receipt whereof is hereby acknowledged, hath granted, bargained, sold, aliened, remised, released, conveyed, confirmed, mortgaged, pledged, assigned, transferred and set over, and by these presents doth grant, bargain, sell, alien, remise, release, convey, confirm, assign, mortgage, pledge, transfer and set over unto the Trustees, their successors in the trust and their assigns forever, all of the following described railways, franchises and other properties (which collectively are hereinafter called the 'trust estate'), to wit:

"*First.*—All and singular the following described lines of railroad, terminals, lands, equipment, shares of stock and other real and personal property and interests and rights in property owned by the Company or to which it may be entitled, formerly the property of or belonging to Western Pacific Railway Company, a corporation of the State of California, or its receivers:

"I.—A main line of railroad commencing in the City and County of San Francisco, running thence in and through said City and County to certain slips, piers and landing places upon San Francisco Bay in said City and County; thence by ferry and barge to the City of

Oakland, in the County of Alameda; thence in and through said City of Oakland; thence in a southeasterly, easterly, northeasterly and northerly direction through the Counties of Alameda and San Joaquin, passing in and through the City of Stockton in said County of San Joaquin; thence in a general northerly direction through the County of Sacramento, passing in and through the City of Sacramento in said county; thence in a general northerly direction through the Counties of Sutter and Yuba, passing in and through the City of Marysville in said County of Yuba; thence in a general northerly direction through the County of Butte, passing through the City of Oroville in said County; thence in a general northeasterly, easterly and southeasterly direction through the County of Plumas; thence in a general northerly and easterly direction through the County of Lassen to a point on the boundary line between the States of California and Nevada; thence in a general easterly and northeasterly direction through the Counties of Washoe, Humboldt, Lander, Eureka and Elko, in the State of Nevada, to a point on the boundary line between the States of Nevada and Utah; thence in a general easterly direction through the Counties of Tooele and Salt Lake, in the State of Utah, to and into Salt Lake City, in said State of Utah—said line of railroad being about 927.3 miles in length.

"II.—A branch line of railroad, having its initial point and connection with said main line at or near Carbona in San Joaquin County, California, and extending thence in a southwesterly and westerly direction to a point near Tesla, Alameda County, California—being about 13 miles in length.

"III.—All terminals and all lands and interests in lands, easements therein and improvements thereon, including, among other things, yards, station and depot grounds, sheds, station houses, freight houses, warehouses, elevators, stock-yards, carhouses, engine houses, oil tanks, water tanks, water supply, shops, hotels,

boarding houses, hospitals, docks, wharves, piers, slips, telephone and telegraph lines and other structures and erections and the appurtenances of all and every of the foregoing, whether or not for use in connection with said or any lines of railroad.

"IV.—All locomotives, motor cars, express cars, dining cars, freight cars, passenger cars; combination cars, work cars and other rolling stock; all ferries, tugs, barges, transfers, lighters, harbor craft and other floating equipment; all machinery, tools and appliances, all electrical generating and transmission and other electrical apparatus and all other equipment, apparatus, appliances and facilities.

"V.—The following shares of stock in other corporations, which are hereby assigned to and simultaneously with the execution hereof are deposited with the Trustees:

995 shares of the par value of $100 each of the capital stock of The Salt Lake City Union Depot and Railroad Company, a Utah corporation, all of the other shares of stock wherein (except 9 shares held by directors)—to wit, 996 shares—are owned or controlled by The Denver and Rio Grande Railroad Company, a consolidated corporation existing under the laws of Colorado and Utah.

4000 shares of the par value of $100 each of the capital stock of Standard Realty and Development Company, a California corporation, being all of the capital stock thereof except 5 shares held by directors.

"VI.—The estates, interests and rights of the Company under any and all leases, leaseholds, rights under leases or contracts, trackage agreements, traffic agreements and operating agreements, and particularly the interests and rights of the Company heretofore possessed by Western Pacific Railway Company (but not including any of the claims or rights against, or with

respect to the property of, The Denver and Rio Grande Railroad Company or any predecessor or successor corporation of, or which originally arose in favor of, holders of the First Mortgage Five Per Cent. Thirty-year Gold Bonds of said Western Pacific Railway Company or of coupons belonging thereto nor any of the proceeds or avails of any such claims or rights whether or not such proceeds or avails shall have been collected or obtained otherwise, in whole or in part, by the use of First Mortgage Bonds or the proceeds thereof unless the same or any part thereof shall hereafter be subjected to the lien hereof by an instrument executed expressly for such purpose) under (1) an agreement, bearing date June 23, 1905, between The Denver and Rio Grande Railroad Company, The Rio Grande Western Railway Company, Western Pacific Railway Company and Bowling Green Trust Company (The Equitable Trust Company of New York being successor thereto), as trustee under the First Mortgage of Western Pacific Railway Company, and (2) an agreement bearing date said last-mentioned day between Missouri Pacific Railway Company and The Denver and Rio Grande Railroad Company; provided, however, that any now existing interest or right of the Company under any lease, agreement or other instrument or contract, which by the terms of a decree of foreclosure and sale entered in a cause pending in the United States District Court for the Northern District of California, wherein The Equitable Trust Company of New York was plaintiff and Western Pacific Railway Company and others were defendants, the Company is entitled to renounce or disaffirm and which pursuant to the provisions of said decree it shall so renounce or disaffirm, shall not be deemed to have been assigned, mortgaged, pledged or otherwise encumbered by this indenture.

"VII.—All and singular the property, interests and rights, (except cash, accounts and bills receivable, traffic and other operating balances and other cash items) not comprised in the descriptions contained in the fore-

going subdivisions of this clause *First* of these granting clauses, which belong to the Company or to which it may be entitled in any manner and which heretofore were owned by Western Pacific Railway Company or to which said company was or its receivers were entitled.

"The lines of railroad, terminals, lands, structures, equipment, shares of stock and other property, interests and rights hereinabove in this clause *First* of these granting clauses described, were formerly the properties, interests and rights of Western Pacific Railway Company or its receivers and were conveyed and assigned to the Company by deed dated July 1, 1916, wherein Francis Krull as Special Master appointed in and by said above mentioned decree of foreclosure and sale is named as party of the first part, said Western Pacific Railway Company as party of the second part, F. G. Drum and Warren Olney, Junior, as receivers of said Western Pacific Railway Company, as parties of the third part, The Equitable Trust Company of New York, as trustee under the First Mortgage of said Western Pacific Railway Company executed to the Bowling Green Trust Company, trustee, as of date September 1, 1903, as party of the fourth part, Central Trust Company of New York, as trustee under the Second Mortgage of Western Pacific Railway Company executed to said Central Trust Company of New York, trustee, and dated July 1, 1908, as party of the fifth part, Franklin V. Spooner, Robert R. Pardow and John C. Rued, as parties of the sixth part, and the Company as party of the seventh part; which deed was executed and delivered to the Company before the execution of this indenture.

"*Second.*—All other lines of railroad, extensions, branches, terminals, lands, structures, equipment, shares of stock, bonds, notes and other securities, claims, franchises, privileges and immunities and other property and estates, interests and rights (whether legal or equitable) now owned by or belonging to the Company, notwithstanding the same or any thereof may not be particularly set forth in these granting clauses.

"*Third.*—Any and all property and facilities of any and every kind and description, including among other things lines of railroad, extensions and branches, telegraph and telephone lines, lines and instrumentalities of water transportation, terminal facilities, equipment, lands, buildings, machinery and tools, stocks, bonds, notes and other obligations and securities and any and all right, title and interest in any of such properties or facilities which may from time to time hereafter be acquired or constructed by or belong to the Company or any successor or purchasing corporation if

(*a*) acquired or constructed by the use of First Mortgage Bonds or proceeds thereof or cash deposited hereunder (except bonds delivered or cash paid out under any of the provisions of this indenture in reimbursement of previous expenditures certified as hereinafter provided) or on account of the purchase, acquisition or construction thereof or work thereon First Mortgage Bonds shall hereafter be authenticated and delivered or the proceeds of First Mortgage Bonds or other cash deposited hereunder shall hereafter be paid out under any of the provisions of this indenture; or

(*b*) consisting of or, if securities, representing property or facilities constituting an integral part or parts of lines of railroad, extensions, branches, or other property subject to the lien of this indenture or some other integral portion whereof is or integral portions whereof are subject to the lien hereof or represented by securities subject to the lien hereof; or

(*c*) consisting of or, if securities, representing property or facilities used or acquired for use in or for the maintenance or operation of or appertaining to any of the lines of railroad, extensions, branches or other property subject, or represented by securities subject, to the lien of this indenture; or

(*d*) consisting of shares of stock in or other securities of said The Salt Lake City Union Depot and Railroad Company or said Standard Realty and Development Company or any subsidiary company or any right,

title or interest which the Company or any successor or purchasing corporation may hereafter acquire in or to any of the property of either of said companies or in or to any line of railroad or other property of any corporation which shall then be or immediately prior thereto shall have been a subsidiary company, as the term 'subsidiary company' is defined in Section 2 of Article Second hereof.

"*Fourth.*—Any and all lines of railroad and other property of whatsoever kind or description, which may include, among other things, stocks, bonds, notes and other obligations and securities and also claims, demands and choses in action of whatsoever kind, from time to time hereafter by delivery or by writing of any kind, for any of the purposes hereof, conveyed, assigned, transferred, mortgaged or pledged by the Company or by any successor or purchasing corporation or by any person or corporation on behalf of any of them or with the written consent of any of them to the Trustees, who are hereby authorized to receive any such property at any and all times as and for additional security hereunder and also when and as hereinafter provided as substituted security hereunder and, except as hereinafter otherwise expressly provided and except with respect to anything which by or under any other of the provisions of this indenture is mortgaged or pledged or agreed to be mortgaged or pledged or to be subjected to the lien hereof as security hereunder, any such conveyance, assignment, transfer, mortgage or pledge may be made subject to any conditions, reservations, limitations and provisions which shall be set forth in an instrument in writing then to be executed by the Company or the person or corporation making such conveyance, assignment, transfer, mortgage or pledge respecting the use, management and disposition of the property constituting such additional security and the proceeds thereof.

"*Fifth.*—All rights of way and other easements; all tunnels, roadbeds, main tracks, double tracks and other additional tracks, spurs, side tracks, turn-outs, switches, turn-

tables; all superstructures, bridges, viaducts, stringers, ties, rails, frogs and bolts; all fences, telegraph and telephone lines, poles, wires, block signals and instruments; all terminal facilities; all wharves, docks, slips, piers, floats, loading and unloading apparatus and landings; all steamships, tugs, ferries, barges, lighters and other floating equipment; all passenger stations, freight houses, warehouses, elevators, power houses, coal houses, oil tanks, car-houses, engine houses, machine shops and other shops and structures; all water stations, water tanks and water supplies; all locomotives, tenders, motor cars, express cars, postal cars, dining cars, baggage cars, passenger cars, combination cars, work cars, freight cars and other rolling stock and equipment; all machinery, apparatus, tools, implements, appliances, furniture, material and supplies; all land used or designed for way-grounds, terminals, yards, stations, depots, warehouses or other structures or facilities; all other property of every description and all rights and interests in or with respect to the use of property; provided that the foregoing or any thereof, whether now owned by the Company or at any time hereafter acquired by it or any grantee, successor or purchasing corporation, shall be appurtenant to or used or held for use as, or as a part or as parts of, or to facilitate or safeguard the maintenance or operation of, any lines of railroad, extensions, branches, telegraph or telephone lines, lines of water transportation, terminal facilities or other properties now or at any time hereafter subject to the lien of this indenture—whether the same exclusively appertain to or be used as parts of or in or for the maintenance or operation of lines of railway or other properties subject to the lien hereof or appertain to or be so used as parts of or in or for the maintenance or operation of such lines of railroad or other properties in common with lines of railroad or property not subject to the lien hereof; also all corporate and other rights, franchises, privileges and immunities now appertaining or hereafter to appertain to or used or held for use in or for the maintenance or operation of any such lines of railroad or other property now or at any time hereafter subject to the lien of this indenture, whether

the Company now owns or it or any successor or purchasing corporation hereafter shall acquire any such rights, franchises, privileges or immunities; also any and all replacements, renewals, improvements and betterments of and additions to any such lines of railroad or any property or rights of whatsoever description now or at any time hereafter subject to the lien of this indenture, whensoever and by whomsoever such replacements, renewals, improvements, betterments or additions may be made.

"*Sixth.*—All and singular the estates, rights, titles, interests, possession, claims and demands, whatsoever, as well at law as in equity, of the Company and of any successor or purchasing corporation of, in or to any of the lines of railroad, extensions, branches, telegraph and telephone lines, lines of water transportation, terminal facilities, equipment, lands and other properties, hereditaments, appurtenances, rights, franchises, privileges and immunities hereby conveyed, assigned, mortgaged or pledged or intended to be conveyed, assigned, mortgaged or pledged or now or at any time hereafter subject to the lien of this indenture and every part and parcel thereof, and all and singular the rents, issues, tolls, profits and other income of all and every part of the property of whatsoever kind or description hereby conveyed, assigned, mortgaged or pledged or intended to be conveyed, assigned, mortgaged or pledged or now or at any time hereafter subject to the lien of this indenture.

"But nothing express or implied in this indenture shall be construed to limit the right or power of the Company or any successor or purchasing corporation, which right and power is hereby expressly reserved, by the use of its credit or free funds or by the use of First Mortgage Bonds delivered to the Company or any successor or purchasing corporation as in this indenture provided to reimburse the Company or any such successor or purchasing corporation for expenditures theretofore actually made out of its free funds, to construct or acquire free from the lien hereof lines of railroad, extensions or branches or interests therein, equipment, stocks, bonds or other securities or other prop-

erty, rights, franchises, immunities or privileges provided the same shall not be lines of railroad, extensions, or branches or interests therein, equipment, stocks, bonds or other securities, or other property, rights, franchises, immunities or privileges (*a*) on account of the purchase, acquisition or construction whereof or work whereon First Mortgage Bonds shall be authenticated and delivered or their proceeds or other cash deposited hereunder shall be paid out as herein provided; or (*b*) consisting of, or if securities representing, property or facilities constituting an integral part or parts of lines of railroad, extensions, branches or other property subject to the lien of this indenture or some other integral portion whereof is or integral portions whereof are subject to the lien hereof or represented by securities subject to the lien hereof; or (*c*) consisting of or, if securities, representing property or facilities used or acquired for use in or for the maintenance or operation of appertaining to any of the lines of railroad, extensions, branches or other property subject, or represented by securities subject, to the lien of this indenture; or (*d*) consisting of shares of stock in or other securities of said The Salt Lake City Union Depot and Railroad Company or said Standard Realty and Development Company or any subsidiary company or of any right, title or interest which the Company or any successor or purchasing corporation may acquire in or to any of the property of either of the companies above named or in or to any line of railroad or other property of any corporation which shall then be or immediately prior thereto shall have been a subsidiary company as the term subsidiary company is defined in Section 2 of Article Second hereof; and the Company may, unless First Mortgage Bonds shall have been authenticated and delivered or their proceeds or other cash deposited hereunder paid out against the same, purchase and acquire equipment, free from the lien hereof, by lease, conditional sale agreement or under any form of equipment trust, or purchase such equipment and issue obligations therefor secured by mortgage or pledge of such equipment superior to the lien of this indenture.

"To Have and to Hold the premises, railways, properties, securities, rights, franchises, estates and appurtenances hereby conveyed or assigned or intended to be conveyed or assigned unto the Trustees, their successors in the trust and assigns forever.

"Subject, However, as to all equipment now owned to the equipment trust or conditional sale agreements secured thereon, and as to equipment hereafter acquired, to the equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby, and as to any property hereafter acquired by the Company or by any successor or purchasing corporation and becoming subject to the lien of this indenture, to any liens thereon existing at the time of such acquisition and not expressly prohibited by the terms of this indenture.

"But in Trust Nevertheless for the equal and proportionate benefit and security of all present and future holders of the First Mortgage Bonds and coupons and for the enforcement of the payment of said bonds and coupons when payable and the performance and observance of and compliance with the covenants and conditions of this indenture, without preference, priority or distinction as to lien or otherwise of one bond over any other bond by reason of priority in the issue, sale or negotiation thereof, or the purpose of its issue, so that each and every bond hereby secured shall have the same right, lien and privilege under and by virtue of this indenture and, subject to the terms hereof, be equally and proportionately secured hereby, as if all of the First Mortgage Bonds had been made, executed, authenticated, delivered and negotiated simultaneously with the execution and delivery of this indenture, it being intended that the lien and security of this indenture shall take effect from the date of the execution and delivery hereof without regard to the time of the actual issue, sale or negotiation of said bonds as though upon said date all of said bonds were actually authenticated, issued, sold and delivered and were in the hands of holders in due course."

Appendix B.

OPINION OF COURT ON EXCEPTIONS TO MASTER'S REPORT ON EQUIPMENT LIEN CONTROVERSY.

(FILED OCTOBER 31, 1939.)

IN THE

DISTRICT COURT OF THE UNITED STATES

FOR THE NORTHERN DISTRICT OF ILLINOIS,

EASTERN DIVISION.

IN THE MATTER of THE CHICAGO, ROCK ISLAND AND PACIFIC RAILWAY COMPANY, *Debtor.*	No. 53209.

ON EXCEPTIONS TO THE MASTER'S REPORT ON EQUIPMENT LIEN CONTROVERSY.

WILKERSON, *District Judge:*

The reorganization petition herein was filed on June 7, 1933. The Supreme Court of the United States, affirming the injunctional orders of this court against suits by creditors, on April 1, 1935, said:

> "Not only are those who institute the proceeding and those who carry it forward bound to exercise the highest degree of diligence, but it is the duty of the court and of the Interstate Commerce Commission to see that they do. Proceedings of this character, involving public and private interests of such magnitude, should, so far as practicable, be given the right of way both by the court and by the commission, to the end that they may be speedily determined." (*Con-*

tinental Bank v. *Rock Island Railway*, 294 U. S. 648, 685.)

On August 6, 1935, the court entered an order requiring the debtor to show cause why it should not be required to file a reorganization plan by November 1, 1935. The debtor, on September 16, 1935, invoked the Act of Congress of August 27, 1935, amending paragraph 77(d) of the Bankruptcy Act and requested additional time for filing the plan. The court discharged the rule to show cause and granted extensions for filing the plan from time to time until July 15, 1936. On that date a plan was filed by the debtor with the Interstate Commerce Commission. The hearings on the plan have proceeded before the commission and on September 22, 1939, the examiner appointed by the commission filed a report to the commission which contains recommendations for a plan. The hearing on the report is to be had before the commission on December 7, 1939.

On May 24, 1937, while the hearing on the plan was proceeding before the commission, the mortgage trustees and protective committees representing the general gold bond mortgage and the first and refunding mortgage of the debtor filed their petition for an order "declaring the rights and other legal relations of the parties" with reference to certain equipment mentioned in the petition. Answers were filed by the railway company, by protective committees representing Choctaw, Oklahoma and Gulf mortgage bonds, Rock Island, Arkansas and Louisiana mortgage bonds, and St. Paul and Kansas City Short Line mortgage bonds, by trustees under most of the mortgages, and by the Reconstruction Finance Corporation.

The propriety of a hearing by the court before the commission had concluded its hearings on the plan and had reported to the court was not questioned by any of the parties. The petitions did not refer to any provisions of the act relating to the reorganization of railroads which authorized or required the court to hold such a hearing

before the commission had passed upon the questions relating to the reorganization plan.

On July 27, 1937, an order was entered referring the petition to a special master for hearing and report upon facts and law. The report of the special master was filed on April 4, 1939. Exceptions to the report were duly filed and were heard by the court on July 24, 1939.

In the order of reference the equipment involved is called "disputed equipment", which the order defines as equipment owned by the principal debtor at the time of the filing of the original petition of the principal debtor herein and not since retired, and which has been used indiscriminately over the lines operated by the trustees of the principal debtor, except:

> (a) equipment specifically pledged or allocated by the principal debtor on its present records under any of the principal debtor's own mortgages;
>
> (b) equipment acquired by the principal debtor from the Burlington, Cedar Rapids and Northern Railway Company; and
>
> (c) equipment acquired through the use of any of the mortgage bonds of the principal debtor or of any of its subsidiary companies or the proceeds of any such bonds;

and shall not include any equipment allocated by the principal debtor on its present records to any of its subsidiary companies, or any equipment used exclusively on any mortgaged or leased line, but shall include the right, title and interest of the principal debtor and/or trustees of the principal debtor in and to the equipment subject to the principal debtor's equipment trust agreements.

The questions at issue relate to the proper construction of mortgage provisions and provisions in leases in so far as they may relate to a lien upon or property interest in any portion of the "disputed equipment", and the proper method or measure of determining the extent of any lien upon or property interest in the "disputed equipment" which the mortgage trustee or the lessor under

a lease, as the case may be, may have under any such instruments.

The lease provisions that are pertinent relate to replacement of equipment worn out or no longer fit for service, and equipment added to the leased property and referred to in the lease as additions and betterments. The mortgage provisions that are pertinent relate to replacement of equipment worn out or no longer fit for service and which was subject to the mortgage lien, and to so-called "after acquired" equipment.

The questions involved are difficult and complicated and the answers to them in some instances are not free from doubt. The master has made a report in which he has analyzed the provisions in question and has stated fully and ably his reasons for the construction which he places upon them. The court is asked to rule upon the exceptions to the master's report and to enter an order declaring the rights of the respective parties with reference to the equipment in question.

Before considering the questions presented by the pleadings and the report we should look into the nature of this proceeding and inquire into the scope of the order which the court properly may make concerning matters which are involved in the reorganization plan while the hearings on the plan are being held by the commission and before the commission has made its report on the plan to the court.

The duty and authority of the commission and the court in reorganization proceedings must be found in the statute. The proceeding is not a bankruptcy although an amendment to the Bankruptcy Act creates and regulates the remedy. (*Louden* v. *Northwestern National Bank*, 298 U. S. 160, 163, 164.)

The court is charged with the responsibility for the operation of the business and the conservation of the assets while the reorganization proceeding is pending. The court is charged with the duty of requiring the debtor and trustees to file schedules and submit information necessary to disclose the conduct of the debtor's affairs and the fair-

ness of any proposed plan, and of directing the preparation of lists of bondholders, stockholders and creditors. The court is required to fix a time within which claims may be filed, and for the purposes of the plan and its acceptance to make a classification of creditors and stockholders according to the nature of their respective claims and interests. Section 77(c)(7) provides that while the trustee under any mortgage, deed of trust or indenture may file a claim in behalf of all securityholders thereunder, such trustee may not be the representative of such holders for the purpose of accepting or rejecting any plan of reorganization.

The initial proceedings with reference to the reorganization plan are placed exclusively within the control of the commission. At the hearings before the commission all interested parties are entitled to be heard. Section 77(d) expressly provides that "no plan shall be approved or confirmed by the judge in any proceeding under this section unless the plan shall first have been approved by the commission and certified to the court".

When the plan is certified all parties in interest are entitled to be heard by the court upon the question of its fairness, and, as has been pointed out above, trustees may not represent the owners of securities issued under their respective trust deeds at that hearing.

It is not necessary to decide whether or not a determination by the court of the conflicting claims to the equipment in question could be made binding upon those who have joined in submitting their claims to the court at this time. There are so many parties in interest entitled to be heard on the fairness of the plan who have not joined in this application and who would not be bound by the court's decision that whatever the court might now decree would have to be re-examined in the light of the plan when certified, and the objections thereto. The court may not pass upon a plan piecemeal, nor has it the authority in advance of the certification of a plan by the commission to bind all interested parties by finally adjudicating controversies between some of the interested parties which

may be presented when the plan is before the court for approval or disapproval.

The reorganization proceedings may be dismissed, in which case the title to the estate reverts to the debtor with the rights of all parties unimpaired except as they may have been changed by the judgment of the court upon such matters as the court is expressly authorized by the statute to adjudicate during the pendency of the proceeding.

However, there has been a long hearing before the master in accordance with the directions of the order of reference, and the objections to the report of the master have been heard by the court. It is proper that the court should give its conclusions upon the controversies stated in the order of reference and the master's report. Those findings are necessarily interlocutory in their character. They are in no way binding upon the commission in framing a plan to be certified to the court. They are not binding upon any of the parties at the hearing on the plan. They cannot affect the rights of any of the parties if this proceeding is dismissed and creditors are obliged to seek redress in other forums. The most that can be said for them is that this preliminary and tentative ruling may furnish a basis for discussion at the hearing on the plan and may tend to expedite the court proceedings.

If decisions on the matters in controversy are necessary to a ruling on the fairness of the plan when it is before the court, final ruling will be made at that time in connection with the order concerning the plan. It is possible that a plan may be presented as to the fairness of which some or all of the matters covered by the master's report may not be relevant.

With the foregoing limitations as to their effect, the court states its findings as follows:

The main controversies here grow out of conflicting constructions placed upon certain provisions of the general and first and refunding mortgages relating to the lien of the mortgages upon after acquired equipment.

When the general mortgage was executed, January 1, 1898, the lines of railway then in operation consisted

of 3500 miles. When the petition for reorganization was filed June 7, 1933, the mileage had increased to more than 8000 miles. It is clear from the language of the mortgage that the parties to it contemplated new branches, extensions and the addition of leased lines, and that is what actually occurred. The lines of the railway company then and since have been operated as a single system of railway lines, and in practice at least the equipment later acquired was put to indiscriminate use on all parts of the system lines.

The mortgages in question, so far as they deal with after acquired equipment, are not drafted with that degree of certainty and precision which one would expect to find in documents of that character. The intention of the parties is not embodied in any clear-cut, definite provision; but must be ascertained by patching together and interpreting several sections, each of which makes some reference to equipment acquired after the execution of the mortgages. The security holders under the mortgages contend for an interpretation which makes a large part of the after acquired equipment subject to the liens of their mortgages. Interests junior to the mortgages contend for an interpretation which limits materially the rights of the mortgages in after acquired equipment.

The problem presented to the court is to determine the intention of the parties by analyzing all of the mortgage and lease provisions that may be relevant, in the light of the purpose of the parties and the means adopted to accomplish such purpose.

The order of reference excludes consideration with respect to liens upon or property interest in specific units of equipment, or with respect to what specific units of equipments fall within the category of "disputed equipment". In view of the pending reorganization proceedings, and subject to the limitations placed upon the findings herein, a determination of the rights of the parties herein may be stated in terms of the value of such rights.

General Gold Bond Mortgage:

The introductory paragraph to the several granting clauses conveys to the trustee in trust the railways "now owned or leased", together with "other property now held * * * or hereafter acquired * * *, and being a part of or appurtenant to or provided for use upon any such railway."

This is followed by two granting clauses which describe the main lines and branches of said railway.

Granting clause THIRD consists of three parts: (1) lands such as road beds, station grounds and yards, "now held * * * or hereafter acquired * * *, and appertaining to or provided for use in connection with" said railway; (2) buildings and structures, such as bridges, depots, warehouses, engine-houses, shops and other structures, and tracks, "now held * * * or hereafter acquired * * *, and appertaining to any of said railways"; and (3) personal estate, such as tools, machinery, supplies, locomotives, cars and other rolling stock, and equipment, "now held * * * or hereafter acquired * * *, and appertaining to or provided for use upon" said railway.

Article Six, section 2, provides:

> "While in possession of the mortgaged premises the Railway Company shall * * * have full power, in its discretion, from time to time, to dispose, free from the lien of this indenture, of any portion of the * * * rolling stock, or equipment embraced within this indenture, which may have become unfit for such use, replacing same by, or substituting for the same, new * * * rolling stock, or equipment, which shall become subject to the first lien of this indenture."

Obviously, equipment later acquired and used for the purpose stated in Article Six, section 2, would be equipment "hereafter acquired * * * and appertaining to or provided for use upon" said railway, as set forth in Granting Clause THIRD.

The indenture, dated January 1, 1898, was to continue in effect until January 1, 1988, or for a period of 90 years.

The equipment in existence when the indenture took effect would become unfit for use or obsolete long before the maturity date. There is no doubt the parties understood when the indenture was executed that such equipment and rolling stock would have to be replaced several times within a period of 90 years if the railway were to continue as a going concern.

To dispose of something is to divest oneself of possession. This may be done by sale, gift or destruction of the article if no longer useful. In the case of railway equipment, the usual method is to dismantle the equipment and sell or reuse the salvage. The discretion lodged in the railway company by the provision quoted was the authority to determine from time to time when any equipment had become unfit for use.

The paragraph quoted above did two things: (1) It empowered the railway company to sell or dismantle any rolling stock or equipment that no longer was fit for service, free from the lien of the indenture, and (2) it placed upon the railway company the duty to acquire other rolling stock or equipment to take its place, which then became subject to the first lien of the indenture. By so doing it was intended that the mortgage security with respect to rolling stock and equipment should remain unimpaired throughout the term of the indenture. Rolling stock and equipment, so acquired by the railway company to replace original equipment or to replace rolling stock or equipment which itself had been acquired for replacement purposes, would come within the mortgage description (Granting Clause Third) of rolling stock or equipment "hereafter acquired * * *; and appertaining to or provided for use upon" said railway.

Assuming that the railway company discharges its duty to maintain unimpaired the mortgage security with respect to rolling stock and equipment by replacing each unit no longer fit for service, and that it acquires with its own funds or by other means independently of the mortgage additional rolling stock or equipment which may be used upon the railway subject to the mortgage, is such addi-

tional equipment subject to the mortgage lien? This will depend upon the intention of the parties as expressed by the language used by them in the indenture.

Granting Clause THIRD, as noted above, conveys to the mortgage trustee all locomotives, cars and other rolling stock and equipment "now held * * * or hereafter acquired * * *, and appertaining to or provided for use upon" said railway. On its face, this language, if not qualified by other language in the indenture, would seem to be broad enough to include additional rolling stock or equipment of the kind defined in the preceding paragraph. But, at the end of Granting Clause FOURTH, a proviso will be noted that may materially qualify or circumscribe the broader language in Granting Clause THIRD. Before discussing this proviso, that part of Granting Clause FOURTH that precedes the proviso may be noted, and the rule remembered that the essential function of a proviso is to limit or qualify something previously expressed. Granting Clause FOURTH relates to "all other property" or property not subject to the mortgage lien, which the mortgagor may, if it should so elect, convey to the mortgage trustee "as and for additional security". Thus it is recognized and conceded that the mortgagor may acquire and hold other property not conveyed to the mortgage trustee by the granting clauses of the indenture. The nature of such other property, that later may be acquired by the mortgagor, is described in the proviso at the end of Granting Clause FOURTH. The proviso reads:

> "And *Provided*, further, that nothing in this indenture contained shall be construed to limit the right or power of the Railway Company, hereby expressly reserved, to own and hold, or in any manner, except by the use of bonds secured by this indenture, to construct or to acquire, by purchase or by lease, other lines of railway, branches or extensions, *or* equipment or interest therein, *or* new terminals, and to hold and to dispose of, any line or property so acquired, and to retain the proceeds thereof free from the lien of this indenture."

It may be noted here that the words "or property so acquired" obviously apply to and include "equipment", appearing in a preceding line of the proviso. And it may be noted that equipment later acquired by the use of bonds secured by the mortgage is to be subject to the mortgage lien.

It is said that the words "or equipment or interest therein", although the proviso itself discloses no qualification, must be held to relate only to equipment that does not appertain to or is not provided for use upon the railway lines subject to the mortgage; that the words should be qualified by implication so that they will refer only to equipment acquired by the railway company as a part of or for use upon "other lines of railway, branches or extensions" not subject to the mortgage. Under said proviso the railway company is permitted with its own means to acquire other lines of railway, and to hold such lines of railway free from the lien of the indenture. A line of railway without equipment could not be held to be a complete railway; it would be so many acres of land, and so many tons of steel rail. With equipment with which to operate, it would be a completed unit as a railway. Therefore, the words "other lines of railway" would appear to be sufficient in themselves to include equipment, and to negative the assertion that the words "or equipment or interest therein" as used in the proviso must be limited in their meaning to equipment acquired as a part of such other line or lines of railway. Further, if the parties considered it necessary to make specific mention of equipment in connection with purchase of "other lines of railway", it is reasonable to believe that the conjunctive and not disjunctive would have been used. They would have said "other lines of railway *and* equipment". The words are "other lines of railway * * * or equipment". The use of the word "or" in the proviso would mean that the railway company might purchase on its own credit another line of railway together with the equipment thereon, or that it might purchase the equipment without purchasing the right of way. If it purchased only the equipment, then

such equipment would appear to be within the proviso and excluded from the mortgage lien. If equipment purchased from another line of railway without purchase of the right of way would not be subject to the mortgage lien, then equipment purchased elsewhere with free money should not be held to be subject to the lien.

The proviso specifically mentions "or new terminals" as property which the railway company may acquire with its own funds free from the mortgage lien. If the meaning of the proviso, which has been advanced, is to be applied to the case of new terminals, then only "new terminals" on other lines of railway acquired with free money could be constructed free from the mortgage lien. But if the "other line of railway" may be acquired with free money without becoming subject to the mortgage lien, why include in the proviso "new terminals" on such other line? It would seem that such new terminals would be free from the mortgage lien for the same reasons that the new line itself would be free from the lien. It is necessary to look elsewhere for the place to apply the words "or new terminals", and apparently such other place would be the lines of railway that are subject to the indenture.

It is noted that the proviso in all of its parts employs the conjunction "or" and not "and". The word "and" means joining together. The word "or", when attached to an object, implies an object the acceptance of which excludes all other objects. Thus it would appear that under the proviso the railway company is permitted with its own funds to acquire other lines of railway free from the mortgage lien, or that under the proviso the railway company is permitted to acquire with its own funds branches or extensions free from the mortgage lien, or that under the proviso the railway company is permitted with its own funds to acquire equipment or interest therein free from the lien of the mortgage, or that under the proviso the railway company is permitted to acquire with its own funds new terminals free from the lien of the mortgage. Nowhere in the proviso is there any restriction

on or qualification of the permissive right to do any one of the enumerated acts independently of the others.

The railway company is required by the indenture to acquire with its own funds new equipment to replace equipment no longer fit for use. It is stated that the equipment in existence at the date of the indenture, and which became subject to the mortgage lien, constituted 18,831 units. During 90 years most of this equipment would have to be replaced several times. It is likely that under its covenant to replace, the railway company would be obliged to acquire with its own funds 50,000 units. These replacement units would constitute equipment "hereafter acquired * * * and provided for use upon" said railway under Granting Clause THIRD, and as such they would become subject to the lien of the mortgage. Equipment acquired by the railway with its own funds in addition to equipment acquired for replacement should be held to be free from the mortgage lien by virtue of the right reserved to the railway company under the proviso in Granting Clause FOURTH.

Attention is called to Article Two, section 2, of the indenture, which obligates the railway company, when required by the mortgage trustee, to convey to the trustee all real and personal estate acquired by the railway company as appertaining to, or for the use of, the railway subject to the mortgage. Section 2 then provides:

> "But nothing in this indenture expressed or implied is intended or shall be construed, to limit the right or power of the Railway Company, hereby expressly reserved, in any manner, except by the use of bonds secured by this indenture, to construct, or to acquire, and to own and hold, other lines of railway, or branches or extensions, or interest therein, or other property, free from the lien hereof."

The words "other property" mean property that is not subject to the mortgage. If, under the proviso of Granting Clause FOURTH, equipment purchased by the railway company with its own funds in addition to that which

is necessary for replacements is free from the lien of the mortgage, the mortgage trustee is not empowered to demand a conveyance of any such equipment.

If the parties intended that only after-acquired equipment, obtained by the railway company on its own credit for use upon lines of railway not subject to the mortgage, should be excluded from the mortgage lien, there was no reason why that intention could not have been stated in clear and unmistakable terms. The intention should not be left to be determined by conjecture or inference if two provisions or clauses, not harmonious on their face, can be reconciled by allocating to each a separate field of operation that will not be in conflict with the other. That result follows by a determination that the after-acquired property clauses apply to equipment later acquired to replace equipment no longer fit for service, and equipment acquired by the use of general mortgage bonds; and that equipment later acquired by the railway company on its own credit, without further qualification, is not subject to the mortgage lien.

The General Gold Bond Mortgage is entitled to credit against the "disputed equipment" for (1) so much of said equipment as was necessary on June 7, 1933, to replace any of the original equipment; (2) so much of said equipment as was necessary on that date to replace equipment acquired by the use of general mortgage bonds; (3) so much of said equipment as was necessary on that date to replace original equipment that was subject to a subordinate lien under the indenture, but which later became subject to a first lien under the indenture when a prior lien was discharged; and (4) such part as of June 7, 1933, of the equity of the railway company under then existing equipment trusts as might have been necessary on that date to satisfy clause (1), clause (2) and clause (3) in this paragraph.

First and Refunding Mortgage:

This indenture is dated April 1, 1904. Granting Clause FIRST describes (1) the lines of railway then owned

and leasehold interests then held by the railway company, subject to certain existing mortgages therein described; (2) certain rolling stock and equipment consisting of 5,823 units upon which the mortgage is a first lien; and (3) defined classes of appurtenances of the railways previously described, such as telegraph lines, rights of way, depot grounds, switches, bridges, rails, terminal properties, warehouses, engine-houses, water tanks, machine shops, engines, cars and other rolling stock and equipment "appurtenant to any of said lines of railway and branches above described". It is stated that at the date of this mortgage the railway company was in possession of 39,500 units of equipment. Granting Clause SECOND of the indenture places under the mortgage lien "any and all * * * rolling stock and other equipment * * * which, from time to time, in the manner hereinafter provided, shall be purchased, acquired or constructed by the use of any of the bonds secured by this indenture except bonds issued or to be issued under the provisions of sections 2 and 3, or either of them, of Article ONE of this indenture."

Article FOUR, section 8, of the indenture provides that all locomotives, tenders, cars and other equipment upon which the indenture "shall be or become" a first lien shall be marked to distinguish such equipment from other equipment; that the railway company will maintain "such" equipment in good order and condition, reasonable wear and tear excepted; that whenever "such" equipment shall be worn out or destroyed the railway company will cause the same to be replaced by other equipment of at least equal value upon which the indenture shall be a first lien. Article NINE, section 1, contains a further provision which appears to be patterned after Article SIX, section 2, of the General Gold Bond Mortgage. The provision reads:

> "The Railway Company from time to time, while in possession of any of the property subject to this indenture, also shall have full power in its discretion to dispose of any portion of the machinery, equipment and implements, at any time subject to the lien hereof, which may have become unfit for such use, replac-

ing the same by new machinery, equipment or implements, of equal value, which shall become subject to this indenture. In no event shall any purchaser or purchasers of any property sold or disposed of under any provision of this article be required to see to the application of the purchase money."

The indenture imposed a duty on the railway company to replace from time to time the 5,823 units of equipment specified in Granting Clause First, VII, upon which the indenture was a first lien. Also, it imposed a duty on the railway company to replace equipment upon which the lien of the indenture was subordinate to any prior mortgage, such duty beginning as of the date when any such prior mortgage was paid off or otherwise discharged. Granting Clause First, VIII, applied to all equipment appurtenant to the lines of railway subject to the mortgage lien. Thus the indenture became a second lien upon that part of the equipment that was subject to then existing prior liens. Upon removal of any such prior lien the indenture became a first lien on such equipment. And for the reason that equipment acquired by the railway company by the use of mortgage bonds became subject to the indenture as a first lien thereon, if issued under sections 4, 5 and 6 of Article One, a duty was imposed to replace such equipment when no longer fit for service.

Other equipment acquired by the railway company not required for replacement purposes may be designated, for convenience, additional equipment. Does the indenture subject such additional equipment to the mortgage lien?

It is claimed that Granting Clause First, VIII, subjects such additional equipment, later acquired, to the mortgage lien. The grant of the railway property itself is found in Granting Clause First. This clause is separated into three general divisions: *First*, the fixed property comprising railway lines; *Second*, rolling stock specifically enumerated; and *Third*, appurtenances. The third division mentioned is

Granting Clause First, VIII, and bears the heading "Appurtenances". Under that heading what are deemed to be appurtenances are named or defined. The list is too long to be repeated here, but it includes such property as telegraph wires, roadbeds, turnouts, rails, terminals, warehouses, engine houses, shops, tools, furniture, *engines and cars*, tolls, earnings, and estate, right, title, interest, property, possession, claim and demand of the railway company in and to the mortgaged lines. Being included as appurtenances, the terms "estate, title or interest of the Railway Company in and to the mortgaged lines" appear to be used in the sense of legal rights or demands affecting the property conveyed to the mortgage trustee as distinguished from the physical property itself. Then follows the language in dispute, which is added at the end of the paragraph defining "Appurtenances". It reads:

> "* * * with the appurtenances * * * appertaining or hereafter to appertain thereto * * *"

Appertaining to what? The natural construction would be that the word "thereto" necessarily refers to the property described in the preceding part of the paragraph, as set forth above. Under this construction the "appurtenances * * * appertaining or *hereafter* to appertain thereto" would be appurtenances of or to the items of property named or defined in said Granting Clause First, VIII, including appurtenances "hereafter to appertain" to "engines, tenders, cars and other rolling stock." They would not include the engines or cars themselves, later acquired. At any rate, it may not be said that the words "appurtenances * * * appertaining or hereafter to appertain thereto" are so definite and direct in their application as to exclude the meaning that the appurtenances referred to are those connected with the objects described in Granting Clause First, VIII, such as engines, cars and other rolling stock.

Granting Clause Second of the indenture pledges "any and all lines of railway, extensions and branches * * *,

and any and all terminal properties, shops, machinery, tools * * *, rolling stock and other equipment * * *, which from time to time * * * shall be purchased, acquired or constructed by the use of any bonds secured by this indenture except bonds issued under the provisions of sections 2 and 3, or either of them, of ARTICLE ONE". Any of the aforesaid properties acquired by the use of bonds issued under the provisions of sections 4, 5 and 6, or any of them, of Article ONE would be subject to the mortgage lien, but not so if acquired by the use of bonds issued under sections 2 or 3. If the parties intended that the *additional* equipment as defined above was to become subject to the lien of the mortgage, why did they exclude from Granting Clause SECOND "rolling stock and other equipment" acquired by bonds issued under the provisions of sections 2 and 3 of Article ONE? The inference here would be that rolling stock and equipment acquired by the use of bonds issued under sections 2 and 3 would be free from the mortgage lien. It may be urged that equipment, referred to in Granting Clause SECOND, acquired by the use of bonds issued under sections 2 and 3, was to be equipment acquired for use upon new lines or extensions acquired by the railway company on its own credit. But Granting Clause SECOND contains no such restriction as to where equipment acquired by the use of bonds is to be used. On its face the language seems clear enough. It must mean that equipment acquired by the use of bonds issued under sections 2 and 3 is to be free from the mortgage lien whether acquired for use on new lines or extensions or on the lines of railway granted to the mortgage trustee, and that if acquired by the use of bonds issued under sections 4, 5 or 6 it is subject to the mortgage whether acquired for use on new lines or extensions or on the lines of railway granted to the mortgage trustee by Granting Clause FIRST of the indenture.

Granting Clause THIRD conveys to the mortgage trustee any and all additions and betterments "now or hereafter acquired" in connection with any of the lines of railway subject to the mortgage, and "any and all prop-

erty, real or personal, of every kind and description" acquired for use upon such lines of railway. It is claimed that "all property, real or personal," acquired for such use should be construed to include the *additional* equipment. If that is proper, then it would follow that *additional* equipment acquired for such use by the issuance of bonds under sections 2 and 3 of Article One of the indenture would be subject to the mortgage lien. But Granting Clause Second provides that rolling stock and other equipment acquired by the use of bonds issued under sections 2 and 3 shall be free from the lien of the mortgage. This seeming conflict would be resolved if the words "all property, real or personal" were to be applied, so far as equipment is concerned, to equipment acquired for replacement purposes and equipment acquired by the issuance of bonds under sections 4, 5 and 6, or either of them, of Article One. If there be uncertainty in this respect, it may perhaps be avoided by what has been called "the free property clause" immediately following Granting Clause Third of the indenture.

The so-called free property clause provides:

> "But nothing expressed or implied in this indenture is intended, or shall be construed, (a) to limit the right or power of the Railway Company, hereby expressly reserved, by the use of its credit, or by the use of bonds issued or to be issued under the provisions of Sections 2 and 3, or either of them, of Article One of this indenture, or in any manner other than by the use of bonds issued or to be issued under the provisions of Sections 4, 5 and 6, or any of them of Article One of this indenture, or their proceeds, to construct or acquire lines of railway, branches or extensions, or interests therein, or other property, free from the lien hereof; or (b) to subject to the lien of this indenture any hereafter acquired property of the Railway Company * * * other than as *expressly* granted in the Granting Clause of this indenture, which shall be purchased, constructed or acquired in any manner other than by the use of bonds issued or to be issued under the provisions of Sections 4, 5 and 6, or

any of them, of Article ONE, of this indenture, or their proceeds."

Thus the railway company is permitted to acquire, by use of its own credit, or by use of bonds issued or to be issued under sections 2 and 3 of Article ONE, "lines of railway, branches or extensions, or interests therein, *or other property*," free from the mortgage lien. It is asserted that the words "property, real or personal", in Granting Clause THIRD should be construed to include after-acquired equipment. If that meaning be accepted, then no reason is shown why the word "property" in the free property clause should not be construed to include after-acquired equipment. The free property clause provides three modes of acquisition:

(1) acquisition by use of railway company credit,

(2) acquisition by use of bonds issued under sections 2 and 3 of Article ONE, and

(3) acquisition in any other manner than by use of bonds issued under sections 4, 5 and 6 of Article ONE.

These three modes of acquisition are coordinate and of equal force, from which it must follow that "lines of railway, branches or extensions, or interests therein, *or other property*," will be free from the mortgage lien if acquired in any one of these modes. To be specific, equipment acquired by the railway company on its own credit would be free from the mortgage lien to the same extent as equipment acquired by the use of bonds issued under sections 2 and 3 of Article ONE. Such exclusion from the mortgage lien would exist in both cases, or it would not exist in either case. That it exists in the case of equipment acquired by the use of bonds issued under sections 2 and 3 of Article ONE may not be questioned. For the same reason the exemption must be held to exist in the case of equipment acquired by the railway company on its own credit. It is reasonable to believe that the free property clause

was intended by the parties to complement the scope of Granting Clause SECOND so as to include *all* after-acquired lines of railway, extensions and branches or other property, a part of which was to be subject to the mortgage lien if acquired by use of bonds issued under the mortgage except bonds issued under sections 2 and 3 of Article ONE, and the other part not subject to the mortgage lien if acquired in any other manner. There is no reason to suppose that the parties intended that the words "or other property" appearing in the so-called free property clause should have any different meaning than the description of the property listed in Granting Clause SECOND; and that description specifically names "rolling stock and other equipment".

But the suggestion is made that the words "or other property" in the free property clause, if those words include equipment, should be construed to include only that equipment, acquired by the railway company with free money, that is purchased for use on other lines of railway, branches or extensions that have been acquired with free money, and are not, therefore, subject to the mortgage lien. No such limitation or restriction is to be found in the free property clause. The suggestion mentioned has been advanced to support the claim that equipment acquired with free money, for use on railway lines subject to the mortgage, is subject to the mortgage lien; in other words, that such equipment constitutes after-acquired property which the mortgage has subjected to the mortgage lien.

The free property clause provides that nothing therein shall be construed to subject to the lien of the indenture "any hereafter acquired property of the Railway Company, * * * other than as *expressly* granted in the granting clause of this indenture, which shall be purchased, constructed, or acquired in any manner other than by use of bonds issued or to be issued under the provisions of Sections 4, 5 and 6, or any of them, of ARTICLE ONE of this indenture". Can it be said that after-acquired rolling stock and equipment is *expressly* granted in any of the

granting clauses of the indenture? The only description of after-acquired rolling stock and equipment to be found in the indenture, other than that applied to engines and cars acquired by the use of bonds issued under the indenture, is concentrated in the word "appurtenances" at the end of Granting Clause FIRST, VIII, and the words "property, real or personal," appearing in Granting Clause THIRD. The words "expressly granted" can mean only that the objects granted are directly and distinctly named or described—where identification of the objects is not dependent upon implication or inference. The word "appurtenances", or the words "property, real or personal", are far more comprehensive. The word "appurtenances" or the words "property, real or personal" may be applied to a variety of objects or things. To designate *expressly* any such appurtenance or item of property would require that the appurtenance or item be named. It is not apparent how after-acquired engines or cars can be said to be *expressly* granted by the use of the single word "appurtenances" appearing in the last clause of Granting Clause FIRST, VIII, which pledges "appurtenances . * * * appertaining or hereafter to appertain thereto", or by the use of the words "property, real or personal" appearing in Granting Clause THIRD.

There is no doubt that the parties intended to allow the Railway Company to obtain some equipment on its own credit free from the mortgage lien. The question here is *what* equipment? It is clear that later-acquired equipment for replacement purposes, and equipment so acquired by the use of mortgage bonds, was to become subject to the mortgage lien. It is not clear that equipment acquired by the railway company on its own credit, in excess of the equipment just defined, even if used on the lines subject to the mortgage, was to be subject to the lien. That conclusion has no firmer basis to support it than inferences to be drawn from general terms or expressions in the mortgage. If the parties had so intended, there were numerous specific words and sentences that could have been used

clearly to express such intention. Without clear expression of such intention it is not proper to supply it by judicial determination where the language in dispute can be otherwise applied.

All pertinent provisions of the mortgage should be reconciled and given effect. To repeat what is said herein when discussing the general gold bond mortgage, "the intention should not be left to be determined by conjecture or inference if two provisions or clauses, not harmonious on their face, can be reconciled by allocating to each a separate field of operation that will not be in conflict with the other". Equipment later acquired for replacement purposes, and equipment so acquired by the use of bonds issued under sections 4, 5 and 6 of Article One, was so-called after-acquired equipment the furnishing of which would satisfy the mortgage requirements relating to after-acquired equipment. The so-called free property clause comes into play and is given full meaning and effect according to its terms with respect to additional equipment to that just defined which the railway company elects to acquire by the use of its own credit, or by money that otherwise could be paid to its stockholders.

The First and Refunding Mortgage is entitled to credit against the "disputed equipment" (1) for so much of said equipment as was necessary on June 7, 1933, to replace any of the original equipment that was subject to a first lien under the indenture; (2) so much of said equipment as was necessary on that date to replace original equipment that was subject to a second or subordinate lien under the indenture, but which later became subject to a first lien under the indenture when a prior lien was discharged; (3) so much of said equipment as was necessary on that date to replace any equipment that was acquired by the use of first and refunding bonds issued under sections 4, 5 and 6, Article One, of the indenture; and (4) so much of the equity of the railway company as of June 7, 1933, in the then existing equipment trusts as might have been necessary on that date to satisfy clauses (1), (2) and (3) of this paragraph.

Leases:

Five leases are mentioned in the order referring the petition to a special master. The first lease, dated March 24, 1904, for a term of 999 years, is from Choctaw, Oklahoma and Gulf Railroad Company to the railway company. This lease is referred to as the Choctaw Lease. The other four leases are dated January 31, 1906, December 1, 1911, November 1, 1913, and February 1, 1914. They are mentioned in this proceeding as the R. I. A. L., The Rock Island and Dardanelle, Short Line, and Rock Island, Stuttgart and Southern leases. The provisions in each lease that are pertinent to the issue under the petition are identical. Therefore, it is sufficient to examine the Choctaw lease and determine the rights of the parties on the issue raised by the petition with respect to equipment affected by that lease.

Under the lease the lessor let, leased and demised, together with railway tracks, terminals, property and appurtenances therein described, all rolling stock and equipment of every description, including locomotives, cars and vehicles of every kind then owned or possessed, or which thereafter, during the term of the lease, might be acquired by the lessor, subject to certain mortgages and equipment trusts described in the lease.

Section Fifth of the lease provides:

> "The lessee will, during the term of this lease, keep and maintain the demised lines of railway of the lessor in good and proper condition for the passage thereover of both freight and passenger traffic, and shall and will keep and maintain in good repair, working order and condition the tracks, depots, terminal facilities and other demised property, using suitable materials for *renewal* of the same as *renewals* shall from time to time become necessary."

This provision governed the duty of the lessee during the continuance of the lease. It does not say that at all times the number of units of equipment in existence at the beginning of the lease must be maintained by replacement

if the volume of traffic should recede. The lessee would perform its duty by renewal of worn out or obsolete equipment only as such renewal might be necessary from time to time to care for the volume of traffic available, or, to use the language at the end of the provision quoted, "as renewal shall from time to time become necessary".

Section SEVENTH of the lease provides:

> "The lessee shall and will, at determination of this lease, re-deliver and surrender up to the lessor the demised premises and property in good order and condition, ordinary wear and tear excepted, with such additions, alterations and improvements as shall have been made thereto, subject, however, to any then existing encumbrances created by the lessor or by the lessee upon the demised premises or any part thereof, or upon the lessee's interest therein, and upon payment by the lessor to the lessee of the then value, over and above any and all such encumbrances, of all such additions, alterations and improvements, including equipment."

If the volume of traffic at the determination of the lease required a lesser number of units of equipment than the number taken over by the lessee when the lease was made, it would seem that the lessee, upon such determination, would perform its duty if it surrendered a sufficient number of units, in addition to all original units remaining, adequately to care for the volume of traffic at that time available. But on the other hand, if the volume of traffic at the determination of the lease required the same or greater number of units than the number taken over by the lessee when the lease was made, the lessee, upon such determination, would be required to surrender the same number of units as the number taken over when the lease was made, plus any excess number of units supplied by the lessee required for the larger volume of traffic, for which the lessor would be required to pay to the lessee the value of such excess number of units. The volume of traffic on June 7, 1933, was not less than the volume of traffic when the lease was made. It is not shown that the lessor has paid to the

lessee the value of any units of equipment furnished by the lessee in excess of the number of units taken over when the lease was made.

Attention is directed to the language of section SEVENTH which provides that surrender of the demised premises and property, with additions and improvements, shall be subject to encumbrances or liens created by the lessee upon the demised property or any part thereof, *or upon the lessee's interest therein,* upon payment by the lessor to the lessee of the then value, over and above any such encumbrances, of additions and betterments, including equipment. Loosely construed, this might imply that the lessee, during the term of the lease, could create liens upon the lessor's estate as it existed when the lease was made, and that the lessor would be bound thereby after termination of the lease. It is not to be supposed that the parties intended that the lessee might create a lien on the leased property beyond the lessee's interest therein, which would be the right to possess and use the property while the lease remained in effect. A rational construction of this paragraph would be that liens could be created by the lessee on additions and betterments added to the demised property and premises, and that upon surrender of such additions and betterments they would belong to the lessor, upon proper payment therefor, subject to the lien or liens so created. Examples of this would be an equipment trust created by the lessee to obtain equipment as additions or betterments on the lines of the lessor, or purchase money mortgages for land to be added to the demised premises.

The Choctaw lease granted to the lessee only the right to possess and use the Choctaw property. This right could be and was pledged under the first and refunding mortgage. But the pledge could not be more extensive than the right itself. The right to possess and use might expire at any time in case of default by the lessee, and in that event the right to use would cease to exist; and with the expiration of the right to use, the lien thereon would cease.

The lessor is entitled to credit against the "disputed equipment" (1) for so much of said equipment as was necessary on June 7, 1933, to replace any of the original equipment that was leased to the railway company; (2) so much of said equipment as was necessary on said date to replace equipment, if any, that was acquired subsequently to the date of the lease by the use of mortgage bonds of the lessor; and (3) so much of the equity of the railway company as of June 7, 1933, in then existing equipment trusts as might have been necessary on that date to satisfy clauses 1 and 2 of this paragraph.

Distribution of Credits:

The parties herein who may possess prior rights with respect to "disputed equipment" of the railway company are the trustee of the general gold bond mortgage, the trustee of the first and refunding mortgage, and the several lessors of lines of railway leased to the railway company.

For convenience, these terms may be used:

1. Original Equipment, meaning equipment in existence when mortgage or lease was made, and which at that time became subject thereto.

2. Original Cost, meaning cost at time of acquisition or construction.

3. Bond Equipment, meaning equipment acquired through the use of mortgage bonds.

4. Allocated Equipment, meaning equipment assigned to a mortgage to preserve the mortgage security, or to keep intact the equipment possession of which was transferred to the railway company under a lease.

5. Equity, meaning equity of the railway company as of June 7, 1933, in then existing equipment trusts.

The following determinations should be made from the records of the railway company:

(1) Original cost of "disputed equipment", less depreciation to June 7, 1933.

(2) General Gold Bond Mortgage: Original cost of original equipment, less depreciation to January 1, 1898, plus original cost of original equipment, if any, on which the mortgage was a subordinate lien which later became a first lien by reason of retirement of any prior mortgage lien thereon, less depreciation to the date when the mortgage became a first lien, plus original cost of bond equipment. Deduct from this, original cost of original equipment, less depreciation to June 7, 1933, plus original cost of bond equipment, less depreciation to June 7, 1933, plus original cost of allocated equipment, less depreciation to June 7, 1933, all of which equipment was still in service on June 7, 1933. Credit mortgage with the remainder and charge remainder against original cost of "disputed equipment", less depreciation to June 7, 1933.

(3) First and Refunding Gold Bond Mortgage: Original cost of original equipment upon which the mortgage was a first lien, less depreciation to April 1, 1904, plus original cost of original equipment, if any, on which the mortgage was a second lien which later became a first lien by reason of retirement of any prior mortgage lien thereon, less depreciation to the date when the mortgage became a first lien, plus original cost of bond equipment. Deduct from this, original cost of original equipment upon which the mortgage was a first lien, less depreciation to June 7, 1933, plus original cost of original equipment on which that mortgage was a second lien which later became a first lien by reason of retirement of any prior mortgage lien thereon, less depreciation from the date when the mortgage became a first lien to June 7, 1933, plus original cost of bond equipment, less depreciation to June 7, 1933, plus original cost of allocated equipment, less depreciation to June 7, 1933, all of which equipment was still in service

on June 7, 1933. Credit mortgage with the remainder and charge remainder against original cost of "disputed equipment", less depreciation to June 7, 1933.

(4) Original cost of original equipment under each lease, less depreciation to date of lease, plus original cost of equipment later acquired by the use of bonds issued under any mortgage of the lessor. Deduct from this, the original cost of original equipment, less depreciation to June 7, 1933, plus original cost of allocated equipment, less depreciation to June 7, 1933, plus original cost of lessor's bond equipment, less depreciation to June 7, 1933, all of which equipment was still in service on June 7, 1933. Credit lessor with remainder and charge remainder against original cost of "disputed equipment", less depreciation to June 7, 1933.

After these charges are made, any balance remaining of the original cost of "disputed equipment", less depreciation to June 7, 1933, plus the equity in equipment trusts, should be credited to claims of general creditors.

If the aggregate of these charges should exceed the original cost of the "disputed equipment", less depreciation to June 7, 1933, the excess should be charged against the equity in equipment trusts. In this event any balance of such equity should be credited to claims of general creditors.

If the aggregate of these charges should exceed the original cost of the "disputed equipment", less depreciation to June 7, 1933, plus the equity in equipment trusts, the respective charges should be proportionately reduced, in the ratio that each such charge bears to the total of such charges, to a combined amount equal to the original cost of the "disputed equipment", less depreciation to June 7, 1933, plus the equity in equipment trusts.

October 31, 1939.

SUPREME COURT OF THE UNITED STATES.

Nos. 7, 8, 20, 33 and 61.—October Term, 1942.

Frederick H. Ecker, John W. Stedman and Reeve Schley, constituting Institutional Bondholders Committee, Petitioners,
7 *vs.*

Crocker First National Bank of San Francisco, et al., etc.

On Writs of Certiorari to the United States Circuit Court of Appeals for the Ninth Circuit.

[March 15, 1943.]

Mr. Justice Reed delivered the opinion of the Court.

Petitioners seek review of a decree of the Circuit Court of Appeals in the reorganization of The Western Pacific Railroad Company under Section 77 of the Bankruptcy Act. That decree reversed the order of the District Court which had approved the plan for reorganization certified to it by the Interstate Commerce Commission.[1]

The petitions for certiorari ask adjudication of questions which are important in the field of railroad reorganization. They involve the respective function of Commission and court, the method of

[1] Sec. 77, Bankruptcy Act, Reorganization of Railroads, 47 Stat. 1474, as amended, 11 U. S. C. § 205; In re Western Pac. R. Co., 124 F. 2d 136; In re Western Pac. R. Co., 34 F. Supp. 493; Western Pacific Railroad Company Reorganization, 230 I. C. C. 61; 233 I. C. C. 409; 236 I. C. C. 1.

valuation of railroad property by the Commission, the legality of the exclusion of stockholders and certain creditors from participation in the estate, a more favorable participation of a Reconstruction Finance Corporation claim because of new money furnished for the plan, allocation of securities among claimants, priorities of liens created by different mortgages and subsidiary issues. Heretofore this Court has not passed upon them. For their determination we granted certiorari. 316 U. S. 654.

The debtor railroad company filed its petition in the District Court for the Northern District of California on August 2, 1935, alleging its inability to pay and discharge its indebtedness as it matured and praying for reorganization under Section 77. The petition was approved as properly filed, trustees were appointed, their appointment ratified, 207 I. C. C. 793, and the appropriate steps taken to bring the plan of reorganization before the Commission for consideration. Public hearings were held by the Commission at which other plans for reorganization were filed, one by a group of bondholders known as the Institutional Bondholders Committee and one by the A. C. James Company, a secured creditor of the debtor which also was financially interested in the treatment accorded the preferred and common stock of the debtor. After full consideration of the problems of the debtor's reorganization and after the development of a plan deemed in accordance with Section 77, the Commission certified its plan to the District Court on September 28, 1939.

The Commission's conclusions and orders were reached upon exceptions to the report of its Bureau of Finance. Its plan was the outgrowth of a study of the financial condition and economic situation of the debtor, viewed in the setting of the public interest in a national transportation system. The competing claims of the various classes of creditors and stockholders were appraised in the light of the requirements of the Act that they be accorded fair and equitable treatment. There is little if any dispute concerning the primary facts from which factual or legal inferences are to be drawn.

The debtor is a California corporation with its principal operating office in San Francisco. It carries on an interstate railroad business between the States of California, Nevada and Utah.[2] For

[2] The summary of the debtor's property prepared by the Interstate Commerce Commission as of October 10, 1938, 230 I. C. C. 62, follows:

"*Location and general description of the property.*—The debtor owns or operates a total of 1,207.51 miles of standard-gage steam railroad. The main

an understanding of this opinion the obligations of the debtor as of January 1, 1939, the date proposed for the beginning of the operation of the plan, may be stated as follows:

Claim or Interest	*Principal of claim or interest*	*Accrued interest at contract rate to effective date of plan*	*Total claim including interest at contract rate to effective date of plan*
Trustees' Certificates (held by Reconstruction Finance Corporation)	$10,000,000.00	$.....	$10,000,000.00
Equipment obligations	2,750,050.00	94,202.00	2,844,252.00
First Mortgage 5% Bonds	49,290,100.00	13,143,776.66	62,433,876.66
Reconstruction Finance Corporation Collateral Notes (secured by $10,750,000 General and Refunding Mortgage bonds and other collateral*)	2,963,000.00	899,869.98	3,862,869.98
The Railroad Credit Corporation Collateral Notes (secured by $4,000,000 General and Refunding Mortgage bonds and other collateral*)	2,445,609.88	145,314.23	2,590,924.11
A. C. James Co. Collateral Notes (secured by $4,249,500 General and Refunding Mortgage bonds)	4,999,800.00	1,249,950.00	6,249,750.00
Total secured debt	$72,448,559.88	$15,533,112.87	$87,981,672.75
Unsecured Claims	5,818,791.00		
Preferred Stock	28,300,000.00		
Common Stock	47,500,000.00		
	$154,067,350.88		

*The "other collateral" does not belong to the debtor and is unaffected by the plan. See p. 38, *infra*.

---

lines extend eastward 924.17 miles from Oakland, Calif., to Salt Lake City, Utah, and northward 111.81 miles from Keddie to Bieber, Calif., with operating rights over the Great Northern Railway, 46.38 miles, from Bieber to Hambone, Calif. The debtor also operates 4.2 miles of ferry service from Oakland to San Francisco, and 185.3 miles of second main track, of which 182.91 miles between Weso and Alazon, Nev., are owned by the Southern Pacific. This territory is known as the 'paired-track district,' since the two lines are used as a double-track railroad by both companies. Various branch lines springing from the Oakland-Salt Lake City line are as follows:

	Miles
Niles Junction to San Jose, Calif.	23.07
Calpine Junction to Calpine, Calif.	12.62
Hawley to Loyalton, Calif.	12.79
Reno Junction, Calif., to Reno, Nev.	33.11
Burmester to Warner, Utah	15.52
Miscellaneous	21.79
Total	118.90

Payment of this indebtedness was secured by liens, collateral or priority, as follows:

The trustees' certificates of $10,000,000 are secured by a lien on the entire estate and priority over all claims beyond reorganization expenses.

The equipment obligations of $2,750,050 are secured by rolling stock; acquired free of the liens of mortgages, through direct liens or trust arrangements. No one disputes the sound character of any of these securities. They are given priority over the fixed obligations of the reorganized company.

Subject to the trustees' certificates and equipment obligations, the first mortgage 5% bonds of $62,433,876.66, face and interest to the effective date of the plan, are secured by prior liens on all valuable property of the debtor, except (1) money, accounts, operating balances and cash items and (2) certain assets, referred to in the next paragraph, upon which the general and refunding bonds have a first lien, deemed by the Commission to be of value sufficient to support $732,010 of new income mortgage bonds and new preferred stock of $1,147,955 par. The total face and assumed value of the securities authorized by the plan, as evidence of the entire value of the system, is $84,000,000 plus. See page 23 *infra.* This paragraph reflects our conclusions as to priorities of the liens of the respective mortgages later discussed. See *Priorities of Conflicting Liens*, page 28 *infra.*

The later general and refunding mortgage bonds, $18,999,500 in face amount, are secured by a first lien on properties determined

---

"*Owned or controlled and jointly affiliated railroad companies.*—The debtor owns all the outstanding capital stock of the Sacramento Northern Railway, an electrically operated standard gage freight and passenger railroad, consisting of 276.2 miles of road serving and connecting San Francisco and Oakland with various Sacramento Valley cities, principally Pittsburg, Vacaville, Sacramento, Woodland, Marysville, Colusa, and Oroville, all in California.

"By ownership of more than 99 percent of the outstanding capital stock, the debtor controls the Tidewater Southern Railway, which operates a standard gage steam freight line 61.38 miles in length, connecting Stockton with Manteca, Escalon, Modesto, and Turlock in the San Joaquin Valley of California.

"The debtor owns all the outstanding capital stock of the Deep Creek Railroad Company, which owns and operates a standard gage steam railroad extending from Wendover to Gold Hill, Nev., a distance of 44.6 miles. In addition it owns 50 percent of the capital stock of the Salt Lake City Union Depot & Railroad Company; 33 1/3 percent of the capital stock of the Central California Traction Company, operating an electrically operated freight railroad extending from Stockton to Sacramento, Calif., with a road mileage of 53.78 miles; and 50 percent of the capital stock of the Alameda Belt Line, operating 15.86 miles of terminal switching line in the city of Alameda on San Francisco Bay.

"None of the above subsidiary or affiliated companies has filed a petition under section 77 of the Bankruptcy Act, as amended."

by the Commission to be of a value and earning power sufficient to support issues of new income bonds and participating preferred stock of $732,010 and $1,147,955, respectively. See 233 I. C. C. 414, *et seq.* They are further secured, subject to the prior rights and other exceptions of the obligations listed in the preceding paragraphs, by a lien on all valuable property of the debtor. All of this series which were issued are pledged to secure the collateral notes in the amounts indicated in the preceding table.

By reason of an arrangement with the Reconstruction Finance Corporation, detailed later in the section of this opinion headed *Allocation of Securities*, B, page 25, *infra*, the distribution of securities to creditors did not reflect absolutely their priority position. The collateral notes owned by the R. F. C. were treated in the distribution of securities on the same basis as were the claims of old First bondholders. The result is summarized by the table on page 8 and footnotes 5 and 6.

By stipulation of the parties, the record shows that the value of the property of the debtor and its subsidiaries, "as found by the Interstate Commerce Commission under Section 19(a) of the Interstate Commerce Act, with additions and betterments, new lines and extensions, subsequent to date of valuation, plus non-operating properties," was $150,907,623.49 as of December 31, 1938. It is further stipulated that there is no deferred maintenance in the debtor's properties. "Its facilities and equipment are sufficient to handle expeditiously and efficiently all traffic reasonably to be anticipated in the immediate future." The value of the debtor's system, with equipment depreciated, was $144,978,559 as of December 31, 1938.

There is agreement as to the amount of system earnings available for interest for 1922 to 1939, inclusive. The amounts follow:[3]

Adjusted Consolidated Earnings Available For Interest

1922 —	$2,404,890	1928 —	$4,376,972	1934 —	$1,396,353
1923 —	3,412,234	1929 —	3,718,436	1935 —	1,377,026
1924 —	3,241,823	1930 —	2,381,529	1936 —	1,901,423
1925 —	4,557,798	1931 —	220,494 (deficit)	1937 —	1,077,407
1926 —	4,868,890	1932 —	283,912	1938 —	225,431
1927 —	3,470,861	1933 —	474,365	1939 —	1,519,916

It is to be borne in mind that while these figures represent net income of the system, as shown by its combined income account,

[3] These figures represent reported consolidated earnings "adjusted to take into account (a) rehabilitation expenditures in the years 1927-1931 and 1934-1938, (b) amortization of discount on First Mortgage Bonds of the Debtor in the years 1922-1938, and (c) deductions and credits in the years 1931-1934 made by the Commission to accord with its Accounting Rules and Regulations, . . ."

adjusted as indicated, factors other than the net income result were placed before and weighed by the Commission and the District Court. Of course the fluctuating operating revenues for the periods from freight, passenger, mail, express, victualing and miscellaneous were considered, as well as the corresponding labor, power, tax, rental and miscellaneous expenses. Operating ratio percentages for the various years are available in the evidence.

The stipulated operating revenues of the debtor's system for the years 1922-1938 and the first nine months of 1939 are as follows:

1922 —	$12,736,564	1928 —	$19,421,851	1934	— $13,779,238
1923 —	14,414,812	1929 —	20,096,557	1935	— 14,407,458
1924 —	14,669,313	1930 —	18,819,062	1936	— 16,547,344
1925 —	15,898,548	1931 —	14,852,938	1937	— 17,918,485
1926 —	17,951,468	1932 —	12,251,071	1938	— 16,057,451
1927 —	18,306,675	1933 —	12,202,489	1939 (1st 9 mths.)	— 12,836,985

Furthermore, the record shows the favorable effect upon the system's gross operating revenue of the extension of its lines into Northern California. This new construction, known as the Northern California Extension, was put into operation in 1932 and contributed the following gross revenues from freight originating, terminating and passing over the extension:

1932.....	$1,098,016	1936	$3,151,734
1933.....	1,491,466	1937	3,425,601
1934.....	2,119,427	1938	3,093,674
1935.....	2,289,858	1939 (first 9 months)	2,463,489

The extension is a link in a Pacific coast route created by this northerly extension and a corresponding southerly extension by the Great Northern Railroad Company which join at Bieber, California. The extension cost over ten million dollars and was built with the expectation, since realized, of materially increasing the value of the debtor's property as an operating road. The Commission gave consideration to this factor in estimating the probabilities of future income.

Prospects for maintaining and increasing the debtor's traffic and so its net for interest and dividends are influenced by the fact that it depends to a considerable extent upon traffic arrangements with other lines. The debtor's main line from Oakland, California, to Salt Lake City is an important section of a through route from the Pacific coast to the Midwest. In conjunction with the Denver & Rio Grande Western and the Missouri Pacific Railroad Company it offers fast through schedules. The Denver & Rio Grande Western completed, in 1934, the Dotsero Cut Off. This Cut Off and the

Moffatt Tunnel, a nearby improvement of the Denver and Salt Lake, used together materially shorten the railroad distance between Pacific coast and Midwest points and open to passenger traffic a scenic route of great beauty. The hearings on reorganization make these facts as to the likelihood of increased traffic available to the Commission and court.

These basic factors of physical condition, traffic, gross and net income et cetera were before the Commission and the courts. From them there was to be projected an estimate as to the future from which was to be drawn a present valuation of the property and its ability to carry by its earnings a certain volume in dollars of securities. There are no assets of significant worth which are not in active use as producers of income. Relying largely upon past earnings, the Commission found "that the fixed interest charges of the reorganized company should not initially and substantially exceed $500,000, if the reorganized company is to maintain its property properly and secure necessary new capital in the future." It further determined that the plan should provide a capital fund for future routine additions and betterments. This was estimated to require $500,000 annually.[4] Carrying charges of $94,202 on existing equipment trusts were to be assumed by the reorganized corporation. A new $10,000,000 first mortgage 4% bond issue was allotted $400,000 annually. These fixed charges aggregate $994,202. In addition to the fixed charges, the Commission determined the system reasonably could carry another $1,000,000 of contingent charges. Thus the over-all charge for annual fixed and contingent interest, capital and sinking funds was limited to approximately $2,000,000 per annum. Income mortgage 4½% bonds were authorized in the amount of $21,219,075. Their annual interest comes to $954,858 and their one-half per cent sinking fund calls for $106,095.

In view of the foregoing limitation, capitalization of the reorganized company was fixed at $2,750,050 of undisturbed equipment obligations, $10,000,000 of first mortgage 4% bonds, $21,219,075 of income mortgage 4½% bonds, $31,850,297 of 5% preferred stock, and 319,441 shares of common stock without par

[4] 230 I. C. C. 91: "Annual payments into the fund should be $500,000 or such lesser sum as may be required, together with unappropriated accumulations in the fund as of the close of the calendar year prior to that for which the payment is to be computed, less charges for additions and betterments during the latter year, to bring the total in the fund to $1,000,000."

value.[5] These issues of preferred and common were based upon possible earnings in addition to the $2,000,000 plus. These securities were allotted by the Commission upon consideration of "the relative priority, value, and equity of the various claims and the value of the new securities available in exchange therefor," as follows:[6]

	New First Mortgage 4% Bonds Series A	*New Income Mortgage 4½% Bonds Series A*	*New 5% preferred Stock Series A ($100 Par)*	*New Common Stock (No Par)*
First Mortgage 5% Bonds ($62,433,876.66)		$19,716,040	$29,574,060	230,593 shs.
RFC (In exchange for Trustees' Certificates of $10,000,000 and Collateral Notes of $3,862,869.98)	$10,000,000	1,185,200	1,777,800	15,788 shs.
RCC Collateral Notes ($2,590,924.11)		154,111	241,681	35,425 shs.
ACJ Collateral Notes ($6,249,750)		163,724	256,756	37,635 shs.
Totals	$10,000,000	$21,219,075	$31,850,297	319,441 shs.

[5] 233 I. C. C. 409, 413; 236 I. C. C. 1, 4. This is summarized by a petitioner as follows:

Title of Issue	*Presently to be issued*	*Annual Charges*
Undisturbed existing equipment obligations	$2,750,050	$94,202
First Mortgage 4% Bonds, Series A, due January 1, 1974	10,000,000	400,000
Total annual fixed charges		$494,202
Mandatory Capital Fund		500,000
Income Mortgage 4½% Bonds, Series A, due January 1, 2014. Interest cumulative to 13½%, otherwise noncumulative. Convertible at the option of the holder into new Common Stock at the price of $50 per share	21,219,075	954,858
Total funded debt	$ 33,969,125	
Total annual charges (fixed and contingent) and Capital Fund		$1,949,060
Income Mortgage Sinking Fund (½%)		106,095
Participating 5% Preferred Stock ($100 par value)	31,850,297	1,592,515
Total securities with par value	$65,819,422	
Total annual charges, Capital Fund, and Preferred dividend requirements		$3,647,670
Common Stock (without par value)	319,441 shs.	

[6] The applicable portion of the finding is as follows:

"(1) First-mortgage bondholders, $19,716,040 of income-mortgage bonds, $29,574,060 of preferred stock, and 230,593 shares of common stock, the common stock to be taken at the price of $57 a share; (2) Finance Corporation, $1,185,200 of income-mortgage bonds, $1,777,800 of preferred stock, and 15,788 shares of common stock, the common stock to be taken at a price of

The Commission found, correlative to and as a basis for its allocation of securities, that "the equity of the existing stock has no value, and hence holders of such stock are not entitled to participate in the plan. Further, considering that the reorganized company's income available for interest and dividends must total $4,318,035,[*] plus any undistributed profits tax that will be payable, before dividends of $3 per share may be paid on the new common stock, it is clear that even though all the securities remaining available for distribution after satisfying the claims of the first-mortgage bondholders are allotted to the other secured creditors, such securities will be inadequate in value to satisfy their claims. For this reason, and for the reasons stated with respect to the finding that the equity of the existing stock has no value, we find that the claims of the unsecured creditors, of the Western Pacific Railroad Corporation, and of the Western Realty Company, have no value, and hence no securities or cash should be distributed under the plan in respect to those claims." 230 I. C. C. 101.

The plan and a transcript of the proceedings before the Commission were duly certified to the District Court. *Re Western Pac. R. Co.*, 34 F. Supp. 493, 495. The plan in complete form and a detailed discussion of the history, property and business prospects of the debtor appears in the various reports of the Commission and the opinion below. See note 1 *supra*. The District Court heard the protests against the action of the Commission and the additional evidence offered, and found that the plan conformed in all respects to the requirements of Section 77.[7] All objections to the plan were therefore overruled and the court di-

$57 a share; (3) Credit Corporation, $154,111 of income-mortgage bonds, $241,681 of preferred stock, and 35,425 shares of common stock, the common stock to be taken at a price of $62 a share; and (4) James Company, $163,724 of income-mortgage bonds, $256,756 of preferred stock, and 37,635 shares of common stock, being the amount of common stock which bears to the amount of common stock allotted to the claim of the Credit Corporation the same proportion that the principal amount of general and refunding bonds of the debtor held by the James Company as collateral for its claim bears to the principal amount of such bonds held by the Credit Corporation for its claim." The result of the distribution per dollar of indebtedness is set out in the Commission's reports. 230 I. C. C. 101 and 233 I. C. C. 417 and 451.

[*] This amount now is somewhat larger on account of increased face of securities. 233 I. C. C. at 412.

[7] For the purposes of this controversy, the apposite requirements of Section 77, 11 U. S. C. § 205, may be excerpted as follows:

"(b) A plan of reorganization within the meaning of this section (1) shall include provisions modifying or altering the rights of creditors generally, or of any class of them, secured or unsecured, either through the issuance of new securities of any character or otherwise; (2) may include provisions

rected that a copy of the order and opinion be transmitted to the Commission for use in submitting the plan for action to the first mortgage bondholders, the R. F. C., the A. C. James Co. and the Railroad Credit Corporation; the only creditors found to be entitled to vote on the adoption of the plan.

---

modifying or altering the rights of stockholders generally, or of any class of them, either through the issuance of new securities of any character, or otherwise; (3) may include, for the purpose of preserving such interests of creditors and stockholders as are not otherwise provided for, provisions for the issuance to any such creditor or stockholder of options or warrants to receive, or to subscribe for, securities of the reorganized company in such amounts and upon such terms and conditions as may be set forth in the plan; (4) shall provide for fixed charges (including fixed interest on funded debt, interest on unfunded debt, amortization of discount on funded debt, and rent for leased railroads) in such an amount that, after due consideration of the probable prospective earnings of the property in light of its earnings experience and all other relevant facts, there shall be adequate coverage of such fixed charges by the probable earnings available for the payment thereof; (5) shall provide adequate means for the execution of the plan, ...

. . . . . .

"(d) The debtor, after a petition is filed as provided in subsection (a) of this section, shall file a plan of reorganization within six months of the entry of the order by the judge approving the petition as properly filed, . . . After the filing of such a plan, the Commission, unless such plan shall be considered by it to be prima facie impracticable, shall, after due notice to all stockholders and creditors given in such manner as it shall determine, hold public hearings, at which opportunity shall be given to any interested party to be heard, and following which the Commission shall render a report and order in which it shall approve a plan, which may be different from any which has been proposed, that will in its opinion meet with the requirements of subsections (b) and (c) of this section, and will be compatible with the public interest; or it shall render a report and order in which it shall refuse to approve any plan. In such report the Commission shall state fully the reasons for its conclusions.

" . . . No plan shall be approved or confirmed by the judge in any proceeding under this section unless the plan shall first have been approved by the Commission and certified to the court. . . .

"(e) Upon the certification of a plan by the Commission to the court, the court shall give due notice to all parties in interest of the time within which such parties may file with the court their objections to such plan, and such parties shall file, within such time as may be fixed in said notice, detailed and specific objections in writing to the plan and their claims for equitable treatment. The judge shall, after notice in such manner as he may determine to the debtor, its trustee or trustees, stockholders, creditors, and the Commission, hear all parties in interest in support of, and in opposition to, such objections to the plan and such claims for equitable treatment. After such hearing, and without any hearing if no objections are filed, the judge shall approve the plan if satisfied that: (1) It complies with the provisions of subsection (b) of this section, is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders; . . .

"If the judge shall not approve the plan, he shall file an opinion, stating his conclusions and the reason therefor, and he shall enter an order in which he may either dismiss the proceedings, or in his discretion and on motion of any party in interest refer the proceedings back to the Commission for further

On appeal to the Circuit Court of Appeals, Judicial Code § 128, 43 Stat. 936, this order was reversed. The court rested upon the necessity of specific valuation of the entire property, of the respective portions of it covered by the First Mortgage and the Refunding Mortgage, of each of the claims and of the new securities allocated to the creditors. Such action was deemed essential to enable the District Court to exercise its independent judgment upon matters of valuation and allocation. The failure to make

---

action, in which event he shall transmit to the Commission a copy of any evidence received. . . . . If the judge shall approve the plan, he shall file an opinion, stating his conclusions and the reasons therefor, and enter an order to that effect, and shall send a certified copy of such opinion and order to the Commission. The plan shall then be submitted by the Commission to the creditors of each class whose claims have been filed and allowed in accordance with the requirement of subsection (c) of this section, and to the stockholders of each class, and/or to the committees or other representatives thereof, for acceptance or rejection, within such time as the Commission shall specify, together with the report or reports of the Commission thereon or such a summarization thereof as the Commission may approve, and the opinion and order of the judge: *Provided*, That submission to any class of stockholders shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding, (a) that at the time of the finding the corporation is insolvent, or that at the time of the finding the equity of such class of stockholders has no value, or that the plan provides for the payment in cash to such class of stockholders of an amount not less than the value of their equity, if any, ... *Provided further*, That submission to any class of creditors shall not be necessary if the Commission shall have found, and the judge shall have affirmed the finding, that the interests of such class of creditors will not be adversely and materially affected by the plan, or that at the time of the finding the interests of such class of creditors have no value, or that the plan provides for the payment in cash to such class of creditors of an amount not less than the value of their interests. . . .

. . . . . .

"If it shall be necessary to determine the value of any property for any purpose under this section, the Commission shall determine such value and certify the same to the court in its report on the plan. The value of any property used in railroad operation shall be determined on a basis which will give due consideration to the earning power of the property, past, present, and prospective, and all other relevant facts. In determining such value only such effect shall be given to the present cost of reproduction new and less depreciation and original cost of the property, and the actual investment therein, as may be required under the law of the land, in light of its earning power and all other relevant facts.

"(f) . . . The property dealt with by the plan, when transferred and conveyed to the debtor or to the other corporation or corporations provided for by the plan, or when retained by the debtor pursuant to the plan, shall be free and clear of all claims of the debtor, its stockholders and creditors, and the debtor shall be discharged from its debts and liabilities, except such as may consistently with the provisions of the plan be reserved in the order confirming the plan or directing such transfer and conveyance or retention, and the judge may require the trustee or trustees appointed hereunder, the debtor, any mortgagee, the trustee of any obligation of the debtor, and all other proper and necessary parties, to make any such transfer or conveyance, and may require the debtor to join in any such transfer or conveyance made by the trustee or trustees. . . ."

such separate valuations was held to require the setting aside of the District Court's approval of the plan. See note 26, *infra*.

Function of the Court. The conclusion of the Court of Appeals as to the necessity for a detailed valuation springs from its interpretation of the statute as to the function of the District Court in reorganizations. That court had said in its opinion:

"It cannot be gainsaid that the Commission knows all about the Debtor, its property, its history, financial and otherwise, its traffic and revenue, and its financial structure. No official body in the country is better qualified, by reason of experience, ability and specialized knowledge than is the Commission to find the ultimate facts as to the Debtor in relation to any of the matters mentioned." *In re Western Pac. R. Co.*, 34 F. Supp. 493, 501.

Commenting upon this, the Court of Appeals said:

"The statement indicates a possible misconception. . . .

"In determining whether a plan of reorganization satisfies the requirements of subsection e, the court is not concluded by any determination made by the Commission, but may, and must, exercise its own independent judgment; and this is true whether such determination relates to value or to some other subject. Initially, however, the duty of determining the value of any property for any purpose under § 77 rests on the Commission, not on the court." *In re Western Pac. R. Co.*, 124 F. 2d 136, 140.

Petitioners in Nos. 7, 8 and 33 seek review of this last ruling. Their petitions for certiorari query whether Section 77 does not vest

"in the Commission exclusive jurisdiction (subject only to review for arbitrary exercise) to determine whether a railroad reorganization plan is 'compatible with the public interest', including jurisdiction to determine total capitalization, the classification thereof, and the financial details of each class of proposed capitalization?"

This summary sufficiently identifies the issue without the necessity of elaborating differentiations in the petitioners' present views or of determining the degree of difference between the views of the district and appellate courts as to the function of the court under § 77.

The opinion shows the attitude of the District Court, 34 F. Supp. 493, 503, 504: "The capitalization permitted by these earnings is a mere matter of computation, which will demonstrate that the Commission did not act arbitrarily in limiting capitalization nor the respective classes thereof. . . ."

"The determination of the amount and character of the capitalization (a legislative function affecting the public interest) is

exclusively within the province of the Commission. The only qualification, if any, is that the court shall independently determine whether, in the exercise of its jurisdiction, the Commission has acted fairly, within the bounds of the Constitution, and not arbitrarily." Upon the other findings of the Commission, the District Court exercised an independent judgment based upon the record and the findings of the Commission together with additional evidence produced before the court by the parties. 34 F. Supp. 493, 505.

These reorganizations require something more than contests between adversary interests to produce plans which are fair and in the public interest. When the public interest, as distinguished from private, bulks large in the problem, the solution is largely a function of the legislative and administrative agencies of government with their facilities and experience in investigating all aspects of the problem and appraising the general interest.[8] Congress outlined the course reorganization is the follow. It established standards for administration and placed in the hands of the Commission the primary responsibility for the development of a suitable plan. When examined to learn the purpose of its enactment, Section 77 manifests the intention of Congress to place reorganization under the leadership of the Commission, subject to a degree of participation by the court.

It is clear from the discussions and the statute itself that there was recognition by everyone of the advantages of utilizing the facilities of the Commission for investigation into the many sided problems of transportation service, finance and public interest involved in even minor railroad reorganizations and utilizing the Commission's experience in these fields for the appraisals of values and the development of a plan of reorganization, fair to the public creditors and stockholders.[9] The resulting legislation was an attempted balance between the power of the Commission and that of the court.

As to the court's place in reorganization, the present statute does not vary greatly from the first legislative effort, enacted

---

[8] Cf. Hearings on H. R. 7432, House Committee on Interstate & Foreign Commerce, 72d Cong., 2d Sess. (1933), pp. 11-12; Cushman, The Independent Regulatory Commissions (1941) 45-58.

[9] The need for railroad rehabilitation legislation under the bankruptcy clause of the Constitution was generally recognized. President's Message, January 11, 1933, 76 Cong. Rec. 1615; 46th Annual Report of the I. C. C., Dec. 1, 1932, p. 15; for a statement that the President-elect favored the legislation, see 76 Cong. Rec. 2917.

March 3, 1933, to reorganize railroads unable to meet their obligations.[10] The amendments of 1935 were primarily designed to cure defects disclosed by practical experience.[11] Both acts are bottomed upon the theory of debtor rehabilitation by adjustment of creditors' claims. Such treatment was essential for embarrassed railroads, as ordinary bankruptcy liquidation or judicial sales were impossible because of the size of their indebtedness and the paucity of buyers. The acts were a part of the relief granted financially involved corporations, public and private, in the depression years of the early thirties.[12] Since railroads could not take advantage of the Bankruptcy Act, § 4, 11 U. S. C. § 22, their financial adjustments for years had been carried out in equity receiverships under judicial control. These were cumbersome, costly and privately managed with inadequate consideration for the public interest in a soundly financed transportation system. *Chicago, Milwaukee & St. Paul Investigation*, 131 I. C. C. 615, 671; *United States* v. *Chicago, etc. R. Co.*, 282 U. S. 311, 331 dissent.

The first bill was introduced in the House January 21, 1933, as H. R. 14359.[13] It was drafted so as to place "the entire plan of reorganization under the jurisdiction, supervision and control" of the Commission. After Commission approval, which followed stockholder and creditor approval, it was to transmit the "approved plan, its findings and the record to the court. The court's review must be based upon the record made before the Commission."[14] This substitution of the Commission for an equity receivership under court direction was criticized and amendments suggested to "eliminate all confusion in regard to the functions to be exercised by the commission and by the court. . . . and [to] remove the most fundamental objections to the bill in its present form."[15] Notwithstanding the criticism the bill passed the House with the power lodged in the Commission, as originally

[15] Solicitor General's Memorandum, 76 Cong. Rec. 2771, 2773.

proposed. When the House bill for the relief of debtors.[16] was reported by the Senate Committee, the railroad section was omitted. By a motion from the floor it was reinstated but in a changed form. The Senate adopted changes designed to give more power to the court. 76 Cong. Rec. 4907, 5104-34. Hearings before the court were provided. The judge, it was added, was to be "satisfied that (1) the approved plan complies with the provisions of subsection (b) of this section, is equitable and does not discriminate unfairly in favor of any class of creditors or stockholders."[17] These amendments giving concurrent powers to the court were adopted by the Senate and accepted by the House and the bill became the Act of March 3, 1933, 47 Stat. 1474.

Following the recommendation of the President in his message of June 7, 1935, the Congress adopted amendments to the 1933 act which were in line with the suggestions of the Federal Coordinator of Transportation and the Commission.[18] While the most important amendment was to furnish means to avoid the obstruction of dissatisfied classes of creditors or stockholders by making a fair and equitable plan effective over dissenters, the requirement of coordinated action by Commission and court was retained.

The Senate Report, No. 1336, 74th Cong., 1st Sess., concluded:

"The amendments to section 77 leave unimpaired the power and the duty of the commission and the courts to deal with the most important feature of all reorganization plans, that of the control of the reorganized company; and similarly the commission and courts will continue to have the power and authority of making that thorough investigation which is necessary to assure sound and reliable control for bankrupt companies when they emerge from the courts, in place of the type of control under which some railroads have been wrecked."

Under the present statute the District Court has definite responsibility in reorganization. Subsection (e). After the certification from the Commission is filed, a hearing is authorized at which all interested parties may appear. Additional evidence of opponents and proponents of the plan may be received upon "detailed and specific objections in writing to the plan and their claims for

[16] The bill dealt with the subject matter of what are now Chapters 8-11 of the Bankruptcy Act.

[17] Subsection (g), 47 Stat. 1479. The provisions of subsection (b) were then substantially like they are now.

[18] 79 Cong. Rec. 8851. H. Rep. No. 1283, 74th Cong., 1st Sess., p. 1; compare draft of Coordinator's proposals, Report of the Federal Coordinator of Transportation (1935), H. Doc. No. 89, 74th Cong., 1st Sess., p. 229.

equitable treatment". The judge shall then "approve the plan if satisfied that: (1) It complies with the provisions of subsection (b) of this section, is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders;" and if satisfied as to fees, costs and allowances. If the plan is disapproved, the proceedings may be dismissed or referred back to the Commission for further consideration. On approval by the judge the plan is returned to the Commission for submission to stockholders and creditors for their approval. Submission to classes of stockholders or creditors may be omitted on a finding by the Commission, affirmed by the judge, of a lack of value in the equity of the stockholders or the claims of the creditors. On certification of the results of the submission the judge shall confirm the plan finally, if satisfied the requisite approval has been obtained or is excused for reasons stated in subsection (e). The judge is not empowered to approve or confirm any plan until it has first been approved by the Commission and certified to the court. Subsection (d).

The power of the court does not extend to participation in all responsibilities of the Commission. Valuation is a function limited to the Commission, without the necessity of approval by the court. The first sentence of the last paragraph of subsection (e) provides:

"If it shall be necessary to determine the value of any property for any purpose under this section, the Commission shall determine such value and certify the same to the court in its report on the plan."

The function of valuation thus left to the Commission is the determination of the worth of the property valued, whether stated in dollars, in securities or otherwise. One of the primary objects of the bill was the elimination of obstructive litigation on the issue of valuation[19] and the form finally chosen approached as near to that position as seemed to the draftsmen legally possible. Judicial reexamination was not considered desirable.[20] None of

[19] Report of the Federal Coordinator, *supra*, n. 18, pp. 100-103; H. Rep. No. 1283, 74th Cong., 1st Sess., p. 3; S. Rep. No. 1336, 74th Cong., 1st Sess., p. 3; Hearings on H. R. 6249, House Committee on the Judiciary, 74th Cong., 1st Sess., Ser. 3, April 15-25, 1935, pp. 26-31.

[20] Cf. Hearings on H. R. 6249, *supra* n. 19, pp. 249-50, 291-92, 317.

the findings required of the judge under subsection (e) relate specifically to valuation. Congress apparently intended to leave the determination of valuation "of any property for any purpose under this section" to the Commission.[21] The language chosen leaves to the Commission, we think, the determination of value without the necessity of a reexamination by the court, when that determination is reached with material evidence to support the conclusion and in accordance with legal standards. It leaves open the question of whether in reaching the result the Commission had applied improper statutory standards. This latter point is discussed under the heading of ***Method of Valuation*** in this opinion, p. 20 *infra*, where this plan is reviewed and upheld in this respect.

Another restriction on court action is that the determination as to whether the plan is "compatible with the public interest" rests, as valuation does, with the Commission. Subsection (d). Without attempting to forecast the limits of the phrase as used in the setting of this statute, it is sufficient in this case to determine, as we do, that it includes the amount and character of the capitilization of the reorganized corporation. Cf. *N. Y. Central Securities Co.* v. *United States*, 287 U. S. 12, 24. Leaving the problems of public interest to the Commission was not a departure from precedent. The phrase had been employed long before in the grant of authority to supervise the issue of securities. Section 20a, Interstate Commerce Act.[22]

The problems of capitalization are of public interest. The corporate form is universally used for the business of railroading. Railroad securities are widely distributed in investment portfolios

---

[21] The bill as recommended by the Federal Coordinator of Transportation, H. Doc. 89, *supra*, n. 18, p. 238, and in a different form as considered by the Committee on the Judiciary of the House, Hearings on H. R. 6249, *supra*, n. 19, p. 8, did not contain the quoted sentence. During the hearings, the Chairman sought advice as to whether it would be legally valid to make the valuation of the Commission final in practice. This was not denied although doubt was expressed whether the Commission's finding could preclude a certain limited amount of judicial review. See Hearings on H. R. 6249, *supra* n. 20. After this discussion, the bill which was to pass the House was introduced on June 20, 1935, 79 Cong. Rec. 9814. It contained the quoted sentence, above referred to, in the form as it now appears in subsection (e).

[22] "The commission shall make such order only if it finds that such issue or assumption: (a) is for some lawful object within its corporate purposes, and compatible with the public interest, which is necessary or appropriate for or consistent with the proper performance by the carrier of service to the public as a common carrier, and which will not impair its ability to perform that service, and (b) is reasonably necessary and appropriate for such purpose." 49 U. S. C. § 20a(2).

and among individual savers. The reasonable earning power of securities, the terms and conditions of the respective issues and the soundness of the aggregate capitalization affects the public interest immediately and directly. Capitalization is an essential factor bearing on an efficient transportation system for shipper, investor and consumer. The development of the capitalization of the reorganized company which is entrusted solely to the Commission under the requirement that the plan be compatible with the public interest is that relating to the total amount of issuable securities and the quality of the securities to be issued. So long as legal standards are followed, the judgment of the Commission on such capitalization is final.

Thus limited the district court acts concerning the plans only upon the issues specifically delegated by subsection (e). As to these, its powers are negative. It may veto the plan in its entirety but may improve it only by suggestion. It becomes a necessary and important factor in railroad reorganization. These reorganizations may be attained only through properly coordinated action between the Commission and the court.[23] In this case we are of the view that the District Court performed its required functions in accordance with the requirements of the statute. See page 12, *supra*.

Amount and Character of Capitalization. While the public interest phase of capitalization is not to be independently passed upon by the court, the court does have statutory authority to review for obedience to legal standards.[24] Petitioners in seeking certiorari and now on the merits concede that the exclusive power in the Commission to pass upon the amount and character of capitalization is subject to review for "arbitrary exercise." The respondent A. C. James Company makes the point that the restriction of the amount of capitalization to an aggregate limited by the reasonable probability of a fair return deprives those creditors and stockholders who are barred as holding claims without value, of their property interest in the debtor without due process and contrary to the mandate of Section 77. The Commission thought that the public interest required a capital structure

[23] Cf. Palmer v. Massachusetts, 308 U. S. 79, 87; Warren v. Palmer, 310 U. S. 132, 138; United States v. Morgan, 307 U. S. 183, 191; Report of President's Committee to Submit Recommendations upon the General Transportation Situation, Dec. 23, 1938, p. 25.

[24] See Opp Cotton Mills v. Administrator, 312 U. S. 126, 144.

which would give the reorganized company "a reasonable opportunity to function efficiently and continuously" and that "proposed charges, whether fixed or contingent, shall be within its probable earning power." 230 I. C. C. at 87.

Assuming at this point that the Commission's valuation is sound and reached by allowable methods, a matter discussed later in this opinion at page 20, we hold that the elimination of the claims of stockholders and creditors which are valueless from participation in the reorganization is in accordance with valid provisions of section 77(e).[25] Actual bankruptcy means a loss to some investors. Subsection (e) recognizes this inevitable result and provides a method for their elimination from the reorganization proceedings. After all of the reasonable value had been exhausted by senior securities, warrants might have been authorized for otherwise unsatisfied claims. Such warrants would represent merely the possibility of recoupment, just as the equity of redemption in judicial sales. But there is no constitutional or statutory requirement that such immediately valueless paper should be issued. A mere possibility that traffic might be found to the limit of the physical capacity of the system is not the kind of earning power which justifies the issue of securities based upon such a possibility. Whatever may be the limits of the power of the Commission to find claims worthless, the present plan may not be successfully attacked on the ground that Congress is powerless to authorize in bankruptcy the elimination of claims without value. *In re 620 Church St. Corp.*, 299 U. S. 24.

Nor do we find violation of legal standards in the requirement by the Commission for a capital fund or the issue of stock to former holders of interest bearing securities. The Commission is charged with the development of a plan which must balance and choose between public and private interests. The evidence before the Commission gave grounds for the finding of a normal requirement of an annual $500,000 fund for improvements. It is reasonable to agree with the Commission that a substantial share of the securities should be fixed stock investments rather than that the entire aggregate amount, justified by estimates of probable earnings, should be in interest bearing loans, which ultimately must be redeemed. Stock which has no retirement provisions is the backbone of a corporate structure.

[25] Such a result was within the contemplation of the Congressional committee. Hearings on H. R. 6249, *supra*, n. 19, pp. 26, 80, 107, 118, 227, 255, 278.

Method of Valuation. While by the terms of the statute the valuation of the property is left to the Commission, without participation by the court, this valuation must be made in accordance with the direction of the statute and as to that valuation is subject to judicial review. This review is limited in character by the direction of subsection (e) that valuation shall be determined by the Commission. The District Court may review to determine whether the Commission has followed the statutory mandates of subsection (e). Subsection (e) requires valuations by the Commission to be "determined on a basis which will give due consideration to the earning power of the property, past, present, and prospective, and all other relevant facts. In determining such value only such effect shall be given to the present cost of reproduction new and less depreciation and original cost of the property, and the actual investment therein, as may be required under the law of the land, in light of its earning power and all other relevant facts." Thus, while judicial review does not involve an independent examination into valuation, it does require that the court shall be satisfied, upon the record before the Commission, with such additional evidence as may be pertinent to the objections to the Commission's finding of value, that the statutory requirements have been followed.

An example of this type of review occurs in this record. The Irving Trust Company as Refunding Mortgage Trustee in Nos. 7 and 8 and the A. C. James Company object to the finding of the Commission that the bonds, $270,000, and stock, $360,834. par value, of the Central California Traction Company and $465,300, par value, of the capital stock of the Alameda Belt Line, pledged only under the Refunding Mortgage, had no material value. 233 I. C. C. 414-416. These securities were owned solely by the debtor but in the case of the first company represented a one-third interest in the Traction Company and in the case of the second a one-half interest in the Belt Line. Competing transcontinental railroads owned the other interests. The respective ownerships were acquired to put the debtor in a position to obtain its fair share of the business from and to these feeder lines. The facts before the Commission showed that over the preceding decade, the debtor had contributed annually substantial sums to meet the deficits of each of the companies. It was shown in the District Court that each of the companies were useful auxiliaries to the business of the debtor. However, valuation is essentially a problem for the Com-

mission. There is material evidence to support its conclusion of lack of value and its conclusion has been accepted by the District Court. This is sufficient.

In the preceding section of this opinion, we discussed the validity of the provision of subsection (e) which permits the elimination from the reorganization of claimants without equity in the debtor's properties. This provision needs also to be considered from the standpoint of statutory review of the Commission's action. As to both stockholders and creditors the section requires that a plan which allows nothing to their claims need not be submitted to them, if the worthlessness of their claims is found by the Commission, "and the judge shall have affirmed the finding." As to certain creditors and all stockholders in this case, both events took place. The specificity of the direction for reexamination of the Commission's action points to a wider scope of review than an inquiry as to whether statutory standards for valuation have been followed. It is obvious that the valuation of the whole of a debtor's property, in a simple case without conflicting or divisional liens, will mark, by a mere mathematical computation as to priorities, the claimants who must be found to be without equity in whole or in part. But we think the requirement of affirmation of the exclusion of claimants does not require an independent appraisal of the valuation which ordained their elimination. The court properly affirms the Commission, when it finds no legal objection to the Commission's use of its own valuation to determine whether particular claimants are entitled to participate in the reorganization. For example, there may arise controversies over the priority or the validity of claims. A Commission finding involving such problems would require an independent examination and an affirmation by the court.

The Circuit Court of Appeals found error in the Commission's failure to make definite valuations. It was of the view that it was necessary to determine the values of the respective claims in order to have a basis for the distribution of new assets.[26] This position respondents defend, at least to the point of saying that claims may not be foreclosed or new securities allocated without

[26] In re Western Pac. R. Co., 124 F. 2d 136, 139: "To determine this question, it was necessary to determine, as of the effective date of the plan, the value of (1) each of the claims of Reconstruction Finance Corporation, (2) the claim of Railroad Credit Corporation, (3) the claim of A. C. James Company, (4) the claims of the holders of first mortgage bonds now outstanding, (5) the $10,000,000 of new first mortgage bonds, (6) the $21,219,075

a determination of the value of the property and the assets subject to secured claims, as well as earning power. The Commission considered the debtor's investment in its property, 230 I. C. C. 61, 65, its value for rate making purposes, *id.*, 76, and the record of its earnings, *id.*, 73 *et seq.*, together with its volume of traffic and other pertinent data. It concluded that these factors would justify fixed and contingent charges of no more than two million dollars annually. In addition the Commission's plan provided for five per cent preferred stock and common stock in such amounts that it would require aggregate available annual earnings of a little more than four and a half million dollars to permit payment of a three per cent dividend. Without appraising the effect of income taxation on the remainder of earnings available

---

of income bonds, (7) the 318,502.97 shares of new preferred stock and (8) the 319,441 shares of new common stock which the plan provides shall be distributed to said claimants.

"To determine the value of the above-mentioned claims, it was necessary to determine the value of (1) the debtor's entire property, (2) the property subject to the first mortgage now outstanding, (3) the $18,999,500 of refunding bonds pledged to secure the claims of A. C. James Company, Railroad Credit Corporation and Reconstruction Finance Corporation and (4) the other collateral pledged to secure each of said claims. To determine the value of the refunding bonds, it was necessary to determine the value of (1) the property subject to the refunding mortgage only and (2) the property subject both to the refunding mortgage and to the first mortgage now outstanding. This, of course, necessitated a determination as to which of the debtor's property is, and which is not, subject to each mortgage. Consolidated Rock Products Co. v. Du Bois, *supra*.

"To determine the value of the new first mortgage bonds, income bonds, new preferred stock and new common stock mentioned above, it was necessary to determine the value of (1) the debtor's entire property, (2) the property which would be subject to the new first mortgage and (3) the property which would be subject to the income mortgage.

"Subsection e of § 77 provides: 'If it shall be necessary to determine the value of any property for any purpose under this section, the [Interstate Commerce] Commission shall determine such value and certify the same to the court in its report on the plan.' In this case, as has been seen, it was necessary to determine the value of (1) the debtor's entire property, (2) each of the claims of Reconstruction Finance Corporation, (3) the claim of Railroad Credit Corporation, (4) the claim of A. C. James Company, (5) the claims of the holders of first mortgage bonds now outstanding, (6) the $10,000,000 of new first mortgage bonds, (7) the $21,219,075 of income bonds, (8) the 318,502.97 shares of new preferred stock, (9) the 319,441 shares of new common stock, (10) the property subject to the first mortgage now outstanding, (11) the $18,999,500 of refunding bonds pledged to secure the claims of Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James Company, (12) the other collateral pledged to secure each of said claims, (13) the property subject to the refunding mortgage only, (14) the property subject both to the refunding mortgage and to the first mortgage now outstanding, (15) the property which would be subject to the new first mortgage and (16) the property which would be subject to the income mortgage. It thus became the duty of the Commission to determine these values and certify them to the court. That duty was not performed."

and partly used for interest, it is significant that only three years in the period from 1922 to 1940 showed earnings available for interest of over four million. See page 5 *supra*. With this data, the Commission determined the new capital structure. See page 8, *supra*. Taking the lowest value for the no par suggested by the Commission, $57 per share, note 6 *supra*, there is a total value of securities of eighty-four million dollars plus. The Commission was thus of the view that the value of the property for purposes of reorganization was around this figure.

The Commission was familiar with railroad securities. Control over their issue by interstate carriers has been for many years in the Commission. Sec. 20(a), Interstate Commerce Act. The standards for issuance under section 20(a) include "compatible with the public interest." Cf. *N. Y. Central Securities Co.* v. *United States*, 287 U. S. 12, 24. The provisions of this section 20(a) were carried into and made a part of the reorganization section by subsections (c)(3) and (f). To create securities with voting power, in addition to those authorized might well divorce control from real ownership. Sound railroad reorganization involves more than the partitioning of assets among creditors with valuable claims and the distribution to creditors and stockholders without equity of so-called securities representing chances for then unforeseeable profits. The interest of the public in an adequate transportation service must receive consideration. *New England Divisions Case*, 261 U. S. 184, 189. Important property rights must be balanced against the need of sound financing. Consequently, the Commission limited the fixed and contingent charges involving the debt which must ultimately be paid, to two million annually, with stock representing the possibility of additional earnings. See note 5 *supra*, 230 I. C. C. 61, 92.

It is said that *Consolidated Rock Co.* v. *Du Bois*, 312 U. S. 510, forbids the substitution of an approved capital structure for determinations of value. In that case there was no finding of the values of the property involved and this Court said: "Absent the requisite valuation data, the court was in no position to exercise the 'informed, independent judgment' (*National Surety Co.* v. *Coriell*, 289 U. S. 426, 436) which appraisal of the fairness of a plan of reorganization entails," page 520. The district court, it being a section 77B reorganization, was required to make the requisite valuations. The requirements for valuation are the same in a section 77B proceeding as in a railroad reorganization. There is nothing, however, in the *Du Bois* case to

indicate that dollar valuations of the property or claims are essential for recapitalization or the distributions of securities in reorganizations. The defect in *Du Bois* was not the failure to find dollar values but the failure to find the worth of the security behind independent mortgages on distinct properties and of assets subject to the claims of particular groups of creditors. Such findings were required in that case because the court was dealing with a parent and two subsidiaries with inter-company accounts. Each subsidiary entity had its own creditors. The system was a unified operation and we held the claims against the subsidiaries had priority over stockholders equity in the parent, p. 523. Without a separate valuation of assets, it was impossible to tell what assets of the parent were left to form the basis for the securities distributed to the parent's stockholders. In *Du Bois*, as here, the manner of reaching that valuation, so long as it complies with the statutory standards, is not important. There are subsidiaries here but there are no claimants of the subsidiaries looking to the parent. The aggregate of the authorized securities in the present case is to be equitably distributed among claimants against a single corporation. Findings were made as to the property covered by the different mortgages of the debtor and securities allocated on the basis of that finding. 230 I. C. C. 61, 98, 99, 100, 101; 233 I. C. C. 409, 414. Under such circumstances the lack of a valuation in dollars is immaterial. The important element is the allocation of the securities so as to preserve to creditors the advantages of their respective priorities. That is to say, senior claims first receive securities of a worth sufficient to cover their face and interest before junior claims receive anything. Consequently, we are of the opinion that the determination by the Commission of the aggregate amount of securities which may be issued against the system is in substance a finding of total value for reorganization purposes. In view of the factors of value considered and the opportunity given all parties before the Commission and the court to present all desired evidence, the Commission's determination stands upon a firm basis. There is no more important element in the valuation of commercial properties than earnings.[27] No offer was made to produce figures upon reproduction cost. It was not incumbent upon the Commission to do so. The Commission's conclusions impress us as in accord with the statutory requirements.

[27] Cf. Consolidated Rock Co. *v.* Du Bois, 312 U. S. 510, 525.

Allocation of Securities. There are two issues collateral to the Commission's valuation. One relates to adverse claims of prior liens between the holders of bonds secured on the one hand by the General and Refunding Mortgage and on the other by the First Mortgage. See p. 28, *infra*. The other is as to the correctness of the allocation of securities among the creditors. This latter issue is, of course, affected by the former. In considering allocation, we shall assume at this point what we later find, that the Commission's determination as to priorities is correct.

A. The allocation of securities is shown above at page 8. The table sets out that the holders of the Trustees' Certificates and the 5% First Mortgages, although they are senior creditors, receive large quantities of preferred and common stock, as well as new income bonds. These stocks are securities of lower dignity than the income bonds. Some of these bonds on the other hand go to creditors secured by the refunding bonds. This is because the refunding bonds have a first lien on some assets. 233 I. C. C. 414. But at any rate, under the absolute priority rule of the *Boyd* case,[28] the stratification of securities issued to creditors need not follow invariably the relative priority of the claimants.[29] Apropos of a somewhat similar situation, we said in *Consolidated Rock Co.* v. *Du Bois*, 312 U. S. at p. 530:

"If the creditors are adequately compensated for the loss of their prior claims, it is not material out of what assets they are paid. So long as they receive full compensatory treatment and so long as each group shares in the securities of the whole enterprise on an equitable basis, the requirements of 'fair and equitable' are satisfied."

B. A point is made as to the treatment of the Reconstruction Finance Corporation's claims in the distribution of securities. It is to be noted, page 3 *supra*, that R. F. C. has two kinds of claims; one for $10,000,000 upon Trustees' Certificates for money advanced to the debtor while in reorganization, the other for $2,963,000 Collateral Notes, secured by refunding mortgage bonds. The Railroad Credit Corporation and the A. C. James Company are holders of similar collateral notes. The amount of bonds, as compared with the face principal of the indebtedness, varies. The R. F. C. has the most valuable collateral per dollar of in-

[28] Northern Pacific Ry. *v.* Boyd, 228 U. S. 482.

[29] Group of Institutional Investors *v.* C. M., St. P. & P. R. R. Co., Nos. 11-19, 32, 1942 Term, decided this day, slip opinion, pp. 27-29.

debtedness. To retire the Trustees' Certificates and to raise necessary new money for the reorganization, the Commission deemed it essential to sell $10,000,000 of new first mortgage, 4% bonds of 1974. To assure this, the Commission provided:

"That the [R. F. C.] purchase the bonds at par and accrued interest and that, in consideration of such purchase and the value of the collateral securing its claim, the Finance Corporation receive, for the secured notes of the debtor held by it, treatment equal to that accorded holders of the debtor's existing first-mortgage bonds."

Respondents' objections to this ruling are that the Commission acted without a finding of the value of the new bonds or their marketability at par, that the advancement of the R. F. C. secured claim to priority over the like claims of other holders violates absolute priority and that there is no finding of reasonable equivalence between the preference and the value of R. F. C.'s taking the bonds. It is further urged that securities distributed to the R. F. C. to refinance the Trustees Certificates "should be in recognition of the priority inherent in that transaction" and not in connection with the loan of R. F. C. to the debtor, which was made prior to reorganization proceedings.

It is admitted that the $10,000,000 Trustees Certificates or such of them as are presently held by the R. F. C. are worth par. No finding was made by the Commission of the value of the new Firsts. Evidence before the court showed them of a value between 80 and 90 and of poor marketability on account of the system's interest record. The court made no finding as to either.

If the R. F. C. were treated on its notes, on the basis of the proportion of bonds held as collateral, precisely as the other noteholders, it would receive $414,175 of income mortgage bonds and $649,516 of new preferred stock, in addition to its proportion of common stock. 233 I. C. C. 409, 416. This proportion of common stock would allot a much greater aggregate of common stock to the R. F. C. than it obtained by the adjustment. By reason of accepting the less valuable new Firsts in lieu of cash for its $10,000,000 Trustees' Certificates, it will receive for the principal of its claims $1,185,200 of new income bonds and $1,777,800 of new preferred stock. The R. F. C. received its unpaid interest in no par common stock at $57 per share. This is the same allocation given claimants who hold the old Firsts. 233 I. C. C. 409, 452. The other note holders received a large proportion of the principal of their claims in no par common stock at $62 per share.

It is difficult to appraise in dollars, as of the date of the Commission approval, the advantage secured for the plan by the arrangement with R. F. C.. It is equally difficult to appraise similarly as of that date the value of the Trustees' Certificates relinquished by the R. F. C. over the value of the new Firsts or to determine how much of additional worth the R. F. C. obtained. The argument that the Commission does not have statutory authority to pay a creditor, even R. F. C., a government banking corporation, for furnishing new money has little weight. Nor do we see any reason why all claims of R. F. C. may not be considered by the Commission as a single claim. *Consolidated Rock Co.* v. *Du Bois*, 312 U. S. 510, 529. There is nothing to lead us to a conclusion that the Commission gave any advantage to R. F. C. for which full consideration was not given. New money, the Commission said, "is absolutely necessary to effect a reorganization." 233 I. C. C. 409, 414. We have no reason to think the Commission allowed more compensation for this new money to R. F. C. than it would have been compelled to allow in some way, by interest or additional collateral or otherwise to another supplier. We conclude there was nothing in the discretionary action of the Commission to justify its invalidation.

C. We have held hereinbefore that valuation might be made by a method based primarily upon earnings and that so long as creditors receive "full compensatory treatment" their priorities may be represented by securities of different ranks. The Commission has made allocations of securities to the various creditors according to its judgment of the worth of their creditor position or priority in relation to the total worth of the property. It has found specifically that certain claims, under its valuations, have no value. We have pointed out the evidence before the Commission on the question of value. We cannot see that putting definitive dollar values on the whole and on parts of this property would aid the Commission in its work of valuation or the courts in their limited review of the Commission's action.

By its order of June 21, 1939, section P, 233 I. C. C. 441, 451, confirmed September 19, 1939, 236 I. C. C. 1, the Commission authorized the issue of around eighty-four million dollars of securities against the system property. This treats the equipment trusts and the securities with a face value as worth par and the no par common stock at $57 per share for all recognized creditors except the Railroad Credit Corporation and the A. C. James

Company. For distribution to these latter two creditors, the common was valued at $62.

The Commission had before it the data pertaining to past traffic, receipts, earnings and operating ratios, the system's physical condition and prospects for business. This gave an adequate basis for an intelligent estimate of future income likely to be available to meet annual charges before dividends and those dividends themselves.

From this information, a conclusion was reached as to the debts which could be paid in the order of their full or absolute priority. *Case v. Los Angeles Lumber Co.*, 308 U. S. 106, 117. The secured claim of A. C. James Company could not be satisfied in full even with the more liberal valuation of the common stock. Claims of lesser dignity were eliminated. Those entitled to priority over the mortgages, that is, current liabilities, trustees obligations and reorganization expenses, were to be satisfied by cash or assumed by the reorganized company as a charge on its assets superior to the new securities. 233 I. C. C. 409, 452; 230 I. C. C. 61, 100, 101, 102. This left as creditors only the holders of the old 5% Firsts, with an underlying mortgage on the greater part of the property, the R. F. C., the Railroad Credit Corporation and the A. C. James Company, the latter three with refunding mortgage bonds as collateral. We have already explained the arrangement whereby R. F. C. acquired the status of a first mortgage bondholder. Here it is sufficient to say that as determined by the Commission the Refundings had a lien superior to the Firsts on some assets, (233 I. C. C. 414) and the First superiority over the Refunding on the major portion. 230 I. C. C. 61, 97. See *infra*, *Priorities of Conflicting Liens*. With the foregoing facts and primary findings before it, the Commission drew the final conclusion as to allocation of securities as set out on page 8 *supra*. This allocation was based upon "the relative priority, value and equity of the various claims." Cf. 233 I. C. C. 414, 416, 417, 451 P. The distribution and report seems in accord with the requirements and standards of subsections (b), (d) and (e)(1), note 7 *supra*.

Priorities of Conflicting Liens. No. 61 is a petition by the Irving Trust Company, trustee of the General and Refunding Mortgage, which raises questions of the priority between the Refunding Mortgage and the First Mortgage as a lien on three classes of property. These are the debtor's equity in certain rolling stock and equipment acquired under equipment trusts

and a lease, the debtor's interest in the Northern California Extension and the debtor's title to certain "non-carrier" property. The Commission's plan is predicated on the priority of the First Mortgage as a lien on these properties and the Commission accordingly undertook tentatively to determine the legal questions involved. The Commission held that the First Mortgage, senior to the Refunding Mortgage, should be considered to be a first lien on these three classes of property. Petitioner, the Irving Trust Company, as substituted trustee under the Refunding Mortgage, made appropriate objections but the ruling of the Commission was adopted by the District Court. In reversing on appeal, the Circuit Court of Appeal did not pass on the question though the issue was presented. The point is made here by a party prevailing below, the petitioner Irving Trust Company on behalf of holders of refunding mortgage bonds. As the matter is fully presented by the petition for certiorari and its decision is essential to a complete review of the District Court we have concluded to consider the question. Section 240(a) Judicial Code, 28 U. S. C. § 347. *United States* v. *Bankers Trust Co.*, 294 U. S. 240, 294, 295. Such action is in the interest of expedition. *Continental Bank* v. *Rock Island Ry.*, 294 U. S. 648, 685. Cf. *Story Parchment Co.* v. *Paterson Co.*, 282 U. S. 555, 567; *Cole* v. *Ralph*, 252 U. S. 286, 290.

The issues are those of construction of the terms of the First Mortgage. In the case of the first two classes of property, which were acquired after 1916, the year of the mortgage, the question is whether such property is covered by the after acquired property clauses of that indenture and in the case of the third class, the "non-carrier" real property, the question is the application of the granting clauses to property not intimately connected with the operation of the road at the time of the 1916 reorganization of the debtor. None of the parties relies, at least as to personalty, on the controlling nature of rules of law of a particular jurisdiction. The Commission treated the question as one of the interpretation of the language of the mortgage and we shall do likewise.

A. As to the first class of property, it is the contention of the trustee of the Refunding Mortgage that the debtor's equity in the rolling stock subject to the three equipment trusts and the lease is not subject to the lien of the First Mortgage and that it is subject to the lien of the Refunding Mortgage. Since nothing turns on the difference between the equipment trusts and the

lease, they will not further be distinguished. This equity is stipulated to have been worth over $6,000,000 on December 31, 1935, the nearest date available to August 21, 1935, the date of the filing of the petition. Since the obligations secured by all the refunding mortgage bonds outstanding amount to eleven millions it is apparent that determination of this question in favor of the refunding mortgage bondholders would go far towards assuring them equality of treatment with first mortgage bondholders.

The equipment trusts, the usual method of financing the acquisition of rolling stock, were created in 1923, 1924, 1929 and 1931. All are dated between the execution of the First Mortgage and the Refunding Mortgage. Under all, as is usual, the trustee retained title to the equipment, the debtor's equity in the property increasing as it satisfied the serially maturing obligations. The obligations of two of the trusts have become fully satisfied since the institution of this proceeding.

The first of the granting clauses of the First Mortgage conveys presently owned railroad lines, equipment and other property formerly the property of the debtor's predecessor and specifically enumerating, under the subheading "equipment", several varieties of cars and "other rolling stock." Granting clause third, entitled "after-acquired property," covers

"Any and all property and facilities of any and every kind and description, including . . . equipment . . . and any and all right, title and interest in any of such properties or facilities which may from time to time hereafter be acquired or constructed by or belong to" the debtor, if such property falls into any one of four categories:

(1) Property acquired "by the use of First Mortgage Bonds or proceeds thereof or cash deposited" under the first mortgage "or on account of the purchase, acquisition or construction thereof or work thereon" such bonds or sums are paid out; or

(2) Property constituting "an integral part or parts of lines of railroad, extensions, branches, or other property subject to the lien" of the first mortgage; or

(3) Property "used or acquired for use in or for the maintenance or operation of or appertaining to" any of the property subject to the lien of the first mortgage; or

(4) Property consisting of securities of or other interest in the property of the Salt Lake City Union Depot & Railroad Company or Standard Realty and Development Company, or any subsidiary as defined.

The fifth granting clause covers a great variety of properties and facilities used in the operation of a railroad, including tracks,

bridges, tunnels, telegraph and telephone lines, floating equipment and specifically several kinds of cars "and other rolling stock and equipment" and "all other property of every description and all rights and interests in or with respect to the use of property;

"provided that the foregoing or any thereof, whether now owned by the Company or at any time hereafter acquired by it . . . . shall be appurtenant to or used or held for use as, or as a part or as parts of, or to facilitate or safeguard the maintenance or operation of, any lines of railroad, extensions, branches . . . or other properties now or at any time hereafter subject to the lien of this indenture. . . ."[30]

Following the habendum clause is a proviso, hereafter referred to by its two opening words, reading:

"Subject, However, as to all equipment now owned to the equipment trust or conditional sale agreements secured thereon, and as to equipment hereafter acquired, to the equipment trust or conditional sale agreements to which the same shall be subject as permitted hereby, . . ."

It is stipulated that all the equipment subject to the equipment trusts in question was acquired for use and was used on all of the debtor's lines, including those specifically described in the granting clauses. This would seem to make clear that the debtor's equity in equipment trust rolling stock is covered by the lien of the First Mortgage. Subdivision (3) of the third, after acquired property clause, as well as the fifth granting clause, apply.

The refunding mortgage trustee relies, however, on a clause found between the sixth granting clause and the habendum, hereafter referred to as the reservation clause, and reading:[31]

---

[30] This clause also grants "any and all replacements, renewals, improvements and betterments of and additions to" any of the lines or property subject to the lien of the mortgage. In view of the holding as to effect of those clauses quoted in the text it will be unnecessary to consider the contention of the trustee of the First Mortgage that this clause, as supplemented by certain covenants, independently subjects the debtor's equity in equipment trust rolling stock to the lien of the mortgage.

There are six granting clauses. The second covers all lines, lands, structures and equipment and other property, interests or rights, legal or equitable, then owned by the Company, and not set forth particularly. The fourth provides for the grant of additional security, and the sixth covers legal and equitable rights, claims and demands, and rents and income in the property subject to the lien of the indenture.

[31] The portion of this clause preceding that quoted in the text provides:

"But nothing express or implied in this indenture shall be construed to limit the right or power of the Company or any successor or purchasing corporation, which right and power is hereby expressly reserved, by the use of its credit or free funds or by the use of First Mortgage Bonds delivered to

"and the Company may, unless First Mortgage Bonds shall have been authenticated and delivered or their proceeds or other cash deposited hereunder paid out against the same, purchase and acquire equipment, free from the lien hereof, by lease, conditional sale agreement or under any form of equipment trust, or purchase such equipment and issue obligations therefor secured by mortgage or pledge of such equipment superior to the lien of this indenture."

It is argued that this reservation permits the acquisition of rolling stock entirely free from the lien of the First Mortgage, unless acquired, as was not the case here, by the use of proceeds of the first mortgage bonds.[32]

---

the Company or any successor or purchasing corporation as in this indenture provided to reimburse the Company or any such successor or purchasing corporation for expenditures theretofore actually made out of its free funds, to construct or acquire free from the lien hereof lines of railroad, extensions or branches or interests therein, equipment, stocks, bonds or other securities or other property, rights, franchises, immunities or privileges provided the same shall not be lines of railroad, extensions, or branches or interests therein, equipment, stocks, bonds or other securities, or other property, rights, franchises, immunities or privileges (a) on account of the purchase, acquisition or construction whereof or work whereon First Mortgage Bonds shall be authenticated and delivered or their proceeds or other cash deposited hereunder shall be paid out as herein provided; or (b) consisting of, or if securities representing, property or facilities constituting an integral part or parts of lines of railroad, extensions, branches or other property subject to the lien of this indenture or some other integral portion whereof is or integral portions whereof are subject to the lien hereof or represented by securities subject to the lien hereof; or (c) consisting of or, if securities, representing property or facilities used or acquired for use in or for the maintenance or operation of or appertaining to any of the lines of railroad, extensions, branches or other property subject, or represented by securities subject, to the lien of this indenture; or (d) consisting of shares of stock in or other securities of said The Salt Lake City Union Depot and Railroad Company or said Standard Realty and Development Company or any subsidiary company or of any right, title or interest which the Company or any successor or purchasing corporation may acquire in or to any of the property of either of the companies above named or in or to any line of railroad or other property of any corporation which shall then be or immediately prior thereto shall have been a subsidiary company as the term subsidiary company is defined in Section 2 of Article Second hereof;"

[32] The trustee finds further support for this argument in a comparison of the four limitations on the acquisition of property from free funds found in the opening portion of the reservation clause, quoted in the preceding footnote, with the latter portion of the clause, quoted in the text. The opening portion contains four limitations, of which only two are relevant to this argument. The first of these four limitations is that the property may not be acquired by the use of first mortgage bonds or their proceeds and the third relates to property acquired for use in the operation of the road which is subject to the mortgage. It is only this first limitation which is repeated in the latter portion of the reservation clause. It is argued that the omission to repeat the limitation as to property acquired for use in the operation of the road shows an intention that such a limitation should not apply in that latter portion. From this it is said to follow that property acquired for use in the operation of the road but not bought with first mortgage moneys is not subject to the mort-

We do not so view the reservation. It rather performs the function of authorizing the acquisition of equipment by equipment trust or other method and only to that extent displacing the lien of the First Mortgage arising from the after acquired property clauses. The granting clauses show a purpose to subject to the First Mortgage all the property and equipment used in connection with the road. There is repeated general mention of the grant of rolling stock, of legal and equitable interests. The third and fifth granting clauses fully cover this after acquired equity in rolling stock purchased through equipment trusts and the "Subject, however" clause clearly contemplates that the First Mortgage shall be a lien on equipment second only to equipment trust agreements. That clause provides for the subordination of the First Mortgage to equipment trust agreements to which after-acquired equipment shall be subject "as permitted hereby." These last words, a reference to the reservation clause, confirm our view that the function of the reservation clause is merely to permit the purchase of equipment by that method and not to authorize the completely untrammeled acquisition of such equipment.

It is urged that the words "free from the lien hereof" in the reservation clause must be given their literal significance. The

---

gage, i. e., that the words "the Company may . . . purchase . . . equipment, free from the lien hereof, by lease, conditional sale agreement or under any form of equipment trust" should be read literally without regard to the purpose of the clause taken together with the remainder of the mortgage. Thus all but the conclusion of this argument is merely a variation of the argument discussed and rejected in the text, that the words "free from the lien hereof" are to be taken literally and that the purpose of the latter portion of the reservation clause was to accomplish the result contended for by the refunding mortgage Trustee.

If it be said that the words "free from the lien hereof" in the opening portion of the reservation clause have a different meaning from that which we give those same words in the latter portion of the clause the answer must be that in view of the different functions of the two portions of the reservation clause, the difference is required. The opening portion is entirely consistent with granting clause third and the remainder of the reservation clause.

The four limitations in the opening portion of the reservation clause substantially correspond to the four categories of after acquired property which are subject to the mortgage under granting clause third. By the third granting clause, after acquired property in these four categories is subject to the mortgage. By the opening portion of the reservation clause, property not in these categories may be purchased with free funds and will be free from the mortgage. This is so because the categories, as defined in both places, do not comprehend property unconnected with the road of the debtor. Thus the purchase with free funds of a foreign railroad or of domestic real estate unconnected with the road would be permissible under the opening portion of the reservation clause, would not have been covered by the third or fifth granting clauses and might conceivably be the subject of a supplemental indenture under granting clause sixth. See p. 30, *supra*.

argument must fail aside from the difficulties inherent in a suggestion that these words shall be lifted from context and forcibly applied without reference to an intention fairly to be drawn from three specific clauses of the mortgage and reinforced by the entire scheme of the document. The reservation clause provides that the company may acquire equipment "free from the lien hereof" if the method be by lease, conditional sale or equipment trust but may "purchase such equipment and issue obligations therefor secured by mortgage or pledge of such equipment superior to the lien of this indenture." Why the difference? Equipment acquired for cash would unquestionably become subject to the First Mortgage. Equipment acquired under a purchase money chattel mortgage would under this clause be subject to the mortgage. The First Mortgage would merely be junior to the chattel mortgage. Yet equipment acquired under an equipment trust agreement is said to be entirely free of the mortgage. The inconsistency[33] of such a result suggests that the phrases "free from the lien hereof" and "superior to the lien of this indenture" are in a sense correlative and were merely suited to the different title situations in the two methods of financing.

B. The Northern California Extension is a 112 mile branch of the debtor's main line and runs from Keddie, California, to the Great Northern Railroad at Bieber, California. It has been profitable since its construction in 1932 and the Commission expects that its traffic will increase. As has been stated the question as to the extension is whether it is covered by the after acquired property clauses of the First Mortgage. Slightly less than one-half the cost of the extension, or about $5,000,000, was financed by the sale of first mortgage bonds; another $5,000,000 was realized from the sale of unsecured debentures to the A. C. James Co., later replaced by collateral notes secured by refunding mortgage bonds, and the remainder, approximately $500,000, was borrowed from the R. F. C. on the security of refunding mortgage bonds.[34]

---

[33] No reason suggests itself as to why equipment acquired for cash should have been intended to be covered by the First Mortgage and equipment acquired by the equipment trust method not be subject to the mortgage after the equipment trust obligation is completely satisfied. Yet this is a consequence of the argument pressed upon us.

[34] Construction of the extension was begun in August, 1930, and by the end of December a substantial amount of the work had been completed. Connection with the Great Northern was made on November 10, 1931, and freight service was then inaugurated under the jurisdiction of the construction department. On June 1, 1932, the line was placed in full operation. The cost of construction to May 31, 1932, was $10,183,641.90 and additional sums were

In view of this the refunding mortgage trustee contends that the First Mortgage should as a matter of equity be held a lien on the extension only to the extent of first mortgage moneys used or that it be held a first lien on a portion of the mileage equal to the proportion that first mortgage moneys bore to the total cost, or on an undivided interest in the extension in the same proportion. But here again the terms of the First Mortgage preclude such a contention. The third granting clause covers "any and all property . . . including . . . extensions . . . if

(a) acquired or constructed by the use of First Mortgage Bonds or proceeds thereof or cash deposited hereunder (except bonds delivered or cash paid out under any of the provisions of this indenture in reimbursement of previous expenditures certified as hereinafter provided) or on account of the purchase, acquisition or construction thereof or work thereon First Mortgage Bonds shall hereafter be authenticated and delivered or the proceeds of First Mortgage Bonds or other cash deposited hereunder shall hereafter be paid out under any of the provisions of this indenture; . . ."

The reservation clause supplements this by its provision that the right to acquire property free of the lien shall not extend to "lines of railroad, extensions or branches . . . (a) on account of the purchase, acquisition or construction whereof or work whereon First Mortgage Bonds shall be authenticated and delivered or their proceeds or other cash deposited hereunder shall be paid out as herein provided; . . ." See n. 31, *supra*.

The substantial nature of the financing of the extension by the sale of first mortgage bonds is a matter of record and we hold that the quoted portion of the third granting clause and especially the clause beginning "or on account of the purchase, acquisition or construction thereof or work thereon" bring this extension within the coverage of the First Mortgage. In opposition to this conclusion it is said that it would permit the First Mortgage to

later expended. It was financed as follows: First mortgage bonds in the amount of $5,000,000 were sold at 97½ between February 11, 1931, and January 29, 1932, producing $4,875,000. Between February 27, 1931, and May 31, 1932, $5,000,000 of debentures, issued under an indenture dated July 1, 1930, were sold for cash at par to A. C. James Co. These debentures were retired in March and May, 1932, through the issue of notes to the A. C. James Co. for $4,999,800 ($200 being paid in cash) secured by a pledge of $6,249,500 face amount of refunding mortgage bonds. The Refunding Mortgage was executed and delivered February 29, 1932, as of January 1 of that year. The remainder of the total cost of construction was financed by loans of $559,408 procured from the R. F. C. in March, June and August, 1932. These were parts of larger loans and were secured by refunding mortgage bonds.

become a lien on the extension if only one penny of first mortgage money had been used. That is of course not our case. Here we have a considered plan for financing an extension which contemplated that 50% of the necessary moneys be procured through the sale of first mortgage bonds. The terms of the after acquired property clause disclose an intention that where at least such part of the funds used for the construction of such an extension are first mortgage funds that the entire extension should be subjected to the lien of the mortgage. The refunding mortgage trustee contends that it is inequitable to give the first mortgage bondholders a lien to the extent of all first mortgage bonds outstanding when in fact those bondholders contributed only $5,000,000 to the cost of construction and the refunding mortgage bondholders contributed the remainder. The asserted inequity disappears on a reference to the record where it plainly appears that the parties concerned had no understanding that the lien situation would be different from what we have held it to be.[35]

---

[35] The primary parties conecrned were The Western Pacific Railroad Corporation, purchaser of the $5,00.,,00 of first mortgage bonds in question and the A. C. James Co., purchaser of a like amount of debentures. The A. C. James Co. in 1929 offered to finance the cost of the extension in return for a first lien thereon. It was then believed that the cost of the extension would be approximately $5,000,000. When it developed that it would greatly exceed that amount, the A. C. James Co. withdrew this offer and substituted another offer to advance 50% of the moneys needed, the advances not to exceed $5,000,000. No mention was made in this second offer of a first lien or, indeed, of any lien and the indenture under which the debentures were issued was equally silent. The parties were fully aware that the remaining 50% of the cost would be paid by the sale of first mortgage bonds or other funds. The second offer, in the form of a commitment to bid at public sale, was accepted by the debtor.

The specifications referred to in the notice calling for bids on the debentures contain the following:

> "The main line of railroad of the Company extends from San Francisco, California, to Salt Lake City, Utah, with branches, and aggregates 1050.5 miles more or less of first track. Upon the completion of the Company's 'Northern California Extension' its main line of railroad will aggregate 1198.5 miles, more or less. A map of the Company's railroad system is hereto annexed.
>
> "The First Mortgage of this Company dated June 26, 1916, securing this Company's First Mortgage Bonds, whereunder not more than $50,000,000. thereof may be outstanding at any one time, is a first lien on said main line of railroad."

The bid of the A. C. James Co. stated that it was made in accordance with the specifications, which had been examined by the bidder.

The specifications in connection with the offers of the $5,000,000 of first mortgage bonds contain similar statements:

> "Said First Mortgage constitutes a first lien on the main line of railroad of the Company extending from San Francisco, California, to Salt Lake City, Utah, and branches, aggregating 1050.5 miles, more or less, of first track, the Company's terminal and other railroad properties in the cities

C. Lastly, the refunding mortgage trustee makes a limited claim against certain "non-carrier" realty which is alleged to be completely free of the lien of the First Mortgage. The refunding mortgage trustee believes that this property should be given consideration as unmortgaged property in the allocation of securities to the refunding mortgage creditors.

The greater part of this property, which was not used for railway purposes, was acquired from the debtor's predecessor, the Western Pacific Railway Company, pursuant to its reorganization in 1916 and the question is whether this property is within the terms of the First Mortgage.[36] We answer this question affirmatively. Despite the fact that it is or was not used for transportation purposes, the mortgage nevertheless covers it by the conveyance of:

"First.—All and singular the following described lines of railroad, terminals, lands, equipment, shares of stock and other real and personal property and interests and rights in property owned by the Company or to which it may be entitled, formerly the property of or belonging to Western Pacific Railway Company, a corporation of the State of California, or its receivers: . . ."

. . . . . .

"III. All terminals and all lands and interests in lands, easements therein and improvements thereon, including, among other things, yards, station and depot grounds, sheds, station houses,

---

of San Francisco, Oakland and elsewhere, and certain of its rolling stock and equipment. Upon the completion of the construction and/or acquisition of the Company's 'Northern California Extension' its main line of railroad will aggregate 1198.5 miles, more or less. A map of the Company's railroad system is hereto annexed.'

The bids of The Western Pacific Railroad Corporation contain a reference to the specifications similar to that in the bid of the A. C. James Co.

Mr. A. C. James was during this time the president and a director of the A. C. James Co., a director of the Western Pacific Railroad Corporation and a director of the debtor.

It is not suggested that the understanding of the Reconstruction Finance Corporation as to the lien of the refunding mortgage bonds pledged with it to secure the loans made to complete payment for the extension was different. See Western Pac. R. Co. Reconstruction Loan, 180 I. C. C. 645, 646, 648-9, an exhibit herein.

[36] A portion of this "non-carrier" property was acquired after 1916, some of it by the use of first mortgage moneys and some of it in substitution for property released from the lien of the First Mortgage. The refunding mortgage trustee makes no claim to the property acquired by the use of first mortgage moneys. Another small portion of the property was acquired after 1916 but without the use of first mortgage moneys, for use as future industrial sites and for gravel pit purposes. The claim to this last property is not specified in the briefs of the refunding mortgage trustee and it seems to be of such negligible value as would not warrant a reallocation of securities if it were to be held that this property is not subject to the first mortgage lien.

freight houses, warehouses, elevators, stock-yards, car-houses, engine houses, oil tanks, water tanks, water supply, shops, hotels, boarding houses, hospitals, docks, wharves, piers, slips, telephone and telegraph lines and other structures and erections and the appurtenances of all and every of the foregoing, whether or not for use in connection with said or any lines of railroad."

The last subdivision of the first granting clause, which follows six subdivisions specifically describing certain properties, conveys:

"other property.

VII.—All and singular the property, interests and rights, (except cash, accounts and bills receivable, traffic and other operating balances and other cash items) not comprised in the descriptions contained in the foregoing subdivisions of this clause First of these granting clauses, which belong to the Company or to which it may be entitled in any manner and which heretofore were owned by Western Pacific Railway Company or to which said company was or its receivers were entitled."

Reinforcing these provisions is the second granting clause:

"Second.—All other lines of railroad, extensions, branches, terminals, lands, structures, equipment, shares of stock, bonds, notes and other securities, claims, franchises, privileges and immunities and other property and estates, interests and rights (whether legal or equitable) now owned by or belonging to the Company, notwithstanding the same or any thereof may not be particularly set forth in these granting clauses."

In these clauses it is repeatedly specified that all property, railroad or otherwise, formerly owned by the debtor's predecessor and to which the debtor succeeded, is to be subject to the First Mortgage.

We therefore affirm the District Court's conclusion adopting the Commission's tentative determinations as to the priority of the First Mortgage.

Accommodation Collateral. The debtor, The Western Pacific Railroad Company, objects to the provision of subdivision R of the Commission's final order, approved by the District Court, directing that

"All collateral pledged by the debtor as security for notes to the Reconstruction Finance Corporation, the Railroad Credit Corporation, and the A. C. James Company shall be reduced to possession by the respective pledgees thereof, and shall be by them surrendered to the reorganized company and canceled. . . ." 233 I. C. C. 453; 34 F. Supp. 493, 505.

This order arises from the following circumstances. As is shown on page 3, *infra*, the Reconstruction Finance Corporation, the Railroad Credit Corporation and A. C. James Company have notes of the debtor secured by pledges by the debtor of various amounts of the debtor's General and Refunding Bonds and other collateral.[37]

To assist the debtor in obtaining the Reconstruction Finance Corporation and Railroad Credit Corporation loans, the A. C. James Company furnished to the debtor a block of refunding bonds, previously issued to A. C. James Company by the debtor and Western Pacific Corporation furnished to the debtor other collateral described in the Commission finding. These securities were a part of those then pledged by the debtor to secure the notes held by Railroad Credit Corporation and Reconstruction Finance Corporation, which knew the source of the collateral at the time.

The debtor's objection to the Commission's order is stated by it as follows:

"In substance, the Commission provided that the collateral owned and pledged by the Debtor should be surrendered to the reorganized Company but that the accommodation collateral borrowed from others and pledged by the Debtor should be confiscated; or, to state the proposal somewhat differently, the accommodation collateral is to be resorted to first instead of last as is required by the most elemental principles of equity and by the authorities cited below."

We think, however, that the objection is not sound and that the Commission's order is correct. These are our reasons. The refunding bonds pledged by the debtor to secure the A. C. James

[37] The claims and security therefor were found by the Commission to be, as of June 30, 1938, as follows: "class 3 items consisted of $4,999,800, face amount, of notes to the A. C. James Company, on which accrued and unpaid interest amounted to $1,124,955, and which are secured by $4,249,700, principal amount, of the debtor's general and refunding bonds, and a second lien upon $2,000,000, principal amount, of the same issue of bonds held by the Railroad Credit Corporation; class 4 items consisted of $2,963,000, face amount, of notes to the Reconstruction Finance Corporation, on which accrued and unpaid interest amounted to $649,181, the notes being secured by $10,750,000, principal amount, of the debtor's general and refunding bonds, and voting-trust certificates for half of the voting stock of the Denver & Rio Grande Western Railroad Company, and a second lien upon $2,000,000, principal amount, of the same issue of bonds held by the Railroad Credit Corporation; class 5 items consisted of $2,445,610, face amount, of notes to the Railroad Credit Corporation, on which accrued and unpaid interest amounted to $135,296, which notes are secured by $4,000,000, principal amount, of the debtor's general and refunding bonds, and a second lien upon the security held by the Reconstruction Finance Corporation, an assignment of certain advances by the Western Pacific Railroad Corporation, and an assignment of the distributive share of the debtor under the marshaling and distributing plan, 1931;" 230 I. C. C. 77.

Company note and left in that position throughout were pledged directly by the debtor and are not accommodation collateral in any sense. Nor do we need give consideration to the accommodation collateral behind the Reconstruction Finance Corporation and Railroad Credit Corporation notes other than the refunding bonds. In the earlier order approving the plan, the Commission provided that the rights of the Reconstruction Finance Corporation and Railroad Credit Corporation "in collateral pledged with them by parties other than the debtor" should not be disturbed or altered. 230 I. C. C. 102; subdivision O of the order of October 10, 1938, *id.* 114. On consideration of the petitions for modification of this order, the Commission refused to direct that this collateral be "surrendered to the pledgors thereof." 233 I. C. C. 431, 432. In its order, however, promulgating the present plan there is no clause comparable to subdivision O of the previous order preserving the rights of Reconstruction Finance Corporation and Railroad Credit Corporation in the collateral pledged with them by "parties other than the debtor." The sole provision in the final order as to the collateral behind the Reconstruction Finance Corporation and Railroad Credit Corporation is that found in subdivision R and quoted at the opening of this section of this opinion, directing the collateral pledged by the debtor with Reconstruction Finance Corporation, Railroad Credit Corporation and A. C. James Company, be reduced to possession, surrendered to the reorganized company and canceled. This was entirely proper. None of the collateral, other than the refunding bonds, was a claim against the debtor. A. C. James Company and the Western Pacific Corporation perhaps had unsecured claims against the debtor for their securities and other collateral which the debtor had borrowed but these were held worthless as claims against the debtor. 233 I. C. C. 452. This collateral, other than the refunding bonds, was therefore left with the pledgees with its position unaffected by any direct action of the Commission.

The "collateral pledged by the debtor" referred to in the excerpt from subdivision R of the Commission's final order, 233 I. C. C. 453, quoted above, can be only the general and refunding bonds of the debtor, including those previously furnished by A. C. James Company. The words used in subdivision R to describe them are the same used by the Commission in distinguishing the refunding bonds from the remainder of the accommodation col-

lateral. 233 I. C. C. 431, 432. Of course the collateral loaned to the debtor which was not an obligation of the debtor could not be ordered by the plan to be canceled. It remained with the pledgees. This "collateral pledged by the debtor" was properly to be reduced to possession by the pledgees, surrendered and cancelled. For these bonds, furnished by A. C. James Company, held as collateral with other bonds of the debtor, the Reconstruction Finance Corporation and Railroad Credit Corporation received their allotment of new securities, 230 I. C. C. 101, as modified by the Reconstruction Finance Corporation arrangement, described in this opinion at page 25. See 233 I. C. C. 414, 452. The A. C. James Company unsecured claim against the debtor for the loan of the bonds is valueless, 233 I. C. C. 452, and the plan does not deal with any possible claim of accommodation pledgors against pledgees of bonds which were not the property of the debtor.

Change of Conditions. The plan now under consideration was certified to the court on September 28, 1939. To provide for a $3 dividend on the no par stock, the plan calls for future earnings available for betterments, interest, sinking fund and dividends of over $4,500,000. The table on page 5 shows how difficult it had been for the system to earn that amount. Anticipated earnings was the principal factor governing the valuation of the property and the dollar volume of new securities, and past earnings was an important factor in estimating future earnings. A higher estimate of future earnings available for dividends might have created an equity for unsecured creditors or even stockholders. Furthermore, respondents urge that the "earning power" of the property referred to in subsection (e) means not only realized earnings but the system's ability, utilizing its present facilities to the full, to earn increased returns. This we deem of little weight against the history of past operations. Respondents ask us to take into consideration the changed conditions since the Commission acted. There are a few years of actual experience subsequent to the certification. By stipulation of the parties reports of operating results, combined, have been filed for our consideration for the period beginning December 1938 down to and including July 1942. Since we have agreement among the parties as to the earnings available for interest, as adjusted, through 1939, see page 5 *supra*, we need refer only to subsequent periods. These reports show the following sums available for interest, 1940—

$2,513,090; 1941—$4,548,128; 1942 (7 months) $4,830,986,* less relatively minor deductions which have not been consistently treated in the reports. This last group of figures is utilized by us as a rough extension of the table of earnings on page 5. They are useful to show the striking increases over the old averages but have not been adjusted to conform mathematically with the table of earlier years.

In the interest of advancing the solution of as many problems in reorganization as possible we have deliberated upon the effect to be given these unexpectedly large earnings. There are factors in these increased incomes which obviously affect their weight as evidence of continued capacity to produce earnings available for dividends. The effect of taxation is not wholly answered by deductions of tax estimates on the basis of present rates. The reduction by the plan of outstanding interest bearing securities makes income taxes more likely to affect net earnings. Increased wages and costs must be reckoned with and increased maintenance may reasonably be expected from increased use. Already serious proposals for decrease of tariffs have been advanced. Order of the Interstate Commerce Commission in *Ex parte No. 148*, January 4, 1943.

Respondents, of course, admit that the needs of war have increased traffic. Transcontinental transportation has at the moment displaced a large proportion of that from coast to coast, via the Panama Canal. Buses and trucks have yielded much of their gains in volume to railroads. But respondents point to the Northern California Extension and the Dotsero Cutoff as permanent feeders to the debtor's growing business. They see a post-war reconstruction and rehabilitation period which promises a continuance of heavy railway use into the indefinite future. This, say respondents, is to be appraised in the light of the necessity for a national transportation system adequate for the productive capacity of the war facilities, when they are turned to peaceful pursuits.

The Commission, at the time of its certification to the court, September 28, 1939, acted as the results of increased business were just emerging into increased profits.[38] In objections to the

*We have been furnished statements of operating results of the debtor through November, 1942, which show for that part of the year income available for fixed charges of $10,309,517.18.

[38] Cf. Florida East Coast Ry. Co. Reorganization, Supplemental Report, August 10, 1942, 252 I. C. C. 731, 733:

"In the report of April 6, 1942, division 4 recognized the fact that 1941

Commission plan filed in the court on December 8, 1939, it was suggested that "any estimate of railroad earnings made prior to the development of war conditions must be revised." The court after considering all of the objections offered, but without specifically discussing the changed conditions, approved the plan on August 15, 1940. 34 F. Supp. 493, 504. The Commission's forecast was made with knowledge and not in disregard of past fluctuations of income, in war and in peace. On the showing as to changed conditions made before the District Court, there was no basis for a disapproval of the Commission plan as unfair to the junior equities. The further evidence of increased earnings, placed in the record by the stipulations, does not lead us to reject the Commission's plan.

Effective Date of Plan. January 1, 1939, was chosen as the effective date of the plan. The debtor objects to this on the ground that subsection (1) fixes the date of filing the petition as the date for the plan.[39] The practical result of the debtor's argument is to make the interest rate of the new securities applicable from August 2, 1935, instead of from January 1, 1939. As the new securities bear lower interest rates than the contract securities, a savings to the estate would accrue.[40] But we are of the opinion that the provisions of subsection (b) are sufficiently broad to empower the Commission to select the date for the institution of the reorganization. Cf. *Group of Industrial Investors* v. *C. M. St. P.*

---

earnings were influenced by the extraordinary conditions existing as the result of the war and, in the report, stated fully all considerations leading to its conclusions as to justifiable amounts of capitalization and of new general-mortgage bonds. Under present conditions, the fact that the year 1942 gives promise of producing even larger earnings than 1941 affords too uncertain and precarious a basis to justify the increases sought."

The Minneapolis & St. Louis R. R. (D. C. Minn.), September 10, 1942; Order No. 968, — F. Supp. —, memorandum, page 13263.

[39] Section 77(1)

"In proceedings under this section and consistent with the provisions thereof, the jurisdiction and powers of the court, the duties of the debtor and the rights and liabilities of creditors, and of all persons with respect to the debtor and its property shall be the same as if a voluntary petition for adjudication had been filed and a decree of adjudication had been entered on the day when the debtor's petition was filed."

[40] No contention is made that fully secured claims do not bear contract interest to the date of reorganization, whenever it may be. Ticonic Bank v. Sprague, 303 U. S. 406.

& P. R. R. Co., Nos. 11-19, 32, 1942 Term, decided this day, slip opinion p. 14.

Costs. The Institutional Bondholders Committee in No. 7 and the Trustees of the First Mortgage in No. 8 call our attention to the provision in the decree in the Circuit Court of Appeals for costs against appellees there and suggest that costs should be assessed directly against the estate of the debtor in proceedings under section 77. Our reversal of the decree leaves the appellees below free of this provision of the decree and requires us to assess costs on the review. We see also no reason why costs should not be assessed against the losing parties on this review of the action of the District Court and it will be so ordered. This assessment is without prejudice to a motion for allowance for disbursements by respondents in accordance with subsection (c)(12).[41]

Other minor objections to the plan as approved by the District Court are advanced but we do not consider them as of sufficient weight to require comment.

From the foregoing it follows that the judgment of the Circuit Court of Appeals should be reversed and that of the District Court affirmed.

It is so ordered.

Mr. Justice FRANKFURTER agrees with this opinion barring only the views expressed regarding the respective functions of the Interstate Commerce Commission and the District judge, under Section 77 of the Bankruptcy Act.

Mr. Justice JACKSON and Mr. Justice RUTLEDGE took no part in the consideration or decision of this case.

SUPREME COURT OF THE UNITED STATES.

Nos. 7, 8, 20, 33 and 61.—October Term, 1942.

Frederick H. Ecker, John W. Stedman, and Reeve Schley, constituting Institutional Bondholders Committee, Petitioners,
vs.
Western Pacific Railroad Corporation, A. C. James Co., The Railroad Credit Corporation, et al.

On Writs of Certiorari to the United States Circuit Court of Appeals for the Ninth Circuit.

[March 15, 1943.]

Mr. Justice Roberts.

I am in agreement with much that is said in the opinion, but I desire separately to state my views as to the respective roles assigned to the Interstate Commerce Commission and to the District Court in the reorganization process.

Section 77 was adopted in the exercise of the power conferred by the Constitution upon Congress to establish uniform laws on the subject of bankruptcies throughout the United States. The proceeding is, from its initiation, one in bankruptcy. The legislation constitutes the Interstate Commerce Commission an arm of the court and clothes the Commission with certain functions as such. No question is made as to the authority of Congress thus to divide responsibilities between the court and the Commission in the formulation of a plan of reorganization. Section 77 is the guide to decision concerning the respective duties of the court and the Commission. The statutory provisions quoted in Note 7 of the majority opinion seem to me clearly to define the boundaries of the powers conferred.

Certain requisites and certain permissible features of the plan, for the formulation of which the Commission has sole responsibility, are prescribed or permitted. Within very broad limits the Commission is given discretion in the application of these in formulating a plan. [Subsection (b).] When the plan is certified to the judge his function is, as the court holds, merely to see that the limits set in subsection (b) are not transgressed; that the Com-

mission has observed the standards and limits thereby set. See Subsection (e) which directs that the judge shall approve the plan if satisfied that it complies with the provisions of subsection (b).

Other functions are reposed solely in the Commission. It is to determine whether the plan "will be compatible with the public interest". [Subsection (d).] I need not discuss the purport of this direction, which obviously relates, in the main, to the proposed corporate and capital structure of the reorganized company. That structure must be such that the rehabilitated enterprise may have a reasonable prospect of satisfactory public service. The statute will be searched in vain for any mandate to the court to review or overturn the Commission's judgment in this respect; and I agree that the District Court properly held that the protection of the public interest was so far committed to the Commission that, except for the most egregious disregard of relevant considerations, the judge should hold himself bound by the Commission's appraisal of the demands of that interest.

Another vital step in formulating any plan is committed to the judgment of the Commission. This is valuation of property. Subsection (e) states that, if it shall be necessary to determine the value of any property for any purpose under the Act, the Commission shall determine such value and certify the same to the court in its report. It seems clear, as the opinion states, that the court cannot reject the plan for any mere asserted error in valuation. Its power is limited to an examination of the question whether the Commission acted wholly without evidence, arbitrarily, or in disregard of recognized criteria.[1]

In equity reorganizations prior to the passage of § 77 the phrase "fair and equitable" had come to have a recognized content. It meant that, in allotting interests in the reorganized company, the priorities existing between lienors and stockholders of the debtor must be substantially preserved. No reorganization could be fair and equitable if, in the new capital structure, junior interests were allowed to participate at the expense of those who had had a senior position in the old.[2]

---

[1] I believe this is so as to the valuation of all the assets and as to valuations of property subject to liens or available for the claims of classes of creditors or stockholders. See Subsection (e) par. 2.

[2] Northern Pacific Ry. Co. *v.* Boyd, 228 U. S. 482; Case *v.* Los Angeles Lumber Co., 308 U. S. 106; Consolidated Rock Products Co. *v.* Du Bois, 312 U. S. 510.

Section 77 sought to preserve and enforce this rule of law. By subsection (d) the Commission is charged with seeing that a proposed plan meets the requirements of subsection (e) and, by subsection (e) it is provided that, on certification of a plan to the court, all parties may file detailed and specific objections to the plan and their claims for equitable treatment. The judge is to hold a hearing on such objections "and such claims for equitable treatment". Thus the statute provides for the framing in court of sharp and specific issues directed to the plan's compliance with the rule governing allocation, and this fact is emphasized by the leave granted the parties to produce in court additional evidence. After the direction that the judge shall approve the plan "if satisfied" it complies with subsection (b), (which involves only a determination, as above indicated, whether the Commission, in setting up the plan, has respected the limits set by Congress in subsection (b)), subsection (e) goes on to deal with the judge's action on the objections of the parties and their claims for equitable treatment. It provides that he must be satisfied that the plan "is fair and equitable, affords due recognition to the rights of each class of creditors and stockholders, does not discriminate unfairly in favor of any class of creditors or stockholders, and will conform to the requirements of the law of the land regarding the participation of the various classes of creditors and stockholders."

I read this language as placing upon the court a duty quite distinct from any imposed upon it in connection with the general features of the plan or in connection with any findings of the Commission with respect to the value of property. The statute contemplates that the judge shall not only examine the findings of the Commission with respect to the fair equivalent of what is granted to mortgagees or stockholders compared to the interest in the old company that they are to surrender, and the Commission's reasons for its action, but also hear evidence by which he may be more fully informed as to the equity and fairness, as those terms have specific legal connotation, of rights accorded under the plan in relation to those theretofore enjoyed. In my view, Congress intended that the judge should satisfy himself, as in the old equity proceedings he was bound to do, that the relation between the various classes of investors is substantially maintained in the reorganization.

In order to discharge this judicial duty the court obviously may have to pass upon questions of law. In the present case, a deci-

sion as to the priority and extent of the respective mortgage liens is a legal prerequisite to an adjudication of the issue whether different classes of mortgage bondholders received fair and equitable treatment in the apportionment of new securities. I agree with the conclusions of the court on the question of law thus presented. It happens that the parties in interest do not challenge the fairness of the allocation as between them, if the Commission was right in its tentative conclusion concerning the coverage of the first mortgage and that of the general and refunding mortgage. In this case, then, the function of the court was fully performed once it had decided that question of law. In other cases, where the issue of fairness and equity depends upon the facts disclosed, I think it is the duty of the court to go farther and examine the plan sufficiently to satisfy itself that the rule of absolute priority announced in the *Boyd* case and in the *Los Angeles* and *Rock Products* cases has not been violated. In performing this duty the court should accord great weight to the Commission's action. It should require the objector to show that the Commission has failed to respect the doctrine. But it should not accord finality to the Commission's action if there be any evidence to support it. I believe the court is charged by subsection (e) with the duty of determining that, in the allocation of securities in the reorganized company, the Commission has a substantial foundation in the facts for the allocation of securities required by the plan it approves.

I concur in the judgment of the court.

Mr. Justice FRANKFURTER joins in this opinion.
